It would seem that only a few Jews found their way to **Maryland** during the first half of the seventeenth century, and that the first settlers of this colony came as individuals, and not in considerable numbers at any time, as was the case in New York, Newport, Savannah, and Charleston. To judge by the names alone it would appear that a few Jews were resident in Maryland from the earliest days of the colony. The most prominent figure, who was unquestionably a Jew, was a Dr. Jacob LUMBROZO,

who had arrived Jan. 24, 1656, and **Jacob Lumbrozo**, who, in 1658, was tried for blasphemy, but was released by reason of the general amnesty granted in honor of the accession of Richard Cromwell (March 3, 1658). Letters of denization were issued to Lumbrozo Sept. 10, 1663. Besides practising medicine, he also owned a plantation, engaged in trade with the Indians, and had active intercourse with London merchants. He was one of the earliest medical practitioners in the colony, and his career casts much light upon the history and nature of religious tolerance in Maryland. By the strength of his personality he was able to disregard nearly all the laws which would have rendered his residence in the colony impossible,

and he seems to have observed his faith even though this, under the laws, was forbidden. The unfavorable environment rendered the admittance of Jews to Maryland difficult, and until the Constitution of 1776 established the religious rights of all, few Jews settled in the colony. Beginning with the year 1797, by which time a considerable number of Jews had arrived there, the history of the Jews of Maryland is of special interest. By the terms of the Constitution of 1776 none could hold office in the state who was not a subscriber to the Christian religion. In the year just mentioned Solomon ERRINO and Bernard GRATZ, and others, presented a petition to the General Assembly at Annapolis asking to be placed upon the same footing with other citizens. This was the beginning of an agitation, lasting for a generation, to establish the civil and political rights of the Jews. As this first effort failed it was renewed at almost every session of the Assembly until 1818. During the succeeding seven years the Cohen family, which had come to Baltimore in 1803 from Richmond, Va., took an important part in the attempt to establish their rights as citizens. The most active member of the family in this struggle was Jacob I. COHEN, who was ably assisted by Solomon Etting. Their persistent efforts met with success in 1825, when an Act of Assembly was passed removing the disabilities of the Jews; and in 1826 both of the above-named were elected members of the city council.

**Jacob I. Cohen and the Struggle for Religious Liberty.**

At the outbreak of the Civil war Maryland, although remaining in the Union, numbered among her citizens a large body of sympathizers with the Confederate cause. Owing to the pronounced anti-slavery attitude assumed by Rabbi David EINHORN, the conflict of opinion was especially severe among the Jews. For the most part the history of Maryland is the history of Baltimore, where Jews had settled in small numbers prior to the Revolution. The most prominent of these settlers was Benjamin LEVY, who, in addition to being a prominent merchant, had the distinction of being appointed one of the committee to arrange the celebration in Baltimore of the adoption of the Declaration of Independence. The first cemetery was procured as early as 1786, and the beginnings of communal organization date from 1826, although the congregation was not regularly organized until 1838. The Jews of the city have participated to a considerable extent in the civic life of the town and state, and have taken some part in national affairs. A number have been members of the Assembly, and at the present time (1905) Isidor RAYNER is a United States senator. The Jewish population of Baltimore in 1902 was estimated at 25,000, and that of the twenty-three counties, including towns outside of Baltimore, at 1,500, making 26,500 the total Jewish population of the state.

It is of record that Jews from New Amsterdam traded along the Delaware River as early as 1655. There were probably some settlers in the southeastern portion of the territory of which William Penn took possession in 1681. A very considerable number of the early Pennsylvania colonists were Ger-

mau Jews. The first Jewish resident of PHILADELPHIA was Jonas Aaron, who was living there in 1703. Another early pioneer and one of considerable prominence was Isaac Miranda. He was the first to settle at LANCASTER, at which place, as also at Shaefferstown, there was an early Jewish immigration. Miranda became a convert to Christianity and held several state offices. A number of Jews settled in Philadelphia in the first half of the eighteenth century, and became prominent in the life of the city. Among these were David Franks, Joseph Marks, and Sampson Levy. The Non-Importation Resolutions of 1765 contained the signatures of eight Jews, an indication of the importance of the Jewish community at this time. As early as 1747 a number of persons held religious services in a small house in Sterling alley, and afterward in Cherry alley—between Third and Fourth streets. They were mostly German and Polish Jews; and their differences as to the liturgy to be followed prevented, at the time, the formation of any regular congregation. Attempts, indeed, were made in 1761 and 1773 to form one, but none was established until the influx of Jews from New York during the Revolutionary war, with the arrival of Gershom Mendes Seixas, gave the community sufficient strength to carry out this cherished object. A lot was purchased and a synagogue erected, the dedication occurring in Sept., 1782. A number of Philadelphia Jews served in the army of the Revolution; and the inestimable services rendered by Haym SALOMON to Robert Morris in the finances of the Revolution make his name stand out as the most prominent character in American Jewry. The Congregation Mickvé Israel adopted the Sephardic ritual, and the most important minister of the congregation after Seixas was Isaac LEESER, who arrived in 1829. He was the leading Jewish minister of his time, and few others have left such an impress upon American Jewish affairs as he. As minister, teacher, organizer, translator of the Bible, editor, and publisher he was a man of indefatigable energy and rare ability. Prominent also were members of the PHILLIPS family, chief among whom were Zalegman Phillips and Henry M. Phillips. The latter was one of the leading lawyers of Philadelphia, a politician of importance, and a member of the 35th

**Philadel-phia.**

**Mickvé Israel and Rodeph Shalom.** Leeser's successor as minister of the Mickvé Israel congregation was Sabato MORAIS, a native of Leghorn, Italy, who, from 1851 until his death in 1897, was a leading figure in American Jewish affairs. It was due to his efforts that a Jewish Theological Seminary was established in New York.

The first German congregation was the Rodeph Shalom, which was organized in 1802, but which probably had meetings at an earlier date. The most prominent of its rabbis was Marcus JASTROW, who was succeeded by the present incumbent, Henry Berkowitz. The best-known cantor of this congregation was Jacob Frankel. During the Civil war he acted as chaplain of hospitals under the United States government. The first leading Reform minister installed in Philadelphia was

Samuel Hirsch. Many other congregations have been formed, especially since 1882, when the Russian emigration brought large numbers to the city. Next in importance to the settlement at Philadelphia was that at **Lancaster**, where Jews were to be found in 1730, before the town and county were organized. Joseph Simon was the best known of the first arrivals. Meyer Hart and Michael Hart were among the earlier settlers at **Easton**, where they arrived previous to the Revolutionary war. A synagogue was established there in 1839. **Shaferstown** had a few Jewish settlers at an early date, and a synagogue and cemetery in 1732. For a considerable number of years preceding the Revolutionary war a number of Jews of Pennsylvania were engaged in the exploitation and sale of western Pennsylvania lands. Among the more prominent of these were Jacob and David FRANKS, Barnard and Michael GRATZ, Joseph Simon, and Levy Andrew Levy.

There is an important Jewish settlement in **Pittsburg**, where Jews arrived in considerable numbers as early as 1830, organizing a congregation in 1846; in **Harrisburg**, where a congregation was established in 1851; and in **Wilkesbarre**, **Scranton**, and **Reading**. As elsewhere, the Russian emigration of 1882 largely increased the number of Jews in Pennsylvania, and communities are now to be found in at least fifty towns of the state. The present (1905) Jewish population of Pennsylvania is estimated at 115,000, of whom nearly 75,000 live in Philadelphia.

The Jewish settlement in **Georgia** dates almost from the very foundation of the colony; and the early history of Georgia is practically the history of the growth and development of **Savannah**, Jewish life centering in that city. It would appear that a movement was set on foot in London to settle some Jews in the colony even before Oglethorpe, in June, 1733, led his first band of followers to the point which soon after became the city of Savannah. The second vessel which reached the colony from England (on July 11, 1733) had among its passengers no less than forty Jewish emigrants. Though their arrival was unexpected, the liberal-minded governor welcomed them gladly, notwithstanding that he was aware that the trustees of the colony in England had expressed some opposition to permitting Jews to settle there. These first settlers were all of Spanish and Portuguese extraction, though within a year of their arrival others, who were apparently German Jews, also took up their residence there. These two bands of settlers received equally liberal treatment from Oglethorpe, and were the progenitors of one of the most important communities of Jews in the United States. Many of their descendants are still living in various parts of the country. The first male white child born in the colony was a Jew, Isaac Minis.

Among the first immigrants was Dr. Nuñez, who was made welcome because of his medical knowledge, and because he, with a number of others, brought sufficient wealth to the colony to enable the immigrants to take up large tracts of land. A congregation was organized as early as 1734. Three years later Abraham de Lyon, who had been a "vineron" in Portugal, introduced the culture of

grapes. The cultivation and manufacture of silk and the pursuit of agriculture and of commerce were the chief occupations of these early settlers. A dispute with the trustees of the colony respecting the introduction of slaves caused an extensive emigration to South Carolina in 1741, and resulted in the dissolution of the congregation. But in 1751 a number of Jews returned to Georgia, and in the same year the trustees sent over Joseph Ottolenghi to superintend the somewhat extensive silk-industry in the colony. Ottolenghi soon attained prominence in the political life of his associates, and was elected a member of the Assembly in 1761 and in succeeding years. There seems to have been little if any distinction made socially between the Jews and the other settlers, and educational and philanthropic institutions seem to have been supported by all alike.

Though the Jews participated prominently in the events leading up to the Revolution, it would appear that even in the midst of absorbing

**In the  
Revolution.**

political discussions they were able, in 1774, to start another congregation. They were not all, however, to be found on the colonial side during the war, for Mordecai SHEFTALL, Levi Sheftall, Philip Jacob Cohen, Philip MINIS, and Sheftall Sheftall were in the first days of the Revolution disqualified by the authorities from holding any office of trust in the province because of the pronounced revolutionary ideas which they advocated. The community was dispersed during the Revolution, but many Jews returned immediately after the close of the war. In 1787 the congregation was reestablished, largely owing to the energy of Mordecai Sheftall, and it was incorporated on Nov. 30, 1790, under the name of Mickvé Israel of Savannah. The charter, with the minutes of the congregation of that date, still exists. Under date of May 6, 1789, Levi Sheftall, in behalf of the Hebrew congregation of Savannah, presented an address to Washington on the occasion of his election to the presidency, to which Washington made a gracious reply. The community does not seem to have prospered in the last days of the eighteenth and the beginning of the nineteenth century, but in 1820 began to increase in importance; and on the occasion of the consecration of a new synagogue in July, 1820, Dr. Jacob de la Motta delivered an address which was printed, and which is still a document of great value to American Jewish history. The synagogue was destroyed by fire in 1829, but was replaced by a substantial brick structure ten years later, and was consecrated in Feb., 1841, by Isaac Leeser. In 1878 the old synagogue, having been outgrown, was closed, and a new edifice was consecrated on the same day. The community has prospered materially within the past twenty-five years, and a number of its members have held important political office. Herman Meyers has held the office of mayor of the city of Savannah for a number of years.

After Savannah, **Augusta** appears to have been the next town in the state in which Jews settled. In 1825 one Florence, accompanied by his wife, was the first arrival. Other families came the following year

from Charleston, though a congregation was not organized until 1846. **Atlanta, Columbus,** and **Macon** have quite extensive communities, and congregations are to be found in **Augusta, Albany, Athens, Brunswick,** and **Rome.** They were all established after 1850, and most of them within the past twenty-five years. At Atlanta there is a home for orphans founded and managed by the Independent Order of B'nai B'rith. The community at Savannah still continues to be the most important, and numbers about 3,000. The total Jewish population of the state is estimated at 7,000.

The liberal charter which John Locke drew up in 1669 for the governance of the **Carolinas** should have operated to attract Jews thither at an early date, since "Jews, heathen, and dissenters" were by the terms of Locke's charter granted full liberty of conscience. Though political changes modified Locke's original plans considerably, the spirit of tolerance was always retained. Nevertheless no Jews in any numbers appear to have come to **South Carolina** until the exodus from Georgia in 1740-1771, already referred to. However, one Simon Valentine is mentioned as living in **Charleston** in 1698, and probably arrived there three years earlier. A few others followed him, for in 1703 a protest was raised against "Jew strangers" voting in an election for members of the Assembly. In 1748 some prominent London Jews set on foot a scheme for the acquisition of a tract of 200,000 acres of land in South Carolina. Nothing came of this, however, though on Nov. 27, 1755, Joseph SALVADOR purchased 100,000 acres of land near Fort Ninety-six for £2,000. Twenty years later Joseph Salvador sold 60,000 acres of land for £3,000 to thirteen London Sephardic Jews. This land was known as the "Jews' Lands." Another of the SALVADORS (FRANCIS, the nephew of Joseph) purchased extensive tracts of land in the same vicinity in 1773-74. Moses Lindo, likewise a London Jew, who arrived in 1756, became actively engaged in indigo manufacture, spending large sums in its development, and making this one of the principal industries of the state. During the Revolutionary war the Jews of South Carolina were to be found on both sides; and the most eminent of the revolutionists was Francis Salvador, who was elected a member of the First and Second Provincial Congresses which met 1775-76,

**Jewish Company.** the most important political office held by any Jew during the Revolution. Two-thirds of a company of militia commanded by Richard Lushington was made up of Charleston Jews. After the fall of Charleston in 1780 the majority of Jews left that city, but most of them returned at the close of the war. The Sephardic Jews established a congregation in 1750, and the Jews of German descent another shortly thereafter. In 1791, when the Sephardic congregation was incorporated, the total number of Jews in Charleston is estimated to have been 400. At the opening of the nineteenth century the Charleston Jews formed the most important community in the United States. A number of its members held important political office, and Mayer Moses was a member of the legislature in 1810. About this time it was due to the Jews that free-

masonry was introduced into the state. A large number of Jews from New York went to Charleston at the close of the Revolutionary war and remained there until the commencement of the Civil war. The Jews of South Carolina participated in the War of 1812 and in the Mexican war, and were in considerable numbers on the Confederate side during the Civil war. Many South Carolina Jews moved north during the reconstruction period.

A congregation was organized at **Columbia** in 1822. Communities also exist at **Darlington, Florence, Orangeburg,** and **Sumter.** The first Reform movement in any congregation in America was instituted at Charleston in 1824 and another in 1840 (see below). The total number of Jews in the state at the present time (1905) is estimated at 2,500.

The first settlers in **North Carolina** seem to have come to **Wilmington** before the end of the eighteenth century, and appear to have been an offshoot of the Charleston community. In 1808 an attempt was made to expel a member of the General Assembly because of his Jewish faith. The community grew slowly, so that in 1826 it was estimated that there were but 400 Jews in the state. No considerable augmentation of their numbers occurred until after the immigration of 1848. **Wilmington** continues to be the leading community; a congregation was established there in 1867. There are small communities in about ten other cities. The total Jewish population of the state is estimated at 6,000.

To judge by names alone it would appear that a few Jews wandered into **Virginia** as early as 1624. A small number seem also to have been there before the end of the seventeenth century, but for nearly 100 years no traces of Jewish settlement are found. At least one Jewish soldier—possibly two—served in Virginia regiments under Washington in his expedition across the Alleghany Mountains in 1754. It is probable that Jews drifted into the colony from Baltimore and other points in Maryland at an early date. By 1785 **Richmond** had a Jewish community of about a dozen families of Spanish-Portuguese descent, which organized a Sephardic congregation in 1791. This congregation remained in existence until 1898. The migration of German Jews to Richmond began early in the nineteenth century; and in 1829 they were in sufficient numbers to organize a congregation. In 1870, when the public-school system was established in Richmond, the first sessions were held in the rooms of the German Jewish congregation. Over one hundred Virginian Jews saw military service during the Civil war. The Richmond community has achieved prosperity, and now (1905) numbers about 2,500 Jews. An important community is established also at **Norfolk.** Nearly twenty other congregations exist in the remaining towns of the state, and there are similar organizations in about six towns of **West Virginia.** The present Jewish population of the entire state of Virginia is about 15,000, and that of West Virginia about 1,500.

The most prominent early figure in the history of the Jews in **Louisiana** is Judah Touro, who went to **New Orleans** about 1801. The community increased but slowly during the first half of the nine-

teenth century, but has grown rapidly since that time. The first congregation was established about 1830, and since that date, and especially during the last twenty years, a number of additional congregations have been formed and important charitable organizations established. Martin Behrman is mayor of New Orleans (1905). About twenty towns now have Jewish communities with an estimated population of 12,000.

The Western wave of migration which took place in the early years of the nineteenth century carried with it a considerable number of Jews to **Kentucky**. Among these was one Salomon from Philadelphia, who established himself at **Harrodsburg** about 1808. In 1816 he was made cashier of the Bank of the United States at Lexington. Shortly after the War of 1812 the Jews began to go to **Louisville**, where the most important community of the state is still located. The first congregation there was chartered in 1842, and a synagogue was built in 1850. Another congregation was organized in 1856, and since the Russian emigration, beginning in 1881, a number of others have been established. In 1901 Louisville had six congregations and numerous philanthropic and educational institutions. There are other communities in at least half a dozen other towns in the state. The total Jewish population at the present time (1905) is estimated at 12,000.

A few Jews were among the traders who settled in **Tennessee**, near the Holston River, in 1778, but they were mere stragglers and made no permanent settlement. About 1845 some Jews began to arrive in **Memphis**, where they had been preceded by Joseph J. Andrews. In 1853 a congregation was organized, and an Orthodox congregation in 1862. At **Nashville** a congregation was established in 1854. Jews have been prominent also in **Chattanooga**; in the years 1894 to 1898 George W. Ochs was mayor of the city. There are several communities in other towns of the state, though the total Jewish population probably does not exceed 7,000.

Of the remaining states of the southern group east of the Mississippi River the principal Jewish settlements have been made in **Alabama** and **Mississippi**. An occasional Jew made his way into the territory which is now Alabama during the early part of the eighteenth century. One Pallachio became prominent in 1776. Abraham Mordecai came from Pennsylvania and settled in Montgomery county in 1785; he established trading-posts, and dealt extensively with the Indians, and in Oct., 1802, with the aid of two Jews, Lyons and Barnett, who had come from Georgia, he erected the first cotton-gin in the state. Of the other early settlers Philip Phillips was the most prominent. He moved to **Mobile** about 1835, from Charleston, and held prominent political office; in 1853 he was elected to Congress. He afterward resided in Washington, and became known as a leading attorney there. The first congregation in Mobile was formed in 1841, where the largest community of the state is still to be found. A number of other congregations were established about the middle of the century, notably at **Montgomery**. About six other towns have Jewish communities. The present Jewish population is estimated at 7,000.

XII.—23

It is likely that there were a few Jews in the **Natchez** district of **Mississippi** before the close of the eighteenth century, but no congregation was organized until that of Natchez was established in 1843. No other congregation was organized before 1850. The present Jewish population of this state does not exceed 3,000.

**Florida** has a Jewish population of about 3,000, and the earliest congregation was established at **Pensacola**, in 1874.

Of the Western States of the southern group none has such Jewish interests as **Texas**, and with the early development of no states other than Georgia and California have Jews been so intimately associated. They were among the first of **Austin's** colonists in 1821, when Texas was still a part of Mexico; and Samuel Isaacs, who served in the Army of the Republic of Texas, received 320 acres of land in Fort Bend county for his services. Many of the earlier settlers came from England. When Abraham C. Labatt arrived in **Velasco** in 1831 he found that several other Jews had preceded him. Between 1832 and 1840 quite a number of Jews settled in the Nacogdoches district, serving the government in civil and military capacities. An unusually large number of Jews were attracted by the stirring events which preceded the annexation of Texas to the Union, and many took part in the military expeditions. Several were with Sam Houston's army in the Mexican war, and were present at the storming of the Alamo in Dec., 1835. A number received land and property for services rendered to the short-lived republic. Jacob de Cordova, a native of Jamaica, came to Galveston from New Orleans in 1837, and during the next thirty years was prominently identified with the development of the country. The real-estate operations in which he engaged in the early days became known far and wide. He published a news-

paper, introduced the Order of Odd  
**Jacob de** Fellows, was elected to the legislature  
**Cordova.** from Harris county in 1847, and in  
 1849 laid out the city of Waco.

Another of the prominent early pioneers was Henry Castro, a native of France, who had seen service in the French army and had gone to the United States in 1827. He lived for a time in Rhode Island, but went to Texas about 1840. In 1842 he made a contract with Sam Houston to settle a colony west of the Medina. Between 1843 and 1846 he sent 5,000 emigrants from the Rhenish provinces to Texas—a remarkably organized emigration for that early period. **Castroville** and Castro county, in north-west Texas, serve to perpetuate his name. On the admission of Texas into the Union David S. Kauffman, a Jew, was elected a member of Congress and served until his death in 1851. The first congregation was established at **Houston** as early as 1854, and others followed in **Galveston** and **San Antonio** shortly thereafter. Other important communities are at **Dallas** and **Waco**. Capt. L. C. Harby played a prominent part in the defense of Galveston during the Civil war. There are at present at least twelve other congregations within the state, whose Jewish population now numbers about 17,500.

Though no congregation was established in **Michigan** until 1850, a number of individual Jews played

a prominent part in the settlement and early history of the territory as Indian traders. The principal settlement has been at **Detroit**, where the first arrivals were from Germany. Since 1882 there has been a large influx of Russians, who have grown to be an important element of the community. In 1883 a colony of Russian Jews was established near **Bad Axe**, which met with some success. Eleven towns have regularly organized congregations, and there are small communities in many other towns. After **Detroit**, the principal settlements are at **Grand Rapids**, **Kalamazoo**, **Bay City**, and **Alpina**. It is estimated that the Jewish population of the state numbers 16,000.

The first Jewish settler in the territory now comprised within the state of **Wisconsin** was Jacob Franks, who went to Green Bay from Canada as early as 1792, and who two years later was granted by the Indians a tract of land on Devil River, about four miles from Fox River. He carried on an extensive trade with the Indians. In 1805 he was known far and wide among them, and established a high reputation for integrity, fair dealing, and hospitality; he erected the first saw- and grist-mill ever put up in that region, and returned to Canada in the same year. Other traders followed in his wake, but none came in sufficient numbers to establish any congregation until shortly before the middle of the nineteenth century. The principal settlement was made in **Milwaukee**, where a congregation was organized in 1855. In 1900 there were congregations in ten other cities, and in 1905 the total Jewish population of the state is estimated at 15,000.

The important community of **CINCINNATI**, in **Ohio**, is the oldest west of the Alleghany Mountains. From the middle of the nineteenth century its Jewish community has played a significant part in Jewish affairs in the United States. The Jewish pioneer of the Ohio Valley was Joseph Jonas, who went to Cincinnati from England in March, 1817. He attracted others from his native country a few years thereafter, and in 1819 they held the first Jewish service in the western portion of the United States. Previous to 1830 considerable additions to the community came from England, and in 1824 the first congregation was formed. Beginning with 1830, a large number of German Jews made their way to Cincinnati, and the first synagogue was erected in 1836. The community was of significance as early as 1850, and contained capable and public-spirited members. Isaac M. WISE, who went to Cincinnati in 1854, and Max LILIENTHAL, who arrived in 1855, helped materially to enable Cincinnati to impress indelibly its individuality upon Judaism in America. These two men aided in making Cincinnati a center of Jewish culture, and assisted in the development of a number of movements that were national in scope. Cincinnati is the seat of the Union of American Hebrew Congregations, the Central Conference of the Reform Rabbis of American Judaism, and the Hebrew Union College, and its graduates occupy many pulpits throughout the country. The Jews of Cincinnati have always shown great public spirit and have filled many local positions of trust, as well as state, judicial, and governmental offices. At the present

time (1905) Julius Fleischman is the mayor of the city. Next in importance to Cincinnati is the community of **Cleveland**, where Jews settled as early as 1837, and established a congregation in 1839. The history of the Jews in Ohio during the first half of the nineteenth century is confined to the cities just mentioned. After that date congregations grew up throughout the state. There are at the present time congregations in twenty other towns. About 1,000 Jews of Ohio saw service during the Civil war a number only exceeded by the Jewish contingent from New York. The present population of Ohio is given as 50,000.

The largest community of Jews in America, outside of New York and Philadelphia, is to be found in **Chicago**. It is probable that there were Jewish settlers in the **Illinois** territory when that country was still under French control. John Hays seems to have been the earliest Jewish pioneer, and he held the office of sheriff of St. Clair county from 1798 to 1818, and was appointed collector of internal revenue for the territory by President Madison in 1814, but no Jews appear to have followed in his footsteps until twenty years later. Considerable numbers of Jews found their way to the rising city Chicago previous to 1850, and the first congregation was organized in 1847. In 1842 a Jewish Colonization Society of New York sent Henry Meyer to select a tract in the vicinity of Chicago for a Jewish colony. He succeeded in attracting a considerable number of settlers, though only a few became farmers, the remainder removing for the most part to Chicago. After Chicago the next town to be settled by Jews was **Peoria**, and after the middle of the nineteenth century they settled in considerable numbers in most of the important towns in the state. Through the endeavors of B. Felsenthal, who went to Chicago in 1858, the Reform Congregation Sinai was established in 1861. He played an important part in the history of the development of the community. After the great fire of 1871 the community grew rapidly, and it has become one of the most prosperous in the country, its members being actively interested in the political life of the city and state. There are over fifty Jewish congregations in the city, and the population is estimated at 80,000. Some of the most important manufactures of the state are controlled by Jews. Samuel ALTSCHULER of Aurora was a Democratic nominee for governor in 1900. The Jewish community of Chicago has many notable educational establishments and relief institutions, and has furnished distinguished members to the legal profession, as well as renowned architects and musicians. Among its prominent rabbis, besides B. Felsenthal, have been Liebmann Adler and Emil G. Hirsch. The Jewish population of the state is estimated at 100,000.

In the southern and northwestern group of states **Missouri** stands out in special prominence. Between Chicago and San Francisco there is no city in which Jews have settled where they have formed so prosperous a community as in **St. Louis**. The pioneer Jewish settler in the state was Wolf Bloch, a native of Bohemia, who is reported to have reached St. Louis as early as 1816. A few others followed

shortly thereafter, but their identity has been lost. They were not in sufficient numbers to hold services until 1836, and in the following year the first congregation was established. Two other congregations were organized before 1870. During the Civil war Isidore Bush attained prominence as a delegate on the "Unconditional Union Ticket" to the convention which decided that Missouri should remain in the Union. St. Louis harbored a number of refugees from Chicago after the fire of 1871, and since that time has grown rapidly in numbers and wealth. Representatives of the community have attained distinction politically and commercially. Moses N. Sale has been judge of the circuit court, and Nathan Frank was elected to the Fifty-first Congress. Next in importance to the community of St. Louis, whose numbers aggregate about 40,000, is that of **Kansas City**. The Jewish residents of the city number about 5,500. At **St. Joseph** Jews began to settle as early as 1850, and a congregation was organized nine years later. The Jewish population numbers 1,200. There are congregations in eight other cities of the state, whose Jewish population, however, is estimated at 50,000.

The first Jewish congregation in **Kansas** was established at **Leavenworth** in 1859; another was organized at **Kansas City** in 1870. Jews to the number of 3,000 are to be found in at least nine other towns of the state.

The first Jewish settlement made in **Nebraska** was on the site of the present city of **Omaha** in 1856, but it was not until ten years later that the first congregation was organized. There is also a congregation at **Lincoln**, and communities in several smaller cities. The great bulk of the 3,800 Jews of the state live in Omaha.

Jews are recorded as having lived in the river towns of **Iowa**, especially at **Dubuque** and **McGregor**, as early as 1847-48. These were the main shipping- and stopping-points for the far West, and attracted settlers on this account. As the population moved westward small Jewish communities also found their way to **Davenport**, **Burlington**, and **Keokuk**. The first congregation was established at **Davenport** in 1861, another at **Keokuk** in 1863, and that at **Des Moines** in 1873. The largest Jewish community is in the last-named city. There are Jewish communities in eleven other towns of the state, whose total Jewish population, however, does not exceed 5,000.

The gold discoveries of 1849 on the Pacific Coast proved not less attractive to some Jews than to other adventurous spirits, and to such an extent that as early as 1850 two congregations were organized in **San Francisco**. A striking characteristic of **California** Jewish migration is the cosmopolitan nature of its early Jewish population. Every country, even **Australia**, was represented among these pioneers. Another significant feature of the early settlement in California was the number of congregations which were organized in the fifties, when the gold fever was at its height, and which soon dwindled to insignificance, and during the course of the next ten or fifteen years passed out of existence. Noteworthy also is the high character of these early settlers, and the leading part they played

in consequence in the political as well as the commercial development of this new country. Among

the most distinguished was **Solomon Heydenfeldt**, who had gained prominence in **Alabama** before he came to **California**, where he attained the rare distinction of being elected chief justice

of the state, a position which he held until his resignation in 1857. Subsequently he took a leading part in the politics of the state. **Henry A. Lyons** was one of the first three justices of the Supreme Court of California. A number of other Jews have occupied prominent political office; in the commercial world the Jews have been among the pioneers in the development of the state. Some of the leading Jewish bankers of New York came from **San Francisco**, where Jews are still a decided power in financial and commercial undertakings. Nor have they failed to develop on cultural lines; and the name of **PERXOTTO** is one of distinction in art and scholarship. **Emma Wolf** is a distinguished authoress. **M. H. De Young** is proprietor of the "**San Francisco Chronicle**," and **Max C. Sloss** is prominent as one of the judges of the Superior Court of **San Francisco**. **Julius Kahn** represents the **San Francisco** district in Congress.

The two congregations already mentioned grew rapidly; at the present time (1905) there are fourteen congregations in all, and the Jewish population of the city is estimated at 17,000. There are other congregations at **Sacramento**, **Los Angeles**, and many other towns, making up a Jewish population for the state of 28,000.

The overflow from California made its way into **Oregon**, where Jews were to be found as early as 1850; the first congregation was established in **Portland** in 1858. As in California, they played a prominent part from the very beginning in municipal and state politics. **Solomon Hirsch** was in 1889 appointed minister to Turkey by President Harrison, he having previously made himself one of the Republican leaders of the state. **Joseph Simon** has the distinction of having been one of the few Jews who represented a state in the United States Senate (1898-1903). Others, notably **D. Solis Cohen**, have been active in local politics. There are small communities in various towns of the state, whose Jewish population numbers 6,000.

Jews first settled in **Utah** in 1860, but there is no record of religious services before 1866. The first congregation was established in **Salt Lake City** in 1880. A few Jews have held important political office. The present population is estimated at 1,000.

It would appear that there were a considerable number of Jews among the first settlers of **Colorado**. The principal community is that of **Denver**, where the congregation was established in 1874. One of the prominent philanthropic institutions of the city is the National Jewish Hospital for Consumptives, founded in 1890. **Leadville** is said to have established its congregation in 1864. Five other cities in **Colorado** have Jewish congregations, and the total Jewish population of the state numbers 5,800.

The states of **Montana**, **Washington**, **Idaho**, and **North and South Dakota** have not failed to

attract Jewish settlers, though for the most part they did not arrive previous to the Russian immigration.

Jews have penetrated into every state and all the territories of the Union, so that at this time practically no settlement of any significance in any part of the United States is without its Jewish community, small though it may be. Certain phases in the development of the Jewish communities throughout the United States have been common to all. The high holy days have always brought them together, often from far distant points,

**Characteristics of Congregations.** for religious worship. \*These occasional meetings soon resulted, when the communities grew greater, in the organization of congregations, which was often preceded, sometimes followed, by the purchase of a place of burial.

As the communities grew the need for care of the sick and poverty-stricken resulted in the establishment of philanthropic institutions of various kinds. These were followed by the creation of various social organizations, many of which had beneficial features; and closely following in the wake of this development came the establishment, as prosperity became more enduring, of educational institutions; and practically no organized congregation ever failed to care for religious instruction.

### 3. Relation to the Federal Government:

The DAMASCUS AFFAIR of 1840 marks the real beginning of the diplomatic or international phase in the history of American Jews, though a reference to the services which Mordecai M. NOAH rendered his country as consul at Tunis (1813-16) should not be omitted. The persecutions and tortures to which some of the most prominent Jews of Damascus had been subjected were reported to the Department of State at Washington by the United States consul at Damascus. Immediate instructions, under date of Aug. 14, 1840, were thereupon issued to John Gliddon, the United States consul at Alexandria, Egypt, by Secretary John Forsyth, in which he directed that all good offices and efforts be employed to display the active sympathy of the United States in the attempts that the governments of Europe were making to mitigate the horrors of these persecutions. Three days later David Porter, the United States minister to Turkey, was instructed by Forsyth to do everything in his power at the Porte to alleviate the condition of the unfortunates. In both these communications the reasons for the intervention of the United States are based upon sentiments of justice and humanity, no American citizens being involved; in the communication to Minister Porter stress was laid upon the peculiar propriety and right of the intervention of the United States, because its political and civil institutions make no distinction in favor of individuals by reason of race or creed, but treat all with absolute equality.

Though it would appear that this action of the United States was taken without the solicitation of any Jews of this country, measures

**Damascus Affair.** were already on foot to display the feeling of the Jews at this time. Public meetings were held in August and September, 1840, in New York, Philadelphia, and Richmond, participated in by both Christians and Jews,

at which resolutions were passed asking the United States to intervene to procure justice for the accused and the mitigation of their hardships. Among the leaders who were instrumental in calling these meetings were Jacob Ezekiel of Richmond, J. B. Kurscheedt and Theodore J. Seixas of New York, and Isaac Leeser and John Moss of Philadelphia. Considerable correspondence passed between these leaders and the Department of State, in which the humanitarian attitude of the government and the nature of its intervention are fully disclosed ("Publ. Am. Jew. Hist. Soc." No. 8, p. 141; No. 9, p. 155; No. 10, p. 119).

Ten years later the Jews of this country were concerned in the diplomatic relations with Switzerland. Almost simultaneously the negotiations assumed two phases: (a) respecting the ratification of a treaty in which lurked the possibility that American citizens who were not Christians might be discriminated against, and (b) concerning the actual discrimination in Switzerland against American citizens, on the ground that they belonged to the Jewish faith.

In Nov., 1850, A. Dudley Mann, the American representative, negotiated a treaty with the Swiss Confederation, which was transmitted to the Senate on Feb. 13, 1851, by President Fillmore. At the same time the president sent a message in which he took exception to a part of the first article of the treaty, which specifically provided that Christians alone were to be entitled to the privileges guaranteed. An agitation against the ratification of the treaty was started by the Jews as soon as its existence was learned of, and Daniel Webster, then secretary of state, and Senator Henry Clay at once (Feb., 1851) went on record as opposed to the objectionable clause of the treaty. The principal

**Swiss Disabilities.** agents in stirring up the opposition were Isaac LEESER, David EINHORN, J. M. Cardozo of Charleston, S. C., and Capt. Jonas P. LEVY of New York. A movement was set on foot in this country shortly thereafter (1852-53) to procure religious toleration abroad for American citizens generally; this was quite distinct from any movement started by the Jews, but greatly aided the latter. As a result of this combined opposition the Senate declined to ratify the treaty. Senator Lewis Cass of Michigan figured largely in the opposition to it. He corresponded with Rev. Isaac Leeser and Captain Levy respecting it, delivered several notable speeches in the Senate against it in 1854, and presented a petition on April 19, 1854, which had been signed by Jews of the United States at the instance of a committee of New York Jews, of which Alexander J. Kurscheedt was chairman. As a result the treaty was amended by the Senate, and in its amended form was ratified and proclaimed Nov. 9, 1855. But the amendment, though less objectionable in phraseology, retained the same connotation and rendered it possible, under its terms, for the Swiss cantons to discriminate against Jews in the manner they had adopted in 1851. Though unsuccessful in preventing the ratification of the treaty, the agitation against it did not cease. Notwithstanding the treaty was proclaimed at the end of 1855, it would appear that this was not generally known until 1857. Attention

was drawn to it by the fact that one A. H. Gootman, an American citizen and a Jew, had received notice in 1856 to leave Chaux-de-Fonds, in Neuchâtel, where he had transacted business for five years. Public meetings of protest were held during the year 1857, in Pittsburg, Indianapolis, Easton, Pa., Charleston, Baltimore, and elsewhere, and a vigorous opposition was voiced by Isaac M. Wise in his paper, "The Israelite," by David Einhorn in "Sinai," and by Isaac Leeser in "The Occident." A convention of Jews met in Baltimore in October, and a delegation appointed by this convention waited on President Buchanan in the same month to protest against the treaty and request its abrogation; the president promised to take steps to accede to their request so far as lay in his power. Numerous memorials were also transmitted to the president and the Senate. That this agitation attracted general attention is manifested by the fact that the newspapers throughout the country expressed vigorous opinions against the treaty.

Though sporadic efforts to procure an alteration in the treaty and the establishment of the rights not only of American Jews but of the Jews of all nations in Switzerland continued to be made in the United States, the principal scene of negotiations shifted to the former country, and the principal actor was Theodore Fay, the American minister. Beginning in Aug., 1853 ("U. S. Ex. Doc." xii. 3), when an American citizen, the same Gootman referred to above, received orders from the authorities of Chaux-de-Fonds, canton of Neuchâtel, to leave that canton on the ground that he was a Jew, Fay, though at first disinclined to take any very energetic stand, finally became much interested in the subject of Swiss discrimination against Jews and kept up an active agitation until his recall in 1860. He succeeded in procuring permission for Gootman to remain, but only as an act of grace, not by right. The obstacle Fay had to attempt to overcome lay in the nature of the Swiss Confederation, which left to the cantons the regulation of the rights of domicile, the Federal Council having no control over the cantons in this respect. Fay was ably supported in his contentions by the secretaries of state Marcy and Lewis Cass, especially the latter. In the course of his negotiations Fay made an elaborate study of the Jewish question as it affected Switzerland, and in June, 1859, transmitted what he called his "Israelite Note" to the Federal Council. This is an extensive treatise explaining the American contention with much force, and embodying besides a general defense of the Jews. It was translated into German and French, was offered for sale by the Federal Council, received much notice in the Swiss newspapers, and caused the restrictions against Jews to be abolished in several cantons. In 1860 the executive committee of the Board of Delegates of American Israelites, of which Myer S. Isaacs was secretary, took steps to continue the agitation in America. Henry I. Hart, the president of the above-mentioned board, took up the matter with Secretary Seward shortly after he assumed office in 1861, and the secretary issued specific instructions to the new minister to Switzerland, Fogg, to be no less active in his endeavor to establish the rights of American

Jews than was his predecessor. The restrictions in the cantons were gradually abolished, and full civil rights were finally guaranteed to all Jews by the new Swiss Constitution of 1874. It may be added, however, that the treaty of 1855 is still in force (1905; "Publ. Am. Jew. Hist. Soc." No. 11, pp. 7 *et seq.*).

In 1867 Myer S. Isaacs, on behalf of the Board of Delegates of American Israelites, endeavored unsuccessfully to have the government take some steps to alleviate the condition of the Jews in Servia. In

1882 Gen. Lew Wallace, United States **Servia and** minister to Turkey, moved by the **Palestine.** hardships suffered by Russian refugees

whom he found starving in the streets of Constantinople, called at the Foreign Office and received a communication from the minister of foreign affairs in which the statement was made that Jews would be made welcome anywhere in Turkey except in Palestine. In 1884 he took vigorous action against the threatened expulsion from Jerusalem of sundry naturalized American Jews. In 1887 and 1888 attempts were made by the Turkish government to limit the sojourn of American Jews in Jerusalem to one month—later extended to three months. This was earnestly opposed by the American minister, Oscar S. Straus, ably supported by Secretary Bayard, who contended that the United States, by reason of its Constitution, could not recognize any distinction between American citizens in respect to their religion. By his exertions Straus successfully halted any steps to expel American citizens who happened to be Jews ("U. S. For. Rel." 1887, 1888, 1889). Secretaries Blaine, Gresham, and Hay repeatedly took a similar stand, and it would appear that rights of American citizens who are Jews have been carefully guarded in Turkey ("U. S. For. Rel." 1894, 1898, 1901).

In 1863 atrocities perpetrated upon the Jews of Morocco led the Board of Delegates to ask the intervention of the United States. Secretary Seward instructed the United States consul at Tangier to use his good offices to further the mission of Sir Moses Montefiore, basing his act on the ground of common humanity. For two years the consul exerted himself to carry out his instructions and met with some slight success. In 1878 the Board of Delegates renewed its endeavors to have the government use its good offices in Morocco, and the consul at Tangier, F. A. Matthews, took earnest steps to alleviate the condition of the Jews whenever the opportunity arose during this and succeeding years. Adolph Sanger, on behalf of the Board of Delegates, in 1880 sent out an agent, L. A. Cohen, to Morocco to report on conditions there. In March, 1881, the United States minister at Madrid, Lucius Fairchild, proceeded to Morocco to investigate the condition of the Jews. He made a sympathetic and valuable report to the secretary of state, Blaine, in which he displayed an acute interest in the unfortunate conditions in that country, and did his utmost to alleviate them.

Rumanian conditions, which have so vitally interested the United States, first had attention drawn to them by the Board of Delegates in June, 1867, when the good offices of the United States in behalf of the persecuted Jews of Rumania were requested. In

1870 B. F. PEIXOTTO of New York was appointed consul-general to RUMANIA, and during the six years that he held office he exerted himself

**Rumanian Disabilities.** to bring about an improvement in the condition of the Jews. In 1878 John

A. Kasson, minister of the United States to Austria, in a despatch to the Department of State proposed as a condition preliminary to the recognition of Rumanian independence that the United States join with the European powers in exacting from Rumania, at the Congress of Berlin, the recognition of the equal civil, commercial, and religious rights of all classes of her population, as also equal rights and protection under the treaty and under Rumanian laws, irrespective of race or religious belief. In opening negotiations with Rumania in the following year, the recognition by that country of the rights of sojourn and trade of all classes of Americans irrespective of race or creed was strongly emphasized, as it was by Kasson about the same time with respect to Servia. The continued persecutions of the Jews of Rumania, her violations of the provisions of the Treaty of Berlin, and the greatly increased proportions which the Rumanian emigration to the United States assumed in consequence, as also the failure to conclude a naturalization convention between the two countries, because Rumania would not recognize the rights of American citizens who were Jews, moved Secretary of State John Hay to address on Aug. 11, 1902, identical instructions to the representatives of the United States in Russia, France, Germany, Great Britain, Italy, and Turkey upon the subject of Rumania's attitude. In this note he drew attention to the consequences to the United States of the continued persecutions in Rumania—namely, the unnatural increase of immigration from that country—and upon this based his right to remonstrate to the signatories to the Treaty of Berlin against the acts of the Rumanian government. Further, he sustained the right of the United States to ask the above-mentioned powers to intervene upon the strongest grounds of humanity. Acting upon the forcible instructions, the representatives of the United States presented this note to the government to which each was accredited. But beyond the abolition of the OATH MORE JUDÆICO (1904) and some slight diminution of the harshness of the persecution, little has been accomplished, and Rumania continues (1905) almost unrestrictedly to violate the treaty which established her as an independent nation. In 1905 Congress made provision for an American legation at Bucharest.

The diplomatic correspondence between RUSSIA and the United States involving Jews is of considerable bulk. It relates for the most part to the failure of Russia to recognize the validity of American passports where Jews are involved, which

**Russian Passports.** is the principal cause of difference between the United States and Russia.

Russia has constantly violated the provisions of her treaty of 1832 with the United States, which gives to the citizens of the two countries unrestricted rights of sojourn, travel, and protection. Until the persecutions in Russia assumed acute form, beginning with 1880, the correspondence be-

tween the two countries was not of importance, though occasional earlier instances of discrimination by Russia against American citizens who were Jews had been vigorously protested against by the United States authorities. For the past twenty-five years the record is one of unceasing effort on the part of the United States to establish the rights of American citizens who are Jews, and of continued declination of Russia to live up to her treaty stipulations. The threatened expulsion from St. Petersburg of an American citizen named Pinkos, in 1880, was the occasion for the presentation of energetic notes of remonstrance by John W. Foster, the American minister to Russia. He acted not alone of his own responsibility, but was the recipient of specific instructions from the secretary of state, William M. Evarts. In the course of one of Evarts' letters of instruction the attitude assumed by the United States was clearly set forth in the following terms: "In the view of this government the religion professed by one of its citizens has no relation to that citizen's right to the protection of the United States" ("Am. Jewish Year Book," 1904-5, p. 287). The first protests of Foster and Evarts, inasmuch as they brought forth no satisfactory replies, were succeeded by others of the same tenor, in one of which Evarts stated "that we ask treaty treatment for our aggrieved citizens, not because they are Jews, but because they are Americans" (*ib.* p. 290). All the answers of the Russian Foreign Office are based on the claim that the proscriptive laws against the Jews were in existence prior to the treaty of 1832, that they, therefore, must be assumed under the treaty, and, furthermore, that the Jewish question in Russia was complicated by economic and other difficulties. These views were answered in the able despatch of James Blaine, secretary of state, of July 29, 1881. This despatch covers in considerable detail the whole of the American contention, and is so forcibly put that subsequent consideration of the same subject by the Department of State has been unable to add much to it ("For. Rel. U. S.," 1881, p. 1030). As continued remonstrances during subsequent years led to no results, in 1893 the Department of State took the stand that it could not acquiesce in the action of Russian consuls in asking the religion of American citizens desiring to travel in Russia before granting a visé to their passports, and refusing Jews. The government regarded this as the "assumption of a religious inquisitorial function within our own borders, by a foreign agency, in a manner . . . repugnant to the national sense." In 1895 this view was forcibly presented to the Russian government by the American minister, Clifton R. Breckenridge, and in July of that year the Department of State took the attitude that a "continuance in such a course, after our views have been clearly but considerably made known, may trench upon the just limits of consideration" (*ib.* pp. 295, 297). But in spite of the presentation of the American contention in every possible light and with all possible emphasis, Russia stubbornly refuses to live up to her treaty obligations.

In April, 1902, at the instance of Henry M. Goldfogle, a member of Congress from New York, the House of Representatives passed a resolution calling

upon the secretary of state to inform the House "whether American citizens of the Jewish religious faith holding passports issued by this government are barred or excluded from entering the territory of the Empire of Russia," and what action concerning the matter had been taken by the government. A few days later Secretary Hay replied, stating in brief what efforts had been made by the United States for the protection of American citizens in Russia, and added that though "begun many years ago . . . [they] have not been attended with encouraging success" (*ib.* pp. 301, 302).

In Jan., 1904, Goldfogle introduced another resolution, requesting the president to resume negotiations with Russia looking to the recognition of the validity of American passports irrespective of the religion of the holder. This resolution gave rise to notable addresses on the part of a number of members of the House, and was passed, in substance, in April of that year (*ib.* pp. 304, 305). In consequence of this resolution the question of American passports was taken up anew by the Department of State during the summer of 1904. The Russian reply made at that time was to the effect that a commission had been created in 1903 to consider the revision of the passport regulations, and that the desires of the United States would be brought to the attention of that commission. In his annual message, Dec., 1904, President Roosevelt wrote vigorously against the Russian attitude, characterizing it as "unjust and irritating toward us." In Feb., 1905, a committee of members of the House of Representatives was formed, with Wachter of Maryland as chairman, to urge further action by the Department of State. As yet nothing significant has been accomplished.

The massacres at KISHINEF in April, 1903, aroused indignation throughout the United States. Though in response to a cable of inquiry sent by Secretary Hay to Ambassador McCormick at St. Petersburg, asking if relief could be sent to the sufferers, the ambassador stated that he was informed officially that there was no distress or want in southwestern Russia, nevertheless mass-meetings were held in almost every city of importance, and the comments in the newspapers portrayed the feelings of horror of the American people. A practical turn was given by the collection of considerable sums to alleviate the misery of the unfortunates. In the hope that if the attention of the czar were directly brought to the plight of the Jews in his dominions their condition might be alleviated, the Independent Order of B'nai B'rith took measures to prepare a petition for transmittal to him. On June 15, 1903, a committee of the order waited upon Secretary Hay and President Roosevelt, and presented a tentative draft of the petition. This having met with their approval, it was then circulated throughout the United States, and over 12,500 signatures of Christians and Jews in all walks of life were appended to it. On July 15 the American representative at St. Petersburg was instructed to ask an audience of the minister of foreign affairs in order to find out whether the petition, which was given in full in the despatch, would be received by the

minister to be put before the czar. The minister declined to receive it, and the bound copy with the signatures was placed by Secretary Hay in the archives of the Department of State in Oct., 1903. Though the petition did not reach its destination, its words attained world-wide publicity, and its object was in a measure accomplished in this way (Adler, "Voice of America on Kishineff," 1904).

Throughout the history of the United States the government has insisted with great force upon the equal treatment of all American citizens in foreign countries, irrespective of race or creed. Further, it never has failed to intercede with foreign governments on humanitarian grounds, whenever the opportunity arose, in behalf of Jews who were being persecuted or of those to whom life was rendered precarious by inhumane proscriptive laws. A considerable number of Jews have held diplomatic posts, among the more prominent being Mordecai M. NOAH, consul to Tunis, 1813-16; Edwin de LEON, consul-general to Egypt, 1854; August Belmont, secretary of legation at The Hague, 1853-55, and minister resident, 1855-58; Oscar S. STRAUS, minister to Turkey, 1887-89, 1897-1900; Solomon HIRSCH, minister to Turkey, 1889-92; B. F. PEIXOTTO, consul to Bucharest, 1870-76; Simon WOLF, consul-general to Egypt, 1881; Max JUDD, consul-general to Vienna, 1893-97; and Lewis Einstein, third secretary of embassy at Paris, 1903, and London, 1905.

**4. Education:** Early in the history of the first Jewish congregation in New York there was attached to the synagogue a school in which secular as well as Hebrew branches were taught. It was one of the earliest general schools in America; poor children received instruction gratis. Religious instruction was established in connection with most of the early synagogues. For ordinary secular education the Jews resorted, in large measure, to the schools and colleges. There was a Jewish matriculate at the University of Pennsylvania, for instance, as early as 1772. The older communities, however, before the general establishment of the public-school system, frequently provided regular instruction in the secular branches. These schools ordinarily were adjuncts of the religious schools maintained by the congregations. In Philadelphia as early as 1838 a general Sunday-school, quite irrespective of congregational organization, was established, largely through the instrumentality of Rebecca GRATZ, who was its superintendent and president until 1864. This was the beginning of a movement, which has spread throughout the country, for the organization of educational work along lines quite independent of congregational activities.

A similar school was organized in Charleston, S. C., in the same year; in the following year, one in Richmond, Va.; in 1845 this movement spread to New York, being taken up first by the Emanu-El Society, although the Shearith Israel congregation had started a Hebrew-school system as early as 1808. In 1848 the Hebrew Education Society was founded at Philadelphia—originally a school for general instruction in the ordinary branches up to and through the grammar-school grade, together with instruction in Hebrew and in the Jewish religion. In 1864 the Hebrew Free School Association was incorporated

in New York; and throughout various states of the Union a movement gradually spread for the organization of free religious schools which would bring into a common-school system children

**Free Schools.** from the various congregations in each city. These were largely intended to supersede the private institutions that

had hitherto existed. They were, in the main, carried on by volunteer teachers; and their distinguishing feature was that the instruction was usually conducted by native-born persons and in the English language, as against the German teaching in the congregational schools.

The whole trend of this educational work was toward the unification of the community and the broadening of the interests of the individual members, with a tendency to overcome the narrowness of the congregational life that had prevailed. Within the last decade or so there has been a decided reaction; and religious schools and Sabbath-schools have been highly organized in connection with individual congregations. Particular stress is laid upon them by the congregations, which derive from them much of their communal strength. While many of the Hebrew education societies and schools continue in existence, they do not develop or flourish as might be expected; in fact, since 1882 they have largely taken upon themselves an entirely new function. With the sudden arrival in the United States of a large number of Russian Jews having no knowledge of the English language, and in many cases without any particular handicraft, there devolved upon the American Jewish community the necessity of providing, first, day- and night-schools for teaching English to the new arrivals, and, second, manual-training and technical schools.

**Technical Schools.** These have been established in New York, Philadelphia, Chicago, and other cities, more or less with the aid of the Baron de Hirsch Fund. The most noteworthy of these educational institutions called into existence since the Russian immigration began is the Educational Alliance of New York.

Until recently provision for higher education on specifically Jewish lines was not found practicable, though as early as 1840 the versatile and suggestive Mordecai M. Noah urged the formation of a Jewish college in the United States. His project met with no response. Nor was I. M. Wise more successful when in 1855 he endeavored to establish a theological college in Cincinnati under the name of "Zion Collegiate Institute." In 1867 the scholarly and enterprising Isaac Leeser, however, established Maimonides College at Philadelphia. It was intended that general collegiate instruction should be provided there, though naturally the Jewish branches were to be given particular attention. A certain measure of cooperation with the University of Pennsylvania was planned, and the idea held in mind was that the college should serve as the capstone to the scheme of education builded by the Hebrew Education Society. The college was, however, much ahead of the times, and after a few years of languishing life passed out of existence. Not until nearly twenty years thereafter was the first institution for the training of rabbis and teachers founded. This was

the Hebrew Union College of Cincinnati, established in 1875 by the UNION OF AMERICAN HEBREW CONGREGATIONS, an organization created at that time for the purpose, and mainly at the instance of I. M. Wise. The existence of the college has been continuous, and, though theoretically without partizan bias, it is practically the representative of the Reform wing in America. Graduates from this institution are to be found in charge of congregations in nearly every city of importance in the country. Rev. Dr. K. KOHLER is president (1905), and there is a faculty of ten professors and several instructors. In 1886 there was established in New York

the JEWISH THEOLOGICAL SEMINARY, also for the training of rabbis and teachers, and representing the Orthodox wing of the community. The reorganization which this institution underwent in 1901-2 resulted in the calling of Dr. S. SCHECHTER to its presidency. At the same time it was richly endowed, and in 1903 took possession of a new building, the gift of Jacob H. SCHIFF. Its library, largely the gift of Judge Mayer SULZBERGER, contains one of the greatest collections of Hebraica. In 1893, through a trust vested by Hyman Gratz in the Mickvè Israel congregation, Gratz College was founded in Philadelphia, which is devoted to the preparation of teachers for Jewish schools, practically occupying the place of a normal school. The largest sum ever made available for the promotion of Semitic investigation is that bequeathed in 1905 by Moses A. DROPSIE of Philadelphia for the establishment of a Jewish college along broad lines, for instruction "in the Hebrew and cognate languages and their respective literatures, and in the rabbinical learning and literature." The amount of this bequest is about \$800,000.

Throughout the United States there have been established in connection with the various congregations, and also independently, Young Men's Hebrew Associations and other societies which are to a certain extent educational in their character. They usually maintain small libraries and provide lecture-courses on secular and religious topics. In 1893 there was founded the Jewish Chautauqua Society, which has branches all over the country and bears the same relation to the regular schools and colleges as does the University Extension movement, as interpreted in America, to regular colleges for university work. The COUNCIL OF JEWISH WOMEN has engaged to a considerable extent in educational work among its own members. In 1886 the Reform wing of American Jewry organized at Cincinnati a HEBREW SABBATH-SCHOOL UNION for the purpose of promoting uniformity and approved methods in Sabbath-school instruction. In 1900 there were in the United States 415 Jewish educational organizations, 291 of which were religious schools attached to congregations, with 1,127 teachers and an attendance of about 25,000 pupils. There were also 27 Jewish free schools, chiefly in large cities, with about 11,000 pupils and 142 teachers.

Three societies have been organized in the United States to issue Jewish publications—the first, in Philadelphia in 1845; the second, in New York in 1873; and the third, in Philadelphia in 1888. This

last is a flourishing organization, and has issued many instructive and important works. Among the educational activities should also be

**Publica- mentioned the American Jewish His-  
tion Soci- torical Society, organized in 1892,  
eties and which in its twelve volumes of publi-  
Libraries. cations has made notable contributions  
to American Jewish history. Associ-**

ated with many of the schools are circulating and reference libraries—notably the Leeser Library of the Hebrew Education Society of Philadelphia—and there are several independent ones, the largest of which is the Aguilar Library in New York, founded in 1886. The Maimonides Library of the Independent Order B'nai B'rith in New York was organized in 1851. The last two are now merged in the New York Public Library, which itself contains the largest collection of Judaica and modern Hebraica in the country. The Order B'nai B'rith and many other orders and lodges did pioneer work in the education of their members and included lectures among the educational features. The various Zionist societies throughout the country make educational work along Jewish lines one of their principal activities.

**5. Philanthropy:** The measure of the American Jewry's philanthropic activity is full to overflowing. From the beginning of direct aid of individual to individual, philanthropy has progressed until it now devotes a large part of its endeavor to preventive work—the higher philanthropy—along the most approved scientific lines. In this the Jewish organizations have often been the pioneers. Dating from the days of the first arrivals, the ideal constantly maintained has been that none of the Jewish poor should become a charge upon the general community.

The simple charity of the first settlers was soon superseded by the dispensing of collective funds through the congregations. But this did not take the place of the "personal service" of our time, since the care of a needy family by one more favorably situated is one of the commonest phenomena of the earlier days. Soon, as the population increased and its needs outgrew individual or even congregational generosity, societies with specific objects were started. Some were established for the visitation of the sick and the burial of the dead; some, under congregational direction, for general charitable purposes; others for the distribution of unleavened bread at Passover. Gradually hospitals for the care of the sick, asylums for orphans, and homes for the aged were established. At first a large measure of volunteer work lightened the burden of the community, but this, though never entirely superseded, has had to give way to professional and trained service. Similarly, the small societies of the early days found it advantageous to cooperate, resulting in the formation of the United Hebrew Charities, which took general charge of all philanthropic work except that of hospitals and orphan asylums. In recent times the problem has become so complex that in a number of cities all of the charitable organizations have been federated, and the funds collected from all sources distributed pro rata to the various constituent organizations. The first Jewish hospital, the Mount Sinai, was established in 1852 in New

York, and the Independent Order B'nai B'rith Home for the Aged and Infirm in 1848 at the same place. The first orphan asylum was that of New Orleans, established in 1855, though one had been projected in New York as early as 1829.

The Russian immigration, which has brought so many perplexing philanthropic and educational problems to the surface, has made itself felt in a particular degree on account of the necessity for the development of cooperative scientific philanthropic methods. The federated associations referred to have been found necessary because of the increasing inadequacy of the simpler methods of the earlier days to cope with the new conditions, and because of the fact that relief, to be effective, must be administered not only from the standpoint of the poor, but with a view to the promotion of the best interests of the community at large. Trained experts in this work have been developed, and in the larger cities the more extensive systems of relief are under their direction, though they in turn are controlled by volunteer boards of trustees. Out of the conditions just noted has developed the National Conference of Jewish Charities of the United States, organized at Cincinnati in 1899, with thirty-eight relief organizations composing its membership, distributed throughout the country. Its seat is at Cincinnati, and the objects it furthers are the discussion of the problems of charity and the promotion of reforms in administration, with a view of accomplishing uniformity of action and cooperation. Annual conferences for the reading and discussion of papers are held. The more or less mechanical methods by which relief must be distributed on the large scale now found necessary, with the element of personal sympathy largely eliminated, have, however, caused a reaction. In recent times societies, largely congregational, have been organized, whose object is the promotion of personal service in looking after the welfare of the unfortunate. See **SISTERHOODS**.

The numerous fraternal orders, of which the B'nai B'rith (1843), the Free Sons of Israel (1849), the B'rith Abraham (1859), and the Sons of Benjamin (1877) are the most important, do a large measure of charitable and beneficial work.

The inability of the Jews of the United States to bear the tremendous strain put upon their resources by the Russian immigration, prompted Baron de Hirsch in 1890 to come to their aid and to establish the **Baron de HIRSCH FUND** (\$2,400,000 originally; since grown to \$3,300,000), to be administered by a board of trustees named by him. Its

**Baron annual income, amounting to about  
de Hirsch \$125,000, is expended in looking after  
Fund. the reception of immigrants, the pro-  
motion of English and mechanical**

education, and, through the Jewish Agricultural and Industrial Aid Society (1899), the encouragement of farming and the transfer of industries to rural communities. The last-mentioned branch of the Fund and its related organization, the Industrial Removal Office, receive large subventions also from the **JEWISH COLONIZATION ASSOCIATION**. A town and agricultural colony were founded at Woodbine, N. J., in 1891, followed by an agricultural and industrial school at the same place in 1894. Other colo-

nies under the same direction have been established at Alliance, Carmel, and Rosenhayn in the same state. At the present time (1905) the total number of colonies in New Jersey is about 2,500, but not more than half of the adults are engaged in farming and its related work. Industrial establishments have been introduced, and a large part of the several communities is employed in them. Other colonists have been aided in removing to New England, particularly to Connecticut, where about 600 persons are now engaged in agricultural pursuits, mainly dairy-farming. Efforts at the establishment of agricultural colonies in various other parts of the country have been made, but they have almost invariably been ultimate failures (see AGRICULTURAL COLONIES IN THE UNITED STATES).

The National Farm School, established through the instrumentality of Dr. Joseph Krauskopf in 1896, at Doylestown, Pa., aims to train boys for agricultural careers, and has met with some measure of success. Its pupils number about forty. There are two charitable organizations with a national field of activity, the ALLIANCE ISRAËLITE UNIVERSELLE, which has had branches in the United States since 1868 (eight in 1905), and the Jewish Hospital for Consumptives at Denver, Colo., founded in 1890. A noteworthy charity is that instituted in New York in 1890 by Nathan Straus for the distribution to the poor, at nominal cost, of milk carefully prepared in accordance with the most scientific hygienic principles. Similar institutions have been aided by him in Philadelphia and Chicago. Statistical reports show a large reduction in infant mortality as a result of this efficient remedial measure.

**6. Religious Development:** As elsewhere, the religious life of the Jews in the United States has been centered for the most part about the congregations. The lack of theological seminaries until a comparatively late period necessitated that religious leaders should be brought from abroad. England, Germany, and to some extent Holland supplied the incumbents for pulpits in the earlier days. Naturally Germany furnished the large majority between 1840 and 1881, since which time, as in so much else, Russia has been predominant. Sephardim were at first in the majority, and organized the four earliest congregations in the country; namely, those of New York, Newport, Savannah, and Philadelphia. As early as 1766 a translation of the prayers into English by Isaac PRATO—probably the first English-Hebrew prayer-book ever issued—was published in New York.

In Jamaica and in Canada there have always been more or less direct relations with England; but in the United States the entire religious life of the Jews has been especially characterized by the absence of dependence upon any European authority, as well as by the absence of any central authority in America. Congregational autonomy has been emphasized, and is perhaps the most striking characteristic of American Jewish religious development.

Prior to 1825 all the congregations followed the Orthodox ritual. In that year, however, a movement for ceremonial reform began in Charleston, whose congregation was made up almost exclusively

of Sephardim. Meeting with some success at first, the movement soon languished, only to be revived upon a more enduring basis in

**Reform Movement Begun in Charleston.** 1840. The Reform movement made no headway until about the middle of the nineteenth century, when Isaac M. Wise at Albany gave it considerable standing. But little was accomplished, however, until the arrival in the United States of David Einhorn and, later, Samuel Hirsch. Under the influence of these men and of other rabbis—principally from Germany—the trend toward alterations in the liturgy and ritual set in very strongly about 1860. In 1869 attempts were made to formulate the principles of Reform Judaism, followed by others in 1871 and 1885. But the large amount of autonomy common to all congregations and the absence of any generally recognized authoritative head have rendered any acceptance of a program by all congregations impossible. As a consequence the Reform movement varies from the extremes of Sunday services only, on the one hand, to a conservatism that lends its support to an Orthodox seminary, on the other. The reaction against excessive radical tendencies attained force about 1880, resulting in the formation of an intermediate or distinctly conservative group. This wing has grown in importance and has been largely instrumental, in cooperation with the outspokenly Orthodox, in the reorganization of the Jewish Theological Seminary on a firm basis. One of the results of Reform was the introduction of changes in the prayer-ritual, culminating in the adoption by most congregations of a Union Prayer-Book in 1895. This is not used universally, and individual idiosyncrasy still shows a decided preference for other forms.

An outgrowth of certain phases of the trend toward extreme liberalism was the society for Ethical Culture, founded in New York by Prof. Felix ADLER in 1876, and still claiming numerous adherents (see ETHICAL CULTURE, SOCIETY FOR).

The Reform movement has not failed to arouse a vigorous opposition from the representatives of the Orthodox rite; chief among them, in the days of the inception of Reform, was Isaac LEESER, to whom Sabato MORAIS proved an able successor. In the main, holding that its principles, having been tried by time, needed no defense, the representatives of Orthodoxy have supported their views with an intelligent perception of the needs of the new environment and conditions. The Orthodox seminary already referred to is to some extent the outgrowth of a desire effectively to counteract the inroads of Reform, as also to render a service in fitting the ancient forms to American conditions. The influx of Russian Jews during the past twenty-five years has given to the Orthodox greatly increased strength, for the Reform movement has made but slight impression upon the Russian mind as yet.

Indicative of a recognition that congregational autonomy is not free from a tendency to develop into a characterless individualism are the formation of the Union of American Hebrew (Reform) Congregations in 1873, and, more recently (1889), the establishment of the Central Conference of American Rabbis. A recent development has been an agita-

tion for the calling of an American Jewish synod. As a means of strengthening Orthodox Judaism a Union of Orthodox Jewish Congregations in the United States and Canada was formed in 1898, followed by the creation of a similar organization, representing Russian Orthodoxy, in 1901. A Society of American Cantors was established in 1894. For further details see AMERICA, JUDAISM IN, and REFORM JUDAISM.

**7. Military, Naval, and State Service:** From the Dutch settlements in Brazil and other parts of

South America the services rendered by the Jews to the states of their adoption or nativity have been largely in excess of their proportionate share. It is likely that a few of the more adventurous pioneers engaged in conflicts with the Indians, and, as already mentioned, Asser LEVY, as early as 1655, claimed, on behalf of himself and his associates, the right to serve in Stuyvesant's expedition against the Swedes on the Delaware, instead of paying a tax for exemption from military service. An occasional Jewish name appears in the rosters of those serving in the colonial expeditions against the French and Indians, and one or perhaps two Jews were with Washington on his expedition

across the Alleghenies in 1754, and were among the recipients of grants of land for their services.

At the outbreak of the Revolutionary movement and before the formation of strong parties was brought about, the Jews were almost to a man supporters of the colonial contentions. Though numbering only a bare 2,000 in a total population of 2,000,000, they had developed large commercial interests in Newport, Philadelphia, Charleston, Savannah, and

New York. None the less, in all these cities they were ardent supporters of the various measures of non-importation designed to frustrate the British acts, and this in the face of the fact that they were greatly engaged in intercolonial and English trade and in some places, as in Philadelphia and Newport, were the largest ship-owners. At least eight Philadelphia Jews were among the signers of the non-importation resolutions adopted in that city in 1765, and five subscribed to those of New York in 1769. When war actually broke out Jewish names occurred on

the first rosters. Though no complete figures have been compiled, it is probable that not less than 100 officers and men served at one time or another in the Revolutionary war. Noteworthy in this connection are the forty Jews among the sixty men who composed Capt. Richard Lushington's company of Charleston. Twenty-four officers have been counted, among the most distinguished being Lieut.-Col. David S. FRANKS, Lieut. Isaac FRANKS (lieutenant-colonel of Pennsylvania militia, 1794), and Major Benjamin Nones. The slight increase in the Jewish population between the close of the Revolutionary war and the outbreak of the War of 1812, and the divided sentiments which prevailed

during the latter war, render it likely that less than fifty Jews participated in it, and none appears to have gained special distinction. In the Mexican war about sixty Jews saw service, the most prominent being Major and Surgeon David de LEON, who twice received the thanks of Congress for gallantry, and who as surgeon-general of the Confederate armies organized their medical departments.

The effect of the increase of the Jewish popula-

Monument Erected in Memory of the Jewish Soldiers Who Died in the Civil War, Cypress Hill Cemetery, Brooklyn, New York.

(From a photograph.)

tion between 1848 and 1860 is shown in the military records of the Civil war. Between 7,000 and 8,000 Jews, in all ranks, saw service on both sides of this terrible conflict, some with rare distinction. Included in this number are 9 generals, 18 colonels, 8 lieutenant-colonels, 40 majors, 205 captains, 325 lieutenants, 48 adjutants, etc., and 25 surgeons. In the recent Spanish-American war (1898) Jews formed a far greater proportion of the forces, and served with distinction. The numbers engaged were as follows: Officers: army, 32; navy, 27; non-commissioned officers and men: army, 2,450; navy, 42.

A considerable number of Jews have always been found in the regular army and navy. As officers the following have been conspicuous: Major Alfred MORDECAI (1804-87), expert on ordnance and explosives; Commodore Uriah P. LEVY (1792-1862), secured the abolition of corporal punishment in the navy; Capt. Levi M. HARRY (1793-1870); Capt. Adolph MARIX (1848); Col. Charles H. LAUCHEIMER (1859); and Capt. E. L. ZALINSKI (retired 1894).

From the days when Georgia was a colony and a Jew occupied the governor's chair, and from those when Haym SALOMON not only sustained the weak credit of the Congress of the Revolution but out of his private purse supported some of the most prominent of the leaders of the time when, without his aid, the country would have been deprived of their services, down to the appointment in 1902 by President Roosevelt of Oscar S. STRAUS to the position of successor to the late President Harrison as member of the Permanent Court of Arbitration at The Hague, there has been a full record of service.

Though five Jews have been elected to the Senate (David L. YULEE [1845-61]; Judah P. BENJAMIN [1852-61]; Benjamin F. JONAS [1879-85]; Joseph SIMON [1897-1903]; and Isidor RAYNER [1905]), it is a noteworthy fact that none of these has ever held a position of leadership in the Jewish community, and their selection has been made irrespective of any support from specifically Jewish sources. Nor has any, with the exception of Judah P. Benjamin, attained a position of leadership among his colleagues in the Senate. Benjamin's services to the Confederacy as secretary of state after his resignation from the Senate, and his subsequent career in England stamp him as the foremost Jew of American birth. The House of Representatives has had about forty Jewish members, of whom four are serving at the present time. Henry M. GOLDFOGLE, representing a constituency made up largely of Jews, has displayed an intelligent activity in promoting measures of specifically Jewish interest, and has taken a prominent part in the endeavor to compel Russia to recognize American passports held by Jews. In 1904, moreover, both political parties adopted declarations in their platforms, pronouncing in favor of the institution of measures to insure the equal treatment and protection of all American citizens sojourning or traveling in foreign countries; and in his message to Congress of Dec., 1904, President Roosevelt spoke vigorously against the Russian attitude as affecting American Jewish citizens. Of Jews who have served their communities in the lesser offices, ranging from that of city alderman or councilman to the higher state positions, the numbers are so great that no ac-

count is possible here. Yet space must be allowed for the mention of Judge Mayer SULZBERGER of Philadelphia, conspicuous among American Jews not only by reason of his exceptional learning, but also because of his activity in all fields of Jewish activity.

Especially noteworthy also is the fact that the first statue presented to the United States, thereby originating Statuary Hall in the Capitol at Washington, was the gift, in 1838, of a Jew, Lieutenant, later Commodore, Uriah P. LEVY. The statue is one of Thomas Jefferson, in bronze, and was executed by the French Jewish sculptor David d'Angers.

**8. Civil and Political Rights:** It was within the bounds of what soon became the United States that Jews for the first time in modern history were put upon a plane of absolute equality with other races. Rhode Island, founded by Roger Williams as a refuge for the persecuted of all forms of religious beliefs, welcomed the Jews not less than others. For that reason the Jewish community in that colony attained prominence at an early date, and contributed largely to its development along commercial lines. New York, South Carolina, Pennsylvania, and Georgia gave the Jews a generous welcome as well, and attracted in consequence considerable Jewish communities at an early period of their respective histories. The unfavorable environment of Puritan New England, which actuated Roger Williams to establish his colony as a protest against the illiberal views which predominated in the adjoining colonies, rendered the establishment of any sort of Jewish community in their midst an impossibility. This was all the more remarkable since the earlier forms of government and laws were fashioned in a manner upon Old Testament lines. This was particularly the case in Massachusetts (whose first criminal code [1641] gave chapter and verse from the Bible as its authority), as also in Connecticut. The records of the colony of New Haven, founded in 1638, have a distinctly Old Testament character, and Biblical precedent is quoted for almost every governmental act. One can form some opinion of the measure of Old Testament influence when one considers that in the code of colony laws adopted in New Haven in 1656 there are 107 references to the Old Testament to 29 to the New, and of the latter 5 are of an ecclesiastical character.

But Jews as individuals contributed little or nothing to direct the trend of the colonial legislation of this early period. The few who arrived previous to the birth of liberal ideas during the period of the Revolution were contented to be allowed the rare opportunity of living in unmolested exercise of their religion, and made no contest for political rights, though an occasional bold character, such as Asser LEVY and Rabba Couty, helped much to make it known that the heavens would not fall if a Jew were accorded certain political privileges. The participation of Jews in the control of the Dutch West India Company caused the extension of liberal political ideas to the colony of New Amsterdam, and they do not appear to have been seriously curtailed after the English occupation. Jews were naturalized occasionally in most of the colonies elsewhere than in New England; and in New York they

appear to have voted for state officials before 1787 (see page 348). Under the Parliamentary Act of 1740 foreigners who had been resident in the

British colonies for a period of seven years could be naturalized without taking the sacrament, merely an oath of fidelity taken upon the Old Testament being required. Before 1762

there is record that thirty-five Jews availed themselves of this privilege, and after that date many others must have taken the oath. Georgia, Rhode Island, and South Carolina placed no obstacles in the way of a Jew holding any office, though in most of the other colonies Jews were barred because of the necessity, on the assumption of office, of taking an oath either "upon the true faith of a Christian" or declaring a belief in the divine inspiration of the New Testament. Similarly, in the more illiberal colonies the right of suffrage was restricted to Christians, though it is likely that the restrictions were not severely enforced.

Though the constitutions established during the Revolutionary period fixed no religious qualifications for the suffrage, except that of New Hampshire, they were far more stringent where the matter of holding office was concerned. All but Rhode Island, New York, and South Carolina restricted office-holders to those professing the Christian religion, and this too in spite of the fact that the preambles to most of the constitutions proclaimed emphatically the rights to which man was by nature entitled. To men of logical mind, like Jefferson and Madison, this inconsistency was always a thorn in the flesh, and in their own state, Virginia, they soon began an agitation that culminated in 1785 in the passage of the Religious Freedom Act. This liberal movement was responsible for the guaranties embodied in the ordinance of 1787, which effectively insured for all time the fullest degree of civil and religious liberty in the territory northwest of the Ohio River. Within a few months the same idea was written in the Constitution, which provides that "no religious test shall ever be required as a qualification to any public office or public trust under the United States"; this clause, strengthened by the first amendment, "Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof," fixed the federal law and established the absolute equality of citizens of all creeds in all the

territory over which the United States had control. Though there is no evidence that Jews had any direct hand in placing this fitting capstone to the constitutional structure, the influence exerted by the example of so commanding a figure as Haym SALOMON, and the services rendered the United States by the Jewish soldiers in the field, probably played their part. In this connection may be mentioned the petition which Gershom Mendes Seixas, Simon Nathan Asher Myers, Barnard Gratz, and Haym Salomon, the mahamad of the Mickvé Israel synagogue of Philadelphia, on Dec. 23, 1783, sent to the Council of Censors of Pennsylvania praying for the removal of the declaration of belief in the divine inspiration of both the Old and the New Testament as a qualification for member-

ship in the Pennsylvania assembly; and the letter which Jonas Phillips addressed to the Federal Convention, Sept. 7, 1787, requesting that it abolish the same qualification ("Publ. Am. Jew. Hist. Soc." No. 2, p. 107). Before the close of the century there was great advance in conforming the state constitutions to the more liberal federal constitution. The spread of democratic ideas, started by the election of Jefferson to the presidency, which was characteristic of the first quarter of the nineteenth century, broke down the barriers of intolerance everywhere but in Maryland, and that state gave way just as the period was brought to a close. The effective work accomplished by the COHEN and ETTING families in pushing through the "Jew Bill" after more than twenty-five years of agitation has already been referred to and can be found treated in detail in the article MARYLAND. It is the only instance in American history where the establishment of a fundamental constitutional principle can be credited directly to the specific labors of individual Jews.

There have been numerous instances in which Jews have come in conflict with the universal Sunday laws. In practically all cases the right of the state to enact Sunday laws as police regulations has been sustained. The statutory laws of

**Sunday Laws.** New York and Indiana exempt one who observes some day of the week other than the first day and refrains

from labor thereon, from suffering prosecution under the Sunday laws ("Publ. Am. Jew. Hist. Soc." No. 11, p. 101). In 1901 S. H. BORORSKY, a member of the Massachusetts House of Representatives, introduced a bill exempting persons who observed the seventh day as Sabbath from any penalty for laboring on the first day. The bill passed the House, but was defeated in the Senate. That the Sunday laws in many cases inflict direct hardship upon large sections of the Jewish community can not be denied, and any interpretation of them except as police regulations would undoubtedly be construed as infringements upon the religious liberty of the individual. A solution of the difficulty might be found in the general adoption of the New York and Indiana statutes, but there is as yet no indication of any movement to bring this about. In cases where Jews are interested parties or witnesses, objection has at times been raised against going to trial or giving testimony on the seventh day of the week. Occasionally a postponement has been allowed or a witness excused, but the prevailing attitude of the courts has been that where duties to one's religion and to the state come in conflict the latter must prevail. The fact that there has been a general tendency on the part of even the higher courts to maintain that this is a Christian country, and that legislation which is in conflict with the doctrines of Christianity can not be allowed to prevail, has not failed to arouse decided opposition in many Jewish quarters.

**9. Science, Art, Literature, and the Learned Professions:** Jews have been members of all the learned professions—principally the legal and medical—and they have contributed notably to the advancement of nearly all the sciences and of the fine

arts. Many eminent physicians, medical writers, and professors in medical schools are Jews. There has been at least one distinguished Hebrew sculptor, Moses EZEKIEL, and there are several others of rank, among whom Ephraim KEYSER and Katherine M. Cohen should be mentioned. Louis LOEB is one of the leading painters of the country, and has done

**Jews** illustrating of a high order; the Rosen-  
**Eminent in** thals of Philadelphia, father and son,  
**are distinguished as** etchers and en-  
**gravers.** Among other artists of note  
**partments.** are Toby Rosenthal, L. Dessar, E. C. Peixotto, Henry Mosler, and Albert E.

Stern; Leo Mielziner is both sculptor and portrait-painter. As caricaturists Henry Meyer and F. Opper have made their mark. Bernard Berenson is one of the foremost living art-critics, and Charles Waldstein is one of the leading authorities on ancient art. Jews are also found as inventors, *e.g.*, Emil Berliner, inventor of the telephone-transmitter, and Louis E. and Max Levy, inventors of photoengraving processes; as architects, such as Dankmar Adler of Chicago, and Arnold W. Brunner of New York; and as engineers, the most distinguished of whom is Mendes Cohen of Baltimore, one of the pioneer railroad-builders of the country, and at one time president of the American Society of Civil Engineers.

Many Jews hold professorships in colleges: M. Bloomfield and J. H. Hollander at Johns Hopkins; Franz Boas, Richard Gottheil, and E. R. A. Seligman at Columbia; Morris Loeb at the University of New York; Morris Jastrow and Leo S. Rowe at the University of Pennsylvania; Joseph Jastrow at the University of Wisconsin; Charles Gross at Harvard; Ernst Freund at the University of Chicago; Jacques Loeb at the University of California; Isidor Loeb at the University of Missouri; while a much larger number are assistant professors or instructors. Simon FLEXNER is one of the leading pathologists, and is director of the Rockefeller Institute of Medical Research; and Franz Boas is eminent as an anthropologist.

The most distinguished Jewish writer of poetry in the United States was Emma LAZARUS; Michael Heilprin gained eminence as an editor and writer, as have Louis Heilprin as an encyclopedist, Angelo Heilprin as a geologist, and Fabian Franklin as a mathematician; A. Cahan, Ezra S. Rudno, Annie Nathan Mayer, Mary Moss, and Emma Wolf are successful novelists; and Morris Rosenfeld is a gifted Yiddish poet. Martha Wolfenstein has written Jewish tales of rare literary charm.

Of Jewish periodicals and newspapers published in the United States the number has been legion (see PERIODICALS). The wide distribution of the Jewish community and the marked division into the Orthodox and Reform camps have rendered impossible the establishment of one central organ for the Jews of the country, as in England. Weekly newspapers, largely of local interest, though containing much readable material upon general Jewish

**News-** affairs, and making some pretense to  
**papers.** produce articles of literary quality, are published in all the large cities. The

first Jewish periodical published in the United States was "The Jew," issued at New York in 1823-

1825; and unquestionably the most significant was the "Occident," published at Philadelphia by Isaac LEESER from 1843 to 69 (the last volume edited by Mayer SULZBERGER).

Among the more important weeklies are "The American Israelite," Cincinnati, 1854; "The Jewish Messenger," New York, 1857-1902; "The Hebrew," San Francisco, 1863; "The American Hebrew," New York, 1879; "The Jewish Exponent," Philadelphia, 1887; "The Reform Advocate," Chicago, 1891; and "The Jewish Comment," Baltimore, 1895. At the present time three Jewish monthlies are issued: "The Menorah" (1886), organ of the B'nai B'rith and the Jewish Chautauqua; "The Maccabean" (1901), the Zionist organ; and "The New Era Literary Magazine" (1903); all published at New York. The United Hebrew Charities of New York also publishes a magazine, "Jewish Charity," devoted to sociological work, and there are numerous publications of a similar nature issued by other philanthropic organizations.

Several periodicals have been published in German, and, since the Russian immigration, a number in Hebrew. All of these have been organs representing specifically Jewish religious and literary interests. In this respect they have differed from the multitudinous issues of the Yiddish press which have seen the light since 1882, and which, though reflecting Jewish conditions, have in only a few instances had any religious cast; they have been more literary and scientific than religious.

In music a number of Hebrews have acquired a reputable position; and Fanny Bloomfield-Zeiser is one of the greatest of living pianists. Jews are prominent also as actors and as dramatic authors.

**Music and** Among actors of bygone times may  
**the Stage.** first be mentioned Aaron J. Phillips, who first appeared in New York at the

Park Theater in 1815 and was a very successful comedian; Emanuel Judah, who first appeared in 1823; and Moses S. Phillips, who acted at the Park Theater in 1827. Mordecai M. NOAH, best known as journalist, politician, and diplomat, was also a dramatic author of considerable note. Other dramatists and authors were Samuel B. H. Judah (born in New York in 1790) and Jonas B. Phillips; and at the present time David BELASCO is a most successful playwright. The control of theatrical productions in this country is mainly in the hands of Jews at the present time. The introduction of opera into the United States was due largely to Lorenzo da PONTÈ. Alfred Hertz now conducts at the Metropolitan Opera House, which is under the direction of Heinrich Conried.

**10. Commerce and Industry:** In commerce Jews were notably important in the eighteenth century. In the early colonial period, more especially in Pennsylvania and in New York, many of the Jews traded with the Indians. The fact that the earliest settlers were men of means, and were Spanish and Portuguese Jews who had relatives and friends settled throughout the Levant, gave them specially favorable opportunities for trading. Some were extensive ship-owners, as Aaron Lopez of Newport, who before the Revolutionary war had a fleet of thirty vessels; and David and Moses Franks

of Philadelphia. Jews very early traded between the West India Islands and the North-American colonies, as well as with Amsterdam, Venice, etc.

The Jewish immigrants who arrived in America during the nineteenth century were in the main poor people who commenced trading in a small way, usually by peddling, which, before the existence of railroads, was a favorite method of carrying merchandise into the country districts. By industry and frugality they laid the foundations of a considerable number of moderate fortunes. The Jews of New York became an integral part of that great trading community.

The organization out of which grew the Stock Exchange of New York originated in an agreement in 1792 to buy and sell only on a definite commission; and to this document were attached the signatures of four Jews. Since then Jews have

**Jews Active in Financial Circles.** been very active in the Stock Exchange and in banking circles, both in New York and elsewhere. The great-grandson of Haym Salomon,

William, is a factor of consequence in New York financial circles. Jacob H. Schiff and James Speyer are counted among the leading financiers of the country. The Jews have also taken an important part in controlling the cotton trade, and in large measure the clothing trade has been throughout its history in their hands (see below). They are likewise very prominent in the manufacture of cloaks and shirts, and more recently of cigars and jewelry.

**11. Social Condition:** The social organization of the Jews resident in America has differed little from that in other countries. In the early colonial period the wealthier Hebrews seem to have taken part with their Christian fellow citizens in the organization of dancing assemblies and other social functions, and clubs. Nevertheless, in the main, and without any compulsion, Jews preferred to live in close proximity to one another, a peculiarity which still prevails.

At the time when little toleration was shown in other countries, there were in America many interchanges of mutual good-will between Christians and Jews. Rabbi Hayyim Isaac Carregal was one of the close friends of Ezra Stiles, president of Yale College; and as early as 1711 the Jews of New York made a contribution of £3.12s. for the building of a steeple on Trinity Church.

**Jews and Christians Cooperate.** Gershom Mendes Seixas, minister of the Shearith Israel congregation, New York, was a trustee of Columbia College (1784-1815), although this organization was under the Episcopal Church; and the Episcopal bishop of New York occasionally attended service in the synagogue. After 1848 there arrived a large number of Jews who could not speak the English language, and to them a certain odium attached on this account; but this seems gradually to have worn off. The general American public exhibited great sympathy for the Jews in 1840 at the time of the Damascus murders, in 1853-57 at the time of the Swiss troubles, and again in 1882, 1903, and 1905 on the occasion of the persecutions in Russia. Hermann Ahlwardt, on his visit to America in 1895,

found the soil an unfavorable one for his anti-Semitic propaganda, and when he projected it was protected from violence by Jewish policemen.

Though there is nothing corresponding to the anti-Semitic movements of continental Europe, an undoubted and extensive social prejudice against the Jews exists, which manifests itself in numerous petty though not insignificant ways, mainly in the Eastern States, where their numbers are greatest. It has assumed the form of excluding Jewish children from certain private schools, and their elders from clubs and some hotels.

Very early the Jews in America began to form social organizations. A club was started in Newport as early as 1769; and social clubs—some comprising many members and possessed

**Hebrew Clubs.** of magnificent properties—have been established in many sections of the country. The development of Hebrew social clubs has been larger in the United States than elsewhere. American Jews have also been especially given to the forming of secret orders, which, while they had primarily an educational and charitable purpose, had much social influence, and tended powerfully toward the continued association of Jews with one another when the hold of the synagogue upon them relaxed. These were supplemented later by the formation of Young Men's Hebrew Associations, which, like the orders, partake to some extent of the nature of social organizations.

A. H. F.

**12. Russian Immigration:** Individual Russian and Polish Jews, especially the latter, emigrated to the United States at the time of the American Revolution, among whom was Haym Salomon, one of the noblest examples of devotion to American liberty and a friend of Kosciusko. The Russian ukase of 1827 drafting Jewish boys at the age of twelve to military service (see *JEW. ENCYC.* iii. 549h, *s. v.* *CANTONISTS*), and that of 1845 extending the conscription to Russian Poland were the starting-points of emigration to England and thence to America. The epoch-making period of 1848 and the revolt in Poland in 1863 were factors in increasing the emigration of Jews from Russia. But the Russo-Jewish emigration en masse did not begin till 1881. Prior to that date it had been restricted almost entirely to the provinces lying about the Niemen and the Duna, and the emigrants were voluntary ones who desired to better their economic condition and to tempt fortune elsewhere.

With the anti-Jewish riots of April 27, 1881, at Yelizavetgrad, and the later riots in Kiev and other cities of South Russia, Jewish emigration to the United States assumed an entirely different character, and received an impetus so remarkable as to create a new epoch in American Jewish history. The first group of the new class of immigrants, consisting of about 250 members of the Am 'Olam Society ("Eternal People"), arrived in New York city July 29, 1881; the third and last group of the same society arrived May 30, 1882, and was followed by streams of Russo-Jewish refugees. The immigration largely increased from 1892, and still more from 1901 (see *MIGRATION*).

**Emigration.**

The forced emigration of the Russian Jews owing to their persecution by the Russian government evoked loud protests from prominent men in the United States, and much sympathy was expressed for the refugees. The most important meeting, convened by ex-President U. S. Grant and seventy others, was held Feb. 1, 1882, at Chickering Hall, New York, and was presided over by the mayor, William R. Grace. In Philadelphia a similar meeting was held a fortnight later (Feb. 15) under the presidency of Mayor Samuel King; and through the efforts of Drexel, the banker, a fund of \$25,000 for the relief of the refugees was collected. Indeed, funds in aid of the Russian Jews were raised in all the principal cities of America. The Hebrew Immigrants Aid Society of the United States collected in 1882 about \$300,000, of which the Alliance Israélite Universelle of Paris contributed \$40,000, the General Committee of Paris \$20,000, the Berlin Committee \$35,000, the Mansion House Committee of London \$40,000, and the New York Russian Relief Fund (Jacob H. Schiff, treasurer) \$57,000. Altogether the last-named fund amounted to about \$70,000. In 1883 about \$60,000 more was collected, for the immediate relief of the Russian immigrants, and temporary quarters were built on Ward's Island and at Greenpoint, L. I. About 3,000 immigrants were temporarily housed and maintained there until they found employment.

Michael HEILPRIN induced the various committees to colonize the immigrants; but nearly all such undertakings proved unsuccessful. **The Jewish Agricultural and Industrial Aid Society**, however, reports for 1904 some improvement in this respect ("American Hebrew," March 17, 1905; see also JEW.

**Agricultural Colonies.**

ENCYC. i. 256 *et seq.*, s.v. AGRICULTURAL COLONIES IN THE UNITED STATES). This society is endeavoring to extend its work by starting small agricultural settlements at different points. Many

farms in Connecticut and Massachusetts have passed into Jewish hands, and the number of Jewish farmers in the United States is now estimated at 12,000. Altogether the various committees and societies assisted probably 5 per cent of the total Jewish immigrants. Of the remainder, some were dependent on relatives and friends; but a great majority, independent of any assistance, worked out their own destiny as did their countrymen who preceded them.

**The Hebrew Immigrants Aid Society** of New York helps to find the relatives and friends of Jewish immigrants, and pleads for the discharge of detained immigrants. The society engages lawyers to defend cases of deportation. From Sept. 1, 1902, to Aug. 1, 1904, it appealed 217 cases, 128 of which were sustained and 89 dismissed. The cost of the appeals amounted to \$1,305.78. The total income of the society for that period was \$6,029.29.

The Jewish pioneers from Russia and Poland became glaziers, cigar-makers, pedlars, small shopkeepers, and proprietors of supply stores for pedlars. In the fifties there were about a dozen Russian Jews in New York engaged in various trades, as tobacco, jewelry, passementerie, millinery, hats and caps, and general dry-goods. During

the sixties there were Russo-Jewish manufacturers of hoop-skirts, cloaks, and clothing. A few Russian Jews were among the California pioneers, and achieved their successes not as miners, but as merchants. Others drifted to the South, especially to Charleston and New Orleans, where they prospered as business men, cotton-planters, and even as slave-owners. Some became importers and exporters of merchandise. Abraham Raffel, a native of Suwalki, exported agricultural machinery and windmills to Moscow in 1862. Moses Gardner, a native of Sherki (b. 1815; d. 1903 in New York), imported linen crashes and furs from Russia, making annual trips to St. Petersburg, Moscow, and Nijni-Novgorod for that purpose. Solomon Silberstein, a native of Grodno, arrived in New York in 1849, went to California in 1850, and prior to 1867 was engaged in the

importation of furs from Alaska, then a Russian possession. Silberstein even ventured across Bering Strait to Kamchatka and Vladivostok to import merchandise to California. His business increased to such an extent that he chartered a special vessel to transport his goods; and it may be added that he

gave orders to the captain not to begin the voyage on a Sabbath-day. Russian Jews were largely interested in the Alaskan Fur Company.

Reuben Isaacs, a native of Suwalki, arrived in New York in 1849 and went to California in 1850. From 1868 he was engaged with his brother Israel in the exportation of kerosene oil to Japan. Later, under the firm name "R. Isaacs & Bro.," they opened a branch at Yokohama and Kobé, Japan, and, as "The American Commercial Co.," they established another at Manila, Philippine Islands. There are several American-Russian Jews now (1905) doing business with Japan.

Up to the eighties the Russian Jews were principally pedlars, shopkeepers, and manufacturers, but with the Jewish persecution in Russia many skilled

laborers were forced to emigrate to America. These were later organized into various unions; and many affiliated with the **United Hebrew Trades** of the state of New York, organized in 1889 by Morris Hillquit and Joseph Barondess. The skilled Jewish laborers in New York city now number over 75,000, of whom two-thirds are Russian Jews. The United Hebrew Trades represent about 25,000, but in times of strikes they increase to 50,000. Abraham Lippman, secretary of the United Hebrew Trades, has furnished the above table on page 368, showing the various unions, their average memberships, and the number of Russo-Jewish members in Jan., 1905.

Russo-Jewish skilled laborers are found elsewhere than in New York. In the silk-factories of New Jersey, in the machine-shops of Connecticut, and in the jewelry-factories of Rhode Island they are to be seen side by side with the best non-Jewish working men.

Russian Jews have also helped to develop the real-estate market in the principal centers of the United States. In the city of New York they are among the largest operators; and they have built up Brownsville, a suburb of Brooklyn, and a considerable part of the Bronx on the Harlem River. Russo-Jewish activity in every line of industry extends to all cities of the Union, but more particularly to New York, Philadelphia, Baltimore, Boston, Chicago, Pittsburg, and St. Louis.

Criminal statistics show a low percentage of crime among the Russian Jews as compared with the general population. The report of Dr. A. M. Radin, visiting chaplain of New York state prisons, for the year 1903 presents the following details concerning the Jewish prisoners:

The large percentage of Jewish boys in the House of Refuge on Randalls Island is accounted for by the existence of special sectarian protectories, which care for a large number of boys, while the Jews have no separate house of refuge. These statistics, from the densest and most crowded Jewish population in the Union, are the best evidence of the moral and law-abiding character of the Jews in general and of the Russo-Jewish immigrants in particular. Where the Jews are not so thickly congregated few if any are to be found in the prisons: in each of three of the penal institutions of the upper part of the state of New York, namely, the Syracuse Penitentiary, the Monroe County Penitentiary at Rochester, and the Erie County Penitentiary at Buffalo, there was in 1903 only one Jew.

The Russian Jews, even those who have neglected or have had no opportunity to study in Russia, learn the English language as soon as they arrive in America; and some study the higher branches of English literature. Their children almost without exception attend the public schools; and many avail themselves of the education afforded in the high schools, the City College, and the Normal College, as well as the universities. More than 60 per cent of the students in these colleges are Russo-Jewish immigrants or the children of Russian Jews. The majority of the parents are poor; but they pinch themselves to keep their children in college rather than let them contribute to the support of the family.

Among the Russian Jews in New York city there are about 400 physicians, 1,000 druggists, 300 dentists, 400 lawyers, and 25 architects, besides many in other professions, particularly musicians and

composers of popular music. Biographies of the more prominent professional men will be found in the "American Jewish Year Book for 5665." Also many Russian Jews are clerks in the city departmental offices; and a large number are teachers in the public schools.

Since about 1885 the Russian Jews in America have created an amount of literature in Yiddish exceeding the productions of the same kind that have been published in Russia and elsewhere during the same period (see L. Wiener, "A History of Yiddish Literature in the Nineteenth Century," New York, 1899). Six daily Yiddish newspapers are printed in the city of New York (circulation exceeding 100,000 copies), which inform the Jewish immigrants of the general topics of the day and serve by their advertisements as aids in securing employment. They serve also to help the immigrants in the reading of newspapers in English. There are, besides,

**Yiddish Press.** the Hebrew weekly "Ha-Leom" and other Yiddish and Hebrew periodicals.

The Yiddish and Hebrew press is almost exclusively in the hands of Russian Jews, who are well represented also among the reporters and journalists of the secular press (see Drachman, "Neo-Hebraic Literature in America," in "Seventh Report of Jewish Theological Seminary Association," New York, 1900).

Russo-Jewish educational work in the city of New York is conducted by **The Educational Alliance**, of which David BLAUSTEIN is superintendent and Adolph M. Radin and Harris Masliansky are lecturers. Others hold special classes in various branches of science and literature. Russian Jews are devoted frequenters of the public libraries, reading the best selected literature and but little fiction. Their principal literary societies are the **OHOLE SHEM ASSOCIATION** and **Mefize Sefat Eber**. Among earlier literary societies were **Doreshe Sefat Eber**, founded in 1880 (issued "Ha-Me'assef," No. i., 1881); the **Hebrew Literary Society of Chicago** (issued "Keren Or," 2 Nos., Chicago, 1889); **Mefize Sifrut Yisrael be-Amerika** (issued "Ner ha-Ma'arabi," New York, 1895-97); and the **Russian American Hebrew Association**, organized by Dr. A. Radin in 1890.

The first Russo-Jewish congregation, the **Beth Hamidrash Hagodal**, was organized in New York in 1852. There are now more than 300 large and small congregations and hebras; also orders, lodges, and benevolent and charitable societies and institutions, foremost among which are the **Beth Israel Hospital** and the **Gemiluth Hasadim Association**. With regard to the synagogues it should be noted that the Russian Jew does not adopt Reform customs, but is strictly Orthodox. Short biographical sketches of their rabbis and cantors will be found in the "American Jewish Year Book for 5664."

The Russian Jew is quickly adapting himself to American life. According to Dr. M. Fishberg, Russo-Jewish immigrants improve in stature, chest-development, and muscular strength after their arrival. Their descendants, he says, are improving physically, morally, and intellectually under the favorable influence of American conditions. When called upon the Russian Jews in America do not

hesitate to fight for the country which has given them freedom. During the war with Spain the number of Russian Jews who enrolled as volunteers in the United States army was greater in proportion to their population than that of other foreigners. The regular army also has a goodly number of Russian Jews in its ranks; and their bravery, energy, and power of endurance have frequently been praised by their officers.

J. D. E.

**13. Statistics:** The growth of the Jewish population in the United States during the nineteenth century has been quite extraordinary. At the beginning of the century it probably did not number more than 2,000 (800 in Charleston, 500 in New York, 150 in Philadelphia, and the remainder scattered throughout the rest of the original states). The population received accretions, mainly from England and Germany, up to 1848, when the number had increased to 50,000. Then from the Teutonic lands there occurred a great immigration due to the failure of the Revolution of 1848, and up to 1881 the immigrants probably numbered over 100,000; then the population was estimated at 230,257. During the twenty-five years 1881-1905 very nearly 1,000,000 Jewish immigrants reached the United States, as follows:

Years.	New York.	Philadel- phia.	Baltimore.	Totals.
1881-84.....				62,022
1885-98.....	404,101	36,390	18,677	459,168
1899.....	29,088	1,649	1,463	32,200
1900.....	53,687	3,870	2,439	59,996
1901.....	37,952	2,253	1,343	41,548
1902.....	54,594	2,475	1,566	58,635
1903.....	60,815	3,357	2,993	67,165
1904.....	89,442	5,310	6,606	101,358
1905.....	100,338	9,392	5,086	114,816
Totals....	830,017	64,696	40,173	996,908

Against the extraordinary immigration must be counted a certain amount of emigration, including about one per cent who are deported, and a large number of Russian Jews who suffer from nostalgia ("American Hebrew," May 15, 1904), but no complete figures are ascertainable with regard to the numbers thus returning. On the other hand, a considerable number of Jews, especially from England and Germany, travel above the steerage class; and the statistics above given do not include persons who went through Canada. Allowing for the natural increase, the Jewish population can not at present be much below 1,700,000.

The original 250,000 who were in the United States in 1877 would by natural increase have reached 400,000 by this time, and the 1,000,000 immigrants that have poured in since then must have increased at least 200,000 if they are reckoned on a mean population of 400,000 immigrants during the last twenty-five years. The movement of population within the last thirty years may be estimated as follows:

	Native (1877).	Immigrant (1881-1905).	Totals.
Numbers enumerated....	250,000	1,000,000	1,250,000
Deaths.....	100,000	150,000	250,000
Births.....	250,000	350,000	600,000
Increase.....	150,000	200,000	350,000
Total.....	400,000	1,200,000	1,600,000
Born in America.....	350,000	300,000	650,000

The above is quite a conservative estimate. For example, the increase on the immigration reckoned at 1.02 per annum upon a mean population of 400,000 would by geometrical progression for twenty-five years reach 1.66 (= 1.02 raised to the 25th power). This would imply an increase of 266,000 rather than 200,000. Similarly, applying an increase rate of 1.02 to the 250,000 original inhabitants of 1877, it would increase to 1.78 (1.02 to the 28th power) during the twenty-eight intervening years, and would show an increase in numbers of nearly 200,000 instead of the 150,000 estimated. If these figures were adopted, the total number for the United States at the present time (1905) would be 1,700,000, of whom 750,000 would have been born in the country.

The Jews are spread unequally throughout the United States. On the whole, their relative density of population corresponds to that of the population in general except as regards the North Atlantic States. A large proportion of them have landed on the Atlantic coast, and have for vari-

ous reasons remained in the Eastern States. It is, however, a mistake to think that all immigrants remain in the cities at which they land.

**Distribu-** Apart from the exertions of institu-  
**tion.** tions like the Agricultural Aid and Removal Society, many immigrants of their own accord move inland. It is on record, for example, that of the 830,017 who reached New York during the years 1885-1905, 227,523 left the city during the year in which they arrived. The following table represents the distribution of Jews according to states, with the chief towns in each state, the population, and the dates of settlement so far as can be ascertained, according to the estimate of 1877 and that made in the articles relating to the various states in THE JEWISH ENCYCLOPEDIA. Both are estimates, and are therefore likely to be somewhat above the reality, but each is incomplete, and it is probable that the incompleteness counterbalances the overestimation. In a few instances names of towns and agricultural colonies in which Jews settled but no longer reside are given in parentheses:

	1877.	1905.

The accompanying map gives most of this information in graphic form, indicating the relative importance of towns by the size of the characters in which their names are printed, and indicating those towns in which Jews were settled before 1800 in red; those between 1801 and 1848 in purple; those from 1849 to 1881 in green; and the remainder in black.

It will be of interest to compare the distribution between 1877 and 1905 in the various geographical divisions:

Geographical Divisions.	1877.		1905.	
	No.	Per Cent.	No.	Per Cent.
North Atlantic Division..	116,017	50.64	1,103,700	70.80
South Atlantic Division..	21,158	9.23	64,425	4.13
South Central Division..	23,964	10.41	62,085	3.98
North Central Division..	46,478	20.24	277,000	17.77
Western Division.....	21,465	9.32	51,500	3.30
Totals.....	229,082	99.84	1,538,710	99.98

Owing to the enormous numbers that remain in New York and the vicinity, the North Atlantic Division has greatly increased its quota during the last quarter of a century. Next to this, the greatest relative increase has been in the North Central Division, from 46,478 to 277,000. The increase in the Western States has not been relatively large, but from 21,465 to 51,500 is by no means insignificant considering the difficulties and the expenses of transportation to the Pacific coast.

No materials exist for deciding upon the nationalities of the Jewish settlers in the United States as a whole, but for the immigration of

**Nationalities.** the last twenty years (1884-1905) the countries from which the Jewish immigrants have come have been noted, and the numbers and percentages, together with the percentages of the 10,015 of different nationalities of

those applying to the United Hebrew Charities for aid during the year 1904-5, are as follows:

Nationality.	Numbers.	Per Cent.	Per Cent Applying for Charity.
Russians.....	551,708	67.94	50.70
Austrians.....	192,509	23.70	29.26

Swedes.....	421	.05	.03
South-Americans.....	5	.....	.05
Bulgarians.....	7	.....	.....
Greeks.....	12	.....	.....
Totals.....	811,936	99.94	.....

These figures, which relate only to the immigrants arriving in New York, do not, of course, apply to the whole Jewish population, and especially leave out of account the English and German immigrants of superior social standing, whose numbers are not counted in the immigration returns. Besides this, the offspring born on American soil for the last thirty years must by this time be at least one-third of the total number (see above).

It will be observed that the Russian Jews who have arrived in the United States constitute only two-thirds of the Jewish immigration, nearly a quarter of it coming from Austria. The number of Jews from Denmark and Sweden seems rather large compared with the Jewish population of those countries. The Turks include Jewish inhabitants of Asia Minor and Palestine, as well as of Constantinople and Salonica.

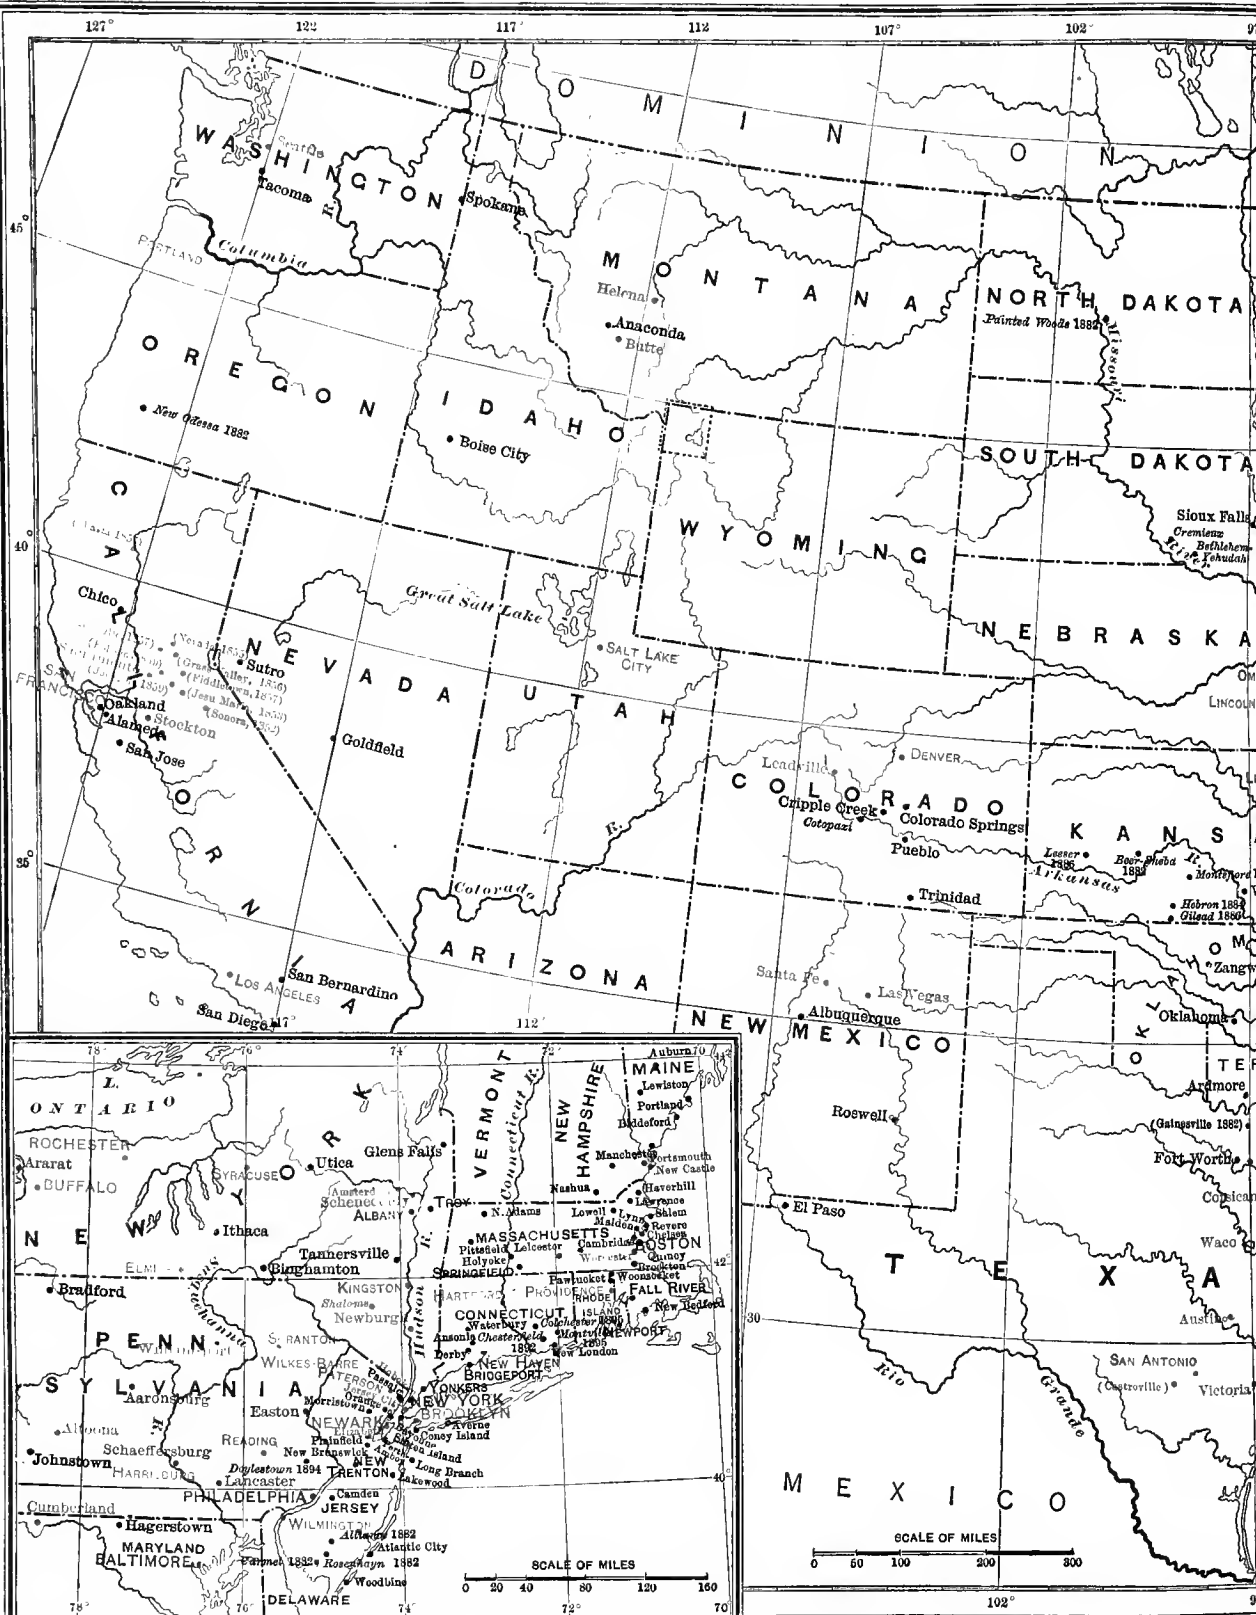

It will also be observed that the Russian Jews apply for charity in somewhat smaller proportions than those of the numbers of arrivals of the same nationality, while the Austrian Jews apply in larger numbers, thus confirming the impression of the greater "Judenelend" of Galicia. Only 2.39 per cent of the applicants were American-born Jews.

The actual figures for the chief occupations of 88,827 Russian and Polish Jews and 24,221 Jewesses in New York, 1900, are:

	Males.	Females.
Engaged in manufacture of clothing.....	25,674	8,545
Laborers (not specified).....	4,088	.....
Agents.....	1,663	.....
Clerks and copyists.....	2,754	.....
Hucksters and peddlers.....	4,215	.....
Retail merchants.....	9,016	.....
Salespeople.....	3,256	1,306
Boot- and shoe-makers.....	1,554	.....
Carpenters and joiners.....	1,574	.....

INSET: Enlarged Map of North Atlantic States.

Settlements during 1654-1800, indicated in Red; 1801-1848, in Brown; 1849-1881, in Green; 1882-1905, in Black.

## POPULATION AT VARIOUS PERIODS.

Copyright, 1905, by Funk & Wagnalls Company, New York & London.

The relative importance of the different communities is designated by the size of the type in which their names are printed; colonies in italics; communities no longer in existence in parenthesis.

As with nationalities, it is impossible to give full details of the occupations of American Jews, but the Poles and Russians in New York are almost exclusively Jewish (there is only one Orthodox Greek church in the city), and their occupations are given in the Twelfth Census.

It is possible to add to the above the occupations of the more recent Jewish immigrants. Out of 106,236 (65,040 males, 41,196 females) who arrived from July 1, 1903, up to June 20, 1904, there were:

Tailors.....	16,426	Merchants and clerks..	3,464
Carpenters.....	4,078	Servants.....	9,292
Butchers.....	1,401	Professionals.....	843
Bakers.....	1,173	Miscellaneous.....	672
Painters and glaziers..	1,970	Without occupation,	
Seamstresses.....	2,468	chiefly wives and	
Shoemakers.....	2,763	children.....	38,485
Other artisans.....	14,830		
Unskilled laborers.....	8,371		106,236

It will be observed that the predominant industry of the Russian Jews is tailoring, and Jews in general have been more intimately connected with the clothing trade than with any other occupation in the Union. The history of this connection has been recently investigated by J. E. Pope ("The Clothing Industry in New York," Columbia, Mo., 1905).

Up to about 1840 the working classes mainly depended for their every-day clothing either on home-spun goods or on renovated second-hand garments. The trade in the latter was mainly in the hands of the Jews, and this led to a connection with the clothing trade, just at the time when the sewing-machine made the ready-made trade possible.

The Jews not alone made clothing, but it was they who first developed a system of distributing ready-made clothing, and it was due to them that clothes which were sold in the general stores up to about 1840 were deposited and distributed in clothing stores almost entirely manipulated by Jews from that time onward. Outside of the jewelry trade the clothing trade was almost the sole occupation of the Jews up to 1860, and many merchants and firms that afterward branched out as general merchants, as the Seligmans, Wormsers, and Seasongoods, began in the clothing industry, but were diverted from it by the Civil war, which suddenly broke off the large trade with the South. Several of the Jewish tailoring establishments endeavored to replace this business by supplying uniforms for the Federal soldiers, but other firms had to divert their attention to new lines of industry. On the cessation of hostilities very large demands for clothing arose from the million and a half men suddenly released from their uniforms, and these were mainly supplied by Jewish tailors, who about this time appear to have introduced the contract system, letting out to subcontractors in the rural districts contracts for large consignments of clothing to be delivered at the great centers, and thence distributed throughout the country. In this development of the tailoring industry, which lasted from about 1865 to 1880, Jews became mainly the large contractors and distributors, but the actual work was done apart from the great centers of Jewish activity.

The next stage seems to have restored the industry

to the urban districts by bringing the actual work of construction inside factories. This also was the direct work of Jews. A certain number of English Jews who had learned the tailoring business went to Boston in the seventies, and removed to New York in the early part of the eighties, introducing what is known as "the Boston system," by which division of labor was widely extended in the tailoring trade. "Teams" of workmen turned out a single article at a much greater pace, and a single part of the work was learned more easily by newcomers. Russo-Jewish immigrants who arrived in large numbers at this time (1881 onward) had been incapacitated by their physique for any heavy work, and in some cases had begun the contract system of tailoring either in England or in Russia; they were, therefore, ready to take up tailoring work in the "sweat-shops" as almost the sole means by which they could obtain a livelihood immediately on arrival. Their participation in the trade became greater and greater, till in New York, the center of it, they were predominant. In 1888, of 241 clothing manufacturers in New York city 234 were Jews. Whereas previous to 1880 the imports of ready-made clothing from Germany had been about 12,000,000 marks a year, this was reduced by 1894 to less than 2,000,000. On the other hand, the clothing industry in 1880 turned out in the five chief centers goods to the amount of \$157,513,528, and in 1900 \$311,146,858, an increase of 97.22 per cent. By 1900 there were 8,266 clothing establishments in New York city, employing 90,950 workmen, with a capital of \$78,387,849 and an annual product of \$239,879,414 (Twelfth Census, viii. 622). According to Professor Pope, "to the Jews more than to any other people belongs the credit for the magnificent development which the clothing industry has attained" (*ib.* p. 293).

The social condition of the American Jews, including those of recent arrival, is eminently satisfactory. Notwithstanding the fact that the Jewish immigrant arrives with an average fortune of only \$15, nothing is more remarkable than the speed with which he makes himself self-supporting. Even those who find it necessary to apply on their arrival to the charitable institutions for some slight assistance, soon get on without it. Of 1,000 applicants who thus applied to the United Hebrew Charities of New York in Oct., 1894, 602 never applied again, and five years later only 67 families still remained on the books, to be reduced to 23 in Oct., 1904 (Bernhcimer, "Russian Jew," p. 66, Philadelphia, 1905). It is quite a mistake to think that the Jewish workman accepts much lower wages than his fellow workmen in the same industry. It is true that during the first rush into the clothing industries in the eighties the early comers were content to take almost starvation wages, but by the end of the century Jewish laborers working in men's clothing factories were getting \$11.36 per week as against \$9.82 for American working men in general, while Jewish women working on women's clothing were getting \$5.86 as against \$5.46. While their wages are comparatively high, however, their rents are increased by their tendency to crowd together, so that the real conditions are probably not so favorable.

**Social Condition.**

Thus in Boston it has been observed that 39.65 per cent of the Russian Jews dwell in "poor and bad tenements," whereas the Irish have only 27.15 per cent of this class, though the Italians have 56.23 per cent. So, too, in New York, of 1,795 Russo-Jewish families investigated by the Federation of Charities, 1,001 had dark rooms, and only 158 had baths. Also in Philadelphia, in a Jewish population of 688 the average number of persons to a room was 1.39, while in three Chicago districts the average was 1.26 persons per room ("Tenement Conditions in Chicago," p. 64). The average number of persons to a Jewish house in Philadelphia was 9.17, as against 5.4 for the general population; of 75 houses, only 8 had bathtubs. Similarly in Chicago, only 3.73 per cent of a population of 10,452 Jews had bathtubs. It should, however, be added that the Russian Jew uses the public baths, of which there are large numbers in the Jewish quarters.

Regarding persons higher in the social scale, it is obviously difficult to obtain definite information. A careful estimate, however, was made in 1888 of the annual turnover of different classes of manufactures in New York, a list of which may be subjoined as indicating the chief lines of commerce in which Jews are engaged (figures in parentheses give the number of employees):

Manufacturers of clothing .....	\$55,000,000
Jobbers of jewelry.....	30,000,000
Wholesale butchers (6,000).....	25,000,000
Dealers in win-s, spirits, and beer.....	25,000,000
Jobbers of leaf tobacco.....	15,000,000
Manufacturers of cigars (8,000).....	15,000,000
Manufacturers of cloaks.....	15,000,000
Importers of diamonds.....	12,000,000
Dealers in leather and hides.....	12,000,000
Manufacturers of overshirts.....	10,000,000
Importers of watches.....	6,000,000
Dealers in artificial flowers and feathers.....	6,000,000
Importers and jobbers of furs.....	5,000,000
Manufacturers of undergarments.....	5,000,000
Lace and embroidery importers.....	4,000,000
Manufacturers of white sbirts.....	3,000,000
Manufacturers of hats.....	3,000,000
Manufacturers of caps.....	2,000,000
	\$248,000,000

Besides this, it was reckoned that the Jews of New York at that time had \$150,000,000 worth of real estate, and that the Jewish bankers of the city had a capital of \$100,000,000. These figures would have to be considerably increased, probably quadrupled, after the lapse of twenty years. As is pointed out above, the turnover of the clothing trade alone in New York was equal in 1900 to the total amount of the Jewish industrial output in 1888, while one Jewish banking-house, Kuhn, Loeb & Co., issued \$1,360,000,000 worth of bonds during the five years 1900 to 1905, and represents financially railway companies controlling 22,200 miles of railroad and over \$1,300,000,000 stock.

In a list of 4,000 millionaires given by the "World Almanac" for 1902, the Jewish names numbered 114, somewhat over their proportion compared with their percentage in population, but somewhat under their proportion if the fact be taken into consideration that they are mostly residents of cities, where alone the very wealthy are to be found. The generally satisfactory condition of the immigrants within a few years after their arrival is perhaps best

indicated by the fact that the twelve great Jewish charities of New York altogether dispense only \$1,143,545 annually in a population of over 750,000, about \$1.50 per head. Again, in Chicago only \$150,000 per annum is spent in charity upon a population of at least 75,000, about \$2 per head.

It is, of course, impossible to give the full score of Jewish philanthropy in the United States, but a rough estimate may be derived from the expenditures of the chief federations for charity found in several of the main centers of the Jewish population. To this may be added the expenditure of the twelve largest Jewish institutions of New York:

**Charity.**

the expenditures of the chief federations for charity found in several of the main centers of the Jewish population. To this may be added the expenditure of the twelve largest Jewish institutions of New York:

New York (twelve largest institutions).....	\$1,143,545
Philadelphia Federation.....	119,700
Cincinnati Federation.....	29,622
St. Louis Federation.....	43,108
Chicago Federation.....	148,000
Boston Federation.....	39,000
Detroit Federation.....	6,662
Kansas City Federation.....	4,508
Cleveland Federation.....	41,350

In addition to these sums, donations by Jews were reported for the year 1904 to the amount of \$3,049,124, making a total of more than \$5,000,000; or about \$3 per head for charity and education.

It is also of interest to indicate the causes which led 10,015 applicants to appeal to the United Hebrew Charities of New York during the year 1904-5:

Sickness.....	3,229	Transportation.....	360
No male support.....	2,050	Release baggage or family.....	12
Lack of work.....	1,641	Lack of tools.....	43
Insufficient earnings.....	781	Stiffness.....	63
Physical defects.....	178	No cause.....	252
Old age.....	471	Cause unknown.....	261
Insanity of wage-earner.....	86	All other causes.....	504
Intemperance of wage-earner.....	40		
Imprisonment of wage-earner.....	44	Total.....	10,015

The number of persons who are being punished for their crimes in the United States has not been ascertained; but the **Destitutes**, numbers of Jewish aliens who are in various institutions, as given in the **Defectives**, and **Delinquents**, report of the commissioner-general of immigration for the year ending June 30, 1904, are as follows:

	Charitable.		Insane.		Penal.		All.	
	No.	Per Cent.	No.	Per Cent.	No.	Per Cent.	No.	Per Cent.
Hebrews..	1,274	8.2	932	5	539	6.5	2,765	6.2

Considering that the Jewish immigrants are fully 10 per cent of the total volume of immigration to the United States, this is an excellent showing, and considering that 1,000,000 have arrived in the last twenty-five years, the smallness of the numbers is still more remarkable.

It should be observed that of the 559 Jews (484 males, 75 females) found in penal institutions, 170 were imprisoned for graver offenses, and 389 for minor offenses, whereas of the total number of immigrant prisoners, 4,124 were for graver as against 5,701 for minor offenses, Jews, as is well known,

not being addicted to crimes of violence. Similarly, of the criminals reported to the Board of Magistrates of the City of New York for the year 1898, those from Russia formed 8.2 per cent of the total number, whereas their proportion of the population was 11.2. In Philadelphia the Jewish inmates of the prisons were found in 1904 to be 2.7 per cent, whereas the percentage of Jews in the population was 7.7.

**Synagogues and Institutions.** In some of the early censuses of the United States details of places of worship were given for the different sects, and from these the following table was taken (excepting the last line, which is from the returns made to W. B. Hackenburg):

Census.	Synagogues.	Accommodation.	Property.
1850.....	36	18,371	\$ 418,000
1860.....	77	34,412	1,135,300
1870.....	153	73,265	5,155,234
1877.....	278	12,546*	6,648,730

\*This enumeration is of membership, not of accommodation.

In 1905 the real property held by synagogues and Jewish charitable institutions in New York city, and which was exempted from taxation, was valued at \$13,558,100.

For the present condition of affairs the following data are given in the "American Jewish Year Book," 5662:

Congregations.....	850
Income of 431.....	\$1,233,127
Reform congregations (C. C. A. R.).....	86
Schools.....	421
Pupils.....	38,694
Educational institutions and libraries.....	78
Colleges for Hebrew studies.....	3
Agricultural schools.....	2
Technical, industrial, or trade schools.....	13
Societies conducting industrial classes.....	16
Societies conducting evening classes.....	9
Kindergartens.....	11
Kitchengardens.....	2
Training schools for nurses.....	3
Libraries.....	19
Income of 20.....	\$160,456
Charitable institutions.....	500
Income of 243.....	\$1,808,663
Young Men's Hebrew Associations.....	23
Income of 10.....	\$29,828
Social clubs.....	117
Income of 33.....	\$307,412
Other clubs.....	66
Mutual benefit associations.....	63
Income of 33.....	\$36,784
Loan associations.....	22
Others.....	52
Zionist societies.....	124
Sections of Council of Jewish Women.....	49
Lodges.....	954

These results were reported from 503 places in thirty-seven out of the forty-seven states. There are now in the United States about 1,000 synagogues, to which may be added 314 houses of prayer used in the East Side of New York ("Federation," March, 1904), making a total of 1,314, of which about 100 use the so-called Reform ritual. Notwithstanding this comparatively large number of synagogues, certain districts of New York have 80 per cent of their Jewish inhabitants unaffiliated with any place of worship, though in Brooklyn the proportion has sunk to 33.8 per cent ("Federation," Oct., 1905).

It is interesting to note the growth of the lodge system, of which the details given in the statistical publication of the American Hebrew Congregations of 1880 may be compared with those given in the "American Jewish Year Book," 5662:

	1880	Grand Lodges.	Lodges.	Members.
B'nai B'rith.....	1880	7	302	22,814
Independent Order Free Sons of Israel	1900	2	317	8,604
Order Keshet Shel Barzel.....	1880	5	86	10,000
Improved Order Free Sons of Israel.	1900	1	109	70
Independent Order Sons of Benjamin	1800	1	170	44
Order B'rith Abraham.....	1900	..	188	2,479
	....	..	270	

**Miscellaneous:** In 1880 there were fifteen Jewish periodicals published in the United States; in 1904 there were eighty-two, as well as thirteen year-books or occasional publications. Of the 14,443 persons mentioned in "Who's Who in America," 169 were of Jewish race, about the proper proportion of the native Jews.

Investigation has established that the fertility of the Jews in the United States is greater than that of other creeds and nationalities. Thus it was found by an investigation in New York that whereas the average number of children in Protestant families was 1.85 and in Roman Catholic 2.03, in Jewish families it was 2.54 ("Federation," New York, June, 1903, p. 34). Against all other experience, it was found that Jewish families with domestics have a higher average of children than those without servants. This had been previously observed by J. S. Billings ("Vital Statistics of the Jews of the United States," p. 17). In one particular ward of New York the Jewish families were superior in fecundity to all others, with an average of 2.9. There is clearly no race suicide among Jews.

Besides being very fecund, their marriage-rate is excessively high, because of the large proportion of nubile persons arriving in the United States, yet there is great inequality of the sexes owing to the fact that between the years 1884 and 1905 342,300 men have arrived, as compared with 221,247 women. It is said that intermarriage is occurring in order to supply the deficiency; yet of 9,668 New York Jewish families investigated by the Federation of Churches intermarriage was reported in the case of only 78, less than one per cent.

Some remarkable results have been reached as to the low death-rate of the Jews in the United States.

**Death-Rate.** In 1890 J. S. Billings investigated the death-rate of nearly 12,000 Jews, and found it as low as 7.11—in the Eastern States 6.29. In 1895 the death-rate of Russian Jews in Boston was only 6.09. These rates probably refer either to the well-nourished families investigated by Dr. Billings, or to the vigorous immigrants of the most viable ages—between twenty-five and forty-five—among whom in an ordinary population the death-rate would be even less. This is confirmed by the fact that while Russian Jews at Boston in 1895 had a death-rate of only 6.09, their children died on an average at the rate of 15.95. This

is about the normal death-rate in the most congested districts, and it would be safe to take the average death-rate of the Jews of the United States at 14, that for the whole population. In the year 1900 the death-rate of the ninth ward in Chicago (an almost entirely Jewish ward) was only 11.99.

It has been observed that American Jews, even when immigrants, are taller than the average of the Jewish population of the countries whence they come, the average for New York city being 164.5 cm. as against 162.0 cm. for Russia and Galicia (see **STATURE**).

**UNITED STATES OF COLOMBIA.** See **SOUTH AND CENTRAL AMERICA**.

**UNITED SYNAGOGUE:** A body composed of sixteen synagogues in London, England, constituted in 1870 by Act of Parliament (33 and 34 Victoria, cap. 116). Originally the "city" synagogues, as the Jewish places of worship within the borders of the city of London were called, were independent of one another, and each one had its own chief rabbi and charity organization. This led to considerable duplication of charity. In 1802 Solomon Herschell was appointed chief rabbi of the Great and Hambro' synagogues; and shortly after his accession to office he induced the three German congregations to come to an agreement for charitable purposes. This agreement continued in force until the year 1834, when a new compact was made and the scope of action was enlarged. The Great Synagogue agreed to contribute one-half, and the Hambro' and New synagogues one-quarter each, toward general and communal expenditure, both charitable and religious.

The migration of Jews westward, however, made the continued force of this agreement impracticable; and the late Chief Rabbi N. M. Adler suggested an amalgamation of the three synagogues and the Central and Bayswater synagogues in the western part of London. The project was taken up by Lionel L. Cohen, who energetically championed it; and a union was agreed to April 19, 1868. The consolidation was further strengthened and legalized by the passing of an "Act for Confirming a Scheme for the Charity Commissioners for the Jewish United Synagogues," which received the royal assent July 14, 1870. The Borough Synagogue, in the south of London, entered the union in 1873; and the North London Synagogue in 1878. The other nine synagogues have been built under the auspices of the United Synagogue. The first secretary of the United Synagogue was Dr. A. Asher. Subsequently another act was passed for the definition of the rights of the chief rabbi and the bet din and of the powers of the chief rabbi.

Each constituent synagogue controls its own surplus (if any), and pays 40 per cent of its income from seat rentals for communal purposes. In 1904 a scheme providing for "Associate Synagogues" was adopted, whereby synagogues in poorer neighborhoods might enter the union without assuming all the burdens of the fully constituent synagogues. The first synagogue to enter on such terms was the South-East London Synagogue.

The United Synagogue is governed by a council constituted of: (a) life-members and certain officials; (b) the wardens of the constituent synagogues for the time being; (c) a certain number of representatives according to the number of members of the constituent synagogues, one in each case being the financial representative who acts as treasurer. The total number of members of the council is 150. Lord Rothschild is (1905) the president.

**UNIVERS ISRAËLITE, L'.** See **PERIODICALS**.

**UNIVERSITIES:** Places of higher and liberal learning, so called from the Latin word "universitas," signifying an association or a corporation. There are traditions of the connection of Jews with the medieval universities of Salerno and Montpellier (see **MEDICINE**) and with that of Oxford. No Jewish names are connected with the development either of the southern (Bologna) or the northern (Paris) type of university from the twelfth century onward. A degree or right to teach seems to have been regarded as a feudal tenure; and the acceptance of a degree was always accompanied by payment of homage to the rector or councilor. Such homage involved the recital of Christian formulas, which Jews could not recite. Besides this the twenty-fourth canon of the Council of Basel (1434) distinctly prevented Jews from taking any academic degree.

A distinction, however, is to be made between the faculties of theology, philosophy, and law and that of medicine. Jews would naturally not study in the first of these, and they could scarcely work at medieval law, which was as much canonical as civil, while the philosophical faculty was mainly a development of the Christian metaphysics of Thomas Aquinas. But Jews appear to have studied, and even to have taught, in the medical faculty; thus, Elijah Delmedigo was professor of medicine at Padua at the end of the fifteenth century. As late as 1700 the universities of Rostock and Wittenberg counseled the Christians against employing Jewish physicians, who probably practised without taking a degree. Most of the Jewish doctors whose academic training can be traced received such training at Padua.

With the revival of learning, scholars of Jewish birth, mainly those who accepted baptism, were utilized for the chairs of Hebrew in the various universities, as in the case of TREMELLIUS at Cambridge, etc. This practise was continued almost down to the present time, and spread to the whole circuit of the Semitic languages, in which Jews, from their proficiency in Hebrew, have a large opportunity.

In Holland rigid restrictions on university training do not seem to have existed, though there were few

names of Jewish students recorded till the nineteenth century. So, too, in Austria, the toleration edict of Joseph II. plainly declared that there was no express law against the admittance of Jews into the Austrian universities; but the fact of its being thus mentioned is sufficient to indicate that the admission had either not taken place or was extremely rare. In France the Revolution opened the higher schools of learning to the Jews; but in England they shared the disabilities of all dissenters, and were prevented from taking degrees. Thus, Professor Sylvester, though second wrangler in the mathematical tripos at the University of Cambridge in 1837, did not obtain a degree there till 1872, after the passing of the University Test Act (1871), which was partly caused by the attainment of the senior wranglership by Numa HARROO in 1869.

The Jews of the various German states were mostly debarred from participation in university education till the nineteenth century, though exceptions were occasionally made for Jewish medical students. In

Prussia the first Jewish student at a **Germany.** university was Tobias Cohen, whom the Grand Elector allowed to study medicine at Frankfort-on-the-Oder in 1675. After the Mendelssohnian period many Jewish students began to attend the universities, but soon found that any university career was closed to them unless they were willing to submit to baptism. The Prussian government has always regarded the universities as especially connected with the cultural side of the state organization and, therefore, as bound up with the interests of the Protestant Church. Hence, from the times of Ganz and Benfey down to those of Kronecker and Hirschfeld, the majority of capable students who desired to pursue a university career found it necessary to become baptized. In Austria a very similar state of affairs existed, as is shown by the cases of Mussafia and Büdinger. In the sixties and seventies no discrimination took place, but with the rise of anti-Semitism Jewish students suffered various disabilities which caused them to form special clubs (see ZIONISM).

Notwithstanding these quasi-disabilities, Jewish students have thronged to the universities in exceptional numbers, as can be seen from the accompanying statistics. A comparison with the other creeds may perhaps best be made in Prussia, where the Protestants had 8.37, the Catholics 6.61, and the Jews 54.75 per 10,000 attending the universities in 1902-3. In Austria the proportion of Jewish among other students indicates the same condition:

NUMBER OF STUDENTS OF DIFFERENT FAITHS AT THE AUSTRIAN UNIVERSITIES IN 1902.

	Number.	Per Cent.
Catholic .....	26,359	75.7
Greek .....	1,466	4.4
Protestant .....	1,225	3.3
Jewish .....	5,779	16.6
Totals.....	34,829	100.0

That the proportion in Prussia has not considerably increased during the last few years is borne out

by the detailed list of students attending the Prussian universities:

NUMBER OF CHRISTIAN AND JEWISH STUDENTS IN THE PRUSSIAN UNIVERSITIES.

University.	1886-87.		1899-1900.	
	Christians.	Jews.	Christians.	Jews.
Berlin .....	3,975	880	4,441	1,031
Bonn .....	1,177	41	1,889	55
Breslau .....	1,066	222	1,380	212
Göttingen .....	1,004	17	1,238	22
Greifswalde .....	986	15	768	12
Halle .....	1,459	28	1,493	22
Kiel .....	508	14	822	18
Königsberg .....	740	74	721	70
Narburg .....	896	22	1,079	23
Academy at Münster	483	....	608	....
Lyceum Hosianum in Braunsberg .....	21	....	46	....
Totals .....	12,345	1,313	14,420	1,465

The numbers of Jews attending the Austrian universities may also be given here:

JEWISH STUDENTS AT THE AUSTRIAN UNIVERSITIES DURING THE SUMMER OF 1902.

Vienna .....	1,423	Lemberg .....	453
Graz .....	36	Cracow .....	190
Innsbruck .....	2	Czernowitz .....	207
Prague (German) .....	348		
Prague (Bohemian) .....	70	Total .....	2,729

There are special conditions which would seem to prevent any large attendance of Jewish students at the Russian universities, their percentages being limited to 3 per cent of the whole body of students at Odessa and St. Petersburg, and 5 per cent in the Pale. Notwithstanding this, the history of the last twenty years shows that these proportions were largely exceeded, as can be seen from the following table:

PERCENTAGE OF JEWISH STUDENTS TO TOTAL NUMBER (RUSSIA).

University.	1880.	1899.
St. Petersburg .....	4.4	4.4
Moscow .....	5.2	3.5
Cracow .....	5.9	23.2
Odessa .....	11.9	27.5
Kasan .....	1.0	8.9
Kiev .....	15.2	17.9
Dorpat .....	4.2	15.8
Warsaw .....	11.6	18.8
Tomsk .....	....	5.4
	6.8	10.9

To the above details it may be added that at Columbia University, New York, in 1903, out of 900 students whose creeds were investigated, 6.9 per cent declared themselves Jews, whereas no less than 1,900 students out of the 2,100 of the College of the City of New York in 1903 were Jewish, and at the Normal College of that city 75 per cent of its students were Jewish.

For Prussia elaborate details are given by Thon and Ruppin, showing a distinct diversion of tendency from the medical to the juridical faculty. Thus in 1886-87 there were 185 students of law and 698 of medicine, whereas in 1902-3 there were 459 studying law, and only 369 studying medicine. The

percentage of Jews among the law students remained practically the same at 9 per cent, whereas that of medical students declined from 19.6 to 15. In philosophical faculties a rise in numbers took place from 246 in 1892-93 to 392 in 1902-3. In the latter year Jews formed 4.5 per cent of the students devoted to philosophy, 5.6 of mathematicians, 2.9 of economists, 9. of pharmacy, and 26.9 of dentistry.

The numbers of professors of the Jewish faith are rarely given authoritatively. Servi recorded that in Italy in 1867 there were seventeen Jewish professors at the Italian universities ("Statistica degli Israeliti," p. 298). About 1880 it was

**Professors.** said that there were six ordinary and twenty extraordinary professorships and twenty-nine readerships held by Jews at Berlin University, as compared with sixty-one, fifty-three, and fifty-seven respectively by Christians. Breslau records that there were seventy Jewish professors in German universities out of a total of 1,800, about the usual proportion ("Zur Judenfrage," p. 17, Berlin, 1880). About the same time six of the 259 chairs in the English universities were held by Jews. In 1903 it was declared that the University of Munich had ninety-nine Catholic, eighty-seven Protestant, and seventeen Jewish professors and privat-docents; Würzburg had thirty-eight Catholic, fifty Protestant, and one Jewish privat-docents; while Erlangen had twelve Catholic, fifty-three Protestant, and two Jewish professors (Bloch's "Wochenschrift," July 4, 1903). At Strasburg there were six Jewish professors (*ib.* Oct. 31, 1902). The only professing Jews who have ever held the rectorship of a Prussian university are Prof. Rosanes of Breslau and Prof. Julius Bernstein of Halle. Lazarus was rector at Bern; Gomperz at Vienna; Halberg at Czernowitz; and Zucker in Prague.

**UNLEAVENED BREAD.** See MAZZAH.

**UNNA, PAUL GERSON:** German physician and dermatologist; born at Hamburg Sept. 8, 1850; son of Moritz Adolph Unna; educated at the universities of Heidelberg, Leipsic, and Strasbnrg (M.D. 1875). He was severely wounded in the Franco-Prussian war, in which he served as a private. After graduation he became assistant to Waldeyer at Strasburg, and in the following year he returned to Hamburg and established a practise. During 1877 he was assistant at the general hospital in that city. In 1881 he became interested in dermatology, and opened a private hospital for skin-diseases; and in 1884 he gave up his general practise and founded the well-known hospital for skin-diseases at Einishüttel near Hamburg. This he enlarged in 1887 by adding a laboratory, which soon became the center for dermatological researches in Germany.

Unna is an untiring worker; he has written over one hundred essays in all fields of medicine and many standard works on his speciality. In 1882 he founded the semimonthly "Monatshefte für Praktische Dermatologie." He is collaborator for der-

matology on Eulenburg's "Realencyklopädie der Gesamten Heilkunde"; on Baumgarten's "Jahresbericht über die Fortschritte in der Lehre von den Pathogenen Mikroorganismen"; and on Virchow-Hirsch's "Jahresbericht über die Fortschritte und Leistungen in der Medizin."

Among Unna's publications may be mentioned: "Kuno Fischer und das Gewissen," in "Zeitschrift für Völkerpsychologie und Sprachwissenschaft," 1875, ix.; "Anatomie der Haut," in Ziemssen's "Handbuch der Allgemeinen Therapie," 1882; "Histopathologie der Haut," in supplement to Orth's "Spezielle Pathologie," 1894, and "Allgemeine Therapie der Haut," 1898. All three are standard works. He publishes the "Histologischer Atlas zur Pathologie der Haut," and, together with Morris, Besnier, and Dubring, the "Internationaler Atlas Seltener Hautkrankheiten."

F. T. H.

**UNTERFÜHRER.** See MARRIAGE CEREMONIES.

**UR:** A locality mentioned four times in the Bible (Gen. xi. 28, 31; xv. 7; Neh. ix. 7) with the qualification **כְּנָזִים** (= "of the Kasdim," or Chaldees), and described as the original home of Abram. Modern scholars, with few exceptions, are agreed that Ur is identical with the mound of ruins in southern Babylonia on the right bank of the Euphrates, known as Al-Muḳair or Al-Mughair. This was an ancient seat of lunar worship; and it was dominant as a political center as early as 3000 B.C. Those scholars who incline to establish a connection between moon-worship ("Sin" = "moon") and the monotheism of Israel ("Sinai") find a corroboration of their theory in the fact that Abram's original home was the seat of the worship of Sin (comp. Jensen in "Zeitschrift für Assyriologie," xi. 298 *et seq.*).

E. G. H.

**URANIA:** Daughter of Abraham the Precentor, of Worms, who herself acted as precentor in the women's synagogue in that city before 1275. See SAGERIN.

A.

F. L. C.

**URBINO:** Italian city; capital of the province of Pesaro e Urbino; originally the capital of the dnchy of Urbino, and later a portion of the States of the Church. Jews seem to have resided in the city as early as the thirteenth century, Abraham ABULAFIA having sojourned there; but existing documents make no mention of them until the following century, in the first decades of which a certain Maestro Daniele went from Viterbo to Urbino, where he opened a loan-office. Toward the close of the same century his son Isaac received privileges from Count Antonio. During the following century the Urbino Jews increased in prosperity; but their gain in numbers was small. The privilege of lending money at interest was reserved to the descendants of Maestro Daniele. Other Jews who

**Maestro Daniele.** wished to establish themselves in the business were obliged to obtain permission from the rulers and the privileged families. In 1430 Sabbatuccio di Alleuzzo, a Jew of Recanati, was obliged to guarantee the pay-

ment of a yearly tax of 500 scudi to these families before he was allowed to open a banking-house in Urbino. With these exceptions, the city contained only a few Jews, who were either physicians or were engaged in the humbler branches of trade.

Until the beginning of the sixteenth century the Jews of Urbino were permitted to buy, hold, and sell real estate; to deal in metals and paper, and to follow the trades of tailoring and tanning; to reside in all portions of the city; and to employ Christian servants. They were, however, subject to special taxation, for in addition to the ordinary taxes and the "impost of the Marches," levied on all the Jews of those districts, the money-lenders paid a separate tax, though one of them, Solomon of Urbino, stood high in the favor of Duke Frederick.

Toward the close of the fifteenth century and in the beginning of the sixteenth the Jews became the objects of popular persecution. In the year 1468 a **MONTE DI PRÈTÀ** was established in opposition to them; but as it loaned money to the very poor only, and allowed but 4 florins every six months to each person, the Jews still maintained their banks, and at the end of the century they obtained from Guido Ubaldo a ratification of their former privileges. So great was their increase in numbers and influence, moreover, that in 1507 an effort was made to check them. The sale of pledges outside the city was forbidden; and a committee was appointed to revise and limit their prerogatives. Then began the promulgation of a series of decrees against them, which, however, being issued merely to conciliate the papal see, produced little effect. On May 20, 1508, Duke Francesco Maria annulled all the privileges granted by his predecessors, and forbade the Jews to acquire real estate or to act as bankers. He compelled them to restore without interest all pledges in their possession, to wear the **BADGE** (which consisted of a yellow cap for men and a yellow veil for women), and to purchase food in the evening only.

Shortly afterward the Jews, who then numbered about 500, were obliged to take up their abode in a separate quarter, known as the "Androne delle Giudei," and were forbidden to employ Christians as servants. Despite these harsh measures, the Jewish bankers continued to prosper,

### The Ghetto.

increasing both in numbers and in influence. At length, in 1512, the municipal council resumed the practise of borrowing money from them, and sometimes, as in 1571, even pledged to them articles received from the monte di pietà. In 1598, however, a new decree was issued against lending money; but an edict published by the duke in the following year mentions the Jews of Urbino, "who conduct loan establishments," and laws enacted in the same year also allude to them.

In 1529 Solomon **MOLKO** was brought from Ancona to Urbino by the duke, who sought to shield him from the consequences of a dispute in which this protégé had been involved in the market-place of Urbino. A Jew named Moses was for many years the municipal physician of Urbino; and the court of Guido Ubaldo contained many Jewish courtiers, who were treated as the equals of their Christian confrères, although they were so unpopu-

lar with the people that it became necessary to promulgate special decrees for their protection (1549-1624).

In 1556 Guido Ubaldo offered asylum in his territories, especially at Pesaro, to the Maranos who had fled from Ancona on account of the persecutions there, hoping thus to attract to Pesaro the commerce of the East. When, however, he saw that his hopes were vain, he expelled the refugees in June, 1558. For the same reason he welcomed the Jews banished from the Pontifical States in 1569, only to drive them out in March, 1570, at the instance of Pius V.; and when some ventured to return, he banished them a third time (Aug. 16, 1571).

Urbino then entered upon a period of financial decay; and the Jews began to leave the city. The condition of those who remained became worse and worse; and the taxes levied upon them were gradually discontinued. At length, through the abdication of Francesco Maria II. della Rovere in 1627, the duchy of Urbino passed into the hands of the pope, thus precipitating the dissolution of the Jewish community. In 1718 the number of its members was reduced to 200, almost all being so sunk in poverty that they petitioned the pope to exempt them from contributing toward the payment of the debts of the Roman Jews, reminding him that on a former occasion, had he not extended aid to them, they would have been obliged to leave the city and seek their fortunes elsewhere. The history of the Jews of Urbino at that period was identical with that of their coreligionists throughout the Pontifical States. They obtained civic equality at the time of the French Revolution, but lost it at the restoration, receiving it again when the Marches were annexed to the kingdom of Italy (1866). The synagogue of Urbino was owned partly by Catholics until 1851, when it was acquired by the Jews, and, later, was restored and beautified. The decay of the community continued, however, until in the year 1870 there were but 181 Jews in the city, while in 1901 there were only 92.

Among the noted rabbis of Urbino may be mentioned the following: Solomon b. Abraham b. Solomon (15th and 16th cents.); Samuel b. **Rabbis.** Abraham Corcos, Ephraim Mahalaleel Porto, Zechariah b. Ephraim Porto, Solomon b. Moses Rocca, Jedidiah b. Hezekiah Saba' (17th cent.); Jedidiah Hayyim Guglielmi (18th cent.); Mattithiah Nissim b. Jacob Israel Terni (18th and 19th cents.); and Isaac Joseph Cingoli (19th cent.).

D.

U. C.

**URBINO:** Italian family, originating in the city of the same name. The following important members are cited in chronological order:

**Solomon d'Urbino:** Lived at Urbino in the early part of the fourteenth century, where he enjoyed the favor of Duke Frederick, and wrote a small work entitled "Yefeh Nof."

**Isaac Saba' d'Urbino:** Son of Solomon d'Ur-

bino; mentioned by Moses Rieti in his "Mikdash Me'at" (ed. Goldenthal, p. 106b).

**Solomon b. Abraham b. Solomon d'Urbino:** Flourished in the latter part of the fifteenth century and at the beginning of the sixteenth. In 1500 he completed his "Ohel Mo'ed," a work on Hebrew synonyms, which he dedicated to his teacher Obadiah. This book was printed at Venice in 1548, and reprinted by Willheimer with notes by Heidenheim and Dukes, Vienna, 1881; the "Yetad ha-Ohel," Isaac Berechiah Canton's commentary on it, has remained in manuscript.

**Joseph Baruch b. Zechariah Jedidiah d'Urbino:** Lived in the seventeenth century at Mantua, Modena, and Busseto. He was the author of the "Mizmor Shir Yedidot u-Benot ha-Shir" (Mantua, 1659), a collection of poems on various subjects. He gave his approbation to a decision of Hananiah Shullam (Modena, 1636), and made a Hebrew translation of an Italian work on astronomy, which, however, has not been printed. He is probably identical with the Joseph Baruch d'Urbino who owned Codex Oxon. 911, and perhaps with Joseph Baruch b. Zerachiah Urbino of Busseto, who possessed Codex Oxon. 348.

**Moses Judah b. Isaac d'Urbino:** Flourished at Ancona in the seventeenth century. He is mentioned by Abraham Solomon Graziano in his annotations and novellæ on the Shulhan 'Aruk (iii. 308 of the manuscript).

**Jedidiah Zechariah d'Urbino:** Nephew of Jehiel Trabotti; lived at Pesaro in the eighteenth century. He was the author of a manuscript volume of responsa; and a responsum of his is cited in the "Shemesh Zedakah" (ii. 24) of Samson Morpurgo.

**Isaac d'Urbino:** Son of Jedidiah d'Urbino; lived at Pesaro in the eighteenth century. Codex Montefiore 111 contains one of his letters ("J. Q. R." xiv. 185).

**BIBLIOGRAPHY:** Nepi-Ghirondi, *Toledot Gedole Yisrael*, pp. 107, 177, 210, 393; Steinschneider, *Cat. Bodl.* cols. 1538, 2391; Mortara, *Indice*, p. 67; Fürst, *Bibl. Jud.* iii. 461.

**URI.** See SWITZERLAND.

**URI BEN DAVID BEN MOSES (קאָלמייַר):** Great-grandson of Samuel Edels (MaHaRSHA); rabbi of Polno, Lithuania, and chief rabbi of the district; flourished in the middle of the seventeenth century. He was the author of "Or Torah" (Lublin, 1672), commentaries and sermons on the Pentateuch; and he included in his work several "peshatim" by his great-grandfather.

**BIBLIOGRAPHY:** Steinschneider, *Cat. Bodl.* col. 2692; Fuenn, *Keneset Yisrael*, p. 92; Sternberg, *Gesch. der Juden in Polen*, p. 185.

E. C.

S. O.

**URI PHOEBUS BEN AARON HA-LEVI** (known also as **Uri Witzenhausen**): Dutch printer; born at Amsterdam 1623; died there Jan. 27, 1715 (not at Zolkiev in 1713, as Steinschneider records); son of Aaron ha-Levi, hazzan at the Neweh Shalom Synagogue, Amsterdam, and grandson of Moses Uri ha-Levi, founder and first hakam of the Spanish-Portuguese congregation in that city. After having first worked as a typesetter for Immanuel Benveniste, in whose establishment he printed Pappenheim's edition of the "Mishle Hakamim" in 1656,

Phoebus opened an establishment of his own in 1658 and carried on business as a printer till 1689. His imprint was a ewer and two fishes. In the first year he printed several books, among them a prayer-book of the German ritual. The last work he issued was a Sephardic Mahzor, completed in 1689. Of more important works only two were printed by Phoebus, the Shulhan 'Aruk, Hoshen Mishpat, with the commentary "Sifte Kohen" of Shabbethai ha-Kohen (1663), and a Judæo-German translation of the Bible by Jekuthiel Blitz, who worked as a corrector in Phoebus' printing-house. In 1693 Phoebus opened a printing-house at Zolkiev, and there printed calendars and ritual and Judæo-German works till 1705.

It is doubtful whether Uri Phoebus was the author of the evening benediction in Judæo-German (Amsterdam, 1677) attributed to him; and he can scarcely have written the rare Spanish work "Memoria Para os Siglos Futuros" (*ib.* Kislew 10, 5471 = Dec., 1710), which was printed in Portuguese at the expense of Moses Levy Maduro under the title "Narracão da Vinda dos Judeos Espanhoes a Amsterdam" (*ib.* 1768), this version forming the basis of the Hebrew translation by Isaac ha-Kohen Belinfante.

Esp.-Port.-Jud.* p. 59.

J.

M. SEL.—M. K.

**URI (ORI) BEN SIMEON:** Scholar of the sixteenth century; born at Biel (בילא); resided at Safed. He made an abstract of a manuscript of 1537, giving a list of all the places said to contain the tombs of the Patriarchs, Prophets, Amoraim, and Tannaim, to which he added descriptive material gathered in the course of his extensive travels, as well as illustrations of various graves. To this work, which appeared in Venice in 1659 (2d ed. 1699) under the title "Yihus ha-Abot," was appended a description of a calendar compiled by him in 1575. The entire work was translated into Latin by Hottinger under the title "Cippi Hebraici, Genealogia Patriarcharum" (Heidelberg, 1659; 2d ed. *ib.* 1662); and E. Carmoly later translated the book into French under the title "Jichus ha-Abot, ou Tombeaux des Patriarches," and published it in his "Itinéraires de la Terre Sainte" ("Halikot Erez Yisrael"), together with a preface and twenty-seven illustrations from the first Venetian edition. The "Yihus ha-Abot" was rendered also into Judæo-German by an unknown translator, being published under the same title at Wilna in 1853.

Uri ben Simeon was likewise the author of a calendar ("luah") covering a period of forty years. This work, which first appeared in Venice (1575), was translated into Latin by Jacob Christmann of Heidelberg, in which city it was published in 1594.

**BIBLIOGRAPHY:** Zunz, in *The Itinerary of Benjamin of Tudela*, pp. 275-276, notes a and b; E. Carmoly, *Itinéraires de la Terre Sainte*, pp. 419-496; Brussels, 1847; Steinschneider, *Cat. Bodl.* cols. 558, 815, 2693-2695; Benjacob, *Ozar ha-Sefarim*, p. 221.

E. C.

S. O.

**URIAH, URIJAH.**—1. **Biblical Data:** A Hittite; husband of Bath-sheba, and one of David's

picked warriors. The scanty Biblical allusions to him are of value as illustrating the taboo under which warriors were constrained to abstain from sexual intercourse (II Sam. xi. 7-15; see Schwally, "Kriegsaltertümer," p. 48), through which circumstance David's plan to cover his illicit relations with Bath-sheba was frustrated. Sent back to camp, Uriah was placed, by David's secret orders, "in the forefront of the hottest battle," and fell at the siege of Rabbah.

Josephus ("Ant." vii. 8, § 1) adds many embellishments to the account of the death of Uriah, declaring that when the Ammonites made a sortie and repulsed the besiegers, Uriah remained on the field with a few others, exposing himself to danger more than all his comrades, and maintaining his position until the enemy had surrounded the little band of heroes and completely destroyed them.

—**In Rabbinical Literature:** The Rabbis, who naturally could not admit the existence of any flaw in David's character, regarded Uriah as the one at fault. They claimed that he had defied David, since, when the king commanded him to go home, he replied, "My lord Joab is encamped in the open fields," thus disregarding the royal bidding (Shab. 56a; Tos. to Kid. 43a, above).

2. High priest during the reign of Ahaz. According to Isa. viii. 2, he was taken as a faithful witness by Isaiah when the prophet married the mother of Maher-shalal-hash-baz. II Kings xvi. 10-16 states that Ahaz sent Uriah the pattern of an altar seen by him at Damascus after the conquest of the city by Tiglath-pileser, directing the prophet to erect a similar one in the Temple, for the offering of certain sacrifices. In the list of high priests given in I Chron. v. 30-40 Uriah's name does not occur, although it is interpolated in Josephus, "Ant." x. 8, § 6.

3. Son of Shemaiah of Kirjath-jearim; a prophet of the reign of Jehoiakim. Like Jeremiah, in foretelling the destruction of Jerusalem by the Assyrians he brought upon himself the anger of the king and the princes. In fear of death he fled to Egypt, whereupon Jehoiakim sent an embassy headed by Elnathan b. Achbor, which seized the prophet and brought him to Jerusalem, where he was beheaded by the express command of the king, his body being thrown into the graves of the common people (Jer. xxvi. 20-23).

4. Son of Koz (Neh. iii. 4), probably of the seventh class of priests (comp. I Chron. xxiv. 10). On the fourth day after the return of the exiles to Jerusalem, his son Meremoth weighed the gold, silver, and vessels brought back from Babylon (Ezra viii. 33).

5. One of the men who stood at the right hand of Ezra while the latter read the Law to the people (Neh. viii. 4).

E. G. H.

S. O.

**URIEL:** Name of an archangel. Of the four chief angels, MICHAEL, GABRIEL, RAPHAEL, and Uriel, who preside over the four quarters of the globe (Jensen, "Kosmologie der Babylonier," p. 163), and who are frequently grouped together, Uriel is generally, but not invariably, mentioned last, although in this quartet his name is frequently re-

placed by that of another angel, thus showing the diversity of his nature (*e.g.*, Faouel, Enoch, xl. 9; Aniel, Stübe, "Jüdisch-Babylonische Zaubertexte," p. 26, Halle, 1895; Nuriel, "Seder Gan 'Eden we-Gehinnom," in Jellinek, "B. H." iii. 138). He is likewise one of the seven archangels, being the prince of the angels and of Tartarus (Enoch, xx. 2, where his name is given first in the list of the angels). According to Kautzsch ("Apokryphen," ii. 250), Lusken ("Michael," p. 36), and others, Uriel is the angel of thunder and earthquake, and is, moreover, the divine messenger who warns the son of Lamech of the end of the world, and bids him hide (Enoch, x. 1-2); he appears in a like capacity in II Esd. iv., where he propounds three difficult problems to Ezra and instructs him. Of these problems the first was, "Weigh me the weight of the fire," a demand closely connected in concept with the name "Uriel" (אֱרִיֵּל + אֵשׁ = "the fire of God"), for its derivation from אֱרִיֵּל + אֹרֶךְ (= "light of God," "glory of God"; Kohut, "Angelologie," p. 33) is erroneous, as is, consequently, the attempt to identify the angel with the Zoroastrian "Hvarenah" (= "glory"). The second question addressed to Ezra was concerned with the waters in the depths of the sea and above the firmament, and thus with the two "tehomot," as well as with the underworld (Sheol, Hades), this being in entire harmony with Enoch, xx. and designating Uriel as the archangel of fire and of GENNA, where flame is the chief element. In the passage under consideration this same spirit also speaks of the wind.

In medieval mysticism Uriel is represented as the source of the heat of the day in winter, and as the princely angel of Sunday, the first day of the week, thus agreeing fully with the explanation of his nature already given. Later authorities, however, brought his name into association with אֱרִיֵּל (= "light"), misled in part by the legend that Uriel instructed (enlightened) Ezra. "Why is he called Uriel? On account of the Torah, the Prophets, and the Hagiographa, since through him God makes atonement and brings light to Israel" (Num. R. ii. 10). Conforming to this view, subsequent writers identified him with Raphael, the revealer of secrets (Zunz, "S. P." p. 476), and his name was written on amulets intended to "illumine" the soul for sacred studies ("Sefer Razi'el," p. 42b). Uriel is mentioned also in the magic papyri (Wessely, "Griechischer Zauberpapyrus," Index, Vienna, 1888; *idem*, "Neue Griechische Zauberpapyri," Index, *ib.* 1893; Lusken, *l.c.* p. 71), and in Babylonian incantations (Stübe, *l.c.* p. 23), while according to a French rabbi of the thirteenth century the repetition of Uriel's name ten times in one breath in the morning brings good fortune for the day (Schwab, "Vocabulaire de l'Angelologie," pp. 47, 304). On Uriel in the פִּרְיֻט see Zunz, *l.c.*, and on accounts of him in Christian writings comp. Lusken, *l.c.* p. 114. See also RAPHAEL for data concerning the four angels as a group.

**URIEL VON GEMMINGEN.** See PFEFFERKORN; REUCHELLN.

**URIM AND THUMMIM.**—**Biblical Data:** Objects connected with the breastplate of the high priest, and used as a kind of divine oracle. Since the days of the Alexandrian translators of the Old Testament it has been asserted that **אורים וותמים** mean "revelation and truth" (*δηλώσεις και ἀλήθεια*), or "lights and perfections" (*φωτισμοὶ και τελειότητες*); the *τελειότης και διδαχή* of Symmachus (Jerome, "perfectio et doctrina"; Field, "Hexapla" on Deut. xxxiii. 8); and the *φωτισμοὶ και τελειώσεις* of Aquila and Theodotion. The Vulgate has "doctrina [after Symmachus; Old Latin, "ostensio" or "demonstratio"] et veritas." There is, however, no foundation for such a view in the Bible itself. Ex. xxviii. 13-30 describes the high-priestly ephod and the breastplate with the Urim and Thummim. It is called a "breastplate of judgment" (*hoshen ha-mishpat*); it is four-square and double; and the twelve stones were not put inside the hoshen, but on the outside. It is related in Lev. viii. 7-8 that when, in compliance with the command in Ex. xxix. 1-37, Moses consecrated Aaron and his sons as priests, "He [Moses] put upon him [Aaron] the coat, and girded him with the girdle, and clothed him

with the robe, and put the ephod upon him, and he girded him with the cunningly woven band [A. V. "curious girdle"] of the ephod, and bound it unto him therewith. And he put the breastplate upon him: and in the breastplate he put the Urim and the Thummim." Deut. xxxiii. 8 (R. V.), in the blessing of Moses, reads: "And of Levi he said: Thy Thummim and thy Urim are with thy godly one, whom thou didst prove at Massah, with whom thou didst strive at the waters of Meribah" (see Steuernagel, "Deuteronomium," p. 125, Göttingen, 1898; Bertholet, "Deuteronomium," p. 106, Freiburg, 1899; Driver, "Deuteronomy," in "International Critical Commentary," p. 398, New York, 1895; Baudissin, "Gesch. des Alttestamentlichen Priesterthums," p. 76). The most important passage is I Sam. xiv. 41, where Wellhausen and Driver have corrected the text, on the basis of the Septuagint, to read as follows: "And Saul said: Lord, God of Israel, why hast thou not answered thy servant this day? If this iniquity be in me or in Jonathan my son, Lord, God of Israel, give Urim; but if it be in thy people Israel, give Thummim. Then Jonathan and Saul were taken by lot; and the people escaped" (Driver, "Notes on the Hebrew Text of the Books of Samuel," p. 89, Oxford, 1890; Budde, "The Books of Samuel," in Polychrome Bible, p. 63; II. P. Smith, "The Books of Samuel," p. 122; Kirkpatrick, "The First Book of Samuel," in "The Cambridge Bible for Schools and Colleges," 1891, p. 137).

I Sam. xxviii. 3-6 mentions three methods of divine communication: (1) the dream-oracle, of which frequent mention is made also in Assyrian and Babylonian literature; (2) the oracle by means of the Urim (here, undoubtedly, an abbreviation for "Urim and Thummim"); (3) the oracle by the word of the Prophets, found among all Semitic nations.

The only other mention of actual consultation of **יהוה** by means of the Urim and Thummim found in the Old Testament is in Num. xxvii. 21. Eleazar was then high priest, and Moses was permitted by the Lord to address Him directly. But Joshua and his successors could speak to the Lord only through the mediation of the high priest and by means of the Urim and Thummim. It is quite probable that the age of Ezra and Nehemiah was no longer cognizant of the nature of the Urim and Thummim (Ezra ii. 63; Neh. vii. 65; see also I Macc. iv. 46, xiv. 41). Post-exilic Israel had neither the sacred breastplate nor the Urim and Thummim. Ezra ii. 63 tacitly contradicts the assertion of Josephus ("Ant." iii. 8, § 9, end) that the Urim and Thummim first failed in the Maccabean era (B. Niese, "Flavii Josephi Opera," i. 202; see also Sothah ix. 12; Tosef., Sothah, xiii. 2; Yer. Kid. iv. 1; Ryle, "Ezra and Nehemiah," p. 32). Ecelus (Sirach) xxxiii. 3 may possibly prove a knowledge of the tradition concerning the use of the Urim and Thummim; but it can not be inferred that answers were received at that time by means of them (V. Ryssel, in Kautzsch, "Apokryphen," p. 394).

The Urim and Thummim are implied, also, wherever in the earlier history of Israel mention is made of asking counsel of the Lord by means of the ephod (Josh. ix. 14; Judges i. 1-2; xx. 18 [rejected as a later gloss from *ib.* i. 1 by most commentators], 26-28; I Sam. x. 22; xiv. 3, 18, 36 *et seq.*; xxii. 10, 13; xxiii. 2, 4, 6, 9-12; xxviii. 6; xxx. 7 *et seq.*; II Sam. ii. 1; v. 19, 23 *et seq.*; xxi. 1. On the nature of the ephod see G. F. Moore, "Judges," 1895, pp. 380-399, where copious references and the literature are given; *idem*, "Ephod," in Cheyne and Black, "Encyc. Bibl."; and especially T. C. Foote, "The Ephod," in "Jour. Bib. Lit." [1902] xxi. 1-48). In all cases except I Sam. x. 22 and II Sam. v. 23 *et seq.*, the answer is either "Yes" or "No." It has been suggested by Riehm and others that these two passages have undergone editorial changes. After the death of David no instance is mentioned in the Old Testament of consulting the Lord by means of the Urim and Thummim or the ephod. This desuetude is undoubtedly occasioned by the growing influence of the Old Testament prophecy.

The ancient, and most of the modern, explanations of these mysterious instruments through which **יהוה** communicated His will to His chosen people identify them with (a) stones in the high priest's breastplate, (b) sacred dice, and (c) little images of Truth and Justice such as are found round the neck of the mummy of an Egyptian priest (see Muss-Arnolt, "The Urim and Thummim," in "Am. Jour. Semit. Lang.," July, 1900, pp. 199-204). The "Tablets of Destiny" which occur in the Assyro-Babylonian account of Creation and otherwise figure in Assyro-Babylonian conceptions suggest the correct explanation of the Hebrew Urim and Thummim. One of the functions ascribed to the Babylonian seer was to deliver oracles and to consult the god, whose answer was either "Yes" or "No." Quite often the god sends to his people an "urtu," a command to do, or not to do, something. "Urtu" belongs to the same

stem from which is derived "ertu," the "terminus technicus" for "oracle." The gods speak ("tamu, utammu") to the priest the oracle which they reveal; and the oracle is called "the mysterious word, revelation." Since God "at sundry times and in divers manners spake in time past," not only unto the fathers by the Prophets, but to all mankind in ways which it is now almost impossible to trace precisely, it is quite possible that the mythological account of the Tablets of Destiny and the Old Testament Urim and Thummim, both shaping the destiny of king and nation, revert to the same fountainhead and origin. Notwithstanding the fragmentary account of Babylonian literature and the scanty report of Old Testament writers, some points common to both may yet be gathered.

(1) According to Ex. xxviii. 30 and Lev. viii. 8, the Urim and Thummim rested within the breast-plate, that is, on the breast of the high priest; in the Babylonian account the Tablets of Destiny rested on the breast of their possessor. Only so long as they were resting on the breast of the god in the case of the one nation, and on the breast of the high priest in that of the other, were they efficacious.

(2) In the Babylonian accounts, only those gods who, in some way, were considered the messengers and mediators between the other gods and mankind were the lawful possessors of the Tablets of Destiny. In Israel the Urim and Thummim were entrusted by YHWH to Moses, and through him to the high priest as the representative of YHWH and as the mediator between God and the nation to whose decisions, through the Urim and Thummim, even kings bowed.

(3) There is, to be sure, in the Babylonian records no statement as to the exact number of the Tablets of Destiny. It is known that there were more than one; it may not be too hazardous to assume that there were only two, one lying on each breast: one revealing (or prognosticating?) good fortune; the other, misfortune. The Old Testament accounts of the Urim and Thummim indicate that there were only two objects (lots?).

(4) Marduk, after he had torn the Tablets of Destiny from the breast of his dead foe, sealed them with his own seal. There may be a reminiscence of this in Ex. xxviii. 21. The use of twelve stones, one for each of the twelve tribes, in addition to the two lots (of stone), is perhaps of some significance in this connection.

(5) Marduk, bearing on his breast the Tablets of Destiny, presided at the annual assembly of the gods, where the fate was determined and the lot was cast for king and nation. It is the general opinion that the Urim and Thummim were consulted only in cases where the safety of king or nation was concerned.

In Israel the development of a strict monotheism necessarily modified the conception of the Urim and Thummim. No description of them is found in the Old Testament; they are mentioned as something familiar both to Moses and to the people—an inheritance received from the time of their ancestors. The very fact that the Old Testament assumes that

Moses and the people were acquainted with the nature of the Urim and Thummim confirms the view that the latter were naturally connected with the functions of the high priest as the mediator between YHWH and His people.

The etymology of אורים and תמים, suggested by Zimmern and others, supports the explanation given here. The so-called plural ending of the two words expresses the "pluralis intensivus," plurals only in form, but not in meaning. "Urim" may be connected not with אור = "curse, put under the ban," as Schwally and others have held, but with the Babylonian "u'uru," the infinitive of the

**Etymology** "pi'el" of "a'aru," from which are derived also the nouns "urtu" = "command, order, decision" (usually of the gods) and "tertu" (originally with the same meaning). These words occur frequently in Assyro-Babylonian literature in sentences analogous in form to those in which "Urim and Thummim" are used in the Old Testament. The plural אורים ("fires") has no doubt had some influence in shaping the analogous form אורים = "urtu." תמים the present writer connects with the Assyrian "tamu," pi'el "tammu," verbal forms also belonging to the oracular language. "Urim and Thummim" correspond, then, to the Babylonian "urtu" and "tamtu," the latter a synonym of "piristu" = "oracle, oracular decision [of the gods]." That the original meaning of the two words and their significance were known even at the time when the Old Testament records, in which they are mentioned, were written is exceedingly doubtful; that they were not known either to the Greek translators or to the early Masorites is practically certain.

**BIBLIOGRAPHY:** In addition to works and articles mentioned in the body of the article, Buxtorf, *Historia Urim et Thummim*, in his *Exercitationes*, pp. 267 et seq., and in Ugolini, *The-saurus*, vol. xii.; Spencer, *De Legibus Hebræorum Ritualibus*, 1685; Ludwig Diestel, *Gesch. des Alten Testaments in der Christlichen Kirche*, Jena, 1869; idem, *Urim*, in Herzog-Haupt, *Real-Encyc.* xvi. 746 et seq., revised for 2d ed., xvi. 226 et seq., by Kautzsch; Bähr, *Symbolik*, ii. 134-141; W. Robertson Smith, *The Old Testament in the Jewish Church*, 2d ed., p. 292, London, 1895; Bandissin, *Die Geschichte des Alttestamentlichen Priesterthums untersucht*, 1889, pp. 26, 27, 140, 141; Benzinger, *Arch.* 1894, pp. 382, 407, 408; Winer, *B. W. M.-A.

—In Rabbinical Literature: Tradition is unanimous in stating that the use of the Urim and Thummim ceased with the destruction of the First Temple, or, in other words, with the death of the Older Prophets; and they were among the five things lacking in the Second Temple (Soṭah ix. 10 [= 48b]; Yoma 21b; Yer. Kid. 65b). Josephus states ("Ant." iii. 8, § 9) that "this oracle had been silent" for 200 years before his time, or from the days

of John Hyrcanus. The teachers of the Talmud, however, if their own statements may be believed, had never seen the Urim and Thummim, and regarded them as the "great and holy name of God" written on the breastplate of the high priest (Targ. pseudo-Jonathan to Ex. xxviii. 30); and they etymologize "Urim" as "those whose words give light," while "Thummim" is explained as "those whose words are fulfilled" (*ib.*; Yoma 73b; Yer. Yoma 44c).

The oracle was consulted in the following manner: The high priest donned his eight garments, and the person for whom he sought an answer stood facing him, while he himself turned toward God (*i. e.*, the שֶׁכִּינָה). It was necessary that the question should be brief and that it should

be pronounced, but not aloud; while the answer was a repetition of the query, either in the affirmative or in the negative. Only one question might be asked at a time; if more than one were put, the first alone received a reply. The answer was given by the letters of the names of the tribes which were engraved upon the high priest's breastplate (Yoma 73a, b; Yer. Yoma 44c; Sifre, Num. 141). If the question was not distinctly worded, the reply might be misunderstood, as in Judges xx. 18 *et seq.* (Sheb. 35b; Yoma 73b). A decision by the oracle might be demanded only by the king, or by the chief of the highest court, or by a prominent man within the community, such as a general of the army, and it might be sought only for the common weal (Yoma 7, end, 73a: "one anointed for war"; Targ. pseudo-Jonathan to Ex. xxviii. 30: "in case of need"). According to Targ. pseudo-Jonathan to Ex. xxviii., the breastplate was used to proclaim victory in battle. It was necessary that the high priest who questioned the oracle should be a man upon whom the Shekinah rested (Yoma 73b).

The characteristic feature of the Shekinah was radiance; and Josephus, who believed that God was present at every sacrifice, even when offered by Gentiles, states that the oracles were revealed through rays of light:

"But as to those stones, which we told you before, the high priest bare on his shoulders . . . the one of them shined out when God was present at their sacrifices . . . bright rays darting out thence; and being seen even by those that were most remote; which splendor yet was not before natural to the stone. . . . Yet will I mention what is still more wonderful than this; for God declared beforehand, by those twelve stones which the high priest bare on his breast, and which were inserted into his breastplate, when they should be victorious in battle; for so great a splendor shone forth from them before the army began to march, that all the people were sensible of God's being present for their assistance. Whence it came to pass that those Greeks who had a veneration for our laws, because they could not possibly contradict this, called that breastplate *the Oracle*" ("Ant." iii. 8, § 9, Whiston's transl.).

The Talmudic concept seems to have been identical with the view of Josephus, holding that the reply of the Urim and Thummim was conveyed by rays of light. Two scholars of the third century, however, who had lost the vividness of the earlier concept, gave the explanation that those stones of the breastplate which contained the answer of the oracle either stood out from the others or formed themselves into groups (Yoma 73b).

The division of the country was made according to the Urim and Thummim, since the high priest, "filled with the Holy Spirit," proclaimed the tribe to which each division should belong. After this, lots were drawn from two urns, one containing the name of the tribe and the other that of the territory, and these were found to harmonize with the high priest's announcement (B. B. 122a; Sanh. 16a; comp. Yer. Yoma 41b, below). To enlarge the Holy City or the Temple court the orders of the king, of a prophet, and of the Urim and Thummim were necessary (Sheb. 2, 3, 16a; Yer. Sheb. 33d, below). In Yer. Sanh. 19b the question is propounded why the Urim and Thummim are needed when a prophet is present.

**URY, ADOLPHE (SIMON)**: Alsatian rabbi; born at Niederbronn, Lower Alsace, June 14, 1849. He was educated at the lyceum of Strasburg and the rabbinical seminary in Paris, receiving the degrees of doctor and chief rabbi, his thesis being "Les Arts et les Métiers chez les Anciens Juifs Selon la Bible et le Talmud." In 1875 he was appointed rabbi of Lauterburg, Lower Alsace, whence he was called ten years later to the rabbinate of Brumath, succeeding Solomon Levy. In the following year he became professor of Bible exegesis and Jewish history at the rabbinical school which had been established at Strasburg; and when, in 1890, that institution was closed for lack of funds, Ury was chosen chief rabbi of Lorraine, with his seat in Metz. In 1899 he became chief rabbi of Strasburg and Lower Alsace, which position he still (1905) holds.  
S.

**USAGE.** See CUSTOM.

**USHA.** See SYNOD OF USHA.

**USISHKIN, MICHAEL**: One of the leaders of the Russian Zionists; born in 1863 in Dubrovna, government of Moghilef (Moghilev). In 1871 he went with his parents to Moscow. He studied the Bible and Talmud in the heder till he was thirteen years old, and then passed successively through the professional and imperial technical schools, graduating from the latter in 1889 as an engineer. Since 1891 he has resided in Yekaterinoslav.

In addition to his secular instruction, Usishkin obtained a thorough Jewish education, and he has a good knowledge of the Neo-Hebrew literature. His public activity began while he was yet at school. He was one of the founders of the Bilu, the Jewish national students' organization, which formed the first Jewish colony in Palestine (see JEW. ENCYC. i. 248b); afterward he was one of the organizers of the students' Chovevei Zion and Bene Zion societies in Moscow. In 1887 he took part as delegate from Moscow in the Chovevei Zion conference at Drusgenik, government of Grodno; and in 1890 he was one of the founders of the Odessa Association for Aiding the Jewish Colonists in Palestine. After the Palestinian scheme had been transformed into the present political Zionist movement Usishkin be-

came one of the most ardent followers and collaborators of Herzl, with whom he began a correspondence in 1896; and since then he has been one of the most energetic propagandists of Zionism among the Russian Jews. Usishkin has taken part in all the Zionist congresses except the sixth, and is one of the members of the Zionist Actions-Comité. In 1903 he was sent to Palestine by this committee and by the Chovevei Zion to purchase land for new colonies, and to organize the colonists and other Jews of Palestine.

Usishkin is a strong opponent of the Uganda project, and stands at the head of the party in Zionism which believes that the regeneration of the Jewish people can be accomplished in Palestine alone. In the twenty-four years of his activity as a leader of the Zionist movement he has contributed to the Jewish magazines many articles on different questions relating to Zionism; and his latest work is an account of the Zionist program, published by him in five languages (Hebrew, Yiddish, Russian, German, and English). See ZIONISM.

S. H. U.

**USQUE:** Family deriving its name from the Spanish city of Huesca (the ancient *Osca*; Hebr. *אושקה*), where it originated, its members emigrating thence to Portugal, and finally to Italy, to escape the Inquisition.

**Abraham Usque:** Italian printer; born at Lisbon, where he was known as **Duarte Pinel**; son of Solomon Usque. Some time after 1543 he went to Ferrara, where he termed himself "Abraham Usque," and established a large printery, adopting as his imprint a globe with Isa. xl. 31 as the legend. His establishment published some Judæo-Spanish rituals and Portuguese works, and between 1551 and 1557 it issued about twenty-eight Hebrew books, including an unpointed Hebrew Bible, all of these works being edited by Samuel Zarfati, Isaac al-Hakim, Menahem b. Moses Israel, and Baruch Uzziel.

Usque's principal work was the valuable Ferrara Bible, bearing the title "Biblia en Lengua Española Traducida Palabra por Palabra de la Verdad Hebrayca por Muy Excelentes Letrados, Vista y Examinada por el Oficio de la Inquisicion. Con Privilegio del Ylustrissimo Señor Duque de Ferrara." This Bible, which is a revision of an earlier translation rather than a new version, was issued at the expense of the Spaniard Yom-Ṭob b. Levi Athias, who, as a Marano, assumed the name "Jeronimo de Vargas." Two slightly modified copies (not two editions) of this Bible were struck off, to be submitted to the Inquisition, one of them being dedicated to Duke Ercole de Este, and the other, intended for the Jewish public, inscribed in honor of D. Gracia Nasi. New editions of the Ferrara Bible were published at Salonica in 1568, and at Amsterdam in 1611, 1630, 1646, 1661, 1695, etc. Before leaving Lisbon, Abraham Duarte Pinel published a "Latinæ Grammaticæ Compendium" and a "Tractatus de Calendis" (Lisbon, 1543).

The identity of Abraham Usque and Duarte Pinel, as well as of Yom-Ṭob b. Levi Athias and Jeronimo de Vargas, was first shown by Isaac da Costa in his "Israel und die Völker" (German transl. by Mann,

p. 282). See JEW. ENCYC. ii. 269b, s.v. YOM-ṬOB BEN LEVI ATHIAS.

**BIBLIOGRAPHY:** G. B. de Rossi, *De Typographia Hebræo-Ferrariensi*, ch. vi.; idem, *Dizionario* (German transl., p. 324); Steinschneider, *Hebr. Bibl.* ii. 28; Kayserling, *Sephardim*, p. 140; idem, *Bibl. Esp.-Port.-Jud.* pp. 28, 107.

**Samuel Usque:** Poet and historian; a near kinsman (but not a brother) of the printer Abraham Usque, whose contemporary he was at Ferrara, whence Samuel later went to Safed. No further details of his life are known, but he was a man of high culture, and one of the most interesting figures among the Jewish writers of the middle of the sixteenth century. He was thoroughly versed in the Bible, wrote Portuguese correctly, understood Spanish and Latin, and had a philosophical bent.

To confirm the Maranos in their faith and to prevent apostasy from Judaism, Usque wrote in Portuguese "Consolaçam as Tribulações de Ysrael" (Ferrara, 1553; 2d ed. Amsterdam, n.d.), a work on the trials and tribulations of the Jewish people, together with the causes of their various sorrows. This prose poem, which is dedicated to Gracia Mendesia, is divided into three dialogues between the patriarch *Yeabo* (Jacob), who is introduced as a shepherd lamenting the fate of his children *Numeo* (Nahum) and *Zicureo* (Zechariah). In the first two dialogues, the author narrates the history of the Israelites down to the destruction of the Second Temple, and describes their sufferings under the Roman rule, basing his account on the Books of Maccabees and on Josephus. The work derives its importance, however, and its martyrologic character from the third dialogue, which, in thirty-seven numbers, recounts the sufferings of the Jews to the author's own time, and quotes the prophecies which were thereby fulfilled. The narrative begins with the persecution by Sisebut, which is followed by the story of the alleged desecrations of the host in France and Spain; the sufferings of the Jews in Persia, Italy, England, and Germany; the accusations against them in Spain and France; their persecution in Spain and Portugal; and the fortunes of those who were exiled from the last-named country. The story of these afflictions, most of them given in chronological order, concludes with words of consolation taken from the Bible.

Usque's chief sources for his history were Alfonso de Spina's "Fortalium Fidei" (cited as "F. F." or "F. Fid."), which he attacked, and also the "Coronica de España," "Estorias de S. Denis de França" (ch. x.), "Coronica Dos Emperadores e Dos Papas," and other similar records. The abbreviations "L. I. E. B.," "E. B.," and "V. M." also occur frequently in Usque's work. The first two are supposed by Isidor Loeb to stand for "Liber Iehuda ibn Berga" (Verga), in which case they would denote the first edition of the "Shebet Yehudah" of Judah ibn Verga. Grätz, however, thinks they connote "Liber Efodi," and he thus assumes that both Judah and Usque, who generally agree, drew upon the "Zikron ha-Shemadot" of Profiat Duran. The abbreviation "V. M." is as yet unexplained. Usque's "Consolaçam" was frequently used by Joseph ha-Kohen, author of the "Emek ha-Baka."

**BIBLIOGRAPHY:** De Rossi-Hamberger, *Hist. Wörterb.* pp. 324 et seq.; Rios, *Estudios*, pp. 496 et seq.; Grätz, *Gesch.* viii. 403 et seq., ix. 346 et seq., lxvii. et seq.; Julius Steinschneider, R.

**Solomon Usque** (**Salusque**; called by Barbosa Machado **Seleuco Lusitano**; Marano name, **Duarte Gomez**): Poet and merchant; born in Portugal; lived at Ferrara, Venice, and Ancona in the middle of the sixteenth century; died after 1567. He made a Spanish translation of the poems of Petrarch, entitled "Sonetos, Canciones, Madrigales y Sextinas de Grande Poeta y Orador Francisco Petrarcha: Primeira Parte" (Venice, 1567), and dedicated to Alexander Farnese, Prince of Parma and Piacenza. It was greatly admired by his contemporaries for its artistic workmanship. Usque wrote also an Italian ode on the six days of Creation, dedicated to Cardinal Borromeo; and he collaborated with Lazaro Graziano in the composition of the Spanish drama "Esther," which was translated into Italian by Leon of Modena (Venice, 1619). He acted also as a business agent for Joseph Nasi, and enjoyed both his favor and that of Nasi's mother-in-law, Gracia Mendesia.

Another Solomon Usque (probably a native of Huesca, whence his name) was the father of the printer Abraham Usque; and a third was a typographer at Constantinople in 1561.

M. K.

**USURY:** In modern language this term denotes a rate of interest greater than that which the law or public opinion permits; but the Biblical law, in all dealings among Israelites, forbids all "increase" of the debt by reason of lapse of time or forbearance, be the rate of interest high or low, while it does not impose any limit in dealings between Israelites and Gentiles. Hence in discussing Jewish law the words "interest" and "usury" may be used indiscriminately.

There are three Biblical passages which forbid the taking of interest in the case of "brothers," but which permit, or seemingly enjoin, it when the borrower is a Gentile, namely, Ex. xxii. 24; Lev. xxv. 36, 37; Deut. xxiii. 20, 21.

The Hebrew word for "usury" is "neshek," meaning literally "a bite," from its painfulness to the debtor; while in Lev. xxv. 36, 37 "increase" is the rendering of the Hebrew "marbit" or "tarbit" which denotes the gain on the creditor's side, and which in the later Hebrew becomes "ribbit." Lending on usury or increase is classed by Ezekiel (xviii. 13, 17) among the worst of sins. See also Ps. xv., in which among the attributes of the righteous man is reckoned the fact that he does not lend on usury.

The Talmud (B. M. 61b) dwells on Ezek. xviii. 13 (Hebr.): "He has lent on usury; he has taken interest; he shall surely not live, having done all these abominations"; on the words with which the prohibition of usury in Lev. xxv. 36 closes: "Thou shalt be afraid of thy God"; and on the further words in which Ezekiel (*l. c.*) refers to the usurer:

"He shall surely suffer death; his blood is upon him"; hence the lender on interest is compared to the shedder of blood.

The sages of the Mishnah knew full well that the forbearance of a debt causes a measurable loss. Thus the following case is put: A holds a demand on B for 1,000 zuzim payable by agreement in ten years; but two witnesses testify that B had agreed to pay in thirty days.

**Loss on a Debt.** An alibi is proved against the witnesses; and they are condemned as "plotting witnesses" to pay the difference between 1,000 zuzim payable in ten years and the same sum payable in thirty days (Mak. i. 1). It often happens that money is paid to a husband in right of his wife, in which right he has an estate for life or during coverture. In modern times the money might be invested, and the husband would draw the interest or dividends; but in all such cases the Mishnah says: "Let ground be bought and the husband receive the income!" The Babylonians, from whom the post-exilic Jews learned much in the way of legal terms and forms, were accustomed to charge interest at the rate of 20 per cent per annum. Nearly, if not quite, all of their contract tablets show this rate of increase. (The first allusion in the Babylonian Talmud to a rate of interest [B. B. 60a] is to one of 20 per cent.) Yet with this knowledge, that the use of capital has a measurable value, and with the example of the Babylonians before them, the sages of the Mishnah not only do not mitigate the Scriptural injunction against interest, but carefully close many avenues of evasion, and forbid even all kinds of "moral usury."

The chapter on usury and increase (B. M. v.) commences thus: "What is usury ["neshek"] and what is increase ["tarbit"]?"; but by the latter word it seems to refer only to the rabbinical enlargement of the antiusury law. The former mode of dealing is easily illustrated; *e.g.*, "where one lends 4 denarii

on a promise of the return of 5; or **Usury and Increase.** 2 bushels of wheat when 3 are to be returned"; but the latter, an increase in "fruits" (*i. e.*, provisions

which pass by quantity), is more complex and is put thus: "A has bought from B a kor of wheat for 25 denarii (=zuzim), which is the market price; afterward, when wheat has gone up to 30 denarii, A says: 'Deliver to me the wheat which I bought from you, as I wish to sell it and buy wine with the proceeds.' B answers: 'Very well, your wheat is sold to me for 30 zuzim, and you have wine [as much as 30 zuzim will buy at the ruling market price] in my hands'; when in fact B has no wine in his possession." Now the first deal, *i. e.*, B's buying the wheat back at a higher price than he had sold it for, is not objectionable as usury but his agreeing to deliver a named quantity of wine which is then worth 30 zuzim, but which he does not own, at some future time, when he might have to buy it in the open market at a higher price, is not indeed Scriptural but is rabbinical usury. The reason is given: B, who owes A 30 zuzim, takes the risk of having to pay it later on in wine, which may cost him more than 30 zuzim, in order to gain forbearance for his debt. This rule forbids, on the ground of

usury, the sale of futures, made when the market price has not yet been fixed.

Some kinds of partnership dealings also are forbidden, because the partner without means is made to incur the risk of his time and labor besides that of loss by accidents or depreciation, in consideration of the capital furnished by the other. For instance, one may not give one's corn to a shopkeeper to sell at retail on half the profit over the wholesale price with which he is charged, nor may one give the shopkeeper money wherewith he may buy at wholesale and then sell on half the profits—because he runs the risk of fire and flood and robbery and of fall in price—unless he is paid wages for selling. And so with the breeding of chickens or the feeding of calves or colts on half profit; though the rule does not apply to cows or other grown beasts which "earn their keep." Commenting on B. M. v. 4, R. Judah (tanna of the 2d cent., pupil of Akiba) says (*ib.* 68b) that a nominal compensation, say a single dry fig, given to the working member of the special partnership is sufficient to exempt it from the usury laws. In modern Jewish practise this view has been followed.

The contract between the moneyed man and the small trader is known as "shetar 'isqa"; and in the well-known scrivener's handbook "Nahalat Shib'ah" (Amsterdam, 1667) two forms of such an instrument are printed, which the compiler (Samuel ben David ha-Levi) follows up with an extract from an eminent rabbi of Lublin to this effect: "A man may say to his friend: 'Here are a hundred florius for thee in business [כַּעֲמֵקָה], half profit and half loss. If thou shouldst say, "I have lost" or "I have not earned any money," thou must take a solemn oath to clear thyself.' But he must give him wages for his trouble; however, anything [כֶּל שְׂוֵהוּ] is enough for the purpose." Such special partnerships date back a very considerable time; for 4,000 years ago they were fully regulated by King Hammurabi in sections 100-107 of his code of laws for Babylon, and it seems that in quite modern times they have been common.

One may not give to an Israelite (money wherewith) to buy a certain quantity of corn before the market price ("sha'ar") is known; this restriction also is made in order that the man without means may not incur the risk of loss by higher prices in return for capital furnished. A landlord may lend to his metayers (tenants on shares) wheat for seed to be returned in kind, but not wheat for food. A man should not say to his neighbor, "Give me a kor of wheat and I will return it at thrashing-time"; but he may request such a loan "till my son comes home," or "till I find the key" (B. M. 75a). The reason is, that wheat might rise and the lender would profit. However, the Talmud abrogates this prohibition by allowing such a loan to be made when the borrower has some wheat of his own, though it be a much smaller quantity than that which he borrows. The Mishnah goes even so far as to forbid an exchange of work between neighboring farmers, where the later work is more laborious than the earlier. All these prohibitions are rabbinical only: that against a loan in kind might be called anti-Scriptural; for

the Bible, when it speaks of "usury of victuals" (Deut. xxiii. 29), contemplates a loan to be returned in kind, and forbids only the return of a greater quantity than that which was lent.

The lender should not lodge in the borrower's house free of rent, nor at less than the usual rent. The purchase-price must not be increased on account of delay in payment, such as an offer to sell a field at 1,000 zuzim if paid now, but at 1,200 zuzim

**Possible** in a year's time; but in charging **Evasions.** rent the landlord may charge more when payable at the end of the year

than when the rent is paid every month. It is improper for the seller of a field, after receiving part of the price, to say, "Bring me the rest of the money whenever you will and then take possession of your own"; for the income on the field would be interest on the deferred payment, and the purchaser is already a partial owner. But, what may turn out to be much more oppressive, a man may lend a sum of money upon a field on the terms "If you do not return me the money in three years, the field is mine"; and it actually becomes his. "Once Boethos, son of Zenon, did so under the advice of the learned" (B. M. 63a). It may thus be seen that the legal ban upon interest led to forfeitures which might give to the moneyed man more gain than even a high rate of interest. The mortgage in the English and American form is just such a contract as Boethos used to impose on borrowers. This form was contrived because the English law forbade loans upon interest; and in early times it was literally carried out, the land becoming the property of the mortgagee at once if the bond was not paid on the day appointed.

The Talmud and the codes distinguish between "fixed increase" ("ribbit kezuzah") and the mere "dust ["abaq"] of increase." The Mishnah gives some instances of the latter; e.g., a man sends presents to a well-to-do neighbor, expecting to obtain a loan from him. This is interest in advance. Or

after he has repaid his loans, he sends **"Fixed"** presents, "because your money was **and Other** idle in my hands." Again, if A had **Increase.** not been in the habit of greeting B first, he should not do him this honor after he had obtained a loan from him; and, as the later authorities put it, if he was not in the habit of teaching B the Torah before the loan, he should not do it thereafter.

One difference between usury under the letter of the Law and rabbinical increase is this: the former, when collected by the creditor, may be reclaimed by action, while the latter may not. R. Johanan, one of the Palestinian amoraim, insists that even "definite usury," such as is forbidden by the written law, can not be recovered legally. In this view he is supported (B. M. 61b) by others on the grounds that in the Scriptural words quoted above the vengeance of Heaven is invoked upon the usurer, and that the rule that he who incurs the pain of death is not held to payment in a civil suit. The upshot of the dispute as laid down in the codes is this (Shulhan 'Aruk, Yoreh De'ah, 161, 2): The rabbinical court will render judgment for the repayment of definite usury that has been collected, and will not enforce the judgment by levy on the lands or goods of the

usurer's property, but only by force against his body.

When an Israelite lends money to a Gentile or to an "indwelling stranger" (a half-convert of foreign blood), he may and should charge him interest; and when he borrows from such a person he should allow him interest. It is the opinion of Maimonides that for Jews to charge Gentiles interest is a positive command of the written law. [The reason for the non-prohibition of the receipt by a Jew of interest from a Gentile, and vice versa, is held by modern rabbis to lie in the fact that the Gentiles had at that time no law forbidding them to practise usury; and that as they took interest from Jews, the Torah considered it equitable that Jews should take interest from Gentiles. Conditions changed when Gentile laws were enacted forbidding usury; and the modern Jew is not allowed by the Jewish religion to charge a Gentile a higher rate of interest than that fixed by the law of the land.—E. c.] The intervention of a Gentile may lead to an evasion of the law between Israelites. For example, one not standing in need of it has borrowed the money of a Gentile; the borrower lends it to another Israelite, he to pay the interest thereafter; this the first borrower may do only with the consent of the Gentile, if he will accept the other Israelite as his debtor, but not on his own responsibility, although the first borrower would pay to the Gentile the same interest which he should receive from his brother Israelite (B. M. v. 6).

In a baraita (*ib.* 71a) the other case is also put: "A lends money to a Gentile; the latter needs it no longer, but meets an Israelite who does. If the Gentile is willing to lend him the money on interest, he may do so, remaining bound to A; but A must not be a party to the change of debtor." However, it must have been easy to evade the usury law through the Gentile intermediary, even while maintaining these distinctions.

The guilt of breaking a Scriptural command falls not on the lender alone, but on the borrower as well (on the supposition that the verb referring to usury in Deut. xxiii. 20, "tashshik," stands in the causative form); also on the surety for the borrower, the witnesses, and, according to some opinions, the scrivener. The latter participants violate the precept "thou shalt not put a stumbling-block before the blind" (Lev. xix. 14).

Maimonides treats of interest in his "Yad" (Malveh, ch. v.), following the Gemara and the responsa of the Geonim. He to a certain extent mitigates the usury law; mitigation had indeed become a necessity in his time, as the Jews no longer dwelt in compact farming settlements like those of Palestine and Babylonia in the days of the Mishnah and the Talmud, but had been forced to become traders, brokers, and money-lenders. He says (*ib.* ch. xiv.): "There are things resembling interest that are allowed; e.g., a man may buy at a discount bonds belonging to his neighbor; a man may give his neighbor a denarius, on condition that he lends 100 denarii to a third person. A may give B a denarius to induce C to lend him (A) 100 denarii" (*ib.* ch. xv.). Some things are allowed by law, but have been forbidden by the Rabbis as a cunning evasion.

A says to B, "Lend me 100 zuzim." B says, "I have no money, but I have wheat worth that sum, which I can lend you." Then he buys the same wheat from him for 90 zuzim. He may afterward by law recover 100 zuzim because it is not even "dust of interest." Thus a man who has taken a field in pledge should not rent it back to the owner. But if such evasions are forbidden only by an appeal to the lender's conscience, very little is left of the enforceable law against usury.

The Shulhan 'Aruk treats of usury not in the fourth or juridical part, but in the Yoreh De'ah, among moral and religious duties (§§ 159-177).

While Maimonides would restrict the lending of money to Gentiles within narrow limits, lest the lender should acquire a passion for taking usury, Shulhan and practise it on his fellow Israelites, this later standard declares it "allowable nowadays in all cases"

(*ib.* § 159). It allows also the money of orphans or of a poor- or a school-fund to be lent on terms which would be "rabbinical increase"; and if a guardian has improperly lent the money of his wards even at a fixed interest, the wards who have had the enjoyment of the income are not bound to restore it when they come of age. To save oneself in great need, however, one may borrow on interest (*ib.* § 160). The relaxation on behalf of infants and charities was unavoidable; for in numerous countries the Jews were precluded from the old plan of investing funds in land, which alone was permitted by the Talmud.

As a matter of jurisprudence it is found here (*ib.* § 160; Hoshen Mishpat, § 52) that when a bond provides for principal and interest separately, it is enforceable as to the former, but not as to the latter; but if both are cast up into one sum, the bond is void in toto. When interest, even such as is forbidden by the written law, is once paid, it is said (Yoreh De'ah, § 161) that the courts may compel its restoration only by process of contempt (flogging until the defendant is willing to pay). When this power no longer rested with the Jewish courts, there was no remedy. If the lender died after he collected unlawful interest, it is here expressly said that his heirs are not even morally bound to make restitution.

L. N. D.

—**Medieval Doctrine:** The Church, basing itself upon a mistranslation of the text Luke vi. 35 interpreted by the Vulgate "Mutuum date, nihil inde sperantes," but really meaning "lend, never despairing" (see T. Reinach in "R. E. J." xx. 147), declared any extra return upon a loan as against the divine law, and this prevented any mercantile use of capital by pious Christians. As the canon law did not apply to Jews, these were not liable to the ecclesiastical punishments which were placed upon usurers by the popes, Alexander III. in 1179 having excommunicated all manifest usurers. Christian rulers gradually saw the advantage of having a class of men like the Jews who could supply capital for their use without being liable to excommunication, and the money trade of western Europe by this means fell into the hands of the Jews. They were freed from all compe-

tion, and could therefore charge very high interest, and, indeed, were obliged to do so owing to the insecure tenure of their property. In almost every instance where large amounts were acquired by Jews through usurious transactions the property thus acquired fell either during their life or upon their death into the hands of the king. This happened to Aaron of Lincoln in England, Ezmel de Ablitas in Navarre, Heliot de Vesoul in Provence, Benveniste de Porta in Aragon, etc. It was for this reason indeed that the kings supported the Jews, and even objected to their becoming Christians, because in that case they could not have forced from them money won by usury. Thus both in England and in France the kings demanded to be compensated for every Jew converted. In the former country only in 1281 would the king give up his right to half the property of Jews who were converted. There was a continual conflict between the papal and the royal authority on this subject, and thus as early as 1146 the pope Eugenius declared all usury null and void, while the debtor was on a crusade, and Innocent XIII. made an indignant protest against usury, calling on all Christian princes to demand the return of the interest. Clement V. in 1311 protested against all civil law which permitted any form of usury by Christians.

It was impossible to carry out the canonical restrictions without stopping all progress in commerce, and numerous expedients were adopted to avoid the canonical laws. Especially the Cahorsins and Lombards invented methods by which usury was disguised in the form of payment for possible loss and injury, payment for delay, and so on. The competition of these Italian usurers—they were called the "pope's usurers"—rendered Jews less necessary to the kings in France and England in the middle of the thirteenth century, and both Louis IX. (1254) and Edward I. (1275) attempted to influence the Jews to avoid usury, but without effect (see ENGLAND). No other means of livelihood was open to them.

Very high interest was permitted the Jews in France under Philip Augustus, two deniers on the pound per week, or 43.3 per cent per annum, and King John in 1360 allowed this even to be doubled. In Sicily Frederick II. allowed 10 per cent in 1231.

In Castile Alfonso X. allowed 25 per cent, while in Aragon the Cortes of Tarragona put 20 per cent as the maximum, and this was reduced to 12 per cent in the year 1231. In Navarre Philip III. established 20 per cent ("5 for 6") in 1330, while in Portugal Alfonso IV. (1350) fixed the maximum at 33½ per cent.

The enormously rapid increase of indebtedness due to this large interest caused ordinances to be passed to prevent interest being counted on interest, but without avail. As an instance of the extent to which interest could grow, the abbot of St. Edmund in 1173 borrowed about 40 marks from Benedict the Jew, and this had grown to £880 in seven years, though not entirely through interest (see Jacobs, "Jews of Angevin England," p. 60).

The loans were generally made upon PLEDGES, which could not be sacred vessels of the Church, to pledge which was punished as early as 814 by confiscation of goods. Almost all other objects could be

pledged, and it became a problem whether when a Jew had the pledge he could claim usury as well. This applied when lands were pledged for loans, when it was claimed the land or the produce thereof was sufficient to compensate for any loss of use of capital without further payment. Notwithstanding this the Jews claimed interest until both capital and interest were repaid.

Later on in the Middle Ages the doctrine of Aristotle that "money does not breed" was referred to usury, and forms the basis of Shylock's and Antonio's contention in "The Merchant of Venice," I., iii., and the casuists of Roman law drew a distinction between things consumable and fungible; that is, the use of which is exhausted by one using, and things which can be used over and over again. Interest or usury was allowed for the latter, but not for the former class, to which money was supposed to belong, because every passing of coin was regarded as a separate use. The lending of money with the expectation of any further return was still regarded as unnatural and disreputable, but in the later Middle Ages the Jews had been bereft of all capital, so that from the fifteenth century onward they are found mostly as dealers in second-hand clothing, rather than as usurers. Moreover a class of Christian merchants arose which evaded the canon law and lent money on interest without any opposition.

Notwithstanding this, the reputation of usurers has clung to the Jews even to modern times, though there is little evidence of their being more addicted to it than other persons who trade in money. In Russia the Christian "kulak" is regarded as being much more stringent in his demands than the Jewish money-lender, though in Bukowina the latter has proved to be somewhat of a plague. The poverty of the majority of Jews prevents them from any extensive addiction to this practise (see POVERTY).

J.

**UTAH:** One of the Western States of the United States of America; admitted into the Union in 1896. Jews first settled in Utah about 1860, among the earliest comers being Isidor Morris, Nicholas S. Ransohoff, Samuel Kahn, Fred Auerbach, Louis Cohn, Aaron Greenewald, Ichel Watters, and Emanuel Kahn.

Religious services were first conducted in Salt Lake City during the fall holidays of 1866. In the course of a few years Congregation B'nai Israel was established; and after its temporary dissolution it was reorganized in 1880. Its officiating ministers have been: J. Kaiser, L. Strauss, Hyman G. Elkin, Moses P. Jacobson, Gustave H. Lowenstein, Louis G. Reynolds, and the present (1905) incumbent, Charles J. Freund. Congregation Montefiore was organized March 20, 1899, and has occupied its present structure since 1903. Its officiating minister has been J. G. Brody. The Jewish Relief Society was organized in 1873 and reorganized in 1888. The Council of Jewish Women has a large active section, mainly promoting the religious objects

of the organization. Benjamin F. Peixotto Lodge 421 I. O. B. B. has been in existence since 1892, and at present has eighty members.

The Jews of Utah have from the time of their arrival taken a leading part in the development of its intellectual and industrial welfare. During Utah's existence as a state they have filled responsible government positions. Among those who have held public office have been: Simon Bamberger, state senator and chairman of the Democratic State Campaign Committee; Harry S. Joseph and Rudolph Kuchler, members of the state legislature; Joseph Oberndorfer, member of the board of education in Salt Lake City; Herman Bamberger, county commissioner of Salt Lake county; and Louis Cohn, councilman in Salt Lake City.

Besides those in Salt Lake City, the capital of the state, a few Jews are located in **Ogden, Provo, Price, and Logan**. The Jewish inhabitants of Utah number approximately 1,000 in a total population of about 277,000.

A.

C. J. F.

**UTRECHT**: Province of the Netherlands, with its capital of the same name. Jews resided in Utrecht prior to the expulsion from Spain and Portugal. In 1424 they were banished from the city; and their synagogue was transformed into the Church of the Blessed Virgin Mary. They evidently soon returned; for in 1444 the city council issued an ordinance directing that they be tortured on the wheel, imprisoned, and expelled. The reason for this procedure can no longer be determined with certainty; but it was due either to the fact that the Jews had championed the claims of Wolravus of Meurs to the bishopric, or to allegations made against them of insulting Christianity both publicly and privately. The ordinance of expulsion was quickly repealed, however, by the council itself; and Jews were permitted to settle in the village of Maarsen, near the city.

As early as 1664 a distinction was drawn between the German and Portuguese communities; the former consisting largely of the poorer classes, which earned a livelihood by peddling, while the Portuguese engaged in extensive commercial undertakings, and were wealthy and respected. An ordinance of Oct. 1, 1736, furthermore, gave the Portuguese the official right of residence in the province, and permitted them to conduct their business operations in the city itself. This privilege was renewed in 1777; and in 1789 it was extended to the German Jews on the condition that they assumed all communal duties.

After the uprising of the patriots against William of Orange and his expulsion by the French, France declared the Jews citizens, and granted them all civic rights and liberties. In 1796 a convention of the most prominent Jews of Holland assembled at Utrecht, before which the new constitution was solemnly read. Its text was translated into Hebrew by Zebi Hirsch Meinfeld, and published under the title "Dibre Negidim" (Utrecht, 1800).

D.

S. O.

**UZ** (עֶזְרָא): 1. Son of Aram, and grandson of Shem, according to Gen. x. 23; but I Chron. i. 17 records him as a son of Shem.

2. Eldest son of Nabor by Milcah; nephew of Abraham (Gen. xxii. 21; A. V. has "Huz").

3. One of the sons of Dishan, and grandson of Seir the Horite (*ib.* xxxvi. 28; I Chron. i. 42).

4. Geographical name occurring three times in the Old Testament and connoting: (1) the native land of Job (Job i. 1); (2) a country northeast of Egypt, which it separated from Philistia, being one of the lands to which, at the command of Yuwri, Jeremiah gave the wine-cup of fury to drink (Jer. xxv. 20); and (3) a country comprising part of Edom, summoned to rejoice over the destruction of the Temple (Lam. iv. 21).

According to modern investigators, who regard the names given in Genesis as geographical terms, the territory of Uz embraced the regions represented by the names of the persons mentioned above; and in like manner the brief notices in Jeremiah and Lamentations agree with those concerning the native country of Job's friends, as well as with other data concerning the land in the first chapter of Job. According to verses 15 and 17 of that chapter, the country was first invaded by the Sabaeans from the south, and later by the Chaldeans from the north, which implies that the district lay on the northern edge of the great Arabian desert. Eliphaz, one of the friends of Job, was from Teman, a town of southern Edom; his companion, Bildad, came from Shuah (Gen. xxv. 2), which, according to the cuneiform inscriptions, lay south of Karkemesh (Carchemish); and Elihu was a native of Buz (comp. Jer. xxv. 23; Gen. xxii. 21). According to the cuneiform inscriptions, Shalmaneser II. received tribute from one Sasi, a son of the land of Uzza, from 859 to 831 B. C.; and the Midrash also identifies the name of Uz with the country, making Job a contemporary of Abraham (Yalk. Shim'oni, ii. 2; Gen. R. lvii. 3).

**UZÈS** (אֶזְרָא אוֹ אֶזְרָא): Town of France, in the department of Gard, about 15 miles north-northeast of Nîmes. Jews were settled there as early as the fifth century. St. Ferréol, Bishop of Uzès, admitted them to his table and enjoyed their friendship. On this account complaint was made of him to King Childebert, whereupon the bishop changed his attitude toward the Jews, compelling all those who would not leave Uzès to become Christians. After his death (581) many who had received baptism returned to Judaism ("Gallia Christiana," vi. 613; Dom Vaissète, "Histoire Générale de Languedoc," i. 274, 545). Before the French Revolution there were seven Jewish families at Uzès, comprising forty-six individuals, who later settled either at Nîmes or at Pont-Saint-Espirit. Toward the end of the nineteenth century there was only one Jewish inhabitant in Uzès, namely, A. Mossé, an attorney. He was mayor of the town for several years (see Kahn, "Notice sur les Israélites de Nîmes," p. 31).

Among the scholars of Uzès were: the anonymous compiler (13th cent.) of the Talmudic collection mentioned in Steinschneider, "Cat. Bodl." No. 2343;

Samuel ben Judah, Gabriel of Milbaud, and Dou Dieulosal ("R. E. J." xliii. 247).

S. K.

**UZIEL:** Family name occurring principally among the Sephardim in Spain, where it is found as early as the fifteenth century. After the expulsion of the Jews from Spain and Portugal, the Uzzielis were scattered throughout northern Africa, Italy, and the Levant. The following are the more important members of the family:

**Hayyim ben Abraham Uziel:** Scholar and author of Spanish extraction; flourished in the latter half of the sixteenth century in Greece and Asia Minor. He wrote "Me'kor Hayyim" (3 vols., Smyrna, n.d.), an ethical work in Judæo-Spanish.

D.

S. O.

**Isaac b. Abraham Uziel:** Spanish physician and poet; born at Fez; died in Amsterdam April 1, 1622. At one time he held the position of rabbi at Oran; but late in life he left that city to settle in Amsterdam, where he opened a Talmudical school which counted among its pupils Manasseh ben Israel. Dissatisfied with the laxity in religious matters which he noticed among many members of the Sephardic community, Uziel delivered a series of lectures which led to the foundation of a new congregation under the name of "Neweh Shalom." In 1610, at the death of Judah Vega, the first rabbi of the new congregation, Uziel was called to the rabbinate. Uziel was the author of a Hebrew grammar, "Ma'aneh Lashon," edited by his pupil Isaac Nehemiah at Amsterdam in 1627 (2d ed. 1710). He left also in manuscript many Hebrew and Spanish poems ("Libros Poeticos en Declaracion de Todos los Equivocos de las Sagradas Letras"); these are highly praised by De Barrios, who represents the author as a great poet, an able musician, and a distinguished mathematician. Joseph Serrano dedicated a poem to Uziel; it is inserted in the "Temime Derek."

I. BR.

**Jacob Uziel:** Physician and poet of the seventeenth century; died at Zante 1630. He was of Spanish extraction, but emigrated to Italy at an early age, and settled in Venice, where he became famous for his medical skill. He was the author of "Dawid" (Venice, 1624), an epic poem in twelve cantos, written in Italian.

**Joseph Uziel:** Italian scholar and rabbi; died at Ferrara 1572. He was a pupil of Isaac Aboab of Castile, and left a responsum, which is included in the collection of Joseph di Trani (i. 39).

**Judah Uziel:** Italian scholar of the sixteenth century; born in Spain; died, probably at Venice, in 1634. He was the author of sixteen sermons on the Pentateuch, which were published under the title "Bet ha-'Uzzieli" (Venice, 1603-4).

**Samuel Uziel:** Talmudist and scholar of the seventeenth century; rabbi of Leghorn. He is mentioned in a responsum in the collection "Mayim Rabbim" (ii. 52) of Raphael Meldola.

**Samuel ben Joseph Uziel:** Rabbi and physi-

cian of Spanish extraction; lived in the sixteenth and seventeenth centuries. He officiated as rabbi at Salonica, where he also practised medicine.

S. O.

**UZZA, UZZAH (עֹזָא, עֹזָה):** 1.—**Biblical Data:** Son of Abinadab. Together with his brother Ahio, he drove the new cart on which was placed the Ark of the Covenant when, accompanied by David and all the house of Israel, it was brought from Abinadab's house at Gibeah to Jerusalem. When they came to the thrashing-floor of Nachon, the oxen which drew the cart stumbled, and Uzza took hold of the Ark to steady it; whereupon he was slain by God "al ha-shal" (= "for his error"). David, in memory of the event, called the place "Perez-uzzah" (II Sam. vi. 3-8; I Chron. xiii. 7-11, where the thrashing-floor is called "Chidon"; comp. the commentaries of Budde, Löhr, and Nowack, *ad loc.*). —**In Rabbinical Literature:** The Rabbis made various attempts to explain and palliate the death of Uzza. By an "argumentum a majore ad minus" proof is offered that if the Ark could bear those who bore it, so much the more could it bear itself. By not perceiving this, and thinking that the Ark might be prevented from falling by stopping the oxen, Uzza had brought death on himself. R. Johanan thought that "al ha-shal" implied that he had died as a result of his act, while R. Eleazar drew from "shal" the inference that Uzza had eased himself near the Ark. He was, nevertheless, to share in the world to come: for it is expressly stated that he died "by" the Ark; and as the latter belonged to eternity, Uzza in like manner must be immortal (Soṭah 35a; Yalk., I Sam. 142, ed. Wilna, 1898).

2. Grandson of Ehud, and a member of the tribe of Benjamin (I Chron. viii. 7).

3. Head of a family of Nethinim who returned to Jerusalem with Zerubbabel (Ezra ii. 49; Neh. vii. 51).

4. Garden attached to the royal palace. According to Stade, "Gesch. des Volkes Israel," i. 569, ii. 679, "Uzza" should be corrected to "Uzziah," thus implying that the garden had been laid out by the king. It apparently contained a tomb in which Manasseh and his son Amon were buried (II Kings xxi. 18, 26).

E. G. H.

S. O.

**UZZIAH (עֹזִיָּהּ, עֹזִיָּהּ):** 1. Son of Amaziah; called also **Azariah** (comp. II Kings xv. 1, 13, 30). He was king of Judah, and began to rule, at the age of sixteen, in the twenty-seventh year of the reign of Jeroboam II. The Kings record (*ib.* xv. 2) states that his reign extended through fifty-two years (788-737 B.C.), and that he was righteous as his father had been, though he did not take away the high places, but allowed the people to sacrifice and burn incense at them. II Chron. xxvi. relates how Uzziah conquered the Philistines and the Ambarians, and received tribute from the Ammonites; how he

refortified his country, reorganized and reequipped his army, and personally engaged in agricultural pursuits. His success as king, administrator, and commander-in-chief of the army made him ruler over the largest realm of Judah since the disruption of the kingdom. His power and authority over the peoples of this realm help to explain to a certain extent the political situation in the reign of Judah's later kings, and probably also in 739, when Tiglath-pileser III. conquered nineteen districts in northern Syria which had belonged to Uzziah (Azri-ia-u).

Uzziah's strength became his weakness; for he attempted to usurp the power of the priesthood in burning incense in the Temple of YHWH. While in the act he was smitten with leprosy; and he was subsequently forced to dwell in a leper's house until the day of his death (II Chron. xxvi. 21). While he was in this condition Jotham, his son, ruled in his stead. The total number of years, fifty-two, attributed to Uzziah's reign include the period from his accession to his death.

E. G. H.

I. M. P.

**UZZIEL** (זְּזִיִּל): 1. Son of Kohath and brother of Amram (Ex. vi. 18; I Chron. vi. 2). He was the father of Mishael, Elzaphan, and Zithri (Ex. vi. 22). The first two, at the bidding of Moses, carried from the Tabernacle the bodies of Nadab and Abihu, their cousins (Lev. x. 4). Elzaphan, moreover, was chief

of the family of the Kohathites during the wandering in the wilderness (Num. iii. 30). Another son of Uzziel, named Amminadab, was one of the Levite chiefs selected to carry the Ark of the Covenant to the tent which David had pitched for it in Zion (I Chron. xv. 10). Two other sons of Uzziel were named respectively Micah and Jesiah (*ib.* xxiii. 20). His descendants were termed "Uzzielites" (Num. iii. 27; I Chron. xxvi. 23).

2. A Simeonite; son of Ishi; one of the chiefs who, during the reign of King Hezekiah, passed over the Jordan, annihilated the remnants of the Amalekites, and settled in their territory around Mount Seir (I Chron. iv. 41-43).

3. One of the eponymous heroes of the tribe of Benjamin; described as one of the five sons of Bela (*ib.* vii. 7).

4 (Called also **Azareel**). Son of Heman. He belonged to the eleventh order of those who were chosen by lot to serve as singers in leading the worship in the Temple during the reign of David (I Chron. xxv. 4, 18).

5. Son of Jeduthun; one of those who were chosen to resanctify the Temple during the reign of Hezekiah (II Chron. xxix. 14).

6. A goldsmith who repaired part of the walls of Jerusalem under Nehemiah (Neh. iii. 8).

## V

**VÆZ**: Prominent family of Lisbon, whose foremost members, the four brothers Immanuel, Pedro, Ayres, and Salvador, resided in Portugal as Maranos during the sixteenth century.

**Abraham Væz**: Hakam of the Portuguese congregation in Bayonne during the latter half of the seventeenth century. He was the author of a work on Jewish ritual laws entitled "Arbol de Vidas," to which was appended a lengthy treatise on rituals by Abraham Rodriguez Faro (Amsterdam, 1692). He wrote also several sermons on the Pentateuch, and a number of ethical treatises, which were collected under the title "Discursos Predicables y Avisos Espirituales" and published, at the expense of his son **Jacob Væz**, by Isaac Aboab (Amsterdam, 1710), who himself wrote a long introduction.

**BIBLIOGRAPHY**: Fürst, *Bibl. Jud.* iii. 465; Kayserling, *Bibl. Esp.-Port.-Jud.* pp. 107-108.

**Ayres Væz**: Physician to John III. of Portugal; brother of Immanuel Væz; died at Rome about the middle of the sixteenth century. At the request of the King of Fez, with whom John, however, was not on terms of amity, Væz was sent to Africa, where he succeeded in curing the monarch of a dangerous illness. Upon his return to Lisbon, Væz devoted himself to the study of astronomy and astrology. In consequence of predicting to the king and queen the death of one of their children, a prediction which was fulfilled, he lost the royal favor. Thinking to regain the king's confidence, Væz declared, in the course of a discussion, that astrology was an unreliable mode of divination, and that its practise was

foolish and irreligious. The king, who had recently read a treatise expressing similar views, delivered Væz to the Inquisition, charging him with being a heretic and a secret Jew. Væz was ordered to defend himself before the inquisitors, and later to engage in a disputation with the theologian Sorao; but Capodiferro, the papal nuncio, succeeded in removing him from the jurisdiction of the Inquisition, and sent him to Rome to be tried by the Curia. Pope Paul, who was himself a believer in astrology, not only set Væz at liberty, but even issued a bull (June 6, 1541) protecting the entire Væz family, as well as the lawyers who had defended Ayres Væz, against the Inquisition.

**Daniel Væz**: Portuguese scholar; flourished at Amsterdam in the seventeenth century. Together with Joseph Athias, he published a prayer-book entitled "Orden de las Oraciones del Todo el Anno" (Amsterdam, 1677).

**BIBLIOGRAPHY**: Kayserling, *Bibl. Esp.-Port.-Jud.* p. 60.

**Immanuel Væz**: Physician; eldest of the Væz brothers. According to the account of Rodrigo de Castro ("De Universa Mulierum Morborum Medicina," ii. 47, 332, Hamburg, 1603), who was his nephew, and who settled in Hamburg in the sixteenth century, Immanuel was appointed physician to four kings of Portugal—John III., Sebastian, Henry, and Philip II. He won this distinction by virtue of his erudition and the experience which he had gathered in his extensive travels.

**Pedro Væz**: Physician at Covilhã, Portugal; second in age of the Væz brothers. He is repeat-

edly mentioned in the "Medicorum Principum Historia" of Abraham Zacuto.

**Salvador Vaez**: Youngest of the Vaez brothers. He served as a page to the papal nuncio Hieronymo Ricenati Capodiferro in Lisbon, and was able to interest the prelate in the case of his brother Ayres, and to induce him to interfere in the latter's behalf. The result was that after the sessions of the Inquisition had begun, Salvador suddenly entered the hall and declared the sitting dissolved by order of the nuncio. Later he probably accompanied Capodiferro to Rome.

**VALABRÈGUE, ALBIN**: French dramatist; born at Carpentras, Vaucluse, Dec. 17, 1853. He is one of the most prolific of modern French dramatists, producing about two plays a year and in addition acting as dramatic critic of the Paris "L'Illustration." Among his dramatic works are: "La Veuve Chapuzot," 1879; "Clarvin Père et Fils," Paris, 1880; "Le Crime" (with Bertol-Graivil), Dec., 1882; "Les Maris Inquiets," 1883; "La Flamboyante" (with Paul Ferrier), 1884; "Les Grippe-Sou," 1885; "La Nuit du 16," 1885; "L'Homme de Paille," 1885; "La Fille à Georgette," 1886; "Le Bonheur Conjugal," 1886; "Le Sens-Préfet," 1886; "Les Vacances du Mariage" (with Hennequin), 1887; "Durand et Durand" (with Ordonneau), 1887; "Clo-Clo" (with Decourcelle), 1887; "Les Saturnales," operetta (music by Lacombe), 1887; "Doit et Avoir" (with Felix Cohen), 1888; "La Sécurité des Familles," 1888; "Madame a Ses Brevets," 1890; "Les Moulinauds," 1890; "Les Ménages Parisiens," 1890; "Le Pompier de Justine" (with Davril), 1890; "La Femme," 1891; "Les Vieilles Gens," 1891; "Le Commandant Laripète" (with Silvestre), 1892; "Le Premier Mari de France," 1893.

J. KA.

**VALENCE**: Chief town of the department of the Drome and former capital of the county of **Valentinois** in the ancient province of Dauphiné, France. Several Jewish families that had been expelled from the Comtat-Venaissin in 1323 sought refuge in Valence and its territories. Guillaume de Roussillon, Bishop of Valence, also brought a number into his diocese in 1330, and granted them important privileges. In 1441 there were eighteen Jewish families in Valence, each of which paid to the bishop, John of Poitiers, an annual pension of one gold florin ("R. E. J." ix. 238). The same prelate compelled them to wear the badge of the wheel (Jules Ollivier, "Dissertation Historique sur la Ville de Valence," p. 301).

The dauphin Louis showed much good-will toward the Jews of Valence and its territories. He confirmed the privileges which his predecessors had granted them, and invited all the Jews who wished to do so to settle within his dominions, promising them immunities and protection similar to those enjoyed by their coreligionists in other localities of Dauphiné, on condition that they paid the same dues. An anonymous writer of Valentinois in the fifteenth century composed a commentary on the astronomical tables of Immanuel Jacob BONFILS.

S. K.

**VALENCIA** (בְּלַיִסְיָה): Capital of the former kingdom of the same name. During the dominion of the Moors, Valencia had a Jewish community eminent for its size and wealth. When James I. of Aragon made his entry into the conquered city on Oct. 9, 1238, the Jews went out to meet him with their rabbis and delegates at their head, and presented him with a roll of the Law in token of homage. As a reward for the important services which they had rendered him in the conquest of the strongly fortified city, he presented to some of them houses belonging to the Moors, as well as real estate in the city and its precincts. Among those who received such gifts after the "repartimiento de Valencia" were the secretaries and interpreters of the king,

Maestros R. David, R. Solomon, and James I. R. Moses Bachel; David Almadayan, secretary to the infante D. Fernando; **Makes Presents to the Jews.** Abraham ibn Vives (probably the father of the wealthy Joseph ibn Vives who in 1271 held a lease of the salt-works of Valencia, and who, as Amador de los Rios believes, was the ancestor of the Spanish hero Luis Vives, after whom

a street in Valencia is named), and R. Samson. Besides, presents were received by the gold-workers, merchants, and money-changers Moses Alconstantini (probably the same who in 1271 indiscreetly exhibited certain letters of the king), G. ibn Ya'ish, Simon Abenpesat (certainly a relative of Moses and Joseph Abenpesat of Tudela), and Astruc de Tortosa (without doubt the same that had possessions on the island of Majorca).

In 1239 King James assigned the Jews a commodious quarter for residence, extending from the wall Aben Nemi to 'Abd al-Malik; thence to the Puerto d'Exarea or Puerto de la Ley (= "gate of the law"); and from this gate to the "horno de Aben Nulid" and to the wall of Ibrahim al-Valenci. The Juderia or ghetto was first surrounded by a high wall in 1390, and was provided with three gates which were closed at night. The main gate was at the entrance of the long street which cut through the Juderia, hard by the Place de la Figuera (Higuera), where now the monastery of S. Thecla stands.

Another gate, D'Exarea, was at the termination of the long street of the Jews; and a third gate led to the Place de la Olivera, now called "De Comedias." This restriction of the Jews met with opposition on many sides, especially from the Dominican friars, because by the establishment of the ghetto their church was wholly isolated.

Otherwise the Jews of Valencia enjoyed for a long time perfect freedom. They were not restrained in their trade or commerce; and they were not required to appear before the magistracy. They were subject solely to the city "baile," the representative of the crown. For several decades the baile-general was R. Judah (Jehudano), the king's confidant. The Jews were permitted to hold public office; but they were not allowed to execute justice upon a Christian. In 1283, however, this freedom was materially restricted. King Pedro decreed that no Jew should thenceforth hold any public office with which jurisdiction over Christians was connected. Moreover, Jews were to be admitted as sworn witnesses only in disputes involving sums not exceeding 5 sueldos.

The Jews in Valencia had a special formula, in Catalan, for an oath, which was not very different from that in Barcelona (see Rios, "Hist." i. 576 *et seq.*). They were not permitted to kill cattle in the public slaughter-house, and they were required to pay a special tax on the necessities of life, merchandisc, etc.

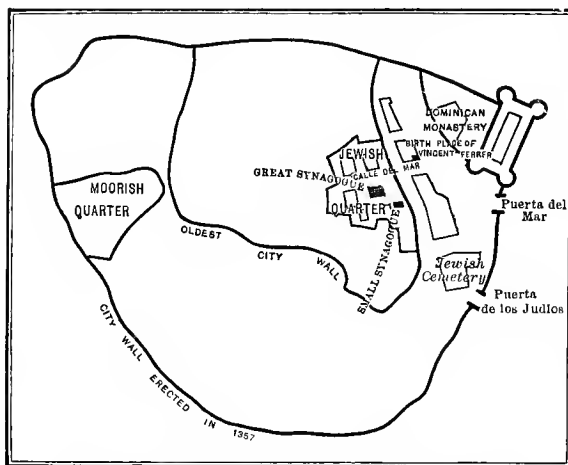

The Valencian Jews, who engaged in industrial

pursuits and largely in commerce, aroused the envy of both nobles and citizens through the wealth and luxury displayed in their houses and apparel. In 1370 loud complaints were raised to the effect that the Jews had built houses outside the Juderia; and although they protested that this had been done with the consent of the king and by special permission of the queen, who received the Jewish taxes for rent, the king nevertheless decreed that the Jews should thereafter live only in the Juderia.

The inner government of the aljama was conducted by deputies ("adelantados"); and this body by royal permission had erected a school in 1264. Near the Jew street stood the large synagogue; and not far distant from this was a smaller one. The Jewish cemetery was outside the Juderia but within the city wall; and leading to it was the Puerta de los Judios, or Gate of the Jews.

The year of terror (1391) saw the abrupt dissolution of the flourishing Jewish community of Valencia. In the last third of the fourteenth century the

city had sunk to a low level both morally and materially. The nobles wasted their property in excesses and indulged in the most extravagant luxury. Valencia, the beautiful garden of Spain, became the refuge of vagabonds and adventurers from all parts of the country. People were attacked, robbed, and even murdered in broad daylight; and the time was one of complete anarchy, the conditions being such that the Jews of Valencia trembled

Plan of Valencia in the Fourteenth Century, Showing Position of Jewish Quarter.

when they heard of the massacre in Seville in 1391. They sought protection from the magistracy and the city council, who took energetic measures for their defense. Quite unexpectedly, however, at noon on Sunday, July 9, 1391, St. Christopher's Day, a mob of between forty and fifty half-grown youths gathered in the market-place and formed themselves into a procession carrying a banner and several crosses. They marched to the main gate of the Juderia on the Place de la Figuera, shouting, "The Archdeacon of Seville comes to baptize all Jews," and tried to force their way into the quarter. The Jews hastily closed the gates, accidentally pulling in some of the youths. In an instant nobles and citizens, knights and clergy, strangers and the rabble generally made a rush upon the Juderia. In vain did the infante D. Martin, Duke of Montblanch, try to force back the crowd. The Jews defended themselves valiantly; and one of the youths was killed in the struggle. As soon as this became known the revengeful mob forced its way into the Juderia from the walls and roofs of the surrounding

houses. A frightful massacre ensued. Two hundred and thirty (according to another source, several hundred) Jews were killed, their

**Massacre of the Jews.** wives and daughters dishonored, and their houses plundered. Many, to escape death, accepted baptism. Don Samuel Abravalo, one of the richest

Jews of Valencia, had the Marquis de Lombay as sponsor and took the name "Alfonso Fernandez de Villanova," from property belonging to him. Joseph Abarim, or Juan Perez de S. Jaime, as he called himself after baptism, declared in the criminal court (July 21, 1891) that notes due to him amounting to 30,000 gold gulden had been destroyed, that force had been used against his niece and against his son's nurse, and that his brother had been wounded.

After the catastrophe the magistracy did its utmost to punish the rioters; and ninety were taken prisoners. An order was issued to deliver up to the city all goods taken from the Jews; and soon the churches, the town-hall, and the neighboring

houses were filled with the most costly objects. The city council demanded **Dissolution of the Community.** an exemplary punishment of the guilty parties; but owing to the fact that the most influential families of the city were implicated, the suit dragged

along, and finally King John I. granted an amnesty to all concerned.

The Juderia was not reestablished. The community was destroyed: the large synagogue became a monastery (S. Cristobal); the smaller one was turned into a chapel; and the eight slaughtering-pens in the Juderia were sold (1393 and 1394). No Jew might enter the city without the permission of the bail; and even with this permit he might not stay longer than eight days. Each Jew entering the city without permission was liable to a fine of 50 maravedis. Only in places near Valencia, S. Thomas, S. Andres, and S. Esteban, might Jews reside even temporarily.

Several Jewish scholars lived in Valencia, among them Solomon ibn Gabirol, who also died there, and Joseph Caspi. Isaac ben Sheshet was

**Scholars and Rabbis.** rabbi in Valencia for several years; and Amram ben Nathan Efrati occupied the rabbinate for four decades.

The latter was widely respected for his learning, but was not on good terms with Hasdai ben Solomon (a friend of Isaac ben Sheshet), called from Tudela about 1380. Isaac Rocamora was born in Valencia. Several Jews adopted the name "Valensi," or "Alvalensi," after Valencia as the original home of their families; e.g., Samuel ben Abraham Valensi, a pupil of R. Isaac Campantons.

M. K.

**VALENTIN, GABRIEL GUSTAV:** German physiologist; born at Breslau July, 1810; died at Bern, Switzerland, May 24, 1883. He was educated at the University of Breslau (M. D. 1832), and estab-

lished himself as a physician in that city. In 1835 he received the Grand Prix of the Institut de France for his "Histogenia Comparata," which is an able treatise on the evolution of animals and plants. In 1836 he was elected professor of physiology of the University of Bern, which chair he resigned in 1881.

Valentin was the author of several important works on the blood and its circulation, on the electricity of muscles and nerves, on digestion, on toxicology, on the physiology of the senses, etc. From 1836 to 1843 he published the "Repertorium für Anatomie und Physiologie," and collaborated on many professional journals. Of his numerous works the following may be mentioned: "Handbuch der Entwicklungsgeschichte des Menschen, mit Vergleichender Rücksicht der Entwicklung der Säugethiere und Vögel," Berlin and Paris, 1835 (see above); "Ueber den Verlauf und die Letzten Enden der Nerven," Bonn, 1836; "Ueber Mechanik des Blutumlaufs," Leipsic, 1836; "De Functionibus Nervorum Cerebraliū et Nervi Sympathici," Bern, 1839; "Lehrbuch der Physiologie des Menschen," Brunswick, 1844, 2d ed. 1847-50; "Grundriss der Physiologie des Menschen," *ib.* 1846, 4th ed. 1854; "Der Einfluss der Vaguslähmung auf die Lungen und Hautausdünstung," Frankfurt-on-the-Main, 1857; "Die Untersuchung der Pflanzen- und Thiergewebe im Polarisierten Licht," Leipsic, 1861; "Beiträge zur Anatomie und Physiologie des Nerven- und Muskelsystems," *ib.* 1863; "Der Gebrauch des Spektroskops," *ib.* 1863; "Versuch einer Physiologischen Pathologie der Nerven," *ib.* 1864; "Versuch einer Physiologischen Pathologie des Bluts und der Uebrigen Körpersäfte," *ib.* 1866-67.

F. T. H.

**VALENTINOIS.** See VALENCE.

**VALERIO, SAMUEL BEN JUDAH:** Physician and author who lived in the Grecian Archipelago in the second half of the sixteenth century. He wrote the following works: "Yad ha-Melek," a commentary on the Book of Esther, completed at Corfu on the 6th of Feb., 1579, and published with the text at Venice, 1586; "Ḥazon la-Mo'ed," a philosophical commentary on the Book of Daniel, finished on the 7th of Feb., 1580, in a village near Patras, in the Morea, and published, with the text of the original, at Venice, 1586. There is an extract from the latter commentary in the rabbinical Bible of Amsterdam (1724-27). Valerio wrote also "Emek ha-Baka," "Pi Hakam," and "Bet ha-Malkut," still in manuscript.

**BIBLIOGRAPHY:** Fürst, *Bibl. Jud.* iii. 967; *Literaturblatt des Orients*, vi. (1845), 566, 606; Nepi-Ghirondi, p. 331; Steinschneider, *Cat. Bodl.* col. 2494.

U. C.

**VALI (VALLE), MOSES DAVID:** Italian rabbi and physician; born at Padua; died there 1777. He was a cabalistic scholar of repute, and lectured before the Paduan association known as "Mebakeshe Adonai," in company with the twonoted scholars Israel Hezekiah Treves and Jacob Hazaq. These lectures were attended by Moses Hāyym Luzzatto, who, becoming deeply interested in cabalistic research, began the study of it under Vali both

with the association and in his own home, the acute intellect of Luzzatto exceeding that of his confrères. At the age of twenty-five Vali wrote a polemical work in Italian against Christianity, divided into seven parts, and entitled "I Sette Giorni della Verità." He wrote also, in Hebrew, seventy "tikḡunim" on Deut. xxxiv. 12. Between 1721 and 1767 he wrote eight large volumes in Hebrew (Almanzi MSS. Nos. 269-276), the greater part of them consisting of a commentary upon the entire Bible. They are still unpublished. Ephraim Luzzatto wrote a sonnet (No. 50 in his collection of poems) entitled "Eleh Bene ha-Ne'urim," praising the lectures of Vali and Treves.

**BIBLIOGRAPHY:** *Kerem Hemed*, iii. 119, 130, 131; Steinschneider, *Hebr. Bibl.* vi. 49-50.

U. C.

**VALLADOLID:** Former residence of the kings of Castile and Spain; noteworthy for the numerous assemblies of the Cortes which were held there and which passed anti-Jewish laws. The city had a large Jewish community, which, together with the Jews of the neighboring towns of Zaratan, Portillo, Cigales, and Mucientes, paid 69,520 maravedis in taxes in the year 1290. Ferdinand IV., in opposition to the wishes of the town council, granted the Jews of Valladolid special privileges; but in the civil war between Pedro I. and Henry of Trastamara the inhabitants of the town rebelled against the king and supported D. Henry, taking advantage of this occasion to plunder and destroy the houses of the Jews and their eight synagogues, robbing the latter of their ornaments, and tearing the scrolls of the Law. Toward the end of the year 1411 Vicente Ferrer resided at Valladolid, and, not content with the results obtained from his sermons, induced the town council to confine the Jews within their circumscribed ghetto. In May, 1432, the great synod, composed of representatives of the different communities and of other influential men, held its sessions in the large synagogue in the Jewish quarter under the presidency of the court rabbi Abraham Benveniste. As in other places in Spain, during the year 1473 and in the following year many Jews who had renounced their religion were burned at the stake in Valladolid. The Jews of the city were so few that they, together with their coreligionists in the towns mentioned above, paid only 5,500 maravedis in taxes.

At the time of Asher ben Jehiel, Moses ben Ḥabib was rabbi in Valladolid, which was also the birthplace of the convert Abner of Burgos or Alfonso de Valladolid (Asher b. Jehiel, *Responsa*, § 107, No. 6). A few months before the expulsion, D. Abraham, physician in ordinary to D. Pedro Gonzalez de Mendoza, Primate of Spain, accepted baptism, as did also D. Abraham Senior and his two sons.

Valladolid was the seat of a tribunal of the Inquisition, which held many autos da fé there. See **BENVENISTE**; **INQUISITION**; **SENIOR, ABRAHAM**.

**BIBLIOGRAPHY:** Rios, *Hist.* ii. 55, 95, 429; iii. 594; *Shebet Yehudah*, ed. Wiener, p. 133. Zarza is the only authority for the persecution of the Jews in Valladolid, the Christian chroniclers saying nothing about it. The introduction to the elegy edited by Jellinek in the *Magen Abot* (Leipsic, 1855), a commentary on the *Perke Abot* of Simeon b. Zemah Duran, alludes to the activity of Vicente Ferrer.

**VALLENTINE, ISAAC:** English journalist and communal worker; born in Belgium 1793; died in London 1868; son of the Rev. N. I. Vallentine. He founded the earliest Anglo-Jewish periodical, which at first was unsuccessful, but which afterward gave rise to the "Jewish Chronicle." He also took a prominent part in the foundation of the Jews' Orphan Asylum and other charitable and literary institutions in London. In 1848 Vallentine published "The Hebrew Almanack and Calendar," containing a table of holy days and fasts for the ensuing twenty-five years. This has been continued annually up to the present time, and has become the communal pocket calendar.

G. L.

**VALLS, RAPHAEL:** Spanish Marano; burned at the stake by the Inquisition at Palma, Majorca, on May 6, 1691, as the "rabbi" of the CHUETAS, as were also his pupil, Raphael Terongi, and the latter's sister, Catalina Terongi, who adhered to Judaism. The popular poets of Majorca commemorated the death of these Maranos in verses which are still sung by the women of the island, one of them running as follows:

"En Valls duya se bandera,  
Y en Terongi 's pano,  
En sos Xuetas derrera,  
Qui feyan se processo."

**VALUATION:** Estimate of the value of the sacred gifts when a money substitute was required for them. The chief Biblical passage in relation to the subject of valuation is Lev. xxvii. 2 *et seq.*, where ערך is probably a noun of action, as in Ex. xl. 4 (comp. König, "Syntax," § 277c). The particle ך, which in the cited passage often occurs suffixed to ערך, refers to the people of Israel, who are addressed, and in consequence also to the priest, who represents the people on every occasion. To assume a substantive, "arkok" (ערבך), as does J. Halévy ("Journal Asiatique," 1899, p. 548), is not necessary, nor is it supported by tradition. This valuation was to be made by the priest, and his estimation was determined partly by fixed standards and partly by his individual judgment.

It might happen that some one made a vow that another person would become a Nazarite or would do service in the Sanctuary (comp.

**Particular** Num. vi. 2 *et seq.*; I Sam. i. 22); and

**Instances.** in case such a vow were not kept outwardly, the person in question had to be redeemed. For a male between twenty and sixty years of age, for instance, the sum to be paid was fifty shekels of silver (Lev. xxvii. 3-8).

It doubtless occurred very often that, moved by gratitude, some one would say, "I will consecrate this animal to the Lord." But if the animal in question did not reach the standard necessary in an animal destined for a sacrifice to the Lord, an equivalent in money was required. The value of the animal was estimated by the priest, and the person

who had made the vow had to pay that sum and one-fifth more (Lev. xxvii. 9-13).

One might wish to give a house to YHWH, but since this could not be done literally, the donor would be directed to present the money-equivalent of the house. This, again, was to be estimated by the priest, and if the donor wished to buy back his house he was obliged to pay the estimated price and one-fifth in addition (Lev. xxvii. 14 *et seq.*).

The case became more complicated where any one wished to give a part of his land to YHWH. In such a case two possibilities had to be considered. (1) The land might have been inherited. In that case the price of the field was to be estimated according to the measure of seed it required; one homer of seed necessitated a payment of fifty shekels of silver. In addition, only the number of years which remained until the next year of jubilee was to be reckoned, for in that year the field re-

**Valuation of Land.** verted to its former possessor. If he who desired to give the field to YHWH nevertheless sold it afterward to some one, or leased it until the next year of jubilee, at the expiration of that term the field did not revert to its former owner, but belonged to YHWH forever (Lev. xxvii. 16-21). (2) The piece of land might have been purchased by the person wishing to make the gift, or leased by him until the next jubilee year. In such a case also, if he wished to redeem his field, he had to pay a sum estimated according to the amount of seed necessary for the field. This gift held good only for the number of years which remained until the next year of jubilee (Lev. xxvii. 22-25).

The first-born of unclean beasts (asses, for instance) were to be valued by the priest, though in Num. xviii. 16 five shekels of silver is mentioned as the price for the redemption of such an animal as soon as it should be one month old. The owner, however, might redeem such firstlings by paying the estimated price plus one-fifth (so in the case of the first-born of men, according to Ex. xiii. 13, xxxiv. 20; Num. xviii. 16), or else they were sold by the priest at the price fixed by him (Lev. xxvii. 26 *et seq.*). In the case of tithes, also, the obligatory fifth was added to the value if a part was to be redeemed by money (Lev. xxvii. 31). But such persons or things as were dedicated to the Lord in the form of the "herem" (*i. e.*, the ban) could be neither redeemed nor sold.

A comparison with other passages throws interesting light on these estimations. In the so-called Book of the Covenant the labor of a slave is valued at thirty shekels of silver (Ex. xxi. 32), while in Lev. xxvii. 3 the value of a strong man between twenty and sixty years of age is reckoned at fifty shekels of silver. Furthermore, in the Book of the Covenant no difference is made between a male and a female slave (Ex. xxi. 32), but according to Lev. xxvii. 3-8, a female is always reckoned at three-fifths the value of a male of the same age; in one case this three-fifths is reduced to one-half the value of a male (Lev. xxvii. 5). Moreover, the sum to be paid to the father of a dishonored virgin is fifty shekels of silver (Deut. xxii. 29), whereas in Ex. xxii. 15 no fixed sum is mentioned in such a case.

The number fifty, or half a hundred, is shown by these instances of its use to be a "round number" (a comparison of these numbers may be found in König, "Stilistik, Rhetorik, Poetik," p. 56).

A certain development may be traced in regard to valuation. In more ancient times persons were

**History of Valuation.** they were actually obliged to do service in the Sanctuary, as in the case of the Gibeonites (Josh. ix. 23), and of Samuel (I Sam. i. 22), and of the women who, according to Ex. xxxviii. 8 and I Sam. ii. 22, did service at the door of the Tabernacle (this is König's interpretation of the fate of Jephthah's daughter; Judges xi. 39), or they lived as Nazarites and refrained from wine and other intoxicating drinks (Num. vi. 2 *et seq.*; Judges xiii. 7; Amos ii. 12 ["They caused my Nazarites to drink wine," Hebr.]). Later such persons were often redeemed (Lev. xxvii. 3-8).

A similar evolution is to be seen in the case of the first-born of unclean beasts. At first the neck of such an animal was broken (Ex. xiii. 13); but in later times, according to Lev. xxvii. 27 and Num. xviii. 15, redemption became allowable. The case of herem also came to be treated more mildly in the course of time. This word (comp. the Arabic "haram" = "to cut off") designated formerly a separation, or a setting aside to be destroyed (Ex. xxii. 19 *et al.*); but according to Num. xviii. 14 and Ezek. xliv. 29, the thing set aside belongs to the priest. Perhaps the passage Lev. xxvii. 28b designates a transition period in this idealization of the herem (comp. Simon Mandl, "Der Bann," 1898, p. 13).

This valuation occurs once also in the history of Israel. King Jehoshaphat, in II Kings xii. 5, mentions the money for the dedicated objects ("kodashim") which is brought into the house of YHWH. These kodashim are nothing else than persons or things given to YHWH and then redeemed with money, according to Lev. xxvii. 2 *et seq.* For in II Kings xii. 5 the valuation ("erek") of the souls in question (*i. e.*, of the persons) is spoken of, and nothing is said of the half-shekel which each male Israelite, according to a fixed rule, had to pay annually to the Temple as atonement money ("kofer"; Ex. xxx. 12-16). If the Chronicler in the parallel passage (II Chron. xxiv. 5) intended that, he was mistaken.

**VÁMBÉRY, ARMINIUS:** Hungarian traveler and Orientalist; born at Duna-Szerdahely, on the island of Schütt, near Presburg, March 19, 1832. He was apprenticed at the age of twelve to a ladies' dressmaker; but after becoming tutor to the son of the village innkeeper, he was enabled by his friends to enter the gymnasium of St. George, near Presburg. In 1846 he went to Presburg, where he remained three years. Later he studied at Vienna, Kecskemet, and Budapest.

Vámbéry was especially attracted by the literature and culture of Turkey, and in 1854 he was enabled, through the assistance of Baron Joseph Eötvös, to go to Constantinople. There he became a private tutor, and thus entered the household of

Husain Da'im Pasha, later becoming private secretary to Fuad Pasha. About this time he was elected a corresponding member of the Hungarian Academy of Sciences in recognition of his translations of Turkish historians. Returning to Budapest in 1861, he received a stipend of a thousand florins from the academy, and in the

Arminius Vámbéry.

fall of the same year, disguised as a Sunnite dervish, and under the name of Rashid Effendi, he set out from Constantinople. His route lay from Trebizond to Teheran, via Erzerum, Tabriz, Zenjan, and Kazvin. He then went to Shiraz, through Ispahan, and in June, 1863, he reached Khiva, whence he went by way of Bokhara and Samarcand to Herat, returning through Meshed to Teheran and Trebizond.

This was the first journey of his kind undertaken by a European; and since it was necessary to avoid suspicion, Vámbéry could not take even fragmentary notes, except by stealth. He returned to Europe in 1864, and received in the next year the appointment of professor of Oriental languages in the University of Budapest, retiring therefrom in 1905. Vámbéry became known also as a publicist, zealously defending the English policy in the East as against that of the Russians.

The publications of Vámbéry, aside from magazine articles, are as follows: "Deutsch-Türkisches Taschenwörterbuch" (Constantinople, 1858); "Abuska," a Turkish-Chagatai dictionary (Budapest, 1861); "Reise in Mittelasien" (Leipsic, 1865, 2d ed. 1873); "Cagataische Sprachstudien" (*ib.* 1867); "Meine Wanderungen und Erlebnisse in Persien" (*ib.* 1867); "Skizzen aus Mittelasien" (*ib.* 1868); "Uigurische Sprachmonumente und das Kudatku-Bilik" (Innsbruck, 1870); "Uigurisch-Türkische Wortvergleichen" (Budapest, 1870); "Geschichte Bocharas" (2 vols., Stuttgart, 1872); "Der Islam im Neunzehnten Jahrhundert" (Leipsic, 1875); "Sittenbilder aus dem Morgenlande" (Berlin, 1876); "Etymologisches Wörterbuch der Turkotatarischen Sprachen" (Leipsic, 1878); "Die Primitive Cultur des Turkotatarischen Volkes" (*ib.* 1879); "Der Ursprung der Magyaren" (*ib.* 1882); "Das Türkenvolk" (*ib.* 1885); "Die Scheerbaniade, ein Oezbegisches Heldengedicht," text and translation (Budapest, 1885); "Story of Hungary" (London, 1887); "A Magyarorság Keletkezése és Gyarapodása" (Budapest, 1895); "Travels and Adventures of the Turkish Admiral Sidi Ali Reis in India, Afghanistan, Central Asia, and Persia During the Years 1553-1556," a translation from the Turkish (*ib.* 1899); and "Alt-Osmanische Sprachstudien" (Leyden, 1901).

On political subjects Vámbéry has written: "Russlands Machtstellung in Asien" (Leipsic, 1871); "Zentralasien und die Englisch-Russische Grenzfrage" (*ib.* 1873); and "The Coming Struggle for India" (London, 1885). Many of his works have

been translated into other languages, especially French. He has written his autobiography under the titles "Arminius Vámbéry, His Life and Adventures" (*ib.* 1883) and "Struggles of My Life" (*ib.* 1904).

**VAN DEN ENDE, FRANZ.** See SPINOZA.

**VAN OVEN, ABRAHAM:** Physician; died in England 1778; grandson of Samuel Basan, who, fleeing from Spain at the beginning of the eighteenth century, settled in Oven, Holland, whence the patronymic was derived. Abraham Van Oven received his medical diploma at Leyden Dec. 14, 1759. After residing for some time at Ilamburg, he emigrated to England, and, settling in London, acquired an extensive and remunerative practise among the Jewish residents. He was a good Hebrew scholar, and wrote a Hebrew translation of Congreve's "Mourning Bride."

J.

G. L.

**VAN OVEN, BARNARD:** English physician and communal worker; born in London 1796; died there July 9, 1860; youngest son of Joshua Van Oven. He was brought up for the medical profession, studying under Sir William Blizard and receiving the degree of L.R.C.S. in 1818. He practised in London during his whole life, and had an extensive clientele among the Jewish community.

Van Oven was one of the pioneers in the movement for the removal of the disabilities of the Jews in England. In 1829 he wrote the first appeal which directed public attention to the subject, and which was entitled "An Appeal to the British Nation on Behalf of the Jews." He followed this up by organizing committees in support of the movement, and by convening public meetings, at which he was an indefatigable speaker. In 1847 he published the pamphlet "Ought Baron Rothschild to Sit in Parliament?" He was subsequently appointed chairman of the committee which celebrated the success of the agitation by the establishment of commemoration scholarships at several public schools. Van Oven served on the committees of most of the Jewish institutions of his day, and was instrumental in establishing the Jews' Infant Schools. In 1827 he had been appointed physician to the poor of the Great Synagogue, which position he filled for many years.

Van Oven was the author of a work entitled "The Decline of Life in Health and Disease" (London, 1853).

**VAN OVEN, JOSHUA:** English surgeon and communal worker; born in England 1766; died in Liverpool 1838; son of Abraham Van Oven. He was trained for the medical profession, being a pupil of Sir William Blizard. On receiving the degree of L.R.C.S. (1784) he established himself in London as a surgeon and apothecary, acquiring an extensive practise among the Jewish residents. Through unfortunate speculations he in 1830 found himself in monetary difficulties, and then removed to Liverpool, where he continued to reside till his death.

Van Oven was one of the most prominent workers in the Jewish community of his day, and was chiefly instrumental in establishing the Jews' Free School, the presidency of which he held for many years. His active participation was evinced in the weekly sermons he delivered to the pupils. He will, however, be chiefly remembered for his zeal in establishing

the Jews' Hospital in Mile End. There was at that time no institution for teaching handicrafts to Jewish lads; and its want was keenly felt and commented on. Van Oven therefore conceived the plan of erecting houses of industry and education, together with hospitals for the sick, whose maintenance was to be provided for by annual contributions from the sum paid according to the general pooling

Joshua Van Oven.

rates by Jewish householders. Opposition being shown to part of this plan, he was induced to modify it; and instead of several hospitals the Jews' Hospital in Mile End was erected from funds previously collected from the community.

Van Oven acted as honorary medical officer to the poor of the Great Synagogue, London, until his removal to Liverpool. In the latter city he took a prominent part in communal affairs, established schools and charitable organizations, and delivered in the synagogue sermons in the vernacular—at that time a novel proceeding.

Van Oven was a Hebrew scholar—perhaps one of the best of his day—and a voluminous writer, contributing articles on Jewish and medical subjects to the "European Magazine" and the "Liverpool Medical Gazette." He wrote also: "Letters on the Present State of the Jewish Poor in the Metropolis," London, 1802; a preface to "The Form of Daily Prayers," *ib.* 1822; and "A Manual of Judaism," *ib.* 1835.

**VAN PRAAGH, WILLIAM:** Pioneer of lip-reading for deaf-mutes in England; born in Rotterdam June 11, 1845. Having studied under Dr. Hirsch, who had introduced into Holland from Germany the purely oral system of teaching the deaf and dumb, and who became principal of the Rotterdam Institute, Van Praagh became active in spreading his teacher's principles. When, in the early sixties, a Jews' Deaf and Dumb Home was established in London, Van Praagh was invited (1866) to take over the management of the institution. His application of the purely oral system at once attracted the notice of Miss Thackeray, daughter of the novelist, and others in the public press. In 1871 he published his "Plan for the Establishment of Day-Schools for the Deaf and Dumb." This pamphlet gave the first impulse in England to the establishment of day-schools and the boarding-out system.

XII.—26

The success of Van Praagh's work at the Jews' Deaf and Dumb Home led to the establishment by the late Baroness Mayer de Rothschild of an unsectarian institution on that system. It was termed "The Association for the Oral Instruction of the Deaf and Dumb." Lord Granville became president; Sir George Dasent, chairman; Sir John Lubbock (now Lord Avebury), treasurer; and Van Praagh, who severed his connection with the Jews' Deaf and Dumb Home, was appointed director (1870), which position he still (1905) holds. In 1872 the association opened a Normal School and Training College for Teachers, as the head of which Van Praagh for a third of a century has had in charge the training of the majority of English teachers in the lip-reading system.

Van Praagh's publications include (in addition to the above-mentioned pamphlet): "Lip-Reading for the Deaf" (6th ed. 1900); papers on the oral education of the deaf and dumb (including one read at the National Health Exhibition in 1884); "Lessons for the Instruction of Deaf and Dumb Children in Speaking, Lip-Reading, Reading, and Writing" (two parts, 1884); "Defective Articulation Resulting from Cleft Palate"; and various contributions to the medical and general press.

In consideration of Van Praagh's services to the deaf and dumb, M. A. Fallières, minister of public instruction and fine arts in France, created him "Officier d'Académie" in 1884. In 1887 Van Praagh gave evidence before the Royal Commission on the Blind, the Deaf and Dumb, etc. The many teachers whom he has trained have made known his system in every English-speaking country.

**BIBLIOGRAPHY:** *Out of the Silence*, in *Cornhill Magazine*, 1868; *Proc. of Royal Commission on the Blind, the Deaf and Dumb*, etc., 1887; *Jew. Chron.* Jan. 13, 1905; *Jewish Year Book*, 1905.

**VARNHAGEN, RAHEL.** See LEVIN, RAHEL.

**VARUS, QUINTILIUS:** Roman governor of Syria 6-4 B.C.; successor of Saturninus. He first became prominent in Jewish history when Herod the Great placed his own son ANTIPATER on trial before the tribunal over which Varus presided, and which condemned him. After Herod's death, however, his two sons, ARCHELAUS and ANTIPAS, went to Rome to make their pleas for the throne, while Varus remained in Jerusalem and quickly suppressed a revolt before he left for Antioch. When, however, SABINUS arrived at Jerusalem and oppressed the

people, rebellion again raged throughout Judea, so that Varus was obliged to return with both his legions. Joined on the march by the Arabian king, Arcetas, he first traversed Galilee, where Judas, whose father, Hezekiah, had been put to death by Herod, was at the head of the insurrectionists. Sepphoris, the capital, was burned, and all its inhabitants were sold as slaves, after which Varus marched on Emmaus in the west, and burned it likewise, the inhabitants saving themselves by flight. Traversing the entire district of Samaria, which he left undisturbed, he reached Jerusalem, where the Roman legion was besieged in the royal palace by the rebels. The news of his approach, however, so dispirited the latter that he was able to enter the city without resistance, whereupon the great majority of the people were pardoned, although the country was scoured by soldiers and about 2,000 of the insurgents were crucified. After the suppression of this revolt Varus returned to Antioch.

In an enumeration of the various wars, the *Seder 'Olam Rabbah* (end) alludes to this rebellion and its suppression as the "polemos shel Varos." According to Grätz, it exercised a great influence on Judaism, its direct results being the following: the rabbinical regulations (1) that emigration causes ritual defilement, since the people flee for refuge to foreign lands (*Tosef.*, Mid. xviii. 3; *Tosef.*, Kelim, B. K. i. 1, 5; *Git.* Sa), and (2) that an agent delivering a *get* must prove its authenticity through a messenger (*Git.* i. 1); (3) the reception into the canon of Ecclesiastes, the Song of Solomon, and the *Hagiographa* (*Yer. Shab.* 3c); (4) the redaction of the Psalms (the majority of the daily Psalms contained lamentations and allusions to the Roman supremacy, and this was felt most keenly in the post-Herodian period); (5) the introduction of regular Psalms into the service of the Temple.

E. G. H.

—**In Rabbinical Literature:** Among the women who ruled were: Jezebel and Athaliah in Israel; and Shemiramot (Semiramis), wife of Nebuchadnezzar (see *Lev. R.* xix., end), and Vashti in Gentile kingdoms (*Esther R.* i. 9). Vashti prepared a feast for women in the "royal house," where she served them with sweetmeats and other delicacies palatable to women; and she selected as the place of the banquet the royal chamber of Ahasuerus, where she might exhibit the artistic paintings which, according to R. Abin, women prefer to see to eating fattened birds (*Yalk.*, ii., § 1049). Ahasuerus ordered Vashti to appear nude before him and his guests at the banquet with the queen's crown as her only ornament. R. Abba b. Kahana says Vashti was no more modest than Ahasuerus. R. Papa quotes a popular

proverb: "He between the old pumpkins, and she between the young ones"; *i. e.*, a faithless husband makes a faithless wife. According to R. Jose b. Hanina, Vashti declined the invitation because she had become a leper (*Meg.* 12b; *Yalk.*, *l. c.*). Ahasuerus was "very wroth, and his anger burned in him" (*Esth.* i. 12) as the result of the insulting message which Vashti sent him: "Thou art the son of my father's stableman. My grandfather [Belshazzar] could drink before the thousand [Dan. v. 1]; but that person [Ahasuerus] quickly becomes intoxicated" (*Meg. l. c.*). Vashti was justly punished for enslaving young Jewish women and compelling them to work nude on the Sabbath (*ib.*).

J. D. E.

**VATICAN LIBRARY:** Papal library; originally housed, with its archives, in the Lateran Palace, where it was enriched, in the course of time, by many rare manuscripts. Transferred to the Torre Chartularia on the Palatine, it was taken to Avignon; but on the return of the Apostolic See to Rome it became known as the *Biblioteca Avignonese*. According to a catalogue published by P. Ehrle, this library contained 116 Hebrew manuscripts ("Historia Bibliothecæ Romanorum Pontificum," pp. 398, 754), and was probably the most ancient collection of its kind in any European library. The subsequent history of these manuscripts is uncertain, and they have been either wholly or partly lost. Such vicissitudes of fortune at length reduced the Vatican Library to a state of insignificance, until Martin V. (1417-31) and Nicholas V. (1447-55) endeavored to repair these losses, and founded the *Biblioteca Apostolica* in the Palace of the Vatican. This task was at length completed through the efforts of Sixtus IV., and from that time the Vatican Library has contained a large number of Hebrew codices. During the librarianship of Girolamo Aleandro (1519-38), who understood Hebrew, and of Marcello Cervini, afterward Marcellus II., the growth of this department was probably rapid; and it is clear that about 1550 the library must have contained a large number of Hebrew manuscripts, since after that date a special "scrittore" or copyist was employed for works in the Hebrew language. The actual number of manuscripts, however, is unknown, for the first catalogue, which was compiled by Carlo Federigo Borromeo, and which lists 173 books, is very imperfect, and is but little anterior to the middle of the seventeenth century.

Shortly afterward (1650) another catalogue was prepared by BAROLOCCI, with the assistance of Giovanni Battista Jonah, which contains a list of 584 Hebrew manuscripts

**Early Catalogues.** and printed books. The manuscripts then in the Vatican had been acquired

from two sources, the ancient Vatican collection, and the more modern Palatine foundation, which had formerly been in the library at Heidelberg, but which was presented by Duke Maximilian I. to Gregory XV., and placed in the Vatican by Urban VIII. in 1624. This Palatine collection contained 287 Hebrew manuscripts, which had originally belonged to Jews near the Rhine and the Neckar, from

whom they had been taken during the persecution of 1391.

In 1658 the Vatican Library was enriched by the Urbino collection, which contained a number of valuable Hebrew manuscripts, including two ancient codices of the entire Bible. The second of these (not mentioned by Ginsburg in his "Introduction to the Massoretico-Critical Edition of the Hebrew Bible") was written, according to the colophon, in 976; this date is questionable; but the manuscript is undoubtedly very old. After these acquisitions, Bartolucci, assisted by Giulio Morosini, compiled a new catalogue of manuscripts; but all three lists are still unpublished.

The first printed catalogue is that of Stefano Evodio and Giuseppe Simone Assemani, issued in 1756, and in use at the present day. It contains numerous errors and discrepancies, however, some of them corrected by Berliner, Steinschneider (comp. "Die Hebräischen Uebersetzungen," p. xi.), and others. Thus, codex 133, which contains, according to the catalogue, a work by Isaac b. Jacob Alfasi, actually comprises a collection of treatises of Yerushalmi, and affords valuable material for the textual criticism of this Talmud. In his "Appendix ad Catalogum Codicum Hebraicorum Bibliothecæ Vaticanæ," Cardinal Mai gave a list of seventy-eight other manuscripts which were added to the library after the publication of the Assemani catalogue, thus raising the number of Hebrew manuscripts in the entire collection to 590.

In recent years three small libraries of Hebrew manuscripts have been added to the Vatican, these accretions comprising thirty-nine manuscripts from the Pia Casa dei Neofiti at Rome, deposited in the Vatican in 1892 and catalogued by Gustavo Sacerdote; eighteen manuscripts from the Museo Borgiano "De Propaganda Fide," added in 1902, together with the other Borgian codices; twelve manuscripts from the Barberini collection, placed in the Vatican in 1903, with the rest of the Barberini library.

Neither the Borgian nor the Barberini manuscripts have as yet been accurately described and catalogued; and therefore the above estimate of their number is provisional. The Borgian collection contains a Bible of considerable antiquity; but the other manuscripts seem to be of little value. Among the Barberini codices is the famous tricolour Samaritan Pentateuch in Hebrew (Samaritan version), Arabic, and Samaritan (Targum), as well as the Pentaglot Psalter in Armenian, Arabic, Coptic, Aramaic, and Ethiopic.

The Vatican Library was formerly governed by a cardinal librarian and a first and a second custodian; but in 1879 a sublibrarian was added to this staff, and in 1895 the position of second custodian was abolished. "Scrittori," or copyists, are employed in the library to copy and catalogue the manuscripts; but the statement that Sixtus IV. appointed a "scrittore" for Hebrew rests solely on a passage from Panvinio, and seems to be incorrect (comp. Müntz and Fabre, "La Bibliothèque du Vatican au Quinzième Siècle," p. 137, note 2), although it is certain that the library contained a Hebrew copyist about 1550, and that a second "scrittore"

was added by Paul V. (1605-21). The celebrated Bartolucci was a Hebrew copyist, as were many converted Jews, including Carlo Federigo Borromeo, Agostino Grimani, and Giovanni Battista Jonah, the last of whom went to Rome in 1638, and was a copyist at the Vatican until his death in 1668, when he was succeeded by Giulio Morosini, who held this office for the remainder of his life.

The Vatican Library includes also the Numismatic Cabinet and the "Pagan" and "Christian" museums. The last-named contains a glass vessel probably taken from a Jewish catacomb under the Via Labicana (see illustration, *JEW. ENCYC.* ii. 140b). This glass is especially valuable on account of its representation of the Temple of Jerusalem; it has been published by De Rossi ("Bollettino di Archeologia Cristiana," 1882, p. 137).

I. G.

**VATKE, JOHANN KARL WILHELM:**

Christian Hebraist; born March 14, 1806, at Behndorf, Saxony; died in Berlin April 19, 1882. After studying in Halle, Göttingen, and Berlin he became privat-docent in the University of Berlin in 1830, and assistant professor in 1837. In 1835 (Berlin) appeared his first important work, "Die Religion des Alten Testaments" (intended as part i. of a "Biblische Theologie"; but no more was published). After 1841 he published little; but his lectures on the Old Testament were edited after his death by H. Preiss under the title "Einleitung in das Alte Testament" (1886).

On the question of the origin of the Pentateuch, Vatke took the most advanced position, denying to Moses any share in the work, and regarding Deuteronomy as the earliest of the Pentateuchal books. He thus brought on himself the vigorous opposition of Hengstenberg; but his teaching exerted a lasting influence on a wide circle of hearers; and he is regarded as one of the predecessors of Graf, Kuenen, and Wellhausen.

T.

**VAV.** See **WAW.****VÁZSONYI, WILHELM:**

Hungarian publicist and deputy; born at Sümegh (Sümege) 1868. He was educated at Budapest, where his remarkable eloquence made him the leader of all student movements during his university career. After he had completed his studies the most vital social questions found in him an earnest investigator. He aroused a national sentiment against dueling, his success being proved by the numerous antidueling clubs in Hungary. Later he began a social and journalistic agitation in behalf of the official recognition of the Jewish religion, and kept the matter before the public until the law granting recognition was sanctioned (1895).

In 1894 Vázhsonyi founded the first democratic club in Budapest, and became a common councilor. In 1900 he established the political weekly "Uj Század"

(="The New Century") for the dissemination of democratic ideas throughout the country; and at the same time he organized democratic clubs in all the large Hungarian cities. In 1901 Vázsonyi was elected deputy for the sixth district of the capital, on a democratic platform, of which he is the only public representative in the Hungarian Parliament; and at the election of Jan. 26, 1905, he defeated Hieronymi, minister of commerce, as a candidate for the deputyship from his district.

Besides numbers of articles in the daily press, Vázsonyi has written the following works: "Oenkor-mányzat" (1890), on autonomy; "A Választási elv a Külföldi Közigazgatásban" (1891), on the principle of election in foreign governments; "A Szavazás Decentralizációja" (1892), on decentralization in voting; and "A Királyi Placetum a Magyar Alkotmányban" (1893), on the royal veto in the Hungarian constitution.

L. V.

**VECCHIO, DEL** (ד"ר ויקיין מאליקיא): Italian family, tracing its descent from the period of the destruction of the Second Temple. Some members of this family were called also מהקנים ("the old ones"). Its most important members were the following:

**Abraham ben Shabbethai del Vecchio**: Scholar of the seventeenth century; rabbi of Venice, Sassuolo, and Mantua. He was the author of the "Perush 'al ha-Ketubah," a work on marriage settlements. A commentary on this, entitled "Sheṭar Bi'urim," was in the possession of Joseph Almanzi. Abraham wrote also the "Sefer Zera' Abraham," on rituals, and a responsum included in the "Debar Shemuel" of Samuel Aboab (No. 19).

**Samuel ben Mahalaleel del Vecchio**: Rabbi of Ferrara in the sixteenth century. He was the author of "Tikḡunim" (or "Haggahot ha-RIF"), on Alfasi's commentary on the Talmud, and of a responsum included in the collection of Jehiel ben Azriel Trabot (No. 19).

**Shabbethai Elhanan ben Elisha del Vecchio** (SHaBA): Rabbi of the seventeenth and eighteenth centuries; officiated at Lago, Leghorn, Ancona, and Casale. He was the author of all those responsa in Lampronti's "Paḥad Yizḡaḡ" which bear the signature מלכת שבה; and he wrote also an approbation of that work. His correspondence with Morpurgo has been published in the latter's collection of responsa entitled "Shemesh Zedaḡah" (i., Nos. 15, 16; iv., No. 9), while his letters to Ḥayyim Joseph David Azulai are included in the latter's "Ḥayyim Sha'al" (i. 16). Shabbethai was also the author of the "Ir Miḡlaṡ," responsa on the Biblical commandments, and of the "Da'at Zeḡenim," a work on ethics. The latter work is mentioned in the "Paḥad Yizḡaḡ" (iv. 61b).

**Solomon David ben Moses del Vecchio**: Rabbi of Lugo; flourished in the latter part of the seventeenth and at the beginning of the eighteenth century. A responsum of his is printed in the "Paḥad Yizḡaḡ" (i. 33a) of Lampronti, with whom he was on terms of intimate friendship, although the two were engaged in a literary contro-

versy concerning the question of damage to property (*ib.* iii. 37a). Solomon was also the author of a responsum on phylacteries, which is included in Samson Morpurgo's "Shemesh Zedaḡah" (i., § 4), and of a responsum in Motalia Terni's "Sefat Emet" (p. 19).

**Solomon Moses del Vecchio**: Rabbi at Sinigaglia in the eighteenth century.

S. O.

**VECINHO (VIZINO), JOSEPH**: Portuguese court physician and scientist at the end of the fifteenth century. He was a pupil of Abraham Zacuto, under whom he studied mathematics and cosmography, on which latter subject he was regarded as an eminent authority by John II. of Portugal. He was sent by the king to the coast of Guinea, there to measure the altitude of the sun, doubtless by means of the astrolabe as improved by Jacob b. Maḡbir.

When, in 1484, Columbus laid before the king his plan for a western route to the Indies, it was submitted to a junta, or commission, consisting of the Bishop of Ceuta, "Mestre Josepe" (Joseph Vecinho), the court physician Rodrigo, a Jewish mathematician named Moses, and Martin Behaim. The junta finally decided against Columbus' plans; and when the matter came up before the council of state Pedro de Menezes opposed them also, basing his arguments upon Joseph Vecinho's criticisms. Columbus attributed the refusal of the Portuguese monarch to adopt his plans chiefly to "the Jew Joseph." Though Vecinho did not favor Columbus, the latter had personal intercourse with him, and obtained from him a translation of Zacuto's astronomical tables. Columbus carried this translation with him on his voyage, and found it extremely useful; it was found in his library after his death.

Joseph Vecinho's translation of Zacuto's tables was published by the Jewish printer Samuel d'Ortas in Leiria under the title "Almanach Perpetuum," 1496.

**VEGA, JOSEPH DE LA**. See PENSO, JOSEPH.

**VEGA, JUDAH**: Rabbi and author; flourished in the sixteenth and seventeenth centuries. Vega was the first rabbi of the second synagogue of Amsterdam, Neweh Shalom, which was established in 1608. After a short time he resigned his office, and in 1610 went to Constantinople, where he is said to have written a work entitled "Jazania" (?), which treated of the life of the Jewish people from the time of the second destruction of Jerusalem. Conforte confounds this Judah Vega with another person of the same name (not Bizo), who lived at the same time, and who went from Salonica to Safed, where he conducted a Talmudic school and where he died. Judah Vega was a good preacher and haggadist; his small collection of sermons, entitled "Malke Yehudah," appeared at Lublin in 1616.

M. K.

**VEGETARIANISM:** The theory according to which it is desirable to sustain the body with vegetables and fruits, and abstain from eating animal food or any product thereof. Rab said that Adam was prohibited from eating meat. "Dominion" in Gen. i. 28 is interpreted as the privilege of using the animals for labor only (Sabb. 59b). But after the Flood, when the animals were saved in Noah's ark, the right of consuming them was granted to man: "Every moving thing that liveth shall be meat for you; even as the green herb have I given you all things" (Gen. ix. 3). The only restriction was in the case of "flesh with the life thereof"; that is, flesh might not be taken for food from a living animal. Moses could with difficulty restrain the craving of the Israelites for the "flesh pots" of Egypt (Ex. xvi. 3). The manna, as a heavenly diet, could not satisfy them, and therefore Moses appointed a flesh meal for the evening (Yoma 75b). Again, the rabble among them "fell a lusting" and demanded more meat (Num. xi. 4). They were then supplied plentifully with quails from the sea, which caused an epidemic (Num. xi. 31-34; comp. Ps. lxxviii. 25-31). Moses limited the eating of flesh to certain kinds of animals, prohibiting those that were unclean (Lev. xi. 1-47). After the occupation of Palestine permission was given those who were too far from the Temple to eat the flesh of any clean animal that had been properly slaughtered (Deut. xii. 21). This is called "basar ta'avah" (= "meat of desire," or "meat of luxury"), meat not being considered a necessary of life. Daniel and his comrades were given pulse and water, and yet appeared in better health than those who were nourished with the king's meat and wine (Dan. i. 5-16). The prophet pictured a future when "the lion shall eat straw like the ox" (Isa. xi. 7). Isaac Abravanel, commenting on this passage, says that cruelty and ferocity are engendered in the animal that eats meat.

The Rabbis objected to meat-eating rather from an economic than from a moral standpoint. The advice of R. Judah ben Ilai was: "Sit in the shade and eat onions; but do not eat geese and

**Rabbinic Views.** chickens, though thy heart may crave them" (Pes. 114a). A popular proverb in Palestine ran: "He who eats fat tails ["alita"] will be compelled to hide [from creditors] in the attic ["alita"]; but he who eats vegetables ["ka'kule"] may rest quietly on the bank of the river ["kikele"]" (*ib.*). The Rabbis, referring to Deut. xiv. 26, said, "The Torah teaches a lesson in moral conduct, that man shall not eat meat unless he has a special craving for it, and shall eat it only occasionally and sparingly." R. Eleazar b. Azariah thought that a man who is worth one maneh should provide his table with a pound of vegetables; ten manehs, with a pound of fish; fifty manehs, with a pound of meat; if he is worth 100 manehs, he may have a pot of meat every day. Rab followed the regulation of this tanna. R. Johanan, however, remarked that Rab came from a healthy family, but that people like himself must spend the last

peruta to purchase the best nourishment (Hul. 84a). Because he did not eat ox-meat in the evening R. Nahman was not in a condition to render a correct decision to Raba until next morning (B. K. 72a). On Sabbaths and holy days fish and meat furnished the daintiest morsels. R. Abba spent every Friday thirteen silver coins at thirteen different butchers' shops in order to get the best meats in honor of Queen Sabbath (Shab. 119a). Rabbi, however, would prohibit an "am ha-arez" from eating meat, quoting, "This is the law of the beasts, . . . that may be eaten," etc. (Lev. x. 46-47); one who is studying the Law may eat meat, but an ignoramus may not (Pes. 49b).

The modern question of vegetarianism is probably first discussed by I. B. Levinsohn, who justifies the strictness of the rules of "terefah" on this account, and attributes the longevity of the generations from Adam to Noah to their vegetarian diet. The good morals and keen intellect of the Jews, he says, are largely due to their scant eating of meat ("Zerubbabel," iv., § 51). Dr. J. Kaminer, on the other hand, claims that the scarcity of meat among the Jews is directly responsible for many diseases peculiar to them; and he blames the exorbitant price of meat, due to the special Jewish meat-tax ("Seder Kapparot le-Ba'ale Ta'asi," p. 77, note, Warsaw, 1878).

The principal reasons for upholding the theory of vegetarianism are summed up in an article by S. Rubin in connection with the prohibition of cruelty to animals (in Zederbaum, "Meliz Ehad Minni-Elef," St. Petersburg, 1884).

An ardent advocate of vegetarianism was Aaron H. Frankel (b. Dec. 6, 1862, at Suwalki, Russia; d. Oct. 31, 1904, Brooklyn, N. Y.), who adopted a strict vegetarian diet and endeavored to organize vegetarian clubs. He expounded his theories in an English essay, "Thou Shalt Not Kill, or, the Torah of Vegetarianism" (p. 85, New York, 1896); and in order to arouse the interest of the Jewish masses and gain adherents he translated his essay into Yiddish under the title "Lo Tirzah," adding chapters from time to time until he produced four large pamphlets on the subject. As a text for his work he took "He that killeth an ox is as if he slew a man" (Isa. lxvi. 3).

J. D. E.

**VEIGELSBURG, LEO:** Hungarian publicist; born at Nagy-Boldogasszony Jan. 18, 1846; educated at Kis-Körös, Budapest, and Vienna. For a short time he taught in the Jewish public school in Kecskemet, where he wrote noteworthy political articles for several newspapers, especially the "Politik" of Prague; in 1867 he became a member of the editorial staff of the "Neuer Freier Lloyd," and since 1872 he has been editor-in-chief of the "Pester Lloyd." His political leaders, usually signed with two asterisks, always attracted great attention; and his services as a publicist were recognized by Francis Joseph I., who conferred upon him the decoration of the Order of the Iron Crown (3d class) on July 9, 1904.

Veigelsberg's son **Hugo**, born at Budapest Nov. 2, 1869, and educated at Kis-Körös, Kecskemet, Eperjes, and Budapest, is one of the most important

authors of the younger generation, being distinguished for the lyric individuality of his poems, stories, and sociological works. He usually writes under one of the pseudonyms "Dixi," "Pató Pál," "Tar Lörincz," and "Ignotus." He has published: "A Slemil Keservei" (1891), "Versek" (1894), "Vallo-mások" (1900), and "Végzet," a translation of a novel by the Dutch author Couperus.

**VEIL:** A cover for the face; a disguise. From the earliest times it has been a sign of chastity and decency in married women to cover their faces with veils in the presence of strangers. This custom is still in vogue in the Orient. The putting on of the veil marked the transition from girlhood to womanhood. Rebekah, the bride, covered herself with a veil on meeting Isaac, the groom (Gen. xxiv. 65). A widow did not wear a veil (*ib.* xxxviii. 19). The custom of dressing the virgin bride with a veil is mentioned in the Mishnah; covered with a veil ("hinuma") and seated on a litter, she was carried in the wedding-procession from her father's house to the nuptial ceremony (Ket. ii. 1). In modern times the bride is "covered" with a veil in her chamber in the presence of the groom, just before they are led under the canopy. In some countries the groom, and in others the rabbi, performs the ceremony of covering the bride.

Moses, when speaking to the people after he had come down from Mount Sinai, covered his face with a veil as his skin shone so brightly that the people feared to come nigh him (Ex. xxxiv. 29-35).

The veil was used as a disguise by Tamar to mislead Judah (Gen. xxxviii. 14). The prophet "disguised himself with his headband over his eyes" (i Kings xx. 38, R. V.).

**VEIT, JOHANNES:** German painter; born in Berlin 1790; died at Rome 1854. He studied at Vienna and at Rome, where he especially took Vanucci for his model. Together with his brother Philipp Veit he joined the neo-German school, but distinguished himself by his superior coloring. He painted an altar-piece for the cathedral at Liége and an "Adoration of the Shepherds" for a Catholic church at Berlin, as well as several famous portraits of the Madonna.

F. C.

**VEIT, PHILIPP:** German portrait- and genre-painter; born Feb. 13, 1793, in Berlin; died Dec. 18, 1877, at Mayence. His father died while he was a child; and his mother, who was a daughter of Moses MENDELSSOHN, married Friedrich von Schlegel, who had the boy baptized.

The early part of his youth Veit spent at his step-father's home in Paris, but he was later sent to Dresden, where he studied under Friedrich Matthäi. He completed his education in Vienna, and in 1813 entered the army, taking part in the Napoleonic wars. He fought at Dresden, Kulm, and Leipsic, and was decorated with the Iron Cross for bravery in battle.

In 1815 he went to Rome, where he remained till 1830 and where he became identified with the neo-German religious school, joining Cornelius, Von Schadow, and Overbeck, together with whom he painted many important frescos; of these may be mentioned "Joseph with Potiphar's Wife" and "The Seven Fat Years" for the Casa Bartholdy, and "The Triumph of Religion" in the Vatican gallery. In Rome he painted also several subjects from Dante's "Divina Commedia" for the Villa Massimi, and a "Mary in Glory" for Santa Trinità de' Monti.

Returning to Germany in 1830, Veit became director of the Städel Institute in Frankfort-on-the-Main. For this institute he painted the following large canvases: "The Triumph of Christianity," "The Introduction of Art into Germany by Christianity," "Italia," and "Germania." The last-named, which is an allegorical picture representing Germany as a young matron, did more than any of his other paintings toward establishing his reputation.

Veit resigned the directorate of the Städel Institute in 1843, and settled in Sachsenhausen, where he painted his "Assumption of the Virgin" for the cathedral at Frankfort, and also several pictures for King Frederick William IV. In 1853 he was elected director of the Gallery of Art in Mayence. Here he designed for the cathedral a cycle of frescos, which were executed by his pupils, being completed in 1868.

Of Veit's other paintings the following may be mentioned: "St. George" (for the church at Bensheim); "The Marys at the Sepulcher" (Berlin National Gallery); "The Ascension of Christ" (1846; cathedral, Frankfort-on-the-Main); "Madonna" (Darmstadt Gallery of Art); "Christ" (cathedral of Naumburg).

Veit painted also for the Römersaal in Frankfort-on-the-Main several portraits of emperors of the Middle Ages, of which may be mentioned: "Charlemagne," "Otto IV.," and "Friedrich II."

To the "Vereinsschrift der Görres-Gesellschaft" he contributed "Zehn Vorträge über Kunst" (Cologne, 1891).

**VEITEL, EPHRAIM.** See HEINE, HEINRICH.

**VELLUM:** Skins of animals constituted the ancient Oriental writing-material (Herodotus, v. 58; Strabo, xv. 1; Pauly-Wissowa, "Real-Encyc." ii. 944), and the Jews employed them as early as the Biblical period (Blau, "Das Althebräische Buchwesen," pp. 12-15), attaining great proficiency in their preparation (Letter of Aristeas, §§ 176-179). The Talmud was acquainted with three varieties, leather, parchment, and "doksostos," the last apparently a parchment obtained by scraping both sides of the skin (Blau, *l.c.* p. 28); in the case of leather the outside of the hide formed the writing-surface; in the case of parchment, the inside (Yer. Meg. 71a). The skins of domestic and of wild animals alike were used, although only those which were ritually clean might be chosen. The skins of fishes and birds were

likewise prepared (Yer. Shab. 14c; Kelim 10; Blau, *l.c.* pp. 92 *et seq.*), but were not used for books. The most frequent writing-material was formed from the hide of the deer, although only half the skin was used (Blau, *l.c.* pp. 17, 30). While scrolls of the Law might be written on parchment (Yer. Meg. 71a, d; B. B. 14a, top), entire skins were the usual material, these being consequently of leather and called "gevil" (Blau, *l.c.* pp. 24-26). Parchment books are mentioned by Paul (II Tim. iv. 13), this phrase designating Greek manuscripts of Biblical writings on parchment ("Berliner Festschrift," p. 44). The Codex Sinaiticus of the fourth century is written on the skin of an antelope, and it is not impossible that the "Hexapla" of Origen was likewise inscribed on leather or parchment (Blau, *l.c.* pp. 45-47). The scribes manufactured their vellum themselves, and it formed an article of trade (Git. 60a. Sanh. 28b). Babylonians were preeminent in the art of preparing leather (Meg. 17a, 19a), and doubtless displayed equal skill in the manufacture of leather and parchment for writing.

The distinctive writing-material of the ancient Hebrews was parchment, which alone may be used for the scrolls of the Law even at the present day; and parchment manuscripts which still exist show that this material continued to be employed after paper had come into general use for other purposes. References to examples of parchment and manuscript are given in JEW. ENCYC. viii. 905, *s. v.* MANUSCRIPTS, where the fact is also noted that the finest material came from Italy and Spain.

The statement is frequently made that the German Jews furnished parchment for the imperial chancery, and that when Charles IV. pawned the Jews of Frankfort to the citizens of that place, he reserved for himself and his descendants the right of obtaining parchment for the chancery from them. In 1354 a certain Smogil Perminter ("parchment-maker") is mentioned (Wattenbach, "Schriftwesen des Mittelalters," 3d ed., p. 131), and in the sixteenth century Moses Isserles declares that "our parchment is better for the preparation of scrolls of the Law than the leather ["gevil"] of the ancients." Books were printed on parchment, and phylacteries and mezuzot were made out of strips of parchment. Amulets were written on the same material; and medieval and modern cabalistic and magic writings contain directions for writing on parchment, with such added statements as that "it must be virginal." Colored parchment is not mentioned in the Talmud or Midrash, although the statement is made that parchment becomes black with age. See MANUSCRIPTS; SCROLL OF THE LAW.

**VENDOR AND PURCHASER.** See SALE.

**VENETIANER, LUDWIG:** Hungarian rabbi and writer; born May 19, 1867, at Kecskemet. He studied at the rabbinical seminary and the University of Budapest, and at the Jewish Theological Seminary and the University of Breslau, 1888-89 (Ph.D. 1890, Budapest). Receiving his diploma as rabbi from the seminary of Budapest in 1892, he officiated as rabbi at Somogy-Csurgo from that year to 1895, holding at the same time the chair of Hun-

garian and German literatures at the Evangelical Reform Gymnasium of that city. In 1895 he was called to the rabbinate of Lugos, and in the following year to that of Ujpest near Budapest.

Venetianer is the author of: "A Fokozatok Könyve," on the sources of Shem-Tob ibn Falaquera (Szegedin, 1890); "A Felebaráti Szeretet a Zsidó Ethikában," on charity in Jewish ethics (Budapest, 1891); "Das Buch der Grade von Schemtoth ibn Falaquera" (Berlin, 1894); "Die Eleusinischen Mythen im Jerusalemischen Tempel" (Frankfort-on-the-Main, 1897); "A Héber-Magyar Oesszehasonlító Nyelvészeti," a history of Hebrew-Hungarian philology (Budapest, 1898); "A Zsidóság Szervezete az Európai Államokban," a history of the Jewish communal constitution in Europe (*ib.* 1901); "A Magyar Zsidóság Szervezetéről," a work treating of the organization of the Jews in Hungary (*ib.* 1903); "A Zsidóság Eszméi és Tanai," a treatise on the conceptions and doctrines of Judaism (*ib.* 1904). He has also contributed numerous articles to periodicals, including "Egyenlőség," "Társadalmi Lapok," "Jahrbuch des Literaturvereins," "Pesti Napló," "Magyar Zsidó Szemle," "Orientalistische Literaturzeitung," "Ethnographia," and "Bloch's Festschrift" (supplement to the "Oesterreichische Wochenschrift"); and he has published some sermons in Hungarian.

**VENEZIANI, EMMANUEL FELIX:** French philanthropist; born at Leghorn in 1825; died at Paris Feb. 5, 1889. At an early age he went to Constantinople, where he became the manager of the Banque Camondo and president of the committee of the Alliance Israélite Universelle; but after the close of the Franco-German war he went to Paris and became the associate of Baron Maurice de Hirsch in his philanthropic plans. In 1877 Veneziani traveled through Turkey and Bulgaria to relieve, without regard to creed, the distress of the poor who were suffering from the rigors of the Russo-Turkish war; and for his services he was rewarded with a commandership of the Order of the Nishan-i-Medjidie. In the following year, with Charles Netter and Sacki Kann, he went to the Berlin Congress to plead the cause of religious liberty, and in 1880 he and Netter made a similar plea for the Jews of Morocco at the Madrid Congress. Two years later he and Netter were sent by the Alliance to Brody to assist the Russian Jews and to aid them to emigrate, a million francs being set aside by the society, at his instance, for this purpose. On his election to the central committee of the Alliance in 1883, Veneziani made a tour of the Jewish colonies of Palestine, and it was decided, on his representation, to check the Russian emigration to that country. He made repeated visits to Vienna also, where he devoted himself to making the plans and laying the foundation of a charitable institution erected at the expense of Baron de Hirsch. Despite the shock resulting from the death of his son in 1882, Veneziani continued his activities to the last, dying only a few days after returning from a journey to Vienna.

**VENICE:** Italian city; formerly capital of a republic embracing northeastern Italy and some islands in the Mediterranean. The first Venetian document, so far as known, in which Jews are mentioned is a decree of the Senate, dated 945, prohibiting captains of ships sailing in Oriental waters from taking on board Jews or other merchants—a protectionist measure which was hardly ever enforced. According to a census of the city said to have been taken in 1152 (Galliccioli, "Memoria Antiche Venete," ii. 279), the Jews then in Venice numbered 1,300, an estimate which Galliccioli himself believes to be excessive. An event which must have increased the number of Jews in Venice was the conquest of Constantinople by the allied Venetians and French in 1204, when the former took possession of several islands in the Levant, including Eubœa, where the Jews were numerous. At that time Jewish merchants went to Venice for the transaction of business, and some of them settled there permanently.

The first lasting settlement of Jews was not in the city itself, but on the neighboring island of Spinalunga, which was called "Giudeca" in a document dated 1252. For some unknown reason this island was afterward abandoned. For several centuries the ruins of two ancient synagogues were to be seen there (comp. Ravà in "Educatore Israelitico," 1871, p. 47). At the beginning of the thirteenth century many Jews went to Venice from Germany, some seeking refuge from persecution, others attracted by the commercial advantages of this important seaport. A decree of the Senate, dated 1290,

imposed upon the Jews of Venice a duty of 5 per cent on both imports and exports (Galliccioli, *l.c.* ii. 280). **Early Jewish Settlement.** R. Simeon Luzzatto (1580-1663) speaks in his noteworthy "Discorso Circa il Stato degli Ebrei di Venetia" (p. 18) of the Jew who was instrumental in bringing the commerce of the Levant to Venice.

An ordinance of 1541, issued by the Senate on the advice of the Board of Commerce, to provide Jewish merchants with storehouses within the precincts of the ghetto, observes that "the greater part of the commerce coming from Upper and Lower Rumania is controlled by itinerant Jewish Levantine merchants" (Schiavi, "Gli Ebrei in Venezia e nelle Sue Colonie," p. 493). When the "Cattaveri" were commissioned in 1688 to compile new laws for the Jews, the Senate demanded that "the utmost encouragement possible should be given to those nations [referring to the various sections into which the whole Jewish community was divided] for the sake of the important advantages which will thus accrue to our customs duties" (comp. Ravà, *l.c.* 1871, p. 334).

Besides engaging in commerce, the Jews conducted loan-banks; and in the ancient decrees of the Senate in regard to them it is repeatedly declared that the operation of these banks, which was prohibited by the canonical law, was the chief reason for admitting Jews into Venice. Therefore, in deference to some remnant of scruple, it was ordained, at least at first,

that contracts relative to these transactions should not be drawn up in the city itself, but in the neighboring Mestre (Galliccioli, *l.c.* ii. 281). The interest on the loans was at first fixed by a decree of 1366 at 4 per cent, but it was raised afterward to 10 or 12 per cent, according to whether the loans were made on substantial security or on written obligations. The original object of these banks was solely to help the poor, but it soon became evident that it was neces-

The Ghetto, Venice.  
(From a photograph.)

sary to provide for greater loans, some of which were made to the government itself. These banks, as well as Jewish affairs in general, were placed under the surveillance of special magistrates whose titles varied according to the times, as "consoli," "sopraconsoli," "provveditori," "sopraprovveditori," etc. (see Soave in "Corriere Israelitico," 1879, p. 56).

Despite all this, however, the right of the Jews to reside in Venice always remained precarious. Their

(From Martin Zeiler, "Itineraria Italiae.")

legal position was not regulated by law, but was determined, as in the case of other foreign colonies, by "condotte" (safe-conducts) granted for terms of years, and the renewal of which was sometimes refused (Lattes, in "Venezia e le Sue Lagune," vol. i., p. ii., Appendix, p. 177). The Jews, indeed, were twice expelled and compelled to retire to Mestre.

The first "condotta" for the Jews seems to have been issued in 1373; as a rule the duration of the condotte ranged between five and ten years. At one of the renewals, made in 1385, an annual tax of 4,000 ducats was imposed on them, but in compensation they were relieved from all other taxes except customs duties. In 1394 the

**First** Senate, alleging that the Jews had not  
**"Condotta"** observed the legal regulations in their  
**for the** loan transactions, and that if these contin-  
**Jews.** ued all the movable property in

Venice would pass into their hands, ordained that at the expiration of the current permit, in 1396, they should leave the city. When that date arrived they actually retired to Mestre (Galliccioli, *l.c.* ii. 282); but in the course of the same year, in view of the damage which resulted from their absence, the Senate recalled them (Ravà, *l.c.* 1871, p. 48). They were, however, not permitted to remain in Venice more than fifteen days at a time, and were obliged to wear on their breasts a distinguishing sign in the form of a round piece of yellow cloth, for which a yellow cap was later substituted, and still later a red cap. This odious regulation, although the degree of its observance varied at different times, and exceptions to it were permitted, continued in force for about two centuries, until advancing civilization did away with it; Galliccioli, writing at the end of the seventeenth century, says that in his day all such distinctions had ceased.

The restriction to fifteen days' residence does not seem to have been enforced long; being an isolated measure, it soon came to be disregarded. A decree of the year 1423 forbade all Jews of Venice to hold real estate ("pro Dei reverentia et pro utilitate et comodo locorum"; Galliccioli, *l.c.* ii. 291). Other repressive measures followed in 1434. The order to wear the badge, then little observed, was enforced with severity. Schools for games, singing, dancing, and other accomplishments ("di qualsiasi dottrina") were prohibited, and all association with Christian women was still more sternly forbidden (Ravà, *l.c.* 1871, p. 48). The practise of any of the higher professions was also forbidden, excepting that of medicine, which, notwithstanding various bulls prohibiting the treatment of Christians by Jews (Galliccioli, *l.c.* ii. 290), was always followed by the latter with credit. Other prohibitions followed; and in 1566 tailoring was specially included among the forbidden trades, "in order that Christian artisans may not be injured." For the same reason internal commerce was prohibited to the Jews, with the exception of the so-called "strazzaria," the trade in cast-off clothes (Ravà, *l.c.* 1871, p. 174).

It is noteworthy that despite all these restrictions the economic condition of the Jews in Venice was on the whole prosperous, which proves that in general the laws were by no means enforced to the letter. In 1386 Corfu submitted to Venice, and one of

the embassy charged with arranging the terms of the surrender was a Jew, who obtained for his coreligionists on the island privileges which were always faithfully observed; the Jews in their turn always gave proofs of their sincere devotion to the republic, winning from the commanders of the Venetian troops high praise for their valor in the frequent wars against the Turks (Schiavi, *l.c.* p. 487).

In the second half of the fifteenth century the Jews of the entire republic were menaced by the clerical agitation against Jewish money-lenders (see *JEW. ENCYC.* vii. 4, *s.v.* ITALY; x. 88, *s.v.* PLEDGES); and some cities of the mainland, terrorized by this agitation, requested permission of the Senate to expel the Jews. Cardinal Bessarione, when questioned on this subject by the Senate, replied that they might be tolerated "if the proper caution were observed," and the request was accordingly denied. Nevertheless a few cities persisted in their demands for the banishment of the Jews; and in the course of a few years some expulsions took place, as at Brescia (1463), Vicenza (1476), and Bergamo and Treviso (1479).

A much more serious fate befell the Jews of Trent when the monk BERNARDINUS OF FELTRE accused them of the murder of a Christian child (1475). Although the Doge of Venice, Mocenigo, issued a strong manifesto for the protection of the Jews, he could not prevent a similar trial for ritual murder from taking place in Venice itself a few years later, attended by the same atrocious methods of procedure. There was, however, one note-

**Blood** worthy point of difference: the whole  
**Accusation.** trial was conducted as if for an individual crime, and the number of the victims was confined to the accused (Ciscato, "Gli Ebrei in Padova," p. 136).

The expulsion of the Jews from Spain (1492) and Portugal (1496) brought many exiles to Venice, and among them came, after many peregrinations, the celebrated Isaac Abravanel, who, during his residence in Venice, had occasion to use his diplomatic skill in settling certain difficulties between the republic and the King of Portugal (Grätz, "Gesch." ix. 9).

Times of peril now followed for the republic. In 1508 the famous League of Cambray was formed against it, in which nearly all the states of Europe, including Austria, France, Spain, the Papal States, and Naples, united. The common danger had the effect of relaxing the enforcement of the anti-Jewish laws and of drawing Jews and Christians together in more friendly relations. But peace was hardly concluded (1516) when the old policy was revived, and the better to insure the separation of Jews and Christians the institution of the ghetto was introduced. Venice thus became the mother of this institution. The decree which the Senate issued in regard to it referred to a decree of 1385; and this in turn referred to a still earlier decree which had not been carried out (Schiavi, *l.c.* p. 322). According to Galliccioli (*l.c.* ii. 301), however, all the Jews could not find homes in the ghetto, and many were obliged to live outside. Synagogues, formerly scattered throughout the city, were now permitted only in Mestre, but before long a new concession allowed

them in Venice again, though only in the ghetto. At the same time, while Venice acquired the unenviable reputation of having introduced the ghetto, it became a potent factor in the spiritual life of Judaism through the famous printing establishment of Daniel Bomberg, which published the most important works of rabbinical literature. In the later years of Bomberg's life other presses competed with him, as many as four existing in Venice at one time.

In 1553, however, the proscription of Hebrew literature by the Inquisition began, and all copies of the Talmud which could be found in Rome, Venice, Padua, and other cities were confiscated and burned.

In 1527 another expulsion took place, although it probably affected only the money-lenders, who withdrew to Mestre, but were permitted to return to Venice for the time necessary to sell their pledges. In 1534 they were recalled, and this time the Jews organized themselves into a corporation called "Universit ." Since each man wished to preserve his own nationality according to the country from which he came, the Universit  was divided into three national sections, Levantines, Germans, and Occidentals, the last name being applied to those who came from Spain and Portugal. The administration of the whole Universit  was in the hands of a coun-

RIO E PONTE DELLE GUGLIE, SHOWING HIGH HOUSES OF MODERN GHETTO.

(From a photograph.)

Later the prohibition was somewhat relaxed, though LEON OF MODENA, in his "Historia dei Riti Ebraici" (p. 38, Venice, 1638), declares: "To-day it [the Talmud] remains prohibited; and in Italy particularly it is neither seen nor read." In 1566 the Senate forbade the printing of Hebrew books; but either the prohibition affected Jews only or the

**The** decree was soon revoked, for Hebrew printing in Venice continued uninterrupted or was resumed after a short interval, and many new works were published. Although these always appeared under the names of Venetian nobles as editors, the connection of the latter with such works ended there.

cil of seven members, three chosen from the Levantines, three from the Germans, and one from the Occidentals. Many laws were passed, furthermore, to regulate the whole internal administration of the community. According to Schiavi, an internal tribunal was also established to adjudicate both civil and criminal suits; but later on the Council of Ten limited its powers to civil suits, and in these it could act only when the parties appealed to it (Schiavi, *l.c.* p. 329).

The most powerful weapon of which the heads of the community could avail themselves was that of excommunication, although it appears that legally at least the exercise of it was not left wholly in Jewish hands. Galliccioli records at length a successful

appeal presented to the Patriarch of Venice by the heads of the Università, for permission to excommunicate those living in the ghetto who neglected their religious duties; and the author adds that the right to give this authority had been in the hands of the patriarch until 1671, when it passed to the "Cattaveri" (Galliccioli, *l.c.* ii. 301). It does not appear, however, from any subsequent documents that the Jews held strictly to this dependence.

Schools for study were naturally among the most important institutions of Jewish life in Venice at all times. In addition to Hebrew, secular branches of study were taught in them (Schiavi, *l.c.* p. 332). Although nominally restricted to the ghetto, the Jews lived in general throughout the city, and in the sixteenth century, when the vice of gambling raged in Venice, the ghetto also was infected, while Jews and Christians often played together. Although the government had already imposed penalties upon gambling, the heads of the Università saw that the measure remained ineffective, and they therefore pronounced excommunications in the synagogue against those who played certain games. Excommunication failed in its turn; and Leon of Modena, whose reputation was seriously stained because of his addiction to this vice, wrote a long protest against his own excommunication, which he declared illegal; the ban, he said, only drove people to worse sins. In all his long discussion there is no sign of the fact that the pronouncing

**Prevalence of** the excommunication was dependent on any but the Jews themselves.

**Gambling.** It appears from the disquisition of Leon of Modena that the number of

Jews then in Venice was little more than 2,000. This agrees with other data of the time, so that it seems necessary to reject the number 6,000 given for that period in Luzzatto's "Discorso Circa il Stato degli Ebrei di Venetia." In 1659, according to an official census, their number had increased to 4,860 (Schiavi, *l.c.* p. 507). The struggle against gaming continued, and, in addition, regulations intended to check unnecessary luxury in dress and excessive display in banquets and family festivals were repeatedly published in the synagogue.

Among the various societies of the period there was in Venice, as probably in the majority of Jewish communities, one for the ransom of Jews who had been enslaved. Venice and Amsterdam were the two principal centers for the relief of such unfortunates, and consequently the societies of other communities as a rule made their headquarters in these two cities. Venice and Amsterdam, by mutual consent, divided the field of their activities. On the former devolved the task of effecting the ransom of those Jews who had sailed in Turkish ships from Constantinople and other Oriental ports, and had fallen into the hands of the Knights of St. John, who waged a fierce and continual warfare against such ships. The Jews taken captive in these frequent attacks were held in Malta in hope of a heavy ransom, and were most barbarously treated. The society at Venice had a permanent Christian delegate on the island, with the recognized title of consul, whose duty it was to alleviate the lot of the wretched captives as far as possible and

to conduct negotiations for their ransom (Soave, "Malta e gli Schiavi Ebrei," in "Corriere Israelitico," xvii. 54 *et seq.*).

In 1571, after the battle of Lepanto, in which the Venetians and Spaniards conquered the Turks in the contest for the island of Cyprus, the danger of expulsion again threatened the Jews of Venice. During this war much ill feeling had arisen in Venice against the Jews because one of their coreligionists, Joseph NAsI, was said to have suggested the war, and many Venetians suspected that the Jews of the city had sympathized with him. It was in consequence of this ill feeling, doubtless, that the Senate, in the first transports of its joy over the victory,

issued a harsh decree in which, to **Joseph Nasi.** show a proper gratitude to God for so great a victory, in which "they had conquered the enemies of His Holy Faith, as were the Jews also," it was ordained that in two years, on the expiration of the "condotta," all Jews should leave the city, never to return (Ravà, *l.c.* 1871, p. 176). This decree, however, was entirely revoked, either as a result of reflection or in deference to some powerful intervention.

In 1572 Sultan Salim II. sent the rabbi Solomon Ashkenazi, who, both as a physician and as a statesman, possessed great influence with the Divan, as a special ambassador to the Senate, charged with a secret mission to conclude an offensive and defensive alliance between the two states against Spain (Grätz, "Gesch." ix., note 7). The Senate received him with all the honors due the ambassador of a great power, and, although it did not accede to his proposals, it sent him back with presents. Ashkenazi availed himself of this opportunity to defend the cause of his coreligionists, and he seems to have obtained not only the revocation of the decree of expulsion, but also the promise that such expulsions should never again be proposed (Grätz, *l.c.* ix. 416).

An event, in itself of minor importance, yet noteworthy as one of the results of the great agitation aroused throughout the Jewish world by the Messianic claims of Shabbethai Zebi, was the brief stay in Venice of the visionary Nathan GHAZZATI. Even after the apostasy of Shabbethai Zebi had opened the eyes of the majority and calmed the excitement, Nathan continued to believe in him, or pretended to do so. He claimed to have had celestial visions, and proclaimed himself the prophet Elijah, the precursor of the Messiah, thus endeavoring to inflame the popular mind anew and revive the old excitement. Driven from Salonica and other cities, he went to Venice in 1668, where, in view of the credulity of the times, his presence might have been dangerous. Scarcely was his arrival known to the rabbis and heads of the Università when they called him before their tribunal and made him sign a document confessing the falsity of his claims to have had celestial visions, and denying that Shabbethai was the Messiah. This done, they warned him to leave at once and had him escorted to the frontier (Ravà, *l.c.* 1871, p. 307; Samuel Aboab, "Debar Shemuel," responsum No. 375, Venice, 1702).

While the administration of the Venetian republic

INTERIOR OF THE SYNAGOGUE, VENICE.  
(From a photograph.)

was always under papal influence, a spirit of comparative tolerance prevailed there, as is usual in maritime and commercial cities, and the Jews, like all others, were free from restrictions in their worship. Well organized and strong, the republic always maintained order and fulfilled its compacts faithfully. The "condotte" were religiously observed, and the lives and property of Jews were protected. Local outbreaks against the Jews were of rare occurrence and were quickly followed by exemplary punishments (Osimo, "Narrazione della Strage Compita Contra gli Ebrei d' Asolo," Padua, 1875). The Inquisition existed at Venice, although it was not admitted until 1279, after long opposition; but its jurisdiction extended only over Christian heretics, and even over them its power was much restricted. In 1570 the inquisitors of Padua wished to compel the Jews to attend sermons in their churches. On this occasion the Senate recalled them to their proper province, but it appears that they succeeded at some later time, for the greater part of a sermon which was preached to the Jews in one of the churches in Padua in 1715 is still preserved (Ciscato, *l.c.* pp. 140-141). At all events, continual contact in daily life often led naturally to friendly relations between Jews and Christians, and the government was enlightened enough to encourage them. In 1553 the council granted Kalonymus, a Jewish physician, the means necessary to keep his son at his studies, "so that he may become a man useful in the service of this illustrious city" (Romanin, "Storia Documentata di Venezia," v. 337, note 3).

In the great financial stress in which the republic was placed during the long and expensive war with the Turks the Jews were obliged to pay heavy taxes. Nevertheless, their contributions, like those of the other citizens, were often spontaneous; and the names of the bankers Anselmo and Abramo, who had voluntarily contributed 1,000 ducats, with those of other contributors, were inscribed in a book of parchment "in everlasting remembrance" (Schiavi, *l.c.* p. 320). Most important of all, however, was the activity of the Jews in maritime commerce; in 1579, in the interest of this commerce, permission was extended to many Jews of Spanish and Portuguese extraction to remove from Dalmatia to Venice, where they received privileges which were obtained for them by their coreligionist Daniel Rodriguez, who was then Venetian consul in Dalmatia, and who was highly esteemed by the republic for his important services in furthering its commerce in the Orient (Ravà, *l.c.* 1871, p. 176).

Naturally, this maritime commerce continued to be favored by the government; and in 1686 the Portuguese Aronne Uziel was the first to obtain a patent for free commerce under the Venetian flag in the Orient and Occident. He was one of the first shipowners of the republic; he traded with Zante, Cephalonia, Corfu, and Constantinople; and his business was so great that in twenty years he paid 451,000 ducats to Venice in duties (Schiavi, *l.c.* p. 514). Among other Jewish shipowners one of the most important was Abramo Franco, whose duty it was to provide for the loading of six merchantmen (*ib.*). To come down to more recent times, special mention should be made in this connection of the two

brothers Baron Giuseppe Treves dei Bonfil, the ancestor of the present barons of that name, and Isaaco Treves, on account of the expedition which they undertook for the first time into the western hemisphere. They sailed under the Venetian flag with a cargo of flour and other goods, returning with coffee and sugar (Soave, in "Il Vessillo Israelitico," 1878, p. 115). Giuseppe Treves received the title of baron from Napoleon I. on account of his great services to the city, both commercially and otherwise (Maratti, "Venezia ed i Veneziani," iv. 256).

Domestic trade continued to be limited legally to second-hand goods, but as a matter of fact this nominal restriction counted for little, and with the growth of the city liberty of trade grew also. In the shops of the ghetto wares of all sorts were sold, among them glass, decorated crystal, gold ornaments, tapestries, embroideries, and books (Schiavi,

Title-Page of a Ritual Used by the Jewish Community of Tripoli, Printed at Venice 1680. (From the Sulzberger collection in the Jewish Theological Seminary of America.)

*l.c.* p. 506). A trade of special importance, against which ineffectual prohibitions were several times issued, was that in precious stones; the sovereigns of Europe were the first to employ Jews for selling, buying, and exchanging gems (*ib.*). Jews were prominent also in engineering. In 1444 a decree of the Senate called "a certain Solomon, a Hebrew by race, to be present at conferences concerning the diversion of the Brenta, because he has great fame for skill in matters concerning water" (Zendrini, "Memorie dello Stato Antico e Moderno delle Lagune di Venezia," i. 102, Padua, 1811).

In 1490 an engineer, wishing to associate himself with some Jews in the mounting of a machine which

he had invented, asked the Senate whether the laws concerning the granting of privileges to inventors were applicable to Jews as well as to others. To this the Senate replied that in such matters no distinction was made between Venetians and foreigners, between Jews and Christians (Romanin, *l.c.* v. 337, note C). One Zarfati, in the second half of the sixteenth century, invented certain improvements in the methods of silk-weaving, and his studies were published at Rome and obtained for him a privilege from Pope Sixtus V. (Schiavi, *l.c.* p. 504). In 1630 a certain Nahman Judah obtained permission to manufacture cinnabar, sublimate, and similar compounds, on condition that the business should be carried on under the name of a Christian (Schiavi, *l.c.* p. 505). In 1718 another Zarfati was permitted to manufacture not only cinnabar and sublimate, but also aqua fortis, white lead, minium, etc. (*ib.*).

Under the restrictions placed upon them Jews could not contribute much to general literature; mention must be made nevertheless of the grammarian Elijah LEVITA, who spent a great part of his life in Venice (Ravà, *l.c.* 1871, p. 335; Grätz, *l.c.* ix. 225). Noteworthy also were the two rabbis already mentioned, LEON OF MODENA (1579-1649), at whose sermons even nobles and ecclesiastics were present, and Simeon (Simḥah) LUZZATTO (1590-1663), who, besides the "Discorso," wrote "Socrate, Ossia dell' Intendimento Humano," which he dedicated to the doge and Senate. Reference should also be made to the poetess Sara Copia SULLAM (1592-1641), who was regarded by several critics after her death as one of the most illustrious writers of verse in Italy (Soave, *l.c.* 1876, p. 198). Other authors of this period who usually wrote only in Hebrew were: David NIETO (1654-1728), author of the "Maṭteḥ Dan"; Moses GENTILI (d. 1711), author of "Meleket Maḥsbabot"; his son Gershon (d. 1717, at the age of seventeen), author of the "Yad Haruzim"; Rabbi Simeon Judah Perez; and Jacob SARAVAL (d. 1782). Among the physicians of the republican period the most distinguished were Jacob MANTINO (1490-1549), a native of Tortosa, who was directed by circumstances to Venice, and who became chief physician to Pope Paul III.; and Giuseppe Tamari, who held the office of city physician (Ravà, *l.c.* 1871, p. 334).

One of the conditions always imposed upon the Jews of Venice was that of keeping banks for lending money; and to insure their continuance the "condotta" of 1534 placed this obligation upon the Università as a body. Although these banks at first satisfied the requirements of the citizens and were at the same time a source of gain to those who kept them, they finally ended in a great financial disaster. The community, which formerly had been very rich, declined rapidly during and after the war with the Turks over the island of Candia (1645-55), the cause being the enormous burdens laid upon it by the expenses of the war. Many emigrated to escape these burdens; the plague of 1630, with the consequent stagnation of business, drove others out; and bad administration was responsible for other departures; so that in order to fulfil its obligations the community was forced to sink deeper and deeper into debt, which finally reached the sum of nearly a million ducats. As soon as the government saw the peril

of an institution which was considered a necessity to the state, it endeavored to remedy the evil by adopting more easy terms of payment and by making other arrangements within its power; but when all other methods had proved insufficient it was compelled finally to proclaim the Università a private corporation to enable it legally to announce its insolvency. In 1735 the Università suspended payments, and a compromise was effected with its creditors with the support and protection of the government. The banks continued to exist, however, even after the fall of the republic, and until 1806, when they were closed by an imperial decree. On that occasion the Jews gave the commune all the money and property in the banks, having a total value of 13,000 ducats, to be devoted solely to charity. The municipality publicly expressed its gratitude for this gift ("Gazetta di Venezia," Oct. 6, 1806).

The Università seems soon to have recovered from its failure; for in 1776, on the expiration of one of the "condotte," certain commercial restrictions were proposed as a check upon the excessive influence which the Jews had acquired. These proposals gave rise to many heated discussions. The majority sided with the Jews, and called attention to the fact that several Jewish families had acquired large fortunes by their thrift and were of service to industry, besides giving employment to many of the poor. The assistance they had rendered to the state was also called to mind, special emphasis being laid upon the noble conduct of Treves, who had loaned the treasury without interest the money necessary for the execution of the treaty of Barbary. After a long debate, however, the passions and influence of a few powerful reactionaries prevailed, and the proposals became law (Romanin, *l.c.* viii. 212).

Several years then passed without incident, when the republic, becoming involved in difficulties with Napoleon, reconstituted itself as a democracy. In consequence all citizens were declared equal in the eyes of the law, and all legal discriminations against the Jews became null and void.

Each strove to outdo the other in demonstrating his fraternity, and on July 11, 1797, amid great popular rejoicing, the gates of the ghetto were torn down and its name changed to "Contrada dall'Unione" (= "Street of Union"). Many speeches of lofty tone were made on this occasion, and even priests were present at the ceremony, setting the example in evidencing the feeling of fraternity, for which they were praised by the new municipality. The latter had been quickly constituted, and three Jews had at once taken their places in it (Romanin, *l.c.* x. 222).

Yet even this revolution, though made in the spirit demanded by the times, could not save the republic, which was powerless before the invading armies of France. In the very month in which this change of government took place Napoleon declared war on Venice, and the Senate, wishing at least to make an attempt at resistance, invited the Jews and the various religious corporations of the city to contribute all the available silver in their places of worship for the defense of the city against the impending attack. The Jews enthusiastically responded,

among the first, to this appeal; and again they received from the Senate a gratifying letter of thanks (Soave, *l.c.* 1876, p. 38). The attack, however, was never delivered; for the Senate abandoned the republic on Oct. 17, 1797, and Austria and France signed the treaty of Campo Formio, by which the city was assigned to Austria. The latter took possession of it at once (Jan. 15, 1798), and the Jews by this change of government lost their civil equality. They regained it, however, in 1805, when the city became a part of Italy, but lost it once more in 1814, when, on the fall of Napoleon, the city again came under Austrian control.

When the news of the revolution at Vienna reached Venice in 1848 the city seized the opportunity to revolt, and, almost without bloodshed, forced the Austrian garrison to capitulate (March 22, 1848). It then proclaimed anew the republic of Saint Mark and elected a provisional government, of which two Jews formed a part — Isaaco Pesaro

**Equality of Jews and Christians** Maurogonato (appointed to the Ministry of Finance) and Leone Pincherle. Austria, however, reconquered the territory and held it until 1866, when it became part of the united kingdom of Italy; from that time the complete equality of Jews and Christians has been firmly established, as in all other parts of the country.

According to the last census, the Jewish community of Venice numbers 2,000; and it now bears the name of the Jewish Fraternity of Religion and Philanthropy. It possesses many institutions for study and benevolence, and is one of the most cultured Jewish communities in Italy. Among the Venetians of most recent times who have become distinguished are: Samuel Romanin, the learned historian of Venice, in whose honor a bust was placed in the Pantheon of Venice; I. P. Maurogonato, already mentioned, who for many years was vice-president of the Chamber of Deputies; Luigi Luzzatti, who was repeatedly minister of the treasury; the Treves dei Bonfili family, whose members still continue, as in the time of the republic, to be distinguished for their philanthropy and for their services to their fellow citizens; the poetess Eugenia Pavia Gentilomo Fortis; the physicians Namias and Asson; and the rabbi Abramo Lattes. In the industrial field also the Venetian Jews are well represented, being interested in many of the numerous factories and establishments on the islands around Venice, either as proprietors or as managers.

D.

E. L.

**VENTURA:** Family of rabbis and scholars prominent in Italy and Greece in the sixteenth, seventeenth, and eighteenth centuries.

**Eliezer ben Samuel Ventura:** Italian scholar of the sixteenth century; born at Da Porta, prov-

ince of Perugia; died in 1534 at Ferrara, where he had officiated as rabbi. One of his manuscripts has been preserved in the collection of Marco Mortara (see "Mosè," vi. 134).

**Elijah ben Abraham Ventura:** Scholar of the eighteenth century; probably flourished in the Levant. He was the author of a work in three parts, entitled: (1) "Kokeba di-Shebit," novellæ on various Talmudic sayings; (2) "Kontres," novellæ on the works of Elijah Mizrahi; and (3) "She'elot u-Teshubot," responsa. The entire work appeared at Salonica in 1799.

**BIBLIOGRAPHY:** Steinschneider, *Cat. Bodl.* col. 952; Benjacob, *Ozar ha-Sefarim*, p. 237.

**Isaac Hananiah Ventura:** Scholar of the seventeenth century; rabbi of Pesaro. He wrote a responsum which is published in the "Shelom ha-Bayit" of Menahem Cazes, and another which has been printed in Solomon Graziano's novellæ (ii. 123) on the Shulhan 'Aruk.

**Isaac ben Moses Ventura:** Talmudist of the sixteenth and seventeenth centuries; rabbi at Ancona and Pesaro. One of his responsa is extant in Terni's "Sefat Emet" (p. 24), and another in Nathaniel Segre's "Ezer Ya'akov" (No. 2).

**Isaac Raphael Ventura:** Rabbi of Pesaro in the seventeenth century. According to Mortara ("Indice," s.v.), he was a descendant of a family bearing the name **הסטר אלמאורי**; and he is mentioned in Graziano's novellæ (ii. 141) on the Shulhan 'Aruk.

**Jehiel Ventura:** Rabbi of Romagna in the sixteenth century. He was related to MaHaRaM of Padua, who mentions him in his collection of responsa (ii., §§ 62, 83) as one of the foremost halakists of his time.

**BIBLIOGRAPHY:** Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 219, No. 258.

**Jehiel Ventura:** Liturgical poet of the first half of the seventeenth century; probably a resident of Ancona. He was the author of liturgical and elegiac poems, which Ghirondi of Padua possessed in manuscript (Zunz, "Literaturgesch." p. 440).

**Moses ben Joseph Ventura** (called also **Ventura of Tivoli and Ventura of Jerusalem**): Rabbi of Silistria, Bulgaria, in the latter half of the sixteenth century. He was educated at Jerusalem, but later settled in Silistria. Ventura was the author of "Yemin Mosheh" (Mantua, 1624; 2d ed., Amsterdam, 1718; 3d ed., The Hague, 1777), a commentary on the Shulhan 'Aruk, Yoreh De'ah; and Aaron Alfandari, in his commentary entitled "Yad Aharon," ascribes to him the "Haggabot we-Hassagot 'al Bet Yosef," a commentary, as yet unpublished, on the four parts of the "Bet Yosef."

**BIBLIOGRAPHY:** Steinschneider, *Cat. Bodl.* col. 2008; Benjacob, *Ozar ha-Sefarim*, p. 224; Fürst, *Bibl. Jud.* iii. 433.

**Shabbethai ben Abraham Ventura:** Scholar and rabbi of Spalato during the eighteenth century; one of the most prominent pupils of David Pardo. He was the author of the "Nehar Shalom" (Amsterdam, 1775), novellæ and notes on the Shulhan 'Aruk, Oraḥ Hayyim.

**BIBLIOGRAPHY:** Steinschneider, *Cat. Bodl.* col. 2248; Azulai, *Sheḥem ha-Gedolim*, ii. 90.

E. C.

S. O.

**VENTURA, RUBINO**: Soldier; born at Finale, Modena, 1795; died at Toulouse, France, April 5, 1858. At the age of seventeen he was enrolled as a volunteer in the militia of the kingdom of Italy. On the downfall of Napoleon he returned to his home; but in 1817, owing to a dispute between him and a local policeman, he was obliged to leave the country. He went first to Trieste, and then to Constantinople, where he was for a time a ship-broker. Learning that Persia was seeking the services of European soldiers, he obtained an officer's commission, and helped to instruct the forces of the shah in European methods of warfare. He soon attained the rank of colonel. On the death of the shah in 1822, Ventura offered his services to his successor, 'Abbas Mirza. In the latter's service, however, were a number of English officers who were decidedly hostile to the French, with whom they classed Ventura on account of his having fought under Napoleon; and through their intrigues Ventura was dismissed. He then went to Lahore, India, accepting service in the army of Ranjit Sinh. A rebellion having arisen in Afghanistan, Ventura conducted successfully several campaigns of a difficult nature, and greatly enlarged the boundaries of the kingdom of Lahore.

Ventura married an Indian princess, by whom he had a daughter; but he was always desirous of returning to his native country. In 1837 he went on a diplomatic mission to Paris and London, but was recalled to Lahore before he had time to visit his family in Europe. On the death of Ranjit Sinh, Ventura took part in the contest for the succession, and remained in the service of the new raja, Dhulip Sinh. During the reign of the latter, Ventura continued his career of conquest; but later, feeling the approach of old age, he returned to Europe and settled in Paris, whence from time to time he visited his native country.

While in India, Ventura made numerous excavations. He presented Louis Philippe with a set of ancient Greek coins which he had unearthed, and which were evidences of the march through that country of Alexander the Great. In his later years he lost a part of his large fortune in unsuccessful commercial enterprises. According to Flaminio Servi, Ventura received baptism toward the end of his life.

**BIBLIOGRAPHY**: *Notizie Storiche e Biografiche de Generale Rubino Ventura, Finalese, Esposte da un Suo Concittadino*, Finale (Emilia), 1832; F. Servi, in *Corriere Israelitico*, x. 47 et seq.; idem, in *Vessillo Israelitico*, xxxi. 308 et seq. U. C.

**VENTURE, MARDOCHÉE**: French scholar; flourished at Avignon in the latter part of the eighteenth century. In collaboration with Isaiah Vidal he composed the "Seder ha-Konfres" (Avignon, 1765), a collection of liturgical chants for the use of the Jews of the county of Venaissin. This compilation includes a piyyuṭ (p. 47; comp. Zunz, "Z. G." p. 473) composed by Venture, partly in Hebrew and partly in Provençal, which was translated into French by Sabatier in his "Chansons Hébraïco-Provençales des Juifs Comtadins" (Nîmes, 1876) and by Pedro II., of Alcantara, Emperor of Brazil, in his "Poésies Hébraïco-Provençales du Rituel Israélite Comtadiu" (Avignon, 1891).

XII.—27

Venture himself translated into French: "Prières Journalières à l'Usage des Juifs Portugais ou Espagnols" (Nice, 1772); "Prières des Jours du Rosch-Haschana et du Jour de Kippour" (*ib.* 1773); "Prières des Jours de Jeûnes" (Paris, 1807); and "Prières des Fêtes de Pessach, Schebouot, et de Souccot" (*ib.* 1807; 2d ed., *ib.* 1845).

S. K.

**VERA Y ALARCON, LOPE DE**: Spanish martyr and knight ("caballero i mui emparentado," as he is designated by a contemporary) of noble family; born about 1619 at San Clemente la Mancha; died July 25, 1644, at Valladolid. Through his study of the Hebrew language and literature at Salamanca he was drawn toward Judaism; and he read the Psalms daily in the original text. When only twenty years of age he declared openly that he could not believe that the Messiah had appeared. According to the account of a contemporary, the Inquisition at Valladolid in 1638, on information furnished by De Vera's own brother, cast De Vera into prison, where he languished for six years. During this time he abstained from meat, circumcised himself, and called himself "Juda el Creyente" = "Juda the Believer." The most eminent theologians endeavored in vain to lead him back to the Church; and the entreaties of his father were equally unsuccessful. On July 25, 1644, he was tied to the stake, and, as Spinoza says, breathed his last with the Psalmist's words on his lips: "Into thine hand, Lord, I commit my spirit." His courage was universally admired, the inquisitor Moscoso writing to the Countess de Monterey thus: "Never has such firmness been witnessed as that displayed by this young man. He was well reared, scholarly, and otherwise blameless." The Marano poets Antonio Enriquez Gomez and Manuel de Pina mourned in their poems the death of the promising youth.

**VERBAND DER VEREINE FÜR JÜDISCHE GESCHICHTE UND LITERATUR IN DEUTSCHLAND**. See **VEREIN FÜR JÜDISCHE GESCHICHTE UND LITERATUR**.

**VERBLOVSKI, GREGORI LEONTYEVICH**: Russian jurist; born in the first quarter of the nineteenth century; died at Moscow 1900. He studied law at the University of St. Petersburg, from which he graduated in 1866. Verblovski was one of the first secretaries of the circuit court of St. Petersburg; he then became a member of that of Voronezh, and later of that of Moscow.

Verblovski's works include: "Sistematicheskii Sbornik Polozhenii i Izvlechenii iz Grazhdanskikh Kassatzionnykh Ryesheni za 1866-1875" (2 vols., Voronezh, 1879), a systematic collection of regulations and extracts of decisions of the Civil Court of Cassation for the period 1866-75, vol. i. being devoted to civil law, and vol. ii. to civil law cases; also similar collections for 1876-78 (*ib.* 1880), for 1879 (Moscow, 1881), for 1880 (*ib.* 1882), and for 1883-88 (St Peters-

burg, 1889); "Dvizhenie Russkavo Grazhdanskavo Protzessa" (*ib.* 1883; 2d ed. 1889), on the proceedings in a Russian civil lawsuit; "Zakonopolozheniya o Poshlinakh s Imushchestv Perekhodyashchikh Bezmezdnymi Sposobami" (Voronezh, 1883), on laws concerning taxes; "Polozhenie o Sovyete po Zhelyeznodorozhnyim Dyclam" (*ib.* 1886), the statute of the council on railway affairs; "Zakonopolozheniya o Preobrazovanii Myestnykh Krestyanskikh i Sudebnykh Uchrezhdenii" (*ib.* 1890); "Sudoproizvodstvo Grazhdanskoe i Ugolovnoe v Novykh Sudebno-Administrativnykh Uchrezhdeniyakh" (*ib.* 1891).

Besides, Verblovski published in the Russian juridical press a series of articles of practical interest; and, at the instance of the editorial commission instituted for the purpose of drawing up a new civil code, he translated into Russian the general civil code of 1811 of the Austrian empire (*ib.* 1885).

**VERCELLI:** City in the compartimento of Piedmont, Italy. The oldest document in existence concerning its Jews is dated Feb. 16, 1446, and consists of a permit granted by the city council to one Abramo della Vigneria and his son Angelo to open in Vercelli a banking and loan establishment, on condition of their lending the city 100 florins, when required, for a term of six months without interest, and for a longer period with interest. This is the first of a series of permits, granted for a set time only, but renewable, which authorized the residence of Hebrews within the city, and regulated their rights as well as their duties to the government. The Jews at this time were governed according to the harsh statutes of Amadeus VIII. promulgated June 17, 1430, which, among other regulations, obliged them to wear the customary badge, consisting of a piece of red cloth on the shoulder.

Under Emmanuel-Philibert the Piedmontese Jews were twice threatened by decrees of expulsion from the province. The first of these was promulgated July 19, 1560; but through the intercession of the duchess Margherita the Jews obtained a stay of four months. Then one of the duke's councilors persuaded him to renew the decree, fixing the time of the expulsion within ten days; but fortunately, through the efforts of an assistant physician attached to the ducal tribunal, a revocation of the edict was obtained. Later on (Oct., 1566) Emmanuel-Philibert ordered the immediate departure from his dominions of all the Jews, unless they consented to pay him the sum of 4,000 gold florins. They quitted the country, but shortly afterward were allowed to return on condition of paying down 2,000 florins and submitting to a yearly tax. On Sept.

**Under Em-** 9, 1572, at the instance of one Vitale  
**manuel-** Sacerdoti, Emmanuel-Philibert pub-  
**manuel-** lished a decree which somewhat miti-  
**Philibert.** gated the severity of the laws of Amadeus VIII. When, in 1597, the Jews were banished from the Milanese territories, a number of the exiles took refuge in Vercelli, among whom was the continuator of the "Emek ha-Baka" of Joseph ha-Kohen. The anonymous historian relates that he and his family remained in Vercelli for some days, hoping to establish their abode in the city;

but, although Emmanuel-Philibert had promised the Jews but a short time before that they should remain unmolested in his dominions, his son, Charles Emmanuel, Duke of Savoy, was unwilling to afford an asylum in his territories to the Jewish exiles from other provinces, and when he learned that there were numerous Hebrew refugees in Vercelli, he issued a decree banishing them from that city also. Charles Emmanuel confirmed the privileges granted by his father to his own subjects (see TURIN).

Until the year 1600 the Italian ritual was used by the Jews of Vercelli. In that year one Abram Levi, having purchased the loan and banking establishment of Norzi and Sacerdote, settled in the city; and, owing to his influence and efforts, the

**Italian** has remained in use until the present  
**Ritual** day. Rabbi Hayyim Segre, who in  
**Superseded** 1653 came from Casale Monferrato to  
**by the** reside in Vercelli, was sent with Sam-  
**German.** son Bachi and Jacob Pugliese to the

East to investigate the theories and writings of Shabbethai Zehi, the expenses of his journey being defrayed by Jonah Clava (Kziggin).

During the eighteenth century, notwithstanding the general progress of the times, the condition of the Vercelli Jews did not improve. Indeed, it became worse, owing to the preponderating influence of the papal court. The constitutional laws of 1723, 1729, and 1770 were almost as inimical to the interests of the Jews as the ancient ducal statutes had been. Until the year 1724 the Jewish inhabitants were permitted to live in any portion of the city; but in that year they were restricted to a special quarter. Their concentration in the ghetto soon showed the need of a larger synagogue; and a new edifice was opened on the eve of Rosh ha-Shanah, 1740. The financial status of the Jews of Vercelli improved greatly after the death of Elijah Emmanuel Foa (July 20, 1796), who bequeathed his large fortune to the community for the aid and support of charitable societies and institutions, and particularly for the establishment of a Hebrew college in his own house. The Collegis Foa (Foa College) was opened Sept., 1829, and is still (1905) in existence. It has given many noteworthy rabbis and professors to the Italian Jewry.

With the outbreak of the French Revolution came indications of better times for the Jews of Piedmont; but the Austro-Russian provisional government of Piedmont at the restoration, in 1799,

**Effects of** restored them to their former status.  
**the French** Later, by a patent of March 6, 1816,  
**Revolu-** Victor Emmanuel I. definitely freed the  
**tion.** Jews from the obligation of wearing

a badge, and conferred on them leave to engage in merchandise, trade, and the fine arts. They were, however, still excluded from the universities, from public offices, and from the administration of charities. The law of Charles Albert, enacted June 19, 1848, completed the work of emancipation, and established the Jews on the footing of citizenship. In 1853 a Hebrew journal, the "Educatore Israelitâ," edited by Giuseppe Levi and Esdra Pontremoli, was founded in Vercelli. The "Vessillo Israelitico" of Casale Monferrato, founded by Fla-

minio Servi in 1878, is the successor of this review. In 1878 a new temple was dedicated.

The following is a list of the principal savants and rabbis of Vercelli: sixteenth century: Isaac Kohen ("R. E. J." xvi. 39 *et seq.*); seventeenth century: Jacob Bachi, Hananeel ben Aaron Asher Nantova; eighteenth century: Benjamin Segre, Elisha ben Hayyim Segre, Joshua Benzion ben Elisha Segre, Joshua Benzion ben Benjamin Segre; nineteenth century: Alessandro Foa, Giuseppe Levi Gattinara, Sabato Graziadio Treves, Jedidiah Levi, Michele Vita Treves, Isacco Sanguinetti, Felice Tedeschi, Giuseppe Raffaele Levi.

In 1864 the city contained 600 Jews; shortly afterward their numbers began to diminish; in 1866 there were but 500; and to-day they number only 369.

**VERDICT.** See **JUDGMENT.**

**VERDUN** (Hebrew, ורדון): Capital of the department of Meuse, France. Jews resided there from the twelfth century; and among the scholars of the city may be mentioned the tosafist Samuel b. Hayyim (Tosef., Yeb. 65a, 66b; Tosef., M. K. 23a; Tosef., B. K. 77a, 89a), Samuel b. Joseph the Younger (Tosef., Niddah, 28a), and Jacob b. Joseph, brother of Samuel.

In 1433 Canon Guillaume Chaney made, on behalf of the chapter and the city, a fruitless request to the Council of Basel to relieve the strained financial situation by authorizing expelled Jews to return to Verdun; but until the annexation to France in 1559 of the three bishoprics of Toul, Metz, and Verdun, all rights of residence in the town and even of transit through it were forbidden to the Jews. Letters patent from Henry IV., Louis XIII., Louis XIV., and Louis XV., however, permitted the Jews of Metz to sojourn for very brief periods in Verdun to attend to business. In 1774 a Jew who had remained in the city for three days was expelled by order of De Watrouville, representative of the Marquis de Creil, the intendant. In 1748 the Jewish community of Metz addressed a petition to the intendant, asking that its members be allowed to visit Verdun, but this request was refused on account of the strong opposition of the merchants, goldsmiths, tailors, second-hand dealers, and, above all, the gild-wardens ("echevins") of the city, who were united in their hostility to the Jews. In 1752 and 1755 a number of Jews settled in the vicinity of Verdun, but were expelled by the intendant at the urgent demand of the gilds; and from that time until the Revolution of 1789 there are no traces of Jews in the city.

The existing community, which was founded in 1792, now (1905) consists of about forty-five families.

**VEREIN ZUR ABWEHR DES ANTI-SEMITISMUS:** Name of two societies for combating anti-Semitism. The first was formed in Berlin toward the end of 1890 by twelve men who issued an appeal to the German people, calling upon Jews and Christians alike to fight the excesses of anti-Semitism and especially all attempts to rob the Jews of their rights of equality. This appeal, issued in Jan., 1891, received 535 signatures from among the most prominent men of Germany. The poets Freytag, Heyse, and Sudermann (the first, on account of the Jewish characters in his novel "Soll und Haben" and in his drama "Die Journalisten," had been considered a partizan of anti-Semitism); scholars like Mommsen and Erich Schmidt; politicians like Von Forckenbeck and Baron von Stauffenberg; and Protestant clergymen like Dreyer and Zittel—these were among the signers ("Allg. Zeit. des Jud." Jan. 29, 1891; "Mittheilungen," etc., Jan. 30, 1901). A similar society was founded in Vienna July 20, 1891 ("Oesterreichische Wochenschrift," 1891, p. 526), of which the most prominent organizers were Baron and Baroness von Suttner and Professor Nothnagel.

These societies counted mostly upon Christians for support, although Jewish members were accepted. The Berlin society reported at its first general meeting, Nov. 28, 1893, a membership of 13,338 distributed in 963 localities. Its presidents were the eminent jurist and statesman Rudolf Gneist (up to 1895) and the liberal politicians Heinrich Rickert (up to 1902) and Theodor Barth. The propaganda of the societies was carried on chiefly by means of popular literature intended to check the growing anti-Semitic movement. Besides leaflets and pamphlets, the Berlin society published (1891) the "Antisemiten-spiegel," a handbook of refutations of the slanderous assertions found in the "Antisemitenkatechismus," and (from Oct. 21, 1891) the weekly "Mittheilungen aus dem Verein zur Abwehr des Antisemitismus," which is a complete record of the anti-Semitic movement, containing valuable material for the refutation of anti-Semitic charges. Both societies have from time to time protested to the authorities against the unjust treatment of the Jews, and have therefore been called by their opponents "Judenschutztruppe" (Jew-guards). The Vienna society has established a "Rechtsschutzabtheilung," a bureau for legal advice to victims of anti-Semitism.

The foundation of the Berlin society coincided—hardly by accident—with the retirement of Court Chaplain Stöcker and a condemnation of anti-Semitism by Emperor William in a conversation with his Jewish classmate Judge Sommer. The effect of the society's agitation can not be measured with any degree of certainty, although in Germany the anti-Semitic movement has made no progress since 1892.

**BIBLIOGRAPHY:** *Mittheilungen aus dem Verein zur Abwehr des Antisemitismus*, passim.

D.

**VEREIN FÜR CULTUR UND WISSENSCHAFT DER JUDEN:** Society founded at Berlin (Nov. 27, 1819) by Leopold Zunz, Eduard Gans, and Moses Moser. The objects of the society were to improve the social position of the Jews and to

check the conversions to Christianity which at that time had alarmingly increased in the Berlin community. These aims were to be attained by spreading general culture among the Jews and by furthering the study of Jewish history and literature. About fifty intellectual members of the Berlin community joined the society, among them the philologist Ludwig MARKUS, to whose character Heinrich Heine paid a glowing tribute. On Aug. 4, 1822, Heine himself joined the society, and later some of the surviving members of Mendelssohn's circle, as David FRIEDLÄNDER and Lazarus BENDAVID, followed suit. Outside of Berlin the society was joined by about twenty members of the temple congregation at Hamburg (see JEW. ENCYC. vi. 193a), and also by individual Jews in other places.

The society, in spite of its very limited means, planned to establish a complete system of educational institutions, from primary to academic, including industrial schools. It actually opened a school in which Polish baḥurim, who came to Berlin in large numbers, were instructed in secular branches. At the same time the society prepared a program for a normal course of instruction in the Jewish religion. Heine proposed the founding of a women's auxiliary society which should promote the aims of the mother institution in the homes. However, on account of this manifold activity, no tangible results were accomplished, and hence it was decided to limit the work of the society to the furthering of "Jewish science." With this aim in view the society began in 1822 to publish a "Zeitschrift für die Wissenschaft des Judenthums," of which Leopold Zunz was the editor. The first number was headed by an article entitled "Ueber den Begriff einer Wissenschaft des Judenthums." Gans wrote on Talmudic law, and Zunz contributed an essay entitled "Salomon ben Isak, Genannt Raschi." As early as May, 1823, however, the editors felt obliged to ask the public to show greater interest in the periodical; this request being unheeded, the society had to cease its activity, a ceremonious farewell-meeting which had been suggested being tactfully omitted. Eduard Gans, who had been among the most active members of the society, was the first to desert the cause; he became converted to Christianity in order to obtain a professorship. Others followed him, and on account of the general lack of interest the rest despaired of attaining any measure of success.

**VEREIN FÜR JÜDISCHE GESCHICHTE UND LITERATUR:** Name of societies founded in many German cities since about 1890 for the spread of the study of Jewish history and literature. Although certain societies of the kind had existed earlier, the first impetus was given to the popular study of these subjects through the awakening of Jewish sensibilities by the growing anti-Semitic movement. It was chiefly felt in Jewish student circles. The growth of the movement began when Gustav Karpeles, after having founded such a society in Berlin (Jan. 2,

1892), organized the various societies into a union known as **Verband der Vereine für Jüdische Geschichte und Literatur in Deutschland** (Dec. 26, 1893). This association furnishes lists of speakers to the constituent societies, issues pamphlets, and has published since 1898 the "Jahrbuch für Jüdische Geschichte und Literatur," of which up to the present (1905) seven volumes have appeared. These contain popular scientific essays and some fiction; and among the contributors are to be found the most eminent representatives of Jewish literature.

There are about 200 societies, with about 15,000 members, in Germany. The Jewish Chautauqua Society in the United States, the Jewish Study Circles in England, and the Université Juive in France have followed somewhat similar courses. An older organization of the same kind is the Afike Yehudah of Prague.

D.

**VÉRITÉ ISRAÉLITE, LA.** See PERIODICALS.

**VERONA:** Chief city of the Italian province of the same name. As early as the tenth century it numbered Jews among its inhabitants. They appear to have been treated with great harshness by Archbishop Raterio, and were later expelled from the city. Until 1408 they had apparently no recognized status or right of residence in Verona, although a few actually lived there and engaged in commerce. In that year (Dec. 31), shortly after Verona had passed under the government of the republic of Venice, the Jews obtained permission to live in the city and to lend money at interest. This concession met with strenuous opposition from a large number of the citizens; and all other professions were forbidden to the Jews. They lived among the Christians in the quarter of San Sebastiano, in the central part of the city, and built a synagogue in the Vicolo dei Crocioni, of which no traces now remain. In 1422 they were compelled to wear a badge, in the form of a yellow wheel, on the breast, or to pay a fine of 25 lire. The regulation, however, gradually came to be disregarded, but the ordinance decreeing the use of the badge was renewed. In 1443 the Jews were again refused permission to engage in the professions; and the shape of the badge was changed from a circle to a star. The original form was, however, restored in 1480.

By a resolution of the common council, dated March 11, 1499, the Jews were banished from the city and province of Verona, and their places were filled by Christian usurers, who so greatly oppressed the poor that the Jews were shortly afterward recalled. It is probable that some Jews remained in the city in spite of the decree of banishment; and it is certain that there were some scattered throughout the province, proof of their presence being afforded by a tombstone of this period, found in the neighboring village of Lonato. But, whether they never really quitted the province, or whether they gradually returned to it, in 1526 the citizens of Verona petitioned the Venetian republic to prohibit the Jews from lending money

**Fifteenth and Sixteenth Centuries.**

at interest in the city and territory of Verona. This request was granted, and the decree of prohibition was ratified on Dec. 4, 1548. In 1527 a yellow cap ("berretto") was substituted for the wheel-badge. An old manuscript, dated 1539, now in the possession of the Hebrew community of Verona, contains an account of the Jewish assemblies, of the amount of their taxes, of the fines levied on them, etc. In 1578 the Israelites were forbidden to pawn articles at the monte di pietà (see PLEDGES, HISTORICAL VIEW).

After their expulsion from the Milanese territory, some of the refugees settled in Verona (1597). In 1599 Agostino Valieri, Bishop of Verona, resolved to segregate the Jews in a ghetto; but, not finding a suitable location, he contented himself by enforcing the obligation of wearing the yellow cap. In the same year the Jews opened their cemetery, which remained in use until 1755. In 1604 the bishop carried out his designs, and enclosed the Jews in a ghetto, in a place called "Sotto i Tetti" (under the roofs). At this time they numbered about 400 and possessed twenty-five shops. All expenses for the improvement of the ghetto were borne by the Jews themselves; and they were obliged to borrow in order to build a synagogue. Finally they obtained a license, renewable every five years, to live in the city, on condition of the payment of a special tax.

#### The Ghetto.

When the plague broke out in Verona in 1630, the Jews remained immune, which so enraged the Christians that they cast into the ghetto the garments infected by the sick, and thus spread the pestilence among its inhabitants.

At this epoch many Hebrew books were published at Verona, among them being Midrash Tanhuma (1595), the Book of Isaiah (1625), the Psalms (1644), and "En Yisrael" (1649). In 1645 the synagogue was supplied with an Ark of the Law of red marble and a beautiful and costly "tebah," also of marble. In 1655 a large number of Maranos, headed by Mosé Gaon and Giovanni Navarra, obtained leave to settle in Verona, for commercial purposes; and habitations were assigned them in what was known as the "Ghetto Nuovo" (New Ghetto). These Jews were called "Ponentini"; the others, "Levantine" or "Greeks." In 1766 there were two Jewish physicians in Verona; in 1790, four.

On the night of Oct. 30, 1786, a terrible conflagration accidentally broke out in the ghetto, and raged fiercely for three days, notwithstanding the efforts of Jews and Christians alike to extinguish it. During the course of the fire five Jews were killed and a great number injured. The painter Vita Greco has commemorated this disaster in one of his pictures.

During the occupation of Verona by the French in 1797, the gates of the ghetto were torn down and burned in the public square; and thenceforth the Hebrews were permitted to reside in any portion of the city. On June 2 of that year a decree was issued, ordering that the Jews be represented in the council of commerce. On the restoration of the Austrian government a fanatical hatred of the Jews was fomented among the Christian population by the priests; and the Jews were so overwhelmed

with insults, affronts, and injuries that the Austrian governor of the province was obliged to interfere. A proclamation was issued Jan. 22, 1798, forbidding, under heavy penalties, the molestation of any citizen, by word or act; but the ill treatment of the Jews continued almost unabatedly until the issue of a second proclamation (Aug. 17, 1799), which definitely forbade all further molestation of them. They fared better on the resumption of French domination in 1805. Verona was represented by Israel Coen at the great Sanhedrin at Paris in 1806.

The community has now (1905) greatly diminished. In 1766 the Jews in Verona numbered 881; in 1770 there were 905; in 1864 they had increased to 1,200; while at the present day there are only 600.

Many of the ancient Hebrew associations of Verona still exist, the principal ones being: La Misericordia (Hebrew name, "Gemilut Hasadim"), founded in 1599; the confraternity for the religious burial of the dead ("Gomel Dallim"), founded about 1599; the society for the aid of the sick poor ("Bikkur Holim"), founded in 1610, with which the association for the proper attendance on the dead ("Liw-yat Hen") was affiliated in 1765; "Shomerim la-Boker" (1610), and "Mishmeret ha-Hodesh" (1646), both devoted to the recitation of prayers; a confraternity for the recital of the "Tikkun Hazot" (1655; see Zunz, "Ritus," p. 152); and "Limude Adonai" (1703), for the pursuit of religious studies.

The following rabbis and scholars were natives or residents of Verona:

Twelfth and thirteenth centuries: Eleazar b. Samuel of Verona. Sixteenth century: Ellhu Behr, Baruch Bassani, Joshua Jacob ben Johanan Heilpron, Moses Margalit, Abraham Menahem ben Jacob Porto, and Abraham ben Jehiel Porto. Seventeenth century: Judah Löb Ashkenazi, Hezekiah Mordecai ben Samuel Hayyim Bassani, Israel Hezekiah Bassani, Gershon ben Mordecai Bassani, Mordecai ben Jacob Bassani, Isaiah ben Mordecai Bassani, Isaac Cardoso, Simeon Cohen, Samuel ben Jacob Meldola, Samuel ben Raphael Meldola, Samuel Merari, Moses Abraham ben Moses Romanin, Joseph Shalit ben Eliezer Richetti, Abraham Shalit, Isaac ben Samuel Levi Valle, Judah ben Moses Fano, and Abraham Zemah. Eighteenth century: Solomon ben Israel Bassani, Jacob ben Manasseh Gentili, Manasseh ben Jacob Gentili, Joseph Marin, Menahem Navarra, Uzziel Joel Pincherle, and Nethaneel ben Uzziel Joel Pincherle. Nineteenth century: Moses Shabbethai Beer, Abramo Mainster, David Samuel Pardo, Jacob Vita ben David Samuel Pardo, Samuel ben David Samuel Pardo, Jacob Hai Recanati, Emanuele (Menahem) Recanati, Abraham Grego, David Fortis, and Angelo Carpi.

U. C.

**VERSE-DIVISION:** The system of breaking up the Biblical text into verses may seem, both in the original and in the versions, to go hand in hand with its division into chapters. In truth, however, the chapter-division and the verse-division are of different origin. The division into chapters was employed first in the Vulgate, perhaps by Stephen Langton, Archbishop of Canterbury (d. 1228). It was adopted by Jewish scholars for purposes of reference — not only by ISAAC NATHAN BEN KALONYMUS in his great concordance, "Neir Netib" (Venice, 1523), but, not long after its introduction into the Vulgate,

by Solomon b. Ishmael (see "Theologisch Tijdschrift," 1878, p. 104)—and was introduced into the printed editions of the Hebrew text, from the Bomberg Bible of 1521 downward. On the other hand, verse-division, with the elaborate systems of accentuation resting upon it, is in itself essentially a part of the Masoretic tradition, although notation by means of figures in the text, or on the margin, was employed first in the Latin Bibles of 1528 and 1555, and somewhat later (1571) by Arias Montanus in the Antwerp Bible; a figure on the margin corresponded to a cross in the text at the beginning of each verse. The Athias Bible (1659-61) was the first edition with verse-notation that could be used by Jews.

In all the manuscripts of the Hebrew Bible, except the scrolls used for the public lessons (see below), the end of a verse ("pasuk") is marked by the double point (:), which is called "sof pasuk." The next higher unit in the Pentateuch is the hebdomadal lesson ("parashah"), which is thus "treated as a chapter for the purpose of numbering the verses." At the end of each parashah the number of verses contained in it is given, together with a mnemonic sign. Thus at the end of the first pericope (Gen. i. 1-vi. 8) occurs קמ"ו (*i. e.*, 146), followed by אמצ"ה יחזקיהו, either of which words has the numerical value 146. Sometimes two pericopes which, in certain years, are read on one Sabbath, are computed together, in addition to the separate computation of the component parts (so נצבים וילך, Deut. xxix. 9-xxx. 20, xxxi. 1-30, in one MS., Ginsburg, No. 84; for the detailed items see Ginsburg, "Introduction," pp. 72-85; Blau, in "J. Q. R." 1897, pp. 479-482). Discrepancies occur in the various Masoretic sources available; according to Ginsburg, they point to different Masoretic schools, hence to a lack of fixity concerning the method of verse-division, while Blau holds that they are "for the most part errors in copying or in reading which are easily recognized and explained" (see also Baer, "Die Verszählung des Pentateuch," in "Orient, Lit." 1851, pp. 200 *et seq.*). There is complete agreement in the Masoretic sources as to the total number of verses in the Pentateuch, given as 5,845. In the other

books of the Bible no subdivisions are marked as in the Pentateuch; while the separate figures given for the single books vary (see Ginsburg, *l. c.* pp. 87-105; Blau, *l. c.* pp. 486-487). The correct total figure for the verses in the prophetic books is proved by Blau to be 9,294; in the Hagiographa, 8,064. The total number of verses in the entire Scriptures is thus 23,203. With this computation agree the lists in a Yemen manuscript (Ginsburg, *l. c.* pp. 105 *et seq.*) and in "Dikduke ha-Te'amim" (ed. Baer-Strack, p. 55). Blau adduces a variety of proofs for the correctness of these totals. He proves also from a sufficient number of tests obtained from various Masoretic notes that the Masoretic verses were identical with those of the editions now used; *i. e.*, they began and ended with the same words (*l. c.* pp. 471-474).

While the hebdomadal lessons are treated as "chapters" in the Masoretic computations of verses, the

"chapters" of the traditional text are really the much shorter "open" and "closed" sections (Ginsburg, *l. c.* ch. ii.), which are necessarily coterminal with their concluding verses. The exceptions are the so-called "breaks in the middle of verses" ("piska be-'emza' pasuk"; comp. Bull, "Canon and Text of the Old Testament," 1892, p. 35, and the literature there noted). These exceptions, however, are only apparent. In Gen. xxxv. 22, for example, the portions before the break and after it are really separate verses, but are joined in reading for the purpose of slurring over the story concerning the misconduct of Reuben, or in order to suggest that, in spite of his misconduct, he was still counted

with the other sons of Jacob (see **Breaks in Middle of Verses.** Rashl, *ad loc.*, and sources). The breaks are particularly numerous in the books of Samuel; in the majority of cases in the place of the break there seems to have been originally a reference to the priest's manipulation of the ephod.

With the Masoretic computation as given above that of an anonymous baraita in Kid. 30a is apparently at variance, which assigns to the Pentateuch 5,888 verses, to the Psalter 5,896, and to Chronicles 5,880. The repetition of the figure 8 and the divisibility of each number by 8 are not necessarily an evidence of artificiality. The frequently quoted statement of the amora Aba bar Ada (in the Talmudic passage referred to), that the Palestinian divided Ex. xix. 9 into three verses, and the avowal of another amora, Rab Joseph, in a discussion with Abaye, that "we are no experts in the counting of the verses," have been adduced by various scholars as a proof of the existence of different systems of verse-division in Talmudic times, and at all events of the absence of fixity in the pre-Masoretic period (comp. Frankel, "Vorstudien zu der Septuaginta," 1843, p. 217; Grätz, "Monatsschrift," 1885, pp. 97-100). It is true, of course, that the Eastern and Western schools varied from each other in the verse-division as in other matters (comp. the geonic statement, Blau, *l. c.* p. 141); such variation, however, it is contended by Blau, was only occasional, and was confined to a small number of places, which he enumerates. The contradiction between the Talmud and the Masorah is harmonized in a geonic responsum (Harkavy, "Responsa der Geonim," No. 3a) by the assertion that "the baraita refers to a Bible found in Jerusalem, which differed from other Bibles in respect to writing and number of verses." On the basis of an exhaustive induction from the Talmudic-Midrashic data tending to show that the centuries immediately preceding the Masoretic period the verses began and ended practically in the same places as nowadays, Blau believes himself justified in minimizing the difficulty and in harmonizing the contradictory statements (*l. c.* pp. 471-474, 476, 483 *et seq.*).

According to the Yalkuṭ on the Pentateuch, section 855, the Pentateuch contains 5,843 verses. The Talmud is equally at variance with the Masorah in counting Lev. xiii. 33, instead of Lev. viii. 8, as the middle verse of the Pentateuch, while Soferim ix. 3 gives Lev. viii. 23 as the middle verse.

The Talmud credits the work of the verse-division to the scribes. This means that it antedates the Talmud. In medieval times Judah ha-Levi, Ibn Ezra, and Profiat Duran considered Ezra or the men of the Great Synagogue as the author or authors of this division (Bacher, "Ibn Ezra als Grammatiker," 1881, p. 38); but although an element of ancient tradition, the verse-division was not permitted to enter the scroll (Soferim iii. 7). It is clear that the verse-division occupies in the history of the Hebrew text a place posterior to the separation of words and the introduction of vowel-letters; with the verse-division there went hand in hand the accentuation which presupposes it; both antedated the vocalization. While on the Phœnician monuments there is found continuous script, with no space to mark even the division of words, the Moabite Stone makes use of a single point for word-separation, and of a vertical stroke for the purpose of marking the end of a sense-unit corresponding somewhat to a Scriptural verse.

The beginnings of Scriptural verse-division must be sought in the poetical books. As can be seen from the Ecclesiasticus fragments as well as from certain poetical passages in the canon (*e.g.*, Deut. xxxii.; see Harris in "J. Q. R." 1889, p. 225), it was customary to write each metrical (?) unit on a short line corresponding to what the Greeks called *στίχος* (in Latin, "versus"). In Hebrew poetry, two metrical units, or stichs, usually go to make one complete and rounded thought. The two stichs were therefore written opposite each other on one line, and together constituted a *pasuk*, a verse in the accepted sense. From the poetic

**Stichoi** of passages the custom of verse-division spread to the other parts of Scripture.

**Verse.** If Sievers may be believed ("Studien zur Hebräischen Metrik," p. 382, Leipsic, 1901), Gen. ii. 4-14 is metrical. Economy of space, of course, prevented the employment of broken lines even in the poetic passages. It was expensive to write "per cola et commata" (on the meaning of the phrase comp. Swete, "Introduction to the Old Testament in Greek," 1900, pp. 345 *et seq.*; the whole of ch. vi. will prove useful reading in connection with the present subject). Even in the scrolls many poetic pieces are written as prose. The manuscripts from which the Masoretic archetype immediately descends, as well as those from which the Greek translation was made, appear not to have been written in broken lines where one would expect such writing—*e.g.*, in the Psalter (note the error in Ps. xlii. 6, 7, אֱלֹהֵי פָנָיו for פָּנֵי וְאֱלֹהֵי; or in the alphabetical chapters of Lamentations (comp. Lam. i. 16, LXX.; Frankel, *l.c.* p. 218).

Saadia is criticized by Ibn Ezra for disregarding the traditional verse-division in ten Scriptural passages (Bacher, *l.c.* p. 39, note 14). More frequently this expedient is resorted to by modern commentators and editors. Examples may be found on the pages of Haupt's Bible, where a special sign (|) indicates the transposition of the Masoretic *sof pasuk*.

**VERSICLE THEMES.** See **ḲEROBOT**; **SELI-ḲAH**.

**VERVEER, ELCHANAN:** Dutch painter and vignette-engraver; born at The Hague April 19, 1826. He received instruction from his brother Samuel L. VERVEER, and from H. F. C. Ten Kate. In 1845 he went to Brussels, where he engraved the vignette illustrations for Eugène Sue's "Le Juif Errant," and on his return to The Hague he was engaged for some time in drawing illustrations for "De Brillen van Onzen Tijd," which appeared first in "Nederlandsch Magazijn" and later as a separate publication.

Of Verveer's paintings may be mentioned "The First Pipe" and "Winter," both in the museum at Rotterdam, and "The Widow" and "Sufferers from Sea-Sickness," which belong to the Stadtmuseum in The Hague.

Verveer is a knight of the Lion of Nassau, and an officer of the Order of Leopold.

**VERVEER, SAMUEL LEONARDUS:** Dutch landscape- and genre-painter; born at The Hague Nov. 30, 1813; died there Jan. 5, 1876. He was a pupil of B. J. van den Hove. Verveer traveled a great deal, visiting especially the art galleries of French cities; but the scenery of his native land was ever to his mind the most beautiful in the world, and he became a master in depicting views of Dutch towns and hamlets.

Of Verveer's paintings may be mentioned: "Afternoon at Katwijk on the Sea" (now in the museum at Rotterdam); "Nordwijk on the Sea" and "Scheveningen" (both in the Amsterdam Museum of Art). The last-named painting was exhibited at Philadelphia in 1876 and was awarded a silver medal. "Salmon Fishers" and "Departure for the Market" are two of the most representative of Verveer's genre-paintings. His works were also awarded prizes at Brussels in 1842 and 1851; and many of his paintings were bought by the art galleries of Ghent, The Hague, Hamburg, etc.

**VESOUL** (Hebr. וְסוּל or וְסוּלָה): Capital of the department of Haute-Saône, France. Jews first settled there in the latter part of the thirteenth century, under the leadership of Ḥayyim h. Jacob, who was a correspondent of Ḥayyim b. Isaac Or Zarua', one of the first pupils of Meïr of Rothenburg. The synagogue was situated within the city walls, on a site now occupied by the Chapelle de la Charité, on the Place du Palais-de-Justice; after the expulsion of the Jews in 1321 it was sold for the benefit of the public treasury.

In 1315 Hélot, a banker of Vesoul, was one of the Jewish syndics of the Langue d'Oil who, together with Poncin de Bar, Joce de Pontoise, Cressent de Corbeil, and Morel d'Amboise, negotiated for the return of the Jews expelled from France by Philip

the Fair. Three years later Countess Jeanne of Burgundy confiscated a house belonging to a Jew named Helget, and presented it to the prior and curé of Vesoul. In 1321 Philip V., the Tall, gave his wife, Queen Jeanne, the estate of Héliot and of his son Vivant as well as the property of other Jews of the county of Burgundy; and three years later Marguerite de Lambrez, one of the queen's ladies of the bedchamber, was allotted Héliot's house. In 1343 Michelet, a Jew of Vesoul, furnished the King of France with a subsidy of 187 livres.

In 1348 eighty Jews of Vesoul were arrested by order of Eudes IV., Duke of Burgundy, on the charge of well-poisoning. Renaud Joume de Chariez, provost of Vesoul, superintended the confiscation of their property, these seizures enriching the treasury to the amount of about 294 livres. Six of the prisoners were secretly put to the torture, and the twelve nobles appointed to pass judgment on them, in order to save them from the fury of the mob, sentenced them to banishment on the strength of confessions wrung from them in this manner. In 1360, however, Manccier or Menessier, a Jew of Vesoul, enjoyed the special favor of Charles V., whom he induced to permit the Jews to return to France. Twenty-four years later Philip the Bold authorized fifty-two Jewish families to settle in Burgundy, in consideration of the payment of an entrance-fee, and an annual tax to the treasury. They were, however, forbidden to loan money at a higher rate of interest than 4 deniers per livre, but their testimony was recognized in legal matters, even against Christians. Gui de la Trémouille, Sire de Joinville, a courtier, was appointed guardian of their rights and interests. From 1410 to 1419 Hacquin, a Jew of Vesoul, was physician to Duke John the Fearless.

At present (1905) there are twenty-five or thirty Jewish families in the city.

**VESPASIAN:** Emperor of Rome from 69 to 79; founder of the Flavian dynasty. The defeat of Cestius Gallus convinced Nero that the Jewish uprising was a serious matter, and he transferred the command of his army to the veteran Flavius Vespasianus, who had already fought courageously against the Britons. In the winter of 67 Vespasian made his preparations for war in Antioch, and in the following spring marched on Ptolemais. After joining his son Titus, who had advanced with an army from Alexandria, Vespasian found himself in command of a powerful force, consisting of the fifth, tenth, and fifteenth legions, twenty-three auxiliary cohorts, and six squadrons of horse, in addition to the troops of the native vassals, of the Jewish King Agrippa II., and of the kings of Commagene, Emesa, and Arabia (Josephus, "B. J." iii. 7, § 1). The entire Roman army must have mustered at least 60,000 men.

The first aim was the conquest of Galilee, a wealthy and populous district of Palestine, which was de-

fended by Josephus. Upon the approach of Vespasian, however, the protecting army fled in confusion, and the city of Gadara fell into the hands of the Romans. All its inhabitants were put to the sword by order of Vespasian, and Gadara and the neighboring towns and villages were burned (*ib.* iii. 7, § 1). These events were followed by the reduction of Jotapata in a siege which is described in detail by Josephus, who found himself compelled to surrender. Vespasian, like his son Titus, treated the captive as a friend. The operations were now interrupted by a brief truce, while the conqueror marched through Ptolemais to Cæsarea, where he rested his troops (*ib.* iii. 9, § 1). Vespasian himself went to Cæsarea Philippi, Agrippa's capital, where festivities in his honor were celebrated for twenty days. He then led his army against Tiberias, which willingly surrendered, and also against Tarichææ, which fell into his hands in the beginning of the month of Elul.

A terrible punishment awaited the conquered. Galilee was entirely depopulated; 6,000 youths were sent to Nero to work on the isthmus of Corinth; 1,200 old men were killed; and the remaining Jews, more than 30,400 in number, were sold as slaves, servitude being also the fate of those who were given to Agrippa (*ib.* iii. 10, § 10). There now remained only the fortress of Gamala, whose defenders repulsed the Romans so disastrously that Vespasian in person had to urge his soldiers on. The fortress was reduced at last, however, and the Romans massacred 4,000 Jews, the rest preferring death by their own hands. In the meantime the fort of Itabyrion at Tabor had surrendered, while the city of Giscala was reduced by Titus, so that Galilee was entirely subdued by Vespasian.

The simplest procedure would now have been an attack upon Jerusalem, as was desired by the Roman lieutenants, but Vespasian decided to leave the city to itself, knowing that Jewish factional strife would gradually weaken it (*ib.* iv. 6, §§ 2, 3). Notwithstanding the heavy rains, he advanced toward Perea, and occupied the Hellenistic city of Gadara, while Placidus, his second in command, was engaged in subduing the remainder of the district. Once more Vespasian marched from Cæsarea, and occupied in turn the cities of Antipatris, Lydda, Jamnia, and Emmaus, leaving the fifth legion in the last-named city, after which he scoured Edom, returning to Emmaus, and finally marching northward in the direction of Jerusalem through the district of Samaria. He met with little resistance in any of these places, even Jericho and Adida being easily taken by the Roman soldiers. Gerasa alone had to be conquered and destroyed by one of his generals (*ib.* iv. 9, § 1); this, however, can not have been the great Gerasa, which was a Hellenistic city.

Vespasian doubtless desired to prolong the campaign in Judea, since this left him in command of a large army, which was desirable in view of the imperial succession. When he heard, however, that Simeon bar Giora had invaded and ravaged southern Palestine with his Jewish hordes, he determined to restore order

**Prolongs War**  
**Political Reasons.**

there, and accordingly invaded and subdued the districts of Gophna and Acrobata in the month of Siwan, 69. He likewise captured the cities of Bethel and Ephraim, while Hebron was taken by his tribune Cerealis (*ib.* iv. 9, § 9). The Romans now had free access to Jerusalem from all sides, although some places, such as Emmaus, Herodium, Masada, and Machærus, still remained in the hands of the Jews.

In the meantime the imperial throne of Rome had been filled successively by Galba, Otho, and Vitellius; and the Oriental legions, following the example of the army of the Rhine, gave an emperor to Rome in the person of Vespasian. This event, which was to prove important for the history of the world, was doubtless planned in Palestine, where, according to Josephus, the proclamation was issued, although Tacitus and Suetonius assert that the Egyptian legions were the first to hail Vespasian emperor, on July 1, 69. Two personages of Jewish descent were particularly active in connection with this event—Berenice, the mistress of Titus, and Tiberius Julius Alexander, governor of Egypt. Josephus boasts that he foretold Vespasian's election to Vespasian himself and received his freedom as well as permission to accompany the emperor to Alexandria as a reward for his prophecy. According to Talmudic sources, however, Johanan ben Zakkai was the first to predict Vespasian's elevation to the imperial throne. The statement that he was unable to draw on one of his shoes for joy (*Git.* 56b) may be explained by the fact that the phrase "calceos mutare" (to change the shoes) was used also to denote promotion to a higher rank ("Monatschrift," 1904, p. 277). The fact that the proclamation of Vespasian was issued from Judea led Josephus, followed herein by Tacitus ("Hist." v. 13) and Suetonius ("Vespasianus," § 4), to interpret an ancient oracle foretelling that a ruler from Judea should acquire dominion over the entire world as an allusion to Vespasian (Josephus, *l.c.* vi. 5, § 4). The new emperor left his son Titus in command of the army, while he himself hurried to Rome to take possession of the throne.

In the eyes of the Roman people Vespasian and Titus shared in the glory of the subjugation of Palestine, yet neither of them assumed the title "Judæicus," probably because this term referred to the religion as well as to the nationality of the Jews. In addition to the honors bestowed on Titus by the Senate, and the memorials erected to his praise, several decrees and monuments refer to Vespasian. The coins bearing the legend "victoria navalis" probably commemorate his pursuit of the Jews at Tarichæa on rafts, and the same circumstance doubtless explains why Titus brought a large number of ships with him when he entered Rome in triumph (*ib.* vii. 5, § 5). Together with his sons Titus and Domitian, Vespasian celebrated his own triumph in the year 71 (*ib.* vii. 5, § 7; Dio Cassius, lxi. 7). In addition to the triumphal arch erected in honor of Titus, which still stands near the Roman Forum, another arch of Titus existed, until the fifteenth century, in the Circus Maximus, which bore an inscription expressly stating that Titus had conquered the Jewish people at the command and counsel of his father,

and under his auspices ("C. I. L." vi., No. 944; "R. E. J." i. 35). All three Flavian emperors struck coins with such legends as 'Ιουδαίας ἐπιλοκνίας, "Iudæa devicta," or "Iudæa capta" (Madden, "Coins of the Jews," pp. 207-229), and numerous inscriptions furnish material for an exact determination of the names of the legions and officers that took part in the war;

such lists have been compiled by Arsène Darmesteter and Joseph Offord.

The sacred vessels from the Temple at Jerusalem were deposited in the Temple of the Goddess of Peace, erected by Vespasian in commemoration of his victory, but destroyed by fire in 191; and other trophies were preserved in the imperial palace (Josephus, *l.c.* vii. 5, § 7; Jerome, "Comm. on Isaiah," xxix. 1). The Circus Maximus still exists, stained with the blood of Jewish martyrs. Vespasian instituted also the FISCUS JUDÆICUS, and did not hesitate to claim all Judea as his property (Josephus, *l.c.* vi. 6, § 6). A papyrus from the Egyptian province of Arsinoë, preserved partly in London and partly in Vienna, gives detailed information concerning a special impost levied on the Jews in addition to the customary poll-tax. This papyrus is dated in the fifth year of Vespasian's reign, and shows that the tax was payable by every Jew and Jewess over three years of age. The annual amount of the special Jewish assessment was 8 drachmæ 2 oboles per individual, and to this was added an extra income tax of 1 drachma. The poll-tax itself amounted to 40 drachmæ, so that the Jews were heavily burdened, at least throughout Egypt. Christian sources further state that Vespasian caused all Jews of the house of David to be executed, and thus instigated a great persecution (Eusebius, "Hist. Eccl." iii. 12, based on Hegesippus). He also closed the Temple of Onias, in 73, and enlarged the pomerium of the city of Rome, which might be done only by an emperor who had increased the territories of the empire.

Vespasian is frequently mentioned in rabbinical literature, the war, with which certain mourning customs were associated, being called

**Talmudic** "polemos shel Aspasyanos" (Sotah ix. References. 14), and "Vespasian and his comrades"

(*i.e.*, his sons) being accused of enriching themselves from the treasures of Israel (*Midr. Teh.* xvii. 2). When Vespasian came to Jerusalem he encamped outside the wall and made propositions of peace to the Jews which were rejected. According to Ab. R. N., Recension B, § 6, certain Jews in the city communicated treacherously with Vespasian by means of arrows; but this statement confuses Vespasian with Titus, while other passages confound him with Hadrian, or even with Nebuchadnezzar. "One of these will destroy the holy Temple, and that one is the miscreant Vespasian" (*Midrash ha-Gadol* on Gen. xxv. 23, ed. Schechter; in Gen. R. lxvii. the name of Hadrian is substituted). The passage "I have not despised them" was interpreted as meaning, "I have not despised them in the days of Vespasian" (*Sifra*, xxvi. 44; *Esth. R.*, beginning); and it is clear from a statement of Jerome on Joel iii. 3 that several haggadic

passages were likewise regarded as allusions to Vespasian. Various legends concerning this emperor appear in rabbinical literature, the first one being told by Josephus ("Ant." viii. 2, § 5), who relates how a Jewish exorcist displayed his skill to Vespasian. The shiploads of captive Jews are generally, and correctly, associated with the name of

Brass Coin of Vespasian, with Inscription "Iudaea Capta."  
Struck in 72 C. E.

(From Madden, "History of Jewish Coinage.")

Titus; but according to a later legend (Buxtorf, "Synagoga Judaica," ix. 231; "J. Q. R." xv. 664), which apparently sought to attribute to Vespasian all the evils that befell the Jews, the future emperor guided three vessels filled with Hebrew prisoners to Lavanda, Arlada, and Bardeli.

Vespasian collected his memoirs of the Jewish war; and these were mentioned, and probably also used, by Josephus ("Vita," § 65; comp. "Contra Ap." i., § 10).

G. S. KR.

**VESSELS, SACRED.** See TEMPLE, ADMINISTRATION OF.

**VESSILLO ISRAELITICO, IL** ("Hebrew Banner"): An Italian monthly; the continuation of the "Educatore Israelita" (founded 1853), which, upon the death of its editor Giuseppe Levi (July 10, 1874), passed under the new title into the control of Flaminio Servi, rabbi of Casale Monferrato, who transferred its headquarters from Vercelli to Casale. During the early years of its existence it contained essays from the pens of such men as Berliner, Benedetti, Perreau, Soave, and Steinschneider; but later its importance as a literary and scientific journal deteriorated. It is noteworthy as containing valuable biographical sketches of Italian Jews.

Flaminio Servi died Jan. 23, 1904, and was succeeded by his son Ferruccio, who has made considerable changes in the publication, giving it a distinctly modern character. In February, 1905, the "Lux," a review founded in Leghorn in 1904 under the editorship of Arrigo Lattes and Alfredo Toaff, was incorporated with the "Vessillo."

U. C.

**VÉSZI, JOSEPH:** Hungarian editor and deputy; born at Arad Nov. 6, 1858. He was educated at the gymnasium of his native town, and studied

philosophy, literature, and languages at Budapest. In his early youth he was a poet, and in the seventies his lyrical productions were accepted by the best literary periodicals, while two volumes of his verses were published at Budapest in 1880 under the titles "A Bánat Dalai" and "Traviata, Dalok Egy Tévedt Nőhöz." Since 1877 he has devoted himself to journalism, advocating liberal views. He was for some time editor of the "Budapester Tagblatt," and contributed leaders and stories to the "Pester Lloyd." In 1894 he became editor-in-chief of the "Pesti Napló," and in 1896 he founded the "Budapesti Napló."

Vézi is president of the journalistic club of Budapest, and vice-president of the picture salon and of the club of amateur musicians in that city. He is also master of the masonic lodge "Reform." In 1899 he was elected to the Hungarian Parliament from the district of Szász-Sebes; and in 1901, from the third district of the capital. At present (1905) he represents the third district of Budapest. He takes an active interest in all Jewish affairs.

**VIDAL, MENAHEM B. SOLOMON MERI.** See MERI, MENAHEM.

**VIDAL OF TOLOSA:** Spanish scholar of the latter half of the fourteenth century. He resided in Catalonia, where he prepared his most important work, "Maggid Mishneh," a commentary on Maimonides' "Yad." This work covered the entire contents of the "Yad," but only those parts are extant which cover the following books: iii., iv., v. (ch. i.-ix. only), xi., xii. (ch. i.-iii. only), and xiii. The commentary was never published separately, but only together with the "Yad" (first at Constantinople, 1509). Vidal's second work was a commentary in Arabic on Al-Ghazali's "To'let ha-Higgayon." This commentary was translated into Hebrew by Moses ben Joshua of Narbonne, and is extant in manuscript in the Library of the Vatican. From Joseph Caro's preface to his "Kesef Mishneh" it appears that Vidal was a personal friend of R. Nissim.

Vidal's son Isaac was also a prominent scholar; he lived in Alcalá and corresponded with Isaac ben Sheshet (Responsa, No. 473).

S. O.

**VIENNA:** Capital of Austria-Hungary. Legend asserts that Jews settled in this city in the remotest antiquity, and it is alleged that some were among the first colonists that Rome sent to the Danube. In 905 decrees were issued fixing the toll to be paid by Jewish merchants in Austria; this, however, proves only that Jews traveled in that country. Although the document, dated 1156, which granted to Duke Leopold of Austria the privilege of admitting Jews into his dominions is a forgery originating two hundred years after its alleged date (O. Stobbe, "Die Juden in Deutschland," p. 12), Jews were undoubtedly living at that time in Austria, though not in great numbers. Under the protection of the liberal princes of the house of Babenberg they fared much better than the other German Jews of that period.

As early as 1194 Duke Leopold VI. of Austria placed a Jew of the name of Shlom (Solomon) at the head of the mint ("super officium monetæ"), and Jewish officers of that

**Shlom the Minter.** mint had such influence as to give rise to bitter complaints. Two years later,

when the Crusaders reached Vienna and heard that Solomon had imprisoned for theft one of his servants who was to join them, they rushed to the Jew's house, murdered him and fifteen other Jews, and liberated the imprisoned man. The duke was sufficiently just to execute two of the ringleaders (Joseph ha-Kohen, "Emek ha-Baka," ed. Letteris, p. 46). The influence of the Jewish officials had become so great that after the expulsion of Duke Frederick the Belligerent, in 1237, the citizens of Vienna petitioned Emperor Frederick II. not to appoint any more Jews to official positions. Nevertheless Jews apparently continued to be employed as agents of the treasury. In 1235 they dictated the entire commer-

cial policy of Duke Frederick II. and induced him to forbid the export of grain into the "upper districts" (Pertz, "Monumenta Scriptores," ix. 786); and in 1257 the Jews Lublin and Nekelo, two brothers, were treasury agents ("Kammergrafen") "to the most illustrious Duke of Austria" (Steinschneider, "Hebr. Bibl." x. 44 et seq.). In Aug., 1238, Emperor Frederick II. took the Jews of Vienna under his protection ("servi cameræ nostræ"), granting them special privileges (see JEW. ENCYC. ii. 322, s.v. AUSTRIA). Of still greater importance is the charter that Duke Frederick II. granted to all Jews within his territory July 1, 1244; this afterward became the model by which the status of the Jews of Bohemia, Moravia, Hungary, Silesia, and Poland was regulated.

The Jews of Vienna, who had the right to own real estate and to buy houses, were engaged principally in lending money on security to the burghers

Gate Leading to the Old "Judenstadt" at Vienna.

(From an old print.)

and also to the impecunious princes. Frederick II. permitted the Jews to charge a weekly interest of eight heller on the pound (*i. e.*, 87 per cent); under his father they were permitted a still higher rate. Later the rate on loans by Jews was reduced to three heller on the pound. The rich Jew Techau in Vienna was in 1255 the bondsman of Duke Leopold VI. for a debt of 2,000 pounds of silver owed to King Andrew of Hungary (Steinschneider, *l. c.* x. 46). The "Muschlein Terhau" (Techau) mentioned in a document (Wiener, "Regesten," p. 117) was probably a

son of this otherwise unknown person. The favorable position of the Jews changed when, in May, 1267, the Council of Vienna revived

**The Church Council of 1267.** The ancient ecclesiastical decrees concerning the Jews. These decrees fostered hatred against the Jews, but they could not be carried out to the

letter, since the princes in their monetary difficulties could not get along without Jewish help. Emperor Rudolph, the first of the house of Hapsburg, who was indebted to a Jew by the name of Amschel Oppenheimer, confirmed in 1277 the Jews' statute of Duke Frederick the Belligerent; but a year later he declared the Jews ineligible for public office, a privilege which his successor, Duke Albert, confirmed to the citizens of Vienna in 1296.

The fourteenth century in general brought much misery to the Jews of Vienna. In 1337 outrages were committed against them, but Duke Albert and the nobles interfered to protect them from further injustice. In recognition of the good-will shown by the citizens of Vienna in time of distress, and in anticipation of its continuance, the Jews declared, in a document written in Hebrew and dated Vienna, June 19, 1338, that they would lend to the citizens of Vienna, rich as well as poor, a pound of Vienna heller at a weekly interest of three heller. On the following day appeared the "Jews' decree" of the dukes Albert and Otto, and the endorsement of the Jewish document (G. Wolf, "Gesch. der Juden in Wien," p. 11; *idem*, "Studien zur Jubelfeier der Wiener Universität," pp. 170 *et seq.*; Wiener, *l.c.* p. 221).

The Jews of Vienna appear to have suffered during the persecutions consequent on the Black Death (1369), and in 1370 they were seized, deprived of their possessions, and expelled from the city. But in spite of these persecutions the Jews very soon returned to Vienna and other places. The dukes Albert and Leopold, who were continually in financial straits, needed the Jews, as did also their successors. At their pleasure they "killed the Jews' letters," that is, they canceled the debts of the burghers to the Jews, often those of an entire city. One of the

richest Jews of Vienna, called in the documents indifferently David the Steuzz, Von Steuzz, Steuzzel, or Steuzzlein (the Jew Hennlein von Neuenburg's son), who from 1350 to 1386 had business relations with the nobles and the burghers, often lent large sums to Duke Albert; and after his (Steuzz's) death his son Jonah entered upon his rights; only the duke himself could bring an action against him (Wiener, *l.c.* pp. 224 *et seq.*; according to Document No. 169 [p. 240] he should be called "Jonah the Steusscn" instead of "Jonah the Russian").

In 1421 Duke Albert issued a decree that in future no Jew should be permitted to live in Austria; this decree was renewed by Duke Ladislaus in 1453 ("Monumenta Germaniæ," xi. 517; Wertheimer,

"Die Juden in Oesterreich," i. 97; Wolf, *Gesch.*, pp. 18 *et seq.*; Wiener, *l.c.* p. 239; Joseph ha-Kohen, "Emek ha-Baka," p. 219; "Terumat ha-Deshen," responsa, No. 241). The houses of the Jews who had been buried or expelled were sold or given away by the duke, the synagogue at Tulln was presented to the convent of St. Dorothea in Vienna, and the synagogue at the latter place was torn down and the stones used for building a university. Notwithstanding these persecutions the spir-

Plan of the Old "Judenstadt" at Vienna.

itual activity of the Vienna Jews was considerable. One of the earliest rabbis of Vienna was Isaac b. Moses (called also Isaac "Or Zarua'," after the title of his work, or simply Isaac of Vienna). A ritual question was addressed to him in 1240 by Abigdor ha-Kohen, the son-in-law of the learned and rich Hayyim b. Moses of Wiener-Neustadt, who, together with his brother Eliezer,

#### Early Rabbis.

was at the head of the Viennese rabbinate. Another rabbi of Vienna was Meir ha-Levi ben Baruch, who restored the rabbinical ordination. His son probably was the "Judenmeister," Baruch of Vienna, with whom, together with Meir b. Baruch, who died about 1400, the dukes Albert and Leopold came to an agreement in regard to security for 20,000 gulden (Wiener, *l.c.* p. 228, No. 82). Abraham Klausner filled the Vienna rabbinicate; the last named collected the various synagogal

customs ("miuhagin"), and was also a money-broker.

In spite of the decree of banishment Jews still remained in Vienna. In 1512 seven Jewish families were living there, the members of which interceded for their unfortunate coreligionists in Marchegg, who were in danger of being burned, like those of Bösing (Wolf, *Gesch.* pp. 23, 255). In 1528 Emperor Ferdinand issued a decree "for the Jewish residents of Austria, who are the property of the royal chancery," and ordered that every Jew who came to Vienna should immediately report to the government office, where he would receive a "ticket"; he must wear the Jews' badge, a ring of yellow cloth, on his outer garment, "uncovered and unhidden"; and might stop only at the two houses set apart for Jews. The Jews of Vienna begged that their coreligionists who

The "Judenturm" at Vienna.  
(From an old print.)

had been driven out of Presburg in this year might be allowed to settle in Lower Austria, but Ferdinand refused their request. In 1542 Emperor Ferdinand conceded to the Jew Moses the right to carry on in the country a small business and "trade," in recognition of his services at the mint; and in 1544 he granted to the Jew Lazarus, physician to his children, the privilege of living wherever he chose.

The decrees of banishment were renewed from time to time. A mandate of Jan. 2, 1554, ordered that the Jews should leave the territory of Lower Austria at the end of six months; but the period was several times prolonged. The same proceedings took place when the decrees of banishment were renewed in 1567 and 1572. However, toward the end of 1575 the Jews were really expelled; but they did not stay away very long, for the impecuniosity of the emperors and the interests of the state often inclined the monarchs to be favorably disposed toward them, outweighing religious hatred and the still stronger jealousy of the non-Jewish merchants. Yet the

condition of the Jews was permanently insecure, for they were without rights and privileges. When those of Vienna, who numbered in all thirty-one families, were not able, in 1599, to pay the 20,000 florins demanded of them, an order was issued, Feb. 5, 1600, that they should leave Vienna and Austria within fourteen days. All obeyed except eleven families and the physician Elias Aluanus (Halfon), the "Erztney doctor"; but all the exiles soon returned, with others, to Vienna (Wolf, "Studien," pp. 173 *et seq.*).

The condition of the Jews improved under Emperor Ferdinand II. He renewed Emperor Matthias' decree that they could be driven from the cities only with the consent of the ruling emperor; he protected them against force and oppression, and expressly maintained their rights, so that the decree of general expulsion dated Jan. Under Fer- 7, 1625, was not carried out (Wolf, dinand II. "Die Juden Unter Ferdinand II." in "Jahrbuch für Gesch. der Juden," i. 218 *et seq.*). Those Jews whom the people of Vienna desired to expel in 1623 were assigned to the district of the Lower Würth as a permanent place of residence, with protection "forever." A wall enclosed this new Jews' town, and here the wealthy ones among them acquired houses and gardens; they had their own shops, and soon a beautiful synagogue was built. They paid 600 florins a year in taxes to the city, and, apart from several imposts, 10,000 florins a year into the imperial treasury. After the death of Ferdinand II. (1637), to whose widow, the empress Eleonora, the Jews of Vienna were required to pay 2,500 gulden a year, the burghers addressed a petition to his successor, Ferdinand III., asking him "to drive out all of the Jews, no one excepted, three miles beyond this city, if not from the whole country" (Wolf, "Gesch. der Juden in Wien," pp. 261 *et seq.*). The emperor would not grant this request, but satisfied the burghers by depriving the Jews of the right to trade in the inner city, where the citizens had their shops. Free entrance into the city was henceforth denied the Jews. Trembling for their existence, the Jews of Vienna offered to assume a state debt of 8,000 gulden and to present the emperor with 15,000 gulden, and promised to trouble him no longer with their disputes.

In Vienna, where, in 1620, about fifty families were living—among them several court Jews—the community had two synagogues and a cemetery. Its first rabbi, mentioned in 1600, was **Abraham Flesch**, who was followed by **Isaac Hayyim of Opatow** (Sept., 1623); **Veit Munk**; **Yom-Tob Lipmann Heller**, of Nikolsburg; the physician **Leo Lucerna**, or **Judah Löb Ma'or Kaṭon** (d. 1635; built a synagogue at his own expense); and **Hayyim Menahem Mann**. The Vienna rabbinat, which supported higher Talmudic schools and philanthropic institutions, had among its more distinguished incumbents **R. Phöbus**, who emigrated to Palestine in 1655; he was succeeded by **Shabbethai Sheftel Hurwitz**. About this time **Zacharias Levi**, brother of Nathan Feitel (d. 1643), learned in rabbinical lore, built a third synagogue, in connection with a richly eudowed Tal-

nudic school, and Vienna became a center of Jewish learning and cabalistic speculation. The last rabbi of Vienna and of Lower Austria was **Gershon Ashkenazi**, whose colleagues were **Mordecai Löb Oettingen** (the friend of the Christian divine Wagenseil) and the preachers **Uri Lipmann Hirtz Koma** and **Enoch Fränkel**.

The Jewish community of Vienna in 1660 numbered about 500 families, and in spite of the many taxes, assessments, and war duties was in a flourishing condition. But troublous times were in store for it. The hatred of the burghers increased with their intolerance, leading to difficulties in which the gov-

against them. The riots turned into wholesale looting expeditions, and the students and the mob attempted to fire the ghetto. The military guard had to be called out; but

#### Riot of 1668.

it was only on the third day of the riot that the emperor gave orders that no non-Jew was to set foot in the Jewry. In further evidence of the desirability of banishing the Jews, they were accused of being in secret communication with the Swedes. It was finally decided, July 26, 1669, to expel a number of Jews from Vienna and Lower Austria; 1,346 persons were affected by this decree of banishment. In their dire need the Jews of Vi-

EXTERIOR OF THE LEOPOLDSTRASSE SYNAGOGUE, VIENNA.  
(From a photograph.)

ernment had to interfere. When in May, 1665, the body of a woman was found in a pool in the Jewry, the Jews were accused of having murdered her, and their lives were in jeopardy. Unfortunately for them, Emperor Leopold, who was entirely in the hands of the Jesuits, married a Spanish infanta. When the crown prince died, in Jan., 1668, three months after his birth, the emperor and empress formed the thought of dealing with the Jews in Spanish fashion. A fire happened to break out in the newly built royal palace in February of the same year, and the populace accused the Jews of having kindled it. In April, 1668, delegates of the city of Vienna appeared before the emperor, praying him to destroy the Jews "root and branch"; and before the end of the month outrages began

enna once more sent a memorial to the emperor; but in vain, for the commission had attributed to them all kinds of crimes. On Monday, March 1, 1670, a solemn proclamation was made in all public places that "for the glory of God" all Jews should, on penalty of imprisonment and death, leave Vienna and Upper and Lower Austria before Corpus Christi Day, never to return. Hirtz Koma and the physician of the community, Leo Winkler, in the name of the community made a last attempt to propitiate the emperor by offering him 100,000 florins and, in addition, 10,000 florins a year. In the meantime the period fixed for the exodus had been prolonged at the intercession of influential persons. In July the Jews began to leave, and by Aug. 1 not one Jew

INTERIOR OF THE LEOPOLDSTRASSE SYNAGOGUE, VIENNA.  
(From a photograph.)

was left in Vienna. The cemetery in the Rossau was protected by the city in consideration of the sum of 4,000 florins; the houses of the Jews became the property of the city; the large new synagogue was turned into a church, renamed the Leopoldskirche, and solemnly consecrated on Aug. 18; a Jew's house was turned into the parsonage. In place of the old synagogue, and out of its ruins, was built a little church—that of St. Margaret, since demolished. Many of the more prominent families settled in Berlin (D. Kaufmann, "Die Letzte Vertreibung der Juden aus Wien und Niederösterreich," Budapest, 1889; G. Wolf, "Die Juden in der Leopoldstadt im 17. Jahrhundert in Wien," Vienna, 1864).

Vienna only too soon regretted the expulsion of the Jews. The deficit in the state tax amounted, according to the report of the royal exchequer, to 40,000 florins a year; the "Landstände" also reported a loss of 20,000 florins owing to the departure of the Jews. The citizens of Vienna, who had undertaken

ber of the imperial household, the second as his assistant. But the hatred of the populace against the Jews was as bitter as it had been before the expulsion, leading to frequent riots, and, as in 1705 and 1710, to repeated demands for their banishment. Gradually more families settled there: the Schlesingers; Marcus and Meyer Hirschel, who contributed 150,000 florins to the building fund of the Church of St. Charles Borromeo; the Arnsteins and Eskeles; the Leidesdorfers; Diego d'Aguilar; and many others.

In 1753 there were 700 Jews in Vienna, who paid a yearly toleration tax amounting to 14,000 gulden.

The plan, proposed repeatedly, to confine the Jews to a ghetto was not carried out; but they were huddled together in houses in certain streets, only a few court Jews being permitted

to live among Christians. The precarious position of the Jews was in a way improved by the "Jews'

JEWISH ORPHAN ASYLUM, VIENNA.

(From a photograph.)

to pay the yearly Jews' tax of 14,000 florins, could hardly pay their own taxes. At a conference held in Wischaw, Moravia, Sept. 26, 1673, between representatives of the government and of the Jews it was agreed that 250 Jewish families might return to Vienna and occupy fifty business places in the inner city on payment of 300,000 florins and the former yearly tax of 10,000 florins. In view of the hopelessly depleted treasury, the royal exchequer considered this offer a "remarkable piece of good fortune," and on Feb. 28, 1675, the agreement was ratified; soon thereafter several Jews returned to Vienna. Samson Wertheimer, who, with his partner Samuel Oppenheimer, had rendered important services to the state, returned to the city in 1684, the first as a mem-

ber of the imperial household, the second as his assistant. But the hatred of the populace against the Jews was as bitter as it had been before the expulsion, leading to frequent riots, and, as in 1705 and 1710, to repeated demands for their banishment. Gradually more families settled there: the Schlesingers; Marcus and Meyer Hirschel, who contributed 150,000 florins to the building fund of the Church of St. Charles Borromeo; the Arnsteins and Eskeles; the Leidesdorfers; Diego d'Aguilar; and many others.

Emperor Joseph II. also did not wish to favor the Jews or increase their numbers in his dominions;

POLISH SYNAGOGUE AT VIENNA.  
(From a photograph.)

but he was at least the first Austrian ruler to recognize the Jew as a human being. The much-praised Edict of Toleration, published Jan. 2, 1782, permitted the Jews to learn all kinds of trades (without, however, granting the right to hold a master's certificate) and to lend money on real estate, though they were not permitted to acquire

any. The tolerated Jew—that is, the **Joseph II.** one who paid protection or toleration money—could live with his family wherever he chose in Vienna. Foreign Jews could sell their goods at the fairs, but could remain in Vienna no longer than was necessary to finish their

Jews and Jewesses in Vienna who were held in high esteem for their culture and wealth. The salons of Fanny von ARNSTEIN, wife of the banker Nathan von Arnstein, and of her sister Cecilia von Eskeles, wife of Bernhard von ESKELES, were at the time of the Congress of Vienna attended by princes and nobles, statesmen and high civic dignitaries, scholars and artists. After several unsuccessful petitions, the Jews of Vienna were allowed, in 1811, to fit up a "Betstube" (room for prayers) in a house they had bought on the old Dempfingerhof; twelve years later a synagogue was built, due to the efforts of M. L. Biedermann, I. L. von Hoffmannsthal, Joseph

"HORE WARTZ," THE JEWISH INSTITUTE FOR THE BLIND, VIENNA.

(From a photograph.)

business. All laws compelling differentiation in attire, as well as the prohibition against visiting public places of amusement, were repealed. The sixty-five families living in Vienna in 1784 were not allowed to form a congregation or to have a synagogue. In Vienna there were established at that time a Jewish physician (Samuel B. Oppenheimer), a Jewish lawyer (A. Joel), and a Jewish dramatist (David Benedict Arnsteiner). In 1788 Emperor Joseph decreed that the Jews were liable to military service, excepting only those of Vienna who were "protected."

Under Leopold II. the status of the Jews remained the same. He instituted the "Collectentaxe," a toll levied upon every Jew who went to Vienna. In spite of the harsh conditions under which they were compelled to live, there were even then

von Wertheimstein, and others, and Isaac N. MANNHEIMER was called as preacher and teacher of religion, and Salomon SULZER as cantor. The Jews of Vienna now possessed a synagogue, a hospital which had been fitted up in the eighteenth century, and a school of religion; the teachers in the last-named were Mannheim, J. L. SAALSCHÜTZ, Leopold Breuer, and Gershon Wolf.

The number of tolerated families increased from year to year; in 1820 there were 135 families, and 197 in 1847; in 1848 there were 4,000 Jews in the city. The congregation of Vienna built in 1855 a second synagogue, calling Adolf JELLINEK and later Moritz GÜDEMANN as preachers.

The restrictions placed upon the Jews in Vienna

INTERIOR OF THE "TURKISH TEMPLE" AT VIENNA.  
(From a photograph.)

continued under Emperor Ferdinand. In 1846, the year in which the medieval *OATH MORE JUDAICO* was repealed, the representatives of the community of Vienna sent a petition to the emperor praying for a betterment of their condition; this petition was indorsed by the magistracy and the government, but it was not acted upon. Then came the Vienna revolution of March, 1848, during which the resolute Adolf FISCHHOFF distinguished himself. The constitution of March 4, 1849, which recognized the equal rights of all citizens, regardless of creed, was repealed

ministered by a board of thirty-six members, elected by taxpayers. The expenses are defrayed by assessments and fees. The assessments are levied on each Jew according to his means, the lowest sum being 10 kronen (\$2), and the highest, according to statute, 12,000 kronen, although occasionally this is voluntarily exceeded by individual members of the community. In 1903 communal taxes to the amount of 1,058,809 kronen were paid by 16,735 members.

The total receipts of the community for 1903

JEWISH GIRLS' ORPHANAGE, VIENNA.

(From a photograph.)

Dec. 31, 1851. On Jan. 18, 1860, the Jews of Lower Austria were permitted to acquire real estate.

M. K.

—**Present Conditions:** The Jewish population of Vienna is organized, in accordance with the law of 1890, in one community, which embraces in its territory the municipal district of Vienna. It is ad-

amounted to 2,243,449 kronen, and the total expenditures to 2,147,506 kronen, the latter being itemized as follows:

	Kronen.
Synagogues and ritual institutions.....	419,900
Religious instruction and schools.....	260,235
Hospital.....	301,731
Alms-house.....	145,716
Charities.....	223,431
Cemetery and burials.....	532,364
Administration and miscellaneous.....	464,129

The records of Jewish births, marriages, and burials in Vienna are kept by the community. In 1900, the date of the latest census, there were 146,926 Jews in the city; and their increase in the course of the nineteenth century, as well as their numerical relation to the total population, is shown in the following table:

Year.	Total Population.	Jewish Population.	
		Number.	Percentage to Total.
1800.....	232,000	1,200	0.5
1830.....	317,000	1,640	0.5
1856.....	476,000	15,600	3.30
1869.....	607,520	40,300	6.60
1880.....	725,680	72,580	10.00
1890.....	1,363,548	118,495	8.80
1900.....	1,674,957	146,926	8.77

The most important growth of the Jewish population, according to this table, was between the years 1830 and 1856, and between 1880 and 1890, the former being explained by the repeal, in 1848, of the law restricting Jewish residence in the city, and the latter by the annexation of suburban communities to the city. While the first of these extraordinary increases in number marks an actual rise in percentage, the second is a decrease in this respect, since the proportion of Jews in the nine incorporated suburbs was far lower than in the ten old districts.

The following table gives the annual number of births, marriages, and deaths among the Jews in comparison with those among the total population of Vienna according to the average of recent years:

	Total Population.		Jewish Population.	
	Number.	Percentage.	Number.	Percentage.
Births.....	55,000	3.43	3,300	2.36
Marriages.....	16,000	1.00	850	0.60
Deaths.....	33,000	2.06	1,900	1.36

It is clear from this table that the increase in the Jewish population is relatively less than among the other inhabitants, although a hopeful feature is the small proportion of deaths, which may be due to a more rational mode of life among the Jews. A proof of their unfavorable political situation in Austria is afforded by the large number of conversions to Christianity, which amounted to 559 in 1900, and 617 in 1904. The community provides for daily public worship in five synagogues erected and maintained by it. In addition to

**Synagogues.** these synagogues, Vienna contains a large number of synagogal associations, which have their own places of worship and are subventioned in great part by the community. On the high festivals temporary synagogues are opened to meet the extra demands. The permanent synagogues of Vienna provide accommodations for about 7,000 men and 5,600 women.

The liturgy used in the synagogues of the community, and in the majority of those associations mentioned above, is that introduced by I. N. MANNHEIMER and Salomon SULZER; but in the Grosse Schiffgasse ('Adat Yisrael) synagogue, and in almost all the smaller ones, the old ritual is followed, and in the place of worship of the Turkish Jews (in the second district, Zirkusgasse), who form a community of their own, the Sephardic ritual is adhered to. The shehitah and the sale of kosher meat are under the supervision of the rabbinate of the community of Vienna, and in some stalls the sales are made under

the special control of the Orthodox community 'Adat Yisrael. There is also a mikweh.

Religious instruction forms a part of the curriculum of the public schools of the lower and intermediate grades; the community provides for it entirely in the primary schools, while in the gymnasiums and real-schools, where the teachers are appointed and salaried by the state, it is supervised by inspectors commissioned by the community. In the primary schools the expenses of this instruction are borne by the community, with the aid of a fund contributed by the state in accordance with the law, although this covers only a small part of the actual disbursements; but in the secondary schools the entire expense of religious instruction falls on the state. Two hours weekly are allotted to this instruction in the curriculum, but the community maintains or subventions Hebrew schools for those who desire to acquire a more thorough knowledge of Bible and Talmud, while the large and valuable library of the Jewish community affords a wealth of material for students. The public schools of Vienna are non-sectarian, but the ruling majority have endeavored, partly with success, to enforce a sectarian division by evading the existing laws.

The chief institutions of Jewish learning in Vienna are as follows: (1) the ISRAELITISCH-THEOLOGISCHE LEHRANSTALT, founded in 1893 by the society for the establishment and maintenance of a

**Educational Institutions.** Jewish theological institute in Vienna; (2) the Talmud Torah, founded in 1854, with an average attendance of 240; (3) the general Austro-Jewish institute for deaf-mutes, founded in 1853,

with an average of 92 pupils and an annual expenditure of about 108,000 kronen; (4) the Jewish institute for the blind, founded in 1870, with an average of 60 pupils, and an annual expenditure of about 75,000 kronen; and (5) the Jewish kindergarten, founded in 1843, with an average of 330 children, and an annual expenditure of about 15,000 kronen. In 1900 a Jewish atheneum was established, in which evening lectures on various subjects are given to large Jewish audiences, composed especially of the poorer classes. Vienna is also the home office of the Baron de Hirsch fund for the promotion of popular education in Galicia and Bukowina and the seat of the Zionist Actions Comité.

The number of Jewish pupils in the various classes of schools as compared with the total number is given in the following table (p. 438), whose figures are cited partly according to the averages of recent years, and partly on the basis of the statistics of the school-year 1901-2. These figures are especially noteworthy when the percentage of Jewish inhabitants to the total population (8.8) is borne in mind.

Vienna's situation in the vicinity of Russia and Rumania, the great centers of Jewish emigration, has resulted in large accretions of impoverished foreign Jews; and the increased destitution of the native Israelites, due to anti-Semitic agitation, renders it readily intelligible that, despite the liberality of their more wealthy coreligionists and despite the existence of numerous societies and foundations, poverty is prevalent among the Viennese Jews. This

Class of School.	Total Number of Students.	Jewish Students.	
		Number.	Percentage.
University.....	6,300	1,560	24.74

is intensified by an unfortunate division of forces among individual associations.

throne; the cost of its maintenance is about 145,000 kronen annually.

The following are devoted exclusively to the care of the poor: the asylum for orphan girls (60 inmates; annual expenditure about 40,000 kronen); the Lea Merores asylum for orphan girls (50 inmates; opened in 1904); the Baron Springer asylum for orphan boys (founded 1890; 50 inmates); the employment bureau for girls (accommodations for 189) and the employment bureau for boys (accommodations for 36), both institutions maintained by the Theresien Kreuzer Verein; the employment bureau for female apprentices (accommodations for 30), maintained by the Leopoldstadt Ladies' Club; the home for male apprentices, maintained by the Society for the Promotion of Handicrafts Among the Native Jews. Various forms of charitable work are also carried on by a large number of Jewish societies, of which the most important are given in the table on page 439.

PART OF OLD CEMETERY AT VIENNA.  
(From a photograph.)

The community maintains a number of charities. A hospital was founded by the Vienna branch of the house of Rothschild, with 170 beds **Benevolent** and an annual expenditure of about **Insti-** 300,000 kronen; it has recently been **tutions.** endowed by Baron Nathaniel Rothschild with 2,000,000 kronen to render all its space available. A home for the aged and infirm, with 248 beds, was founded in honor of the fiftieth anniversary of the emperor's accession to the

Vienna is the seat of the following societies, which deserve mention here, although their sphere of activity is not restricted to this city, or else is not confined to philanthropic objects: the ISRAELITISCHE ALLIANZ (founded 1872); the OESTERREICHISCH-ISRAELITISCHE UNION (founded 1885); the Allgemeine Oesterreichisch-Israelitische Bund; the Association for the Aid of the Needy Jewish Population of Galicia; and the Baroness Hirsch Foundation for the Assistance of Boys and Girls in Austria.

An important factor in the care of the Jewish poor in Vienna is formed by the foundations, controlled, for the most part, by the community. The total capital of this class of funds amounts in round numbers to 8,500,000 kronen, although these figures include a number of foundations which are not benevolent, such as bequests for the care of graves and for memorial services.

The community provides for the maintenance of a cemetery, as well as for the preservation of the older cemeteries. In the Zentralfriedhof (communal cemetery) a portion is reserved especially for the Jews. Every Jew receives a separate grave, whether it is paid for or not, although nearly 70 per cent of all burials in Vienna are free. Two old cemeteries, now disused, exist in Vienna, one in the Seegasse, closed about 1783, and the Währinger graveyard, closed in 1879.

D. T. L.

**VIENNE:** Town in the ancient province of Dauphiné, France. Jews dwelt there as early as the tenth century (Gross, "Gallia Judaica," p. 191). They lived in a special quarter, still (1905) called "the Jewry," and in the thirteenth century had a beautiful synagogue (Carmoly, "Itinéraires," p. 187).

The following were the most noted scholars of Vienne: the tosafist Tobiah ben Elijah, author of a commentary on the Pentateuch and of liturgical poems (Zunz, "Z. G." pp. 56, 97; *idem*, "Literaturgeschichte," p. 303); Abraham ben Ephraim, a pupil of Tobiah and author of a work on casuistics; Yaḳar of Vienne, called also "Yaḳar ben Moses" of Burgundy (Vienne was for a time the capital of Burgundy), who composed posekim (legal decisions), fragments of which are still extant (Gross, *l.c.* p. 193).

**BIBLIOGRAPHY:** Gross, *Gallia Judaica*, pp. 191-194.

G. S. K.

**VILLEFRANCHE** or (**VILLA FRANCA**): Town in the mountain district of the department of Rousillon, France; belonged formerly to Aragon. It was founded in 1095, and had a Jewish population as early as the middle of the thirteenth century, among the first settlers being Jews from Pro-

vence. In 1274 the small community was granted permission to lay out a cemetery; and in 1328 it was allowed to rebuild its synagogue, which had been destroyed about seven years previously. The edifice was presented in 1392 to the settlement of Monte de Pacht.

Villefranche, now called Villefranche de Confluent, was the birthplace of LEVI BEN ABRAHAM. It should not be confounded with **Villafranca de Panadés** in Catalonia, nor with **Villafranca** in Navarre, both of which towns had Jewish communities, the latter until 1498.

**VINE.** See GRAPE.

**VINEGAR:** In the Biblical period vinegar was prepared either from wine or from cider, the former variety being termed "homez yayin," and the latter "homez shekar." It was used to moisten the flat loaves of the harvesters, and was also drunk when mixed with water, although thirst could not be quenched with it alone.

Since Jewish wine was not allowed to ferment, being intended for the altar, and therefore being necessarily clean Levitically, vinegar, which in Talmudic times was called also "the son of wine," was obtained from the lees or by the addition of barley to the wine or cider. The alteration usually required only three days, and the smell changed before the taste, although some wines were particularly liable to change. Though vinegar could become wine only by a miracle, the price of the former equaled that of the latter, and a fall in the value of the one depressed the rate for the other.

The chief varieties of vinegar were wine-vinegar and cider-vinegar, vinegar of late grapes, vinegar changed by harley, and soured vinegar. Pickles and meat were preserved in vinegar, and lettuce was dipped into it, while "The bitterer the salad of endives, the stronger must be the vinegar" was a Palestinian proverb. Vinegar was used with asafetida, the favorite condiment of antiquity and of the Middle Ages.

The effect of vinegar was astringent, but it was also used frequently because of its soothing and cooling effects. Medicinally, it might be employed for dandruff, and even for dressing wounds, while it was used as a gargle for toothache. Olives were sprinkled with vinegar to free them from their pits; it was used also in dyeing, and in adulterating oil. In view of the liability of wine to change, barrels containing 10 per cent of vinegar were deemed fit for purchase, but the dealer was responsible for a limited period only, except in the case of wine for the Temple, for which he was liable until the wine was used. The Halakah considered the question whether wine and vinegar were to be considered as one, and forbade the use of the vinegar of Gentiles, since it was prepared from forbidden wine. The question was raised whether wine which had turned to vinegar became subject to the prohibition when touched by a Gentile. On account of its calming effect vinegar was forbidden on the Day of Atone-

ment; and the prohibition of vinegar in the case of Nazarites was fully discussed in the Halakah.

The passage in which Ruth was bidden to dip her bread into vinegar (Ruth ii. 14) was interpreted by the Haggadah as referring to Manasseh, one of her descendants, whose deeds were sharp as vinegar. Among the proverbs concerning vinegar, in addition to Prov. x. 26 and xxxv. 20, were the following: "Mayest thou have neither vinegar nor salt in thy house!" and "Much vinegar makes the wine cheap."

I. LÖ.

**VINEYARDS.** See GRAPE.

**VINNITSA (VINITZA):** Russian town in the government of Podolia; situated on the banks of the Bug. Vinnitsa was founded in the fourteenth century on the left bank of the Bug, and was protected by two castles. The town suffered much in the sixteenth and seventeenth centuries from the depredations of the Tatars and the Cossacks. Jews lived probably in Vinnitsa in the fifteenth century, but 1532 is the date of the first documentary mention of them. In that year the local Jews carried on extensive business operations as cattle-drovers, and one of them, Michael of Vinnitsa, paid customs duties on a single drove of 2,000 head of sheep and cattle. Reference is also made to a Jew (name not given) who in 1552 held the lease of the local customs duties. In 1616 there were only fifty Jews in Vinnitsa who paid taxes on their houses. During the COSSACKS' UPRISING the town was taken and pillaged by Chmielnicki's followers and its Jewish inhabitants were massacred. It was retaken by the Polish troops, and then fell again under the power of the Cossacks and Tatars, changing hands several times. It suffered severely from the HADAMACKS in the eighteenth century. The protecting castles had by that time disappeared, and the inhabitants, both Catholics and Jews, sought refuge in the Jesuit college founded by Ladislaus in 1649. In 1774 Vinnitsa was temporarily occupied by the Turks, and toward the end of the eighteenth century was almost entirely ruined.

Vinnitsa had 23,591 inhabitants in 1878, of whom 13,750 were Jews. The town was then an industrial center of some significance, possessing sixteen factories and other industrial establishments. Nine fairs were held there annually, though with but a limited volume of trade. The Jewish community possessed thirteen synagogues and houses of prayer, a Jewish two-class school, and a Jewish hospital. Most of the important distilleries (an ancient industry, to which the town owes its name) were owned by Jews. By 1879 the population of Vinnitsa had grown to 28,995, including more than 15,000 Jews. The town had in that year twenty-nine industrial establishments, and the Jewish community had added a Talmud Torah to its other communal institutions.

On April 3 (Old Style 16), 1905, the Jewish stores in the market-place in Vinnitsa were demolished by a drunken mob composed partly of reservists; several Jews caught on the streets were severely beaten. The conflict attracted the attention of a number of Jews organized for self-defense, who successfully repelled the assailants. Five soldiers and five Jews

were injured. Order was restored by the police and the military.

J. G. L.

**VIOL** (בַּלַּיִט, lit. "skin"): Musical instrument; next to the "kinnor," it was the one most used by the Israelites. The Old Testament furnishes no description of it, and resort must therefore be had to conjectures regarding it. The viol is commonly identified with the santir (corresponding to the "pesanter" [= ψαλτήριον] of Dan. iii. 5), an instrument which is in use among the Arabs at the present time. The santir consists of a low, oblong box with a flat bottom and a somewhat convex sounding-board, over which the strings are stretched. The player sits on the ground, or on a low stool, and holds the viol in his lap.

A similar instrument is represented in a picture found in the palace of Kuyunjik, which shows a band of musicians, both men and women, who are followed by other women singing or beating time with their hands as they go to greet the returning conqueror, Assurbanipal. One of these musicians, with a plectrum in his right hand, plays an instrument consisting of a hollow box with strings stretched over it. Whether the left hand likewise plucks the strings (as is most probable), or presses them down to gain the desired pitch, is not clear. The name "nebel" would be very appropriate for such an instrument, with reference either to the convex shape of the sounding-board, or to the fact that the sounding-board consisted of animal membrane. The term "pi ha-nebel" in Amos vi. 5 would suggest the opening in the sounding-board across which the strings are stretched. Riehm, however, prefers to associate this term with the portable, many-stringed harp which is represented, on the picture at Kuyunjik, as having its sounding-box placed on the broad, upward-slanting upper portion of the frame. Yet Riehm himself points out that the shape of the Jewish nebel must have been somewhat different; for under any other hypothesis the name of this instrument becomes inexplicable. How many strings ("minnim") the instrument generally had is unknown. The "nebel 'asor" mentioned in Ps. xxxiii. 2 was probably different from the ordinary nebel; otherwise the additional word "asor" is superfluous. The instrument of later times is known to have had twelve strings (comp. Josephus, "Ant." vii. 12, § 3).

W. N.

**VIPER.** See SERPENT.

**VIRGINIA:** One of the Middle Atlantic states and one of the thirteen original states of the United States of America; seceded from the Union April 17, 1861; readmitted 1870. As early as 1624 the names of Elias Lagardo, Joseph Moise, and Rebecca Isaacke are found in the "Musters of the Inhabitants of Virginia." In 1658 one Seigneur Moses Nebemiah is mentioned as a party to a lawsuit ("Publ. Am. Jew. Hist. Soc.," xi. 70). It is probable that a number of Jews from Maryland removed to Richmond at an early date.

Nothing further is heard of Virginia Jews till 1754, when Michael Franks and Jacob Myer accompanied Washington in his expedition across the Alleghany Mountains, and received a reward for their gallant services in the campaign. In the list of Virginians who served in the Revolutionary army in the capacity of officers occurs the name of Isaac Israel, a lieutenant in the Eighth Virginia Regiment. The Congregation Beth-Shalom of Richmond, the oldest congregation in the state, was in existence prior to 1790, in which year it joined with the congregations of Philadelphia, New York, and Charleston in addressing a letter to President Washington. See RICHMOND.

Virginia has the following Jewish communities: **Alexandria** (Congregation Beth-El, founded June 3, 1878; a Hebrew Benevolent Society and a cemetery). **Berkley** (a congregation and a religious school). **Charlottesville** (Congregation Beth Israel, Moses Leferman being prayer-leader; and a cemetery). **Clifton Forge** (a congregation holding holy-day services). **Danville** (Congregation Beth Shalom). **East Radford** (congregation). **Fredericksburg** (Hebrew Aid Society, founded about 1880; has twelve members). **Hampton** (congregation). **Harrisonburg** (congregation). **Lynchburg** (congregation). **Newport News** (congregations Adath Yesburun and Ilachnosath Orchim; and a Jewish Sunday-school). **Norfolk** (with a large Jewish community, supporting three congregations, a burial association, several charitable organizations, and a number of social and literary clubs). **Petersburg** (two congregations: the Orthodox congregation and the Rodeph Shalem, the latter founded in 1865). **Pocahontas** (has no organized congregation, but the community holds special services on Saturdays and holy days). **Radford** (community holding holy-day services). **Richmond** (see Jew. Encyc. x. 406). **Roanoke** (Congregation Emanu-El, founded 1890; and a cemetery). **Staunton** (a congregation and a benevolent society).

Virginia contributed 113 Jewish soldiers to the Civil war, and about thirty to the Spanish-American war. At present (1905) the number of its Jewish inhabitants is estimated at 15,000 in a total population of 1,655,980.

A.

A. M. Ho.

**VIRTUE, ORIGINAL** (Hebr. *Zekut Abot*, literally "merit of the Fathers"): A term invented by S. Levy as a contrast to the expression "original sin," and designating the specifically Jewish concept of the influence of the virtue of ancestors upon descendants. The doctrine asserts that God visits the virtues of the fathers upon the children for His name's sake and as a mark of grace; but it would appear, on the other hand, that the principle applies only when the children continue the piety of their parents. The Biblical basis for the doctrine is to be found in the second commandment (Ex. xx. 5), which states that God shows mercy unto thousands of generations that love Him and keep His commandments, and in Ps. ciii. 17-18, "the mercy of the Lord is from everlasting to everlasting upon them that fear him, and his righteousness unto children's children; to such as keep his covenant, and to those that remember his commandments to do

them." Thus Isaac was promised a blessing because Abraham had kept God's commandments (Gen. xxvi. 2-5); and the doctrine is also formulated in the first benediction of the "Shemoueh 'Esreh," which is technically known as the blessing of "Abot," or "the Fathers." The concept is intimately connected with the idea of the covenant with the PATRIARCHS, to which an appeal is made in Ex. xxxii. 13; Lev. xxvi. 42, 44, 45; and Deut. vii. 12, while an allusion to it is contained in the phrase "his great name's sake" (I Sam. xii. 22; comp. Ezek. xxxvi. 21, 23), which recalls the covenant. It thus forms part of the concept of the CHOSEN PEOPLE.

If the covenant is still kept with descendants, though they be unworthy, this is the result of God's grace ("hesed"); and it is possible that the original form of the expression was "hesed Abot" (= "grace of the Fathers." The Targum, however, uses "zekut" to translate the biblical He-

**Result of** brew "zedakah" (comp. Gen. xv. 6; Deut. ix. 5, 6). The injunction of

the second commandment is explained by the Targum and the Talmud (Sanh. 27b) on the principle that the sins of the fathers are visited upon the children only when they imitate the deeds of their parents (see Rashi and Ibn Ezra *ad loc.*). This doctrine underlies the Jewish conception of life, drawing its inspiration from an idealized past (comp. "Look unto Abraham your father, and unto Sarah that bare you," Isa. li. 2), and laying stress upon tradition and upon the ritual ceremonies intended to keep tradition alive. It is closely associated, moreover, with the idea of an organic or dynamic solidarity in Israel as a body existent through past, present, and future; and the principle that "all Jews are responsible one for another" is specifically connected in the Talmud with the idea of original virtue (Sanh. 27b; Shab. 39a; R. H. iii.).

The doctrine under consideration is limited by the concept of the reward of virtue, which, according

to Jewish teaching, is the opportunity of performing further virtuous acts. "The wages of virtue is virtue"

**Virtuous.** (Ab. iv. 2), and "when the righteous do the will of God, they acquire

strength and power to perform further acts of righteousness" (Yalk., Lam. 44). Special warning is given against depending upon original virtue, so that even one who is exceedingly righteous should not eat from (that is, depend upon) the merit of his fathers (Sanh. 81a). The passage Cant. i. 5: "I am black, but comely" is interpreted as meaning: Israel says: "I am black through my own works, but comely through the works of my fathers" (Cant. R. *ad loc.*; Ex. R. xxiii.), while "as a vine is supported by a prop, though made of dead wood, so Israel is supported by the merit of the Fathers, though it already sleeps in death." Original virtue is thus only an accessory. It would appear that the virtues of the fathers were believed to have acquired a right to a greater reward than could be given to them, and that this residue was therefore due to the children. Those who looked forward to an immediate reward were accordingly reproved, for if the Patriarchs had done

so there would have been no store of original virtue for their descendants (Lev. R. xxxvi.; Ex. R. xliv.). See PATRIARCHS.

Like the Patriarchs, the later saints were regarded as a source of original virtue for their descendants or for Israel, and in addition to Moses, Joshua, David, Hezekiah, and Ezra, Hillel, Johanan b. Zakai, and Meir are especially mentioned as storing up works which shall speak for their descendants (Lev. R. ii.). On the other hand, the original virtue of the Patriarchs was regarded by some as lasting only till the time of Hosea (Shab. 55a) or until the days of Hezekiah (Lev. R. xxxvi.), though it was still operative in keeping exiled Israel in existence up to the time of redemption (Gen. R. lxx.); and in the Targum Yerushalmi to Deut. xxviii. 15 God assures "the Fathers of the world" that their merit will never cease to be efficacious.

The doctrine of original virtue is only the theological side of the principle of heredity, with the consequences and responsibilities which this involves. The community of interest between parents and children is emphasized in a special Jewish manner which at times leads to the diametrically opposite concept of the influence of descendants upon ancestors; so that the penalty of death is said to have been inflicted upon Adam because of the sins of Nebuchadnezzar and Hiram (Gen. R. ix.). The extension of the concept of God's grace even to unrighteous children of righteous parents is, moreover, an attribution to the Supreme Being of the ordinary attitude of men toward the degenerate children of distinguished or pious parents. The influence of a store of merit collected for the use of succeeding generations is the theological aspect of the concept of progress and civilization, which is practically a store of ancestral merits.

**VISIGOTHS.** See SPAIN.

**VISONTAI, SOMA:** Hungarian lawyer and deputy; born at Gyöngyös Nov. 9, 1854; educated at Budapest, where he became an attorney in 1882. While still a student he attracted much attention by his papers on political economy in the scientific journals of Hungary, and he also edited the "Vasút." He became widely known as a pleader in 1890, when he successfully defended the editor of the "Zasztava," the leader of the radical wing of the Servians in Hungary, in a trial for political murder. As a mark of gratitude, the people of Neusatz, being Servian sympathizers, elected Visontai in 1892 to the Hungarian Parliament as a supporter of Kossuth; and since 1899 he has represented his native town, Gyöngyös, in Parliament. He is an eminent authority on criminal law and a member of the board of examiners for admission to the bar; and he prepared a large portion of the preliminary drafts for the criminal code.

**VITA.** See HAYYIM.

**VITA DELLA VOLTA (SOLOMON HAYYIM):** Italian physician and Hebraist; born Sept. 24, 1772; died March 29, 1853; flourished in Mantua. He was the owner of a large Hebrew library, which, together with its 131 manuscripts, came into the possession of Marco Mortara. Vita della Volta was a contributor to the periodical "Kerem Hemed." A letter from I. S. Reggio to Della Volta appeared in "Ozar Nehmad" (iii. 25-27).

BIBLIOGRAPHY: Steinschneider, *Cat. Bodl.* col. 2709; *Kerem Hemed*, passim.

S. O.

**VITAL:** Italian family, including several scholars, of whom the best known are:

**Hayyim Vital:** Cabalist; son of Joseph Vital; born at Safed in 1543; died at Damascus May 6, 1620. He was educated by Moses Alshech. His biography is full of legends; at the age of twelve, it is said, he was told by a chiromancer that when he reached the age of twenty-four years he would find himself standing before two roads, and would rise or fall according to his choice. Joseph Caro is said to have paid especial attention to Hayyim's talents by requesting Alshech in 1557 to take great pains with the education of a pupil who was destined to succeed his teacher in the world of learning. In the same year Hayyim became acquainted with Lapidot Ashkenazi, a cabalist, who was to influence him for the remainder of his life. The legend runs that after Hayyim's unhappy marriage to Hannah, the daughter of a certain Moses Saadia, the prophet Elijah appeared to him in a dream and led him to a beautiful garden, where he beheld the pious of all ages in the form of birds flying through the garden and studying the Mishnah. In the center of the garden was God Himself, seated on a throne and surrounded by the pious on rich tapestries.

This vision convinced the dreamer that he was destined to become a cabalist. After devoting himself to the study of alchemy for two years and a half, he had another vision of the prophet Elijah, who told him that he would succeed in his studies and would even write a commentary on the Zohar. In 1570 he became a pupil of Isaac Luria, and before he had studied under him a year Hayyim had already become known as one of the foremost cabalists, so that when, in 1572, Luria died at the early age of thirty-eight, in an epidemic which raged in Safed, Hayyim became his successor. Luria had left nothing in manuscript, and his pupil accordingly began to commit to writing what he had learned from his teacher. In 1576 he commenced to give cabalistic lectures, declaring himself to be the Messiah ben Joseph; and while wandering through Syria and Egypt, he is said to have performed many miracles, such as summoning spirits before him by the power of magic formulas.

In 1577 Hayyim arrived in Egypt, but evidently he met with a cool reception, since he soon returned to Palestine, where he settled, first in the little town of 'Ain Zaitun, and later in Jerusalem. There he remained until the governor, Abu Saifia, requested him to rediscover, by means of the Cabala, the aqueduct, leading from the River Gihon, which had been

built in the days of Hezekiah. This request so embarrassed Hayyim that he fled by night to Damascus, where he commenced his first cabalistic work on the patriarch Abraham, of which extracts are contained in the "Ozerot Hayyim" (p. 54b). He submitted this work to Joshua ben Nun, the wealthy principal of the yeshibah at Safed. The greater part of the book consists of an exposition of the conjuring of clouds, and of a discourse on the seven fixed stars, the seven heavens, and their corresponding metals. After this Hayyim returned to Jerusalem, where his former teacher, Moses Alshech, appointed him rabbi in 1584. After a time, however, he left Jerusalem for Safed, where he fell sick and was obliged to keep his bed for an entire year.

During this illness Joshua, his closest follower, who had accompanied him on nearly every journey, succeeded in bribing Hayyim's younger brother, Moses, with 500 gold gulden to lend him the writings of the cabalist, which were locked in a box. Moses accordingly brought Joshua a large part of the manuscripts, and 100 copyists were immediately engaged, who, in the short space of three days, reproduced more than 600 pages. Although Hayyim maintained, when he learned of this, that the papers which had been copied were not his own writings, they were rapidly disseminated under the title "Ez Hayyim." This work contains, in addition to a tribute to Isaac Luria, the bold assertion that it is one of the greatest pleasures of God to behold the promotion of the teaching of the Cabala, since this alone can assure the coming of the Messiah; that the old Cabala, however, covering the period from David to Nahmanides, was valueless, since it was based merely on human intellect, and was not aided by the higher spirits. Hayyim asserted that he had received these teachings, like his other mystic theories, from the lips of his teacher Luria. His estimate of the value of the Cabala of Moses Cordovero was equally low, although he maintained that Moses had often appeared to him in dreams. One of the most prominent of Hayyim's opponents was Menahem di Lonzano, who publicly denounced him in his "Sefer Imre Emet." On the 20th of Elul, 1590, Hayyim was awarded the rabbinical diploma by his teacher Moses Alshech, and four years later he settled permanently in Damascus, where he lectured every evening on the Cabala and on the near advent of the Messiah. Despite the large following which Hayyim had in Damascus, Jacob Abulafia succeeded, by threats of excommunication, in compelling him to discontinue his lectures. In 1604 his sight began to fail; in 1620 he had prepared to return to Safed, when his death occurred.

Hayyim was the author of numerous works, which are collected under the title "Sefer 'Ez ha-Hayyim" (Zolkiev, 1772; Korzec, 1785; Shklov, 1800; Dobrowne, 1804; Sudzilkov, 1818; Laszow, 1818). They are as follows:

Sefer ha-Kawwanot, in two parts, the first being on the subject of benedictions and rituals, and the second on the ritual for Sabbaths and festivals. Venice, 1624; Hanan, 1624; Bragadini, n.d. There are five recensions of this work: (1) by Moses Vital, grandson of Hayyim; known especially in Egypt and Palestine; (2) by Zacuto, with glosses; (3) by Nathan Spira, with a commentary entitled "Me'orot Natan"; (4) by Abraham Azulai of Morocco, with glosses; (5) by M. Popper, under the title "Peri 'Ez Hayyim."

A pilyut beginning "Dodi yarad le-ganno"; printed in "Sha'are Zivyon." Amsterdam, 1671.

Nof 'Ez Hayyim, novella. Frankfurt-on-the-Main, 1684; Zolkiev, 1772, 1775.

Sefer ha-Gilgulim, on the transmigration of souls. Frankfurt-on-the-Main, 1684; Zolkiev, 1772.

Sha'are Kedushah, on the rewards and punishments of the future world and on holiness. Constantinople, 1734; Sulzbach, 1758; Zolkiev, 1810.

Likkutei Torah we-Ta'ame ha-Mizwot, cabalistic exposition of the Bible according to Luria's teachings, with "hiddusim." Zolkiev, 1775.

Sha'ar ha-Yihudim we-Tikkun 'Awonot, on the Prophets, on the Holy Spirit, and on repentance. Korzec, 1783.

Sefer Ozerot Hayyim, edited by his pupil the Portuguese physician Joseph Zemah. Korzec, 1783. (Besides the printed edition there exist two manuscripts, one with glosses by Moses Zacuto ["Codex Michael," No. 23], and the other with glosses by Nathan Spira [*ib.* Nos. 27, 28]).

Likkutei ha-Shas, cabalistic interpretations of Talmudic haggadot according to the teachings of Luria, with "hiddusim" by the author. Leghorn, 1785.

Arha' Me'ot Shekel Kesef, cabalistic treatise on the 400 shekels which Abraham paid for the cave of Machpelah. Korzec, 1804.

**Joseph Vital:** Writer of tefillin parchments; born in Calabria; flourished in the fifteenth and sixteenth centuries. On account of his accuracy his work, which was expensive, was highly esteemed, and was known everywhere as קלבראש תפילין רב. He was also the author of responsa on the art of writing tefillin, which are frequently mentioned in the responsa of Menahem Azariah da Fano (§ 38 *et passim*).

**Moses Vital:** Rabbi at Safed; younger brother of Hayyim Vital; died in the middle of the seventeenth century. Like Hayyim, he was a great cabalist, and in addition to legends associating him with his brother and the prophet Elijah, a tradition is preserved which states that he predicted the famine which raged in Safed in 1632.

**Moses Vital:** Son of Samuel ben Hayyim Vital; rabbi in Egypt during the latter part of the seventeenth and at the beginning of the eighteenth century. He was a noted Talmudist and cabalist, but the only portion of his works which has been preserved is a responsum contained in Abraham ha-Levi's collection entitled "Ginnat Weradim."

**Samuel ben Hayyim Vital:** Cabalist; born in Damascus in the latter half of the sixteenth century; died in Egypt in the middle of the seventeenth. While still young he married a daughter of Isaiah Pinto, rabbi of Damascus. Poverty compelled him to emigrate to Egypt, where, through the influence of prominent men, he was placed in charge of the cabalistic society Tikkune ha-Teshubah. After a brief residence there he went to Safed, where he instructed the physician Joseph Zemah in Cabala. Later he returned to Egypt, where he died. Samuel Vital was the author of both cabalistic and rabbinical works. Among the former may be noted the "Shemonah She'arim," an introduction to the Cabala, later embodied in the "Ez Hayyim" (Zolkiev, 1772; Korzec, 1785). Among his unpublished writings mention may be made of his "Sefer Toze'ot Hayyim," a commentary on the Bible, and his "Sefer Ta'alumot Hokmah," on the Cabala.

**VITAL, DAVID B. SOLOMON VITAL HA-ROFE:** Spanish scholar; emigrated from Spain in the early part of the sixteenth century; died at Arta, or Narda, in Greece, after 1536. He went first to Turkey, and then settled at Patras in the Morea, remaining there until the fall of the city in 1532, when he lost almost his entire library. He then went to Arta, where he spent the remainder of his life.

Vital was the author of the following works: "Keter Torah" (Constantinople, 1536), the 613 commandments and prohibitions, and the seven regulations concerning Hanukkah, the Sabbath candle, Hallel, Megillah, ablutions, 'Erubin, and benedictions, including also the "Birkot ha-Nehenin" (the initial letters of the Ten Commandments are employed in this poem, an original feature of which is a complete drawing of a lung to illustrate the meaning); "Hilkot Bedikah" (1570, 1682), rules for examinations concerning the eating of a slaughtered ox, with "Shir Haruz be-Mishkal" (1687, 1712), a poetic composition on the same theme from a Maimonidean point of view (published with the responsa of Jacob Weil, Mantua, 1740); "Mihtam le-Dawid" (Venice, 1540), a versification of the thirteen articles of faith of Maimonides (one verse was published by Dukes in "Orient, Lit." xi. 272, note 6), printed with a poem entitled "Baqqashat ha-He'in," and consisting of a thousand words beginning with  $\eta$ . He wrote also a poem on the divisions of the year (Zunz, "Ha-Palit," Berlin, 1850-51), and a number of piyyuṭim.

**VITALE (COEN), BENJAMIN ALESSANDRO.** See COEN, BENJAMIN VITALE.

**VITEBSK:** Russian city; capital of the government of the same name; situated on both banks of the Dūna. It was probably founded before the tenth century, and is mentioned in Russian chronicles as early as 1021. Being included in the territory known as White Russia, it became a part of Lithuania in 1320, and about 1435 came into the possession of Casimir IV. This king restored many of its ancient privileges in 1441, particularly those concerning freedom of religious worship. Vitebsk suffered much in the wars between Lithuania, Poland, and Russia. Between 1502 and 1536 it was repeatedly pillaged by the different armies, and its commerce was greatly reduced. In 1654 after a siege of fourteen weeks the city was occupied by the Russian troops under Sheremetyev; it paid levies to Russian, Polish, and Swedish troops from 1700 to 1708; and it was finally burned in 1708 at the order of Peter the Great. In 1772 it became a part of Russia, and in 1802 it was made the capital of the government of Vitebsk.

Jewish traders undoubtedly came to Vitebsk in the fifteenth century and possibly much earlier, although it is uncertain whether a community existed there before the sixteenth century. Documentary evidence shows that the inns and taverns of the city

were leased in 1522 to the Jew Michael Yesofovich of Brest. In 1551 the Jews of Vitebsk are mentioned among those exempted from the payment of the SEREBSZCZYŻNA, and reference is made to individual Jews of Vitebsk in 1555 and again in 1594.

In the grant of the MAGDEBURG LAW to Vitebsk by King Sigismund III. in 1597 it was expressly stated that, in accordance with the ancient law, Jews could not become permanent residents of the town. As in many other places, the burghers of Vitebsk, in order to get rid of their formidable commercial competitors, evidently sought the aid of laws that had become obsolete. It is not known how successful this measure proved in excluding the Jews from Vitebsk, but from documents dated a few years later it appears that Jewish merchants continued to live in the city. Thus in the customs records of Vitebsk for 1605 mention is made of Matys Germanovich and Sir Jacob Ilinich, both local Jews, the latter evidently being a man of some distinction. The same archives also show that Jewish merchants from other localities resided in Vitebsk for more or less prolonged periods.

In 1637 the waywode Simeon Sangushko granted the Jews of the city permission to build a synagogue on their own land in the town or in its outskirts, this being in accord with royal privileges and in harmony with charters of former waywodes of Vitebsk, where the Jews had had synagogues in earlier times. This grant also provided for the exemption of the land and buildings of the synagogue from the payment of taxes. Formal entry of this privilege was made in the city records of Vitebsk in 1630 at the instance of the Jewish leaseholder Judah Yakubovich. It is clear, therefore, that, notwithstanding the Magdeburg Law of 1597, Jews continued to live in Vitebsk, and that they possessed an organized community there in the sixteenth and possibly also in the preceding century. The permanent residence of the Jews in the city was legalized in 1634 by an edict of Ladislaus IV., who issued it in response to the solicitations of Samuel and Lazar Moiseyevich, "the king's servants." It is expressly stated in this edict that the rights granted by it were only a confirmation of earlier privileges which permitted the Jews to buy and own land and houses in Vitebsk, and to have synagogues, cemeteries, and the like in the city. General Sheremetyev, who entered Vitebsk at the head of the Russian army in 1654, refers to the Jewish school

**Siege of the City.** (synagogue) in his enumeration of the Catholic and Unitarian churches of the city. The hardships of the siege which preceded his occupation of Vitebsk bore heavily on its Jewish inhabitants. They took an active part in the defensive operations by supplying men, provisions, ammunition, building materials, money, and houses for the quartering of the soldiers. As a punishment for their loyalty, they, together with the Shlyakhta, were imprisoned by Sheremetyev, and were later transported to Russia, where they suffered severely from ill treatment, many of them dying of hunger and cold. After a term of imprisonment at Novgorod the survivors were sent to different towns, and finally to Kazan on the Volga,

whence they gradually found their way back to their native town. The property of some of those who died in captivity was presented to the churches of Vitebsk; there is a record, accordingly, of a house and parcel of ground which had formerly belonged to the Jew Mordecai who died in Moscow, and which was given by King John Casimir to a local church. Those who returned from Muscovite captivity complained in 1670 that much valuable personal property and many important documents had been left in the keeping of Christian citizens of Vitebsk, and that these had all disappeared during their absence. They were thus unable, in the absence of documentary evidence, to regain possession of their property.

In 1897 Vitebsk had a Jewish population of 39,520 in a total of 65,871. The community possessed several synagogues, many houses of prayer, several schools for boys and girls, a rabbinical school, a Talmud Torah, and a Jewish hospital. Extensive trade was carried on by the Jewish merchants with Riga and foreign countries, the chief articles of export being breadstuffs, flax, hemp, beet-sugar, and timber. The Jews were also prominent in manufacturing industries. Hundreds of Jewish tailors were employed in the making of clothing sold in the stores of a number of large Russian cities. An important contribution to the Jewish industries was made in 1897, when a Jewish machinist established a small shop for the manufacture of plows.

**Jewish Industries.** By 1905 the annual output was between 25,000 and 35,000 plows, all made by about 400 Jewish mechanics in five factories. Vitebsk also contains fifteen Jewish machine-shops, each employing from five to twenty-five men, and Jewish workmen are extensively engaged in the linen-mills operated by a Belgian corporation, as well as in the manufacture of eyeglasses, in cabinet-making, and similar occupations.

In 1905 the Jews of Vitebsk informed the city council that their two representatives could not be considered by them as delegates of the Jewish population, since the persons in question had not been elected, but had been appointed by the government. In the same year the Jews of the city, like those of many other communities, issued an appeal to the Russian people for more equitable legislation.

Vitebsk is the birthplace of B. I. Sobiesensky, author of "Ahabat Zaddikim" (Warsaw, 1881-82), and of the Talmudist David EPHRAI.

**VITORIA.** See BASQUE PROVINCES.

**VITRINGA, CAMPEGIUS (the Elder):** Dutch Christian Hebraist; born at Leeuwarden May 16, 1669; died at Franeker March 31, 1722. He was educated at the universities of Franeker and Leyden, and became professor of Oriental languages at the former in 1681. His two chief works are his dissertation on the synagogue, "De Synagoga Vetere Libri Tres" (Franeker, 1685; 2d ed. 1696), which still has value; and his "Commentary on Isaiah" (Leeuwarden, 1714-20), which was frequently republished in the eighteenth century. The latter

was up to the time of Gesenius the most considerable contribution to the exegesis of Isaiah. There is also something of Jewish interest in his "Sacrarum Observationum Libri Sex" (Franeker, 1683-1708).

**BIBLIOGRAPHY:** McClintock and Strong, *Cyc.* s.v.

**VITRY, SIMḤAH B. SAMUEL.** See MAIZOR.

**VIZHAINY (VIZHUNY; VIZAN, VIZANY):** Russian town in the government of Suwalki. On Jan. 29, 1723, Moses Yefraimovich, an elder of the Grodno kahal, presented for entry in the municipal records of the city of Grodno the charter of privileges granted to the Jews of Vizhainy by King John III. The document was dated Cracow, Feb. 3, 1676, and was a confirmation of the privileges granted by King Michael at Warsaw Nov. 14, 1670. The king states in the latter that in consideration of the privileges granted to all the Jews living in the grand duchy of Lithuania by Ladislaus IV. at Warsaw Dec. 2, 1646, and confirmed by King John Casimir at the Cracow diet of Feb. 17, 1649, and in consideration also of the petition of the king's jeweler in Grodno, the Jew Isaac Faibishevich, acting in behalf of the Jews of Vizhainy, he, King Michael, promises to retain in force the rights of the said Jews in the possession of their houses, stores, and meat-markets, acquired by them in the past or to be acquired by them in the future, this applying also to their houses of prayer, cemeteries, and baths situated on land belonging to them and reserved for their own use. They are likewise accorded the right to sell liquor in their houses, to sell merchandise by weight or measure, and to sell meat in their butcher-shops to every Jewish artisan, provided they pay the proper tax on the cattle killed. Should the Jewish houses, stores, synagogue, meat-markets, or bath be destroyed by fire, the Jews retain the right to rebuild them. The Jewish artisans are given the right to pursue their avocations in accordance with the general privileges granted to the Jews of the grand duchy of Lithuania.

Further, the Jews of Vizhainy are exempted from municipal jurisdiction, but are subject to that of the local court, with the right of appeal to the king's tribunal. They may not be called to court on Saturdays or on other Jewish holy days; they may not be assessed in favor of the municipality (mir) and they are exempted from sentinel duty. They may not be made to do general work for their landlords, nor to supply conveyances, and shall be obliged only to pay the usual tax to the local court. In important matters they must take oath on the scroll of the Law, and in less important cases at the Ark, according to their Law. Suits concerning Jews alone are to be decided by their own elders according to Jewish Law. The Jews of Vizhainy are to have the right to use the town meadows for pasturing their cattle, and are permitted to make use of the neighboring woods on equal terms with the commoners of the town. In 1897 the population of Vizhainy numbered 2,274, mostly Jews.

J. G. L.

**VOCALIZATION:** All Semitic script, excepting Ethiopic and Assyro-Babylonian, the latter of which in its origin is held by many to be not Semitic, is purely consonantal, the reader being left to supply the vowels. The same feature is found in the Egyptian and Berber languages, not to speak of other tongues which have borrowed the Arabic alphabet. This circumstance renders the reading of Semitic script in many cases ambiguous even in a living language.

**Semitic Skeleton Writing.** To obviate such ambiguity the Semitic languages have developed three methods. The oldest method is to denote the vowels by the vowel-letters ם ך ם (also ן ן). The employment of vowel-letters shows a gradual development. At first used but sparingly to denote final vowels (Mesha Stone, Phœnician inscriptions), they came to mark vowels long by nature (Arabic, early Hebrew), then, occasionally, tone-long vowels (Biblical Hebrew), and finally also short vowels (Aramaic dialects, later Hebrew). This method of vocalization has been retained in Mandean and partly in Samaritan. But since the vowel-letters were not sufficient to mark the exact shades of the vowel-sounds, some of the Semitic languages (*i. e.*, those which were in possession of sacred books in whose recitation exactness was imperative) developed systems of vowel-signs. The employment of such signs proceeded along two lines. The Ethiopic, whose vowel-system probably dates from the fourth century c. e., has attached its vowel-signs to the body of the consonant, so that there are as many modifications of the form of each letter as there are vowels. Hebrew, Syriac, and Arabic, on the other hand, have their vowel-signs written independently, above, below, or within the letters.

It has hitherto been assumed that the Syriac system was the basis for the Hebrew and the Arabic, and that the Samaritan, which has no vowel-signs, was based on the latter. It has, however, been shown that such an assumption is groundless (Leviass, "The Names of the Hebrew Vowels," in "Hebrew Union College Annual," 1894). All that is certain is that the composite Babylonian vocalization is the basis of all other systems. The exact interrelation, however, among these latter still awaits a careful examination.

The present Syriac and Arabic systems were preceded by a more primitive one consisting of dots. In the oldest manuscripts of the Koran a dot above a letter indicated *a*; below, *i-e*; at the side, *u*. In Syriac, a dot above indicated a stronger or fuller vocalization or pronunciation of a consonant, but when placed beneath the letter it denoted a weaker or thinner vocalization, a softer pronunciation of a consonant or its entire vowellessness. That primitive device is referred to as early as the fourth century c. e. by the Syriac Church father Ephraem, and is met with in Syriac manuscripts of the fifth century. The Arabic dot-system is later, having been introduced by Abu al-Aswad (689 c. e.). The question presents itself, Did Hebrew ever have such a system? Although no manuscripts with such notation have been handed down, it can be proved that such a notation

did exist. The older Masorah subsumes all vowels under the two designations פתח and קמץ, the former denoting *a, ā, e, ē*, the latter *u, ū, o, ō*. The former were evidently originally denoted by a dot above, the latter by a dot below, the letter. Moreover, the Masorah designates with "below" (מלרע) or "above" (מלעיל) the relative thinness or fulness of vowel-sound. Thus, *ā* is "below" when compared with *ā, ō, ū*; *ē* is "below" as compared with *ā*; similarly, *ī* as compared with *ā, ō, ū*; *ō* as compared with *ā, ō*; *ā* as compared with *ō, ū*; *ē* as compared with *ā, ō, ū* (comp. "Oklah we-Oklah," Nos. 5, 11); "shewa" is "below" when compared with a full vowel (comp. "Masorah Magna" to Isa. viii. 1). The same terminology is found in respect to chanting-notes and word-accent. The Masoretic terminology must have had a concrete basis, and that basis is discoverable only in the rudimentary use of the dot.

Until 1839 only one system of Hebrew vocalization was known, the Tiberian. In that year manuscripts were discovered in the Crimea representing a very different system. Since then a number of manuscripts from Yemen have come to light which show that system in different stages of development. In 1894 a third system of vocalization was found, of which also several types are now known. The manuscripts of the last type, fragments, come from Syria and Egypt. Each of the three systems of vocalization has also a distinct system of accentuation. The different systems (and types) vary not only in the form and position of the vowel- and accent-signs, but to a greater or lesser extent also in pronunciation of the Hebrew. The greatest latitude of variation in pronunciation is exhibited in the Berlin MS. or qu. 680, representing the (or a) Babylonian tradition.

The most marked difference between the usual system of vocalization and the one discovered in 1839 is in the position of the vowel-signs. In the former all but two are written below the letters, in the latter all are placed above the letters. The former was therefore called the "sublinear," the latter the "superlinear." With the discovery of the third system, which is also superlinear, this distinction has become impracticable, and more correct designations are desirable. On the basis of two passages in medieval literature, one a colophon to a Targum manuscript in Parma (comp. Berliner, "Targum Onkelos," ii. 134), the other a passage in the Vitry Maḥzor (p. 462), the usual system is called the Tiberian (= T), the one discovered in 1839 the Babylonian (= B), and the third the Palestinian (= P). These designations are understood to denote the places where these systems were in vogue, implying nothing as to their place of origin. They may be used, for convenience' sake, just as are the terms "Semitic" and "Hamitic" as applying to languages. The objection that Tiberian is also Palestinian is not valid: the latter probably dates from a time when the Tiberian was not yet in existence, a supposition borne out by internal evidence. The Arabic system is designated by A, the Nestorian Syriac by Sy, the Samaritan by Sa.

The Babylonian system shows in the various manuscripts different stages of development, which

can, however, be reduced to three leading types: the composite type (B<sup>1</sup>), represented chiefly by the "Codex Petropolitanus," dated 916;

**The Babylonian System.** the simplified type (B<sup>2</sup>), found chiefly in Targum manuscripts and Neo-Hebrew texts; and the type (B<sup>3</sup>), represented by the Berlin MS. or. qu. 680.

The first two types show not infrequently Tiberian influence. The  $\dot{\text{}}$  in B<sup>1</sup> is Tiberian; so is the "dagesh"-point in B<sup>2</sup>. B<sup>3</sup> denotes dagesh and vowellessness, not, as do all other types and systems, by a sign attached to the consonant, but by a modification of the preceding vowel. Its phonetic theory is evidently different from all the rest. One will not go far astray in seeing here the influences of the Hindu and the Greek grammatical system respectively. B<sup>2</sup> is a simplification of B<sup>1</sup> adapted to the needs of Aramaic. B<sup>3</sup> is a modification of B<sup>1</sup> with the help of P, from which system it has borrowed its "rafe"-sign and the conception of dagesh.

The Palestinian system has come down in a few fragments, not all of which have yet been published. This system also shows a gradual development; the classification into types, however, must remain tentative until all the material shall have been made accessible. According to

**The Palestinian System.** Dr. Kahle ("Der Masoretische Text," p. 29, note 1), the fragments of the Cairo genizah, still unpublished, present the oldest type (P<sup>1</sup>); an intermediate type was published by the writer in the "American Journal of Semitic Languages and Literature," vol. xv. (P<sup>2</sup>); the third type (P<sup>3</sup>) is contained in the texts published by Neubauer (in "J. Q. R." vii. 361) and Kahle (Stade's "Zeitschrift," xxi. 273). This system is based on B<sup>1</sup> and shows the transition to B<sup>3</sup>, T, Sa, Sy, and A. The position of the vowel-signs in P is, as in B, above the letters and thrown to the left, or, more correctly, over the space between the letters when the spelling is defective, and over the vowel-letters when the text is written "plene." The cases of plene writing have evidently determined the position of the vowel-sign. It is not impossible that the inventors of these two systems, like the later grammarians, supposed every vowel to be followed actually or virtually by a vowel-letter, so that the sign may always be intended for the latter. While the above is the rule, the vowels are at times found within the letter (B<sup>3</sup>) or beneath it; sometimes both below and over the letter; at other times the vowel-sign above the consonant is repeated over the following vowel-letter (P<sup>2</sup>). The dagesh-, mapik-, and sheva-signs (see Notation Table, p. 448) may be placed on the consonant to which they belong or on the preceding consonant. P<sup>3</sup> differs from P<sup>2</sup> chiefly by having differentiated the  $\epsilon$ -vowel into  $\epsilon$  and  $\epsilon'$ .

The Tiberian system is based on B<sup>1</sup> (comp. Prætorius in "Z. D. M. G." liii. 195) and P. Like P<sup>2</sup>, it has differentiated the  $\epsilon$ -vowel. All its signs, with the exception of two within and one above the consonants, are written below the letters. The accentual system seems to have originated with P, since the vowel- and accent-signs in that system seem to have been cast in one mold. The accents were then transferred to B<sup>1</sup> and

mechanically supplemented by the conjunctive accents, which had later developed in T. As Prætorius has shown, these conjunctive accents are based on the Greek neumes of the early Middle Ages. The disjunctive accents, however, seem to have developed from the Greek interpunction-marks (comp. Kahle in "Z. D. M. G." lv. 167 *et seq.*; see also Consolo in "Verhandlungen des Internationalen Orientalisten-Kongresses," xiii. 214 *et seq.*).

In trying to determine the date when vocalization was first introduced the terminus a quo and the terminus ad quem must first be ascertained. Elijah LEVITA had already pointed out that the Talmudim and Midrashim do not mention vowel-signs or vowel-names, in spite of there having been abundant opportunity to do so. From this fact he

**Date of Introduction of Vocalization.** concluded that vocalization and accentuation are post-Talmudic. The earliest dated mention of vocalization is that of Saadia Gaon and his contemporaries. Between the dates 500

and 900 the following data are to be considered: Even Aaron ben Moses ben Asher, whose ancestor in the sixth generation flourished in the second half of the eighth century, was ignorant of the origin of the vowel-points. A still older authority than Ben Asher the Elder, R. Phinehas, the head of the academy, is quoted as authority for T. If this R. Phinehas be identical with the payyetan mentioned after Kalir b. Saadia Gaon ("Agron," ed. Harkavy, p. 112), he must have lived early in the eighth century, or must have been contemporary with Khalil ibn Ahmad (719-729), to whom the introduction of the Arabic system is attributed. Assuming that A and T were introduced about 750, these being based on P and B, the date for P must be about 700, since the age of P is conditioned by the zero-sign it uses, and that sign, together with the system of Arabic numerals to which it belongs, was first introduced by Mashallah (comp. NUMBERS AND NUMERALS). The date for B<sup>1</sup> must, therefore, be between 500 and 700; it is at present impossible to give the exact date. If vocalized manuscripts exist which go back to the seventh century (Harkavy's note to the Hebrew translation of Graetz's "Hist." iii. 160), then the date of B<sup>1</sup> must be about 600. The contention of C. D. Ginsburg ("Introduction to the Hebrew Bible," p. 451) that the late "Masseket Soferim" did not know the vowels is out of the question. How could it be ignorant of vowels when it knew the accents? The work is a compilation, and the passage Ginsburg quotes to prove his deduction is taken from older sources. The Nestorian Syriac vocalization is no doubt contemporary with A and T (comp. Duval, "Gram. Syr." § 71).

When in the course of time the origin of the vowel- and accent-signs was forgotten, some attributed their invention to Adam, others dated it from the Sinaitic revelation, while others traced it to Ezra or the Great Synagogue. Elijah Levita was the first to point out their post-Talmudic origin. The work in which he had embodied his views was soon translated into Latin by his pupil S. Münster (1539). Coming as it

**The Tiberian and Accentual Systems.** Like P<sup>2</sup>, it has differentiated the  $\epsilon$ -vowel. All its signs, with the exception of two within and one above the consonants, are written below the letters. The accentual system seems to have originated with P, since the vowel- and accent-signs in that system seem to have been cast in one mold. The accents were then transferred to B<sup>1</sup> and

mechanically supplemented by the conjunctive accents, which had later developed in T. As Prætorius has shown, these conjunctive accents are based on the Greek neumes of the early Middle Ages. The disjunctive accents, however, seem to have developed from the Greek interpunction-marks (comp. Kahle in "Z. D. M. G." lv. 167 *et seq.*; see also Consolo in "Verhandlungen des Internationalen Orientalisten-Kongresses," xiii. 214 *et seq.*).

did in the time of the Reformation, Levita's theory was seized upon by the warring parties and led to numerous controversies. The most noted one was that between Cappellus and the Buxtorfs. On the Jewish side Levita was answered by Azariah dei Rossi in his "Me'or 'Enayim." S. D. Luzzatto published in 1852 his "Dialogues sur la Kabbale et le Zohar et sur l'Antiquité de la Punctuation et de l'Accentuation dans la Langue Hébraïque," placing himself on the side of Levita. That work called forth many answers, of which the most scholarly was that by Jacob Bachrach ("Ishtadalut 'im ShaDaL," Warsaw, 1896). Firkovich claimed to have discovered documents proving the invention of vocalization to be of Karaite origin; but these have been shown to be forgeries (comp. Harkavy's notes to

C. L.

VOGEL, SIR JULIUS: Agent-general in London for New Zealand; born in London Feb. 25, 1835; died there March 13, 1899. He was the son of Albert Lee Vogel, and was educated at University College School. Left an orphan, he emigrated to Australia in 1852. Disappointed with his progress at the gold-diggings, he fell back upon his liter-

ary ability and became editor and proprietor of several Victorian newspapers. He stood for Parliament in 1861, but was unsuccessful, and emigrated to Dunedin, New Zealand, where he bought a half interest in the "Otago Witness" and started the "Otago Daily Times," the first daily paper in New Zealand. In 1862 Vogel was elected to the provincial council of Otago, and four years later became the head of the provincial government, a post which he held till 1869. In 1863 he was elected a member of the New Zealand House of Representatives, and on retiring from the provincial government in 1869, he joined the Fox ministry as colonial treasurer, afterward becoming successively postmaster-general, commissioner of customs, and telegraph commissioner. The Fox ministry having been forced to resign, Vogel carried a vote of want of confidence in their successors, and in Oct., 1872, returned to power as leader in the Lower House, colonial treasurer, and postmaster-general. In 1873 Vogel became prime minister of the colony. In 1875-76 he visited England, and afterward resumed the premiership. From 1876 to 1881 he was agent-general for New Zealand in London, and in 1884 was again a member of the government of the colony. He finally gave up colonial office in 1887, from which date he resided in England. He was made C.M.G. in 1872, and K.C.M.G. in 1875, and received special permission to retain the colonial title of "Honorable" during his life. He unsuccessfully contested Penryn in 1880 as an Imperialist.

Sir Julius Vogel's principal achievement as a colonial statesman was the discovery that the savings of the mother country could, with mutual advantage, be obtained by the colonies and applied to the construction of railways and other public works. That his system of finance was on the whole successful was amply proved by the prosperous state of the Australasian colonies. Sir Julius Vogel was the author of the act by virtue of which Colonial stock has been inscribed at the Bank of England and has become a popular investment for trustees. His project of law was accepted by the imperial government to the equal benefit of all the colonies. His scheme of public borrowing for the colony of New Zealand was put into effect in 1870, and within the next ten years the colony borrowed £22,500,000 at diminishing rates of interest, the population rose from 250,000 to 500,000, the extent of land under cultivation increased from 1,000,000 to 4,000,000 acres, and the value of exports from £500,000 to £1,500,000. It is also stated that in the same ten years he introduced 100,000 immigrants and caused 1,200 miles of railway to be constructed. During a visit to England he established the existing mail service between New Zealand and San Francisco. In his first premiership he set on foot the government life-insurance system and organized the New Zealand Public Trusteeship. He was one of the first to advocate imperial federation.

Sir Julius Vogel wrote a novel entitled "Anno Domini 2000, or Woman's Destiny"; it was published in 1889, and passed through several editions. One of his sons, **Frank Leon Vogel**, was killed on Dec. 4, 1893, while serving with Major Wilson's force against the Matabele.

**VOGELSTEIN, HERMANN:** German rabbi and historian; born at Pilsen, Bohemia, Jan. 8, 1870. His father was **Heinemann Vogelstein**, rabbi of Stettin. Vogelstein received his education at his native town, the gymnasium at Stettin, and the universities and Jewish theological seminaries at Berlin and Breslau (Ph.D. and rabbi 1894). In 1895 he became rabbi in Oppeln, and since 1897 he has been rabbi at Königsberg, East Prussia.

He is the author of "Die Landwirtschaft in Palästina zur Zeit der Mischnah" (Berlin, 1894) and, together with Rieger, of the first volume of "Geschichte der Juden in Rom," the second volume being written by Rieger alone (Berlin, 1896). The "Geschichte" gained one of the prizes offered by the Zunz-stiftung.

**VOLOZHIN:** Russian town in the government of Wilna; at the present time (1905) it belongs to Prince Tishkewitz. As in most other Lithuanian towns, the Jews constitute the greater part of the population. Jews settled there about the middle of the sixteenth century. Volozhin is celebrated for the rabbinical school which existed there until 1892. This school, or yeshibah, which was founded in 1803 by Hayyim b. Solomon, a pupil of the renowned Elijah, Gaon of Wilna, was in direct opposition to the Hasidic movement that spread through Lithuania in the second half of the eighteenth century. At the head of this conservative opposition, the members of which were styled "Mitnaggedim" (opponents), stood the Gaon of Wilna. He recognized that, in order to combat successfully the Hasidic movement, the love of Talmudic study must be aroused and strengthened. One way of doing this was to establish a great Talmudic academy, where the letter of the Law would be studied systematically. Death, however, removed him before his cherished plan could be carried out, and the task was left to his pupil Hayyim b. Solomon.

Wilna already had two yeshibot, and there was no room for a third; so Volozhin was chosen, where had lived a number of such men as the

author of "Sha'agat Aryeh" and Zalman Volozhiner. In order to attract **The Yeshibah** scholars to the institution two wise rules were laid down: (1) only those should be admitted who had distinguished themselves in Talmudic study, and (2) the medieval custom of assigning yeshibah students each day to a different family, in which they received their meals free, should be abolished; the students to be either self-supporting, or maintained by the institution. Thus scholars, both rich and poor, flocked to Volo-

zhui from all parts of Russia and the rest of Europe. For nearly a century it held its reputation as a place of the highest Talmudic learning, until finally, in 1892, to the regret of all lovers of Judaism, the doors of the school were shut by order of the Russian government.

The very spirit in which the institution was founded was the cause of its downfall. It was, as stated before, ultraconservative, tolerating nothing that looked like an innovation, and strongly opposing all exoteric studies. For a long time it withstood the great wave of progress that swept over Russia in the middle of the nineteenth century. In 1887 Count Pahlen, who devoted a great deal of his time to the Jewish question, called together thirteen representative Jewish scholars of Russia in order to confer with them about the yeshivot. The conference drew up a set of regulations for the management of such institutions, the most important of which were: that each day not less than three hours should be devoted to the teaching of the Russian language and literature and to other secular studies; that the teachers in these branches should be appointed with the sanction of the government; that not more than twelve hours each day should be consumed in study; and that the chief rabbi should be responsible for the conduct of his pupils.

The chiefs of the yeshivot, fearing that secular studies would "poison the minds of the students and turn them away from the study of the Talmud," stubbornly refused to introduce these innovations; they feared also that Orthodox Jews would withhold their contributions from the school. In 1891 Count Delianov, then minister of education, submitted a similar plan to the authorities of the school in Volozhin; but, seeing that his instructions were not carried out, he closed its doors on Jan. 22, 1892.

J. Go.

**VOLTAIRE**: French poet, historian, and essayist; born at Paris Nov. 21, 1694; died there May 30, 1778. His name was originally François Marie Arouet; but about 1718 he assumed the name of Voltaire. He is known to the world as one of the most active and popular champions of free thought and as an ardent advocate of religious as well as political liberty. It is the more surprising that he who, in his "Traité sur la Tolerance" (1766), vindicated Jean Calas, the victim of Catholic fanaticism, and who, in his "Lettres Chinoises," bitterly attacked religious bigotry, should have fostered anti-Jewish sentiments. His personal experiences with Jews would hardly suffice to explain such inconsistency. He alleges that, while an exile in London (1726), he had a letter of credit drawn on a Jewish banker, whom he refers to once as "Medina" and another time as "Acosta," and through whose bankruptcy he lost the greater part of 20,000 francs. In Potsdam, where he was the guest of Frederick the Great, he had a disagreeable experience with a Jew named Abraham Hirsch. In his treaty of peace with Saxony (1745) Frederick had stipulated that Saxon bonds ("Steuerscheine") held by his subjects should be redeemed at their face value, although they were then listed at 35 per cent below par. At the same time

it was ordered that no Prussian subject might purchase any of these bonds after the declaration of peace. Voltaire nevertheless ordered Hirsch to buy such bonds for him, giving him notes for the amount, while Hirsch deposited with Voltaire jewelry as security. Subsequently Veitel-Heine EPHRAIM offered Voltaire more favorable conditions, and he therefore withdrew his order from Hirsch. The last-named, who had already discounted Voltaire's notes, was arrested; but the enemies of the poet used the whole unsavory transaction as a means of attacking him. The king himself wrote a satire against Voltaire in the form of a drama entitled "Tantale en Procès"; and Hirsch was discharged after having paid a comparatively small fine. Voltaire himself refers to this incident in his humorous way, naturally presenting himself as having been duped. While it hardly had the effect of filling him with anti-Jewish sentiments, it inspired him, in his "Dictionnaire Philosophique Portatif" (1764), to make some unfavorable remarks about the Jews. He charges them with greed and selfishness, saying that their only ideals are children and money.

It seems that, aside from his desire to select any subject apt to furnish an opportunity to display his humorous satire and give him a chance to attack the Bible, Voltaire had no intention of antagonizing the Jews. In his reply to Isaac de PINTO, who wrote an apology for the Jews entitled "Apologie pour la Nation Juive," Voltaire admitted as much. He recognized the fact that there were respectable Jews, and he did not wish to wound the feelings of his opponent by references to the people of Israel as represented in the Bible. Antoine GUENÉ, who defended the Bible against the attacks of Voltaire, embodied in his "Lettres de Quelques Juifs" De Pinto's apology together with the correspondence to which it gave rise. Voltaire replied in a pamphlet, "Un Chrétien Contre Six Juifs" (1776), without taking up the Jewish question.

D.

**VOLTERRA, AARON HAI**: Liturgical poet of the first half of the eighteenth century; rabbi of the Italian communities in Massa e Carrara. He was the author of a prayer entitled "Baqqashah," or "Elef Shin." The latter name, however, is misleading; for in the entire prayer, in which each word begins with the letter "shin," this letter occurs only 700 times, and not, as this title would indicate, 1,000 times. In his preface the author states that numerous difficulties obliged him to resort to artificial word-formations, in which he felt that the license of poetry justified him. The poem, which begins with the words "Shaddai shoken shehakim," is accompanied by a commentary containing a glossary of the Talmudic terms occurring in it. A second poem by Volterra, forming an eightfold acrostic of the author's name, commences "Alekem ishim ekra," and is written after the style of the poems of Jedaiah b. Abraham Bedersi. These two works were published

together under the title "Baqqashah Hadashah" (Leghorn, 1740).

**VOLTERRA, MESHULLAM BEN MENAHEM:** Italian jeweler of the fifteenth century. He lived in Florence, where he and his father, Menahem ben Aaron Volterra (who in 1460 was worth 100,000 ducats), carried on a business in precious stones. According to Abraham Portaleone, Volterra wrote a book on jewelry. In 1481 he undertook a journey to the Orient, going by way of Rhodes to Alexandria, where there were at that time only sixty Jewish families. Here he saw a beautiful manuscript of the Hebrew Bible, which the natives claimed had been written by Ezra. In Cairo, where he bought gems, great honor was shown him by the nagid of the city, the wealthy Solomon ben Joseph, whose father also had been nagid, as well as body-physician to the sultan.

On July 29 Volterra reached Jerusalem, where at that time there were 250 Jewish families. Here both he and his companion became dangerously ill. He then passed through Jaffa and Damascus to Crete, where he was shipwrecked, lost his precious stones, and again became very ill. His life was saved only by the self-sacrificing care of a German Jewish physician. Volterra finally reached Venice in October. His account of the journey, which has been preserved in manuscript in the Laurentiana (cod. xi. 3. p. 128), was first published by Lunz in his "Jerusalem" (i. 166-219).

Volterra had a brother **Raphael**, who was engaged in the book-trade.

**VOORSANGER, JACOB:** American rabbi; born at Amsterdam, Holland, Nov. 13, 1852. He was educated at the Jewish Theological Seminary of Amsterdam, and received the degree of D. D. from the Hebrew Union College, Cincinnati, O. He has officiated as rabbi at Philadelphia (1873-76), Washington, D. C. (1876-77), Providence, R. I. (1877-78), Houston, Tex. (1878-86), and, since 1886, at the Temple Emanu-El, San Francisco, Cal. In 1894 he was appointed professor of Semitic languages and literature at the University of California, which office he still holds (1905); he officiates also as chaplain and special lecturer at the Leland Stanford, Jr., University.

From 1881 to 1883 Voorsanger was editor of "The Jewish South" (Houston, Tex.), and from 1883 to 1886 of the "Sabbath Visitor" (Cincinnati, O.). In 1895 he founded "Emanu-El," of which paper he is still editor. He is the author of "Moses Mendelssohn's Life and Works."

**VORARLBERG:** Extreme western district of the Austrian empire. In the Middle Ages it was called "Vor dem Arlberg," and was divided into the

estates of **Bregenz, Feldkirch, and Bludenz**. To these was added in 1560 the imperial county of **Hohenems**. The first three districts were held by the counts of Montfort-Werdenberg, but gradually came under Austrian control. Jews were in Vorarlberg as early as the fourteenth century. They were for the most part exiles from Switzerland and the German and Austrian countries bordering the Lake of Constance, and they ventured to settle only in the immediate neighborhood of the lord of Vorarlberg or his bailiffs. The "Stadtrecht" of Feldkirch (printed and discussed in "Zeit. für die Gesch. des Oberrheins," xxi. 129-171) contains four regulations referring to Jews (folios 3b, 13b, 15a). The statements made by modern historians regarding persecutions at Feldkirch in 1348-49 on account of the Black Death, and in 1443-44 because of an accusation of ritual murder, have been shown to be erroneous and due to the confusion of Feldkirch in Vorarlberg with Waldkirch in Baden, both of which were formerly called "Veltkilch" (Salfeld, "Martyrologium," p. 69, Berlin, 1898). It is known that the Black Death did not break out in Vorarlberg in 1348-49; and the episode of the ritual murder of 1443-44 took place in Baden, principally at Constance.

When Feldkirch became an Austrian dependency, at the end of the fourteenth century, the Jews left this district entirely. The account of the scattered settlements later found in various villages forms part of the history of the Jews of HOHENEMS, who founded in 1617, under Count Caspar, a community which still exists. Thus there was a settlement from 1676 to 1744 in the village of Sulz, near Feldkirch, the place whence the family of Prof. Salomon Sulzer originally came. Jews lived in the city and territory of Bregenz in the Middle Ages, but were all expelled from the country by an edict of 1559. Since 1617 Hohenems has had a Jewish community, to which all the Jews of Tyrol and Vorarlberg were assigned by the law of 1890. The Jews of Vorarlberg have frequently distinguished themselves in the history of the country, as, for instance, in the war with Napoleon in 1809, and have contributed much to the promotion of commerce and industry.

**VOWS** (Hebr. "nedarim"): Promises made under religious sanction. In Talmudic law distinction is made between two principal kinds of vows: (1) A voluntary promise to bring a sacrifice which he who makes the vow is not otherwise in duty bound to bring; or a promise to give a certain sum to purposes of common charity or education. Such vows are called "nidre hekdesh" ("=dedications"), and of these there are two specific kinds. (a) When he who promises points toward the object which he intends to give, and says, "This I dedicate to such

and such a holy or charitable cause," then he is not bound to replace the thing if it is lost. (b) If, on the other hand, he says, "I promise such and such an object, or such and such a sum of money, to be devoted to that purpose," then he is bound to replace it if it becomes lost. The former kind of vows are called "nedabah" (= "gift"); the latter kind "neder" (= "promise"). (2) The second chief kind of vows consists in promises made to abstain from the enjoyment of certain things, he who promises saying: "I deny myself the enjoyment of this thing, as of a thing sanctified." Such vows are called "nidre issar" (= "promises of prohibition or deprivation"). Such a vow is valid even if a second party imposes it upon the votary, he answering with an "Amen" and thereby accepting it.

A vow is valid only if made voluntarily, without any compulsion from without; and the votary must also be conscious of the scope or character of his vow. A promise made by mistake, or one exacted by compulsory measures, is invalid. The age of discretion with reference to promises is for men the beginning of the thirteenth year, for women the beginning of the twelfth, at which

**Validity of Vows.** derstand the importance of a vow (Maimonides, "Yad," Nedarim, xi. 1).

A father may annul the vows made by his daughter; and a husband may annul those of his wife, if they be of such a nature that the keeping of them would cause distress to the wife. The father or the husband may, however, annul such vows only on the very day when he is informed of their having been given (Num. xxx. 2-17; Ned. x. 8; Maimonides, *l.c.* xii. 1 *et seq.*).

Any vow, be it a dedication ("neder hekdesb"), or a promise of prohibition or deprivation ("neder issar"), can, in case the promisor regrets it, be declared void by an ordained teacher, or by three unordained teachers (Maimonides, "Yad," Shebu'ot, vi.; Shulhan 'Aruk, Yoreh De'ah, 228, where the conditions are specified on which a vow can be annulled). To impose vows on oneself was discouraged by the sages of the Mishnah and the Talmud: "Do not form a habit of making vows," says an old baraita (Ned. 20a). Samuel said: "He who makes a vow, even though he fulfil it, commits a sin" (*ib.* 22a). The making of vows was tolerated only when it was done in order to rid oneself of bad habits, or in order to encourage oneself to do good; but even in such cases one should strive for the desired end without the aid of vows (Yoreh De'ah, 203, 207). More specific rules regarding vows are contained in Maimonides' "Yad," Nedarim, and in Shulhan 'Aruk, Yoreh De'ah, 203-235. See also NEDARIM.

J. Z. L.

**VULGATE:** Latin version of the Bible authorized by the Council of Trent in 1546 as the Bible of the Roman Catholic Church. It was the product of the work of Jerome, one of the most learned and scholarly of the Church leaders of the early Christian centuries. The earliest Latin version of the Scriptures seems to have originated not in Rome, but in one of Rome's provinces in North Africa. An Old Latin version of the New Testament was

extant in North Africa in the second century c.e., and it is thought that a translation of the Old Testament into Latin was made in the same century. Indeed, Tertullian (c. 160-240) seems to have known a Latin Bible. There were at least two early Latin translations, one called the African and the other the European.

These, based not on the Hebrew, but on the Greek, are thought to have been made before the text-work of such scholars as Origen, Lucian, and Hesychius, and hence would be valuable for the discovery of the Greek text with which Origen worked. But the remains of these early versions are scanty. Jerome did not translate or revise several books found in the Latin Bible, and consequently the Old Latin versions were put in their places in the later Latin Bible. These Old Latin versions are represented in the books of Esdras, Wisdom, Ecclesiasticus, Baruch, and Maccabees, and in the additions to Daniel and Esther. The Psalter also exists in a revised form, and the books of Job and Esther, of the Old Latin, are found in some ancient manuscripts. Only three other fragmentary manuscripts of the Old Testament in Old Latin are now known to be in existence.

Jerome was born of Christian parents about 340-342, at Stridon, in the province of Dalmatia. He received a good education, and carried on his studies at Rome, being especially fascinated by Vergil, Terence, and Cicero. Rhetoric and Greek also claimed part of his attention. At Trier in Gaul he took up theological studies for several years. In 374 he traveled in the Orient. In a severe illness he was so impressed by a dream that he dropped secular studies. But his time had not been lost. He turned his brilliant mind, trained in the best schools of the day, to sacred things. Like Moses and Paul, he retired to a desert, that of Chalcis, near Antioch, where he spent almost five years in profound study of the Scriptures and of himself. At this period he sealed a friendship with Pope Damasus, who later opened the door to him for the great work of his life. In 379 Jerome was ordained presbyter at Antioch. Thence he went to Constantinople, where he was inspired by the expositions of Gregory Nazianzen. In 382 he reached Rome, where he lived about three years in close friendship with Damasus.

For a long time the Church had felt the need of a good, uniform Latin Bible. Pope Damasus at first

asked his learned friend Jerome to prepare a revised Latin version of the New Testament. In 383 the Four Gospels appeared in a revised form, and at short intervals thereafter the Acts and the remaining books of the New Testament. These latter were very slightly altered by Jerome. Soon afterward he revised the Old Latin Psalter simply by the use of the Septuagint. The name given this revision was the "Roman Psalter," in distinction from the "Psalterium Vetus." The former was used in Rome and Italy down to Pius V. (1566-72), when it was displaced by the "Gallican Psalter" (so called because first adopted in Gaul), another of Jerome's revisions (made about 387), based on many corrections of the Greek text by reference to other Greek versions. About the

**Earlier Latin Translations.**

**Jerome's Bible-Revision Work.**

end of 384 Pope Damasus died, and Jerome left Rome to travel and study in Bible lands. In 389 he settled at Bethlehem, assumed charge of a monastery, and prosecuted his studies with great zeal. He secured a learned Jew to teach him Hebrew for still better work than that he had been doing. His revision work had not yet ceased, for his Book of Job appeared as the result of the same kind of study as had produced the "Gallican Psalter." He revised some other books, as Proverbs, Ecclesiastes, Song of Songs, and Chronicles, of which his revisions are lost, though their prefaces still exist.

But Jerome soon recognized the poor and unsatisfactory state of the Greek texts that he was obliged to use. This turned his mind and thought to the original Hebrew. Friends, too, urged

**Jerome's Bible-Translation Work.** him to translate certain books from the original text. As a resultant long thought, and in answer to many requests, Jerome spent fifteen years, 390 to 405, on a new translation of the Old Testament from the original Hebrew text. He began with the books of Samuel and Kings, for which he wrote a remarkable preface, really an introduction to the entire Old Testament. He next translated the Psalms, and then the Prophets and Job. In 394-396 he prepared a translation of Esdras and Chronicles. After an interval of two years, during which he passed through a severe illness, he took up his arduous labors, and produced translations of Proverbs, Ecclesiastes, and Song of Songs. The Pentateuch followed next, and the last canonical books, Joshua, Judges, Ruth, and Esther, were completed by 404. The Apocryphal parts of Daniel and Esther, and Tobit and Judith, all translated from the Aramaic, completed Jerome's great task. The remainder of the Apocryphal books he left without revision or translation, as they were not found in the Hebrew Bible.

Jerome happily has left prefaces to most of his translations, and these documents relate how he did his work and how some of the earlier books were received. Evidently he was bitterly criticized by some of his former best friends. His replies show that he was supersensitive to criticism, and often hot-tempered and stormy. His irritability and his sharp retorts to his critics rather retarded than aided the reception of his translation. But the superiority of the translation gradually won the day for most of his work. The Council of Trent in 1546 authorized the Latin Bible, which was by that time a strange composite. The Old Testament was Jerome's translation from the Hebrew, except the Psalter, which was his Gallican revision; of the Apocryphal books, Judith and Tobit were his translations, while the remainder were of the Old Latin version. The New

Testament was Jerome's revision of the Old Latin translation. These translations and revisions of translations, and old original translations, constitute the Vulgate. See also JEROME.

I. M. P.

**VULTURE:** The Hebrew terms rendered in one or the other of the English versions by "vulture" are: "da'ah" (Lev. xi. 14) and its variant "dayyah" (Deut. xiv. 13 and Isa. xxxiv. 15 [R. V. "kite"]), "ayyah" (Lev. xi. 14; Deut. xiv. 13; Job xxviii. 7 [R. V. "kite" and "falcon"]), and "raḥam," "raḥamah" (Lev. xi. 18; Deut. xiv. 17 [A. V. "gier-eagle"]); all refer to unclean birds. The raḥam is identified with the Egyptian or Pharaoh's vulture (*Neophron percnopterus*), called also by the Arabs "raḥam"; it is a migratory bird, known in Palestine and Arabia, returning from the south in the spring. The Hebrew "nesher" (always rendered by "eagle" in the A. and R. V.) also denotes large birds of prey in general, and in some passages refers particularly to the vulture, or griffin-vulture, which belongs to the *Vulturidae* family. So in Jer. xlix. 16 and Job xxxix. 27-30, where the nesher is described as making its nest in the highest cliffs, which is characteristic of the vulture; or in Micah i. 16, where the bald-headedness of the nesher is alluded to (this can only refer to the vulture, which is devoid of true feathers on the head and neck); or when it is used as an image of an invading army (comp. Deut. xxviii. 49; Jer. xlviii. 40; Hos. viii. 1; Hab. i. 8). The Romans also did not distinguish sharply between the eagle and the vulture (Pliny, "Nat. Hist." x. 3, xiii. 26). The griffin-vulture is most abundant in Palestine, where it breeds in colonies, while the kite is represented by four species.

Besides all the Biblical terms for the vulture, the Talmud uses the name "ra'ah" on account of the keenness of the vulture's sight, "for it can, while in Babylon, sight carrion in Palestine" (Ḥul. 63b; B. M. 24b [Rashi]). In the passage of Ḥullin it is said that there are a hundred kinds of unclean birds in the Orient, all belonging to the vulture tribe ("min ayyah"). The proper name of the raḥam is שרקרק; it is called raḥam because with its appearance mercy, that is, rain, is bestowed on the world, while the name שרקרק is due to its cry "shir-krek" (Ḥul. 63a). In Ḥul. 25b is mentioned a bird of whose claws vessels were made, and which Rashi explains to be a griffin-vulture.

man ritual. In the later ritual tradition of the Sephardim, who sing it also in other portions of the liturgy, it is chanted by the congregation to the modern melody here transcribed.

A. F. L. C.

**WACHNACHT:** The Judæo-German term for the night preceding the day of circumcision, spent in feasting and the recitation of hymns and prayers by the mobel, sandik, and members of the family. The ostensible object of the watch is to ward off the "evil spirit" and to drive away the "devils," especially LILITH, who is supposed to be inimical to the child about to enter into the covenant of Abraham. The cabalists deduce the peril of this time from the circumstances attending the circumcision of the son of Zipporah (Ex. iv. 24-26; Zohar, Lek Leka, 93b); but the real purpose was to inquire after the health and needs of the mother, for the Rabbis advised a similar procedure in the case of the sick (Ber. 54b), and preparations were also made for the ceremony and feasting accompanying the circumcision. Other plausible reasons for the watch were the repeated edicts of the Gentile governments in the early periods against circumcision and the persecutions by Hadrian, so that those who took part in the ceremony were obliged to adopt all precautions and to assemble on the night before it to prevent publicity. Since circumcision could be performed only by day, the same need of caution required that all doors and windows be closed and the daylight excluded, so that the ceremony was carried out by the light of lamps and candles. Different communities had secret signs and signals to announce the "Wachnacht," such as the grinding of a millstone or the lighting of a lamp. The eve of circumcision itself was disguised under the term "shabua' ha-ben" (week of the son; Sanh. 32b, and Rashi *ad loc.*). Even after the persecutions had ceased, the lights were still lit (Yer. Ket. i. 5). Rab, Samuel, and Rab Assi met at

ha-Deshen," responsum No. 269), and in modern times it is termed "shalom zakar," "shalom" meaning "peace," and both indicating the birth of a male child and also implying an inquiry after the health of the mother as well as safety from persecution. The festival is considered a feast of merit ("se'udat miḥwah"; Shulḥan 'Aruk, Yoreh De'ah, 265, 12, note by Isserles).

In eastern Europe the small boys of the neighborhood are accustomed to assemble every night of the week before the circumcision and recite the "Shema" and a few verses of the Bible, ending with "The Angel which redeemed" (Gen. xlviii. 16), for which they are given nuts and sweetmeats. The ceremony is more elaborate in the Orient, especially in Jerusalem, where, even at the birth of a girl, two women act as nurses of the mother during the entire

**In Modern Times.** week, while two men in another room recite and study the Scriptures and tik-kunim. The chief ceremony, however,

is on the eve of the eighth day, when all who actually take part in the circumcision assemble together with the friends of the parents at the house of the latter and pass the entire night in celebration of the event, each guest bringing wine and cake as well as a lamp with olive-oil for illumination. The Sephardim decorate their lamps with wreaths of flowers, and march in the street to the beating of a drum until they reach the house, where the ḥakam delivers an address. The reading in the house consists of selections from the Bible, a few chapters of mish-nayot, including the Mishnah Bekorot if the child is a first-born, and selections from the Zohar (Emden, "Siddur Bet Ya'akov," i. 99b-102a, Warsaw, 1881). In his "Ḥemdat Yamim" (i. 8, Leghorn, 1762) Nathan Benjamin Ghazzati transmits a rabbinical tradition that if the watch was observed with full ceremony throughout the eight days, or at least during the four preceding the circumcision, the child

would be destined to remain faithful to God; while Aaron Berechiah of Modena recommended the recitation of the "Pittum ha-Keṭoret" ("Ma'abar Yabok," vi. 8, 5).

J. D. E.

**WAGENSEIL, JOHANN CHRISTOPH:** German Christian Hebraist; born at Nuremberg Nov. 26, 1633; died at Altdorf Oct. 9, 1705. In 1667 he was made professor of history at Altdorf, and was professor of Oriental languages at the same university from 1674 to 1697, after which he occupied the chair of ecclesiastical law until his death. For his knowledge of Hebrew he was chiefly indebted to Enoch Levi, who had come from Vienna to Fürth about 1670. Wagenseil devoted his learning to publishing anti-Christian works of Jewish authors, and undertook long journeys to gather his material. The fruit of this work is the collection entitled "Tela Ignea Satanae, sive Arcani et Horribiles Judæorum Adversus Christum, Deum, et Christianam Religionem Libri" (Altdorf, 1681), which includes the apologetic "Hizzuk Emonah" of the Karaites Isaac b. Abraham of Troki. Becoming convinced by the "Toledot Yeshu" that the Jews were guilty of blaspheming Jesus, Wagenseil addressed to all high potentates his "Denunciatio Christiana de Blasphemiis Judæorum in Jesum Christum" (Altdorf, 1703), in which he implored them to restrain the Jews from mocking at Jesus, Mary, the cross, the mass, and Christian teachings. Although he would have been pleased to see the Protestant princes show greater zeal in the conversion of the Jews, Wagenseil was opposed to forcible baptism and similar measures, and devoted a special treatise to the refutation of the charge of ritual murder.

Wagenseil wrote, besides the above-mentioned books, "Hoffnung der Erlösung Israels" (Leipzig, 1705), which appeared in a second edition (Altdorf, 1707), augmented by a number of smaller works under the general title "Benachrichtigungen Wegen Einiger die Gemeine Jüdischheit Betreffenden Sachen." This collection contains the following treatises: (1) "Quomodo cum Judæo in Colloquio, Forte Fortuno Nato, Agendum"; (2) "Judæos non Uti Sanguine Christiano"; (3) "Quomodo Usura Judæorum Averti Possit"; (4) "De Precatione Judaica Oleni"; (5) "Denunciatio Christiana de Blasphemiis Judæorum in Jesum Christum"; (6) "A. ologia"; (7) "Denunciatio ad Magistratus Christianos de Juribus Eorum a Judæis Violatis"; (8) "An Christianus Salva Religione Judæo Die Sabbati Inservire Possit." He wrote also: "Exercitationes Sex Varii Argumenti" (Altdorf, 1698); "Belehrung der Jüdisch-Deutschen Red- und Schreibart" (2d ed., Königsberg, 1699); "Disputatio Circularis de Judæis" (Altdorf, 1705); "Rabbi Moses Stendal's nach Jüdischer Rede-Art Vorlängst in Reimen Gebrachte Psalmen David's" (Leipzig, 1700); as well as an edition and Latin translation of the Talmudic treatise Soṭah (Altdorf, 1674).

**WAGER.** See ASMAKTA; BETTING.

**WAGES.** See MASTER AND SERVANT.

**WAGNER, WILHELM RICHARD** (generally known as **Richard Wagner**): German composer of music; born at Leipzig May 22, 1813; died at Venice Feb. 13, 1883. He commenced the study of music at the University of Leipzig, but had a struggling existence till 1839, when he made the acquaintance of Meyerbeer, who assisted him in his attempts to have his operas produced in Paris. He came in contact also with Heine, who helped him with the libretto of "Der Fliegende Holländer." After much wandering he settled at Zurich in 1849, and there wrote an article, "Das Judenthum in der Musik," which appeared in the "Neue Zeitschrift" over the pen-name "K. Freigedenk." The article did not at first attract much attention, except a protest from eleven masters of the Leipzig Conservatorium to Brendel, the editor of the "Zeitschrift." Wagner protested against the tendency of music by Jewish composers like Mendelssohn and Meyerbeer to be sweet and tinkling without depth. In his "Oper und Drama" (1852) he makes the same protest against Meyerbeer. When the article "Das Judenthum in der Musik" was republished it drew forth numerous replies, among which may be mentioned: Joseph Engel, "Richard Wagner, das Judenthum in der Musik; eine Ahwehr"; E. M. Oettinger, "Offenes Billetdoux an Richard Wagner," Dresden, 1869; and A. Truhart, "Offener Brief an Richard Wagner," St. Petersburg, 1869. Notwithstanding his public utterances against Jewish influence in music, Wagner had many Jewish friends; and his favorite choirmaster in later life was Herman Levi. See JEW. ENCYC. i. 643 h, s. v. ANTI-SEMITISM.

**WAHB IBN MUNABBIH (Abu 'Abd Allah al-Ṣana'ani al-Dhimari):** Mohammedan traditionalist of Dhimar (two days' journey from Sanaa) in Yemen; died at the age of ninety, in a year variously given by Arabic authorities as 725, 728, 732, and 737 c. e. On his father's side he was descended from Persian knights, while his mother was a Himyarite. His father, whose name was Munabbih, had been converted to Islam in the lifetime of the Prophet, although a single authority, the "Al-Tibr al-Masluḳ" (ed. 1306 A. H., p. 41), states that Wahb himself had turned from Judaism to Mohammedanism. His other biographers, however, including Al-Nawawi and Ibn Ḥallikan, do not note that he was a Jew either in race or in religion. The fact that he was well versed in Jewish traditions, on which he wrote much, probably gave rise to the statement that he was a Jew, although he might have acquired his knowledge from his teacher Ibn 'Abbas. Wahb is said to have read more than seventy books on the prophets, and he was an extremely prolific narrator ("rawi") of stories regarding Mohammed and Biblical personages. Although the Mohammedans regarded him as a reliable authority in these accounts, many of them, such as Ibn Khaldun, declared that in his other writings he simply lied (comp. "Notices et Extraits des Manuscrits," xx.

part 1, p. 461; De Slane, *Ibn Hallikan*, iii. 673, note 2). Among Wahl's many writings may be mentioned his "Kīṣāṣ al-Anbiya" and "Kitab al-Isra'iliyat" ("Ḥajji Khalifa," iv. 518, v. 40). The former, which is believed to be his earliest literary work, is, as its title indicates, a collection of narratives concerning Biblical personages, the accounts being drawn from Jewish folk-lore though presented in Islamic guise. Thus, like Ibn 'Abbas and Ka'b al-Aḥbar, he was an authority for many legends narrated by Al-Tabari, Mas'udi, and others. The "Kitab al-Isra'iliyat," or "Book of Jewish Matters," is lost, but was apparently a collection of Jewish stories, many of them incorporated by a Jewish compiler into the "Arabian Nights." In the latter collection there are indeed many stories that bear the Jewish stamp, and some of them, such as the "Angel of Death," are ascribed to Wahl by the author of "Al-Tibr al-Masluk." There are also other stories which are attributed to Wahl, and many more which, from their Jewish character, may be traced to him. His Jewish learning may be illustrated by his opinion of the Shekinah (Arabic, "Sakinah") as stated by different Arabic authors. According to Al-Baghawi in his "Ma'alim al-Tanzil" (Goldziher, "Abhandlungen zur Arabischen Philologie," i. 182, Leyden, 1896), Wahl believed that the Shekinah was the spirit of God. On the other hand, Al-Tabari ("Annals," i. 544), in recording the fact that the Israelites sometimes took the Ark of the Covenant into battle when they were at war with their enemies (comp. I Sam. iv. 4 *et seq.*), quotes Wahl as saying in the name of a certain Jewish authority that the Shekinah which rested in the Ark was a being in the shape of a cat, and that when the Israelites heard the mewling of cats coming from the interior of the Ark, they were sure of a victory. See also ARABIAN NIGHTS.

WAHL, ABRASKI. See WAHL, SAUL.

WAHL, MORITZ CALLMANN: German writer; born March 28, 1829, at Sondershausen; died Oct. 15, 1887. He studied Oriental languages at Leipsic under Julius Fürst and H. L. Fleischer. Later he taught for a time at an English school, and subsequently held the position of correspondent in a large business house at Lyons, France. Finally he settled at Erfurt, where he founded a business academy. Aside from his pedagogic activity Wahl pursued scientific studies. The following are the more important of his works: "Beiträge zur Vergleichenden Parömiologie"; "Das Sprichwort in der Hebräisch-Aramäischen Literatur"; "The Book of Merry Riddles"; "Das Sprichwort der Neueren Sprachen"; "Die Englische Parömiologie vor Shakespeare"; "Das Parömiologische Sprachgut bei Shakespeare."

S.

W. SA.

WAHL, SAUL: A remarkable personage who, according to tradition, occupied for a short time the throne of Poland. The story connected with his reign

is as follows: Prince Nicholas Radziwill, surnamed the Black, who lived in the sixteenth century, desiring to do penance for the many atrocities he had committed while a young man, undertook a pilgrimage to Rome in order to consult the pope as to the best means for expiating his sins. The pope advised him to dismiss all his servants and to lead for a few years the life of a wandering beggar. After the expiration of the period prescribed, Radziwill found himself destitute and penniless in the city of Padua, Italy. His appeals for help were heeded by nobody, and his story of being a prince was received with scorn and ridicule. He finally decided to appeal to Samuel Judah Katzenellenbogen, the rabbi of Padua. The latter received him with marked respect, treated him very kindly, and furnished him with ample means for returning to his native country in a manner befitting his high rank. When the time for departure came the prince asked the rabbi how he could repay him for his kindness. The rabbi then gave him a picture of his son Saul, who years before had left for Poland, and asked the prince to try and find the boy in one of the many yeshivot of that country. The prince did not forget the request. Upon his return to Poland he visited every yeshibah in the land, until finally he discovered Saul in that of Brest-Litovsk. He was so captivated by the brilliancy and depth of Saul's intellect that he took him to his own castle, provided for all his wants, and supplied him with all possible means for study and investigation. The noblemen who visited Radziwill's court marveled at the wisdom and learning of the young Jew, and thus the fame of Saul spread throughout Poland.

When King Bathori died (1586) the people of Poland were divided into two factions: the Zamaikis and the Zborowskis. There were quite a number of candidates for the throne, but the contending parties could agree upon no one. There existed at that time in Poland a law which stipulated that the throne might not remain unoccupied for any length of time, and that in case the electors could not agree upon a candidate an outsider should be appointed "rex pro tempore" (temporary king). This honor was then offered to Radziwill; but he refused, saying that there was a man who belonged to neither party, and who in wisdom and goodness was far superior to any one else he knew. That man possessed only one very slight shortcoming, and if the Diet would make his election unanimous, he (Radziwill) would acquaint it with his name. Accordingly, Saul's name was solemnly proposed; and amid great enthusiasm, and shouts of "Long live King Saul!" Wahl was elected to this high office. The name "Wahl" was given him from the German word "wahl" (= "election"). Traditions disagree as to the length of his reign. Some state that he ruled one night only; others make it a few days. All, however, are agreed that Saul succeeded in passing a number of very wise laws, and among them some that tended to ameliorate the condition of the Jews in Poland. Although this story can not be supported by any historical data, it gained a firm place in the belief of the people.

**WAHLTUCH, ADOLPHUS**: English physician; born in Odessa, Russia, 1837. He studied medicine at Kiev, Prague, and London (M.D., L.R.C.P., 1863), and then settled in Manchester as a practising physician. He is known as a successful practitioner and as a prolific writer of professional works, among which may be mentioned: "A Dictionary of Materia Medica and Therapeutics," London, 1868; "On Catalepsy," *ib.* 1869; "Asthma Nervosum," Manchester, 1877; "Electro-Therapeutics," London, 1883; "Massage," 1889; "The Dead and the Living," 1891; "Treatment of Diseases by Energy," Manchester, 1900.

Wahl Tuch is consulting physician to the Victoria Jewish Hospital, and to the Hulme Dispensary, Manchester, and past president of the Clinical Society and of the Manchester Medico-Ethical Association. To the last-named association he has rendered valuable services as chairman of the Parliamentary Committee (1890-95). He was one of the founders of the Manchester Cremation Society, and is a frequent lecturer on hygiene and on scientific and historical subjects. He is an enthusiastic chess-player, edits the chess column in the "Manchester Weekly Times," and has founded several chess-clubs in the city of Manchester.

J. H. L. R.

**WAHLTUCH, MARK**: Russian philosopher and author; born at Odessa 1830; died at Pisa Jan. 27, 1901. He resided for many years in Ancona, Naples, Florence, Leghorn, and Pisa. He translated into Italian the works of A. Pushkin ("Poesie di A. Pusckin," Odessa, 1855), and wrote in Italian the following tragedies founded on Biblical subjects: "Assalonne," Odessa, 1857; "Sansone," *ib.* 1859; "Jeffe," Milan, 1862; and "Giobbe," *ib.* 1872. He devoted himself to philosophical studies, and during his latter years to the investigation of spiritualism, the following works being the results of these activities: "Psicografia, Ossia Descrizione dell' Anima con Segni Sensibili, Preceduta da una Nuova Veduta Sopra Alcuni Punti Cardinali della Filosofia Obiettiva" (with illustrations), Naples, 1870; "L'Anima Umana nel Suo Stadio Oriundo, Terrestre e Futuro" (illustrated), Milan, 1875; "Antropobiotica Generale, Ossia la Vita dell' Anima e del Corpo nella Condizione Sana, Inferma, e Convalescente," Florence, 1879; and "Prove Incontestabili delle Pazzie d'un Pseudo-Alienista Appalesate" (against Cesare Lombroso), Leghorn, 1887.

**WAHRHEIT, DIE**. See PERIODICALS.

**WAHRMANN, ISRAEL B. SOLOMON**: Hungarian rabbi and Talmudist; born at Altofen, Hungary; died at Budapest June 24, 1824. He was called to the rabbinate of Pesth in 1799, and was the first officially recognized rabbi of the community, which developed rapidly under his leadership, its first statutes being drafted at his instance. The most important institution connected with his name

is the Nationalschule, an elementary school dedicated on Sept. 8, 1814, which was an important factor in raising the intellectual status of the community, its curriculum including Hungarian, modern science, and Hebrew. Wahrmann published only one sermon, in German and entitled "Andachtsübung der Israeliten der Königlichen Freistadt Pesth." The sorrow at his death found expression in Philip Weil's Hebrew and German poem "Evel Yisrael, oder Totenfeier."

s. E. N.

**WAHRMANN, JUDAH**: Hungarian rabbi; son of Israel WAHRMANN; born 1791; died at Pesth Nov. 14, 1868. He was appointed associate rabbi and teacher of religion at the gymnasium of Budapest on Feb. 9, 1851, and was the author of "Ma'areket ha-Ha'atakot" (Ofen, 1831) and "Dat Yehudah, Mosaische Religionslehre" (*ib.* 1861; 2d ed. 1868).

**BIBLIOGRAPHY**: Fürst, *Bibl. Jud.* iii. 490.

s. E. N.

**WAHRMANN, MORITZ**: Hungarian politician; grandson of Israel WAHRMANN; born at Budapest Feb. 28, 1832; died there Nov. 26, 1892. He was educated at the Protestant gymnasium and the university of his native city, and entered his father's mercantile establishment in 1847, becoming its head after his father's death.

Wahrmann was closely associated with the development of Hungarian commerce and industry, the consolidation of the Hungarian finances, the growth of the educational and philanthropic institutions of Budapest, and preeminently with the progress of its Jewish community. Aiming to nationalize Hungarian commerce and to render his country independent of Austria, both financially and economically, he established large industrial and commercial enterprises.

Moritz Wahrmann.

In 1869 Wahrmann was elected to the Hungarian Parliament as the representative of the electoral district of the Leopoldstadt (at present the fifth district of Budapest), being the first Jew to be chosen a member of the Hungarian delegation, in which he energetically promoted the interests of Hungary. He was reelected six times, holding the office until his death. He spoke comparatively seldom, but was an active member of committees, in which his financial training frequently rendered him one of the most important figures. He was also president of the Chamber of Commerce and Industry of Budapest, and of the Lloyd Company.

Wahrmann was equally active in communal affairs, and was one of the foremost advocates of his coreligionists. He was a most zealous member of the Magyar Izraelita Egylet, and strove with tongue and pen for the emancipation of the Jews. In 1868

he was vice-president of the General Jewish Congress, and in this capacity headed a deputation to the king. As president of the community of Budapest he exercised a profound influence on its administration and institutions, and labored to establish unity of interest among the various political bodies. He also contributed generously from his ample means to scientific, educational, and philanthropic institutions.

His brother, **Alexander Wahrman** (born 1839; died at Budapest in 1899), contributed much, together with Max Wirth, the Viennese political economist, toward the economic elevation of Hungary. He was especially noteworthy as a philanthropist, bequeathing 200,000 crowns to the benevolent societies of the capital, and 600,000 crowns for the erection of a Jewish gymnasium.

E. N.—L. V.

**WAKRULKAR, SOLOMON ELIJAH:** Beni-Israel soldier; enlisted in the Nineteenth Regiment Native (Indian) Infantry Sept. 25, 1838. He was promoted jemidar Jan. 1, 1853; subahdar, Jan. 22, 1858; subahdar-major, Jan. 1, 1872. In 1877 he was decorated with the first and second class Order of British India, with the titles of bahadur and sirdar-bahadur, the highest mark of approbation which the Indian government bestows on native officers. He fought in the Afghanistan campaign of 1839, including the capture of Ghazni and occupation of Kabul (medal); in the Punjab campaign, taking part in the siege of Multan, the battle of Gujarat, and the march to the mouth of the Khaibar Pass; and in the Central India campaign of 1858. In his various campaigns he marched up and down both banks of the Indus from Kurrachee to Kabul and Attock. Wakrulkar retired from active service Dec. 23, 1878.

J. Hx.

**WALDEN, AARON BEN ISAAH NATHAN:** Polish Talmudist, editor, and author; born at Warsaw about 1835. Walden, who is an ardent adherent of Hasidism, is known especially for his "Shem ha-Gedolim he-Ḥadash" (Warsaw, 1864), a work of the same nature as Azulai's "Shem ha-Gedolim." Like the latter, it consists of two parts: (1) "Ma'areket Gedolim," being an alphabetical list of the names of authors and rabbis, mostly those that lived after Azulai, but including also many of the seventeenth and eighteenth centuries who were omitted by Azulai; and (2) "Ma'areket Sefarim," an alphabetical list of book-titles. Walden himself says in his preface that he took Azulai's "Shem ha-Gedolim" as a model; and it is evident that he refers to Benjacob's edition of that work. It must be said that the alphabetical list in the first part is arranged only according to the first names of the persons mentioned. In many instances the names are accompanied by biographical sketches, especially of Hasidic rabbis, whose biographies contain records of the miracles wrought by them and in behalf of them. To the third edition of the work, published in 1882 by Walden's son Joseph Aryeh Löb, the latter added an appendix entitled "En Zoker," con-

taining names and book-titles omitted in the two previous editions.

Another work by Walden, in which he has displayed great erudition, is the "Mikdash Melek" (Warsaw, 1890), an edition of the Psalms in five volumes. In it are printed around the text: (1) "Bet ha-Midrash," a kind of *yalqut* after the model of the "Yalqut Shim'oni," Walden having gathered all the *haggadot* referring to the Psalms which were scattered in the Talmudim, in the midrashic literature, and in the Targum, as well as in the Zohar and other cabalistic works; (2) "Bet ha-Keneset," a fourfold commentary ("PaRDeS") consisting of material taken from the most prominent ancient commentators; and (3) "Bet Aharon," a reference index to the "Bet ha-Midrash," giving also variants and an explanation of difficult passages.

**WALDENBURG, LOUIS:** German physician; born at Filehne, Posen, July 31, 1837; died at Berlin April 14, 1881; educated at the University of Berlin (M.D. 1860). After a postgraduate course at Heidelberg he established himself in Berlin as a specialist in diseases of the chest and throat. From 1864 to 1868 he was joint editor with H. Rosenthal of the "Allgemeine Medizinische Central-Zeitung." In 1865 he became privat-docent at the Berlin University, and from 1868 until his death he edited the "Berliner Klinische Wochenschrift." In 1871 he was appointed assistant professor, and in 1877 department physician, at the Charité.

Among Waldenburg's many works may be mentioned: "De Origine et Structura Membranarum, Quæ in Tuberculis Capsulisque Verminosis Involucrum Præbent," a prize essay at the University of Berlin, 1859; "Ueber Blutaustritt und Aneurysmenbildung, Durch Parasiten Bedingt," in "Archiv für Anatomie und Physiologie," 1860; "Ueber Structur und Ursprung der Wurmhaltigen Cysten," in "Archiv für Pathologische Anatomie und Physiologie und für Klinische Medizin," 1862; "Lehrbuch der Respiratorischen Therapie," Berlin, 1864 (2d ed. 1872); "Die Tuberkulose, die Lungenschwindsucht und Scrofulose," *ib.* 1869; and "Die Pneumatische Behandlung der Respirations- und Circulations-Krankheiten," *ib.* 1875 (2d ed. 1880).

**WALDOW, B.** See BLOCH, BIANCA.

**WALDSTEIN, CHARLES:** Anglo-American archeologist; born in New York March 30, 1856. He was educated at Columbia College, New York city (A.M. 1873), and studied also at Heidelberg (Ph.D. 1875) and finally at Cambridge, England (M.A. and Litt.D. 1878). In 1880 he became university lecturer on classical archeology at Cambridge University, and two years later university reader. From 1883 to 1889 he was director of the Fitzwilliam Museum; and in 1883 he was made a fellow of King's College. In 1889 he was called to Athens, Greece, as director of the American School of Classical Studies, which office he held until 1893, when he became

professor at the same institution. In 1895 he returned to England as Slade professor of fine arts at the University of Cambridge; and he held this chair until 1901. During his stay in Athens he directed the excavations of the American Archeological Institute at the site of ancient Plataea, Eretria, where, he declared, he unearthed the tomb of Aristotle, the Heraeum of Argos, etc. He has formed an international committee to promote the excavation of Heracleum.

Waldstein is the author of: "Balance of Emotion and Intellect" (1878); "Essays on the Art of Phidias" (1885); "The Jewish Question and the Mission of the Jews" (1889, anon.; 2d ed. 1900); "The Work of John Ruskin" (1894); "The Study of Art in Universities" (1895); "The Expansion of Western Ideals and the World's Peace" (1899); "The Argive Heraeum" (1902); "Art in the Nineteenth Century" (1903). He has written also in several journals numerous reports on his excavations, and has published, under the pseudonym "Gordon Seymour," three short stories which later appeared, under his own name, as "The Surface of Things" (1899).

**WALDTEUFEL, EMILE:** French composer; born at Strasburg Dec. 9, 1837. He commenced the study of music under the tuition of his father, a professional musician; later he became the pupil of Joseph Heyberger; and he completed his musical education at the Conservatoire in Paris. Here he pursued his studies on the piano in company with Massenet, a fellow pupil, who soon became his firm friend. About 1860, being obliged to discontinue his studies owing to lack of means, he turned his attention to dance-music. "Manolo," a waltz performed under his direction at a soirée given by the Prince of Sagan, was a great success; and it so delighted the Prince of Wales (now Edward VII.), who was present, that he requested the dedication of the piece to himself, and had it published in England. In a short time Waldteufel received brilliant offers from the English publishers of music; and his fame and fortune were thenceforth assured. His triumphs in London were soon followed by similar ones in Paris. In 1865 he was appointed pianist to the empress Eugénie. He became director of the court balls of the emperor Napoleon III., and organizer of the famous soirées at Compiègne and Biarritz. At the latter place he met Bismarck.

During the Franco-Prussian war (1870-71) Waldteufel enlisted as a volunteer in the legion of the Basses-Pyrénées. Upon the defeat of the French cause he returned to Paris and devoted himself with renewed ardor to his art. Of his most celebrated works may be mentioned: "Amour et Printemps," a waltz so universally popular that, after fourteen years of repeated publication by two firms, it was purchased by a third for the sum of 8,000 francs; "A Toi, Dolores"; "Dans les Nuages"; "Dans un Songe"; "Je T'Aime"; "Myosotis"; "Pour une Rose"; "Retour du Printemps"; "Sentiers Fleuris"; "Soir d'Amour"; "Les Sourires"; "Toujours ou Jamais"; "Doux Poème"; "Les Violettes"; "L'Espérance"; and the polka "Bella Bocca."

In 1885 Waldteufel was summoned to London to direct the performance of his compositions. There he met with a triumphant success, which was repeated four years later at Berlin, whither he went for a similar object. For three successive weeks the three great composers Fahrbach, Strauss, and Waldteufel personally directed the execution of their respective waltzes. Waldteufel has won renown also as an orchestra leader, particularly at the "Bals de l'Opéra." He is a chevalier of the Royal Order of Isabella the Catholic.

J. KA.

**WALEY, JACOB:** English lawyer and professor of political economy; born in London March 17, 1819; died there June, 1873. He was the elder son of Solomon Jacob Levy (who adopted the name of Waley), and was educated at Neumegeen's school at Highgate and at University College, London, where he was the first pupil to obtain the Flaherty Mathematical Scholarship. In 1839 he was graduated (B.A.) from the University of London, taking the first place in both mathematics and classics. He was entered as a student at Lincoln's Inn on Nov. 3, 1837, and was called to the bar Nov. 21, 1842, being the fourth Jew to be thus called.

Waley became one of the most eminent conveyancers of his day. His first studies in conveyancing were conducted in the chambers of Duval; and he was also a pupil of Holt, afterward lord chief justice. Waley practised as an equity draftsman; he acted as conveyancing counsel for the Bedford estates, and was named by the queen in 1867 a member of the royal commission appointed to consider the law on the transfer of real property. In this capacity he had a large share in framing the report on which was based the lord chancellor's bill passed in 1874. He was associate editor with Davidson of a work on conveyancing precedents, and attained the distinction of becoming (1870) one of the conveyancing counsel of the Court of Chancery.

Waley was president of the Jews' Orphan Asylum, and on the formation of the Anglo-Jewish Association he was elected its first president. His numerous engagements, however, compelled his early retirement from the latter position. He promoted the Hebrew Literary Society, was for a long period a member of the council of Jews' College, and aided materially in the organization of the Jewish Board of Guardians. But his greatest service to the Jewish community was his formation, in conjunction with Lionel Louis Cohen, of the United Synagogue, to which object he devoted his professional skill, eloquence, and careful judgment. He took much interest also in the treatment of Jews abroad; and in 1872 he wrote a brief preface to Israel Davis' "Jews in Rumania," in which he remonstrated against the persecution of his coreligionists.

In 1853 Waley was appointed professor of political economy at University College, London, which office he held until 1865, when the pressure of other engagements compelled him to resign. He was an active member of the governing body of the university, and was secretary of the Political Economy Club, as also of the Statistical Society. On his resignation he was named professor emeritus by the

council of University College. Waley also acted as examiner for the University of London.

**WALEY, SIMON WALEY:** English merchant, musician, and communal worker; born in London Aug. 23, 1827; died there Dec. 30, 1875; younger son of Solomon Jacob Levy. He studied at University College, London, but left without taking a degree. At the age of seventeen he wrote a series of articles for the "Times" on the question of international traffic, and in 1858 he contributed to the "Daily News" a series of letters on "A Tour in Auvergne," afterward included in Murray's "Handbook to France." Waley entered the stock exchange and acquired an influential position, being elected a member of its committee. For nearly a quarter of a century he was honorary secretary of the Jews' Free School, and conducted the entire correspondence between the school and the government Board of Education. From 1843 he was the official correspondent for England of the chamber of commerce of Boulogne, in which city he took great interest.

Waley received instruction in piano from Moscheles, Sir William Sterndale Bennett, and G. Alexander Osborne, and in theory and composition from William Horsley and Molique. The first musical work published by Waley was "L'Arpeggio," a pianoforte study, which appeared in 1848. His other compositions include a pianoforte concerto, two pianoforte trios, many piano pieces and songs, and some orchestral pieces. He composed also hymns for Sabbaths and festivals, several of which were chanted for many years at the West London Synagogue. His songs include "Sing on, Ye Little Birds," "The Home of Early Love," and "Alpine Shepherds' Song."

S. O.

**WALLICH:** German family which probably derived its name from the Hebrew transcription of "Falk" (פלך). The earliest known members of it are Joseph b. Meir Wallich, a physician, and Moses Joshua Wallich, both of whom lived at Worms in the sixteenth century. A document relating to the purchase by Joseph b. Meir Wallich of a Rashi and

Rashbam manuscript (Worms, 1615) is signed by Joseph and by his two sons Eliezer and Solomon, all physicians and all surnamed Weibush (Phoebus?), and by thirteen other members of the Wallich family, among them the physicians Moses b. Lezer and Moses b. Moses Joshua (surnamed Weibelin). Many physicians of the Wallich family were prominent in Germany in the eighteenth century.

Subjoined is an abbreviated pedigree:

**BIBLIOGRAPHY:** H. Schultze, *Gesch. der Familie Wallich*; *Monatsschrift*, 1905, *passim*.

J.

The following are the more important members:

**Abraham ben Isaac Wallich:** Physician; born at Metz; flourished at Frankfort-on-the-Main in the second half of the seventeenth century. He went to Padua to study medicine, obtaining his diploma, "maxima cum laude," in 1655; and in 1657 he went to Frankfort to practise as a physician. He was the author of a Hebrew treatise on medicine entitled "Sefer Refu'ot," or, as he called it in Latin, "Harmonia Wallichis Medica" (published posthumously, Frankfort-on-the-Main, 1700). He tried to prove that the ailments of the soul correspond to those of the body and that they must be treated in the same way. In this work he speaks alternately as a physician and as a preacher of morals.

**Immanuel Wallich:** Rabbi and physician of Coblentz in the eighteenth century.

**Joseph b. Meir Wallich:** Physician; the earliest known member of the family; flourished at Worms in the sixteenth and seventeenth centuries. He is known to have written in 1597, on a manuscript of Isaac Israeli's translation of Ibn al-Yazzar's "Zad al-Musafir," a bibliographical note in which he confounded the translator with Isaac ben Joseph Israeli. From this and from what has been said above it may be concluded that Joseph b. Meir was a collector of medical and rabbinical manuscripts. He had in his possession also a copy of Bernard de Gordon's "Sefer ha-Gebulim" (see Neubauer, "Cat. Bodl. Hebr. MSS." No. 2125, 4), the first leaf of which was supplied in his own handwriting.

**Judah ben Abraham Wallich**: Physician; lived at Frankfort-on-the-Main in the seventeenth and eighteenth centuries. He was the author of: (1) "Dimyon ha-Refu'ot" or "Harmonia Wallichis Medica Animæ et Corporis" (Frankfort-on-the-Main, 1700), a Judeo-German compendium of his father's "Sefer Refu'ot," supplemented by a treatise on fever in children. (2) "Zori ha-Shamayemah" (Latin title, "Theriaca Cœlestis Wallichiana"; German, "Himmlicher Theriak"; *ib.* 1713). Of this work only the German preface and the first Hebrew section are extant; the remainder, which was destroyed by fire, was not published. (3) "Daukfest" (*ib.* 1716), a thanksgiving memorial in pure German with Hebrew characters; written on the occasion of the birth of Archduke Leopold of Austria (April 13, 1716).

**Moses b. Eliezer Wallich**: Scholar; lived at Worms in the seventeenth century. He was the author of "Sefer Meshalim" or "Kuh-Buch" (Frankfort-on-the-Main, 1687), a German collection of fables adapted from Berechiah ha-Nakdan's "Mishle Shu'alim" and Isaac ibn Sahulah's "Mashal ha-Kadmoni." This book is not to be confounded with a similar work by ABRAHAM B. MATTATHIAS which bears the same title.

**Naphtali Hinz b. Abraham Wallich**: Physician; lived at Metz in the seventeenth century; brother of Judah ben Abraham Wallich. He is known as having been the competitor of Solomon b. Baruch of Lippstadt, who was appointed physician to the Jewish community of Metz. Solomon delayed his arrival, and consequently the community appointed Naphtali Hinz in his stead. When Solomon reached Metz a quarrel arose between the two physicians, Solomon urging his letter of appointment, and Naphtali Hinz his priority. They continued quarreling until 1695, when they were reconciled by R. Gabriel Eskeles of Metz.

**Solomon Wallich**: Physician of Mayence, where he died May 11, 1780; son of Immanuel Wallich. Like his father, Solomon received a rabbinical education in addition to his medical training.

**WALLIS (VALAIS)**. See SWITZERLAND.

**WALLS** (חיל, קיר, חמה): The walls erected by the Canaanites for the protection of their farmyards consisted of great unhewn blocks of stone, and remnants of them still exist, especially in the east-Jordan district. Walls of fortifications and towns were similar in structure, although many large cities may have had ramparts of hewn stone. Unburned bricks were also used for walls, and the excavations at Tell al-Hasi (Lachish) have brought to light brick walls between nine and ten feet thick. Less thick are the walls at Tell el-Mntasallim (Megiddo), which show a combination of both materials, the base being of unhewn stone, on which layers of brick are laid. The dimensions of the bricks at Megiddo are about 50 × 33 × 13 cm., and the size of the Canaanite walls filled the Israelites with alarm (Num. xiii. 28; Deut. i. 28).

The construction of walls of unhewn stone was long retained by the Israelites, so that, although Solomon built the outer wall of his palace of hewn stone (I Kings xii. 12), the description of the structure (*ib.* verses 9-11) shows that this was not the usual style of architecture, but an extraordinary innovation which aroused the admiration of his contemporaries. Herein, moreover, is seen the influence of the Tyrians, who designed the palace of Solomon, for Phœnician architecture is characterized by its partiality for large blocks of hewn stone. The choice of material was doubtless conditioned primarily by the locality, since in the mountains there was no lack of stone, while in the plains bricks were used for houses and even for the walls.

The walls were generally broad, for the defenders stood on them (comp. Isa. xxxvi. 11; Neh. xii. 31; I Macc. xiii. 45), and engines of war were also placed thereon (II Chron. xxvi. 15). Battlements (חֲמוֹט, שְׂמִשׁוֹת [Isa. liv. 12] probably has a similar meaning) were likewise built to protect the guards (II Chron. *l.c.*). Strong towers were constructed at the corners and gates, as well as on the wall itself at intervals. The entrance was built in an angle, as may still be seen at Jerusalem; and the inner and outer gates were closed with doors covered with iron plates and fitted with iron bolts. A low bulwark (חֵיל; Isa. xxvi.; Ps. lxxviii. 14 [A. V. 13]) with a protective glacis was frequently constructed at some distance before the main wall. See also FORTRESS; HOUSE; TOWER.

**WALOZIN**. See VOLOZHIN.

**WALTON, BRYAN**: Christian Hebraist; born in 1600 at Hilton, Yorkshire, England; died in London Nov. 29, 1661; educated at Magdalene and Peterhouse colleges, Cambridge. He became a London clergyman and was involved in the question of tithes raised by John Selden, but was appointed king's chaplain, and, after being imprisoned by the Parliamentarians, went to Oxford to join the king. There he formed the project of issuing a polyglot Bible, better and cheaper than the one that had appeared at Paris as late as the year 1645. In 1652 he issued a circular on the subject, and subscriptions were obtained under the patronage of Selden and Ussher. The work, which was in six volumes, was published between 1654 and 1657 in nine languages, though no single book appears with more than eight versions. Much of the work was done by Castell, who compiled the Heptaglot Lexicon as a supplement to the Polyglot. Walton's prolegomena were printed as a separate work both in Germany (Leipsic, 1777) and in England (Canterbury, 1828).

The "Biblia Sacra Polyglotta" was one of the earliest books printed by subscription in England, the price being £10 for the six volumes. Walton dedicated his work to the Parliament; but when Charles II. came to the throne, the dedication was changed to one in honor of the king, who appointed Walton Bishop of Chester in 1660. Walton's Polyglot has been the standard work up to the present day; but

its texts scarcely meet the requirements of modern scholarship.

**WANDERING JEW:** Imaginary figure of a Jerusalem shoemaker who, taunting Jesus on the way to crucifixion, was told by him to "go on forever till I return." The legend first appeared in a pamphlet of four leaves entitled "Kurtze Beschreibung und Erzählung von einem Juden mit Namen Ahasverus." This professes to have been printed at Leyden in 1602 by Christoff Crutzer, but no printer of that name has been discovered, and the real place and printer can not be ascertained. The legend spread quickly throughout Germany, no less than eight different editions appearing in 1602; altogether forty appeared in Germany before the end of the eighteenth century. Eight editions in Dutch and Flemish are known; and the story soon passed to France, the first French edition appearing in Bordeaux, 1609, and to England, where it appeared in the form of a parody in 1625 (Jacobs and Wolf, "Bibliotheca Anglo-Judaica," p. 44, No. 221). The pamphlet was translated also into Danish and Swedish; and the expression "eternal Jew" is current in Czech. The pretended existence of the Wandering Jew, who is stated to be met with from time to time in all of these countries, was eagerly seized upon amidst the religious disturbances caused by the Reformation, as furnishing an eye-witness of the crucifixion. The various appearances claimed for him were at Hamburg in 1547; in Spain in 1575; at Vienna, 1599; Lübeck, 1601; Prague, 1602; Lübeck, 1603; Bavaria, 1604; Ypres, 1623; Brussels, 1640; Leipsic, 1642; Paris, 1644; Stamford, 1658; Astrakhan, 1672; Frankenstein, 1676; Munich, 1721; Altbach, 1766; Brussels, 1774; and Newcastle, 1790. The last appearance mentioned appears to have been in America in the year 1868, when he was reported to have visited a Mormon named O'Grady (see "Desert News," Sept. 23, 1868).

The figure of the doomed sinner, forced to wander without the hope of rest in death till the millennium, impressed itself upon the popular imagination, and passed thence into literary art, mainly with reference to the seeming immortality

**Influence of Legend on Literature.** of the wandering Jewish race. These two aspects of the legend are represented in the different names given to the central figure. In German-speaking countries he is referred to as "Der Ewige Jude" (the immortal, or eternal, Jew), while in Romance-speaking countries he is known as "Le Juif Errant" and "L'Ebreo Errante"; the English form, probably because derived from the French, has followed the Romance. The Spanish name is "Juan Espera en Dios." The legend has been the subject of poems by Schubart, Schreiber (1807), W. Müller, Lenau, Chamisso, Schlegel, Julius Mosen (an epic, 1838), and Koehler; of novels by Franzhorn (1818), Oeklers, and Schucking; and of tragedies by Klinemann ("Ahasuerus," 1827) and Zedlitz (1844). Hans Andersen made his "Ahasnerus" the Angel of Doubt, and was imitated by Heller in a poem on "The Wandering of Ahasuerus," which he afterward developed into three cantos. Robert

Hamerling, in his "Ahasver in Rom" (Vienna, 1866), identifies Nero with the Wandering Jew. Goethe had designed a poem on the subject, the plot of which he sketched in his "Dichtung und Wahrheit."

In France, E. Quinet published his prose epic on the legend in 1833, making the subject the judgment of the world; and Eugene Sue wrote his "Juif Errant" in 1844. From the latter work, in which the author connects the story of Ahasuerus with that of Herodias, most people derive their knowledge of the legend. Grenier's poem on the subject (1857) may have been inspired by Gustav Doré's designs published in the preceding year, perhaps the most striking of Doré's imaginative works. In England—besides the ballad given in Percy's "Reliques" and reprinted in Child's "English and Scotch Ballads" (1st ed., viii. 77)—there is a drama entitled "The Wandering Jew, or Love's Masquerade," written by Andrew Franklin (1797). William Godwin's novel "St. Leon" (1799) has the motive of the immortal man, and Shelley introduced Ahasuerus into his "Queen Mab." George Croly's "Salathiel," which appeared anonymously in 1828, treated the subject in an imaginative form; it has been recently reprinted under the title "Tarry Thou Till I Come" (New York, 1901).

According to L. Neubaur, the legend is founded on the words given in Matt. xvi. 28, which are indeed quoted in the earliest German pamphlet of 1602. So, too, from John xxi. 20 *et seq.* a legend arose in the Church that St. John would not die before the second coming of Jesus;

**Origin of Legend.** while another legend declares that the attendant Malchus, whose ear St.

Peter cut off in the garden of Gethsemane (John xviii. 10), was condemned to wander till the second coming. His action is associated in some way with the scoffing at Jesus, and is so represented in a broadsheet which appeared in 1584. An actual predecessor of the Wandering Jew is recorded in the "Flores Historiarum" by Roger of Wendover in the year 1228. An Armenian archbishop, then visiting England, was asked by the monks of St. Albans about the celebrated Joseph of Arimathea, who had spoken to Jesus, and was still alive. The archbishop answered that he had himself seen him in Armenia, and that his name was Cartaphilus; on passing Jesus carrying the cross he had said: "Go on quicker," Jesus thereupon answering: "I go; but thou shalt wait till I come." Matthew Paris included this passage from Roger of Wendover in his own history; and other Armenians appeared in 1252 at the Abbey of St. Albans, repeating the same story, which was regarded there as a great proof of the Christian religion (Matthew Paris, "Chron. Majora," ed. Luard, London, 1880, v. 340-341). The same archbishop is said to have appeared at Tournai in 1243, telling the same story, which is given in the "Chronicles of Phillip Mouskes," ii. 491, Brussels, 1839. According to Guido Bonatti, the astrologer known to Dante, this living witness of the crucifixion was known as Johannes Buttadæus because of his having struck Jesus. Under this name he appears at Mugello in 1413 and in Florence in 1415 (S. Morpurgo, "L'Ebreo Errante in Italia," Florence, 1891).

It is difficult, however, to connect this Cartaphilus, Buttadæus, or Buttadeo with the later Ahasuerus of the pamphlet of 1602, no trace being found either in popular legend or in literature during the intervening two centuries. Graetz supposes that the somewhat different picture given of the Wandering Jew in a book called "The Turkish Spy" (1644), in which work the Wandering Jew is called "Sieur Paule Marrana," and is said to have passed through the tortures of the Inquisition in Spain, Portugal, and Rome, was derived from a Marano author (see, however, Boswell's "Life of Johnson," under date April 10, 1783, and Malone's note). Muncure D. Conway attempts to connect the legend with others of immortal beings, as those of King Arthur, Frederick Barbarossa, and Thomas the Rhymer, not to speak of Rip Van Winkle. These again he connects with immortals visiting the earth; as Yima in Parsism, and the "ancient of days" in the books of Daniel and Enoch. Yima and Enoch, as well as Elijah, are also credited with immortality; but there is no evidence of any connection of these names with the legend of the Wandering Jew which, as stated above, was put into currency in 1602 in Germany, by some one who was acquainted with the earlier form of the story known only in literary sources from Matthew Paris.

## J.

**WANDSBECK:** Town in Sleswick-Holstein, near Hamburg. About the year 1600 Count Breido Rantzau, owner of the estate of Wandsbeck, allowed Jews to settle there in consideration of a small yearly payment for protection. Many Jews availed themselves of this permission, attracted by the town's proximity to Hamburg, where Jews were not allowed to settle at that time. According to a document of Nov. 10, 1637, Berend of Hagen, called Geist, feudal tenant of the Danish crown estate of Wandsbeck, ceded to the Jews a plot for a cemetery and permitted them "to perform their prayers and other rituals according to their customs."

In 1674 the community of Wandsbeck formed together with those of Altona and Hamburg the "union of the three communities," acknowledging as its spiritual head the chief rabbi of Altona, the first being R. Hillel ben Naphtali. The three communities continued united until 1811 (see ALTONA; HAMBURG). Wandsbeck had to pay one-eighth of the chief rabbi's salary, Altona paying five-eighths, and Hamburg one-fourth. In 1688 the Jews of Wandsbeck obtained the right to receive into their congregation Jews living elsewhere, a payment being exacted for their protection. They made use of this privilege by forming a branch community in Hamburg, which soon became larger than the original community at Wandsbeck. Since 1710, when Gernau Jews received unrestricted permission to settle in Hamburg, the community of Wandsbeck has diminished rapidly. Its relations with the communities of Altona and Hamburg were not always

the best. In 1773 the Wandsbeck community was put under ban for having evaded payment of its share of the communal expenses for the support of the poor. Rabbi Jacob Emden was called upon to settle this dispute.

For a list of the rabbis who officiated during the union of the three communities, from R. Solomon Mivels Neumark (d. 1706) to R. Zebi Hirsch Zamosz (d. 1807), see ALTONA. After the dissolution of the union in 1811, Wandsbeck remained under the rabbinat of Altona until the community in 1864 engaged Dr. Hanover (d. 1901) as its minister; he was succeeded by S. Bamberger, the present incumbent.

An official list of the members of the Wandsbeck community compiled in 1734 contains the names of 123 families (exclusive of unmarried members and widows). At present (1905) there are about sixty Jewish families in the town.

A. FR.

**WANDSWORTH, LORD SIDNEY**

**STERN:** English banker and peer; born in London 1845; son of Viscount de Stern, senior partner of the firm of Stern Brothers. He was educated at Magdalene College, Cambridge, and was for some time a member of the firm established by his father. He has, however, retired from business, and is now (1905) a justice of the peace for Surrey and Londou, an honorary colonel of the Fourth Volunteer Battalion of the East-Surrey Regiment, and vice-president of the London and Counties Radical Union. After several attempts to enter Parliament (Mid-Surrey, 1880, 1884; Tiverton, 1885; and Ipswich, 1886) he was elected in May, 1891, by the Stowmarket division of Suffolk, which he represented until his elevation to the peerage (July 19, 1895). He is also a Portuguese viscount by hereditary right.

**BIBLIOGRAPHY:** *Jew. Chron.* Aug. 5, 1892; *Jewish Year Book*, 5665.

J.

G. L.

**WANEFRIEDEN, ELIAKIM GETSCH-**

**LIK:** Dayyan and preacher in Amsterdam about the end of the eighteenth century. He published a pamphlet entitled "Megillat Sefer" (Amsterdam, 1790), containing some homilies, besides a eulogy of R. Saul Löwenstamm, chief rabbi of Amsterdam. His family name points to Wannfried in Hesse as his birthplace, but he is not identical with the Eliakim Getschlik Wanefrieden who was rabbi in Kanitz, Moravia, about 1760 ("Die Deborah," 1902, pp. 70-71). The latter was probably the father of Jeremiah ben Eliakim Getschlik Wanefrieden, rabbi in Rausnitz, Moravia, and one of those who defended Jonathan Eybeschütz against the charge of heresy ("Luhot 'Edut," p. 29a, Altona, 1755).

**BIBLIOGRAPHY:** Fürst, *Bibl. Jud.* iii. 493.

**WAR.—Biblical Data:** The earliest war recorded in the Old Testament is that of the Elamitic king Chedorlaomer and his allies against the five kings of Sodom and its adjacent cities (Gen. xiv. 1

*et seq.*). The result of the conflict was the destruction of the vanquished army in the field and the captivity of all the non-combatants, whose possessions became spoils of war. In the battle the troops were arranged in order (Gen. xiv. 8, R. V.), and the King of Sodom and his four allies displayed a certain degree of strategy by fighting in a valley, although their plan proved unsuccessful. Some modern scholars infer from the obscure passage II Sam. xi. 1 that wars were regularly begun in the spring.

In many instances negotiations were carried on through messengers or ambassadors to avert bloodshed (Judges xi. 12-28; I Sam. xi. 1-10; I Kings xx. 2-11); and the Hebrews were expressly forbidden to make an attack without first demanding the surrender of the enemy (Deut. xx. 10 *et seq.*). The only instance in which war was declared without previous negotiations was that of the war between Amaziah, King of Judah, and Jehoash, King of Israel (II Kings xiv. 8).

In addition to the various modes of DIVINATION employed by all the nations before setting out for war (comp. Ezek. xxi. 26 *et seq.*), the Israelites consulted YHWH, who was not only their divinity, but also the war-god par excellence (comp. Ex. xv. 3, and the frequent phrase יהוה צבאות), deciding whether they should begin the war and whether they would be successful (Judges i. 1; xx. 18, 23). In these passages the manner of consultation is not indicated, but from other sections and from the Septuagint it may be inferred that the priest put on the ephod and stood before the Ark to consult the Urim and Thummim (Judges xx. 27-28; I Sam. xiv. 18, xxviii. 6, xxx. 7). Occasionally the divinities were consulted through dreams or prophets, or even through familiar spirits evoked by a witch (Judges vii. 13; I Sam. xxviii. 6 *et seq.*; I Kings xxii. 15). Troops were generally summoned by the blowing of a trumpet or the war-horn, which was likewise the signal that warned the people of an enemy's approach (Judges iii. 27; II Sam. xx. 1; comp. Ezek. xxxiii. 2-11), although sometimes banners were placed on the tops of high mountains or messengers were sent through the different tribes of Israel (Judges vii. 24; I Sam. xi. 7; Isa. xiii. 2). Occasionally extraordinary means were used to arouse a popular feeling of indignation which would ultimately impel the nation to make war, as in the case of the Levite who cut the body of his concubine into twelve parts and sent them to the other tribes of Israel, thus kindling between them and the Benjamites the war which resulted in the destruction of the latter tribe (Judges xix. 29 *et seq.*; comp. also I Sam. xi. 7).

The army of the Israelites was always accompanied to the field by a priest, Phinehas having this post in the battle with the Midianites

**The War-Priest.** (Num. xxxi. 6). It was the duty of the priest to care for the spiritual welfare of the soldiers and, before the attack, to encourage them and to inspire martial enthusiasm in them (Deut. xx. 2-4). Sometimes, however, the high priest himself went upon the field, where he attended the Ark, which was carried into action quite as idols and images were borne into battle by the Philistines (I Sam. iv. 3-4; II Sam. v.

21, xi. 11). Like other Semites, the Israelites began a war with burnt offerings and fasting (Judges vi. 20, 26; xx. 26; I Sam. vii. 9, xiii. 10), this explaining the frequency of the phrase "to sanctify war," and the epithet "sanctified" as applied to warriors (Micah iii. 5; Isa. xiii. 3; Jer. vi. 4, xxii. 7). A single instance is recorded, though in obscure terms, of a human sacrifice as a burnt offering in a time of extreme danger (II Kings iii. 27). According to a passage of D, furthermore, the officers of the Hebrew troops were required to proclaim before a battle that whosoever had betrothed a wife and had not taken her, or had built a house and had not dedicated it, or had planted a vineyard and had not eaten of it, or was fearful and faint-hearted, should return home (Deut. xx. 5-9). This regulation was actually carried out under the Maccabees (I Macc. iii. 56), which shows that the document is of a post-exilic date.

From the geographical condition of Palestine, the raid was the favorite mode of warfare both among the Hebrews and among the other Semites (Gen. xlix. 19; I Sam. xiii. 17, xxvii. 8; II Sam. iii. 22; II Kings xiii. 20), although in the

**Raids.** course of time regular battles were fought, and in certain cases tactics of modern warfare were employed. The first instance recorded was in the battle of Gibeah between the tribes of Israel and the Benjamites (Judges xx. 30 *et seq.*). After laying an ambush behind the city, the Israelites pretended to flee from the Benjamites, thus enticing the latter from their fortified positions. Suddenly the Israelites wheeled, and the Benjamites found themselves outflanked on all sides. It is also probable that in the battle of Gilboa between the Philistines and the army of Saul, the Philistines resorted to strategy by striking northward at the plain of Esdraelon instead of attacking the Israelites by the shorter route from the southwest. By this device, which proved completely successful, the Philistines lured Saul's army from the valleys, where a stout defense could be offered, to the open plain, where the Israelites might be overwhelmed by sheer force of numbers (I Sam. xxviii. 1-xxxi. 7). A strong army was sometimes divided so that the enemy might be attacked from different directions (Gen. xiv. 15; II Sam. xviii. 2), and ambushes were often used with success (Josh. xiii. 10-28; Judges xx. 30-44; II Kings vi. 8-9). Night marches were particularly in favor with the Hebrews; thus Joshua marched at night, Gideon assailed the Midianites about midnight, and Saul attacked the Ammonites before dawn (Josh. x. 9; Judges vii. 19; I Sam. xi. 11). It may be noted that night marches were made by other Semites as well, for Nebo was captured from the Israelites by Mesha, King of Moab, after such a march (Moabite Inscription, line 15). An instance is likewise recorded in which the Philistines chose a champion who challenged one of the opposing army to a duel to decide the fate of both forces (I Sam. xvii. 4 *et seq.*). Such proceedings were afterward much in vogue among the Arabs in their pre-Islamic tribal conflicts.

Fortresses played an important part in war, especially in defense. In early times the Israelites were unable to reduce the fortified cities of the inhabitants of the land, and consequently had no means

of defense except to hide themselves in caves or mountains (Judges vi. 2; I Sam. xiii. 6; comp. Isa. ii. 21); but in the regal period they

**Fortresses.** became so proficient in the art of warfare that they not only reduced the fortresses of the enemy, beginning with Jerusalem (II Sam. v. 7 *et seq.*), but also built many fortified cities. The chief method of reducing one of these towns seems to have been to throw up around the walls a bank, from which the archers might shoot their arrows into the place; while an instance is recorded from an earlier period in which the gates of a city were set on fire (Judges ix. 48 *et seq.*). According to a marginal note on I Kings xx. 12, R. V., the Syrians used engines in their effort to reduce Samaria, while similar machines were frequently employed in addition to the battering-ram for breaching walls in the time of Ezekiel (Ezek. iv. 2, xxvi. 8-9). The strength of the walls and the efficiency of the beleaguering army naturally conditioned the length of a siege. Thus Jericho, which fell in consequence of a miracle, was taken after a continuous onslaught of seven days (Josh. vi. 3 *et seq.*), but the Syrian sieges in Samaria were doubtless lengthy since they entailed terrible famines, and Jerusalem was captured by the Babylonians only after a siege of two years, despite the systematic operations of Nebuchadnezzar (II Kings xxv. 1-4). In their sieges the Hebrews were forbidden to fell fruit-trees for use in building bulwarks against the fortified city (Deut. xx. 19-20).

The accounts of wars in the patriarchal period show that the conquered peoples were reduced to captivity and their property was taken as spoils of war. In the case of the Shechemites, all the males were massacred by the sons of Jacob, while the women and children and all their possessions were carried off as booty (Gen. xxxiv. 25-29). Later, according to a document belonging to D (Deut. xx. 10-17), the Hebrews were commanded to make a wide distinction between the inhabitants of the land whom they were to replace and the Gentiles outside the land. Mildness was to be shown the latter in case they surrendered without fighting and submitted to pay tribute. If they were subdued by force of arms, however, every man was to be slain, while the women, children, cattle, and

**Treatment of Captives.** all else should belong to the victors. Far different was to be the treatment of the inhabitants of the land, who were to be slaughtered without exception, not even the cattle being left alive. If this passage is of early date, it is evident that the command with regard to the inhabitants of the land was only partially executed, since, excepting the thirty-one kings enumerated in Josh. xii. 9-24, the greater part remained unconquered, and the Israelites were obliged to live with the very Gentiles whom they had been bidden to exterminate (comp. Josh. xviii. 2-3; Judges i. 21-35). Even when the Israelites proved victorious, they often granted the inhabitants their lives, and subjected them only to tribute (Judges i. 28, 30, 33, 35). At a later period, however, gross cruelty was practised both by the Hebrews and by the other nations. After having defeated the Moabites, David cast them down to the

ground and measured them with a line, putting to death two lines and keeping one alive (II Sam. viii. 2), while he put the Ammonites under saws, harrows, and axes of iron and made them pass through the brick-kiln (*ib.* xii. 31). Menahem, King of Israel, the Syrians, and the Ammonites are charged with the massacre of pregnant women (II Kings viii. 12, xv. 16; Amos i. 13); and Amaziah is described as causing ten thousand Edomite captives to be hurled from a cliff (II Chron. xxv. 12), while in some instances children were dashed against rocks (Ps. cxxxvii. 9).

There are instances of treaties of peace in which conditions were imposed by the victors on their defeated foes. The first treaty recorded is that which Nahash, King of Ammon, proposed to the people of Jabesh-gilead, and which was marked **Conditions of Peace.** by the savagery of the Ammonite king, the terms being that the right eye of every inhabitant of the city should be put out (I Sam. xi. 2). A treaty which might almost have been made in modern times, on the other hand, was drawn up between Ben-hadad and Ahab; by it the cities previously captured from Israel were to be restored, while Ahab had the right of making streets in Damascus, the same conditions having been previously imposed on the father of Ahab by Ben-hadad's father (I Kings xx. 34). Sennacherib, in the treaty with Hezekiah by which he withdrew his army from Judah, exacted a heavy indemnity from the Jewish king (II Kings xviii. 14). The victors generally returned home in triumphal processions and celebrated their victories with songs and festivals (Judges v. 1 *et seq.*, xi. 34, xvi. 23; comp. Prism Inscription, col. 1, line 53, in Schrader, "K. B.," ii. 141 *et seq.*).

The wars in the earlier period were religious in character and thus had the sanction of the Prophets. Deborah herself urged Barak to make war on Sisera and accompanied him into the field (Judges iv. 6 *et seq.*), while Elisha exhorted Joash, King of Israel, to prosecute the war with Syria and advised the allied

kings to avail themselves of stratagem **Attitude of the Prophets.** against the Moabitish army (II Kings iv. 16 *et seq.*, xiii. 14-19), and an anonymous prophet encouraged Ahab to

battle with Ben-hadad (I Kings xx. 13-14). Naturally the Prophets were opposed to war among the tribes of Israel, and when Rehoboam wished to resort to arms to recover his lost sovereignty over the ten tribes, he was prevented by the prophet Shemaiah (*ib.* xii. 21-24). In later times the Prophets considered war from a political point of view, and Jeremiah, seeing that hostilities against the Babylonians would be to the detriment of the Israelites, always advised the latter to submit to the stronger people and live in peace with them (Jer. xxvii. 12 *et passim*). War in general was represented by the Later Prophets only in its horrible aspect, and many of them, particularly Isaiah, longed for the time when there would be no more war, and when weapons should be transformed into agricultural implements (Isa. ii. 4; Micah iv. 3; and elsewhere). See **ARMY**; **FORTRESS**.

—**In Rabbinical Literature:** The Rabbis laid special stress on the distinction between obligatory

war ("milhemet migwah," or "milhemet hobah") and voluntary war ("milhemet ha-reshut"). The former category comprised the campaigns against the seven nations who inhabited the land, the battles against Amalek, and the repulse of an enemy attacking an Israelitish city; while the latter class denoted any war waged for the extension of Jewish territory. Obligatory war had the priority, nor was it necessary for the king to ask the permission of the Sanhedrin to levy troops, since he could compel the people to take the field. Voluntary war, on the other hand, could be declared only by the Great Sanhedrin of seventy-one members. Although certain persons were permitted by Deut. xx. 5 *et seq.* to leave the field before a battle began, this was allowed, according to rabbinical opinion, only in case of a voluntary war. No such leave of withdrawal was granted in an obligatory war, but, on the contrary, even a bridegroom and bride were obliged to leave their nuptial chamber and join the army (Soṭah 44b; Sanh. 2a, 20b; Maimonides, "Yad," Melakim, v. 1-2). The Rabbis differed greatly regarding the terms of peace to be offered the inhabitants of a beleaguered city (Deut. xx. 10 *et seq.*). According to Sifre, Deut. 199, which was followed by Rashi (on Deut. *l.c.*), peace might be proposed only in a voluntary war, while in an obligatory war no terms should be allowed. It would appear, however, from Lev. R. xvii. 6 and Deut. R. v. 13 that peace might be offered even in an obligatory war, and this was established as a law by Maimonides (*l.c.* vi. 1; comp. Nahmanides on Deut. *l.c.*). According to both Maimonides and Nahmanides, the command of extermination which was imposed regarding the seven nations (Deut. xx. 16-17) was applied only in case the beleaguered people refused to surrender. The submission in consideration of which the conquered were granted their lives had to be complete, since they were required to accept the seven commandments of the Noachidæ, and were obliged to pay tribute and to recognize their condition of servitude (Maimonides, *l.c.*).

In direct opposition to the obvious interpretation of Deut. xx. 5-9, the Rabbis declared that all the proclamations contained in that passage were made by the priest anointed as the chaplain of the army ("meshuah milhamah"), and the verses were interpreted as meaning that the priest made the proclamations and the officers repeated them to the troops, who could not hear the priest (Soṭah 43a; Maimonides, *l.c.* vii. 1, 4; comp. Sifre, Deut. 193). A Jewish army was forbidden to begin the siege of a Gentile city less than three days before the Sabbath, but it might continue its operations on that day even in a voluntary war. The army was permitted to encamp in any place, and the slain soldiers were to be buried in the place where they had fallen, since the combat had made it their own.

The Jewish soldiers enjoyed four privileges: they might take wood anywhere without incurring the charge of robbery; they were permitted to eat fruit even though it was not certain that it had been properly tithed ("demai"); and they were exempt from washing their hands and from "erubehazerot" (Shab. 19a; 'Er. 17a; Tosef., 'Er. iv. [iii.] 7; see also 'ERUB). In besieging a Gentile city, the troops

were commanded to invest it on three sides and to leave one side free so that any one who wished might escape from the town (Maimonides, *l.c.* vi. 7). During the seven years consumed by Joshua's conquest of Palestine the Israelitish soldiers were allowed to eat any food which they found in the houses of the Gentiles, even though such provisions were forbidden under all other circumstances (Hul. 17a; Maimonides, *l.c.* viii. 1).

M. SEL.

**WARBURG:** Family whose members are widely spread throughout Germany, Denmark, Sweden, England, and America. There is a tradition that the family was originally settled at Bologna, but emigrated to the Westphalian town of Warburg, whence it removed to Altona, near Hamburg.

The earliest known bearer of the name is **Levi Joseph Warburg**, whose son **Jacob Samuel** died in 1667 at Altona. From him are descended two branches, one through **Samuel Moses Warburg** (died 1759), known also as "Frankfurter," and the other through **Samuel Reuben Warburg** (died 1756), whose grandson **R. D. Warburg** (1778-1847) founded the firm of Warburg in Hamburg. Samuel Moses Warburg had four sons: from the eldest, **Moses** (died 1752), are descended the present branch at Altona and the Copenhagen family of **Delbanco**, which adopted that surname. The second, **Gumprecht** (died 1801), was the father of **Moses Marcus Warburg** (died 1830), who founded the firm of Moses Marcus Warburg & Co., of Hamburg. The third, **Elia Samuel Warburg**, said to have been a teacher of mathematics in Altona, took part in the Emden-Eyesheschütz quarrel. He was the founder of two large branches of the Warburg family. **Samuel Elias Warburg** (died 1826) was the ancestor of most of the Hamburg and American Warburgs of to-day. The youngest son of Elia, **Simon Elias Warburg** (1760-1828), settled in Göteborg as a merchant, founding there a branch of his brother Samuel's firm at Hamburg. He was one of the founders of the Göteborg synagogue, and his two sons, **Samuel** (1800-81) and **Michael**, were the first Jews permitted to enter the public service in Sweden. The former married Emma Glückstadt, his cousin, and was a writer on economic subjects, and a member of the Board of National Debt Department from 1867 to 1879. He was decorated with the Order of the North Star in 1860 ("Nordisk Familjebok," xvii.).

The following members of the family have distinguished themselves: **Moritz Gumprecht Warburg**, who settled at Manchester as a merchant, but showed literary taste, and published Shakespeare's sonnets in German; **Carl Simon Warburg**, third son of Samuel Warburg (1835-65); he was the editor of "Svensk Monadskrift," in which Mill's and Darwin's works were first presented to the Swedish public; **Frederick Elias Warburg**, second son of Samuel Warburg (born at Stockholm in 1832; died in London in 1899); as a director of the Electric Traction Company he was one of the founders of the Central London Electric Railway; **Moritz Warburg** (born in 1810 at Altona; died there in 1886), who was educated for the law, and ultimately became "Justizrat" and represented Altona in the

Reichstag; Moritz's second son, **Jacob** (born 1848), who was killed in battle during the Franco-Prussian war; and Moritz's eldest son, **Albert** (born 1843), who has been appointed "Commerzienrat."

Of the London branch, founded by **Mendel Martin Warburg** (born 1789; died 1877), the younger son, **James**, has settled at Manchester, where he is known as a musician. **Moses Delbanco** (born 1784; died 1848) attained the distinguished position of "Cancelliraad" at Copenhagen. **Aby Warburg** (born 1866) is known as an art critic and historian. **Karl Johann Warburg** (born in 1852 at Stockholm) is a historical and biographical writer of importance, has been appointed librarian of the Nobel Institute, and is a member of the Upper House of Sweden. **Otto Warburg** studied at Berlin, where he is now professor of natural history, and is prominent in the Zionist movement. **Emil Warburg** is a professor at Freiburg and Charlottenburg. One of the daughters of **Marcus Warburg** married R. Lassen, and her son was the composer and musical director, **Eduard Lassen**.

**Felix M. Warburg** (born in 1871 at Hamburg) settled in New York, where he joined the firm of Kuhn, Loeb & Co. He is at present (1905) commissioner of education in the city of New York, and is also one of the trustees of the Jewish Theological Seminary of America.

One of the striking features of the family history of the Warburgs is the practically world-wide extent of their wanderings and ultimate distribution, the following places being mentioned in their pedigree:

Altona	Melbourne	Stockholm
Glückstadt	Göteborg	Cassel
Grindel	Copenhagen	South America
Hamburg	Wandsbeck	Havana
London	Philadelphia	Leeds
India	Tokyo	Göttingen
Holstein	Shanghai	Hanau
Berlin	Lüneburg	Paris
Hanover	Manchester	New York
Freiburg		

Equally remarkable is the variety of occupations which the various members of this family have taken up or married into. Among those mentioned may be enumerated:

Saddlemaker	Paper manufacturer	"Commerzienrat"
"Cancelliraad"	Stationer	"Justizrat"
Merchant	Ribbon merchant	Soldier
Banker	Joiner (wholesale)	Photographer
Bookseller	Shoemaker	Company director
Horsehair-dealer	Shawl manufacturer	Doctor
Clock manufacturer	Tobacconist	Librarian
Book censor	Lientenant, R. N.	Editor
Art critic	Musician	Naturalist
Wool dyer		Professor
Author		Composer
Consul		

## J.

**Moritz Warburg**: German jurist; born at Altona June 8, 1810; died there April 15, 1886. He studied at the colleges of Wolfenbüttel and Altona, and at the universities of Heidelberg and Kiel. His studies completed, he settled in Altona, where he practised law for over forty years; in 1879 he was appointed a counselor of justice. Warburg's name is connected with the stirring events of 1848, in which year he was elected to the Sleswick-Holstein

constituent assembly, remaining a member of that body for twenty-two consecutive years.

BIBLIOGRAPHY: *Jew. Chron.* April 23, 1886.

L. R.

**Otto Warburg**: German botanist; born in Hamburg July 20, 1859. From 1879 to 1883 he studied at the universities of Bonn, Berlin, and Strasbourg. Having graduated from the last-named university, he continued his studies at Munich and Tübingen; and from 1885 until 1889 he traveled through southern and eastern Asia. He settled in Berlin and became privat-docent in botany at the university in 1891. In the following year he was appointed teacher of tropical botany and agriculture at the Oriental Seminary, and received the title of professor in 1897. A few years ago Warburg began to interest himself in Jewish agricultural colonization, for which purpose he visited the East in 1900, 1901, and 1903; and he founded the first Jewish settlements in Asia Minor. He worked as an active administrative member of the Esra, an organization for the agricultural movement among the German Jews, and in connection therewith founded in Palestine the Neuhof Agricultural Society.

Warburg is the author of: "Monographie der Myristicaceen," in "Nova Acta Leopoldina," vol. 58 (1897)—the De Candolle prize essay; "Die Muskatnuss, Ihre Geschichte, Botanik, Kultur, Handel-Verwertung" (Leipzig, 1897); "Pandanaceæ," part iii. of "Pflanzenreich" (ib. 1900); "Die Kautschukpflanzen und Ihre Kultur" (Berlin, 1901); "Monsunia, Beiträge zur Kenntniss der Vegetation des Süd- und Ostasiatischen Monsungebietes" (Leipzig, 1901); "Die Kunene-Sambesi Expedition," 1903, published by the Colonial Agricultural Committee in Berlin.

From 1897 to 1903 Warburg was the publisher and editor of "Der Tropenpflanzer," a journal of tropical agriculture and the organ of the Colonial Agricultural Committee. He is besides one of the principal collaborators on the Zionist periodicals "Palästina" and "Altneuland." Warburg is also chairman of the Palestine Commission of the Zionist Congress and a member of the smaller Actions Comité.

S.

**WARNING.** See HATRA'AH.

**WARRANTY OF TITLE:** The Hebrew term for warranty of title is אחריות (= "future"), the same word denoting the force of an attested deed which served as a mortgage on all lands owned by the debtor at the time of its delivery. Whenever lands or slaves were sold by deed, it was customary to insert a clause by which the seller bound himself to reimburse the buyer for any loss arising from a bad or defective title. The custom must have been very ancient; for similar clauses, which were frequently quite elaborate, are found in some of the oldest deeds of conveyance among the Assyrians and Babylonians. Warranty of title was implied, however, in every sale, whether of slaves, land, or chattels (Maimonides, "Yad," Mekirah, xix. 3; Shulhan 'Aruk, Hoshen Mishpat, 225), thus agreeing with the Talmudic saying (B. M. 15b) that an omission of the warranty was regarded as a mere oversight of the draftsman and was supplied by the courts. The parties to the sale were accordingly

required to make a special agreement to exempt the seller from all responsibility, such a document releasing him from every claim against him, even if goods had been sold him which were later claimed by the true owner, who had been deprived of them by robbery. The most dangerous flaw in the title seems to have been an outstanding bond against the seller, or against his grantor or ancestor, thus affording an opportunity to levy for debt on the thing sold.

The warranty secured the buyer not only against the loss of his lands or slaves, but also against the payment of mesne profits (מכירת פירות), which he might otherwise have had to give the true owner for withholding possession; but the covenant of warranty, as far as it covered this uncertain and unliquidated liability, could be levied only on "free property," not on "subjected property" (see DEED). The Mishnah refers incidentally to mesne profits and to their inclusion in a warranty (Git. v. 3), and thus limits the remedy (see TORT). The codes held that the ordinary and the implied warranty of title could be broken and give rise to a suit against the warrantor only in case the buyer was evicted or compelled to pay a bond debt by a Jewish court, although either the decision of a Gentile court or an adverse title appearing on the records kept by the Gentiles was to be deemed an overpowering force. Such a force might, however, have a special protective warranty, just as the seller might warrant against the loss of his field through the action of a neighboring river.

L. N. D.

**WARRENS, ROSA:** Swedish poet and translator; born at Karlskrona Feb. 24, 1821; died at Copenhagen Nov. 8, 1878. At the age of five she went with her parents to Hamburg, where she remained until her father's death in 1861. She then moved to Berlin with her mother, and after the latter's death in the summer of 1878, she settled at Copenhagen. She devoted herself chiefly to Swedish literature and Norse mythology, translating into German the northern folk-songs in the original meters. The fruits of these studies were the following volumes: "Swedische Volkslieder der Vorzeit" (1856); "Dänische Volkslieder" (1858); "Schottische Volkslieder" (1861); "Zwei Lieder der Edden" (1863); "Norwegische Volkslieder," "Isländische Volkslieder," and "Finnische Volkslieder" (1868). A volume of her original poems appeared in 1873.

R. N.

**WARS OF THE LORD, BOOK OF THE**

(ספר מלחמת יהוה): A work mentioned in a single passage of the Old Testament (Num. xxi. 14) in connection with the geographical position of Arnon. The title suggests that the book contained songs celebrating the victories of the Israelites led by YHWH, and it seems, therefore, to have been similar to the Book of JASHER or possibly even identical with it, though there is no evidence to support the latter hypothesis. Modern scholars regard Num. xxi. 17-18, 27 *et seq.* as extracts from the same book (comp. Nahmanides on Num. xxi. 14); and since

some of the facts there mentioned refer to an epoch far subsequent to the Mosaic period, the last citation being supposed by Stade ("Gesch. des Volkes Israel," i. 50) to refer to the time of Omri's dynasty, the date of its composition is variously placed in the ninth century B.C. or in the reigns of David and Solomon (Reuss, "Gesch. der Heiligen Schrift," p. 172). It must be noted, however, that the Septuagint, reading מלחמת יהוה, renders the title of the book Πόλεμος τοῦ Κυρίου, and refers its contents to one particular war of YHWH. The verse which is said to be extracted from the book is extremely obscure, and the words אה והב בסופה in particular are variously but unsatisfactorily interpreted. The Septuagint renders them τῆν Ζωὸν ἐφλόγισε, apparently reading אה והב שרה, which is unintelligible in meaning, though it evidently contains some allusion to DIZABAH. Jerome, following Onkelos, translated אה והב "he did," although it rather means "he gave." Among Jewish commentators only Ibn Ezra and Nahmanides postulated the existence of a "Book of the Wars of YHWH"; according to the former the work had been written before the time of Abraham. They also advanced the theory that Waheb was the name of a place where the Israelites had waged wars against their enemies. The Targumim understood "the book" to denote the "Pentateuch" and interpreted the passage as meaning: "Therefore it is said in the Book, the wars which YHWH," etc., while Rashi and RaSHBaM translated בספר "in the act of narrating." Sayce ("The Academy," Oct. 22, 1892) follows the Targumim in the general translation of the passage, except that he adopts the Septuagint reading אה instead of והב, and he accordingly disposes of the theory that such a book ever existed.

**WARSAW:** Capital of the Russo-Polish government of the same name, and former capital of the kingdom of Poland; situated on the left bank of the Vistula. According to Polish writers, the earliest settlement of Jews in Warsaw dates from the thirteenth century, and their influence at that time is indicated by a number of documents in Hebrew script preserved in the local archives. They at first resided on the Jewish street near the present Dunai street, whence they spread to other quarters of the city, acquiring houses and lands, possessing a cemetery, and owning a synagogue near St. John's Church.

As in other cities, their growing influence awakened commercial and social antagonism among the citizens. The Christian merchants endeavored to rid themselves of their Jewish competitors by insisting on the strict application of the MAGDEBURG Law, and continued their propaganda with varying success until 1525, when Prince Janush of Mazovia issued a decree which forbade the Jews to reside in Warsaw or to pursue mercantile or industrial occupations in the city. This measure was not strictly enforced, however, for two years later Sigismund I. was obliged to issue a similar decree with an additional clause which debarred the Jews from residence even in the suburbs of Warsaw. This decree likewise proved ineffective, since the Jews who were driven from the city itself settled just beyond the walls,

waiting for more favorable legislation which would permit them to return. By this expedient they were still enabled to secure an important portion of the city trade, but in 1570 Sigismund Augustus issued a more drastic decree containing the following provisions:

(1) No Jew, Jewess, Jewish child or servant (be the latter Jewish or Christian) shall dwell with property or wares on any lands, municipal, royal, or clerical, within the limits of Old Warsaw or New Warsaw, nor may he or she remain there even during royal sojourns, excepting only at the time of the Diets, when Jews shall be permitted to visit Warsaw for business purposes. (2) The Jews who have business connections in Warsaw shall be allowed to sojourn there with the written consent of the magistrate; but they shall not have the right to engage in any trade or handicraft which may in any way interfere with the daily pursuits of the citizens. (3) The Jews shall have no right to reside on any grounds, or to trade or ply their handicrafts, within a radius of two miles from Warsaw on either bank of the Vistula, under penalty of confiscation. (4) It shall be the duty of the magistrates and their successors at Warsaw to enforce the removal of the Jews from the city and its environs without regard to any extenuating circumstances or even to letters of exemption from the king or his successors.

The commercial importance of the Jews as agents of the king and higher nobility, as well as the annual sessions of the Diets in Warsaw, rendered it impracticable to execute this ordinance, and the repeated protests and machinations of the Christian guilds were unavailing, at least so far as a large number of Jewish merchants was concerned. Petitions for the exclusion of the Jews from Warsaw and its suburbs were very frequent; and in 1580 King Stephen Bathori issued an edict forbidding the Jews to reside in Warsaw or to lease city taxes or property. Those Jews who were obliged to come to Warsaw on business had to secure a special permit from the city magistrates. It is evident that these laws were enforced under Ladislaus IV., for on July 16, 1646, Marcus Neckel obtained the title of "general Jewish delegate" in Warsaw. In 1648 Ladislaus reaffirmed the earlier restrictive decrees, although he made an exception in favor of Neckel, ordering that "Marcus, the Jewish delegate and royal agent, shall not be molested or ridiculed." The subsequent royal decrees of 1663, 1676, 1737, 1740, 1761, 1763, and 1770 confirmed the provisions of the earlier edicts. It is evident, therefore, that the exclusion of the Jews from Warsaw, like their expulsion from Riga and other cities, was never wholly effective. Deprived of the right of permanent residence, they secured immunity and exemption by purchasing

**Royal Decrees.** the good-will of the city magistrates, while, on the other hand, the Christian merchants frequently paid bribes

to the city magistrates for the exclusion of their Jewish competitors. Thus in 1691, when preparations were being made for the wedding of the crown prince Jacob Sobieski, which was to be attended by many guests, the merchants of Warsaw paid ten silver thalers to the great crown marshal, and gave lemons and oranges to the value of 54 Polish gulden, in order that intercession might be made with the king to withhold protection from the Jews.

In the reign of August III., Crown Marshal Franciszek Bielinski enforced the restrictive measures against the Jews, and during his incumbency they

were permitted to enter Warsaw only during the sessions of the Diet. After his death the old order of things was restored. The great crown marshal Lubomirski issued special certificates at a cost of one silver groschen each, and every Jew wishing to stay in Warsaw was compelled to procure one of them under penalty of imprisonment, although they were good for five days only. The income from these tickets reached the sum of 200,000 Polish gulden annually. Large Jewish colonies were formed in the outskirts of the city on lands owned by members of the Polish nobility. The most noted of these settlements was "New Jerusalem," situated beyond the present Jerusalem gate. Notwithstanding a resolution of the city council which permitted Jews to reside in New Jerusalem, Marshal Lubomirski successively combated the legality of this right of settlement. On Jan. 22, 1775, the marshal's guard invaded New Jerusalem, confiscated the merchandise found there, and demolished all the Jewish houses. The merchandise thus seized, which was valued at hundreds of thousands of gulden, was stored in the

**Destruction of "New Jerusalem," 1775.**

arsenal and was later sold at public auction, the proceeds being returned to the Jews.

In the following year the Jews secured permission to rebuild their houses, but had meanwhile settled in large numbers in the city itself. On May 25, 1784, however, Marshal Mniszek issued an ordinance expelling the Jews from Warsaw and its environs, though it should be noted that the better classes of Polish society condemned the ill treatment of the Warsaw Jews by the Christian merchant and artisan guilds. This is clear from the following paragraph, for example, in the Warsaw periodical "Pamiętnik Historyczno-Polityczny" (1783, p. 5): "What terrible spectacles must we witness in the capital on solemn holidays! Students and even adults in noisy mobs persecute the Jews and sometimes beat them with sticks. We ourselves have seen a gang waylay a Jew, stop his horses, and give him such a cudgeling that he fell from the wagon. How can we look with indifference on such a survival of barbarism?"

An agreement was then made with Peter Tepper, the banker of King Stanislaus Augustus, permitting the Jews to reside in Rasin, Tepper's estate in the suburbs of Warsaw. The agreement was profitable to both. Rasin became a Jewish colony, and drew a large volume of trade from Warsaw. The city magistrates were alarmed at the commercial decline, however, and attempted to discourage the growth of the colony by threats and persuasion. They were finally forced to repeal the restrictive ordinances and gave permission to the Jews to reside in special districts. The new Jewish quarter of Warsaw was located on the square known as Marywil, the present theater-square. Subsequently the Poczaj Palace was erected there and gave its name to the entire district.

The Jews gradually spread to Tlomacka, Klopocka, and Danilowicz streets, while some lived as far as Trinity Church, at the corner of Nalewki and Długa streets. In March, 1790, members of the furriers' and tailors' guilds convened at the council-hall of Stare

Miasto, and in their fear of competition requested the magistrates to expel the Jews from the city. They

demanded that their request be presented to the Diet, threatening, in case of the Gilds. refusal, to take the matter into their own hands. John Deckert, president of the city council, referred the matter to the Diet, and the latter appointed a commission to investigate the grievances of the Christian guilds. The commission was informed that Jewish competition had forced the petitioners to resolve either to destroy themselves or to annihilate their competitors. The Diet acceded to the demand of the Christian craftsmen and ordered the expulsion of all Jewish traders and craftsmen, allowing only those merchants and manufacturers to remain who kept important establishments. As on former occasions, the Jews who had been expelled gradually returned in the course of a few weeks, and the Christian craftsmen, driven to desperation, organized an anti-Jewish riot.

A Christian tailor, Fox, meeting a Jewish tailor on the street, attempted to take from him some clothing which he was carrying. He pursued the Jew, who finally rallied around him some of his co-religionists and had Fox imprisoned, whereupon Fox's workmen raised the cry that the Jews had killed their master. This was the signal for a riot. A mob attacked the Jewish houses and stores, burning and pillaging everything in their way until forced to desist by the troops. The Polish authorities, fearing the outbreak of a revolution like the one which was then raging in Paris, forcibly restored order, arrested Fox and other leaders of the outbreak, enforced the old restrictive regulations against the Jews, and subjected the Jews transgressing these laws to corporal punishment. During the reign of Poniatowski the Jewish question received increased attention among liberal Poles; and at the sessions of the Four Years' Diet some reformers, including Butrymovicz, Czacki, and Kollontai, presented projects for its settlement.

The occupation of Warsaw by the Prussians brought about a beneficial change in the position of the Jews. The Prussian government,

**Under** not recognizing the old city charters, **Prussian** allowed them to live in Warsaw, permitted them to organize a kahal for the regulation of local Jewish affairs, **Rule.** abolished rabbinical tribunals, and prohibited rabbinical anathemas under penalty of fifty thalers' fine and banishment for rabbis guilty of repeating this offense. The new administration led to an influx of Jews to Warsaw, thus giving rise to renewed complaints from the Christian merchants. A census of the Jewish population, ordered by the Prussian authorities in 1793, was largely evaded by the Jews, and the census returns of 6,997 were evidently much below the actual figures.

When the Russians invaded Poland in 1794 the Jews did their share in defending their Polish fatherland. Joselovich BEREK formed a light horse regiment of 500 Jews of Warsaw, which was almost annihilated during the siege of Praga (a suburb of Warsaw) by Suvarov.

Among the wealthy Jewish merchants of Warsaw at the end of the eighteenth century may be men-

tioned Hershka and Itzik, David and Nutka of Karolevetz, Hershko Markevich, Iosek and Hershko Salamonovich of Posen, Ivosan and Hayyim of Lutsk, Naftal of Sokhachov, Shmul Scheidazh and Abraham of Cracow, Josef Jankel and Schmul of Piotrkow. One of the most prominent Jews of the time was Samuel Zbitkover, who was also called Schmul Jacobovich. His name figures largely in official documents and in the correspondence of King Stanislaus Augustus, whose favorite he was; and a quarter of the suburb Praga was even called Schmulevizna in his honor. During the first partition of Poland he was the chief contractor in the Russian army, and traveled with an honorary convoy of Cossacks by permission of General Romanus.

Zbitkover was evidently a very influential man, and Stanislaus Augustus, **Samuel Zbitkover.** in a memoir which he presented to Catherine II., mentions 7,000 ducats which the Russian army owed the contractor. The king also presented him with some lots in the suburb of Praga for a Jewish cemetery and synagogue. After the second partition of Poland, Zbitkover still continued to be the contractor of the Russian army, but after the Polish uprising under Kosciusko in April, 1794, the Polish party ("Rada Zastepeza") confiscated his money, which amounted to 757 ducats, and his leather factory. On Nov. 4, 1794, during the siege of Praga, Zbitkover, in his sympathy for the many victims of the war, issued a notice that any soldier or citizen who should bring him an inhabitant of Praga, whether Jew or Christian, would receive a ducat in gold, and whoever should bring him a dead citizen of Praga for burial, would be paid a ruble in silver. Two barrels, one filled with gold and the other with silver, stood before him, and both were emptied in a day. He died Sept. 3, 1800.

In 1797 an order was issued directing all the Jews of Warsaw to adopt family names selected by themselves or assigned them by local officials, and this ordinance accounts for the frequency of German names among the Polish Jews.

**Family Names Adopted, 1797.** The increase of the Jewish population led the Prussian authorities to check the influx of Jews into Warsaw, and in March, 1798, a certain portion of the Jewish population was expelled from the city, and the remainder had to submit to increased taxation. All Jews who should arrive in Warsaw after that date were to pay a poll-tax of one gulden daily, while the "Nahrungssteuer," or tax collected from the permanent Jewish population, amounted to 210,000 Polish gulden annually. In addition to this, the Jews were obliged to pay a "Toleranzsteuer" amounting to 50 per cent of the total tax collected from the city population. Two years later the tax on kasher meat was again levied by the government, and in March, 1809, this tax, which formerly amounted to two groschen per pound, was raised to six groschen. The burdensome taxes did not, however, check the increase of the Jewish population. In May, 1804, another anti-Jewish riot broke out in Senatorski street, but was quelled by troops.

In 1826 a rabbinical school was established in

Warsaw under the direction of Anton Eisenbaum, some of the chief teachers being Aaron Moses Cylkow, father of the Judæo-Polish preacher of Warsaw, Jacob Cylkow (who translated the Psalms into Polish; Warsaw, 1883), A. Buchner (author of "Der Talmud und Seine Wichtigkeit"), and Isaac Kramsztyk. Eisenbaum, who was born at Warsaw in 1791 and died there in 1852, was educated under

mann, "Mo'ade 'Ereb," p. 84, Wilna, 1863; see also "Allgemeine Zeitung des Judenthums," 1851, No. 43).

The Reform movement of the early forties affected the Jewish community of Warsaw. Abraham Meyer Goldschmidt was its first German preacher (1842); and Mathias Rosen of the Jewish school board did much for the education of

EXTERIOR OF THE GREAT SYNAGOGUE AT WARSAW, RUSSIA.

(From a photograph.)

the supervision of his father, who instructed him in the Bible and Hebrew grammar in addition to his Talmudic studies. In the latter part

**The Rabbinical Yiddish and Polish with the title "Der School.** Beobachter an der Weichsel" (Polish title, "Dostrzegacz Nadwisiński").

A copy—the only one in existence—of this, the first Judæo-Polish periodical, is preserved in the library of the great synagogue of Warsaw. The school, however, did not produce many rabbis, since its real object was to impart secular knowledge rather than rabbinical learning, and it gradually became a Jewish high school ("Keneset Yisrael," i. 138; Reif-

the younger Jewish generation of Warsaw. When Count Uvarov, the Russian minister of public instruction, visited the rabbinical school of Warsaw in 1843, he was pleased with the results of the education of the Jews of the city; in that year the number of pupils was 221, as compared with 14 at the opening of the school in 1836. In 1861 the Warsaw rabbis Dob Berush MEISELS and Marcus JASTROW, suspected by the Russian government of sympathy with the Polish uprising, were expelled from the city, although Meisels was permitted to return in the following year. In 1861 Jewish artisans were admitted into the guilds of working men; and a Jewish weekly in the Polish language, entitled

"Jutrzenka" (Dawn), was founded by Daniel Neufeld. In 1878 Rabbi Jacob GESUNDHEIT, author of the "Tif'eret Ya'aqob," died; and a new Jewish hospital was established by M. Bersohn, A. Kraushar, and others, and the great (reformed) synagogue was opened on Tlomacka street. In the following year a Hebrew technical school was established by L. Nathansohn, Lesser Levi, II. Reichmann, and others, and in 1881 a library, still in charge of Ignacy BERNSTEIN, was organized in connection with the great synagogue. In 1882 Jews were permitted to live in the streets which were formerly forbidden to them, and in 1889 a Jewish trade-school was founded by Ludwig Nathanson and others. In 1890 some foreign Jews were expelled from Warsaw.

In 1862 the Jews were accorded equal rights with the Christian inhabitants of Poland, largely owing to the efforts of Marquis Vyelepoliski, and the taxes on meat, baskets, and candles were then discontinued in 1862. Warsaw. The kahal was abolished in 1881, and in its place a committee was appointed to control Jewish religious affairs.

Serious anti-Jewish riots, instigated by the agents of Ignatiev, broke out in Warsaw on Dec. 25, 1881, and lasted for three days, during which time much property was destroyed, and twenty-four Christians and twenty-two Jews were injured. The sympathies of the soldiers sent to check the disorder were evidently with the rioters, for some of those arrested were allowed to escape, as was the case in other riots of the early eighties. A spirited protest against the indifference of the local administration was made by the Jews of Warsaw, including Matthias Bersohn, Ivan Bloch, Stanislas Brun, Meczislav Epstein, Alexander Goldstand, Stanislas Kronenberg, Michael Landau, Stanislas Lesser, Ludwig Nathanson, and Julius Wienyavski.

The growth and proportion of the Jewish population of Warsaw since 1882 are shown by the following table:

	Jewish Population.	Total Population.
1876.....	98,698	307,451
1882.....	127,917	382,464
1886.....	136,234	406,965
1890.....	153,154	455,852
1897.....	231,678	638,208
1901.....	254,712	711,988
	Jewish Births.	Total Births.
1882.....	3,899	14,991
1901.....	4,744	15,416

H. R. J. G. L.

Following are lists of rabbis, dayyanim, and scholars of Warsaw and of its suburb Praga:

**Rabbis and Dayyanim:** Dob Berash ben Reuben (d. Feb. 27, 1819), rabbi of Praga; Shuḥah ben Alexander Süsskind (d. Oct. 3, 1822), dayyan; Solomon ben Judah Löb (d. Feb. 24, 1832), dayyan, and author of "Shebile Torah" (Warsaw [?], 1804); Abraham Abele (d. April 14, 1832), dayyan for forty years; Aryeh Löb b. Moses Zunn (d. April 22, 1833), dayyan, and author of "Ya'alat Hen" (Praga, 1793) and "Ge'et Mekushshar" (War-

saw, 1811); Mordecai b. Phinehas (d. May 7, 1837), rabbi of Praga; Solomon Zalman b. Isaac of Posen (d. March 26, 1839), first district rabbi of Warsaw and vicinity, and author of "Hemdath Shelomoh" (Warsaw, 1836); David Jedidiah b. Israel (d. April 14, 1842), dayyan for forty years; Ḥayyim Davidsohn b. David Tebele (d. March 17, 1854), rabbi for fifteen years (elegy by Benjamin David Rabinowicz in "Ruah Ḥayyim," Warsaw, 1854); Mordecai b. Nehemiah (d. July 1, 1855), dayyan, and author of "Mor Deror," a commentary on the Haggadah; Samuel h. Dob Bersohn (d. Feb. 27, 1856), dayyan for eighteen years; Meir b. Eliezer (d. March 16, 1863), rabbi of Praga for thirty years; Israel Muschat (d. Feb. 28, 1868), rabbi of Praga for twenty-eight years, and author of "Hare Besamim," a commentary on the prayers, and "Rashe Besamim," a commentary on the Bible and on the Talmudic Haggadah; Judah Aryeh Löhush, known as "the Holy" (d. Sept. 1, 1868), dayyan for thirty-three years; Dob Berush Meisels (d. Feb. 16, 1870), rabbi for fourteen years; Judah Heschel b. Gabriel Goldstadt (d. May 4, 1872), dayyan; Nathan b. Dob of Sienjatitz (d. July 22, 1873), dayyan for forty-three years; Solomon Hillel (d. May 25, 1874), dayyan, and author of "Aferet Shelomoh," on Eben ha-Ezer and Maseket Kiddushin; Jacob h. Isaac Gesundheit (h. 1814; d. 1878), rabbi, and author of "Tif'eret Ya'aqob," on Hoshen Mishpat (Warsaw, 1842); Samuel S. Kieppisch (h. 1820; d. 1901), chief dayyan for forty years ("Ha-Zefirah," 1902, Nos. 225-227).

The list of rabbis of the modernized congregation, known as the "German" or "Choir" congregation, is as follows: Abraham Meir Goldschmidt (b. 1812; d. Feb. 8, 1889), officiated until 1858, when he replaced A. Jelinek at Leipsic; Isaac Kramsztyk (h. 1814; d. Sept. 25, 1889); J. Cytkow, Polish translator of the Psalms, with notes (Warsaw, 1883); and Samuel Poznanski.

**Scholars:** Joseph b. Israel Löb (d. Aug. 25, 1794); Joseph Samuel h. Abigdor (d. in Praga Oct. 14, 1800), parnas of the Council of Four Lands; Benjamin Zeeb Wolf Cohen (d. April 23, 1808; first recorded burial in the Jewish cemetery in Warsaw, which was opened in 1807); Moses Solomon Zalman (d. Jan. 7, 1816), formerly rabbi of Cracow, and gabbai of the Holy Land Ḥalukkah Fund; Baer Berksohn (d. March 12, 1831), left a legacy, the interest on which is to be distributed among the poor on his JAHRZEIT; Abraham Jacob Stern (d. Feb. 3, 1842), astronomer and mathematician, father-in-law of Ḥayyim Selig Slonimski; Jacob Moses h. Solomon Zalman Jerislawer (d. March 19, 1842), publisher of the works of R. Löw of Prague; Solomon ben Judah Blumberg (d. Oct. 2, 1850), parnas and philanthropist (left fund for a synagogue); Anton Eisenbaum (b. 1791; d. 1852), editor and publisher (1823-24) of "Der Beobachter an der Weichsel," the first Yiddish newspaper in Poland; Abraham Buchner, instructor in the Rabinerschule, and author of "Dorsh Tob" (Warsaw, 1830) and "Der Talmud" (2 vols., ib. 1848); Isaac Löb Peretz (born at Samoscz, May, 1851), the poet; Eleazar Thalgrün (d. April 2, 1857), German translator of the Psalms, with bi'ur "Tokaḥat Musar" (Warsaw, 1854); Ḥayyim Gershon h. Hillel Cohen Halle (d. Oct. 1, 1857), communal worker, and founder of the synagogue at the Iron Gate; Jacob David Schapiro (d. Aug. 5, 1863), formerly rabbi of Wiszagrod, and author of annotations on "Torat Kohanim"; Samuel b. Abraham Fliederbaum (d. April 6, 1867), gabbai of the burial society; Hillel Gleitstein (d. 1867), editor of the "Warschauer Jüdische Zeitung"; Zusze h. Wolf Ulrich (d. April 23, 1868), founder and leader of a synagogue; Solomon Baer (d. Dec. 1, 1868), formerly rabbi of Naszelsk, and author of "Dihre Shelomoh," Talmudic novellæ; Moses h. Eliezer Lippman Feinkind (d. May 17, 1869), gabbai of the Jewish hospital; Moses b. Enoch Zundel Endelman (b. 1808; d. Dec. 16, 1869), communal worker and gabbai; Jacob Tugendhold (b. 1791; d. April 20, 1871), author, translator, and censor of Hebrew books (see "Maggid Mishneh," i. 59); Joshua b. Solomon Löb of Ostrowa (d. April 25, 1873), author of "Toledot Adam"; Menahem Mendel b. Zeeb (d. May 13, 1873), rosh yeshibah; Bunem Wolf Zeeb Mendelsohn (d. Nov. 28, 1875), rosh yeshibah, and author of "Terumat Zabab"; Menahem Mendel Oettinger (d. July 6, 1878), bequeathed 10,000 rubles to the Jewish community; Jacob Joseph b. Mattithiah Ḥayyim (d. Aug. 3, 1878), publisher of Hebrew books, and author of "Sefer ha-Mizwot"; Simḥah b. Mordecai Posner (d. Oct. 17, 1878), author of "Ha-Zofeh be-Erez Nod" ("The Wandering Jew"); Judah h. Zimel Epstein (d. Oct. 7, 1879), author of "Minḥat Yehudah"; Moses h. Mordecai Lipschitz (d. April 5, 1881), left legacy of 15,000 rubles to the community; Abraham b. Sussman Jabez (d. Feb. 28, 1882), author and publisher; Jacob Nathanson (b. 1832; d. Sept. 14, 1884), professor of chemistry; Gabriel Judah Lichtenfeld (b. 1811; d. March 22, 1887), author and mathematician; Isaac Goldmann (b. 1812; d. Jan. 13, 1888), Hebrist and author; Abraham Zuckerman (b. 1843; d. April 21, 1892), Hebrew publisher; Moses Cohen (h. 1820; d. Aug. 31, 1892), communal worker, and author of a Polish work

in defense of the shehitah; Hilarius (Hillel) Nussbaum (b. 1820; d. 1895), Polish historian; Samuel Hirsch Peltin (b. 1831; d. Sept. 30, 1896), author; Abraham Shalom Friedberg (b. 1838; d. March 31, 1902), author and editor; Hayyim Selig Slonimski (b. 1810; d. May 15, 1904), author and scientist; Moses Foreile (b. 1814), calendarist and author (see "Sefer Zikkaron"); Stanislaus Kramsztyk (b. 1841), naturalist; Saul Pincus Rabinowitz (b. 1845), editor of "Keneset Yisrael," an illustrated Hebrew magazine, and translator of Grätz's "Geschichte der Juden"; Mordecai Spector (b. 1859), editor of the "Hausfreund" and the "Familienfreund"; Nahum Sokolow (b. 1859), editor of "Ha-Zefrah," the first Hebrew daily; Ben-Avigdor (b. 1867), founder of the two publishing-houses named respectively "Abisaf" and "Tushiyah."

**WARSHAWSKI, MARK SAMOILOVICH:**

Russian writer; born at Kherson in 1853. He received his early education at a gymnasium in St. Petersburg, and then studied engineering at the ministerial Institute for Engineers. Later he took up the study of law at the University of St. Petersburg, from which he was graduated in jurisprudence in 1879.

Since 1874 Warshawski has been a contributor to the St. Petersburg daily "Novosti," in which he has published a series of humoristic poems. In 1878 he wrote feuilletons for "Russki Mir," and he has been a contributor also to the humoristic weeklies "Pchela" and "Strekoza." He was one of the founders, and for some time associate editor, of the Russo-Jewish periodical "Razsvyet" (1879-81), to which he contributed various essays, as well as sketches of Jewish life. He has contributed also to the "Voskhod," and has published a collection of poems entitled "U Morya" (St. Petersburg, 1884).

**WASHING:** As compared with the Greeks and Romans, the Hebrews paid little attention to the care of the body; and the bath was a rarity in a land where water was relatively scarce. It was important, therefore, that personal cleanliness should have a religious basis, and that the cult should ordain frequent ablutions. Thus, for example, the ancient custom of washing before meals may have had its origin in ritualistic requirements; and water was an important factor in the Hebrew cult as in all other Semitic religions. A partial explanation of this phenomenon lies in the fact that springs and rivers were often worshiped by the Semites either as gods or as the dwelling-places of divinities. To bathe or wash in such waters was, therefore, in itself a ritualistic act, although this should not be taken to imply that all water was holy, and it must also be borne in mind that one who wished to take part in a ritualistic act had first to be in a condition appropriate to it, or, in other words, had to be ritually clean.

The original meaning of this concept can not be discussed here; for many things conditioned "purity," just as there were many things which made one ritually defiled. First of all, however, bodily cleanliness was requisite; for one could no more come unclean into the presence of God than before the king. Consequently a man washed not

only himself (Gen. xxxv. 2; Ex. xxx. 17 *et seq.*), but also his clothes (Ex. xix. 10 *et seq.*), while the camp of Israel, which was considered a holy place on account of the presence of YHWH, was defiled by any pollution (Deut. xxiii. 10 *et seq.*). It thus becomes plain how ablutions developed into symbolic purifications, especially from ritualistic defilements. It is sufficient in this connection to allude to the ritual uncleanness connected with certain physical pollutions, as with touching a corpse, a leper, or his house, or with sexual intercourse. From this standpoint of symbolic purification ablutions were prescribed, in the course of the development of the Law, for a number of impurities which, since they could easily be removed by washing, were characterized as slight, in contradistinction to those graver states of defilement which required sacrifice and the like. Thus, the clothing of a leper (Lev. xiii. 6, 34, 54-58), one who had been in a leper's house (Lev. xiv. 47), and the house itself (Lev. xiv. 52) were to be washed, while washing also removed the pollution resulting from sexual intercourse and the like. See also ABLUTION.

I. BE.

**WASHINGTON:** The extreme northwestern state on the Pacific coast, United States of America; originally a part of Oregon, but admitted to the Union in 1889. The first Jewish pioneers probably went to Washington about 1860, either from Victoria, B. C., which then contained a large Jewish settlement, or from Portland, at that time the only prominent American settlement north of San Francisco, or from Walla Walla, the largest post on the frontier trail from the East to the North-Pacific coast during the Civil war.

**Seattle**, which early became the metropolis of the state, was first visited by Jews about 1862, when the wholesale grocery house of Schwabacher & Co. was opened in Walla Walla. The members and representatives of the firm frequently went to Seattle; and they started a branch there in 1869. The first regular congregation, called Oheves Sholom, was organized in 1887, and a plot for a cemetery was purchased two years later. A synagogue was built and dedicated in 1891, but was sold, and the Reform Congregation Temple de Hirsch was organized May 29, 1899, chiefly through the efforts of Leo Kohn. The foundation and first story of the new temple were finished and dedicated Sept. 13, 1901. R. Brown (now in San Francisco) and R. Abrahamson (now in Portland) were the officiating rabbis of Congregation Oheves Sholom, and Theo. F. Joseph has been the minister of Congregation Temple de Hirsch since its organization in 1899. In addition to the Reform congregation there is an Orthodox organization, Bickor Cholem, which was founded in 1892. L. Brooks is the hazzan and rabbi; and the congregation worships in a synagogue. The Seattle Hebrew Benevolent Society owns the Hills of Eternity Cemetery, where members of the Reform congregation are interred, while Orthodox Jews are buried in Oak Park Cemetery, the property of Bickor Cholem congregation. The following charitable and educational societies exist in Seattle: Seattle Hebrew Benevolent Society, Ladies' Hebrew Benevolent Society, Montefiore Society, Temple Auxiliary, Council of Jewish

Women, and Sons of Zion. The Independent Order of B'nai B'rith is represented by two lodges, Seattle Lodge No. 342 (organized in 1883) and Hildesheimer Lodge No. 503 (organized in 1900). The Concordia Club, founded in 1903, is a flourishing social organization.

Next in size to the Jewish community of Seattle is that of **Spokane**, where the congregation Emanuel, organized Sept. 28, 1890, now (1905) has a membership of about sixty. Rabbis E. Schreiber, A. Farber, and Jacob Bloch have officiated as ministers, and the present incumbent is Rabbi D. Levine. The communal societies are the Judith Montefiore Society (an auxiliary of the temple), the Ladies' Benevolent Society, and the Daughters of Israel (auxiliary of the semiorganized Orthodox community). Abraham Geiger Lodge No. 423, I.O.B.B., chartered in March, 1893, has about fifty members.

The Beth Israel congregation in **Tacoma** was organized in 1892 and completed its temple in 1893. The congregation, conservative in character, numbers about sixty-five members. There are several auxiliary societies, comprising the Lady Judith Montefiore Society, a section of the Council of Jewish Women, and the Hebrew Benevolent Society, which owns a large cemetery. A B'nai B'rith lodge formerly existed in the city, but the removal of many members resulted in the return of the charter to the grand lodge. Montague N. A. Cohen (now of Sacramento) was the minister of the congregation during the year 1903-4.

A few Jewish families that are not regularly organized into congregations live in Walla Walla, Olympia (a cemetery plot was bought in 1873), Ellensburg, Aberdeen, Hoquiam, South Bend, Everett, and Bellingham.

Among the eminent Jews of Washington have been Gen. Edward S. Solomon, who was sent by President Grant to be governor of the territory of Washington from 1870 to 1872, and Bailey Gatzert, who was one of the pioneers of Seattle, and for several years one of the most prominent men of the Pacific coast, being president of the firm of Schwabacher & Co. from 1888 to 1893, the year of his death, and also the presiding officer of the Gatzert-Schwabacher Land Co.

In a total population of about 750,000 (according to the most accurate estimate for the year 1905), the Jews of Washington number approximately 3,500.

A. T. F. J.

**WASHINGTON, D. C.:** Capital of the United States; situated in the District of Columbia, on the Potomac River. In 1849 there were in Washington six Jews, who were engaged in business on Pennsylvania avenue, and who went to Baltimore for the important holy-day services. On April 25, 1852, the First Washington Hebrew Congregation was organized; it numbered twenty-one members, and Solomon Pribram was elected its first president. Two years later the membership had increased to forty-two; and on Dec. 13, 1855, at the thirty-fourth session of Congress, a special act was passed, "that all the rights, privileges, and immunities heretofore granted by the law to the Christian churches in the city of Washington be and the same hereby are extended to the Hebrew Congregation of said city."

This marks the incorporation of the first Jewish institution in the District of Columbia. The congregation grew steadily in membership and in influence; and in 1863 it acquired for a place of worship the old Methodist church, which had been utilized by the government for hospital purposes during the Civil war. In 1898 the congregation moved into its present stately edifice, the corner-stone of which was laid by President McKinley in the presence of his entire cabinet, on Sept. 16, 1897. The First Washington Hebrew Congregation is the only Reform congregation in the District of Columbia. Its present (1905) membership is 350, and its religious school is attended by 200 children. The following readers and rabbis have officiated since 1854: S. M. Lansburgh, S. Weil, J. L. Jacobson, Herman Baar, Isaac Stampel, M. Goldberg, Louis Stern, and Abram Simon. Rabbis Simon and Stern are officiating conjointly.

In 1870 thirty-five members left the parent body to form an independent congregation, with Isaac Stampel as hazzan. This congregation, which was called Adath Israel, was organized as a protest against the Reform tendencies of the old congregation. In 1873 Adath Israel moved into its present home on the corner of Sixth and G streets, its synagogue being dedicated in the presence of President Grant and his cabinet. Its present membership includes 150 families, ministered to by Rabbi Julius T. Loeb; and its religious school is attended by sixty-five pupils.

The Ahabai Shalom congregation was organized in 1902 as a result of the union of two smaller hebreot, the Chayai Odom (founded 1890) and the Agoodath Aehim (1898). It has a membership of 125 families, and its present hazzan is Robert Graffman, who conducts a day-school at 607 H street for twenty-five pupils. The Talmud Torah congregation (present hazzan, M. R. Joelson) was founded in 1890, and meets on 4½ street, southwest. It has a membership of seventy persons, but no religious school. All four congregations maintain cemeteries on the same plot of ground on Harrison road.

The leading charitable, religious, and literary societies are: (1) The United Hebrew Charities (founded 1882; incorporated 1893; annual income about \$3,000; president, I. L. Blout, appointed 1894); (2) The Hebrew Free Inn, for the temporary care of the indigent; controlled by the executive board of the United Hebrew Charities; (3) The Hebrew Relief Society (founded 1905); (4) The Ladies' Auxiliary Society of Adath Israel; (5) The Old B'nai Zion; (6) The Rebecca Lodge (1863); (7) The Deborah Lodge (1875); (8) The Liberty Lodge No. 19, I.O.S.B. (1894); (9) The Friendship Circle (1897); (10) The Senior and Junior Councils of Jewish Women; (11) The Elijah, Grace Aguilar, and Argo lodges, I.O.B.B.; (12) The B'rith Abraham and the Independent B'rith Abraham; (13) The Sons of Judah; (14) The Mercantile Club; (15) The Hebrew Literary Society; (16) The Free Sons of Benjamin; (17) The Young People's Union of Zion.

While most of the Jews of Washington are engaged in commerce, the legal and medical professions are also creditably represented. Among the most prominent Jews may be mentioned: Commodore

Uriah P. Levy, Simon Wolf (publicist and author), Max Weyl (artist), Emile Berliner (inventor), Adolphus S. Solomons, Cyrus Adler (assistant secretary, Smithsonian Institution), and Dr. Milton J. Rosenau (director, Hygienic Laboratory, Marine Hospital Service). The Jewish population of the District of Columbia may be placed at 4,000.

**WASKER, SILLEMAN ABAJEE (SOLOMON ABRAHAM)**: Beni-Israel soldier; died about 1850. He enlisted in the Third Regiment Native (Indian) Light Infantry, Jan. 1, 1809, and was present at the battles of Puna, Rusood, Khur, Multau, Kittoor, and Gujarat, rising ultimately to the highest rank open to a native soldier, that of sirdar bahadur; he was also decorated with the first class Order of the Star of British India. He retired from the army in March, 1846, after a service of thirty-seven years, during twenty-five of which he was native commander of the Beni-Israel regiment.

**BIBLIOGRAPHY**: H. Samuel, *Sketch of Beni-Israel*, pp. 24-25.

J.

**WASSERTRILLING, HERMANN (ZEBI HIRSCH BEN NATHAN)**: Austrian Hebraist; flourished in the nineteenth century; born at Boskowitz, Moravia. He officiated as teacher in the Jewish school of Hotzenplotz, Silesia, about 1850, and later as rabbi of Bojanowo, Posen. The following is a list of his works, all published at Breslau: "Hadrat Elisha" (1857), an epic poem in nine cantos, describing the life of the prophet Elisha, and giving also a brief history of contemporary kings; "Nezer Hamudot" (1860), an epic poem in eight cantos, being a history of Daniel and his contemporaries under the reign of the Babylonian, Median, and Persian kings until the return of the Israelites to Jerusalem, and the building of the Second Temple; "Mattenat Nahali'el" (part i., 1860; part ii., 1868), a collection of legends from the Talmud, Midrash, and the midrashic commentaries, arranged in verse in the order of the weekly lessons; "Torat ha-Berit" (1869), a treatise in reply to a question on circumcision addressed to the synod of Leipsic by Max Engel (July, 1869).

M. SEL.

**WASSERZUG, HAIM**: English hazzan and composer; born at Sheritz, Prussian Poland, 1822; died at Brighton, England, Aug. 24, 1882. As a child he was endowed with a remarkably sweet voice, and at eighteen he was elected hazzan at Konin. His renown soon spread among the Jewish communities of Poland, and he received a call as hazzan to Novy-Dvor, where his introduction of choral singing and singing in harmony, instead of the then prevalent "hazzanut," aroused considerable opposition against him on the part of the Hasidim. Thirteen years later he was appointed to a post at Lonisa, near the Lithuanian frontier. Here he remained for five years, when he was elected cantor of the Wilna congregation. In 1867, on the opening of the North London Synagogue, he was elected its first reader, which office he held until his death in 1882.

During his hazzanship at Wilna, Wasserzug wrote some sacred compositions which, under the title "Sefer Shire Mikdash," were published in London, 1878. These compositions received high commendation; and some of the principal cantors of the European continent and of America were numbered among his disciples. His son, **David Wasserzug**, was educated at Jews' College, London, and has officiated as rabbi at Cardiff in Wales, at Johannesburg in South Africa, and, since 1905, at the Dalston Synagogue, London.

G. L.

**WATCH-NIGHT.** See WACHNACHT.

**WATER**: Water was looked upon by the Jews as extremely important and precious. The first thing placed before a guest was water to wash his feet (Gen. xviii. 4, xxiv. 32), and it was a duty of hospitality to give water to strangers coming into the house, or even passing by (*ib.* xxiv.

**Water for** 17, 43). The non-fulfilment of this **Guests.** duty often resulted in serious hostilities. Thus, when the Israelites were

Marching toward Palestine they were prevented from passing through Edom, Ammon, and Moab because the inhabitants refused to give them a drink of water, even for money. Two hundred years later this resulted in bitter warfare (see AMMON; JEPHTHAH). During the wandering in the wilderness the lack of water caused the Israelites to murmur against their leader (Ex. xv. 22-25, xvii. 1-7; Num. xx. 1-13). On the other hand, the heroes of King David's guard won distinction by procuring water for the king at the risk of their lives (II Sam. xxiii. 16; I Chron. xi. 17-18).

Water was of great importance in purification, being used in cleansing the leper, in sickness, in

**For** washing utensils, and in the cleansing of one who had been defiled by touching an unclean body (Lev. xv. 16-22, **Purposes.** 27). The liability of plants and fruits to defilement was increased by contact with water (Lev. xi. 38), a contingency which formed a topic of much discussion in the Talmudic period, and became the subject of the treatise MAKSHIRIN.

The offering of water as a libation was an ancient institution, and even before the kingdom was established the Israelitish tribes, after having suffered repeated defeats at the hands of the Philistines, gathered together at Mizpeh at the command of the prophet Samuel, and poured water on the ground before YHWH (I Sam. vii. 5-6). An apparent analogue to this is found in the story that at the great feast of Baal the prophet Elijah poured water in the trench which surrounded the altar (I Kings xviii. 35), possibly to enhance the miracle. The libation at the Feast of Tabernacles, when the high priest sprinkled water upon the altar as a sacrifice, was a later development of the ancient offering; it was a feature of the ritual until the destruction of the Second Temple, and the disregard of it by ALEXANDER JANNÆUS entailed terrible consequences (comp. Suk. 48b).

The word "water" was often used by the Jews

symbolically, especially in expressing grief, *i.e.*, tears (Jer. ix. 1, 18; Ps. cxix. 136). A misfortune of great magnitude, the full extent of which it seemed impossible to fathom, was likened to water (Lam. iii. 54; Ps. lxxix. 2, cxxiv. 4-5), while the constant flow and unrest of water were symbolic of numerous descendants (Num. xxiv. 7). The forgiveness of sins and their complete remission were typified by sprinkling with clean water (Ezek. xxxvi. 25); and in Jer. ii. 13 God is compared to a fountain of living waters. It was customary in the Talmudic period, moreover, to use "water" symbolically for the divine teachings (see Mek., Beshalah, Wayassa', 1); so that in several passages the term "water" is used without any amplification whatever (comp. Hag. 3a; B. M. 84b; Hor. 14a; Ah. i. 2).

Water prepared with the ashes of the RED HEIFER was especially important, since, even though unclean, it had the power of cleansing men and things infected with defilement. Still more important, however, was the "water of bitterness," the so-called

"me ha-marim ha-me'arerim," which  
**Water** was prepared in the following man-  
**of Bitter-**ner: Into an earthen vessel the priest  
**ness."** poured water which had stood in the  
 Temple, and with this water he mixed

dust taken from the Temple floor. If a woman was suspected of unfaithfulness toward her husband, the priest pronounced certain maledictions, which he afterward wrote on a little scroll. This was then dissolved in the water, which the accused woman was obliged to drink (Num. v. 17-24; see also the article **סוֹתָן**).

Water was an important factor during the first three days of Creation. On the first day "the Spirit of God moved upon the face of the waters" (Gen. i. 2); on the second day the nether waters were divided from the upper, and the latter were transformed into the "raqia'," or "firmament" (*ib.* verse 7); and on the third day the nether waters were assigned to their allotted place, which received the name of "sea" (*ib.* verse 10).

Through the influence of the Greeks, and especially of the Gnostics, who regarded water as the original element, similar beliefs gained currency among the Jews, so that Judah ben Pazi transmitted the following saying in the name of R. Ishmael (Yer. Hag. ii., beginning): "In the beginning the world consisted of water within water (Gen. i. 2); the water was then changed into ice (Ps. cxlvii. 17), and again transformed by God into earth (Job xxxvii. 6). The earth itself, however, rests upon the waters, and the waters on the mountains" (*i.e.*, the clouds; Ps. civ. 6). This teaching, however, was rejected by R. Akiba, who warned those scholars who devoted themselves to the study of cosmogony not to be led astray by Gnosticism, and not to cry "Water!" whenever they saw in their visions a sea of crystal around the throne of God (Hag. 14b). In the later Talmudic period the word "water" was used as a designation for mucus, which was called "water from the nose" (Tosef., Shab. viii.; Niddah 55d), while buttermilk was termed "water of milk," and unfermented grape-juice was called "water of the grape-vine" ('Orlah i. 7).

E. G. H.

S. O.

**WATER-DRAWING, FEAST OF** (שְׁמַחַת בֵּית הַשְּׂאֵבָה): At the morning service on each of the seven days of the Feast of Tabernacles (Sukkot) a libation of water was made together with the pouring out of wine (Suk. iv. 1; Yoma 26b), the water being drawn from the Pool of Siloam in a golden ewer of the capacity of three logs. It was borne in solemn procession to the water-gate of the Temple, where the train halted while on the SNOFAR was blown "teki'ah, teru'ah, teki'ah." The procession then ascended the "kebesh," or slanting bridge to the altar, toward the left, where stood on the east side of the altar a silver bowl for the water and on the west another for the wine, both having snout-like openings, that in the vessel for the wine being somewhat the larger. Both libations were poured out simultaneously (Suk. iv. 9).

Although there was no direct Mosaic law for the libation of water, it was claimed by R. Nehunya

of Beth-horon that the ordinance was a Mosaic tradition (Zeb. 110a), while  
**A** R. Akiba deduced a Mosaic intimation  
**Mosaic** Tradition. ("remez") of the tradition from the  
**Tradition.** plural form "u-nesakeha" ("drink-offerings"; Num. xxix. 31). R. Judah b. Bathyra drew a similar inference from the spellings נְסִיחָה and נְסִיחָה as compared with the usual נְסִיחָה, and כְּמִשְׁפָּט as compared with כְּמִשְׁפָּט (Num. xxix. 30, 31, 33), the superfluous letters forming מִים ("water"; Shab. 103b); and R. 'Ena confirmed the tradition by quoting Isa. xii. 3: "Therefore with joy shall ye draw water out of the wells of salvation" (Suk. 48b). The treatise Sukkah also explains the offering as made in order that the rainy season, which begins at that time of the year, may be abundant (comp. R. H. i. 2, 16a; Ta'an. 2b).

Why the Rabbis laid such stress on the water-libation is not clear, unless there were weighty reasons which have not been recorded. It may have been emphasized to counteract the Gentile practise of offering wine only; or it may even have been intended as a temperance lesson. At all events, the Sadducees were strongly opposed to this interpretation of the Law, so that on one occasion ALEXANDER JANNÆUS poured the water on his feet instead of on the altar, thus affronting the Pharisaic sympathies of the people so bitterly that they threw at him the etrogim which they carried in celebration and nearly killed him, and the priest was accordingly required thenceforth to raise his hand when he poured out the water at the libation that his offering might be seen by all (Suk. 48b). To express their contempt of the Sadducees on the one hand and to strengthen their own position on the other, the Rabbis embellished the libation of water with so much ceremony that it became a favorite and distinctive rite on these occasions. On the night of the first day of the Feast of Tabernacles the outer court of the Temple was brilliantly illuminated with four golden lamps, each containing 120 logs of oil, in which were burning the old girdles and garments of the priests (Shab. 21a; Yoma 23a). These lamps were placed on high pedestals which were reached by ladders; and special galleries were erected in the court for the accommodation of women, while the men below held torches in their hands, sang hymns, and danced.

On the fifteen steps of the Gate of Nicanor stood the Levites, chanting the fifteen "songs of degrees" (Ps. cxx.-cxxxiv.) to the accompaniment

**Becomes** of their instruments, of which the most **a Favorite** important was the "halil," or flute, **Rite.** although it was used neither on the Sabbath nor on the first day of the feast (Suk. v. 1). The illumination, which was like a sea of fire, lit up every nook and corner of Jerusalem, and was so bright that in any part of the city a woman could pick wheat from the chaff. Whosoever did not see this celebration never saw a real one (Suk. 53a). Hillel the Elder encouraged general rejoicing and participated in the celebration that all might follow his example, while R. Simeon b. Gamaliel juggled with eight torches, throwing them in the air and catching them again, thus showing his joy at the feast. R. Joshua b. Hananiah states that the festival was celebrated throughout the night with songs, music, shouting, clapping of hands, jumping, and dancing.

After the destruction of the Temple the libation of water, being a portion of the sacrifice, was discontinued; but the custom of rejoicing was retained for some one day of the Feast of Sukkot other than the Sabbath or a full holy day. No "am ha-arez" was permitted to join the celebration, although he was allowed to look on. Probably the ceremony originally included a symbolic form of prayer for rain in the winter season (see Zech. xiv. 16-19).

The feast of water-drawing is now celebrated in the bet ha-midrash on any night other than Friday in the middle of Sukkot. At Jerusalem each night of the semiholy days is observed in the bet ha-midrash or in the synagogue by chanting the fifteen "shire ha-ma'alot" and appropriate Bible verses, while the Sephardim have special piyyuṭim. After the service small parties are formed, and engage in feasting, singing, and dancing till midnight (Luncz, "Jerusalem," i. 40). In his "Die Eleusinischen Mysterien im Tempel von Jerusalem" (in Hungarian, in "Magyar-Zsidó Szemle," xii. 213; *idem*, in "Populär-Wissenschaftliche Monatsblätter," xvii. 121) L. Venetianer endeavors to prove that the feast of water-drawing bears traces of Greek influence.

**WATER-RIGHTS.** See RIPARIAN OWNERS.

**WAVE-OFFERING.** See SACRIFICE.

**WAW** (ו): Sixth letter of the Hebrew alphabet. The name possibly means "nail" or "hook," and the shape of the letter in the Phœnician alphabet bears some resemblance to a hook. "Waw" is a labial spirant, identical in sound with the English "w." When preceded by the labial vowel "u," it blends with it ("uw"), the result being a long u-sound; and when an a-vowel precedes it, the two form the diphthong "au," which in Hebrew has passed into "o." At the beginning of a word (a position it rarely has in Hebrew) "waw" retains its consonantal value, except when followed by ו, ב, ד, or a letter with simple "shewa." As the first letter of verb-stems it has been replaced in Hebrew almost everywhere by "yod." As a numeral (in the later period) "waw" has the value of 6.

I. BR.

**WAWELBERG, HIPPOLITE HENRICH-OVICH:** Russian banker; born at Warsaw 1844; died at St. Petersburg Oct. 20, 1901. After graduating from the real-gymnasium of Warsaw he studied at the university of that city, and later at the Agricultural College of Nova Alexandria, finally completing his studies in Germany. Upon his return to St. Petersburg he assumed the management of his father's banking establishment, and became a very successful financier. He took a lively interest in the communal affairs of St. Petersburg and of Warsaw, and contributed considerable sums of money toward the foundation and maintenance of industrial schools. He devoted large sums also to the improvement of the condition of the laboring classes. The Museum of Arts and Industries, the Technical School of Wawelberg and Rothwand, and the cheap lodging-houses of Warsaw owe their existence largely to his support.

Wawelberg contributed liberally to the publication in the Polish language of popular books on the applied sciences. It was his aim not only to raise the general economic and social condition of Poland, but also to elevate his coreligionists and to imbue them with a spirit of patriotism. He was a director of the Jewish community of St. Petersburg, and, from 1880, a member of the Society for the Promotion of Culture Among the Jews of Russia, and of the Society of Friends of Jewish Artisans and Farmers. After 1891 he was also an active member of the Jewish Colonization Association. Wawelberg was one of the trustees of the Industrial Company at Dubrovna, which endeavored to provide work for the poor Jewish artisans of that place.

J. G. L.

**WAX** (Hebr. "donag"): In the Old Testament wax is referred to only as a simile for something easily dissolved or evanescent (Ps. lxxviii. 3); for compliance and submission (Judges xvi. 18; Micah i. 4; Ps. cxvii. 5); or for fear and discouragement (Ps. xxii. 15). In the Talmud mention is made of the use of wax ("sha'awah") for lighting purposes, probably in the form of candles (Shab. 20b; comp. Rashi). At present wax candles are frequently employed on the Feast of HANUKKAH in places where olive-oil is not easily obtainable. On the eve of the Day of Atonement and at the anniversary of the death of a relative (JAHRZEIT) it is customary to light in the synagogue large wax candles that will burn at least twenty-four hours. A candle made from braided wax tapers is used also for the HADDALAH ceremony.

**WAY.** See RIGHT OF WAY.

**WAY, LEWIS:** English clergyman; born at Denham, Bucks, England, Feb. 11, 1772; died in London Jan. 26, 1840. He was educated at Merton College, Oxford, and was called to the bar in 1797, but entered the Church and devoted to Church purposes a large legacy left him by a stranger named John Way. He was the founder, in 1808, of the London Society for Promoting Christianity Among the Jews, under the patronage of the Duke of Kent, father of Queen Victoria, and with the assistance of Prof. Simeon of Cambridge, Dr. Marsh of Birming-

ham, the convert J. F. Fry, and the preacher Leigh Richmond. Convinced that the Jewish nation would again arise, return to its ancestral home, embrace Christianity, and convert the Gentiles, Way traveled at his own expense through Holland, Germany, and Russia, in order to study the condition of the

such as the "Song by the Sea" (Ex. xv.; comp. ASHRAH) or the "Journeys of the Standards" (Num. x. 14-16, 18-20, 22-24, 25-28; xxxiii. 11-13, 15-36, 41-47), the present chant is founded on a vocal imitation of a herald's trumpet-call. The accompanying transcription, based on that of Baer, shows the

Jews, ameliorate their social and political status, and urge the Christians to missionary work among them.

In 1817 Way induced Czar Alexander I. to issue two ukases assuring all baptized Jews of imperial protection and promising them land for farming. Further, he wrote a work entitled "Mémoires sur l'Etat des Israélites Dédiés et Présentés à Leurs Majestés Impériales et Royales, Réunies au Congrès d'Aix-la-Chapelle" (Paris, 1819), in which he emphasized the Messianic importance of the Jews, considered their relation to the Biblical promises and the ultimate fulfillment thereof, and pleaded for their emancipation in Europe. This was presented at the Congress of Aix-la-Chapelle (Oct., 1818) to the czar, who gave the memorandum to his plenipotentiaries, Nesselrode and Capodistrias, ordering them to bring it before the congress, together with the question of the emancipation of the Jews. It was accordingly entered on the minutes, but produced no further effect. In his own house Way used to entertain converted Jews, who sometimes ill repaid his hospitality, giving rise to a satirical epigram by Macaulay.

**WAYEHI 'EREB** ("And it was evening"):

One of the "nedarim," or special declamatory variations from the strict CANTILLATION of the Pentateuch, according to the Northern use. This chant is introduced into the reading which reopens the yearly cycle of pericopes on the Rejoicing of the Law (see SIMHAT TORAH); and it marks the verses which conclude the recital of the work of each of the six days of Creation (Gen. i. 5, 8, 13, 19, 23, 31). The reader pauses at the end of each verse; and after the congregation has loudly chanted the "Wayehi 'ereb," he repeats the intonation with florid amplification of the melody. Like other nedarim,

method of its rendering (comp. also "The Voice of Prayer and Praise," No. 168b, London, 1899).

A. F. L. C.

**WAYEKULLU** ("Thus were finished"; Gen. ii. 1-3): The concluding verses of the story of Creation, deemed from Talmudic times an essential portion of the prayers for Friday night, as the eve of the Sabbath (Shab. 119b). While the whole congregation remained standing (Shulhan 'Aruk, Oraḥ Ḥayyim, 268, 7), the "Wayekullu" was recited aloud in the synagogue after the silent reading of the "Amidah." In the homes it was recited before the domestic KIDDUSH. Thus the preceptors were tempted to dwell upon it when reciting it; and in the course of time they developed for it, out of the simple CANTILLATION of the Law, an elaborately melismatic intonation in their most florid style, for an example of which see *JEW. ENCYC.* vi. 290.

A. F. L. C.

**WAYIKRA RABBAH** (called also **Haggadat Wayikra**): Haggadic midrash to Leviticus. Under the name "Wayikra Rabbah" this midrash is first referred to by Nathan, in his "Aruk," s. v. **ט. ה. ה. ה.** and in several other passages, as well as by Rashi in his commentaries on Gen. xvi. 26, Ex. xxxii. 5, Lev. ix. 24, etc. According to Zunz, however, Hai Gaon and Nissim knew and made use of this midrash; and Zunz dates its origin back to the middle of the seventh century. It originated in Palestine, and is composed largely of older works, its redactor having made use of Genesis Rabbah, Pesikta de-Rab Kahana, and the Jerusalem Talmud, in addition to other ancient sources. He appears to have referred also to the Babylonian Talmud, several expressions in the midrash being used in the sense in which only that work employs them (comp. Weiss, "Dor," iii. 261).

The Wayikra is not a continuous, explanatory midrash to Leviticus, but a collection of exclusive

sermons or lectures on the themes or texts of that book; and it consists altogether of thirty-seven such homilies, each of which constitutes a separate chapter, or "parashah." The Scriptural passages on which the homilies are based are often referred to in the midrash as "parashiyot," and are further designated according to their contents; as, for example, ch. i., "Parashat ha-Mishkan," on Lev. i. *et seq.*; ch. ix., "Parashah Korbanot," on Lev. vii. 11 *et seq.*; ch. xv., "Parashat Nega'im," on Lev. xiii. 1 *et seq.*; etc. Of the thirty-seven homilies, eight (1, 3, 8, 11,

13, 20, 26, 30) are introduced with the formula "Patah R." ("The teacher has commenced"); eight (2, 4-7, 9, 10,

19), with "Hada hu di-keṭib" (lit., "As it is written"); and twenty-one (12, 14-18, 21-25, 27-29, 31-37), with "Zehshe-amar ha-katub" (lit., "This is what the Holy Scriptures say"). The fact that the redactor of the midrash selected only these thirty-seven texts for his exposition, is explained by Weiss (*l.c.*) as the existence of the Sifra, the halakic midrash to Leviticus: "The redactor of the Wayikra Rabbah had nothing to add to the halakic midrash; he collected therefore only those haggadic explanations which he found on various texts and passages." This surmise by Weiss is, however, refuted by the circumstance that nearly all the parashiyot of the Wayikra Rabbah (with the exception of chapters 11, 24, 32, 35, and 36) refer to halakic passages. Thus, the redactor of the midrash collected haggadic expositions also of such texts as were treated in the Sifra. The conjecture of Theodor that in the older cycle of weekly lessons the passages on which the homilies of the Wayikra Rabbah were based consisted in certain paragraphs, or in lessons for certain festivals, seems therefore to be correct (comp. Theodor, "Die Midraschim zum Pentateuch und der Dreijährige Palästinensische Cycles," in "Monatsschrift," 1886, pp. 307-313, 406-415; see also *JEW. ENCYC.* viii. 560).

In its plan, as well as in the form of the several parashiyot, the midrash bears great resemblance to the Pesikta de-Rab Kahana (see *JEW. ENCYC.* viii. 559). Like the lectures in the Pesikta, the hom-

long pieces, in others brief sentences only, have been adduced in connection with the Scriptural passages, seemingly in accordance with the material at the redactor's disposal. Inasmuch, however, as the homilies in the Wayikra Rabbah treat largely of topics beyond the subject-matter of the Biblical text itself, the explanations of the individual verses are often replaced by series of haggadic quotations which refer to the theme considered in the homily (comp. ch. 8, 12-15, 18, 19, 23, 31-34, 36, 37). In

this the Wayikra Rabbah differs from the Pesikta, for in the latter work the individual explanations are seldom lacking. Another difference between the two works is, that while the Pesikta rarely quotes lengthy haggadic excerpts after the proems, the Wayikra Rabbah quotes such after the conclusion of a proem, in the course of each parashah, and even toward the end of a chapter; these excerpts have often very slight reference to the context. But otherwise the Wayikra carefully follows the form of the Pesikta. The end of each parashah in the former work, in analogy with the usage followed in the Pesikta, consists of a passage containing a Messianic prophecy.

The extent of the present midrash is the same as that of the edition quoted by R. Nathan in the "Aruk," since he refers to passages from ch. xxxvi. (*s.v.* אָרֻךְ) and xxxvii. (*s.v.* קֶלֶב) as "the end." Aside from some transpositions, eliminations, and glosses, the printed text of the midrash is noteworthy as containing, at the end of the first three parashiyot, annotations from Tanna debe Eliyahu which were not contained in the older manuscripts.

**BIBLIOGRAPHY:** Zunz, *G. V.* pp. 181-186; Weiss, *Dor*, iii. 261; Theodor, *Zur Composition der Agadischen Homilien*, in *Monatsschrift*, 1881, pp. 500-510.

**WE-ADAR.** See ADAR SHENI.

**WE-'AL KULLOM:** The brief prayer which interrupts and divides into three sections the longer confession of sins enumerated in alphabetical order

WE-'AL KULLOM

*Lento dolente.* *pizz. moto.*

We 'al kul - lom, E lo ah se li hot, se lah.....  
 And for them all, for give - ing God, for give.....

la nu, me - hal..... la nu, kap..... per..... la nu.  
 us,..... par don us,..... grant..... us re mis sion.

ilies in the Wayikra Rabbah begin with a larger or smaller number of proems on passages mostly taken from the Hagiographa. Thereupon follows the exposition proper of the passage to which the homily refers. The explanation often covers only a few verses, or even a few words of the first verse, of the passage on which the parashah is based. In some cases

(see 'AL HET) in the prayers of the Day of Atonement. The traditional melody presents many variants besides the foregoing (comp. the Polish and German renderings given in Baer's "Ba'al Tefillah," No. 1357), all of which are based on the plaintive phrases of the wail which pervades the SELIHAN.

A.

F. L. C.

**WEASEL** (חֹלֵר): Unclean animal (Lev. xi. 29). Saadia, Bochart, and others render חֹלֵר by "mole," referring to the Arabic "ḥuld" and the Aramaic "ḥuldah." The family of the *Mustelidae*, to which the weasel belongs, is represented in Palestine and Syria by several species.

In the Talmud the common weasel, *Mustela vulgaris*, is mentioned under the names חֹלֵרָה and כְּרוֹשְׁתָּה (Pes. 9a; Sanh. 105a). In Gen. R. xxiv. 6 also occurs the term גֹּלָא. The weasel lives on dung-heaps and in holes and chinks of walls, and it burrows in the ground (Pes. 8b, 118b; Niddah 15b; Suk. 20b). It kills animals larger than itself (Toh. iv. 3), and even attacks corpses (Shab. 151b). It is especially dangerous to domestic fowl (Hul. 52b *et al.*); its bent and pointed teeth pierce the skulls of hens (*ib.* 56a; comp. Rashi on Deut. xxxii. 5).

It is above all dangerous to the cat. Hence the proverb "Weasel and cat wed," applied to simulated friendship (Sanh. 105a). Like all small beasts of prey, the weasel carries off glittering objects to its hole (Lev. R. clxxi. 4). The weasel alone of all land animals has no counterpart in the sea (Hul. 127a). It was employed in clearing the house of mice (B. Ḳ. 80a). On the use of the weasel in divination see Sanh. 66a; and for the pretty story of the weasel and the well which, as witnesses of a betrothal, avenged its breach, see Rashi on Ta'an. 8a.

**WEATHER-LORE:** Popular prognostications regarding the weather. A certain number of these occur in the Talmud (B. B. 147a). If the weather at Shabu'ot is clear, sow wheat. If the smoke of the altar turns to the north on the last days of Tabernacles, there will be much rain in the following year. This was true for Jerusalem; the opposite, for Babylonia. If New-Year's day is warm, the whole year will be warm (comp. Yoma 21b).

Much importance was attributed to the "teḳufot," or changes of seasons. If the teḳufah of Tebet falls on a Wednesday or a Saturday, there will be famine. If the teḳufah of Nisan is on a Sunday, there will be war and death and snow. Some of these prognostications of later times were adapted from the Greeks. Thus, if the new moon of Tebet fell on a Sunday, it was taken to portend that the winter would be a good one. Moses ha-Darshan declared that if the teḳufah of Tebet fell within the first ten days of the month, grain would be dear. This is quoted by Issachar ibn Susan in his "Ibbur Shanin" (pp. 123b, 124a, Venice, 1579), which contains other weather-lore. In some weather-signs the position of the planets is taken into account. Thus, if a new moon occurs in the mansion of Mars, the month will be warm and rainy; if in the mansion of Mercury, windy and dusty. If the teḳufah happens when the sun is in the zenith, the year will be a warm one; when Venus is in the ascendancy, a rainy one; etc.

Many of the larger Maḥzorim contain items of this kind; as, for example, the Roman Maḥzor edited by Luzzatto and the Vitry Maḥzor. So, too, in the "Sefer Yerahme'el" there is an elaborate treatise on meteorology, containing prognostications based on the

occurrence of rain on certain days, or of thunder on such days. Thus, if it rains on the new moon of Nisan, there will be death among the cattle.

**WEAVING:** As early as the nomadic period the Israelites understood the art of spinning the hair of camels and goats, and the wool of sheep, and of weaving therefrom rough stuffs for tents and clothing. Their method of weaving was probably quite as primitive as that of the Bedouins of Jabal Musa observed by E. H. Palmer, who describes the process, as carried on by a woman, thus: "Her loom was a primitive one, consisting only of a few upright sticks, upon which the threads were stretched; the transverse threads were inserted laboriously by the fingers without the assistance of a shuttle, and the whole fabric was pressed close together with a piece of wood" ("The Desert of the Exodus," i. 125).

In Palestine the Israelites became acquainted with somewhat better methods of weaving, although these must have remained very simple until a later period. This is shown by the fact that the Egyptian looms, although the Egyptian methods of weaving, like the Babylonian and Syrian, are spoken of as highly developed, were nevertheless exceedingly primitive. Herodotus narrates that the Egyptians wove at an upright loom. The threads were fastened below, and the weavers commenced their work at the bottom, unlike other peoples, who, according to the same authority, began at the top. This method of weaving was probably the one which was customary at the time of Herodotus, although the monuments prove that the Egyptians were acquainted also with horizontal looms. The well-known representation in one of the tombs at Beni Hasan (Wilkinson, "Ancient Egyptians," i. 317) shows a horizontal loom at which two women are seated. (The usual view that this is an upright loom has been refuted by Kennedy in Cheyne and Black, "Encyc. Bibl." iv. 5279.) The warp was stretched over

**Warp and Woof.** two sticks fastened to the ground by wooden pegs. Other representations show upright looms on which the warp runs from top to bottom, being held firm above and below by a cross-bar. Both kinds of loom may have been in use among the Hebrews also.

The Greeks and Romans used most commonly the upright loom, as described above, although at an earlier period both the upright and the horizontal loom may have been used side by side. Kennedy (*l.c.*) finds an indication of the existence of the horizontal loom in the story of Samson, where it is related that Delilah wove Samson's locks into the web of her loom while he was asleep (Judges xvi. 13 *et seq.*). In modern times only the horizontal loom is used in Palestine. Still another upright loom, differing from that described above, seems to have been in use. This corresponded to the old Grecian loom, having but one cross-bar at the top to fasten the web, while the threads were kept stretched apart at the bottom by weights instead of by a second cross-bar. With this kind of a loom it was nec-

essary to begin at the top. Bliss claims to have found such looms in Tell al-Hasi ("A Mound of Many Cities," p. 113). The primitive

**Looms.** fashions of olden times made it possible to weave a whole garment in one piece, and the looms were adapted to the sizes of the products required. It was not customary to weave long strips of cloth from which the clothing was cut out later, although this was possible when the rods upon which the warp was stretched could be turned, as seems to have been sometimes the case with the Egyptian looms.

One of the most important problems of ancient weaving methods was the separation of the odd from the even threads of the warp, so that the woof could pass between them easily, and their interchange of positions (*i. e.*, respectively over and under the woof) after each stroke of the shuttle. This the ancient Egyptians effected by means of two sticks: one was pushed between the two layers of threads, keeping them separate, while the other, to which the threads of the lower layer were fastened by loops, made it possible to pull them up simultaneously, and thus to produce the interchange of positions. The insertion of the transverse thread was effected by means of a shuttle (קֶרֶן). There are no data by means of which the history of the development and perfection of this important discovery can be pursued any further.

Egyptian representations show that from the earliest times the Syrians delighted in variegated and gorgeous garments. The Hebrews must soon have learned how to manufacture many-colored stuffs, in addition to the most simple single-colored weaves. For example, the coarsest mantles of the modern peasants are striped black (or brown) and white, and they were probably the same in antiquity. The inweaving of gold was fashionable for elegant garments (Ex. xxviii. 5 *et seq.*, xxxix. 2 *et seq.*; Ps. xlv. 10), but it is not certain whether the stuff called רֶקֶם, often mentioned in the description of the Tabernacle, was of variegated weave or an embroidery. It is doubtful whether the Hebrews understood how to weave figured textures.

The weaving of clothing, etc., for household use was originally a task which devolved upon the housewives; it is not known when weaving was first developed as a separate trade. In later times weavers held a position of high esteem among the people (comp. Delitzsch, "Jüdisches Handwerksleben," pp. 45 *et seq.*).

**WECHSELMANN, IGNAZ:** Hungarian architect and philanthropist; born at Nikolai, Prussia Silesia, in 1828; died at Budapest Jan. 17, 1903. He was educated at Berlin, and then went to Vienna, where he became the friend and assistant of the architect Ludwig Förster. In 1856 he removed to Budapest, where he, as Förster's representative, superintended the building of the great synagogue. Most of the monumental buildings erected in the Hungarian capital between 1870 and 1890 were designed by him, his work including palaces, mills,

factories, churches, and the famous Burg-Bazar. In 1886 he received the Order of the Iron Crown of the third class, and shortly afterward Francis Joseph I. elevated him to the Hungarian nobility.

Failing eyesight compelled Wechselmann to retire from active life in 1890, whereupon he devoted his time to philanthropic activity in Budapest. His greatest act of charity was embodied in two clauses in his will, by which he bequeathed one million kronen to the Institute for the Blind, and two millions for the support of meritorious teachers in the public schools. Half of these beneficiaries were to be Jews and the other half Christians; and the board of directors of the Jewish community was entrusted with the administration of the bequests.

**WEEK** (Hebr. "shabua'"; plural "shabu'im," "shabu'ot"; Aramaic, "shabbeta," "shabba"; N. T. Greek, *σάββατον, σάββατα*): A division of time comprising seven days, thus explaining the Hebrew name. There are indications of the use of another system of reckoning time, in which the month was divided into three parts of ten days each, the decade being designated in Hebrew by the term "asor" (Gen. xxiv. 55; comp. the commentaries of Dillmann and Holzinger *ad loc.*; Ex. xii. 3; Lev. xvi. 29, xxiii. 27, xxv. 9). This apparently represented one-third of the solar month, while the week of seven days was connected with the lunar month, of which it is, approximately, a fourth. The quadripartite division of the month was evidently in use among the Hebrews and other ancient peoples; but it is not clear whether it originated among

**Connection with Lunar Phases.** It is unnecessary to assume, however, that it was derived from the Babylonians, for it is equally possible that observations of the four phases of the moon led the Hebrew

nomads spontaneously and independently to devise the system of dividing the interval between the successive new moons into four groups of seven days each. There is ground, on the other hand, for the assumption that both among the Babylonians and among the Hebrews the first day of the first week of the month was always reckoned as coincident with the first day of the month. The emphasis laid on the requirement (Lev. xxiii. 15) that the weeks of PENTECOST should be "complete" ("temimot") suggests that weeks might be reckoned in such a way as to violate this injunction. This was the case as long as the first day of the first week of the month was made to coincide with the new moon. At the end of four weeks an interval of one or two days might intervene before the new week could begin. At an early date, however, this intimate connection between the week and the moon must have been dissolved, the chief cause of the fixed week of seven days being, in all probability, the predominance of the seventh day as the Sabbath (but see Meinhold, "Sabbat und Woche im O. T." Göttingen, 1905, according to whom Sabbath, originally only the full-moon day and the week are

independent of each other). The week thus became a useful standard in the measurement of intervals of time (one week, Gen. xxix. 27 *et seq.*; two weeks, Lev. xii. 5; three weeks, Dan. x. 2; seven weeks, Dent. xvi. 9; Lev. xxiii. 15).

With the exception of the seventh day, which was called the **SABBATH**, the days of the week were designated by ordinal numerals, not by names. In post-Biblical and later Hebrew literature Friday is known as "Ereb Shabbat" (Greek, *παρασκευή* or *προσάββατον*; Judith viii. 6; Mark xv. 42; Matt. xxvii. 62; Josephus, "Ant." xvi. 6, § 2). The Biblical writings contain no trace of any custom of naming the days of the week after the seven planets; nor had this custom, found among the Babylonians

and the Sabæans, any bearing originally on the division of the week into seven days, since it was a mere numerical coincidence that seven planets were assumed in these primitive astrological conceits. In the Babylonian nomenclature the first day of the week was under the tutelage of Shamash, the sun; the second under that of Sin, the moon; the third under Nergal, Mars; the fourth under Nabu, Mercury; the fifth under Marduk (Bel), Jupiter; the sixth under Ishtar (Beltis), Venus; and the seventh under Ninib, Saturn (see, however, Schrader, "K. A. T." 3d ed., pp. 622 *et seq.*).

**WEEKS, FEAST OF.** See PENTECOST.

**WE-HIZHIR.** See MIDRASH HAGGADAH.

**WEHU RAḤUM** (וְהוּא רַחוּם = "But He, being full of compassion"): A prayer, beginning with Ps. lxxviii. 38, recited on Mondays and Thursdays before TAḤANUN. It is composed chiefly of Biblical verses, and is divided into seven parts: (1) "Wehu Raḥum"; (2) "Haṭṭeh Elo'a Ozneka"; (3) "Habbet Na"; (4) "Anna Melek"; (5) "El Raḥum we-Ḥannun"; (6) "En Kamoka"; and (7) "Ha-Poteah Yad." From the repetitions in it, it may be inferred that the prayer is the work of more than one author. It was known in its present form to the compiler of the Vitry Maḥzor, who quotes it in full; while in the Siddur of R. Amram it is given in three versions, one beginning with "Im 'Awonenu" (the seventh verse of the present form) and followed by the confession of sins (ASHAMNU; see *Tur Oraḥ Hayyim*, § 134), another commencing with "We-Attah Adonai," and the third opening with "Wehu Raḥum," but in much shortened form. In the Seder Tefillot of Maimonides (at the end of the second book of the "Yad") the prayer before "Taḥanun" is given in a very different version and is to be recited every day, not merely on Mondays and Thursdays.

According to a legend, the "Wehu Raḥum" was composed on the following occasion: After the destruction of the Temple many Jews were placed by Vespasian on three vessels and were abandoned by their captains in the open sea. Among those thus left to perish were Benjamin Yerushalmi, his brother Joseph, and their cousin Samuel. By a miracle the vessel bearing them and their companions reached Bordeaux in safety. They were kindly received

by the ruler of the country, but at his death became the object of enmity. They accordingly instituted fasts for the cessation of the persecution, and during this period they recited the "Wehu Raḥum," which had been composed by Benjamin, Joseph, and Samuel. Later, when the persecutions had ceased, the authors sent the prayer to their coreligionists of other countries.

Another legend of the origin of this prayer is given in the Vitry Maḥzor, though it fails to mention the names of the authors. A prince is said to have notified three refugees from Jerusalem that he would throw them into a burning furnace to determine whether they were Jews. At the expiration of the respite which they requested, a pious old man told them he had heard in a dream a Biblical passage containing the word כִּי twice and the word נָס thrice. One of them immediately recognized Isa. xliiii. 2, from which they inferred that they would be saved. At the command of the prince a fire was kindled in the street, but the flames, as soon as the old man entered them, divided in three directions, and the Jews passed through uninjured. In commemoration of this miracle they composed the "Wehu Raḥum," to which each of them contributed a portion.

#### WEIGHTS AND MEASURES. — Biblical

**Data:** While the references in the Old Testament are sufficient for a general knowledge of the ancient Hebrew system of weights and measures, and of the mutual relations of the several units, they are not adequate for an exact determination of the absolute standard of measurement. The rabbinical statements that a fingerbreadth equals seven barleycorns laid side by side, and that a log is equivalent to six medium-sized eggs, are as indefinite as the statement on the Siloam inscription that the Siloam canal (537.6 meters as measured by Conder) was

**Derived** 1,200 ells long—evidently a round number. Since, however, the entire system of measures corresponds almost exactly with the Babylonian, from which the

Hebrew measures were in all probability derived, it may be assumed that the Hebrew system corresponded with the Babylonian with regard to the absolute standard as well. It is true that the Egyptian system may have exerted some influence here and there, as will be shown later, but it is now generally recognized that the culture of ancient Syria, even before the Israelites had migrated there, was almost wholly under Babylonian influence.

**I. Measures of Length:** The original measures of length were derived from the human body: the finger, hand, arm, span, foot, and pace. As these measures differ with each individual, they must be reduced to a certain definite standard for general use. The Hebrew system, therefore, had such a standard: the ell ("ammah") contained 2 spans ("zeret"), while each span was made up of 3 handbreadths ("tefah") of 4 fingers ("ezba") each. This division of the ell into 6 handbreadths was the one customarily employed in antiquity, but it was supplanted in Babylonia by the sexagesimal system. The Old Testament mentions two ells of different size. Ezekiel implies that in his measurement of the Temple the ell was equal to a "cubit and a handbreadth" (xl. 5, xliii. 13)—that is, one handbreadth larger than the ell commonly used in his time. Since among all peoples the ell measured 6 handbreadths, the proportion of Ezekiel's ell to the others was as 7 to 6. The fact that Ezekiel measured the Temple by a special ell

**The Cubit.** is comprehensible and significant only on the assumption that this ell was the standard of measurement of the old Temple of Solomon as well. This is confirmed by the statement of the Chronicler that the Temple of Solomon was built according to "cubits after the first measure" (II Chron. iii. 3), implying that a larger ell was used at first, and that this was supplanted in the course of time by a smaller one.

The Egyptians in like manner used two kinds of

ells in exactly the same proportion to each other, namely, the smaller ell of 6 handbreadths and the larger "royal" ell, which was a handbreadth longer. The latter measures 525-528 millimeters, and the former 450 millimeters, estimating a handbreadth as 75 millimeters. It would seem at first sight that the Egyptian system of measurement had influenced the Hebrew, and the two Hebrew ells might naturally be considered identical with the Egyptian measures. This assumption is, however, doubtful. Since all the other measures were derived from Babylon, in all probability the ancient Hebrew ell originated there also. The length of the Babylonian ell is given on the famous statue of King Gudea (beginning of 3d millennium B.C.), found in Telloh in southern Babylonia. A scale is inscribed on this statue, according to which the ell may be reckoned at 495 millimeters, a measurement which is confirmed by certain Babylonian tablets. These measure, according to the Babylonian scale,  $\frac{2}{3}$  ell, or, according to the metric system, 330 millimeters (1 foot) on each side. The ell of 495 millimeters seems to have been used also in Phœnicia in measuring the holds of ships, but these computations can not be discussed in detail here. The length of the ancient Hebrew ell can not be determined exactly with the data now controlled by science; but it was either 525 or 495 millimeters, and this slight difference between the two figures is scarcely appreciable in an estimate of the size of Hebrew edifices, etc.

**II. Measures of Capacity:** The Hebrew system here corresponds exactly with the Babylonian. In contradistinction to the Egyptian metrology, which shows the regular geometric progression—1, 10, 20, 40, 80, 160—the Hebrew and the Babylonian systems are based on the sexagesimal system. The unit of the Babylonian system was the "maris," a quantity of water equal in weight to a light royal talent. It contained, therefore, about 30.3 liters. The maris was divided into 60 parts, probably called "minæ" (= .505 liter). All the other measures are multiples of this mina: 12, 24, 60, 72 (60 + 12), 120, 720 minæ.

In the Hebrew system the log (Lev. xiv. 10) corresponds to the mina. Since the Hellenistic writers equate the log with the Græco-Roman sextarius,

whatever these writers say on the relation of the sextarius to other measures applies also to the relation of these measures to the log. The log and the sextarius, however, are not equal in capacity. The sextarius is estimated at .547 liter, while there is no reason to regard the log as larger than the Babylonian mina, especially as other references of the Greek metrologists support the assumption that the log was equal to the mina. The fact that in the Old Testament the log is mentioned only as a fluid measure may be merely accidental, for the dry measures, which are distinguished in all other cases from the liquid measures, also have the log as their unit. The corresponding dry measure may, however, have been known under a different name. The same possibility must be borne in mind in the case of the cab, the next larger measure, containing four logs and mentioned only as a dry measure. A differentiation of the dry and liquid measures gives two simple systems, as follows:

## DRY MEASURES.

1 homer = 10 ephahs = 30 se'aim = 180 cabs = 720 logs = 364.4 lit. (cor)	1 ephah = 3 se'aim = 18 cabs = 72 logs = 36.44 lit.	1 se'ah = 6 cabs = 24 logs = 12.148 lit.	1 cab = 4 logs = 2.024 lit.	1 log = 0.506 lit.
--	---	--	-----------------------------	--------------------

## LIQUID MEASURES.

1 cor = 10 baths = 60 hins = 180 cabs = 720 logs = 364.4 lit.	1 bath = 6 hins = 18 cabs = 72 logs = 36.44 lit.	1 hin = 3 cabs = 12 logs = 6.074 lit.	1 cab = 4 logs = 2.024 lit.	1 log = 0.506 lit.
---	--	---------------------------------------	-----------------------------	--------------------

In these tables that homer has been omitted which is, according to Ex. xvi. 36, one-tenth of an ephah, and which is, therefore, identical with the "issaron" (Num. xxviii. 5 *et al.*). The tenth part of a bath, for fluids, which is mentioned in Ezek. xlv. 14 without a special name, corresponds in content to the homer, or "issaron, among the dry measures. The homer and its liquid equivalent do not belong to the original system, as may be seen by the proportion the homer bears to the other measures:  $3\frac{1}{3}$  homers = 1 se'ah,  $1\frac{1}{3}$  homers = 1 hin, 1 homer =  $1\frac{1}{3}$  cabs =  $7\frac{1}{3}$  logs. The

Babylonian Weight in the Form of a Lion with Inscription מנה מלך (= "royal maneh").

(From Madden, "History of Jewish Coinage.")

tenth part of a bath is, furthermore, mentioned only in Ezekiel and in the Priestly Code. The old division of the ephah and the bath was into three parts; Ezekiel mentions also the sixth part of an ephah. At a later period the se'ah and the cab disappear as dry measures, so that the Priestly Code refers simply to the tenth part of the ephah. This new division into tenths may be connected with the appearance of the decimal system, which can be traced elsewhere, especially in weights and coins.

Only one measure in addition to those enumerated above is mentioned in the Old Testament. This is the "letek," which occurs but once (Hosea iii. 2). It is a dry measure, and is uniformly designated in tradition as equal to  $\frac{1}{3}$  homer, although it is doubtful whether a definite measure is implied by this term. The Septuagint translates "letek" in its single occurrence as *πέλεκθον* = "a skin of wine."

**III. Measures of Weight:** It is evident from inscriptions that the Babylonian system of weight was used in Syria and Palestine even before the entrance of the Israelites into the country. The Egyptian inscription of Karnak records the tribute which the kings of Egypt exacted from their Syrian vassals. Although the sums are given according to Egyptian weight, the odd numbers clearly indicate that the figures were computed originally by some

other system, which may easily be shown to have been the Babylonian.

The Babylonians reckoned weight in talents, minæ, and shekels. Layard found in the ruins of Nineveh several Babylonian units of weight, some in the form of a crouching lion and others in that of a duck, the former being twice as heavy as the latter. This proves that a heavy and

**The Mina.** a light talent were used in Babylon, the latter one-half the weight of the former. A heavy talent = 60,600 grams; 1 mina ( $\frac{1}{60}$  talent) = 1,010 grams; 1 shekel = 16.83 grams; 1 light talent = 30,300 grams; 1 light mina = 505 grams; 1 light shekel = 8.41 grams. There was, in addition to this "royal" weight, another "common" weight which was somewhat lighter (compare the large "royal" ell and the "common" ell, mentioned above). According to this common weight the heavy talent weighed 58,944 grams; its mina 982.4 grams; its shekel 16.37 grams; and the light talent, mina, and shekel just one-half as much. The common heavy talent and its subdivisions were the weights current in Syria and Palestine, as Josephus expressly states ("Ant." xiv. 106, ed. Niese). According to him, 1 Jewish mina (of 50 shekels) was equal to  $2\frac{1}{2}$  Roman pounds, or 818.62 grams; hence 1 shekel was equivalent to 16.37 grams, and 1 old mina of 60 shekels to 982.2 grams. There were also the half-shekel or beka ("beka").

In the course of time the sexagesimal system was superseded in Babylonia also, perhaps under Egyptian influence. The mina of 60 shekels was replaced throughout Asia Minor by the mina of 50 shekels. The shekel remained the same, forming the unit of weight, while the mina and talent were reduced, containing respectively 50 shekels = 818.6 grams and 3,000 shekels = 49,110 grams.

The period of these changes is unknown. In the Old Testament the first reference occurs in Ezekiel; if the Septuagint is correct in its translation of Ezek. xlv. 12, that passage reads, "You shall count the manhe [mina] as fifty shekels." There is other evidence in Ex. xxxviii. 25 (Priestly Code), where the tax levied upon 603,550 men at  $\frac{1}{2}$  shekel each was computed to be 100 talents and 1,775 shekels, whence 1 talent equaled 3,000 shekels, and 1 mina was equivalent to 850 shekels. These measures were further changed in the currency, which was also reckoned in talents, minas, and shekels. In Jewish silver 1 shekel = 14.55 grams, 1 mina = 50 shekels = 727.5 grams, 1 talent = 3,000 shekels = 43,000 grams.

**Money.** 659 grams. What bearing this change

—which was confined to silver—had upon the relative values of gold and silver, and how far it was conditioned by the demands of exchange day by day, can not be discussed in detail here (comp. Benzinger, "Arch." pp. 192 *et seq.*). With this silver shekel the shekel of weight must not be confounded. In the Pentateuch the heavy shekel of weight is called, in contradistinction to the silver shekel, the "holy shekel, the shekel of 20 gerahs" (Ex. xxx. 13; Lev. xxvii. 25; Num. iii. 47). This refers to the tax payable to the Sanctuary, which, it is expressly stated, must not be paid in silver shekels, but according to weight, conforming with ancient custom.

The division of the shekel into 20 gerahs is mentioned only in the passages just quoted and in Ezek. xlv. 12 (LXX.). Otherwise the Old Testament refers only to quarters and halves of shekels. See MONEY; NUMISMATICS.

I. BE.

—**In Rabbinical Literature:** The weights and measures of Talmudic literature are a combination of those of the ancient Hebrew system with foreign elements; and it was especially Greek and Roman metrology which became current among the Jews in the post-Biblical period. These two elements, the domestic and the foreign, were, however,

so intimately fused that it is often

**Domestic** difficult to distinguish between them.

**and** In the course of time the Biblical

**Foreign** weights and measures underwent various changes which are recorded in the

**Elements.** Talmud, where an endeavor is made to determine the original values. The Talmudic system of metrology is especially important since it affords an evaluation of the Biblical units. Talmudic sources deduce the value of Biblical weights and measures by comparing them with those which were current in the period of the Talmud, and the units of this system may often be determined by a comparison with their Greek and Roman equivalents. Talmudic metrology is therefore of importance for the history of civilization, since it bears upon conditions prevailing among the classic peoples of ancient times. The weights and measures mentioned in Talmudic sources are as follows:

**Gerah** (גרה) or **Ma'ah** (מאה): In the Talmud the gerah is mentioned as a unit of weight only with reference to the Bible. Raba makes it the equivalent of a ma'ah, and names as an authority for this equation Onkelos, the translator of the Pentateuch, who rendered the term "twenty gerahs" (Ex. xxx. 13) by "twenty ma'ot" (Bek. 50a). This ma'ah must be the Tyrian obol or ma'ah; for Bek. 50a says: "Six silver ma'ot are equal to a denarius." Inasmuch as four denarii are equivalent to one sela', it follows that twenty-four

**Units of** ma'ot are also equal to one sela'; and

**Weight.** this equation was used for the Tyrian sela' (comp. Boeckh, "Metrologische

Untersuchungen über Gewichte, Münzfüsse, und Maasse des Alterthums in Ihrem Zusammenhange," p. 59, Berlin, 1838). The Talmud does not indicate the actual weight of the ma'ah, but from Tyrian silver coins still extant its value may be determined. The heaviest Tyrian silver coin in existence weighs 14.34 grams, and  $\frac{1}{24}$  of this, or 0.5975 gram, is therefore the weight of a ma'ah. This deduction has been based upon the weight of the heaviest Tyrian silver coin because in those that are lighter the loss in weight is evidently due to handling and use.

**Shekel** (שקל); Greek, *σίκλος*, *σίγλος*): This is the next highest unit of weight. The Bible designates

the value of the shekel as "twenty gerahs" (Ex. xxx. 13); whence, according to the weight already given for the gerah or ma'ah, the shekel should weigh  $20 \times 0.5975$  gram, or 11.95 grams. The Jerusalem Talmud, however (Shek. 46d), mentions another weight for the shekel, stating that half a shekel is equal to six גרמסין, and the same value is given in Tan., Ki Tissa, ed. Buber, p. 55a. The term גרמס designates a scruple (*γραμμάριον*), which is equal to  $\frac{1}{24}$  ounce (comp. Mussafia, "Musaf he-'Aruk," s. v. גרמס). Inasmuch as the Roman pound contains twelve ounces, a half-shekel becomes the equivalent of  $\frac{1}{48}$  Roman pound, and a whole shekel =  $\frac{1}{24}$ . According to Boeckh, the Roman pound weighed 327.434 grams, and a shekel would accordingly weigh 13.643 grams. In another passage of the Talmud the weight of a shekel is given as 14.34 grams, or the equivalent of the Tyrian silver coin already mentioned. The Talmud states that the silver coin recorded in the Pentateuch was identical with the Tyrian mintage (Bek. 50b); and the Tosefta likewise declares that the silver coin of Jerusalem was identical with that of Tyre (Tosef., Ket. xiii. 3). A shekel was therefore identical with the Tyrian sela' (Rashi on Bek. l. c.), and its weight was accordingly 14.34 grams. The difference between the weight given by the Jerusalem Talmud (13.643 grams) and that deduced by identifying the shekel with the Tyrian sela' (14.34 grams) amounts to 0.7 gram only; and it may be explained by assuming that the statement in the Jerusalem Talmud, which makes a half-shekel equal to six גרמסין, is only approximate. On the other hand, the difference between the weight of the shekel given in the Bible (11.95 grams), and that of the Tyrian sela' of 14.34 grams, with which the Biblical shekel is identified in the Mishnah (Bek. viii. 7) and the Babylonian Talmud (*ib.* 50a), as well as in Yerushalmi (Kid. 59d), is too large to be attributed to inaccuracy in reckoning. The divergence finds its explanation, however, in the Talmudic statement that the shekel was enlarged, the Biblical shekel being originally equivalent to  $3\frac{1}{2}$  denarii, and being later increased one-fifth, thus becoming equal to four denarii, so that, instead of its original value of twenty gerahs, it later became equivalent to twenty-four. The Biblical shekel weighed 11.95 grams, and the addition of one-fifth (2.39 grams) gives 14.34 grams as the weight of the later coin, which then became equal to the Tyrian sela'. In addition to this shekel, which was called "the shekel of the sanctuary," and which was equal to a sela', the Mishnah (Ned. iii. 1) and the Talmud (B. M. 52a) mention another shekel, which was the equivalent of half a sela', or half a "shekel of the sanctuary," and which was probably called the common shekel. This indicates that the value of the shekel varied at different times (on the reasons for these changes and the periods at which they took place see Frankel in "Monatsschrift," 1855, pp. 158 et seq.; Zuckermann, "Ueber Talmudische Gewichte und Münzen," p. 13).

**Maneh** or **Mina** (מנה); Greek, *μνᾶ*): In the Mishnah, as well as in the Talmud, the mina is often mentioned as a unit of weight for figs, spices, wool, meat, and the like (Ket. v. 8; 'Eduy. iii. 3; Hul. 137b; Ker. 6a; et passim). In the Mishnah it is some-

times called **מנה איטלקי** or "Italian mina" (Sheb. i. 2, 3), the designation "Italki" helping to determine its weight. The Italian mina contained 100 denarii, while the Roman pound contained only ninety-six. A mina was therefore equivalent to  $1\frac{1}{4}$  Roman pounds, and since the Roman pound equaled 327.434 grams, the Italian maneh was equal to 341.077 grams, the weight assigned it in the Talmud. From a passage in Ber. 5a it appears that a mina equaled twenty-five shekels; and since, according to the passage already cited from the Jerusalem Talmud (Shek. 46d), a shekel was equal to twelve scruples, a mina was equivalent to  $25 \times 12$ , or 300 scruples. The Roman pound contained only 288 scruples, and the mina was therefore equal to  $1\frac{1}{4}$  Roman pounds. Besides this mina of twenty-five shekels, the Talmud (Hul. 137b-138a) mentions another, which was equal to forty shekels or sela'im.

**Liṭra** (לִיטְרָא; Greek, λίτρα): The liṭra, which originally corresponded to the Italian "libra," is mentioned in the Mishnah (Shebu. vi. 3; Bek. v. 1; Tem. iii. 5) and in the Talmud ('Er. 29a; Ket. 67b; *et passim*) as a unit of weight for figs, vegetables, meat, fish, gold, and silver. The Jerusalem Talmud (Ter. 47b) defines the liṭra as equal to 100 zinin, the zin (זין) being the same as the zuz (זוז), since the Mishnah (Ter. x. 8) uses the term "zuz" in the passage parallel to that in which the Tosefta (Ter. ix.) employs the word "zin." A liṭra was therefore equal to 100 zuzim. From this it follows that a liṭra was equivalent to a mina, since the Talmud also calls a denarius a zuz, which makes a liṭra = 100 zuzim = 100 denarii. As has been stated above, a mina equaled twenty-five shekels, and a shekel was equivalent to four denarii, thus making the mina = 100 denarii = 1 liṭra. In addition to the whole liṭra, pieces of weight of the value of a half, third, and quarter of a liṭra are also mentioned (Tosef., Kelim, B. M. ii.; B. B. 89a; Sifre, Deut. 294 [ed. Friedmann, p. 126b]).

**Kikkar** (כִּכָּר): The term "kikkar," generally rendered "talent" (Greek, *τάλαντον*), usually denotes in Talmudic sources a weight for gold and silver (Suk. 51b; 'Ab. Zarah 44a *et passim*). It is evident from the Talmud (Bek. 5a) that a kikkar contained sixty minæ. In the Jerusalem Talmud (Sanh. 19d) the value of the kikkar is given as sixty liṭras, which is the equivalent of sixty minæ; and the same passage refers to a kikkar as being equal to 100 minæ, although this statement must allude to the Attic mina, which was equal to  $\frac{2}{3}$  Hebrew mina, rather than to the Hebrew weight itself.

**Other Weights:** Smaller weights also are indicated by coins, as, for example, the **denarius** (Tosef., Men. xii.; Shab. ix.) and the **zuz** (Shab. 110a). In the Jerusalem Talmud (Ta'an. 68a), as well as in Gen. R. (lxxix. 9) and other midrashic passages, the **ounce** (אונקיא) occurs. In the Mishnah (Sanh. viii. 2) mention is likewise made of the **tartimar** (תַּרְטִימָר), which, according to the Talmud (Sanh. 70a), was equivalent to half a mina. The term is a corruption of the Greek *τριτημόριον* (= "one-third"), and probably indicated  $\frac{1}{3}$  Alexandrian mina, which contained 150 denarii (comp. Boeckh, *l.c.* pp. 155 *et seq.*). One-third of this mina, or fifty denarii, was equal to half of the Hebrew mina, which

contained only 100 denarii (comp. Zuckermann, *l.c.* p. 8). A minute unit of weight, designated as one-sixteenth of a weight in Pumbedita, is also mentioned in the Talmud (Shab. 79a; Giṭ. 22a; B. M. 105b). Another small weight, the **riṭel** (רִיטֵל), is mentioned in the Jerusalem Talmud (Yoma 41d). This was probably a small copper coin which derived its name from the red color (Latin, "rutilus") of the metal of which it was composed.

It must be borne in mind that the values of the weights often varied in different parts of the country. The Mishnah (Ter. x. 8; Ket. v. 9; etc.) accordingly states that the weights used in Judea had but half the value they possessed in Galilee, so that ten Judean sela'im were equal to five Galilean; and the same assertion is made by Sifre, Deut. 166, and by the Talmud (Hul. 137b; comp. Zuckermann, *l.c.* pp. 11-12).

**Ezba'** (אֵצְבָּא = "fingerbreadth"): The smallest measure of length; it is mentioned as a unit even in the Biblical period (Jer. lii. 21; see WEIGHTS AND MEASURES, BIBLICAL DATA). The Mishnah often alludes to the ezba' as a measure (Kil.

**Measures of Length.** vii. 1; Yoma v. 2; Men. xi. 4; Oh. iv. 3; Miḳ. vi. 7), although no value is assigned it. Its length may, however, be deduced from a Talmudic passage; and Zuckermann has found by calculation that the Talmudic ezba' was equal to 2.33411 cm. In the Talmud the term "ezba'" refers to the thumb as well as to the middle and little fingers. The Talmud therefore draws a distinction between the breadth of the thumb and that of the middle and little fingers, by stating (Men. 41b): "The handbreadth ["tefaḥ"] mentioned in the Talmud is equal to four thumbbreadths, or six little-finger breadths, or five middle-finger breadths." The size of an ezba' as given above (2.33411 cm.) refers to the breadth of a thumb. From the proportionate dimensions of the thumb, middle finger, and little finger, according to the Talmudic passage already cited, the breadth of the middle finger would be 1.867288 cm., and that of the little finger 1.556 cm.

**Tefaḥ** (= "handbreadth"): The measure next in size to the ezba'; it was used as a measure of length in the Bible. The size of the handbreadth is described in the Talmud (Bek. 39b) as equal to four thumbbreadths; and in the passage previously quoted (Men. 41b) this statement is amplified by making it the equivalent of four thumbbreadths, or six little-finger breadths, or five middle-finger breadths. From this proportion of the tefaḥ to the breadth of the fingers, its size, according to the measurements given above, appears to have been 9.336443 cm. In addition to the normal handbreadth the Talmud mentions two others (Suk. 7a): one formed by holding the fingers loosely ("tefaḥ soḥeḳ"), and the other produced by pressing the fingers firmly together ("tefaḥ 'azeb"), although the divergence between these handbreadths and the normal is not determined.

**Ell:** In addition to the Mosaic ell, which was equal to the mean ell ("ammat benonit") and consisted of six handbreadths (comp. Zuckermann, *l.c.* p. 17), the Mishnah (Kelim xvii. 9) mentions two others, one of which was half a fingerbreadth and

the other a whole fingerbreadth longer than the mean ell. The standards used for measuring both these ells were said to have been kept in a special place in the Second Temple. The Talmud explains the introduction of these two ells in addition to the mean or Mosaic ell (see Pes. 86a; Men. 98a), and mentions also an ell which contained only five handbreadths ('Er. 3b). The mean ell, equivalent to six handbreadths, was, according to the measurement of the handbreadth given above, equal to 56.018658 cm. The ell which was half a fingerbreadth longer was, therefore, 57.185375 cm. in length, and that which was a whole fingerbreadth longer was 58.352 cm. The Mishnah (Tamid iii. 6) mentions still another ell, called *אמת ישרי*, which was measured from the tip of the middle finger to the armpit. Inasmuch as the ell which measured six handbreadths was equal to the length of the forearm, and the length of the latter is to the arm as 6 is to 10, it follows that the "ammah shehi" measured ten handbreadths, or 93.86443 cm. In the Midrash (Gen. R. xxxvii.) an ell is mentioned under the name *תביקין אמה*, by which the Theban ell (*θηβαικόν*) is probably meant. For another meaning of the term *תביקין* see Zuckermann, *l.c.* p. 21.

**Garmida** (גַּרְמִידָא): Repeatedly mentioned in the Talmud (Shab. 110a; 'Er. 50b; Pes. 111b; *et passim*), without any indication of its size. It is noteworthy, however, that the Talmud (B. B. 27a) uses this term to indicate a square ell, without designating it as a square measure, while in 'Er. 14b "garmida" indicates a cubic ell, although the customary term denoting "cubic" is omitted.

**Zeret** (זֶרֶת = "span"): This measure, mentioned in the Bible (Ex. xxviii. 16) without any indication of its size, is described in the Tosefta (Kelim, B. M. vi. 12) as "half an ell of six handbreadths." Its measure was, accordingly, 28.009329 cm.

**Hasit** (הַסִּיט, רוֹחַב הַסִּיט = "content and width of the hasit"): This term occurs as a measure of length in the Mishnah ('Orlah iii. 2, 3; Shab. xiii. 4), in the Tosefta (Shab. ix.), and in the Talmud (Shab. 79a, 106a), without any indication of its size and without being compared with any other measure. According to Maimonides ("Yad," Shabbat, ix. 7-10), the breadth of the hasit equals the opening between the thumb and the index-finger, which is about the equivalent of  $\frac{2}{3}$  zeret, or two handbreadths. This appears to be correct, since a Greek measure called "dichas" (*διχάς*) equaled two handbreadths, and was called two-thirds of a span. The hasit was identical with this dichas (comp. Zuckermann, *l.c.* p. 24), and its size was accordingly 18.672886 cm.

**Hebel** (הַבֵּל = "cord"): A measure described in the Mishnah ('Er. v. 4) as a cord of fifty ells in length, and in the Talmud ('Er. 58b) as one of four ells.

**Tehum Shabbat** (תְּחוּם שַׁבָּת = "Sabbath-way"): The extreme distance which a Jew might go in any one direction from his home on the Sabbath. It is defined in the Mishnah ('Er. iv. 3) and in the Talmud ('Er. 51a) as 2,000 Hebrew ells, and it was therefore equal to 112,037.316 cm. This was also the length of the mile (*מיל*), with which the Mishnah (Yoma vi. 18) and both Talmudim (Pes. 93b, 94a;

Yer. Yoma 40b) indicated distances. In the Talmud (Yoma 67a) it is explicitly stated that the mile is equal to the *tehum Shabbat*; the Hebrew mile was therefore shorter than the Roman, with which it must not be confused.

**Pesi'ah** (פְּסִיעָה = "pace"): The pace is used as a measure of length in the Talmud ('Er. 42b), and its value is defined as one ell (56.018658 cm.).

**Ris** (רִיס = "stadium"): The Mishnah uses the term "ris" to indicate distance, and defines its length as  $\frac{1}{15}$  mile. The Talmud (B. M. 33a) also states that its length was  $\frac{2}{5}$  mile, or 266 $\frac{2}{3}$  ells. According to Frankel (in "Monatsschrift," 1856, p. 383), the term "ris" is Persian, as is also the term פְּרִסָּה ("parasang"), used in the Talmud as a measure of length (comp. Tos. B. B. 23a, *s.v.* אֵלָא), and defined as equal to four miles, or 8,000 ells (Pes. 93b-94a).

**Day's Journey** (יוֹם יָרֵךְ): The Talmud defines a day's journey for a man of medium gait as ten parasangs, or 80,000 ells.

Measurements of fields are generally indicated in the Talmud by the amount of seed sown in them. The term *בית סאה*, for example, indicates a field in which one se'ah can be sown; the term

**Superficial Measures**. *סאהים* *בית סאהים*, one which requires two se'aim. The latter space is defined in the Talmud ('Er. 23b) as equal to 5,000 Hebrew square ells, or to 15,690,445.095 sq. cm., and this can be used as a basis for the determination of other superficial measures given in the Talmud.

The Talmud mentions separate systems of solid measures for dry and for liquid substances, although some units were used for both. The Mishnah states that the measures were enlarged at some time or other. In addition to the Biblical measure, which is called "desert measure" (*מדה מדברית*) in Talmudic sources, the Mishnah (Men. vii.

**Solid Measures**. 1) mentions a "Jerusalem measure" (*מדה ירושלמית*), which was equal to  $1\frac{1}{2}$  "desert measures," and also alludes ('Er. 82a) to a "Sepphoric measure" (*מדה צפורה*), which was equal to  $1\frac{1}{2}$  "Jerusalem measures." One se'ah "desert measure" was therefore equal to  $\frac{3}{2}$  se'ah "Sepphoric measure," and one se'ah "Jerusalem measure" equaled  $\frac{3}{2}$  se'ah "Sepphoric measure." With regard to the names of the units, it must be noted that the hollow vessels used as measures also served as ordinary utensils; and the name of the vessel likewise designated the measure. The Biblical *log* is defined by the Talmud (Pes. 109a) as equal to the *קסתא* (= Greek *ξίστης*), and was therefore equivalent to 549.338184 cu. cm. (comp. Zuckermann, *l.c.* pp. 6-10); this aids in the evaluation of several other Talmudic measures.

**Bezah** (בֵּיצָה = "egg"): The egg is often used in the Talmud as a standard of measurement; and in the Mishnah (Kelim xvii. 6) a method is given by which to determine its size. The Jerusalem Talmud (Ter. 43c) defines the egg as equal to  $\frac{1}{2}$  cab; and the same value may be deduced from the Babylonian Talmud ('Er. 83a), where a se'ah is described as the equivalent of six cabs, or 144 eggs. Inasmuch as a cab was equal to four logs, it follows that an egg equaled  $\frac{1}{6}$  log, or 91.565223 cu. cm. The expression *שוחקות ביצים* ("laughing eggs") occurs

as a term for eggs of larger size ('Er. 83a), although the difference between these and ordinary eggs is not stated.

**Cab** (קב): Greek, *χάβος*): The cab is often mentioned as a measure in Talmudic sources (Kil. ii. 1; Ket. v. 8; Naz. 52b; Soṭah 8b *et passim*), and its halves, quarters, and eighths are frequently recorded (comp. RaSHBaM on B. B. 89b, *s. v.* תומן). The size of the cab is given in the Jerusalem Talmud (Ter. 47b), where it is said that a se'ah is equal to twenty-four logs. Since a se'ah is equal to six cabs, a cab is equivalent to four logs, or 2,197.406683 cu. cm. The Talmud (Pes. 48a) records also a large cab, containing  $1\frac{1}{2}$  "Sephoric cabs," and a "Nehardean cab" is likewise mentioned (Ket. 54a), although no indication of its size is given. The expression "terkab" (תרקב; Greek, *τρικαβος* = "three cabs") also occurs frequently in the Talmud (Hag. 23b; Ta'an. 10a; Giṭ. 30a; *et passim*).

**Ḳapiza** (קפיזא): A small vessel often used as a measure and mentioned in several Talmudic passages (Shab. 10b; Pes. 48b; Giṭ. 70a; *et passim*). That the ḳapiza was smaller than the cab is clear both from Hul. 25a and from Shab. 103a, as well as from the discussion in B. B. 90b. The commentaries disagree as to its size, one defining it as a quarter, and another as three-quarters, of a cab, while in one passage in Menahot (78a) Rashi makes it equivalent to  $\frac{1}{2}$  cab. In that case it would be identical with the Persian "kawiz" (Greek, *καπιθω*), which was equal to a choenix = 2 xestes = 2 logs =  $\frac{1}{2}$  cab. The Talmud relates that a new measure which contained three ḳapizot was introduced by R. Papa b. Samuel into Pafonya, where it was called רון פפא ("Papa's secret"; B. B. 90b).

**Se'ah** (סאה; Greek, *σάτον*): The Biblical se'ah recurs as a measure in the Mishnah, from which it appears (Parah i. 1; Ter. iv. 7; Men. vii. 1) that it was equal to six cabs, or 13,184.44 cu. cm. Another se'ah, which was used in Arhela and called an "Arbalian se'ah" (סאה ארבליית), is mentioned in the Jerusalem Talmud (Pe'ah 20a; Soṭah 17b), although no comparison is drawn between it and the ordinary se'ah.

**Modius** (מוריא): A measure mentioned in the Talmud, although its value is not designated (Giṭ. 57a; Yer. Shab. 13c; Pes. 30a). In one passage, however ('Er. 83a), the term is taken as a synonym of "se'ah" (comp. Zuckermann, *l. c.* pp. 40-41).

**Tuman** (תומן = "an eighth"): In the Talmud as a dry measure (B. B. 89b), its value being defined as one-eighth of a cab.

**'Ukla** (עוכלא): A dry measure mentioned in the Talmud, its value being given by RaSHBaM as  $\frac{1}{2}$  cab =  $\frac{1}{2}$  log. According to another interpretation, the 'ukla was equal to  $\frac{1}{3}$  cab, or  $\frac{1}{3}$  log, as stated by Rashi ('Er. 29a, *s. v.* "'Ukla"). The first interpretation, however, is the correct one; and an 'ukla was therefore equal to  $\frac{1}{3}$  log = 109.8743 cu. cm. (comp. Zuckermann, *l. c.* p. 42).

**Ephah** (אפה): The Biblical ephah is mentioned in the Mishnah (Men. vii. 1), where its value is defined as three se'aim.

**Cor** (בור): The Biblical cor is defined in the Talmud (B. B. 86b, 105a; comp. Men. 77a) as equal to thirty se'aim.

**Letek** (לתך): Although the letek is mentioned in the Bible as a measure, no value is assigned it. From examples given in the Mishnah (Sheb. vi. 3) and in the Talmud (Sheb. 43a; B. M. 80a, b), however, it appears that it was equal to  $\frac{1}{2}$  cor = 15 se'aim (comp. Hos. iii. 2 in the Greek versions).

**Pesikta** (פסקתר; Greek, *ψικτήρη*): A measure mentioned in the Mishnah (Tamid v. 5) as the equivalent of a letek.

**Ardaba** (ארדב, אררב): Among its measures the Talmud alludes to the אררב, which is the אררב of the Shulḥan 'Aruk, and consequently the ardaba used by the Egyptians and Persians (or Medes). The context in the Talmudic passage (B. M. 80b) does not show which ardaba was equivalent to the אררב there mentioned, but it is at least clear that the latter was not the ancient Egyptian measure (comp. Zuckermann, *l. c.* pp. 46-47).

**Komez** (קמיץ) or **Kuna** (כונה): In the Talmud the handful is often mentioned as a measure, especially for medical purposes. The term varies, however, in the different passages. In Shab. 110b, 'Er. 29b, and Giṭ. 69b-70a it is called "buna," but in Giṭ. 69a, Ket. 99b, and 'Ar. 21b, "kuna." The hollow form of the hand was called "kuna," from כן (= "basin"), and this term designated the quantity which one could hold in the palm of his hand. The komez mentioned in the Bible (Lev. ii. 2, v. 12) connotes, according to the Talmud, the quantity one can grasp between the palm of the hand and the three middle fingers.

**Geriwa** (גריוא): A weight frequently mentioned in the Talmud as a measure for solids ('Er. 29b; Pes. 32a; Ned. 50b; B. K. 96a; *et passim*), but without any indication of its value. A single passage, however ('Er. 14b), states that 2,000 batbs, which were equal to 6,000 se'aim, were equivalent to 6,000 geriwo. It would follow, therefore, that a geriwa was identical with a se'ah.

**Gerib** (גריב): This measure, which in name resembles the geriwa, is mentioned in the Talmud (Giṭ. 69b) as a measure for solids (comp. Rashi *ad loc.*, where he identifies it with the geriwa). A cask or a jar serving as a large measure for fluids also was called "gerib" (Shab. 13b), and the Mishnah (Ter. x. 8) mentions a גרב ("garab") containing two se'aim.

Besides the log, the Talmud mentions also half-logs and quarter-logs, as well as eighths, sixteenths, and sixty-fourths of a log. The quarter-log was often called simply "quarter" ("rebi'it"; comp. RaSHBaM on B. B. 89b), and was like-

**Liquid Measures.** (τέταρτον; Yer. Pes. 37c, where "tetarton" or "rebia'" must be understood; comp. Zuckermann, *l. c.* pp. 48-49).

**Anṭel** (אנטל; Greek, *ἀντηλής*): A measure frequently mentioned in the Talmud as containing  $\frac{1}{2}$  log (B. B. 58b). Hul. 107a alludes to a "naṭla" (= anṭel), which had the same capacity. "Anṭel" is the name of a utensil, which was also used as a measure.

**Ambiga** (אמפא, אמבא, or ננבא): In the Talmud the anpaḳ and anbag are compared with the anṭel (B. B. 58b), whence it may be inferred that, like it, they were equivalent to  $\frac{1}{2}$  log.

**Tamnitā** (תמניתא = "eighth"): In the Talmud (Pes. 109a) R. Johanan mentions the old "eighth" of Tiberias, which was about  $\frac{1}{4}$  log larger than the new "eighth"; and the Jerusalem Talmud (Pes. 37c) likewise alludes to an old "eighth" of Sephoris, which was equal to half the "eighth" of Tiberias.

**Ḳorṭab** (קורטב): A small measure mentioned in the Mishnah and in the Talmud (Men. xii. 4; Miḳ. iii. 1; R. H. 13a; B. B. 90a), its capacity being defined as  $\frac{1}{12}$  log (Tosef., B. B. v. 10).

**Kuṭit** (קוטית) and **Zir** (זיר): In the Sifra, *Ḳidushin*, a large measure is mentioned under the name of זיר, while a smaller one is designated as קוטית. The Romans had a large oblong cask, called "seria," which they used for wine and oil; while a small tub for the same purpose was termed "guttus." Both these vessels are mentioned in the Sifra as equivalents of the Biblical "mesurah."

**Kaṣa** (קייסא): A measure mentioned in the Talmud (Ber. 44b), though without any indication of its value. According to Rashi *ad loc.*, it was the equivalent of a log.

**Hemina** (המינא; Greek, *ῥήμινα*): A measure mentioned in Targum Sheṇi to Esther i. 8. It was probably identical with the Roman "termina," which was used for both liquids and solids (comp. Boeckh, *l.c.* pp. 201, 203).

**Meṭarta** (מטררתא; Greek, *μετρητής*): A measure mentioned in the Talmud ('Ab. Zarah 10b), and corresponding to the Attic metretes = 72 xestes. Although the metretes is a liquid measure, the meṭarta is mentioned in the Talmud (*l.c.*) as being used for dry substances, no strict distinction being drawn between dry and liquid measures.

**Barzina** (ברזינא): Mentioned in the Talmud (Shab. 109b) as a small measure, no value being indicated. The Shulḥan 'Aruk (*s.v.*) regards it as equal to  $\frac{1}{12}$  log.

**Kuza** (כוזא; Greek, *χοῦς*): A measure mentioned both in the Mishnah (Tamid iii. 6) and in the Talmud (Shab. 33b; B. M. 40a; B. B. 96b), and probably equal to the Attic *χοῦς*. The Talmud records another kuza, which was introduced by R. Ashi in Huza, and was equivalent to  $\frac{1}{4}$  log (Hul. 107a). There were accordingly two kuzot, one the equivalent of the *χοῦς* = 6 xestes = 3,296.11 cu. cm., and the other equal to  $\frac{1}{4}$  log =  $\frac{1}{4}$  xestes = 137.337917 cu. cm.

**Ḳesustaban** (קסוסטבן; Greek, *ξέσσιον*): A measure mentioned in the Jerusalem Talmud (B. M. 10c), the context indicating that it was of small size. Its name is probably a diminutive of *ξέσσιος*.

**Tarwad** (תרוד): A measure mentioned several times in the Talmud, its size being indicated in Naz. 50b. According to one opinion it was the equivalent of a heaping handful, while according to another it equaled an ordinary handful.

**Shorgash** (שרגש): A measure mentioned in the Talmud ('Er. 29b). According to the 'Aruk it was well known in Pumbedita.

**Kizba** (כיזבא): A measure mentioned in the Talmud (Men. 69b), and, according to Rashi (*ad loc.*) and the Shulḥan 'Aruk (*s.v.*), equal to a handbreadth.

In addition to the units enumerated in this article, the Talmud employs several indefinite measures, such as the sizes of various fruits (olives, pomegranates, and the like), to indicate certain quantities.

The foregoing tables sum up the results reached in the present investigation.

J. Z. L.

**WEIL, ADOLF:** German physician; born at Heidelberg Feb. 7, 1848. Educated at the universities of Heidelberg, Berlin, and Vienna (M. D. 1871), he settled in Heidelberg, where, in 1872, he became privat-docent in special pathology and therapy, and in 1876 assistant professor of syphilology. In 1886 he was called to Dorpat as professor of special pathology and therapy, from which position he resigned the following year on account of sickness. Since 1893 he has practised in Wiesbaden.

In 1886 he published in "Dorpater Archiv für Klinische Medizin," vol. xxxix., the essay "Ueber eine Eigenthümliche mit Milztumor, Icterus und Nephritis Einhergehende Acute Infectiouskrankheit," treating of a disease which has since become known as Weil's disease.

Among his works the following may be mentioned: "Die Auscultation der Arterien und Venen" (Leipsic, 1875); "Handbuch und Atlas der Topographischen Percussion" (*ib.* 1877, 2d ed. 1880); "Zur Lehre vom Pneumothorax" (*ib.* 1882); "Zur Pathologie und Therapie des Typhus Abdominalis mit Besonderer Berücksichtigung der Recidive,

Sowie der Renalen und Abortiven Formen" (*ib.* 1885). He furthermore contributed to Virchow's "Archiv" (1884) the article "Ueber die Hereditäre Form des Diabetes Insipidus" and to Gerhardt's "Handbuch der Kinderkrankheiten" an essay on "Die Krankheiten der Bronchien."

**WEIL, GUSTAV:** German Orientalist; born in Sulzburg, Baden, April 25, 1808; died at Freiburg-im-Breisgau Aug. 29, 1889. Being destined for the rabbinate, he was taught Hebrew, as well as German and French; and he received instruction in

Gustav Weil.

Latin from the minister of his native town. At the age of twelve he went to Metz, where his grandfather was rabbi, to study the Talmud. For this, however, he developed very little taste, and he abandoned his original intention of entering upon a theological career. In 1828 he entered the University of Heidelberg, devoting himself to the study of philology and history; at the same time

he studied Arabic under Umbreit. Though without means, he nevertheless went to study under De Sacy in Paris in 1830, and thence followed the French military expedition to Algiers, acting as correspondent at Algiers for the Augsburg "Allgemeine Zeitung." This position he resigned in Jan., 1831, and journeyed to Cairo, where he was appointed instructor of French at the Egyptian Medical School of Abu-Zabel. He utilized the opportunity to study with the Arabic philologists Mohammed Ayyad al-Tantawi and Ahmad al-Tunsi. Here also he acquired Neo-Persian and Turkish, and, save for a short interruption occasioned by a visit to Europe, he remained in Egypt till March, 1835.

Weil returned to Europe by way of Constantinople, where he remained for some time pursuing Turkish studies. In Germany he sought permission to establish himself as privat-docent in the University of Heidelberg, receiving it, however, only after great difficulties. Weil had attacked Joseph von Hammer-Purgstall in a translation of Zamakhshari's "Golden Necklaces" (Stuttgart, 1836), and the faculty of Heidelberg, being unable to judge the matter, hesitated to appoint him docent because of Hammer-Purgstall's high reputation. De Sacy's recommendation opened the way to him, which, however, was destined to remain rough and rugged. He gained his livelihood as assistant librarian, and was appointed librarian in 1838, which position he retained till 1861; in that year he became professor.

At Stuttgart in 1837 Weil published "Die Poetische Literatur der Araber," and later issued a translation of the "Thousand and One Nights," the first complete translation from the original text

into German (4 vols., 1837-41; 2d ed. 1866; 4th ed. 1871-72), which was, however, spoiled in the process of publication. Weil purposed to give a philologically exact version, which would have been highly desirable in many respects; but the Stuttgart publisher authorized August Lewald to change many objectionable passages, and thus made of it a popular and salable work. This perversion caused Weil much vexation. Weil's second great work was "Mohammed, der Prophet" (Stuttgart, 1843), a life of Mohammed, in the compilation of which he was the first to go back to the oldest accessible sources in Europe. It was not in his nature, however, to attempt a psychological reconstruction of the prophet's character, as was done later by Sprenger and Muir. Washington Irving in his "Life of Mohammed" used Weil's work as a source of information, and acknowledged his indebtedness to that author.

While pursuing these studies Weil published his "Historisch-Kritische Einleitung in den Koran" (Bielefeld and Leipsic, 1844 and 1878) as a supplement to Ullman's translation of the Koran, and the translation of one of the original sources of the biography of Mohammed, "Leben Mohammed's nach Muhammed ibn Ishak, Bearbeitet von Abd el-Malik ibn Hisham" (Stuttgart, 2 vols., 1864). Three additional essays remain to be mentioned: one on Mohammed's epilepsy ("Journal Asiatique," July, 1842); the second an investigation of a "Supposed Lie of Mohammed" (*ib.* May, 1849); and the third a discussion of the question whether Mohammed could read and write ("Proceedings of the Congress of Orientalists at Florence," i. 357). To these must be added "Biblische Legenden der Mohammedaner" (Frankfurt, 1845), in which Weil proves the influence of the rabbinic legends upon the religion of Islam.

The most comprehensive work of Weil is his "Geschichte der Chalifen" (5 vols., Heidelberg and Stuttgart, 1846-51), which is virtually an elaboration of the original works of Mohammedan historians, whom he in large part studied from manuscripts; it treats also of the Egyptian and Spanish califates. This was followed by the "Geschichte der Islamischen Völker von Mohammed bis zur Zeit des Sultans Selim" (Stuttgart, 1866), an introduction to the medieval history of the Orient. After 1866 Weil confined his literary activity to the publication of reviews in the "Heidelberger Jahrbücher" and in the "Jenaische Litteratur-Zeitung." In later years he received honors from various states, including Baden and Prussia. Owing to continued illness he was pensioned in 1888.

Weil's collection of Arabic manuscripts was presented to the University of Heidelberg by his children.

E. O. A. M.

**WEIL, HENRI:** Philologist; born at Frankfurt-on-the-Main Aug. 26, 1818; educated at the universities of Bonn, Berlin, and Leipsic. He went to France, and continued his studies at Paris, graduating as "docteur ès lettres" in 1845, and becoming "agrégé" in 1848. Appointed professor of ancient

literature at the University of Besançon, he was in 1872 elected dean of the faculty. In 1876 he was called to Paris to fill a vacancy as instructor in the normal high school and to assume charge of the

Henri Weil.

Ecole Pratique des Hautes Etudes, both of which positions he resigned in 1891. In 1866 he was elected corresponding member of the Académie des Inscriptions et Belles-Lettres, becoming full member in 1882 as the successor of Dulaurier. In 1887 he received the cross of the Legion of Honor.

Weil has edited the poems of Æschylus, eight tragedies of Euripides, and the orations of Demos-

thenes. Among his works may be mentioned: "De l'Ordre des Mots dans les Langues Anciennes Comparées aux Langues Modernes" (Paris, 1844; 3d ed. 1879); "De Tragædiarum Græcarum cum Rebus Publicis Coniunctione" (with L. Beuloeuw, Paris and Berlin, 1845); "Théorie Générale de l'Accentuation Latine" (*ib.* 1855); and "Etudes sur le Drame Antique" (*ib.* 1897).

**WEIL, JACOB:** German rabbi and Talmudist; flourished during the first half of the fifteenth century. Of his life no details are known, but, according to Grätz, he died before 1456. He was one of the foremost pupils of Jacob Mölln (MaHaRIL), who ordained him in the rabbinate, and authorized him to officiate in Nuremberg. Weil, however, did not avail himself of this permission lest he should offend an older scholar, Solomon Cohen, who had been appointed rabbi of that city long before.

Weil was later called to the rabbinate of Erfurt; and congregations far and near, recognizing him as an authority, addressed their problems to him. He approved of the pilpulistic method only as an aid to study, but rendered legal decisions purely on the basis of logic (*Responsa*, No. 144).

Weil was especially severe on contemporary rabbis who regarded themselves as having peculiar privileges transcending the rights of the laity, declaring in a responsum (No. 163) that no rabbis of his time had any such prerogatives, and that, moreover, no man could be regarded as a scholar (TALMID HAKAM) in the Talmudic sense. Of Weil's works only a collection of opinions and decisions, "She'elot u-Teshubot" (Venice, 1549), has been preserved. To this work was added an appendix entitled "Shehitot u-Bedikot," containing regulations for slaughtering and for the examination of slaughtered cattle. These rules have been regarded as authoritative by later rabbis, have run through seventy-

one editions, and have been the subjects of various commentaries and additions.

E. C.

J. Z. L.

**WEIL, JACOB:** German educationist and writer; born at Frankfort-on-the-Main 1792; died there Nov. 18, 1864. His first work was "Fragmente aus Talmud und Rabbinen," Frankfort-on-the-Main (second edition of part i. appeared in 1809, of part ii. in 1811). He was an instructor at the Jewish school (Philanthropin) of Frankfort, and from 1818 until 1845 he conducted an educational institute.

In an address which he delivered, Oct. 18, 1816, in the chapel of the school, he expressed the hope that the new era would bring the emancipation of his coreligionists. He had, however, to defend the Jews against the attacks of Rühls and Fries, and refuted them in his pamphlet "Bemerkungen zu den Schriften der Herren Professoren Rühls und Fries über die Juden und Dereu Ansprüche auf das Deutsche Bürgerrecht" (Frankfort-on-the-Main, 1816). Weil was one of the founders (1823) and for many years a member of the board of the Verein zur Beförderung der Handwerke Unter den Juden.

Various articles and numerous addresses on political, religious, and historical subjects written by him appeared in the Frankfort daily press. He supported Gabriel Riesser enthusiastically, and wrote his biography in Duller's "Männer des Volks" (vol. ii.). In addition Weil was the author of the following: "Das Junge Deutschland und die Juden" (Frankfort-on-the-Main, 1836), refuting the accusation that most of the young writers who agitated Germany were of the Jewish race; "Die Erste Kammer und die Juden in Sachsen" (Hanau, 1837); "Ueber die Idee des Christlichen Staats," in Karl Weil's "Konstitutionelle Jahrbücher" (i. 321 *et seq.*, Stuttgart, 1843). Other essays written by him in this periodical were: "Ueber die Verbindung des Staates mit der Kirche"; "Lamartine, über Kommunismus und Sozialismus"; "Gervinus, die Deutschkatholiken und die Glaubensfreiheit"; "Ueber die Stellung der Konstitutionellen Fürsten im Staate." Against the reactionary movement in Prussia Weil wrote "Wagener, Stahl, die Juden und die Protestantischen Dissidenten," in Stein's "Israelitische Volkslehrer" (1857, pp. 209 *et seq.*; also printed separately, Frankfort-on-the-Main, 1857). Weil devoted himself to historic studies, and contributed a number of articles and essays to the "Magazin für die Literatur des Auslandes" (1843-1846) and to the "Blätter für Literarische Unterhaltung" (1850, 1851, 1854). His last production, "Die Alten Propheten und Schriftgelehrten und das Leben Jesu von David Strauss," criticized Strauss for his prejudices against Judaism.

A son of Jacob Weil, Henri WEIL, is professor at the University of Besançon.

**WEIL, KARL:** Austrian physician; born at Altsattel, Bohemia, March 19, 1844. He studied medicine at the universities of Prague and Vienna

(M.D. 1867). From 1871 until 1873 he was assistant at the surgical hospital of Vienna University, and from 1873 to 1879 at the Prague German university. In 1877 he became privat-docent, and in 1879 assistant professor, of surgery at the latter university.

Weil is the author of "Beiträge zur Kenntniss des Genu Valgum" (1879) and of "Untersuchungen über die Schilddrüse" (1889). For Maschka's "Handbuch der Gerichtlichen Medizin" he wrote "Beurtheilung der Verletzung und Narben."

**WEIL, KARL, RITTER VON:** Austrian journalist; born in Württemberg, Germany; died at Vienna Jan. 7, 1878. He studied law at the University of Freiburg (LL.D. 1827), and afterward joined the staff of the "Allgemeine Zeitung," then published in Augsburg, now in Munich; from 1830 to 1832 he was its Paris correspondent. In 1832 he became editor of the "Württembergische Zeitung" in Stuttgart, holding that position until 1848, when he went to Berlin as associate editor of the "Constitutionelle Zeitung." During the following two years he resided in Stuttgart; and in 1851 he removed to Vienna, entering, as a journalist, the services of the Austrian government. In 1873 he was retired with the title of "Ministerial-Rath."

Weil took an active interest in Jewish affairs, and was a member of the executive board of the Israelitische Allianz from its foundation.

**WEIL, NETHANEEL:** Rabbi and Talmudist; born at Stühlingen in 1687; died at Rostadt May 7, 1769; son of Naphtali Hirsch Weil. His mother took him to Fürth when he was ten years old, and soon afterward to Prague, where his father's brother, Lippman Weil, adopted him. Although so young, Nethaneel was granted permission to attend the lectures of R. Abraham Brod, head of the yeshibah of Prague; and he soon won the favor of his teacher to such a degree that the latter proffered him the hand of his niece, Vögele. The wedding was celebrated in 1708; and when R. Abraham was called to the rabinate of Mayence, his son-in-law accompanied him thither, remaining there until 1713, when he returned to Prague. Here he occupied himself with Talmudic studies and with teaching, his pupils being numbered by thousands. His only source of income was the scanty salary attached to his position as assistant rabbi.

Weil remained in Prague until the issue of the edict of Maria Theresa of Dec. 18, 1744, ordering the expulsion of all Jews from Bohemia. This proved to be the means of releasing Nethaneel from a burdensome existence; for he was then offered the rabinate of the Black Forest, with headquarters in Mühringen. He assumed office in 1745, and held it for five years, writing the greater part of his commentary on Asher b. Jehiel during that time. In 1750 he was called as rabbi to Carlsruhe; and there he completed the commentary in the spring of 1754. It was published at Carlsruhe in 1755 under the title "Korban Netan'el," and was later printed together

with Asheri in editions of the Talmud, although it embraces only the orders Mo'ed and Nashim.

Nethaneel officiated in Carlsruhe for about twenty years. In addition to the "Korban Netan'el," which was published by himself, he was the author of two works published posthumously by his son Simeon Hirsch: (1) "Netib Hayyim" (Fürth, 1779), containing critical notes on the Shulhan 'Aruk, Oraḥ Hayyim, and its commentaries, the "Ture Zahab" and "Magen Abraham"; and "Torat Netan'el" (*ib.* 1795), in two parts, the first consisting of a collection of his responsa, and the second consisting of halakic derashot on the Pentateuch.

**WEIL, TIAH (JEDIDIAH):** German rabbi; born at Prague Oct. 2, 1721; died at Carlsruhe Oct. 10, 1805. He was the son of Nethaneel Weil and received his early instruction from his father. In 1744 he married Gitel, daughter of Jacob Eger, a well-to-do resident of Prague; but the expulsion of the Jews from Prague ordered by Maria Theresa drove him to Metz in 1745, where he remained until 1748, continuing his studies under Jonathan Eybeschütz. Returning to Prague, he lived in great difficulties until, in 1754, he became rabbi of Wotitz, in Bohemia. In 1758 he again settled in Prague, which he left in 1770 to succeed his father in the rabinate of Carlsruhe. Of his works only a commentary on the Passover Haggadah has been printed (Carlsruhe, 1791, published anonymously). Responsa of his are found in the collection of Ezekiel Landau and in his father's "Netib Hayyim" (Fürth, 1779). Numerous novellæ and homilies are preserved in manuscript. His will shows him to have been a man of genuine piety and a believer in the Cabala. Among his descendants there were several rabbis: his grandson R. Jacob WEIL was the author of a compendium of Sabbath laws ("Torat Shabbat," Carlsruhe, 1839), and his great-grandson Nethaneel WEIL was Klaus-rabbi at Carlsruhe (May 1, 1892).

**WEILL, ALEXANDRE (ABRAHAM):** French writer; born at Schirhoffen, Alsace, May 10, 1811; died at Paris Oct. 18, 1898; grandson of R. Abraham Kellermeister. He was destined by his parents for a rabbinical career, and was sent to Frankfurt to pursue his preparatory Talmudic studies. At the same time he studied German, French, English, Italian, Latin, and Greek literature. In 1837 he abandoned his rabbinical studies, and left Frankfurt for Paris with a letter of introduction from

Heinrich Heine which procured him speedy admission into the salons and journalistic circles of the French capital. He became a contributor to the "Revue du Progrès" (edited by Louis Blanc), the "Démocratie Pacifique," the "Presse," the "Gazette de France," "L'Opinion Nationale," the "Figaro," and the "Temps," to various journals of Frankfurt, Stuttgart, and Hamburg, and to the "Archives Israélites," the "Univers Israélite," etc. The publication of his "Histoires de Village" (1847), to which Heine wrote a preface, and of his "L'Ami Fritz" and "La Petite Fadette" marked his entrance into the field of romance. He was perhaps the first French writer to conceive the idea of depicting village scenes and writing rustic idyls. Among his numerous admirers may be mentioned Giacomo Meyerbeer and Victor Hugo.

Weill was a born polemic, and he wrote a number of brochures on some of the leading questions of the day; among these may be mentioned: "République et Monarchie," 1848; "Le Génie de la Monarchie," 1849; "Que Deviendront Nos Filles?" 1863; "Mes Batailles," 1867; and "Lettre de Vengeance d'un Alsacien," 1871. In the "Corsaire" of March 2, 1848, he addressed a remarkable letter to Hippolyte Carnot, the minister of public instruction and father of the late president of the French republic, Sadi Carnot. In this letter, which bore the heading "Une Révolution à Faire," he strongly urged a more general instruction in foreign languages in the public schools.

Weill was the author also of the following works: "Mes Contemporains" (1864; 2d ed., with an appendix, 1890); "Dix Mois de Révolution," 1868; "La Guerre des Paysans et des Anabaptistes," 1874; "Ludovic Boerne," 1878; "Souvenirs Intimes de Henri Heine," 1883; "Histoire Véridique et Vécue de la Révolution de 1848," 1887; "Le Centenaire de l'Emancipation des Juifs," 1888; "Mes Romans"; "Mon Théâtre"; "Fables et Légendes d'Or"; "Lamartine et Victor Hugo"; "La France Catholique" (in reply to Drumont's "La France Juive"); "Les Cinq Livres de Moïse" (translated from Hebrew, and supplied with etymological notes); "Moïse, le Talmud et l'Évangile"; "La Parole Nouvelle"; "Hommes Noirs, Qui Êtes Vous?"; "L'Art Est une Religion"; "Lois et Mystères de la Création"; "Étude Comparative de la Langue Française avec l'Hébreu, le Grec, le Latin, l'Allemand, et l'Anglais"; "Rabbin et Nonne, Poésie et Réalité"; "Le Nouvel Isaïe"; and a volume of poems entitled "Les Grandes Juives" (1882).

**WEILL, ANSELME**: French physician; born at Bischheim, Alsace, Aug. 24, 1842. He received his education at the lyceum of Strasburg and the universities at Strasburg and Paris. Settling in the French capital, he took part, as assistant surgeon attached to the Lariboisière Hospital, during the defense of Paris in 1870-71. From 1871 to 1874 he was assistant physician at the Rothschild Hospital, and graduated as M.D. in 1874. He became chief physician of that institution in 1889; in the same

year he was made "Officier d'Académie"; and in 1894 he received the cross of the Legion of Honor.

Weill has published many essays, especially on the treatment of tuberculosis.

**WEILL, EMANUEL**: French rabbi; born at Ensisheim, Alsace, Oct. 21, 1841; educated at the bet ha-midrash of Colmar and the Séminaire Israélite de France in Paris (rabbi, 1861). In 1865 he was appointed rabbi at Versailles, and in 1876 he was called to Paris as assistant to the chief rabbi of that city. Since 1882 he has officiated as rabbi of the Portuguese synagogue in Rue Buffault, Paris. He is the author of "La Femme Juive Selon la Bible et le Talmud" (Paris; 2d ed. 1881) and "Judah Maccabée Suivi de Rabbi Akiba" (*ib.* 1888).

F. T. H.

**WEILL, MATHIEU**: French mathematician; born at Hagenau, Alsace, May 24, 1851; educated in the lycéums of Burg and Strasburg, at the Polytechnique in Paris, and at the military school in Fontainebleau. He attained the rank of lieutenant of artillery, but resigned in 1877. In 1881 he became teacher of mathematics in the Collège Chaptal at Paris, and in 1898 its principal.

Weill has published several essays in the mathematical journals of his country, and is the author of "Cours de Géométrie Analytique" and of "Précis d'Arithmétique, de Géométrie, d'Algèbre, de Trigonométrie," in four volumes.

**WEILL, MICHEL AARON**: French rabbi; born at Strasburg July 19, 1814; died at Paris Jan. 6, 1889. He was educated at the Ecole Centrale Rabbinnique at Metz, where he received the rabbinical diploma, and at the Sorbonne at Paris. After acting as a professor at the Ecole Consistoriale at Nancy, Weill was in 1845 appointed instructor at Algiers, where he became the first French chief rabbi (1846-64). His earnest efforts to inculcate French civilization in the Algerian Jews met, however, with little success, and he retired into private life until 1876, when he accepted the rabbinate of Toul. Nine years later he resigned this office and settled in Paris, devoting himself to literary pursuits.

Weill was the author of the following works: "Le Judaïsme, Ses Dogmes et Sa Mission" (Paris, 1866); "Théodicée" (*ib.* 1867); "La Révélation" (*ib.* 1868); "Providence et Rémunération" (*ib.* 1869); "La Morale du Judaïsme" (2 vols., *ib.* 1875-77); "La Parole de Dieu, ou la Chaire Israélite Ancienne et Moderne" (*ib.* 1880); and "Oraison Funèbre de M. Lazare Isidor, Grand-Rabbin" (*ib.* 1888).

Weill's son, **Georges Weill** (born at Algiers July 6, 1865), was educated at the Ecole Normale Supérieure, and at present (1905) occupies the chair of history at the Lycée Louis-le-Grand of Paris. He is the author of "Les Théories sur le Pouvoir Royal en France Pendant les Guerres de Religion" (Paris, 1892); "Saint-Simon et Son Œuvre" (*ib.* 1894); "L'Ecole Saint-Simonienne" (*ib.* 1896); "Histoire du Parti Républicain en France, 1814-1870" (*ib.* 1900);

"La France sous la Monarchie Constitutionnelle" (*ib.* 1902); and "Histoire du Mouvement Social en France, 1852-1902" (*ib.* 1904).

**WEILLER, LAZARE JEAN**: French manufacturer and author; born at Schlettstadt, Alsace, July 20, 1858; educated at the Lycée Saint-Louis of Paris and at the University of Oxford. Devoting himself to electric metallurgy, he induced the French government to employ the various copper alloys which render the long-distance telephone possible; and in 1888 he was made a chevalier of the Legion of Honor in recognition of his treatise "Conducteurs Electriques." In 1889 he was the Republican candidate for deputy of the department of the Charente; he defeated the Boulangist Paul Déroulède, but the election went by a slight majority to the Bonapartist candidate. Weiller has been successively a member of the consulting committee of the railways of France, censor of the Bank of France, vice-president of the jury on electricity at the International Exposition at Paris (1900), and member of the superior colonial council.

In 1902 he was sent to the United States on an important diplomatic mission, and on his return published his impressions under the title "Les Grandes Idées d'un Grand Peuple," which ran through more than fifty editions in a few months. He has written also a number of scientific works, which are regarded as classics, notably his "Traité Général des Lignes et Transmissions Electriques"; and he has likewise been a contributor for many years to the "Revue des Deux Mondes." He is an enthusiastic art-collector.

Weiller took an active part in the Dreyfus case, and vainly endeavored, together with his old friend Scheurer-Kestner, to induce his uncle General Gonsc, deputy chief-of-staff, to rehabilitate Dreyfus on his own responsibility. Weiller by marriage allied himself to a family of orthodox Catholics.

**WEILLER, PAULINE** (née **EICHBERG**): American pianist; born in Stuttgart April 22, 1839; died in Baltimore, Md., Dec. 28, 1874; eldest daughter of Moritz Eichberg, cantor in Stuttgart. The Eichberg daughters, of whom there were five, inherited musical talent from both parents. Under the tuition of Mathilde Ries, Pauline's gift for music developed so rapidly that she played in public before the age of ten. When she was thirteen Rubinstein heard her play, and introduced her to Meyerbeer, through whose influence she completed her musical education at the Leipsic Conservatorium, then under the direction of Moscheles. Later she played for a season with Rubinstein at Baden. Her greatest triumphs were won as a Chopin performer. Her technique was faultless and elegant, and her musical memory aroused the astonishment of critics. In 1859 she went to New York as a teacher of music, and two years later married Alexander Weiller of Baltimore.

**WEIMAR**. See SAXON DUCHIES.

**WEINBERG, PAUL**: Russian writer; born at Odessa about 1840. His father, Isaiah Weinberg, adopted Christianity. Unlike his brothers, **Peter Weinberg**, a prominent writer, and **Jacob Weinberg**, a judge, Paul never studied at any institution of learning, and this lack of training is plainly shown in his literary works. From his early youth he devoted his time to caricaturing the Jews, whose lives, customs, and habits he never studied, knowing of them only through his uncle Billizer. These caricatures were published in three works: "Stzeny iz Yevreiskavo Byta" (St. Petersburg, 1870); "Novyya Stzeny i Anekdoty iz Yevreiskavo, Armyanskavo, Grecheskavo, Nyemetzkavo i Russkavo Byta" (*ib.* 1880); and, "Polny Sbornik Yumoristicheskikh Stzen iz Yevreiskavo i Armyanskavo Byta" (Moscow, 1883). These scenes are crudely humoristic.

**WEINGAERTNER, FELIX ALPHONSE**:

French musician and composer; born at Nantes May 5, 1844. The son of a musician, he received his early education at home, later entering the Ecole des Beaux-Arts at Paris, where he became the pupil of Alard and of Vieuxtemps. Returning to his native city, he established himself as a teacher of music, and gave several very successful concerts. In 1884 he was appointed principal of the Conservatoire at Nantes, which position he held until 1894, when he moved to Paris. There he soon acquired a reputation as a violinist, appearing in many concerts. He traveled through France, giving concerts in the more important cities.

**WEISS, ISAAC HIRSCH**: Austrian Talmudist and historian of literature; born at Gross Meseritsch, Moravia, Feb. 9, 1815; died at Vienna June 1, 1905. After having received elementary instruction in Hebrew and Talmud in various *hadarim* of his native town, he entered, at the age of eight, the *yeshibah* of Moscs Aaron Tichler (founded at Gross Meseritsch in 1823), where he studied Talmud for

five years. He then studied at home under a tutor, and later in the yeshibah of Trebitsch, Moravia, under Hayyim Joseph Pollak, and in that of Eisenstadt under Isaac Moses Perles, returning to his home in 1837. From the tender age at which Weiss began to study Talmud and rabbinics it may

Isaac Hirsch Weiss.

be deduced that he was endowed with remarkable ability. He felt a keen desire for the pursuit of the secular sciences also, of which he was deprived in his youth, although he had been instructed in German by his private tutor. In some of the yeshibot which he attended instruction was given also in the Hebrew language and grammar; but that did not satisfy Weiss. It was for this reason

that he changed from one yeshibah to another, hoping that he would ultimately find one in which his desire for learning would be satisfied. Influenced by Nachman Krochmal, by Rapoport, and by Zunz's "Gottesdienstliche Vorträge," Weiss devoted part of his time

to the study of religious philosophy. Talmudic studies, however, occupied the greater part of his time, and during the years that he spent in his

parents' home he wrote several pamphlets containing novellæ on Talmudic treatises, as well as on the Shulhan 'Aruk, Yoreh De'ah and Hoshen Mishpat. He also kept up a correspondence with many distinguished rabbis, particularly Joseph Saul NATHANSON, and contributed to Stern's "Kokehe Yizhak" and to Kobak's "Jeschurun." To the former he contributed articles on general subjects, as well as verses and a number of biographies, among which that of Rab (Abba Arika) deserves special notice. In the "Jeschurun" he published several articles on the origin of prayer.

In 1858 Weiss settled in Vienna, where he became corrector for the press in the printing establishment of Samarski and Dittmarsch. Six years later (1864) he was appointed lecturer in the bet ha-midrash founded by Jellinek, holding that position until his death. In Vienna, where Jellinek and other prominent Jewish scholars were congregated, Weiss found greater scope for his literary activity. He immediately turned his attention to a Vienna edition of the Talmud; and the notes with which he provided most of the treatises give evidence of his vast erudition. Then, at the request of Jacob Schlossberg, he wrote a compendium of the laws and observances relating to the ritual; this work, which was entitled "Orah la-Zaddik," was published by Schlossberg at the beginning of the "Seder Tefillat Ya'akov" (Vienna, 1861). In the following year Weiss edited the Sifra with the commentary of Abraham b. David of Posquières; to this work he added a historical and linguistic introduction in nine chapters, and he provi-

ded the text with critical and exegetical notes entitled "Masoret ha-Talmud," giving the variants of different manuscripts as well as an index showing the parallel passages in both Talmudim. In 1864 Weiss took a prominent part in the Kompert trial, publishing a pamphlet entitled "Nezah Yisrael" in support of the testimony of Horowitz and Mannheimer with regard to the belief in the Messiah. This work called forth a reply by Nissan Schidhoff, entitled "Neshek Bar" (Fürth, 1864). In the same year Weiss edited the mishnayot of the treatise Berakot, giving a list of variants in both Talmudim and a brief synopsis of the contents. A year later (1865) he founded a monthly magazine, "Bet ha-Midrash," of which, however, only five numbers appeared. In the same year he edited the Mekilta, to which he added an introduction dealing with the historical development of both Halakah and Haggadah, and a critical commentary entitled "Middot Soferim."

After the publication of his "Mishpat Leshon ha-Mishnah" (1867), an essay on the mishnaic language, Weiss began to prepare his stupendous work, the "Dor Dor we-Dorshaw" (1871-91; see below). Although Weiss had not been successful with his "Bet ha-Midrash," he was more fortunate with the BET TALMUD, a monthly magazine which he founded in 1881 with Meïr FRIEDMANN. In this periodical Weiss published numerous articles of his own, most of them treating of the Talmud in general and of Talmudic subjects. No less important are his biographical sketches, among which are those of Maimonides, Rashi, and Jacob Tam ("Bet Talmud," i., ii., and iii., and reprinted in book form under the title "Toledot Gedole Yisrael"). In 1891, on the completion of his "Dor," Weiss reedited Isaac Campan-ton's "Darke ha-Gemara," a methodology of the Talmud. His last work in book form was his "Zikronotai" (Warsaw, 1895), a collection of his reminiscences from his childhood to his eightieth year. He continued to contribute to various Hebrew periodicals, writing mostly biographies, of which may be mentioned that of Saadia Gaon (in "Ha-Asif," ii. 275-293), published before Weiss had attained his thirtieth year, and that of Mannheimer (in "Mizrah umi-Ma'arah," iii. 17 *et seq.*). In his lectures Weiss was rather free with regard to the text of the Talmud and the Midrashim. He did not hesitate to declare the text faulty when it seemed so to him; but, on the other hand, he was very careful in making corrections. He held also that the words of the ancient rabbis should not be interpreted according to modern conception, such interpretation being liable to result in error.

Weiss's most important production, through which he acquired great renown, is his "Dor Dor we-Dorshaw," a work in five volumes. As its German title, "Zur Geschichte der Jüdischen Tradition," shows, it is a history of the Halakah,

or oral law, from Biblical times until the expulsion of the Jews from Spain at the end of the fifteenth century. The first volume (1871) covers the history from the inception of the oral law to the destruction of the Second Temple; vol. ii. (1876) treats of the tannaitic period until the con-

clusion of the Mishnah; vol. iii. (1888), of the amoraic period till the completion of the Babylonian Talmud; vol. iv. (1887), of the geonic period until the end of the fifth millennium (= the middle of the thirteenth century); and vol. v., of the period of the casuists ("posekim") till the composition of the Shulhan 'Aruk. As the oral law is in reality the interpretation of the Pentateuch, Weiss thinks that it originated immediately after the redaction of the latter by Moses. The apparent divergencies in the Pentateuch and the various books of the Prophets (as the well-known differences between the books of Ezekiel and Leviticus, and many others) are due only to different interpretations of the Pentateuch in different epochs. It will be seen that Weiss defended the unity of the Pentateuch and vindicated the authorship of Moses. But he believed that Moses himself followed certain traditions current in his time, as it is said that Abraham observed God's commandments and laws (Gen. xxvi. 5). He asserted also that while the Pentateuch contains no simple repetitions of the laws, it contains additions which amplify or limit the commandments laid down in the earlier books. In the second volume Weiss gives the history of the Mekilta, Sifra, Sifre, and Mishnah. This volume contains also monographs on the Tannaim which are invaluable to the Talmudic student; without concealing the failings of some, he defends them, especially the patriarchs, against the charges of Schorr and others. In the third volume much space is devoted to the Haggadah and the haggadists; and the author does not endeavor to find apologies for those seemingly strange passages in this part of the Talmud which serve as pretexts for those who seek to detract from its value. But he points out the many edifying sentences that are scattered throughout the Haggadah, and quotes a great number of them.

As was to be expected, this work, adopted by the majority of Talmudic scholars as the standard history of the oral law, called forth replies from some malcontents. Isaac Halevy is known to have written his "Dorot ha-Rishonim" mainly against Weiss's "Dor"; and Eleazar Zarkes published a criticism of the work in "Keneset ha-Gedolah" (iv., part 2, pp. 65 *et seq.*). Simḥah Edelman issued a small pamphlet entitled "Ma'amar Doresh Reshumot" (Warsaw, 1893), in which he endeavored to make evident Weiss's mistakes; and Simḥah Weissmann, in his pamphlet "Teshubot u-Ma'anut Nimrazot," did not even abstain from personalities.

**WEISS, JOSEPH HIRSCH:** Hungarian rabbi; born at Podola, Comitat Neutra, 1800; died at Erlau 1881. He was a descendant of a long line of rabbis resident in Moravia in the seventeenth and eighteenth centuries; the family name was originally Weissfeld. He officiated for some time as rabbi of the congregation of Sook-Szelocze, and in

1840 was appointed chief rabbi of Erlau, where he remained until his death. He was one of the leaders of the ultra-Orthodox party in Hungary, and one of the chief opponents of the founders of the Reform movement in Pesth. Identified with the Kosuth movement in 1848, he was obliged to seek refuge for a time in the monastery of Erlau under the protection of the resident archbishop. Later he was arraigned before the royal authorities at Vienna on a charge of sedition, but was ultimately acquitted. A considerable portion of his library, consisting mainly of responsa, was presented by his grandson Stephen S. Wise to Columbia University in New York.

**WEISS, LEOPOLD W.:** German ophthalmologist; born at Giessen 1849. He was educated at the universities of Giessen (M.D. 1874), Tübingen, and Vienna; and from 1875 to 1877 acted as an assistant at the ophthalmological institute of the University of Heidelberg, where he received the "venia legendi" in 1876. Since 1878 he has been a practising physician in Heidelberg and in Mannheim. Among his works may be mentioned: "Zur Bestimmung der Drehpunkte des Auges" (in Graefe's "Archiv," xxi.); "Beiträge zur Entwicklung der Myopie" (*ib.* xxii.); "Ueber die Tuberculose des Auges" (*ib.* xxiii.); "Ueber die Abflusswege der Intraoculären Flüssigkeiten" (*ib.* xxv.); and "Ueber den an der Innenseite der Pupille Sichtbaren Reflexstreif" (*ib.* xxxi.).

**WEISS, MARKUS NISSA** (called also **Markakai Ungvar**): Hungarian advocate of Reform. In 1792 he had a small business at Pesth, and in 1794 he leased an estate near Munkacs, where his oppressions gave rise to complaints among the Galician Jews. In 1802 he published a pamphlet entitled "Der Jude wie Er Ist," in which he pleaded with the Jews to accept the ideas of Reform. This work caused him to be bitterly attacked by the Hungarian Jews; and in order to defend his person and ideas he issued (Vienna, 1803) another pamphlet, which was entitled "Der Bedrängte Markus Nissa Weiss an die Menschen." Finding, however, that he could not overcome the antagonistic attitude of his coreligionists, he embraced Christianity.

After his conversion Weiss published his "In Neuerfundenen Tabellen Begründete Praktische Vortheile der Rechnungskunst," Ofen, 1805; "Der Missverständene Text und dessen Wahrer Sinn," *ib.* 1806. He has further published "Unparteiische Betrachtungen über das Grosse Jüdische Sanhedrin zu Paris" (*ib.* 1807).

A. BÜ

**WEISS, MAX:** Hungarian chess-player; born July 21, 1857, at Szereed on the Waag. Removing to Vienna, he studied mathematics and physics at the university, and afterward taught those subjects. Having, however, learned to play chess in his twelfth year, his interest in the game increased as he grew older, and he entered many international competitions.

Weiss has invariably acquitted himself well in tournaments, at which his chief successes have been:

- 1882, Vienna, won 2 games from Zukertort, and drew with Steinitz.  
 1885, Hamburg, tied with Englisch and Tarrasch for second prize.  
 1887, Frankfurt-on-the-Main, divided second and third prizes with Blackburne.  
 1888, Bradford, tied with Blackburne for sixth prize.  
 1889, New York, tied with Tchigorin for first prize.  
 1889, Breslau, third prize.  
 1890, Vienna, first prize.

Weiss is now (1905) employed in Baron Rothschild's banking-house at Vienna.

A. P.

**WEISS, WILHELM:** Austrian mathematician; born at Ridka, Bohemia, Feb. 3, 1859; died at Prague June 18, 1904. He received his early education from his father, who was a teacher at Ridka; and from 1881 to 1887 he studied successively at the universities of Prague, Leipsic, and Erlangen (Ph.D. 1887). From 1887 to 1894 he was instructor in mathematics at the Deutsche Technische Hochschule at Prague, becoming lecturer in 1894, deputy professor in 1896, assistant professor in 1897, and professor in 1900. From 1901 to 1902 he was dean of the school of engineers at the same institution.

A. Kt.

**WEISSBERG, ISAAC JACOB:** Russo-Hebrew writer and pedagogue; born at Polonki, government of Minsk, 1841; died at Kiev 1904. He received his preliminary training in various hadarim, and then attended the yeshibah of Slonim, where he came to be regarded as one of the best Talmudic students. Later he went to Minsk, where he became acquainted with various Hebrew scholars of the younger generation, especially with Joseph Brill, known also as Job of Minsk. While in Minsk, Weissberg devoted himself particularly to the study of Hebrew literature. In 1873 he established himself as a teacher of Hebrew in Kiev; many of his pupils have become prominent Hebrew writers.

In 1879 Weissberg began contributing articles to various Hebrew periodicals, and his literary activity was very extensive. The following is a list of his more important works: "Ga'on we-Shibro," a scholarly criticism of medieval and modern literature; "She'elat ha-Nashim 'al Pi ha-Talmud," a work written in Yiddish and treating of the status of women according to the Talmud, as well as of the prevailing opinion regarding the authority of the Talmud; "Peshuṭo shel Miḳra 'al Pi Da'at" (St. Petersburg, 1898), Talmudic explanations of Biblical passages; and "Mishle Qadmonim" (Nezhin, 1901), a collection of ancient proverbs. He was the author also of exegetic notes on the Pentateuch (published by Ezekiel Mandelstamm); and he collected and published letters by the poet J. L. Gordon (2 vols.), Isaac Bär Levinsohn, and Isaiah Tugendhold ("Dibre Yesha'yah"). Weissberg contributed numerous articles to "Ha-Meliz," "Ha-Maggid," "Ha-

Zefirah," "Ha-Shahar," "Ha-Boqer Or," "Ozar ha-Sifrut," "Aḥiasaf," "Ha-Shiloah," "Ha-Goren," "Ha-Pisgah," and "Ha-Tiḳwah."

H. R.

H. M.

**WEISSENBERG, SAMUEL ABRAMOWITZ:** Russian physician and anthropologist; born in Yelizavetgrad, South Russia, Dec. 16, 1867. He attended the public school and the real-school of his native town; entered the Polytechnicum in Carlsruhe, Baden, in 1884; and received his medical degree in Heidelberg in 1890. His chief work has consisted of anthropological researches among the Jews of South Russia, the results of which he published in 1895 ("Die Südrussischen Juden," in "Archiv für Anthropologie," xxiii.). He has also published researches on the anthropology of the Karaites ("Die Karäer der Krim," in "Globus," lxxxiv., and in "Russki Antropologicheski Zhurnal," 1904). Several other contributions were published in the "Zeitschrift für Ethnologie" and the "Mitteilungen der Anthropologischen Gesellschaft" of Vienna. Weissenberg has been a frequent contributor to the "Globus" on Jewish folk-lore, his articles on Jewish proverbs (vol. lxxvii.) and folk-songs (vol. lxxvii.) being particularly noteworthy. He has written also papers for the "Mitteilungen der Gesellschaft für Jüdische Volkskunde" on the "Purimspiel" (part xiii.), "Weddings" (part xv.), and kindred subjects.

J.

M. Fr.

**WEISSMANN, ASHER (ARTHUR) SIMHAH:** Austrian scholar and publicist; born at Zelynia, Galicia, April 21, 1840; died at Vienna May 14, 1892. He received a rabbinical training in his native town and in the yeshibah of Rzeszow, whereupon he (1871) took up the study of foreign languages and secular sciences. After officiating for some time as director of the Jewish school of Galatz, Rumania, he went to Tysmenitz, Galicia, and finally settled in Vienna.

Weissmann's literary activity in Hebrew and German was considerable. In 1872 he edited the "Jüdische Freie Presse," a Judæo-German monthly with a Hebrew supplement entitled "Ha-Kohelet"; but only three numbers of it appeared. He contributed essays and novels to various Hebrew and Judæo-German periodicals, among which may be mentioned "Ha-Mabbit," the "Israelit" of Mayence, the "Israelitische Woehenschrift," and the "Israelit" of Lemberg. Especially noteworthy were his novels "Ha-Neder" (in "Ha-Mabbit," 1878, No. 15), treating of the moral status of the Jews; "Chajim Prostak" (in Rahmer's "Woehenschrift," 1880), dealing with Jewish life in Galicia; and "Folgen Verfehlter Erziehung" (in the "Israelit" of Lemberg). His "Chajim Prostak" was later translated into English.

In 1889 Weissmann founded in Vienna a German periodical, "Monatsschrift für die Litteratur und Wissenschaft des Judenthum," which was issued with a Hebrew supplement. To this publication, which existed for two years, he contributed numerous articles, among which may be mentioned articles on the redaction of the Psalms, and critical essays on the books of Esther and of Judith, the last-named being reprinted in book form. In the Hebrew sup-

plement Weissmann published a work on the history of the formation of Jewish sects prior to the death of Simeon the Just. He was the author also of "Kontres 'al Debar Serefat ha-Metim" (Lemberg, 1878), a critical essay on cremation according to the Bible and Talmud, and "Kedushshat ha-Tenak" (Vienna, 1887), on the canonization of the books of the Old Testament. In 1891 he published at Vienna Jonathan Eybeschütz's "Shem 'Olam," together with notes of his own and an introduction by S. Rubin.

E. C.

M. SEL.

**WEISSMANN-CHAJES, MARCUS:** Austrian scholar; born at Tarnow, Galicia, 1830. He was destined for a rabbinical career, and began early to receive instruction in the Talmud and in rabbinics, among his tutors being Israel Rapoport, then rabbi of Tarnow. When only ten years of age he commenced writing versified Hebrew letters, and five years later he wrote his "Mappalat ha-Mitkashshirim," a metrical composition treating of the failure of the Polish revolt. Part of this work appeared in the "Maggid Mishneh" (1872) under the title "Aharit Mered."

In 1872 he founded in Lemberg the "Maggid Mishneh," a semimonthly periodical devoted to Jewish history and to Hebrew literature; of this publication, however, only four numbers appeared. In the following year he settled in Vienna, where he edited the thirty-seventh number of the "Kokebe Yizhak," founded by Stern, its previous editor. During the years 1874 to 1876 he edited the "Wiener Jüdische Zeitung," a Judæo-German weekly.

Weissmann-Chajes is the author of: "Mashal u-Melizah" (vol. i., Tarnow, 1860; vols. ii.-iii., Vienna, 1861-62; iv.-vi., Lemberg, 1863-64), an alphabetically arranged collection of Talmudic proverbs rendered into metrical rimes; "Allon Bakut" (Lemberg, 1863), elegies on the deaths of Mordecai Zeeb Ettinger and Jacob Gutwirth; "Mar'eh Ma'om we-Haggahot" (Krotoschin, 1866), index and glosses to the Jerusalem Talmud, appended to the Krotoschin edition; "Hokmah u-Musar" (Vienna, 1875), parables and legends rendered into metrical verse; "Ha-

tan Bereshit we-Hatan Torah" (*ib.* 1883; a reprint from "Ha-'Ibri"), the 613 commandments derived by means of notari'kon from "bereshit," the initial word of the Pentateuch; and "Mille di-Bedihuta" (*ib.* 1884), versified epigrams and humorous sayings. In 1893 a second edition of the "Mashal u-Melizah" appeared under the title "Dibre Hakanim we-Hidotam" (*ib.* 1893); in this edition the Talmudic proverbs are supplied with rimed explanations.

**BIBLIOGRAPHY:** Sokolow, *Sefer Zikkaron*, pp. 43-44; Zeitlin, *Bibl. Post-Mendels*, pp. 410-411.

M. SEL.

**WEISZ, BERTHOLD:** Hungarian deputy; born at Budapest 1845. He was educated at the gymnasium and commercial academy of his native city, devoting himself especially to the study of political economy. In 1876 he became a member of

the arbitration committee of the Budapest exchange, and since then has contributed much toward promoting Hungarian commerce and industry. He was one of the founders (1879) of the suburban railroad system of Budapest, and in the following year took part in the framing of the industrial code. Since 1883 he has established the Hungarian preserve-factory and factories for brassware and cartridges in

Budapest and Berlin, as well as textile manufactories in Waitzen, Schmezbanya, Közeg, and Rozsahegy. He was the originator also of the Danubius Dockyards in Budapest. The national pension bureau for employees in mercantile houses and the central hypothecary department of the provincial savings-banks owed their existence chiefly to his efforts.

Since 1896 Weisz has represented the district of Nagy Ajta in the Hungarian Parliament, and in 1903 he received the title of court counselor.

**WELL:** The Hebrew language distinguishes between two kinds of wells: (1) "be'er," an artificially constructed hollow in which the water of a spring or underground water collects, and "bor," a cistern in which rain-water is stored. Of the former, which were probably designated also as "wells of living water" (Gen. xxvi. 19), the best preserved is that at

Village Wells in Use in Palestine.

(From a photograph by the American Colony at Jerusalem.)

the foot of Gerizim, which in the time of Jesus was called "Jacob's Well," and is undoubtedly very old (comp. John iv. 2). It is 23 meters deep and 2½ meters in diameter. The shape of the cisterns for collecting rain-water of course differed. A number of such ancient cisterns are still well preserved. Those shaped like a bottle, round, broad at the bottom, and narrowing at the top, seem to have been the oldest. They were usually like chambers hewn out of rock, or built up with walls; and in their construction natural cavities were preferred. Sometimes they were of very considerable size. For instance, the largest of the celebrated cisterns on the Temple area, called the "sea" or the "king's cistern," had a circumference of 224 meters and a depth of 13 meters. These Temple cisterns were fed not only by rain-water but also, through large conduits, by spring-water. In distinction from open pools, cisterns and wells were wholly covered. Even the hole through which the water was drawn in leather buckets (Ex. ii. 16; Isa. xl. 15) was tightly closed with a large stone (Gen. xxix. 3 *et seq.*; comp. Ex. xxi. 33), in order to prevent any one from using the well without permission.

In a land so poor in springs and water, a well was always a valuable possession. In Jerusalem every house of the better sort had its own cistern. King Mesha of Moab in his inscription (line 23) boasts that by his command every house in the city of Karhah was provided with a cistern (comp. also II Sam. xvii. 18; Prov. v. 15). The wells outside of settlements formed the stations for caravans. Today, as of old, strife among the wandering herdsmen, the Bedouins, arises chiefly from disputes over wells (comp. Gen. xxi. 25 *et seq.*; xxvi. 15, 19 *et seq.*). The importance of good wells is shown also by the situation of many cities near wells, after which they were named.

E. G. H.

I. BE.

Some of these wells and cisterns had their origin in the time of the Patriarchs. Abraham dug a well in Beer-sheba (Gen. xxi. 30), and Isaac restored the wells dug by his father, which had been filled up by the Philistines. Ordered by the king of the Philistines to leave the country, Isaac dug three wells in succession elsewhere; the first he called "Esek," the second "Sitnah," and the third "Rehoboth" (Gen. xxvi. 16-22).

Near Mosera, where Aaron died, were the wells "of the children of Jaakan" (Deut. x. 6 [R. V., margin]), and at the ford over the Arnon the Israelites found a very ancient well, which they celebrated in song as the work of princes and nobles (see WELL, SONG OF THE). The King of Edom refused to allow the Israelites to drink from his wells, even though they offered to recompense him for the privilege (Num. xx. 19). Eliezer, sent by Abraham to find a wife for Isaac, stopped at a well to rest and to await the course of events (Gen. xxiv. 11, 13).

In early times cisterns were used as dungeons, and even in later times, when prisons were built, they were still constructed for this purpose. Reuben counseled his brethren to throw Joseph into a cistern (Gen. xxxvii. 22); when Jeremiah was accused of having incited the people against the king, he was thrown into a miry dungeon in the court of the guard

(Jer. xxxviii. 6-13); and when a later prophet wished to picture a real deliverance, he described a liberation from a waterless cistern (Zech. ix. 11).

The well, or spring, was also used symbolically, as in Cant. iv. 12, where virginity is compared to a sealed fountain; but such symbolical interpretations are chiefly found in the Talmud and Midrash. Commenting on Prov. xx. 5 ("Counsel in the heart of man is like deep water"), the Midrash observes: "Only a man of understanding, who can join rope to rope, can draw from a deep well [the Law] full of water" (Cant. R. xciii.). When Johanan ben Zakkai wished to describe the ability of his pupils, he compared R. Eliezer b. Hyrcanus to "a cemented cistern that loses not a drop," and R. Eleazar b. 'Arak to "a rising well" (Ab. ii. 9, 10).

The cistern figured also in Biblical and Talmudic law. In case one opened a cistern and failed to cover it again, and a neighbor's animal fell into it, the owner of the cistern was required to make good the loss (Ex. xxi. 33-34). The Rabbis regarded a cistern in a public place as one of the four chief sources of danger, and determined upon various punishments for breaches of the regulations connected with it (B. K. i. 1).

**WELL, SONG OF THE:** A poem which is quoted in Num. xxi. 17, 18. It is introduced in a list of the encampments made by Israel while crossing the wilderness. One of these camping-places was Beer. After this it is explained that Beer was the name of the well referred to when YHWH said to Moses, "Gather the people together, and I will give them water" (R. V.). Then Israel sang:

"Spring up, O well,  
Sing ye to it:  
Thou well, dug by princes,  
Sunk by the nobles of the people,  
With the scepter, with their staves" (*ib.* Hebr.).

Budde ("New World," iv. 144 *et seq.*) points out that the word "midbar" (wilderness), which immediately follows, is never used as a proper name, and that in the present text it occurs awkwardly in the midst of a list of proper names. One would expect "from Beer" (they journeyed), and not "from the wilderness." He points out also that in an important group of manuscripts of the Septuagint the words "and from Mattanah," in verse 19, are omitted. He accordingly believes that "midbar" and "mattanah" were not intended as a part of the itinerary, but that they formed a part of the poem, which read:

"Spring up, O well,  
Sing ye to it:  
Thou well, dug by princes,  
Sunk by the nobles of the people,  
With the scepter, with their staves,  
Out of the desert a gift!"

Cheyne concurs in this view of the text (Cheyne and Black, "Encyc. Bibl." s. v. "Beer"). The song belongs to a class of ancient popular poetry of which, unfortunately, only fragments survive. This poetry consisted of short snatches sung in honor of the vine in time of vintage, and of wells and springs. Ewald thought that they were popular songs accompanying the alternate strokes of hard labor

("Hist. of Israel" [English ed.], ii, 203). No complete vintage song survives, though probably a line from one is quoted in Isa. lxxv. 8, and in the titles of Ps. lvii., lviii., and lix., and there are imitations of such songs in Isa. v. 1-7 and xxvii. 2-5.

The "song of the well" seems to be a complete popular song, addressed to a well. Budde and Cheyne, as is natural from their emended text, trace its origin to the Negeb, where wells were highly prized (comp. Gen. xxi. 25 *et seq.* and xxvi. 20 *et seq.*), and where indeed they were necessary to life (comp. Josh. xv. 19 and Judges i. 15). Budde believes that the song alludes to a custom by which, when a well or spring was found, it was lightly covered over, and then opened by the sheikhs in the presence of the clan and to the accompaniment of a song. In this way, by the fiction of having dug it, the well was regarded as the property of the clan. He thinks that a passage in Nilus (Migne, "Patrologia Græca," lxxix., col. 648) to which Goldziher had called attention confirms this view. Nilus says that when the nomadic Arabs found a well they danced by it and sang songs to it.

According to W. R. Smith, the use of the song was different: "The Hebrew women, as they stand around the fountain waiting their turn to draw, coax forth the water, which wells up all too slowly for their impatience" ("Brit. Quar. Rev." lxxv. 45 *et seq.*). This would imply a Palestinian origin for the song, and suggests a use for it more in accord with Ewald's idea of the accompaniment to labor. Somewhat parallel to this conception of the purpose of the song is the statement of the Arabic writer Kazwini (i. 189), that when the water of the wells of Iabistan failed, a feast was held at the source, with music and dancing, to induce it to flow again. The writer is inclined to accept Budde's view.

**WELL-POISONING.** See BLACK DEATH.

**WELLHAUSEN, JULIUS:** German Biblical critic and Semitist; born at Hameln May 17, 1844; educated in theology and Semitics at Göttingen (Ph.D. 1870), where he became privat-docent in the theological faculty in 1870. Two years later he was called as professor to the theological faculty of Greifswald, and in 1874 received the degree of D.D. "honoris causa" from Göttingen. He was compelled to resign from the theological faculty, however, in 1882 in consequence of his views on the Bible, whereupon he entered the philosophical faculty of Halle as assistant professor of Semitics. Three years later he went as professor of Semitics to Marburg, and was called to Göttingen in 1892.

Wellhausen has written extensively on subjects of vital interest to the student of the Bible and of Judaism and other religions. Among his earliest publications was a dissertation on the tribal organization of ancient Israel ("De Gentibus et Familiis Judæis Quæ I Chron. ii: 4 Enumerantur," Göttingen, 1870). This was followed by a work on the text of Samuel (*ib.* 1871) and by an elaborate treatise on the Pharisees and Sadducees (Greifswald, 1874), in which he attempted, though without success, to weaken the dis-

coveries of Geiger. The name of Wellhausen is more especially connected with Pentateuchal analysis, and on this basis he has reestablished and systematized the theory originally advanced by Vatke and Georg, and later by Graf, Reuss, and Kuenen, which assigns a post-exilic date to the Priestly Code and makes the Pentateuch, as it appears in the canon, posterior to the pre-exilic prophets. It is, consequently, the law-book of Judaism and the religion of the post-exilic congregation, the cult of the Israelites and Hebrews being held to have been a crude tribal Semitic nature-worship which culminated in a henotheistic Jahvistic nationalism, against which the Prophets, as the preachers of ethical righteousness, often had to protest. These critical views were expounded by Wellhausen in his "Composition des Hexateuchs und der Historischen Bücher des Alten Testaments" (3d ed., Berlin, 1901); "Prolegomena zur Geschichte Israels" (5th ed., *ib.* 1899); "Israelitische und Jüdische Geschichte" (4th ed., *ib.* 1901); and in his article "Israel" in "Encyc. Brit." 9th ed., xiii. 406-441. His series of "Skizzen und Vorarbeiten," which includes a commentary on the Minor Prophets, seeks in the third volume ("Reste Arabischen Heidenthums," Berlin, 1887) to elucidate and elaborate by a presentation of primitive Arabic paganism the analogies between the original Hebrew religion and the cults of the pre-Mohammedan Arabs. With the exception of his "Book of Psalms" (in "S. B. O. T." xiv.), the more recent researches of Wellhausen have been in the history of Islam and in the exegesis of the New Testament, his latest contributions being commentaries on the Gospels. Although his works are monuments of marvelous scholarship, they may be said to be marred by an unmistakable anti-Jewish bias and a consequent ignoring of the labors of Jewish writers.

E. G. H.

**WELT, DIE:** Zionist periodical, published weekly at Vienna (it is arranged to remove its headquarters to Berlin in 1906). The first number appeared June 4, 1897, since which time the periodical has been issued regularly. At one time a Yiddish edition was published. There have been several editors—Uprimy, Feiwel, S. Werner, etc. It was for some years a private venture of Theodor Herzl, who sank much money in it. "Die Welt" is the official organ of the Zionist movement throughout the world, and contains articles dealing with Zionism in its various phases, the renaissance of Hebrew literature, and Jewish conditions in different lands. It publishes also Judæo-national tales, and endeavors to encourage Jewish art. At the fifth BASEL CONGRESS it became the official organ of the Zionist movement.

J.

A. M. F.

**WELTSCH, SAMUEL:** Austrian cantor; born at Prague Sept. 12, 1835; died in that city Aug. 5, 1901. Belonging to a family of *hazzanim*, he early entered the profession, and became cantor of the Meisel synagogue at Prague while quite a young man. He received his musical education at the Conservatory of Music at Prague. In 1865 he received a call from the Ahawath Chesed congregation in New York, and remained its cantor until 1880, when he resigned the position in order to re-

turn to his native city. During his stay in New York he was active in improving the musical service of the American synagogue, and was one of the collaborators on the first three volumes of the "Zimrat Yah," a fourth volume of which was later added by Alois Kaiser of Baltimore. This work contains the music for all the seasons of the year and is still extensively used. In addition Weltsch published Ps. xciii. with German words for solo and chorus, and "Totenfeier," two hymns for the memorial service. He was a very prominent member of the order B'nai B'rith and took great interest in communal affairs in Prague, being the leading spirit in various charitable and educational organizations.

**WERBER, BARUCH**: Austrian Hebraist; born at Brody, Galicia, in the beginning of the nineteenth century; died there July 31, 1876. Werber, who was a follower of Isaac Erter and Nachman Krochmal, founded a Hebrew weekly, which was published in Brody from 1865 to 1890 under the names of "Ha-'Ibri" and "'Ibri Anoki." In addition to numerous articles which appeared in this magazine, Werber wrote: "Megillat Kohelet" (Lemberg, 1862; 2d ed., Warsaw, 1876), consisting of explanatory notes on Ecclesiastes, together with a long introduction; and "Toledot Adam" (Brody, 1870), a biography of Albert COHN of Paris.

S. O.

**WERBER, JACOB**: Austrian Hebraist; born at Brody, Galicia, Feb. 4, 1859; died there Aug. 20, 1890; son of Baruch WERBER. When only fifteen years of age Jacob could write and speak Hebrew fluently; and in 1874 he published in "Ha-'Ibri" a novelette of rare beauty, entitled "Galgal ha-Hozer ha-'Olam." In addition to several contributions to his father's magazine, he wrote articles on natural science for "Ha-Maggid" (1875, 1876) and for "Ha-Zefirah" (1876). Upon the death of his father in 1876, he became the editor of "Ha-'Ibri," and was active in this capacity until his death, when the paper ceased to appear. In 1890 Werber was attacked by a severe illness; and when he heard that his physician had given up hope of his recovery he wrote his own necrology, which appeared in the last number of "Ha-'Ibri," three days before his death.

**WERNER, ABRAHAM**: Polish rabbi; born at Tels, Kovno, 1837. He received his early education in various hadarim, and at thirteen was well versed in Talmudic literature, whereupon he continued his studies under his father, who was government rabbi of Tels. In 1856 Werner received the HATTARAT HORA'AN from several eminent rabbis, and shortly after was appointed rabbi of Weger; later he succeeded his father as dayyan at Tels, subsequently becoming chief rabbi. He then accepted a call to Helsingfors as chief rabbi of the entire province of Finland, and finally, in 1891, was elected rabbi of the newly founded Mahazike

Hadath congregation in London. Here he remained until July, 1901, when he settled in the Holy Land.

**WERNIKOVSKI, JUDAH**: Russian Talmudical educator; born in Slonim, government of Grodno, 1823; died in Jerusalem Feb. 20, 1901. In his childhood he was known as an "illui," or prodigy in Talmudical learning. He was married at the age of eleven; he was afterward sent to the yeshibah of Volozhin; and in 1840 he went to Wilna and studied under R. Israel Lipkin. Though ordained rabbi, he preferred to teach; and, settling in his native town, he gathered around him a number of men who studied Talmud under him. In 1861 he became "rosh yeshibah" in Slonim, and continued in that position until 1900, when he went to the Holy Land to spend his last days. He was the author of "Pene Yehudah," on the tractates Shabbat and Ketubot (Wilna, 1871-72); "Leqet Yehudah," sermons (*ib.* 1873); and "Pene Yehudah," on Baba Qamma and Keritot (Warsaw, 1890).

**WERTHEIMER, JOHN**: English printer; born in London at the close of the eighteenth century; died there Dec. 18, 1883; senior member of the firm of Wertheimer, Lea & Co. From 1820 until his death he was actively engaged as a printer in London; and many important educational, medical, and philological works were issued from his press. His firm printed most of the works needing Hebrew type, also commercial reports and the "Jewish Chronicle."

**WERTHEIMER, JOSEPH, RITTER VON**: Austrian philanthropist and author; born at Vienna March 15, 1800; died there March 15, 1887. He was the descendant of an old and prominent Jewish family; and his father was an intimate friend of Joseph von Sonnenfels.

At the age of fifteen young Wertheimer entered the business of Freiherr von Stift, and five years later that of his father, whose partner he became in 1821. During his leisure hours he devoted himself especially to the study of pedagogic works. In 1824, 1826, and 1828 he traveled through Germany, Italy, France, and England; and during a protracted sojourn in London made a special

Joseph Wertheimer.

study of the kindergartens organized in that city in 1824. On his return he translated into German a work by the director of the London Central Infant School, publishing it under the title "Ueber Frühe Geistige Erziehung und Englische Klein-

kinderschulen" (Vienna, 1826; 2d ed. 1828). At the same time he addressed to the government of Austria a letter advocating the establishment of similar institutions in that country. With the cooperation of Johann Lindner, a Catholic priest, Wertheimer opened in 1830 the first kindergarten in the Austrian capital. The success of this institution, and of others founded in the same year, led to the organization of a central society for the establishment of infant asylums, under the patronage of the empress Carolina Augusta, and with the active cooperation of the Catholic clergy. Wertheimer was one of the founders also of the Allgemeine Rettungsanstalt of Vienna, a society for the care of released criminals and neglected children.

Wertheimer began his labors in behalf of his coreligionists by founding in 1840 the Verein zur Förderung der Handwerke Unter den Israeliten, a society whose aim it was to afford Jewish children an opportunity of learning trades, and thereby to dispel the common belief in the Jews' dislike for manual work; this object was fully realized, thousands of apprentices being trained by the society. In 1843 Wertheimer founded a Jewish infant school in the Leopoldstadt, Vienna, to which a non-sectarian kindergarten was added in 1868. During the thirty-two years (1835-67) in which he was actively connected with the management of the Jewish community of Vienna, first as trustee and subsequently as president, he rendered signal services to Austrian Judaism by raising the social and political status of his coreligionists, and by advocating religious and educational reforms. Among other institutions founded by Wertheimer may be mentioned the Verein zur Versorgung Hilfsbedürftiger Waisen der Israelitischen Cultusgemeinde (1860), which led to the establishment of a girls' orphan asylum; and the Israelitische Allianz zu Wien (1872), of which he remained president for a number of years. In recognition of his labors the emperor conferred upon him the Order of the Iron Crown with the accompanying patent of nobility, and he was made an honorary citizen of Vienna. He took active part in the conferences of the second Jewish synod of Augsburg July 11-17, 1871.

Wertheimer's interest in the emancipation of his coreligionists led him to publish his work "Die Juden in Oesterreich vom Standpunkte der Geschichte, des Rechtes und des Staatsvortheiles" (2 vols., Leipsic, 1842), which is still considered a standard work. As such a work could not be issued in Austria at that time, and as Austrian subjects were forbidden to print interdicted works elsewhere, the writer's name had to be concealed from the authorities. Of other works by Wertheimer the following may be mentioned: "Therese. Ein Handbuch für Mütter und Kinderwärterinnen" (1835); "Dramatische Beiträge" (1838), consisting partly of translations from the English; "Die Stellung der Juden in Oesterreich" (Vienna, 1853); "Die Regelung der Staatsbürgerlichen Stellung der Juden in Oesterreich" (*ib.* 1859); "Jahrbuch für Israeliten" (11 vols., *ib.* 1854-64); "Die Emancipation Unserer Glaubensgenossen" (*ib.* 1882); and "Jüdische Lehre und Jüdisches Leben" (*ib.* 1883). From 1848 until his death he edited the "Wiener Geschäftsbericht";

and he contributed many political, economic, and historical essays to various periodicals.

S. SA.

**WERTHEIMER, SAMSON:** Austrian court Jew, financier, and rabbi; born at Worms Jan. 17, 1658; died at Vienna Aug. 6, 1724. He was the son of Joseph Josel Wertheimer (d. May 2, 1713, at the age of eighty-seven), and received his education at the yeshivot of Worms and Frankfort-on-the-Main. He went to Vienna Dec. 2, 1684, and associated himself with Samuel Oppenheimer, sharing the latter's privilege of residence. During the absence of Oppenheimer, Wertheimer represented him in transactions with the Austrian government. Wertheimer soon gained the confidence of Emperor Leopold I., who presented a portrait of himself to Wertheimer and his son Wolf, and on Dec. 15, 1701, followed this gift with another of 1,000 ducats for the financier's success in obtaining for the daughter of the King of Poland a dowry of 1,000,000 florins from her father upon her marriage to Leopold's brother-in-law Duke Charles Philip. In the Spanish War of Succession Wertheimer united with Samuel Oppenheimer to procure the money necessary for the equipment of the imperial army and for the supply of provisions. After Oppenheimer's failure, and his sudden death in 1703, Wertheimer maintained the credit of the state and found new sources of income. On Aug. 29, 1703,

the emperor appointed him court factor, and extended for twenty years his privileges of free religious worship, denizenship, and immunity from taxation. Joseph I., who succeeded his father on May 5, 1705, confirmed Wertheimer's title and privileges.

Under Emperor Joseph I., Wertheimer maintained his position as a financier and creditor of the state. He was in personal relations with Prince Eugene of Savoy, to whom he paid 300,000 florins promised by Joseph I., Charles VI. adding another 100,000 florins. During the Turkish war Wertheimer made large loans to the government. The title of "Landesrabbiner," which the Jews of Hungary had bestowed on Wertheimer, was made effective by Charles VI. (Aug. 26, 1711). Wertheimer, according to a contemporary account of one of his relatives, Abraham Levi, was called the "Juden Kaiser." Ten imperial soldiers stood as sentinels before his house. He possessed many of the palaces and gardens in Vienna, and numerous estates and houses in Germany, *e.g.*, in Frankfort-on-the-Main, Worms, and other cities. He established schools, and distributed large amounts of money in Europe and in the Holy Land. Alien Jews were not allowed to remain over night in Vienna without a written permit from him.

Wertheimer did not discontinue his rabbinical studies. In a manuscript volume he left a number of derashot that he had delivered in the private synagogue in his house; these show considerable Talmudic erudition. He delivered many funeral sermons on the deaths of distinguished rabbis, as Sinihah Cohen and David ben Israel,

Know-  
edge.**

rabbi of Trebitsch and son-in-law of Menahem Krochmal. From far and near questions of religion, particularly of ritual, were submitted to him and to the rabbinical court over which he presided; and to the latter he called such great authorities as Jacob Eliezer BRAUNSCHEWIG, Simeon ben Judah Löb Jalles of Cracow, and Alexander ben Menahem ha-Levi of Prossnitz.

Moses Meïr Perls, for many years Wertheimer's secretary and almoner, mentions him in his "Megilat Sefer" (1709) as "a rabbi of great congregations in Israel." In some works Wertheimer is called "rabbi of Prague and Bohemia"; but he did not accept this title, as may be seen in an edition of Alfasi (Frankfort-on-the-Main, 1699-1700). His reputation spread

Tombstone of Samson Wertheimer at Vienna.  
(From a photograph.)

even to the Orient, where he was described as a "prince of the Holy Land" and given the title of "rabbi of Hebron and Safed." His native city also honored him with the title of rabbi. Many authors sought his "approbation," but only in a few cases did he give it, e.g., in Moses ben Menahem's "Wayakhel Mosheh," and Jair Bacharach's "Hawwot Ya'ir." He contributed liberally toward the publication of such works as "Hawwot Ya'ir" (in which his name appears with that of Samuel Oppenheimer), Judah ben Nisan's "Bet Yehudah," Gershon Ashkenazi's "Abodat Mæcenas. ha-Gershuni" and "Tif'eret ha-Gershuni" (in which David Oppenheimer also is mentioned). He and his son-in-law Moses Kann bore the greater part of the expense of

printing the Babylonian Talmud at Frankfort-on-the-Main in 1712-22; this excellent edition was confiscated and for thirty years kept under lock and key (see KANN, MOSES).

When Eisenmenger's "Entdecktes Judenthum" appeared at Frankfort in 1700, Wertheimer addressed to Emperor Leopold a petition in which he exposed the grave dangers which the malicious and slanderous attack of the unscrupulous author would bring upon the Jews. Accordingly the 2,000 copies of the book were confiscated, and for years its sale was forbidden.

When, in consequence of Rákóczy's insurrection (1708), the Jewish congregation of Eisenstadt had been dispersed and the wealthier members had taken refuge in Vienna, Wertheimer persuaded them to return or to help their poorer brethren rebuild the congregation. He himself built for them in Eisenstadt a house and a beautiful synagogue, still called "Samson's Schule." He lent his aid also in establishing about forty congregations in Hungary. In Frankfort-on-the-Main he founded and richly endowed a Talmudical school, at whose head was his son-in-law Moses Kann.

By the marriages of his children Wertheimer became connected with the most prominent families of Austria and Germany. His stepson Isaac Nathan Oppenheimer married a daughter of the wealthy purveyor Pösing; his eldest son, **Wolf**, married a daughter of Emanuel Oppenheimer. Wolf was an active agent in his father's financial transactions, and shared his dignity as court factor. He later experienced great reverses of fortune, however. Having invested a large part of his wealth in loans to the Bavarian government, the stipulated terms of repayment were not kept, and bankruptcy stared him in the face. For a time he was able to pay only half of the interest on the 150,000 florins which Samson Wertheimer had donated to charity, and of which Wolf was trustee. On his father's donation of 22,000 florins in favor of the German Jews in Palestine he did not pay any interest after 1733. His embarrassment was ended by Elector Maximilian, who liquidated his debts. In his will (1762) Wolf declared that, although entailing a great loss upon him, he accepted this liquidation in order to do justice to his creditors. Further, he enjoined his children to pay in full his father's donation of 22,000 florins, although in 1759 he (Wolf) had returned to the Frankfort congregation 10,000 florins which it had contributed to this fund. In 1769 the grandchildren of Samson Wertheimer secured the donation of 150,000 florins, and Wolf's heirs added thereto 40,000 florins, in compensation for unpaid interest. These two foundations at Vienna and Jerusalem still keep alive the name of Wertheimer.

Samson's second son, **Löb**, married a daughter of Issachar ha-Levi BERNMANN of Halberstadt, a relative of Leffman Behrens, court Jew of Hanover; thus the three great "shetadlanin" were closely connected. Samson's sons-in-law were: R. Moses Kann of Frankfort-on-the-Main; Issachar Berush ESKELES, father of the Vienna banker Bernhard ESKELES; Joseph, son of R. David Oppenheimer; and Seligmann Berend Kohn, called Solomon of Hamburg. His youngest son, **Joseph Josel** (b. 1718), married

a daughter of his stepbrother Wolf. Joseph died in Vienna (1761), where he was greatly esteemed for his charity and Talmudic learning. See COURT JEWS.

S. MAN.

**WERTHEIMER, SOLOMON AARON:** Hungarian rabbi and scholar; born at Bösing Nov. 18, 1866. In 1871 he went with his parents to Jerusalem, where he was educated; and in 1890 he resided at Cairo, Egypt, where he collected ancient Jewish manuscripts. He is the author of the following works: "Ebel Mosheh" (1885), sermon delivered on the death of Sir Moses Montefiore; "Hidushe Rabbi Nissim" (1888); "Pirke Hekalot" and "Zawwa'at Naftali" (1889); "Darke shel Torah" (1891), guide to the theory of the Talmud and to the fundamental principles of the Halakah and Haggadah; "Hatam Sofer" (1891), Talmudic studies, with notes; "Batte Midrashot" (4 parts, 1893-97), a collection of short midrashim from manuscripts, with glosses, notes, and introduction; "Ginze Yerushalayim" (3 parts, 1896-1902), a collection of scientific, literary, and poetic treatises, from rare manuscripts, with notes and introduction; "Midrash Haserot wi-Yeterot" (1898), from the Parma manuscript, collated with three Egyptian manuscripts; "Leshon Hasidim" (1898), notes and introduction to the "Sefer Hasidim"; "Kohélet Shelomoh" (1899), a collection of geonic responsa, with notes and introduction, and with Hebrew translations of the Arabic responsa; and "Abodat Haleb" (1902), a commentary on the Jewish prayers. S.

**WESEL, BARUCH BENDET BEN REUBEN** (called also **Benedict Reuben Gompertz**): German rabbi and scholar; born at Wesel in the latter half of the seventeenth century; died at Breslau in the latter part of 1753 or the beginning of 1754. He was a descendant of a prominent family which had ramifications in Germany, Austria, and Holland. His grandfather, Elijah Emmerich, was a confidential adviser of the Great Elector, and knew how to use his influence in behalf of his German coreligionists. Baruch's father, Reuben, was a rich merchant of Berlin, and was closely related to wealthy families in Breslau. In 1724 Baruch was one of the three members of the Breslau rabbinical court, and in that year he approved Solomon Hanau's "Sha'are Tefillah." On Jan. 30, 1728, the Council of Four Lands appointed him rabbi (*i. e.*, advocate)

of the Polish congregation at Breslau. From his father he had inherited a fortune which made him financially independent; and he engaged in the trade of a money-broker, the rabbinate being unsalaried. Through poor business management, however, he soon lost his fortune, and in 1733 he was compelled to call a meeting of the wealthiest members of his congregation, who granted him a salary. Shortly afterward he requested the city authorities to strike his name from the tax-list of wholesale merchants, and to enroll him among the "Toleranz-Imposts," the second class of taxpayers. This petition was rejected; he was imprisoned, compelled to pay his arrears of first-class taxes, and deprived of the title of rabbi. After the issuance of the decree of expulsion by Maria Theresa (July 10, 1738), he was allowed to remain in the city as a "Plautzen Rabbiner" only. When Frederick II. invaded Silesia, Wesel wrote in his honor a eulogy, in the form of an acrostic (Breslau, 1741), of which only two copies have been preserved.

On the issuance of the new decree of May 6, 1744, which permitted only twelve families of Polish Jews, in addition to the privileged Polish merchants, to remain in Breslau, Wesel was appointed "Landesrabbiner" without jurisdiction." In the same decree the Jews, who theretofore had buried their dead in Dyhernfurth, were ordered to purchase a site for a cemetery, but the congregation seemed unwilling to comply. Wesel thereupon suggested to the community that the money necessary for the purchase of the cemetery, as well as for the taxes on it, might be procured from a meat-tax. He died in the midst of these deliberations, and was buried in the cemetery at Dyhernfurth. His work "Meqor Baruk," a collection of ten responsa, appeared in Dyhernfurth in 1755 (2d ed., published by his son Moses, Amsterdam, 1771).

**WESSELY, HARTWIG.** See WESSELY, NAPHTALI HIRZ.

**WESSELY, MORITZ AUGUST:** German physician; born at Bleicherode, near Erfurt, Oct. 15, 1800; died at Nordhausen March 7, 1850; nephew of Naphtali Hirz WESSELY. He was educated at the universities of Halle and Göttingen (M. D. 1823); from 1823 to 1828 he studied at Paris; and in the latter year, returning to Germany, settled in Nordhausen, where he practised medicine until his death. Wessely received the title of "Geheimer Hofrath" from the Duke of Nassau, and that of "Sanitätsrath" from the King of Prussia. In 1849 he founded, together with L. Blödan, the "Neue Zeitung für Medizin" and the "Medicinal Reform," both of which journals he edited until his death.

F. T. H.

**WESSELY, NAPHTALI HIRZ (HARTWIG):** German Hebraist and educationist; born at Hamburg 1725; died there Feb. 28, 1805. One of his ancestors, **Joseph Reis**, fled from Podolia in 1648 on account of the CHMIELNICKI persecutions, during which his whole family had perished. After a brief sojourn in Cracow, Reis settled in Am-

sterdam, where he acquired great wealth, and where he, in 1671, was one of the signers of a petition to the Dutch government requesting permission to erect a synagogue. Together with his younger son, **Moses Reis** later settled in Wesel on the Rhine, whence the family name "Wessely" originated. In the synagogue at Wesel are still preserved some ritual paraphernalia presented to it by Moses Reis Wessely, who, upon the advice of the Prince of Holstein, whose purveyor he was, removed to Glückstadt, then the capital of Sleswick. He established there a factory of arms. King Frederick VI. of Denmark later sent Moses to Hamburg as his agent; and while there he transacted important business for Peter the Great also. Moses' son, **Issachar Ber**, was the father of Naphtali Hirz.

Naphtali Hirz Wessely passed his childhood at Copenhagen, where his father was purveyor to the king. In addition to rabbinical studies under Jonathan Eybeschütz, he studied modern languages. As the representative of the banker Feitel, he later visited Amsterdam, where he published (1765-66) his "Lebanon," or "Gan Na'ul," a philological investigation of Hebrew roots and synonyms. Although prolix in style, and lacking scientific method, this work established his reputation. After his marriage at Copenhagen, he represented Feitel at Berlin, and there became associated with Mendelssohn. Wessely encouraged the latter in his labors by publishing "Alim li-Terufah," a work advocating the "bi'ur" and the translation of the Bible into German. To this work Wessely himself contributed a commentary on Leviticus (Berlin, 1782), having published, two years previously, a Hebrew edition of the Book of Wisdom, together with a commentary.

Wessely was an ardent advocate of the educational and social reforms outlined in Emperor Joseph

II.'s "Toleranzedict." He even risked his reputation for piety by publishing a manifesto in eight chapters, entitled "Dibre Shalom we-Emet," in which he emphasized the necessity for secular instruction, as well as for other reforms, even from the points of view of the Mosaic law and the Talmud. This work has been translated into French as "Instructions Salutaires Adressées aux

**His Works.** Communautés Juives de l'Empire de Joseph II." (Paris, 1792); into Italian by Elia Morpurgo (Goerz, 1793); and into German by David Friedländer under the title "Worte der Wahrheit und des Friedens" (Berlin, 1798). By thus espousing the cause of reform, as well as by his support of Mendelssohn, Wessely incurred the displeasure of the rabbinical authorities of Germany and Poland, who threatened him with excommunication. His enemies, however, were finally pacified through the energetic intervention of the Italian rabbis, as well as by Wessely's pamphlets "Meqor Hen," in which he gave evidence of his sincere piety. In 1788 Wessely published in Berlin his ethical treatise "Sefer ha-Middot," a work of great moral worth. He published also several odes, elegies, and other poems; but his masterwork is his "Shire Tiferet" (5 vols.; i.-iv., Berlin, 1782-1802; v., Prague, 1829), describing in rhetorical style the exodus from Egypt. This work, through which he earned the admiration of his contemporaries, was translated into German (by G. F. Hufnagel and Spalding; 1789-1805), and partly into French (by Michel Berr; Paris, 1815). His commentaries on the Bible were published by the society Mekize Nirdamim (Lyck, 1868-75) under the title "Imre Shefer."

Wessely influenced his contemporaries in various directions. As a scholar he contributed, by his profound philological researches, to the reconstruction of the language of the Bible, though his work is marred by prolixity and by his refusal to admit shades of meaning in synonyms. As a poet he possessed perfection of style, but lacked feeling and artistic imagination. No one exerted a greater influence than he on the dissemination of modern Hebrew; and no one, on the other hand, did more to retard the development of pure art and of poetic intuition. Because of the courageous battle which he fought in behalf of Jewish emancipation, Wessely may be regarded as a leader of the Maskilim.

**WESSELY, WOLFGANG:** Austrian jurist and theologian; born at Trebitsch, Moravia, Oct. 22, 1801; died at Vienna April 21, 1870. At the age of fourteen he was sent to Prague to prepare himself for the rabbinate, graduating as Ph.D. in 1828, and as LL.D. in 1833. In 1831 he was appointed teacher of religion at the gymnasium, and in 1837 at the Jewish congregational school; in 1846 he received permission to lecture on Hebrew and rabbinical literature at the University of Prague. In the meantime he had made himself known by contributions to juristic literature; and when, in 1848, trial by jury was introduced into Austria, the minister of justice sent him on a mission through France, Rhinish Prussia, Holland, and Belgium to study the legal methods employed in these countries. In the following year he was appointed privat-docent of jurisprudence at the University of Prague; in 1852 he was made assistant professor; and in 1861 he was appointed ordinary professor, being the first Austrian Jew to hold such a position.

In addition to contributions to periodicals, Wessely was the author of the following works: "Wer Ist nach den Grundsätzen des Oesterreichischen Rechts zur Vornahme einer Jüdischen Trauung Befugt?" (Prague, 1839); "Netib Emunah" (*ib.* 1840; 8th ed. 1863), a catechism; "Tefillat Yisrael," a prayer-book with German translation in Hebrew characters (*ib.* 1841; 2d ed., with German characters, *ib.* 1844); "Ueber die Gemeinschaftlichkeit der Beweismittel im Oesterreichischen Civilprocesse" (*ib.* 1844); and "Die Befugnisse des Nothstands und der Nothwehr nach Oesterreichischem Rechte" (*ib.* 1862). As a theologian he had strong rationalistic tendencies; and he explains BAT KOL as being the voice of conscience (Isidor Busch, "Jahrbuch," iii. 229).

D.

**WEST:** One of the "four skirts" (כַּנְפוֹת, Isa. xi. 12; Ezek. vii. 2; Job xxxvii. 3, xxxviii. 13) or "four corners," known also as the "four ends" (Jer. xlix. 36) or "four winds" (Ezek. xxxvii. 9; Dan. viii. 8, xi. 4), into which the Hebrews, following Assyrian analogies, divided heaven and earth. As the EAST was termed "qedem" (= "front"), the west was designated as "aḥor" (= "rear"; Isa. ix. 11; Job xxiii. 8). Since the Mediterranean Sea was west of Palestine, the noun יָם (= "sea") became a

Naphtali Hirtz Wessely.

favorite term to denote the west (Ex. x. 19, xxvii. 12, xxxviii. 12; Gen. xii. 8, xxviii. 14; Isa. xlix. 12; Ps. cvii. 3), another word being "ma'arab" (= "the point where the sun sets"; Ps. lxxv. 7 [A. V. 6], ciii. 12, cvii. 3; Isa. xliii. 5, xlv. 6).

In later Hebrew "ma'arab" is the common term for "west" (B. B. 25a). It may have been in opposition to the Babylonian belief that the entrance to the realm of death was situated in the west that R. Abahu advanced the opinion that the SHEKINAH was in the west (*ib.*). The contrary assumption, attributed to the heretics ("minim"), who were said to maintain the doctrine that the Shekinah resided in the east, seems, therefore, to be a reminiscence of Babylonian influence. Since Palestine lay to the west of Babylon, it came to be designated as Ma'araba (Ber. 2b

obtained the assistance of Jewish residents, who were always antagonistic to the Spanish government.

The Portuguese were no less intolerant toward the Jews; and on their capture of Brazil from the Dutch in 1654 they exiled numbers of Jews. These sought refuge in the Dutch colonies, especially in Curaçao, to whose prosperity they have notably contributed until the present time. It was the tolerance shown by the Dutch and British governments which helped to build up the supremacy of those powers in the West Indies. France was nearly as intolerant as Spain; but prior to the promulgation of the "Code Noir" (1685) Jews were allowed, mainly through the policy of Colbert, to reside and trade in the French West Indies, despite the hostility of the Jesuits. In the eighteenth century laws

*et seq.*; Yeb. 17a *et passim*), and its inhabitants were called the "sons of the West" (Niddah 51b).

E. G. H.

**WEST INDIES:** Group of islands in the North Atlantic adjoining the Gulf of Mexico; so named because supposed by Columbus, who discovered them, to be India reached by the western route. For convenience the Dutch possessions in South America are known as the Dutch West Indies, and are treated here. Kayserling asserts that the Jew Luis de Torres, who accompanied Columbus in 1492, settled in Cuba and died there. Jewesses who had been forcibly baptized are known to have been sent to the West Indies by the Spanish government. Thus the Jews have been identified with these islands from the time of their discovery; but although families of Crypto-Jews are known to have lived in Cuba during four centuries, it was not until 1881 that they were legally admitted into the Spanish colonies; nor did they obtain full rights until the Spanish-American war. As late as the year 1783 the Inquisition claimed its victims from among the Cuban Maranos. It is probable that the buccaneers

were passed permitting some Jews to live in the West Indies; and in 1722 David GRADIS established a business at St. Pierre, Martinique, and two years later a branch office in Santo Domingo. He sent out merchantmen from Bordeaux, carrying cargoes of alcohol, meal, and pickled meat; and his family gradually grew so wealthy and powerful that the efforts of the colonial authorities to expel it were unavailing. Abraham Gradis, son of David, traded between Bordeaux, the French West Indies, and Canada, and was granted exceptional privileges, such as the right of acquiring real estate.

Jewish activity in the West Indies commenced in the middle of the seventeenth century, at a time when the exiled Spanish Jews had already made their influence felt in Amsterdam and in the Levant trade. Jews sent out by the government of the Netherlands had colonized Curaçao and Surinam, in which latter island there were twelve Jewish families in the year 1650. Governor Matthias Beck was directed to grant them land and to supply them with slaves, horses, cattle, and agri-

cultural implements. Their settlement was situated on the northern outskirts of the present district of Willemstad, and is still known as the Jodenwyk. In 1651 there was a large influx of Jews into Curaçao, under the leadership of Jan de Illan, who had the rights of patroon, and the contractor Joseph Nuñez de Fouseca, known also as David Nassi. The settlement was successful; and by reason of the tolerant attitude of the government large numbers of Jews went thither from Brazil after the Portuguese conquest of that country in 1654. The settlement became increasingly prosperous. A congregation was established in 1656, and a new synagogue built in 1692. In 1750 there were 2,000 Jewish inhabitants in the island, and at the present time (1905) the trade is almost entirely in the hands of Jews.

Jews had settled in **Surinam** prior to the occupation of that colony by the British (1665), when they were confirmed in all the privileges previously enjoyed by them, including full religious liberty. Summonses served on the Sabbath were declared to be invalid; and civil suits for less than the value of ten thousand pounds of sugar were to be decided by the Jewish elders, magistrates being obliged to enforce their judgments. Jews were permitted to bequeath their property according to their own laws of inheritance. In order to induce Jews to settle in Surinam it was declared that all who came thither for that purpose should be regarded as British-born subjects. In Feb., 1667, Surinam surrendered to the Dutch fleet, and in the treaty of Breda, which confirmed the Dutch in their possession, it was stipulated that all British subjects who desired to do so should be allowed to leave the country. In 1675 Charles II. despatched two commissioners with three ships to bring off those wishing to leave. The governor of Surinam, fearing that the emigration of the Jews would injure the prosperity of the country, refused to let them depart. According to a list which has been preserved, ten Jews, with 322 slaves, wished to go to Jamaica. The governor at first claimed that Jews could not be British subjects, and, being compelled to yield this contention, took advantage of the arrival of a frigate in the harbor to pretend that he had received fresh instructions from the Netherlands forbidding the migration of the Jews. Finally the British commissioners sailed away without having accomplished their purpose. The number of Jews in Surinam continued to increase, and a splendid synagogue was erected there in 1685; David Pardo of London, who officiated as its rabbi, died in Surinam in 1713. Maps still exist showing the position of the "Joodsche Dorp" and "Joode Savaane" in Surinam (see R. Gottheil in "Publ. Am. Jew. Hist. Soc." ix.). In 1785 the centennial of the synagogue was celebrated.

Jews were probably among the first colonizers of **Barbados**. In 1656 they were granted the enjoyment of the laws and statutes of the commonwealth of England relating to foreigners and strangers. Schomburgk relates that Jews settled at Barbados in 1628 ("History of the Barbadoes"). In 1661 Benjamin de Caseres, Henry de Caseres, and Jacob Fraso petitioned the King of England for permission to live and trade in Barbados and Surinam. The petition,

supported by the King of Denmark, was referred to the Commissioners for Foreign Plantations, who reviewed the whole question of the advisability of allowing Jews to reside and trade in his Majesty's colonies, a matter which they said "hath been long and often debated." The request of the applicants was granted, but the principle was left undecided. About the time that this case was before the council, Jacob Josua Bueno Enriques, a Jew who had been for two years resident in Jamaica, petitioned the king for permission to work a copper-mine in that island. The result of this request is not known. In 1664 one Benjamin Bueno de Mesquita obtained letters of denization and relief from the provisions of the Navigation Act, but scarcely had these been obtained when he, with two sons and three other Jews, was banished from Jamaica for failure to find a promised gold-mine. His tomb has been discovered in New York. In 1671 Governor Lynch of Jamaica wrote to Secretary Arlington, opposing a petition requesting the expulsion of the Jews. Thenceforward their position became more secure. Despite special taxation in 1693, and a prohibition from employing indentured Christian servants (1703), the Jews' privileges were not afterward infringed. In 1802 an act of the Barbados legislature removed all the disabilities of the Jews.

There were Jewish colonists also in the **Leeward Islands**. A special act designed to prevent Jews from monopolizing imported commodities bears date of 1694. This was repealed in 1701 on the petition of the Jews, with the proviso that in case of war they should assist in the defense of the island to the utmost of their power, and further "behave themselves fairly and honestly for the future."

Spain and Portugal's loss was gain for the Dutch and British West-Indian colonies. For a few years the French possessions shared in the advantage. When France occupied **Martinique** in 1635 she found there a number of Jews whom the Dutch had brought with them as merchants or traders. For more than twenty years these were left unmolested, until their prosperity excited the envy of the colonists, and especially of the Jesuits, who caused various discriminating enactments to be issued from time to time against the Jews. Toward the year 1650 a Jew named Benjamin d'Acosta introduced into Martinique the cultivation of the sugar-cane. This benefit was rewarded with ingratitude; for when the epoch of toleration in France gave way to new persecutions under Louis XIV.,

**Martinique**. an order of that king, dated Sept. 24, 1683, commanded that the Jews should be expelled from the French possessions in America. The "Code Noir" of 1685, referred to above, repeated this injunction. In spite of occasional complaints, Jews continued to enter the island during the eighteenth century. They remained subject to the caprices of the colonial governors until the Revolution, when all discriminations against them were abolished.

There exists a Jewish congregation in the Danish island of **St. Thomas**. After the sacking of St. Eustatius by Rodney in 1781, a number of Jews emigrated thence and settled in St. Thomas, where they in 1796 built a synagogue under the appella-

tion "Blessing and Peace." In 1803 the congregation numbered twenty-two families, having been augmented by arrivals from England, St. Eustatius, and Curaçao. In **St. Thomas**. 1804 the synagogue was destroyed by fire. It was replaced by a small building erected in 1812; and in 1823 this was superseded by a larger one. Ten years later a still larger synagogue was erected, the community having in the meantime increased to sixty-four families. In 1850 King Christian VIII. sanctioned a code of laws for the government of the congregation. There were at that time about 500 Jewish inhabitants in the island, many of whom held civil offices. Among the ministers were B. C. Carillon of Amsterdam and M. N. Nathan and Mayer Myers of England. Of recent years, however, the Jewish community of St. Thomas has greatly declined, numbering at the present time (1905) little more than fifty members. See also BARBADOS; CUBA; CURAÇAO; JAMAICA; MARTINIQUE.

V. E.

**WEST VIRGINIA:** One of the east-central states of the American Union; formerly part of Virginia; made a separate state on June 19, 1863. While individual Jews went farther West as early as 1825, there seem to have been no communities before 1840 in the territory now constituting the state. On April 20, 1849, a Jewish Cemetery Association was incorporated in **Wheeling** by Samuel Kline, Meyer Heyman, Alexander Heyman, Julius Ballenberg, Isaac Horkheimer, Meyer Stein, Simon Stein, Seligman Oppenheimer, and Marx Graf. In the following month of the same year the Congregation Leshem Shomayim was organized, with Myer Mannheim as its rabbi. Since then nine ministers have occupied its pulpit, the present incumbent (1905) being Harry Levi, who was installed in 1897. The congregation now has 110 members, a Ladies' Hebrew Benevolent Society (founded 1875), a Relief Society (1891), and a Rabbi Wise Personal Aid Gild (1899). The Mercantile Club, Wheeling's Jewish social organization, has a membership of forty-five.

**Charleston**, the capital of the state, contains the Congregation Bene Yeshurun, which was organized in 1873, and which is now composed of forty-four members, the present rabbi being Leon Volmer; the city likewise has a small Orthodox congregation, a benevolent society, and a social club, the Germania, founded in 1874.

**Parkersburg**, the third largest city of the state, has a Ladies' Sewing Society, a Hebrew Aid Society, and the Progress Club, but no congregation. At different times, however, services have been held on the fall holidays.

**Huntington** is one of the younger cities; but in 1887 the Congregation Ohev Shalom was organized

with eighteen members. Its charities are now in charge of the Ladies' Hebrew Benevolent Society.

Few in number as they are, the Jews of West Virginia have their fair share of prominent citizens, though they are not conspicuous in high public positions. Joseph Shields, now residing in Cincinnati, was collector of internal revenue at Charleston during the Civil war, and Daniel Mayer was a commissioner of immigration under Governor Jacobs, prosecuting attorney twice in Logan and once in Boone county, a director of the hospital for the insane (1887), a member of the state legislature (1889), and for the past eight years consul to Buenos Ayres. Charleston is represented in the army by Lieut. Samuel Frankenberger, and in the navy by his brother, Lieut. Hugo Frankenberger, who took high honors at Annapolis. Morris Horkheimer of Wheeling was a member of Governor Atkinson's staff, and commissary-general of the state under Governor White. Samuel Gideon of Huntington has run the whole gamut of public office in the southwestern part of the state, being president of the Cabell County Court for six years, and Mike Broh is also a prominent citizen of Huntington, being the president of the Merchants' Association and a director of the Chamber of Commerce. For some years Albert Zilinzinger was a member of the Weston Asylum board.

**Grafton**, **Fairmont**, and **Sistersville** contain few Jews, but for some time have held annual services on New-Year and the Day of Atonement.

Wheeling has 450 Jews, all affiliated with the congregation; Charleston about 300; Parkersburg 150; and Huntington 100. In the entire state there are about 1,500 Jews in a total population of 958,000.

**WETTE, WILHELM MARTIN LEBE-RECHT DE:** Christian Biblical critic and theologian; born at Ulla, near Weimar, Jan. 12, 1780; died in Basel June 16, 1849. He took his doctorate in Jena, where he became privat-docent in 1806. The following year he was appointed professor of theology at Heidelberg, and in 1810 was called to the new University of Berlin, where he worked in harmony with Schleiermacher. A public expression of sympathy for Sand, the murderer of Kotzebue, occasioned his dismissal from the university (1819). After remaining three years in Weimar he was called (1822) as professor of theology to Basel, where he passed the rest of his life.

De Wette ranks among the foremost Old Testament scholars of the nineteenth century. His dissertation on Deuteronomy (1805) and his "Beiträge zur Einleitung in das Alte Testament" (1806-7) may be said to have laid the foundation (in conjunction with Vater's works) for the subsequent development of Old Testament criticism. In his commentary on the Psalms (1811) he called in question a number of the Davidic titles and the Messianic character of certain of the Psalms. His translation of the Old Testament (1809-11) had a wide circulation in Germany and elsewhere. In 1814 he published his "Lehrbuch der Hebräisch-Jüdischen Archäologie," which went through a number of editions. De Wette's critical work on the Old Testa-

ment was summed up in his "Lehrbuch der Historisch-Kritischen Einleitung in die Kanonischen und Apokryphischen Bücher des Alten Testaments" (1817), which was translated into English by Theodore Parker (1843), and was edited in revised form by Schrader (1869). Though later critics have departed in some points from his positions, his fundamental principle of historical development in the Old Testament has been the basis of all succeeding work. Besides the books mentioned above he wrote much on the New Testament, and on theology and ethics.

**WETZLAR:** Prussian city in the district of Coblenz; formerly a free city. Jews lived there probably as early as the twelfth century, since a young Jew of "Writschlar" is mentioned in connection with the murder of Alexander of Andernach (Arouius, "Regesten," No. 845, pp. 154 *et seq.*). The name of Wetzlar occurs also in a document of the year 1241, which contains the "taxes of the Jews" ("Monatsschrift," 1904, p. 71). On May 15, 1265, Archbishop Werner of Mayence entered into a compact of public peace with several counts and cities, including Wetzlar, to protect the Jews against all violence (Aronius, *ib.* No. 706, p. 291), and on July 9, 1277, Rudolph I. granted Siegfried von Runkel an income of ten marks from the 100 marks which the community of Wetzlar was required to pay as a yearly tax to the emperor (Wiener, "Regesten," No. 59, p. 10). In the beginning of the fourteenth century Emperor Louis the Bavarian transferred to Siegfried's son, Dietrich von Runkel, the entire yearly tax which the Jews of Wetzlar were required to pay the sovereign, while, in recognition of the services of Gerhard, of the house of Solms-Königsberg, Henry VII. granted him 300 marks in silver from the money paid by the Jews for protection. Finally, in a document dated Mayence, June 5, 1349, Charles IV., as a reward for faithful services on the part of Count John of Nassau, called "Von Merenberg," made to him a conditional transfer of the Jews of Wetzlar, with the taxes they paid into the imperial exchequer.

The community of Wetzlar was among those that suffered at the time of the Black Death in 1349 (Salfeld, "Martyrologium," pp. 78, 83 [German part, pp. 268, 284]); and in the same year, by a letter dated at Speyer on the Tuesday after Palm Sunday, Charles IV. confirmed all the privileges of the city of Wetzlar, adding that it should continue to levy the customary taxes on the Jews as servants of the royal treasury. Charles likewise confirmed the claim of Count John of Nassau-Weilburg to the Jewish taxes in a document dated March 17, 1362, but promised to impose no further burdens upon the Jews of that city. In 1382 King Wenzel granted Wetzlar the privilege of admitting Jews in order

**Allowed to Admit Jews.** stipulating that they should be subject to the orders of the municipal council only. When the emperor, in

1491, levied a conscription upon the imperial cities, a valuation of 30 gulden was put upon the Jews of Wetzlar ("Blätter für Jüdische Geschichte und Li-

teratur," supplement to "Israelit," 1900, i. 21). On Sept. 10, 1593, the municipal council decreed that within three months all Jews living in Wetzlar (including those from other cities) and holding notes against Christian citizens should renew them; otherwise the authorities would refuse to aid in collecting such notes. On March 20, 1604, the council enacted that the Jews should produce in court within a month all the notes they held against citizens. On Aug. 30, 1659, the Jews were forbidden to take as interest more than 4 pfennig per reichsthaler a week; and on June 4, 1661, they were prohibited from importing tobacco into Wetzlar. On the accession of Emperor Leopold (Aug. 30, 1661) the imperial commissioner, Count John Frederick of Hohenlohe, sent special envoys to receive the oath of allegiance of the Jews of Wetzlar in the town hall, in the presence of the council. Similar action was taken on the accession of Joseph I., in 1705; of Joseph II., in 1766; and of Leopold II., May 13, 1791.

About 1755 the Jews of Wetzlar were permitted to build a synagogue, which was dedicated in 1756; and a special tax of 10 kreuzer was imposed, to be paid to the messenger of the imperial supreme court of judicature at Wetzlar whenever he passed by on business ("Sulamith," 1807, ii. 407, note). Although the *JUDENSTÄTTIGKEIT* permitted only twelve Jewish families to live in Wetzlar, the town council admitted a larger number, that they might divide among themselves the 20 or 30 reichsthaler paid by each Jew for permission to reside in the city. This was set forth by the citizens in a complaint to the council in 1707. An "agreement" was accordingly made on July 18, 1712, that the number of resident Jews should again be reduced to twelve families. In 1836 there were 680 Jews living at Wetzlar, which had been incorporated with the kingdom of Prussia in 1815; but in 1904 only a little over 170 resided there, and the community, which supports a philanthropic society and a *hebra kaddisha*, has included itself in the rabinate of Dr. Munk at Marburg ("Statistisches Jahrbuch des Deutsch-Israelitischen Gemeindebundes," 1903, p. 78).

Jews by the name of Wetzlar lived at Celle, in the province of Hanover (Neubauer, "Cat. Bodl. Hebr. MSS." pp. 529, 1145), at Emden (see the local "Memorbuch"), at Frankfurt-on-the-Main (Horovitz, "Die Inschriften des Alten Friedhofs der Israelitischen Gemeinde zu Frankfurt-am-Main," p. 743), at Altona (Grunwald, "Hamburgs Deutsche Juden," 1904, p. 305), at Prague (Hock, "Familien Prags," p. 120), and elsewhere. R. Joel of Wetzlar died at Minden, Westphalia, in 1698, while Solomon b. Simeon Wetzlar of Fürth wrote the moral code entitled "Hakiroth ha-Leb" (Amsterdam, 1731; Steinschneider, "Cat. Bodl." No. 6978), and a certain Wolf Wetzlar Ashkenazi is mentioned by Maggid ("Zur Gesch. und Genealogie der Günzburge," p. 195, St. Petersburg, 1899).

A. LEW.

**WE-YE'ETAYU:** A piyyut by Eleazar KALIR (Zunz, "Literaturgesch." p. 21), chanted by the hazan during the Musaf service on the days of New-Year and Atonement, according to the northern ritual; but omitted by many German congregations. The only music recognized as traditional is an eighteenth-century air, of distinct inferiority to the other

Washington, D. C., where he is a member of the Society of Washington Artists and of the Washington Water Color Club. Weyl's specialty is landscape-painting, and his work shows sympathy with the moods of nature. He was awarded the first prize at the exhibition of the Society of Washington Artists in 1891, has exhibited at the National Academy

WE-YE'ETAYU

inherited melodies of the Penitential season, but none the less firmly established in the tradition of many congregations, and prized for its quaintness.

s. F. L. C.

**WEYL, MAX:** American painter; born at Mühlen, Württemberg, in 1840. At the age of fifteen he went to the United States, but returned to Europe to study art. His home is now (1905) in

of Design in New York, and is represented in the Corcoran Gallery of Washington by a landscape entitled "Approaching Night." He was a protégé of Salvador de Mendonca, formerly Brazilian minister at Washington, and four of his paintings were in the Mendonca collection.

**WEYL, MEÏR B. SIMĤAH:** German rabbi; born at Lissa 1744; died at Berliu 1826. He was a pupil of Hirsch Janow. In 1771 he became associate rabbi at Lissa, and in 1784 was called as associate rabbi to Berlin, where he was elected chief rabbi in 1800, receiving the title of acting chief district rabbi in 1809. He published no separate works, but his numerous opinions on questions of the Law, which prove the depth of his scholarship and judgment, are included in the collections of contemporary rabbis, as in those of Akiba Eger, Jacob Lissa, Salmon Cohen, Solomon Posner, Aryeh Löb Breslau, Zebi Hirsch Samoscz, Noah of Lubraniec, and Bendix Baruch Gompertz. A series of approbations, including those referring to the Jewish calendar, published with the sanction of the Berlin Academy of Sciences, show the importance attached to his opinion in learned circles. While he was opposed to innovations in ritual, he was the first advocate and in part the actual founder of seminaries for rabbis and teachers in Prussia.

**WHALE:** A cetaceous mammal. Several species of cetacea are found in the Mediterranean as well as in the Red Sea. In the Authorized Version of the Bible the Hebrew "tannin" is often rendered "whale"; while the Revised Version has "sea-monster" (Gen. i. 21; Job vii. 12), "dragon" (Ezek. xxxii. 12), and "jackal" (Lam. iv. 3).

The name "leviathan," which usually designates the fabulously great fish preserved for the future world, seems in certain passages of the Talmud to refer to some kind of whale; so, for instance, in Hul. 67b, where leviathan is said to be a clean fish, having fins and scales, and in B. B. 73b, where a fabulous description of its enormous size is given. In Shab. 7b the כְּלִבִּית (meaning perhaps the porcupine) is said to be the vexer of the leviathan. See also LEVIATHAN AND BEHEMOTH.

**WHEAT** (Hebr. "hitṭah"; Deut. viii. 8 *et seq.*): The chief breadstuff of Palestine in both ancient and modern times. It has been observed that the cultivation of wheat indicates a higher stage of civilization than the cultivation of barley alone. Barley bread is, therefore, mentioned comparatively seldom (Judges vii. 13; II Kings iv. 42), and was probably the food of the common people only.

Among the Greeks and Romans, as in the Orient to-day, barley was less esteemed than wheat, which was therefore the preferred breadstuff. The loaves of bread used for divine sacrifice were naturally made only from the choicest wheat flour.

In Palestine the winter grain is sown in late autumn, when the early rains have loosened the soil and prepared it for plowing. Wheat is harvested somewhat later than barley, and generally at a time when the heavy rains have ceased (I Sam. xii. 17). The harvest season varies, according to the districts, between the end of April and the beginning of June. On harvesting, thrashing, and measuring the wheat see AGRICULTURE; BAKING; BREAD.

Wheat was an article of export from ancient times, Tyre (according to Ezek. xxvii. 17) obtaining wheat from Judah (comp. also Acts xii. 20). Galilee, according to Josephus, was the most fruitful district. At present the plains of Philistia and Jezreel produce chiefly wheat, but the Hauran district is still the great granary of Syria; and its grain is exported in large quantities by way of Haifa and Beirut.

Grains of wheat were eaten also roasted, a survival from the period when grinding and baking were not understood. Parched kernels ("ḳali") seem to have been very popular among the ancient Hebrews (I Sam. xvii. 17, xxv. 18; II Sam. xvii. 28), especially during harvesting (Ruth ii. 14; Lev. xxiii. 14), as is still the case to-day.

**WHEELING.** See WEST VIRGINIA.

**WIDAL, FERNAND GEORGES:** French physician; born at Paris March 9, 1862. From 1886 to 1888 he devoted himself to public demonstrations of the researches of the faculty of pathological anatomy, and during the two years following was in charge of a course in bacteriology in the laboratory of Professor Cornil. In 1895 he was appointed visiting physician to the hospitals of Paris, and in 1904 became an instructor in the faculty of medicine. He is now (1905) physician to the Hôpital Cochin, and is in charge of the medical clinics at the same institution.

Widal is the author of a remarkable series of essays on infectious diseases, erysipelas, diseases of the heart, liver, nervous system, etc., besides being a prolific contributor to various medical journals and encyclopedias.

**WIDDIN:** Bulgarian fortified town, situated at the confluence of the rivers Widd and Danube.

The beginnings of the Jewish community of Widdin were in the thirteenth century, its earliest members being some Byzantine and Hungarian Jewish settlers. At that time the city was a part of the territory of the waywode of Wallachia. According

to several chroniclers, two celebrated rabbis went to Widdin in 1376—Moses Yewani ("the Greek") and R. Shalom of Neustadt. R. Shalom is said to have founded the first rabbinical school in Bulgaria, and to have been the first rabbi of the community; he was succeeded by R. Dosa Yewani, the son of Moses Yewani.

After the taking of Constantinople in 1453, during the campaigns of Mohammed the Conqueror in Anatolia, the waywode of Wallachia, Vladimir V., levied on every Jew of consequence a tribute of 1,000 silver aspers per head, fixing the loss of the right eye or the right ear as the penalty for failure in payment. The Jews of Constantinople appealed, in the name of their coreligionists, to the sultan Mohammed, who, according to the statement of Elijah Capsali, revoked the barbarous edict on his return from Anatolia. This was prior to his expedition into Transylvania in 1474. In spite of its final conquest by the Turks, Widdin remained under the immediate government of the rulers of the province of Wallachia, then tributaries or vassals of the Ottoman empire. In the seventeenth century the city passed for a time into the hands of the Hungarians, but was again surrendered to the Turks (1690).

In the interval Jews of different nationalities settled in the city. Among the principal families of Greek origin were the Pyzantes (or Byzantes), Pappos, and Polychrons; among those of German extraction were the Ashkenazis and Grünbergs; of Spanish origin (after the year 1492), the Peñaroya, Dueñas, Niño, and Rosañes families. There were also Portuguese Jews, as the Namias; Italian, as the Farhis of Florence and Lecce; French, as the Yarhis of Lunel and the Kimhis of Provence; and even some natives of Barbary, e. g., the Al-Kalais, the Al-Ajams, and others. A responsum of Samuel of Medina, dated 1558, reveals the fact that the Jews of Widdin were extensive cheese-makers, the principal manufacturers of that time being Joseph Tchillek and Solomon Uriel.

In the year 1784 the Ventura family removed from Spalatro, in Dalmatia, and settled in Widdin, where it founded a dynasty of spiritual rulers. The following members of this family were successively rabbis of Widdin: Shabbethai b. Abraham

**The Venturas.** (1784-1806), Raḥamim Abraham Ventura (1806-10), Gedaliah Shabbethai Ventura, and Joseph ben David Ventura. Other rabbis later on were Benziyyon b. Shabbethai, Abraham Cohen, Bekor Eliakim, David Cohen, and Solomon Behar David.

Among the notable events in the history of the community of Widdin was the incident of the Jewish physician Cohen, falsely accused of poisoning his patron, Passvanoglu, the governor of the city, in 1807. This event, which came near being the cause of a wholesale slaughter of the entire community, occasioned the institution of an annual feast-day (4th—some say 9th—of Heshwan), known as the PURIM OF WIDDIN, in thanksgiving for its escape. About 1830 one Conforte b. Eliakim, a native of Salonica, was the "ḥakim-bashi," or physician, to the governor. During the war between Servia and Bulgaria in 1885, when Widdin was being bombarded, the Jews of that

town took refuge in Kalafat, Rumania. This occurred in midwinter; and the Jews, without means and wholly unprepared for flight, had no other refuge than the ancient synagogue.

Widdin was the first Bulgarian community to produce a Jewish writer of note; this was R. Dosa Yewani, author of "Perush-we-Tosafot," written about 1430 and still (1905) preserved at Wilna (Michael, "Or ha-Ḥayyim"; Benjacob, "Ozar ha-Sefarim," s. v.). Two other writers who were

**Literature.** natives of Widdin may be mentioned: Shabbethai b. Abraham Ventura, author of "Nehar Shalom" (Amsterdam, 1775), and David Shabbethai Ventura (brother of the former), author of "Kokba di-Shebit," Salonica, 1799.

One of the relics of antiquity preserved in the local synagogue is a silver plate inscribed with the date 1658, given by the little Jewish community of the island of Adda-Kalessi, in the Danube, near Widdin.

At the present day Widdin contains about 2,000 Jews in a total population of 14,772. They include merchants and dealers in grain and cotton goods, together with tailors, shoemakers, tinsmiths, and makers of the "tcharik," or shoes worn by the peasantry. At the close of the Russo-Turkish war the community of Widdin built a magnificent synagogue, the finest in Bulgaria. Connected with the synagogue is a school containing 225 pupils (175 boys, 50 girls), and a number of charitable organizations and societies, among which are the Rohezim (for the interment of the poor), the Bikḥur Ḥolim (for the assistance of the sick), a Women's Society, and a Zionist Society.

**WIDDUI.** See CONFESSION OF SIN.

**WIDOW:** The law of Israel treats the widow as a privileged person, and seeks to indemnify her in some degree for the loss of her natural protector. Thus the movable property of a widow can not be attached for debt (Deut. xxiv. 17), whether she be rich or poor, though the text speaks only of her garment (see EXECUTION). To meet the monition of Isaiah (i. 17), "Judge the fatherless, plead for the widow," it became the rule, in arranging the order of cases in a court, to take up the complaints of widows next after those of the fatherless (see PROCEDURE IN CIVIL CAUSES). The duty

**Prerogatives of a complaining widow** is emphasized by the assertion that God Himself "doth execute the judgment of the fatherless and widow" (Deut. x. 18), and that "a father of the fatherless, and a judge of the widows, is God in his holy habitation" (Ps. lxxviii. 6). Widowhood "after marriage" gives to a daughter complete independence of her father; she becomes, in legal language, "an orphan during the father's lifetime." This principle is thus broadly laid down (Ket. iv. 2): "After he has given her in marriage the father has no power over her," though it is different where the husband dies after betrothal, but before marriage.

Under the sacerdotal law (Lev. xxi. 14) a widow

is not a suitable wife for the high priest, but she may marry an ordinary priest ("kohen hedyot"). Yet, according to the Rabbis, where the latter has married a widow, and is thereafter appointed high priest, he may retain her as his wife (Yeb. 77a). Ezekiel (xliv. 22), in his scheme of a hierarchy, forbade to the ordinary priest marriage with a widow, unless her first husband had been a priest; but his scheme was never accepted as law.

In marrying again, a widow naturally is not favored as highly as a maiden. The smallest jointure for the latter is 200 zuzim; for the former, only a mina, or 100 zuzim (Ket. i. 2). Marriage with a maiden is generally celebrated on Wednesday; with a widow, on Thursday (Ket. i. 1). The rights of the widow in the husband's estate have, in the main, been set forth under **קַטְוּבָה**, and are secured by the contract. The question of priority in

payment between the widow's dues and the bond creditors of the husband, or between several widows of a polygamous husband, has been treated under **פְּרוּרְיָה**. In the opinion of R. Akiba, prevailing over that of R. Tarfon, there is no "marshaling of assets" from outstanding deposits or demands in favor of the widow or of creditors; but the heirs are allowed to collect them, or to take possession (Ket. ix. 2, 3). The reason given is that no one can collect a demand against the decedent's estate without an oath (if such is required by the heirs) that he has not received it before, either in whole or in part.

Notwithstanding the difference between the customs of Jerusalem and Galilee on the one hand, and of Judea on the other, mentioned in Ket. iv. 12, the rule was recognized at an early day that the widow may dwell in her late husband's house, and receive her support from his estate, as long as she remains his widow and until she judicially demands payment of her dowry and jointure, or accepts such payment (see Bertinoro *ad loc.*).

The husband can not, at the time of entering upon the contract, confine the wife to any one fund out of which she may as a widow collect her ketubah; nor can he say to her, "Here, laid out on this table, is thy [due under the] ketubah"; for the whole of his estate is bound for it, including what he acquires by inheritance from his brothers after marriage.

Where the widow is, under the husband's appointment, guardian of his infant children, an oath can be demanded by the heirs as to her management, unless the husband has in writing freed her from rendering such an oath (Ket. ix. 5);

but if from her husband's grave she goes back to her father's house, or to the house of her father-in-law, and is not appointed guardian afterward, she owes an oath only as to the future, not as to her previous receipts (Ket. ix. 6). A widow who lessens her ketubah (*i. e.*, collects a part thereof) can not thereafter demand further payments, except upon an oath as to the amount received; she must take the oath, also, if one witness testifies that she has been paid. So where land, sold or encumbered to third parties, is needed to satisfy the ketubah, the oath required in all these cases is taken in the most solemn form (Ket. ix. 7, 8).

Where the widow claims support from the estate in the hands of the heirs, her earnings belong to them. The husband's heirs are not bound for the expenses of her burial; these fall upon those who inherit her ketubah (Ket. xi. 1).

The widow, even if the husband died after betrothal, but before marriage, may, without the aid of a court, sell enough of his landed estate to satisfy her ketubah; and if the proceeds of the first sale are not sufficient, she may sell more until the full amount is realized. She may do the same thing to secure her support, if that is not given her. But this method of self-help seems not to have been practised in later times (Shulhan 'Aruk, Eben ha-'Ezer, 96, 5). However, if she sells lands [that have a known value?] for less than their value, her sale is void; for in doing so she exceeds her powers, though the sale would hold good if it had been made under a decree of court (Ket. xi. 4, 5, where some dissenting views are recorded).

L. N. D.

**WIENER, ADOLF**: German rabbi; born in Murowana-Goslin, Posen, 1811; died in Oppeln, Prussian Silesia, Aug. 25, 1895. Having acquired his diploma as Ph. D., he went as rabbi to Posen, where he introduced a modern synagogal service with German sermons. He met, however, strong opposition, headed by Solomon Eger; and the services could take place only under police protection. In 1845 Wiener was called as rabbi to Oppeln, where he officiated until his death. He was one of the most progressive rabbis of his time; and at the synods of Cassel (1844), Leipsic (1869), and Augsburg (1870) he advocated the following reforms in Judaism: revision of the prayer-book; employment of the organ in divine service; permission to travel on Sabbaths; and the abolition of all second days of festivals. His chief ambition, however, was to release the Jews from what he called the authority of the Talmud.

Wiener was the author of the following works: "Die Opfer- und Akeda-Gebete. Ein Beitrag zur Orientierung in der Cultusfrage" (Breslau, 1869); "Worte Gesprochen an der Bahre der Seligen Frau Rosalie Verwitwete Cohn" (Oppeln, 1871); and "Die Jüdischen Speisegesetze" (Breslau, 1895), a very radical criticism of the dietary laws.

**WIENER ISRAELIT, DER**. See **PERIODICALS**.

**WIENER, JACQUES**: Belgian engraver; born at Hoorstgen, Rhine Province, 1815; died at Brussels Nov. 3, 1899. When thirteen years of age he was sent to Aix-la-Chapelle to be instructed in drawing, modeling, and engraving by his uncle Baruch, who was an artist of considerable merit. In 1835 Wiener went to Paris for further study; and in 1839 he settled in Brussels as a medal-engraver. His work attained a high degree of perfection, and his reputation as a medalist spread to foreign countries, notably Germany. He was especially distinguished

for his fidelity to the minutest details. The first Belgian postage-stamps were designed by Wiener, who also arranged for their manufacture, for which purpose he visited England in 1849. In 1872 he lost his eyesight through overwork, and was compelled to renounce his art, which, however, he had taught to his brothers **Karl Wiener** (d. 1867) and **Leopold WIENER**.

Wiener was decorated with the Order of the Knights of Leopold and with that of the Prussian Eagle. Upon his death the King of Belgium sent his family an autograph letter of condolence and also offered military honors at the funeral; these, however, the family declined.

**WIENER, LEO:** American philologist; born at Byelostok, Grodno, Russia, July 27, 1862; studied in the gymnasium of Minsk and Warsaw, in the University of Warsaw, and in the Polytechnic of Berlin. Emigrating to the United States, he had for several years a varied career in New Orleans and in Kansas City, being obliged to work as a day-laborer and to peddle fruit in order to gain a livelihood. At length he was appointed teacher in Odessa, Mo., and later professor in the University of Kansas, where he remained until he was called to an assistant professorship in Slavic languages at Harvard University, which office he still (1905) holds.

Wiener is a prolific writer on philology, having contributed numerous articles to philological journals in America, England, Germany, Russia, and Austria. He has published also several articles on Jewish questions in the Jewish press of the United States, and has devoted especial attention to the study of Judeo-German in its philological aspects, having published several monographs on this subject in scientific journals. He is the author of "The History of Yiddish Literature in the Nineteenth Century" (New York, 1899), and has compiled an "Anthology of Russian Literature." He has translated numerous works from the Russian and from the Yiddish, including "Songs from the Ghetto" by Morris Rosenfeld, and the complete works of Leo Tolstoy.

A.

J. LEB.

**WIENER, LEOPOLD:** Belgian engraver and sculptor; born in Holland 1823; died at Brussels Jan. 24, 1891. He was a resident of Boitsfort, a small town near Brussels, of which he was several times elected mayor. In this place he devoted his undivided attention to engraving and sculpture; and several pieces of statuary sculptured by him are displayed in public squares throughout Belgium. In 1864 he was appointed engraver to the government, and soon after royal engraver, various titles of distinction being conferred upon him.

Wiener enjoyed a high reputation in musical circles

also, and was at one time vice-president of the Conservatoire at Brussels. Many schools and institutions, notably a school of design for the working classes, owe their origin to his activity and energy.

L. R.

**WIENER, MEÏR:** German teacher; born at Glogau June 3, 1819; died at Hanover March 31, 1880; head master of the religious school at Hanover. He made a German translation of the "Shebet Yehudah" of Solomon ibn Verga (Hanover, 1855; 2d ed. 1856; reprinted, Königsberg, 1858; Warsaw, 1882). He made also a German version of the "Emek ha-Baka" of Joseph ha-Kohen, adding a sketch of the life and works of the author (Leipsic, 1858).

Further, Wiener was the author of "Regesten zur Geschichte der Juden in Deutschland Während des Mittelalters" (ib. 1862), in which he compiled all the data relating to the Jews; but his lack of independent study and his failure to make careful researches concerning the reliability of his sources seriously diminished the value of his work. He contributed numerous historical articles to the "Monatsschrift" (vols. ii.-xvii.), among which those treating of the Jews of Speyer and of Hanover deserve special mention. He likewise wrote for the "Ben Chananja" (iv.-viii.) and for the "Allgemeine Zeitung des Judenthums."

**WIENER-NEUSTADT:** City of Austria; situated thirteen miles south of Vienna. Jews settled in this city probably shortly after its foundation in the twelfth century, records showing that Duke Frederick II., on June 9, 1239, issued an order excluding them from holding those offices "in which they might cause inconvenience to Christians." Also in the spurious charter of the city, alleged to have been granted by Duke Leopold IV., the Jews are mentioned, their rights being based largely on the Austrian laws of 1244 and 1277 pertaining to Jews. The earliest tombstone discovered at Wiener-Neustadt bears date of 1285, and marks the grave of Guta, first wife of a certain Shalom. Tombstones from the years 1286, 1353, 1359, and 1370 have also been preserved.

During the time of the Black Death the Jews of Wiener-Neustadt were fully protected; but during the reign of Emperor Maximilian they were expelled from the city, their synagogue being transformed into a Catholic church (1497). Joseph I. permitted the city to admit the Jews who had fled from Hungary during the Kuruz rebellion; but these left the city again as soon as the uprising had been quelled. In 1848, Jews settled anew in Wiener-Neustadt; but at that time they were not allowed to bury their

dead in the city, and had to take them to the cemeteries of the neighboring Hungarian or Austrian communities. They did not obtain a cemetery of their own until 1889.

Among the earlier rabbis of the Wiener-Neustadt congregation may be mentioned: Thirteenth century: Hayyim ben Moses, teacher of Hayyim ben Isaac, and author of "Or Zaru' ha-Kaṭon"; Moses Taku, author of the philosophical work "Ketab Tamim"; and Hayyim, son of Isaac of Vienna. Fourteenth century: Shalom (the teacher of Jacob Mölln), Isaac of Tyrnau, and Dossa of Widdin, the last-named of whom wrote a supercommentary on Rashi's work. Fifteenth century: Aaron Blumlein, one of the martyrs who were burned at Enns (1420) on a charge of desecrating the host; Israel Isserlein (d. 1460); and Josmann Cohen.

**WIENER VIERTELJAHRSSCHRIFT.** See PERIODICALS.

**WIENIAWSKI, HENRI:** Russian violinist and composer; born at Lublin, Russian Poland, July 10, 1835; died at Moscow April 1, 1880; brother of Joseph WIENIAWSKI. He early showed himself in possession of great musical talent, and when only eight years of age he went to Paris, where he became a pupil of Claval and Massart at the Paris Conservatoire. At the age of eleven he was awarded the first prize for violin-playing. After one year's absence, during which he gave concerts at St. Petersburg and Moscow, he returned to Paris, where he studied harmony under Colet.

In 1850 Wieniawski toured with great success the principal cities of Poland, Russia, Germany, France, England, Belgium, and Holland. Ten years later he was appointed first violin to the Czar of Russia, and remained in St. Petersburg until 1872, when, together with Anton Rubinstein, he started on a prolonged tour through the United States. Upon his return to Europe in 1874 he accepted the post of professor of violin at the Conservatoire in Brussels as successor to Vieuxtemps. After a few years, however, he resigned this position and, in company with his brother Joseph, resumed his travels. A serious disease which he contracted forced him to abandon his journey and to hasten back to Russia. At Odessa he suffered a relapse; he was conveyed to Moscow, and died there.

Wieniawski was one of the greatest of modern violin-players, and possessed a striking individuality. His playing evinced an impetuous temperament mixed with a warmth and tenderness peculiar to himself. His compositions include two concertos for violin and orchestra; several polonaises, legends, and duets for pianoforte and violin; a fantasia on Russian airs; a "Fantaisie sur le Prophète"; and a set of studies.

**WIENIAWSKI, JOSEPH:** Russian pianist and composer; born at Lublin, Poland, May 23, 1837; brother of Henri WIENIAWSKI. He studied music under Zimmerman, Alkan, and Marmontel,

and harmony under Leccoppey, at the Paris Conservatoire. After his return to Russia in 1850, he frequently accompanied his brother Henri on his concert tours. In 1856 he studied music under Liszt at Weimar, and later theory under Marx, in Berlin. In 1866 he settled in Moscow, at first officiating as professor in the Conservatory of Music, and later opening a private school for pianoforte. From Moscow he went to Warsaw, where he often appeared in concerts. Among his compositions may be mentioned: two overtures for orchestra; a string quartet; a concerto for pianoforte and orchestra; a "Grand Duo Polonais" for pianoforte and violin; a "Valse de Concert"; fantasias; idyls; and several concert pieces.

BIBLIOGRAPHY: Champlin and Aphorp, *Cyclopaedia of Music and Musicians*.

J. GO.

**WIERNIK, PETER:** Russo-American journalist; born at Wilna, Russia, in March, 1865. He received the customary Jewish education. From 1878 to 1882 he was in Riga; in 1882 he lived at Kovno; and in the following year he joined his parents at Byelostok, where he stayed for two years. His father, a maggid, instructed him in the Talmud and rabbinica, but otherwise he was self-taught. In 1885 he emigrated to the United States, where he settled in Chicago. Two years later he became a compositor on the "Jewish Courier," and in five years rose to be its editor. In 1898 he left for New York, where he has since resided. In that city he has been connected with the "Jüdisches Tageblatt," and he is at present (1905) on the staff of "Das Morgen Journal."

In addition to his collaboration on several American and Yiddish journals and his contributions to THE JEWISH ENCYCLOPEDIA, Wiernik is the author of "History of the Jews," New York, 1901.

BIBLIOGRAPHY: *American Jewish Year Book*, 5665.

F. T. H.

**WIESBADEN:** German town in the province of Hesse-Nassau; capital of the former duchy of Nassau. Schenk ("Gesch. der Stadt Wiesbaden") thinks that Jews lived there in the fourteenth century; but he gives no documentary evidence to support this view. There is no record of persecution of the Jews in Nassau, either in the ARMLEDER riots (1338) or during the Black Death (1348-49). In the public peace ("Landfrieden") promulgated in 1265 by Archbishop Wernher of Mayence, together with the lords of Epstein, Falkenstein, and others, an allusion is found to "certain undisciplined persons who have arisen against the Jews contrary to God's command," and who are to be punished as disturbers of the peace. It is not said, however, that such disturbances actually occurred in any place in the duchy. A "Judengasse" in Wiesbaden attests also the early presence of Jews there.

During the Thirty Years' war several Jewish families from the surrounding district, whose lives and property were in danger from the hostile soldiery, were received and sheltered in Wiesbaden; and when, soon after, their removal was insisted upon by the clergy, the latter were opposed by a considerable number of the citizens and officials, who protected the Jews. Indeed, a friendly sentiment toward

the Jews seems to have found its way among the population. In 1700 a citizen of Wiesbaden—Heinrich Tillmann König—took such a liking to the Jewish religion that he faithfully observed its ceremonies, although he had to endure much at the hands of the clergy for so doing. It is strange that about the same time, as Schenk asserts, ERSENMENGER composed part of his "Entdecktes Judenthum" in Wiesbaden.

For a long time the Jews of Wiesbaden formed only a small community and had no prominent rabbis, although now and again one is mentioned in collections of responsa. In 1832 Abraham Geiger was appointed to the rabbinate. He did good work in school and synagogue, and introduced confirmation and similar reforms. It was there that he published his "Wissenschaftliche Zeitschrift für Jüdische Theologie," and called together a meeting of rabbis (see CONFERENCES, RABBINICAL). Geiger resigned (1838) on account of some dissension in the community; and after a short interval, during which Benjamin Hocrstädter, at that time teacher in Wiesbaden, was in charge of the rabbinate, he was succeeded by Solomon Süßkind, district rabbi in Weilburg, who was transferred to Wiesbaden in 1844 and remained in office until 1884, when he retired on a pension. The present (1905) incumbent is Michael Silberstein, formerly district rabbi in Württemberg.

The congregation, which has greatly increased since 1866, now (1905) numbers about 1,800. Besides the main community there is the Altisraelitische Cultusgemeinde, an Orthodox congregation, with a membership of 300.

Wiesbaden has a total population of 86,086.

**WIESNER, ADOLF:** Austrian journalist and author; born in Prague 1807; died in New York Sept. 23, 1867. His name was originally Wiener, but, being desirous of pursuing a juridical career, which was not then possible for a Jew in Austria, he embraced Catholicism, assuming the name Wiesner. After practising law in the criminal court of Vienna for a short time, he devoted his endeavors to literary pursuits; and by the aid of Count Kolowrat, then home secretary, his historical drama "Inez de Castro" was staged at the Vienna Burgtheater in 1842. A second play, entitled "Die Geiseln und der Negersklave," and based on Emperor Charles V.'s expedition against Tunis, failed, however, of acceptance. He was the author of two more dramas: "Der Feind" and "Der Arzt und Seine Tochter."

In reply to the Russian privy counselor L. von Tengoborsky's work "Die Finanzen, der Oeffentliche Credit, die Staatschuld und das Besteuerungssystem des Oesterreichischen Kaiserstaates" (2 vols., Paris, 1843), which attracted considerable attention, Wiesner wrote his "Russisch-Politische Arithmetik" (2 vols., Leipsic, 1844). In 1846, the political situation in Vienna becoming intolerable, he went to Frankfurt, and shortly after his valuable historical work "Denkwürdigkeiten der Oesterreichischen Censur vom Zeitalter der Reformation bis auf die Gegenwart" (Stuttgart, 1847) appeared. In 1848 he was elected to the Frankfurt Parliament, siding with the extreme Left; and during its session he edited the "Frankfurter Oberpostamts-Zeitung."

Seeing no future for himself in Germany, and being still unable to return home, Wiesner emigrated in 1852 to the United States. He settled in New York, and for some years was employed by railroad and steamship companies, besides doing literary work. It was due to his activity that the Schiller monument was erected in New York in 1859. In 1860 he edited the periodical "Geist der Weltliteratur," which enjoyed but a brief existence. He afterward moved to Baltimore, where he edited a "Turn-Zeitung." During the Civil war he devoted himself to the care of disabled Union soldiers; and at the close of the war the federal government acknowledged his good offices by appointing him to a post in the Baltimore custom-house, where he rendered himself helpful to the many German immigrants with whom he came in contact. Early in 1866 he became editor of the "Illinois-Staatszeitung." On learning of the imperial amnesty of June 8, 1867, Wiesner, though very ill, started for Germany. He reached New York exhausted, and suffered an attack of typhoid fever, from which he died.

**WIFE.** See HUSBAND AND WIFE.

**WIG** (Judæo-German, *sheitel*; *peruk* [from the French "perruque"]): A covering for the head, consisting of false hair interwoven with or united to a kind of cap or netting. Wearing false hair on the head to supplement a scanty natural supply, or as an adornment, appears to have been a common custom among women in the Talmudic period. The Mishnah calls false hair "pe'ah nokrit" (a strange lock), and declares that on Sabbath a woman may wear a wig in the courtyard but not in the street, the apprehension in the latter case being that she might remove the wig and carry it from private to public premises, which is forbidden (Shab. vi. 5, 64b). The husband may object to a wife's vow if it involves shaving off her hair. One tanna thought she might wear a wig, but R. Meir said the husband might object to the wig on the ground of uncleanness (Naz. 28b). The question is discussed whether or not a wig may be considered as a part of the body of the wearer (Sanh. 112a; 'Ar. 7b).

The wearing of the hair loose and exposed in the street was forbidden to women as disorderly and immoral. A married woman who disobeyed this Jewish ordinance ("dat Yisra'el") established a legal cause for divorce and forfeited her dowry (Ket. vii. 6, 72a). This ordinance came to be scrupulously observed, and a married woman could be distinguished by her hair being entirely covered; if one went with uncovered head it was taken as evidence that she was a virgin (Sifre 11). For a woman, during the reading of the "Shema," to leave visible hair which usually is covered is considered an impropriety (Ber. 24a). In the Middle Ages married women scrupulously cut or shaved off their hair, covering their heads with kerchiefs. Some women wore on the forehead a silk band resembling in color that of

the hair. During the sixteenth century R. Judah Katzenellenbogen and R. David ha-Kohen of Corfu permitted a wig to be used under a cover (David ha-Kohen, Responsa, No. 90). Moses Alashkar permitted the side hair to be partly exposed (Responsa, No. 35). During the eighteenth and nineteenth centuries rich women wore wigs in various styles, more or less exposed. The "pe'ah nokrit" in the Mishnah was pointed out to prove the early custom, but the opponents of the innovation explained that the wig was covered, not exposed. R. Moses Sofer and his disciple Akiba Joseph were decidedly opposed to the wig ("Leb ha-'Ibri," pp. 129, 189, Lemberg, 1873).

In modern times Orthodox Jewesses in eastern Europe wear wigs, while in the Orient they still don the kerchief that covers all the hair. In America some of the women immigrants wear the wig; but the newly married women have all discarded it and wear their natural hair in the prevailing style. There is nothing in rabbinical literature to show that wigs were ever worn by men, aside, perhaps, from the statements that the Roman legions carried scalps with them ("karkefet"), and that Ishmael's scalp adorned the heads of the kings (Hul. 123a). The scalps appear to have been used in battle to insure good fortune and victory; and it is possible they were used as wigs. See HAIR IN RABBINICAL LITERATURE.

**WIGA, JUDAH:** Polish preacher of the sixteenth and seventeenth centuries. The name so written is given by Sternberg ("Gesch. der Juden in Polen," p. 183), apparently taken from Polish sources, and ascribed to a famous preacher of Lublin. Basnage ("Histoire des Juifs," ix. 993, The Hague, 1716), however, calls him Judah Vega, saying he must not be confounded with the Spanish rabbi of Amsterdam (see VEGA, JUDAH); and he refers to him as having published a collection of sermons toward the end of the sixteenth century during the reign of Sigismund. Wolf ("Bibl. Hebr." i., No. 709), though using the Hebrew form ויגא, agrees with Basnage, adding that the work was entitled "Derashot." On the other hand, this Judah Wiga may be identical with one Judah ben Moses ב"ר יהודה (transliterated "Bigo" by Wolf, *l.c.* iii., No. 754; and "Bigo" by Zunz, "G. V." p. 430), the author of "Malke Yehudah" (Lublin, 1616), a collection of fifteen sermons.

**WIHL, LUDWIG:** German poet and philologist; born at Wevelingen, Prussia, Oct. 24, 1807; died at Brussels Jan. 16, 1882; educated at Krefeld, Cologne, Bonn, and Munich (Ph.D. 1830). In his "Anfänge der Kunst Unter den Griechen in Verbindung mit der Erklärung einer Phöniciſchen Inſchrift," read before a learned society (1831), he advanced the theory that Phœnician was a linguistic derivative of Hebrew, and that Phœnicia had exercised a profound influence on the art of early Greece. Despite the efforts of his patron, the Archbishop of Cologne, and of others, Wihl's hopes for a university

career were doomed to failure, because he declined to be baptized.

Wihl then entered upon a journalistic career at Frankfort-on-the-Main and Hamburg, and published his first volume of poems at Mayence in 1837. During a trip to England two years later he wrote his "Englischer Novellenkranz"; but his account of Heine, written at Paris for the Hamburg "Telegraph," brought upon him the enmity of the poet. In 1840 he returned to Frankfort, where, with the help of funds advanced by a Catholic banker named Seufferheld, he established a boarding-school for boys; this school, however, existed for only eighteen months, because the authorities forbade him to admit Catholic pupils. During the next few years Wihl lived at Amsterdam and at Utrecht as a teacher and journalist, until he was called to Paderborn as an editor. A recklessly radical article which he published in a local paper during the Revolution of 1848, however, brought on him a sentence of a year's imprisonment in a fortress, and he fled to France, where he became professor of German at Paris and Grenoble. On the outbreak of the Franco-Prussian war he retired, from patriotic motives, to Brussels, where he resided for the remainder of his life on a pension.

Wihl was the author of the following works: "Geschichte der Deutschen National-Literatur von Ihren Ersten Anfängen bis auf Unsere Tage," 1840; "West-Oestliche Schwalben" (Mannheim, 1847; French translation, "Hirondelles Orientales," by Mercier, Paris, 1860), a collection of lyric poems; "Le Mèdiant pour la Pologne" (Paris, 1864), a collection of French and German poems; and "Le Pays Bleu" (*ib.* 1865). He published also a number of "Portraits Poétiques," in which he gave free rein to his caustic sarcasm.

J. KA.

**WILCZYNSKI, ERNEST JULIUS:** American mathematician; born in Hamburg, Germany, Nov. 13, 1876. He went with his parents in 1885 to America, where he attended the Chicago high school. Returning to Germany in 1893, he studied astronomy and mathematics at the University of Berlin (Ph.D. 1897; thesis, "Hydrodynamische Untersuchungen mit Anwendungen auf die Theorie der Sonnenrotation"). In 1898 he became computer at the Nautical Almanac Office, Washington, D. C., and then instructor in mathematics successively at Columbian University Summer School there and at the University of California, being appointed assistant professor at the latter institution in 1902. From 1903 to 1905 he was absent on leave in Europe as research associate of the Carnegie Institution at Washington. Besides a large number of articles in mathematical and astronomical journals, he has published "Projective Differential Geometry of Curves and Ruled Surfaces," Leipzig, 1905.

**WILD ASS:** Rendering used in Gen. xvi. 12 (R. V.), Job vi. 5, xi. 12, xxiv. 5, xxxix. 5, Ps. civ. 11, Isa. xxxii. 14, Jer. xiv. 6, and Hos. viii. 9 for the Hebrew "pere," and in Jer. ii. 24 for "perah";

in Job xxxix. 5 for the Hebrew "arud"; and in Dan. v. 21 for the Aramaic "arad." In all these passages the animal is depicted as extremely wild, shy, wary, and swift. At present it is rarely met with in Syria.

The wild ass, though it resembles in appearance the tame animal, is classed in the Talmud, in a ritual aspect, among the wild animals (Kil. i. 6, viii. 6). It is the only animal whose flesh underneath the muscles can be torn either way (Hul. 59a). It turned the mill in which grain was ground ('Ab. Zarah 16b), while its flesh was fed to the lions in the king's menagerie (Men. 103b). See also Ass.

**WILDA, WILHELM EDUARD:** German jurist; born at Altona Aug. 17, 1800; died at Kiel Aug. 9, 1856; educated at the Johanneum of Hamburg and the universities of Göttingen, Heidelberg, Kiel, and Copenhagen. The year 1826 was passed partly in Berlin and partly in travel through Germany, France, and Switzerland. After practising as an attorney at Hamburg from 1826 to 1830, he was appointed assistant professor at Halle, where he remained until 1842, when he was called to Breslau as full professor. In 1854 he was transferred to Kiel. Wilda, who was the founder of comparative jurisprudence, was the author of the following works: "Das Gildewesen im Mittelalter" (Halle, 1831; 2d ed., Berlin, 1838); and "Das Strafrecht der Germanen" (Halle, 1842), a volume forming the second part of his "Geschichte des Deutschen Rechtes." In 1838 he founded, in collaboration with Reyscher, the "Zeitschrift für Deutsches Recht," which was published first at Tübingen and later at Leipsic, and was discontinued in 1861.

**WILDERNESS** (Hebr. "horbah" [Jer. vii. 34; Isa. xlvi. 21], "yeshimon" [Isa. xlvi. 19; Deut. xxxii. 10; Ps. lxxviii. 40], "midbar" [very frequently], "arabah" [generally in poetic speech and as a parallel to "midbar"], "ziyyah" [Ps. lxxviii. 17], "tohu" [Ps. cvii. 40; Job xii. 24; Deut. xxxii. 10], "shammah," "shemamah" [Isa. v. 9; Jer. xlii. 18; Ezek. xxxv. 7], "sharab" [Isa. xxxv. 7; R. V., "glowing sand"]): An examination of the Hebrew terms rendered "wilderness" or "desert" in the English versions shows that these translations are inadequate and misleading. "Horbah" implies violent destruction; and it is more exactly rendered by "waste places" (Ps. cii. 7 [A. V. 6]) or "desolation" (Jer. xli. 2). The latter term also expresses more accurately the connotation of "yeshimon" and "shammah" or "shemamah," while "tohu" conveys the idea of chaotic confusion (Jer. iv. 23; Job xxvi. 7). "Arabah" comes nearer to the meaning of the English "desert" (Isa. xxxv. 1; Jer. li. 43); "ziyyah" implies the absence or dearth of water (Ps. lxxiii. 2 [A. V. 1]); while the more probable render-

ing of "sharab" is "mirage" (see Isa. xxxv. 7, R. V., marginal reading). In so far as the Hebrew terms do not imply artificial desolation and destruction, they connote a stretch of uncultivated land suitable for grazing and occupied by nomads (Num. xiv. 33), as is clear both from the etymology of the word "midbar," and from the fact that it and its synonyms usually denote the wilderness of the wandering or Exodus. Such a midbar occasionally existed in the very midst of land under tillage (Gen. xxxvii. 22), and again was found at the borders as a transition from cultivated to uncultivated districts (Deut. iv. 43; I Sam. xvii. 28).

This "wilderness" is described as without animate occupants (Deut. xxxii. 10), or as a district where no man is found (Jer. ii. 6; ix. 1, 11; Job xxxviii. 26) and where sowing is not carried on (Jer. ii. 2). It is an abandoned stretch (Isa. xxvii. 10; comp. vi. 12, vii. 16) without protection (Ps. lv. 8 [A. V. 7]), and a thirsty land (Ezek. xix. 13; Job xxx. 3, R. V.) devoid of vegetation (Hos. ii. 3; Isa. xli. 19). These terrors play upon the fancy of the people (Isa. xxx. 6; comp. "Z. D. P. V." iii. 114 *et seq.*). Some parts of the wilderness are characterized as "ne'ot" (Jer. xxiii. 10), or pastures, and others as "arabot," or dry, barren stretches (II Sam. xv. 28), or as "harerim," or stony table-lands (Jer. xii. 12, xvii. 6). The wilderness is the home of wild animals ("ziyyim"; Isa. xiii. 21, xxxiv. 14), including wild asses (Jer. ii. 24), and thorns grow there (Judges viii. 7. 16) as well as the heather (Jer. xvii. 6, xlviii. 6).

The term "midbar" is applied to the district of the Hebrews' wanderings between the Exodus and the conquest of Palestine. This region stretched south of Palestine in or on the border of the Negeb; separate parts of it are called the wildernesses of Sin, Shur, Kadesh, and the like. The wilderness between Canaan and the Euphrates is repeatedly mentioned in prophetic writings (Ezek. xx. 35; Isa. xl. 3), and some portions of it are named in Num. xxi. 11, 13 and Judges xi. 22. The wilderness referred to in Josh. xv. 61 is that of Judah, which comprised the eastern declivity of the mountainous region toward the Dead Sea. The character of this district illustrates most strikingly the great variety of localities designated in Biblical usage as wildernesses; for in it were pastures (I Chron. xxvi. 10), caves (I Sam. xxiv. 3), and cities (Josh. xv. 61), though it contained also barren rocks and precipices. This wilderness of Judah included the wildernesses of Maon (I Sam. xxiii. 24) and Ziph (*ib.* xxiii. 14). Connected with it to the north were the wildernesses of Gibeah (Judges xx. 42), Michmash (I Sam. xiii. 18), Ai (Josh. viii. 15), and Beth-aven (*ib.* xviii. 12).

#### WILDERNESS, WANDERINGS IN THE.

—**Biblical Data:** Next to the Exodus, the remembrance of the wanderings in the desert for a period corresponding to the life of a generation (see *FORRY*) is central to the historic consciousness of Israel. Hence the scene of these migrations is often called "the" wilderness ("ha-midbar") par excellence (Ex. iii. 18, xiv. 11; Num. xxxii. 13; Deut. i. 31; comp. Judges xi. 16, 18; Amos ii. 10; *et al.*). This wil-

derness corresponds to that designated as Arabia Petraea by the Greco-Roman geographers. The story of the Hebrews' wanderings is related in: (1) Ex. xiv.-xix. 24, 32, comprising the stations from the time Israel left Egypt to the promulgation of the Law on Sinai; and Num. x. 11-

**Stages of Wanderings.** xxii. 1, giving those from the revelation to the arrival of the people opposite Jericho; (2) Deut. i. 2, 19 *et seq.*; ii.; iii. 6 *et seq.* (comp. xxxiv.), which

are without chronological order, but begin with the desert of Sinai (Horeb) and extend to the incursion into the land of the Amorites; (3) Num. xxxiii. 5-50, cataloguing the camping stations on the march from Rameses to Jericho. The last-mentioned list differs from the data in Exodus and Numbers in so far as it inserts eighteen stations between Hazereth (Num. xi. 35) and Kadesh or Sin (Num. xii. 16; xiii. 2, 21; xx. 1) that are not mentioned in the historical narratives, while the stations enumerated in Num. xi. 1 *et seq.*; xxi. 16, 19 are omitted. Other, smaller divergences appear between Num. xxxiii. 30 *et seq.* and Deut. x. 6, and between Num. xx. 22 *et seq.* and the same passage of Deuteronomy.

—**Critical View:** The discrepancies just referred to have been noticed by all commentators, and various theories have been advanced to account for them. The favorite explanation of the precritical scholars was that the historical narratives contain only the names of the localities at which something occurred worth chronicling, while the fuller list includes all the points touched on the march. But this assumption was recognized as insufficient, especially by Goethe ("Westöstl. Divan"), who urged the opinion that the eighteen stations were fictitious and were inserted merely to carry out the theory that Israel wandered about in the wilderness forty years and had one station for every year. Most of the names of the stations

can not be located topographically, and comparison of the data shows that the order of the stations varies as well as the events connected with them.

In P a clearly chronological scheme is carried out, the duration of the wanderings being calculated accurately by days, months, and years. On the fifteenth of the first month the Israelites started out from Rameses (Num. xxxiii. 3); on the fifteenth of the second month they reached the wilderness of SIN (Ex. xvi. 1); in the third month they arrived at that of Sinai (Ex. xix. 1), the exact day having been expunged by a later hand (see Dillmann, Commentary, ed. Ryssel, p. 209); on the first of the first month of the second year the Tabernacle was erected (Ex. xl. 1, 17); etc. But these chronological data conflict with Num. xiv. 34 (comp. Num. i. 1, x. 11, xiii. 25, xx. 1, xxxii. 38; and PARAN; SIN). The forty years correspond to the forty days of the spies, and they are reckoned at one time from the Exodus, and again from the return of the spies. Still, P did not invent the number forty; it must have been based on an old tradition that the generation of the Exodus perished in the wilderness (Deut. i. 3; ii. 7; viii. 2, 4; xxix. 4; Josh. xiv. 7, 10; Amos ii. 10, v. 25; Neh. ix. 21; Ps. xcv. 10).

But at the back of this tradition lies the historical fact that before and after the exodus from Egypt many of the tribes and clans of Israel moved about as nomads in this region, and were

**Historical Foundation.** only gradually welded together into a union sufficiently close to give support to the effort of some of their number to gain a foothold across the Jordan.

Many of the names are those of stations in which even in historic days the nomadic tribes would encamp, being connected with oases (*e.g.*, ELIM). Other names gave rise to legends, *e.g.*, MARAH (Ex. xv. 23) and Taberah (Num. xi. 3); and a few are explained variously, *e.g.*, Massah and MERIBAH (Ex. xvii. 2, 7; Num. xx. 13; Deut. xxxiii. 8; see PARAN and KADESH; comp. Num. xiii. 3, 26a and *ib.* xiii. 26b; Deut. i. 19, Josh. xiv. 6, and Num. xx. 1; Deut. i. 46, Num. xiv. 25, and Deut. ii. 14, for the difficulties in the way of harmonizing the divergent statements of the sources [Wellhausen, "Prolegomena," iv. 349]). The religious or, to be more exact, irreligious anti-Moses and anti-YHWH attitude of Israel in the wilderness (Ex. xxxii.; Num. xi., xiv., xx., xxv.) reflects the conditions of a later historical period. Many of the occurrences are outgrowths of the natural tendency to impute greatness and miracles to the heroic generations (Ex. xvi. xvii. 5, xxiii. 20; Num. ix. 15 *et seq.*, xx. 8; Deut. viii. 4; see also MANNA; QUAIL; comp. Hosea ii. 16, 17; ix. 10; Deut. xxxii. 10; Ezek. xvi. 8; Jer. ii. 2; Amos v. 25).  
E. G. H.

**WILENKIN.** See MINSKI, NICOLAI MAKSIMOVICH.

**WILENKIN, GREGORY:** Russian government official; born at Tsarskoye-Selo, near St. Petersburg, Russia, Feb. 22, 1864. He is a member of an ancient Russian Jewish family which has held landed estates for the last two centuries, and he counts among his ancestors many who distinguished themselves for their charitable work. The name of one of his female ancestors, Blema Wilénkin, is still remembered in the Jewish community of Minsk, whence the family originally came. At the end of the eighteenth century she bequeathed a house (still in existence) at Minsk to be used as a "Klaus"; and she left another house for the use of impoverished Russian Jews at Jerusalem.

After completing his studies in the gymnasium of his native town, Wilénkin matriculated first at the University of Dorpat and afterward at the University of St. Petersburg, where he studied law. In 1887 he entered the government service in the Ministry of Public Instruction, and was sent on a scientific mission to England to study the organization of the universities of Oxford and Cambridge; he went also to Paris to investigate its system of primary schools. His report on the schools was published, and the French government bestowed on him the rank of "Officier d'Académie" in recognition of this work. On his return to St. Petersburg in 1895, Witte, then minister of finance, invited Wilénkin to leave the Ministry of Public Instruction for the Ministry of Finance, and appointed him assistant financial agent of the Russian government in London. Wilénkin served in that post over nine years, and in May, 1904,

was appointed financial agent of the Russian government at Washington, D. C., being attached to the Russian embassy there.

Wilken's works include "Monometalism and Bi-metalism" and "The Financial and Political Organization of Contemporary England and the Commercial and Political Organization of Contemporary Russia." A.

**WILKESBARRE:** County-seat and principal city of Luzerne county, Pa. Evidence points to 1838 as the date of arrival of the first Jewish settlers, among whom Martin Long, a Bavarian, was the most prominent. Two years later a society was organized for occasional worship, and until 1849 the incipient congregation held its services in various rooms. In August of that year it dedicated its first synagogue under the auspices of Moses Strasser, Isaac Leeser of Philadelphia, and Samuel Isaacs of New York. In 1857 the community was incorporated as the Congregation B'nai B'rith. Its earlier pulpit history is practically the record of the service of Herman Rubin, reader and teacher from 1853 to 1882. His successors have been David Stern, Victor Rundbacken, Israel Joseph, and the present incumbent, Marcus Salzman (1905).

The rise of the younger generation gave a decided impetus to the growing tendency toward Reform, which resulted in the adoption of the Einhorn ritual. This yielded, in its turn, to the Union Prayer-Book. B'nai B'rith, the largest congregation in the city, is the only Reform organization.

Until 1871 B'nai B'rith was the only congregation in Wilkesbarre, but in that year the first efforts were made to unite the Orthodox Jews. The organization, little more than a minyan, became the parent of the congregations B'nai Jacob and Hoche Yosher, which were formed in 1881, although their synagogues were not built until 1886 and 1887 respectively. In 1902 a fourth synagogue was dedicated to the use of the youngest congregation, Olheb Zedek (Anshe Ungarn).

The Jewish educational, philanthropic, and social activities of the city are entrusted to the following institutions: the religious and Hebrew schools, the Synagogue Industrial School, branch lodges of the leading Jewish orders, the Young Men's Hebrew Association, the social and literary clubs, four aid societies, a free loan association, and the Executive Committee of Jewish Congregations (which aids the work of the Industrial Removal Office).

With this equipment the community is an important center of Jewish activity in northeastern Pennsylvania, reaching out to Hazleton, Plymouth, Pittston, and the smaller towns in the vicinity. The Jews of Wilkesbarre now (1905) number about 1,800, or about 3 per cent of the total population.

A.

M. SAL.

**WILL** or **TESTAMENT** (Latin, "testamentum"; Greek, *διαθήκη*, which latter word is often found in the Mishnah and the Baraita [רִיבִיתִּיקִי; see B. B. 152b: "One diatheke annuls another"]); The legal instrument by which a person disposes of his property, or of a part thereof, and which takes effect after his death, but the provisions of which may be changed or revoked at any time before death.

The ordinary substitute for the last will and testament in Jewish law answers to the "gift by reason

of death," something like the "donatio causa mortis" of the Roman law, called in the Mishnah "gift of one lying sick" ("mattenat shekib mera"), which has been briefly mentioned under GIFTS IN RABBINICAL LAW.

The notices of wills in the Mishnah (B. B. viii. 5, 6; ix. 6, 7) are scanty; and in the discussion upon them there are very few baraitot. The discrepancies as to details among later authorities are wide, and run back to the fundamental questions "How far can an owner of property, by his declaration, set aside or change the rules of succession laid down in Num. xxvii.?" and, more particularly, "Can he abridge the rights of the first-born declared in Deut. xxi. 17?" This verse speaks of "the day when he gives their heritage to his sons," and only restrains the father from robbing the first-born of his double share;

which implies that the father may make, otherwise, an unequal division among his sons or, when he has no sons, an unequal division among his daughters. As R. Johanan ben Baroka puts it

in the Mishnah, "If the ancestor says, 'Such a person shall be my heir,' and such a person is capable of inheriting, his words are valid; if the person is not fit to inherit, his words are void" (B. B. viii. 5). The later Babylonian authorities (see B. B. 130a) follow R. Johanan's opinion, though he was in the minority.

But the Talmud nowhere defines how the choice among heirs of the same class may be made, whether in writing or by word of mouth; it is intimated (B. B. 113a) only that it should be done in daytime, not by night. The later authorities, while declaring that R. Johanan's opinion is the law, deprive it of almost all its force by restricting to persons dangerously sick this power of choosing an heir, that is, to those who can dispose of their property by gift "causa mortis." On the contrary, they require no written instrument for the purpose of giving to one son what belongs to all the sons; they here give greater weight to an oral command, holding that where a man "writes over" his estate to one son among several, he only makes him a trustee for all the sons (B. B. 130b); and if he makes a deed ("sheṭar") with a view to its taking effect only after his death, the effect may be nil, since a man's deed can not be delivered after his death. Thus particular precautions are necessary to avoid making the writing down of a testamentary disposition destructive of its purposes.

The Hebrew word corresponding to *διαθήκη*, whether written or spoken, is "zawwa'ah" (= "a command"); but it is hardly ever used in legal discussions, either in the Talmud or in the codes. Where the testator was the father of the beneficiaries, the will had, in addition to its legal effect, a great moral weight, it being deemed the duty of children to respect the desires of their deceased father, or even of more distant ancestors. That this principle originated in Biblical times is evi-

The "Zaw-wa'ah." denced by the faithful obedience of the Rechabites to the rules laid down for them by their ancestor Rechab (Jer. xxxv. 6-19). In this sense the written "zawwa'ah" became an important element in the Jewish literature of the Middle Ages, down even to the sev-

enteenth century. But such an instrument, if written during good health, had only a moral sanction, even as to the disposal of property, which the civil judge could not enforce.

An owner of property can make a revocable disposition, taking effect after death, only in the form of a "gift of him who lies sick"; in other words, such a disposition can be made only when death is apparently very near: and if the danger present at the time of the gift passes away, the gift is *ipso facto* revoked. But this kind of gift differs very broadly from the "donatio causa mortis," which has been adopted by the probate and equity courts from the Roman law into the laws of England and America; for the latter gift is valid only when followed by delivery or such other formalities as the nature of the thing given demands in gifts "inter vivos," while the Talmudic gift "causa mortis" requires no formality whatever, not even an appeal to the bystanders, as, "You are my witnesses that I give this to NN."

There is this difference between the "gift of one lying sick" and a true testament: while the latter disposes of all that the testator owns at the moment of death, the other takes effect only on the property which the donor has at the time of the gift. Thus, if a man says, "My wife shall take a son's share," though the share may be increased or may be lessened by the subsequent death or birth of sons, it will be only a share in the property which the donor owned when he spoke the words (B. B. 128b). Says the Mishnah (B. B. viii. 5): "If one says, 'A, my first-born, shall not have a double share,' or, 'My son B shall not inherit among his brethren,' it is without effect; for he declares against what is written in the Torah. But if he divides his estate among his sons by his words, giving more to one than to another, or making the first-born equal to the others, his words are valid; only he must not speak of it as 'inheritance,' but must call it 'gift' somewhere in his spoken or written words."

The technical formula "gift of one lying sick" ("shekib mera"; this Aramaic phrase is used in the Mishnah) really denotes the revocable gift; and as the removal of the danger revokes the gift, it was usual for the witnesses to it to draw up a minute containing the following or equivalent words: "This gift was made when he was sick and lay on his bed: and from this sickness he departed for his eternal home."

R. Eliezer, who represents in the Mishnah the position that the gift "causa mortis" is not effective without "kinyan," cites the well-known incident of a man of Meron (Galicia) at Jerusalem who wished to make a gift of movable property to an absent friend, and found no legal way except to buy a piece of land and then to make a deed conveying the land and the movable property together to his friend; he is told in answer that the man proposing to make the gift was evidently in good health (B. B. 156b; comp. Yer. Pe'ah 17d).

The gift of one who is sick is, as stated above, valid without the specific acts which ordinarily are necessary to pass a title; *e.g.*, in the case of land or slaves, without deed, payment of price, or occupa-

tion; in the case of movable property, without "pulling"; in the case of demands, without the "meeting of three"; and the heirs can not release a demand that has been thus given away. While, according to the Mishnah, the majority uphold the position that such a gift can be made without kinyan and without writing only on the Sabbath, the contrary opinion, that the writing can be dispensed with on week-days also, prevailed afterward; and the Talmud declares that the words of the sick man must be deemed just as effectual as if they were written, sealed, and delivered. However, even the Mishnah cites the case of the "mother of Rokeh's sons," who told her sons to give her valuable cloak to her daughter, the wish being enforced after her death.

Where the sick man gives away his whole estate with those formalities by which titles pass (kinyan), the act is nevertheless treated as revocable and as taking effect only on the donor's death; but, if he sets aside for himself "any land whatever" (according to the Mishnah) or "any movable property whatever" (according to later authorities), the gift is valid and irrevocable. The Talmud, however, provides that the part reserved must be sufficient to enable him to earn his living. Still the bystanders are encouraged to help the sick man in passing title to the donees whenever he desires to do so, on the ground that it will tend to calm his mind; and they may do this even on the Sabbath, so far as it can then be lawfully done; but it could hardly have been the intent of the sages to encourage a course of action which would leave the sick man penniless in case he should recover.

The most effective method of making a gift is to acknowledge the property right of the intended donee as already in force; *e.g.*, one may acknowledge that one owes A a thousand zuzim, or such a horse, or such a slave; or that a certain sum in the hands of a named person (the sick man's debtor) belongs to A. If the sick man wishes to give anything to an idolater, he can do it only in this way, as a direct gift would not be enforced by a Jewish court. R. Marc, the son of Issur the convert, was begotten "not in holiness" (*i.e.*, he was begotten before his father's conversion); therefore when Issur wished to leave him a sum of money then in the hands of a debtor, which money represented the bulk of his estate, he was told that it was against the policy of the Law to permit him to leave his estate by gift "causa mortis" to a son incapable of inheriting it (see DERELICTS). A way out of the difficulty was then shown him; this was to acknowledge before the witnesses that the sum of money already belonged to R. Marc. It seems that the heirs are estopped by the acknowledgment of the ancestor and can not question its truth.

A dispute may arise between a donor who wishes to resume his gift after possession thereof has been given or the title thereto has otherwise passed, and the donee, the former asserting that he was dangerously sick, and that the gift, being made "causa mortis," is revocable, while the donee says, "You were in good health, and your gift is irrevocable." A dispute may also arise be-

#### Resump- tion of Gift.

tween the donor's heirs and the donee, in the case of a gift not completed by *kinyan*, the former saying, "He recovered from the sickness in which he made the gift, and afterward died from another cause." The masters of the Mishnah differed as to the burden of proof; but finally the old rule of the Hillelites prevailed: "The estate remains according to its occupation," or, it might be said, "its presumption." That is, if the things given away remain in the possession of the donor or his heirs, the burden of proof is on the donee; if they are in the possession of the donee, the burden of proof is on the donor or his heirs. Where a testament in writing is found on the person of a dead man, in the absence of other evidence it amounts to nothing; for though the "gift of one lying sick" is good without delivery of the deed, the testator may have intended a delivery, and such delivery is impossible after his death.

The thing given "*causa mortis*" is as much subject to the donor's debts, or to his widow's jointure, as property that has descended to the heirs. If several sums are given in such words (spoken or written) as, "So much to A, afterward so much to B," etc., the last-named donee must first yield his gift to the testator's creditors; but in the absence of words of postponement, the several donees lose proportionately if, through the decedent's debts, or for any cause, the estate falls short of the necessary value.

Should a sick man send money or valuables to a person at a distance, and the messenger find such person dead, the gift is valid and goes to the heirs of the latter, if at the time of the delivery to the messenger the donee was alive; but if he was then dead, the gift is void, and the thing goes back to the donor's heirs.

**WILLIAM OF AUVERGNE.** See GUILLAUME OF AUVERGNE.

**WILLIAM OF NORWICH:** Alleged victim of ritual murder by Jews at Norwich in 1144. He may therefore claim to be the protomartyr of this class of pseudo-martyrdom. According to the boy's own family, he was enticed away on Monday, March 21, 1144, to become a scullion of the Archdeacon of Norwich, and was not heard of again till Saturday, March 26, when his uncle, cousin, and brother found his body, covered with sand, in Thorpe Wood, near Norwich, with the head shaven and with marks of puncture by thorns. Although there were signs of life in the body, it was reburied in the same place; and Godwin Sturt, the boy's uncle, at the next synod, accused the Jews of having murdered William, whereupon the prior of Lewis Priory claimed the body as that of a martyr, and the canons of Norwich Cathedral seized it for themselves. The boy's brother Robert and his uncle Godwin were appointed officials in the monastery on the strength of their relationship to the martyr; and his mother was buried in the graveyard of the monastery, somewhat to the scandal of the monks. No action was taken against the accused Jews, though it was asserted that the boy William had been seen entering the house of a Jew named Deusaic or Eleazar, and

a report was brought from Theobald, a converted Jew of Cambridge, that it was the custom of Jews to sacrifice a boy at Passover at some place chosen by lot, and that the lot for that year had fallen on Norwich. This is the first historical occurrence of the myth of the BLOOD ACCUSATION. The royal sheriff, in whose jurisdiction the Jews were, refused to take notice of the accusation, although he was himself indebted to the Jews, and would have been benefited personally if they had been proved guilty.

It has been suggested that the boy's relatives in a fit of religious exaltation attempted to gain increased sanctity for themselves and for the lad by making him undergo the form of crucifixion on Good Friday, March 25; that, during the process, the boy had fallen into a fit, which had alarmed his relatives, who thereupon buried him in Thorpe Wood, near their residence; and that, to divert suspicion, they accused the Jews, although the process of crucifixion would be quite unfamiliar to them, and obtained some sort of confirmation from the convert Theobald. Later, the legend of the martyr was considerably developed by Thomas of Capgrave (d. 1494). It was claimed that the Jews had been met as they were carrying the body in a bag to Thorpe Wood, on the opposite side from the Jewry outside the city, which they would have had to traverse. The person who thus encountered them kept silence, it was alleged, at the order of the sheriff, who had been bribed by the Jews. On his refusal to testify, a fierce light from heaven pointed out the place of martyrdom to a man, who found the lad's body disfigured with stigmata and hanging from a tree. Nothing of all this is found in the earliest form of the legend as related by Thomas of Monmouth, although the supernatural light appeared in Germany (Pertz, "Scriptores," vi. 472), whither the story was carried and where it had numerous repetitions. See BLOOD ACCUSATION.

J.

**WILLOW:** Any tree or shrub of the genus *Salix*. Willows and poplars are numerous in Palestine. In all regions the white willow (*Salix alba*) and the Euphrates poplar (*Populus Euphratica*) occur with great frequency, while the crack-willow (*Salix fragilis*) and the white poplar (*Populus alba*) are also common. On the banks of the Jordan and in the valleys of the Dead Sea grow the *Salix sefsaf* and its variety, the *Salix hierochuntica*. The following species also occur, although less frequently: black willow (*Salix nigricans*) at Amanus, near Beirut; French willow (*Salix triandra*) at Al-Zib; *Salix alba*, var. *latifolia*, near Beirut and the Dead Sea; var. *integrifolia* near 'Aintab; goat-willow (*Salix caprea*) on Lebanon; *Salix alba*, var. *Libanotica*; *Salix pedicellata* near Damascus and in Cele-Syria; black poplar (*Populus nigra*); weeping willow (*Salix Babylonica*); and Lombardy poplar (*Populus pyramidalis*). The "willows" of the Bible (עֲרָבִים, Isa. xv. 7, xlv. 4, and Ps. cxxxvii. 2; עֲרָבֵי נָחַל, Lev. xxiii. 40 and Job xl. 22) were the Euphrates poplars, although the Mishnah interprets עֲרָבִים as "willows," despite the Talmudic traces that the willow had previously been termed צַפְצַפָּה (comp.

Ezek. xvii. 5). **לְבֵנָה** (Gen. xxx. 37; Hos. iv. 13; the **לֵבָן** of the Targum) is not the officinal storax (*Styrax officinalis*), but the white poplar (*Populus alba*). See **PLANTS**.

The Feast of Tabernacles requires, according to the Bible, "willows of the brook," the Karaites and recent exegetes regarding this as applying to the booths themselves, while rabbinical tradition refers it to the accessory decorations for the festival. One tannaitic tradition seems to show that the Biblical "willow of the brook" had leaves serrate like a sickle, while the variety with leaves dentate like a saw was rejected. Another tannaitic tradition, however, states that **עֲרָבִים** may be used only when they have red twigs and lanceolate leaves, they being unavailable if they have white twigs and round leaves. Babli combines these traditions, and identifies the former of the two varieties of willow with the **עֲרָבִים**, while the useless willow is the **צַפְצָפָה** (Euphrates poplar). The tannaitic description of the **עֲרָבִים** corresponds to the trembling poplar, or aspen (*Populus tremula*), and even more closely to the *Salix safsaf*, or the French willow (*Salix triandra*). Still another variety is the **חִילְפָא**, a willow with red twigs and an oblong, sickle-shaped leaf, probably the white willow (*Salix alba*), and which answers to the tannaitic requirements.

The ruling of Babli concerning the available varieties of the willow was naturally adopted by the codifiers, such as Maimonides. Joseph Caro, however, followed by Mordecai Jaffe, dissented, claiming that the usage was at variance with the phraseology of the Halakah, since all willow twigs are green, although they become red after sufficient exposure to the sun, so that it is inadmissible to reject twigs because they are green, and not red.

In addition to the species of willow unavailable in themselves, twigs were forbidden which had been placed under the ban, or which had been stolen or cut, or had become dry, though twigs whose leaves had partly fallen or withered might be used. Willows were also used independently on the Feast of Tabernacles as a shield for the altar, and were carried in the processions which took place daily, or, after the destruction of the Temple, on the seventh day, the "willow of the brook" receiving the name of "hosanna" from the processional shout.

Willow twigs were used for weaving baskets and similar utensils, peeled twigs being employed for the finer grades; while the wood of the willow and poplar was made into troughs, etc. The galls on the leaves of the willow served to dye veils, and the cotton of the seeds of the female willow and poplar was made into an inferior grade of lamp-wick.

The Haggadah is concerned with the willow only so far as it forms part of the festal bush, in which the "willow of the brook" symbolizes: (1) God; (2) the impious and the ignorant of Israel, who have neither righteousness nor knowledge, as the willow has neither taste nor smell; (3) Joseph and Rachel, who, like the willow, faded before the rest; (4) the Sanhedrin, the pair of twigs typifying the two secretaries; (5) the mouth, on account of the labiate leaves. All four trees symbolize the beneficence of the rain which they cause; they fulfil their purpose when two fragrant and two scentless varieties of

trees are combined. These metaphors are repeated frequently in synagogal poetry and in homiletic literature, with little change or addition, even in modern times.

I. LÖ.

**WILMERSDÖRFFER, MAX, RITTER VON**: Bavarian financier and philanthropist; born at Bayreuth April 8, 1824; died at Munich Dec. 26, 1903. At an early age he entered the Munich banking firm of his uncle, J. W. Oberndörffer, whose daughter he married. He was appointed consul-general of Saxony and decorated with the Bavarian cross of St. Michael and with the crosses of the Saxon Order of Merit and the Order of Albrecht, while in 1888 he was made a knight of the Order of the Bavarian Crown. He also received the title of privy commercial councillor from both Saxony and Bavaria. A man of high education, well read in the German classics, he was an authority on numismatics, as well as a patron of art and of many charitable institutions. As a strict Jew, he also took a great interest in the affairs of the Jewish congregation of Munich, whose president he was in 1864 and 1865.

D.

**WILMINGTON**. See **NORTH CAROLINA**.

**WILNA**: Ancient Lithuanian city, capital of the district of the same name; situated on the rivers Vilia and Vileika; about 200 miles southeast from Libau on the Baltic, and 436 miles southwest from St. Petersburg. A Jewish settlement existed there in the fourteenth century. The writer Narbutt, in his history of Wilna, states that as early as the reign of the Lithuanian chief Gedimin (1316-41) there was a large Jewish community in the place, and that the space occupied by the streets inhabited by

Jews was about one-fifth of the area of the whole city. From fully reliable data accessible to him, Narbutt even specified the names of the streets then

inhabited by Jews. The historian Bialinsky writes that under the reign of Olgerd (1345-1377) the Jewish community of Wilna was considerable. This opinion is expressed also by the writers Krashewsky, Kraushaar, Scherewsky (in his book upon the Jewish records of the city of Wilna), and Vassilievsky. The last-named historian claims that at the end of the sixteenth century the Jewish community of Wilna numbered from 10,000 to 15,000. Bershadski, in his historical sketch (in "Voskhod," 1881) of the Jewish community of Wilna, shows that the records preserved in the archives evidence the existence of a Jewish community at Wilna since the second half of the sixteenth century, but not before. He states authoritatively that he was unable to find any trace in official sources of the existence of a recognized Jewish congregation before that date. From scattered indications extant in various Hebrew writings the conclusion may be drawn that Bershadski's opinion, to the effect that a large Jewish community represented by a rabbi is traceable only to the second half of the sixteenth century, is nearer the truth than the others. In the responsa of R. Solomon Luria of Lublin (second half of 16th cent.) there is found the following:

"We, the undersigned, hereby certify and witness with our signatures that whereas we have been chosen as judges to decide the controversy which has taken place at Wilna between R. Isaac b. Jacob and R. Jonah b. Isaac, in the matter of the taxation of Polozk, and whereas the disputant parties appeared before us, and the aforesaid R. Jonah has given to the aforesaid R. Isaac security in behalf of R. Abraham b. Jacob and his brother R. Menahem. . . .

"Signed at the city of Wilna, on the first day of the week, the 7th of Shebat, in the year 5316 [1556]:

"Menahem b. Ellakim Triseash.  
"Meshullam b. Jehiel.  
"Meshullam b. Judah."

In none of the rabbinical writings is mention made of these rabbis; but the litigants, R. Jonah b. Isaac, R. Abraham b. Jacob and his brother Menahem (or Mendel), are mentioned in the official records, and are cited by Bershadski ("Russko-Yevreiski Arkhiv," No. 69) as the tax-farmers for certain localities, appointed by the Polish king in 1556. In the responsa of Joel ha-Levi Sirkes (BaH), second collection (Koretz 1785), the closing paragraph of section 75 has the following: "The above is the testimony given before us by Jacob b. R. Menahem Kaz. Signed in the city of Wilna, on the fourth day of the week, twenty-third day of Tammuz, in the year 5323 [1563]. Jonathan b. R. Samuel, Eliezer b. R. Joel, Menahem b. R. Samuel Margolis." In the exchange of correspondence on legal questions of MaHaRaM of Lublin (Metz, 1769), the closing paragraph of section 7 reads: "By this means the murderer was caught as set forth in full in the testimony taken at the city of Wilna, on the third day of the week, on the twentieth of Tammuz, in the year 5553 [1593]." The fact, therefore, that the Jewish community of Wilna was represented by several rabbis, and not by one, as small communities are, is conclusive proof that the community was at that time considerable.

There is evidence also that Jews resided in Wilna in still earlier periods. It is known that in 1490 the plenipotentiary of the Grand Duke of Moscow, in a letter to King Casimir, complained of the excessive tax imposed upon merchants traveling

**Early Records.** to and from Moscow through Wilna by the Jewish lessee of taxes Michael Danilov ("Regesty i Nadpisi," i., No. 208, St. Petersburg, 1899). In 1495 the grand duke presented to the city of Wilna some property which formerly had been owned by a Jew named Janishevsky (*ib.* No. 215). In 1507 King Sigismund wrote that he had bought various goods from the Jewish merchant Michael Rebinkowitz (Yesofovich; *ib.* No. 231). Under the date of 1508 there are statements of accounts of Jewish lessees of taxes in Wilna and Brest-Litovsk (*ib.* No. 234). In 1532 the Jew Joshua Paskowitz was appointed by King Sigismund as chief collector of taxes on wax in the market of Wilna (Bershadski, "Russko-Yevreiski Arkhiv," No. 140). In 1550 a certain Jewess, Fanna Kasparova, who resided at Wilna, refused to surrender to the Jewish court the Jew Chatzka Issakowitz, defying the Jewish court messenger sent to take him, although she had previously given bond for the appearance of the said Issakowitz (*ib.* No. 167). In 1555 King Sigismund granted to a certain Jew of Wilna a lease for three years of the privilege of stamping coins (*ib.* No. 45). The lessees, in 1560, of

the privilege of stamping coins in Wilna were the Jews Felix and Borodavka (*ib.* No. 125). In Sept., 1562, a Gentile brought before a magistrate a charge of assault against a Jew by the name of Israel, the defendant being described in the complaint as a physician (*ib.* No. 167). In 1568 King Sigismund issued an order commanding the Jewish community of Wilna to pay the taxes due to the treasury ("Regesty i Nadpisi," No. 557). In 1583 the Jew Judah Salamonowitz of Wilna paid taxes on goods brought by him from Lublin to Wilna, consisting of a truckload of wine, licorice, and linen ("Archeographicheski Sbornik," part iii., p. 289). The name of the Jew Moses Tomchamowitz of Wilna, secretary of the mint, is mentioned in the records of 1587 ("Regesty i Nadpisi," No. 660). In 1592 the citizens of Wilna attacked and destroyed the bet ha-midrash of Wilna ("Records of the Community of Wilna," part xxviii., p. 52, Wilna, 1901). In 1593 King Sigismund III. granted to the Jews of Wilna the privilege of buying real estate from the noblemen of that city; at the same time he made many other concessions to them, including permission to rebuild the bet ha-midrash (Bershadski, in "Voskhod," 1887). From the above data it is evident that there was a large Jewish community in Wilna in the middle of the sixteenth century, but that until then it was insignificant. The Jews' street in Wilna, the one formerly called by the name of St. Nicholas, which terminates at the Hospital of St. Mary, was known as the "Jews' street" in 1592 (Bershadski, "Istoria Yevreiskoi Obshchiny v Wilnye," in "Voskhod," 1887, p. 84), and is still so called.

In the seventeenth century the Jews in Wilna and in Lithuania generally enjoyed peace and prosperity. At the beginning of their settle-

**In the Seventeenth Century.** ment in that country their relations with the non-Jewish population were very friendly. Even from the orders

given by Bogdan Chmielnicki to the Polish and Lithuanian magnates it is evident that up to that time the Lithuanian Jews lived in happiness and peace, and that only the Cossacks subjected them to oppression and maltreatment. But from that time on they gradually sank into misfortune. The conclusion to be drawn, therefore, from the study of the history of the Jews of Wilna during that period is that the kings and rulers of Poland and Lithuania were considerate toward them, but that the non-Jewish population was extremely hostile. In 1636 King Ladislaus IV. granted certain important concessions to the Jews of Wilna. In 1669 King Michael confirmed six privileges previously enjoyed by them. King John III., in 1682, permitted them to conduct their own census-taking. Five years later (1687) the same king wrote to the commander of his army and to the governor of Wilna warning them to see that the Jews of Wilna were not molested by the non-Jewish population, and telling them that they would be held personally responsible and punished severely for any violation of this order.

From the seventeenth century on the Wilna Jews passed from tragedy to tragedy, the differences being only in degree and extent, as may be seen from the series of restrictions and limitations imposed upon

INTERIOR OF THE OLD SYNAGOGUE AT WILNA.  
(From a photograph.)

them, leading at times to riots and consequent destruction of property. In 1635 the populace, in a mood of frenzy, destroyed the newly erected and elaborately appointed Jewish prayer-house at Wilna, tearing to pieces eighteen scrolls of the Law, appropriating their golden handles and everything else of value, and not leaving a stone of the prayer-house unturned (Bershadski, in "Voskhod," May, 1887). In 1653 King John Casimir was induced to issue a circular prohibiting the Jews from engaging in certain businesses and from accepting employment as servants in the houses of Gentiles ("Regesty i Nadpisi," No. 940). In 1663 the trade-union of Wilna passed an ordinance prohibiting Jewish glaziers from entering that union, and forbidding glaziers to receive Jewish apprentices or to employ Jews in any other capacity (*ib.* No. 1019). In 1664 the fishermen's union of Wilna excluded the Jews from the fishing trade (*ib.*). In the same year the king yielded to the request of the citizens of Wilna and prohibited the Jews from engaging in the occupations of silversmiths and goldsmiths (*ib.* No. 1022). It seems also that two years later (1666) the Jews were excluded from the grain business (*ib.* No. 1041), in 1667 from tanning (*ib.* No. 1056),

and in 1669 from the bristle manufacturing business (*ib.* No. 1078). But as long as Wilna remained under Polish and Lithuanian rulers all those restrictions and limitations were tolerable; the real and acute suffering began with the conquest of Wilna by the Russians in 1654, when the savage hordes of Cossacks, led by their barbaric chieftain Chmielnicki, destroyed everything destructible in the city, and killed every Jew they met (see "Entziklopedicheski Slovar," vol. vi., p. 384). The Jews that remained were banished from Wilna by order of the Russian king Alexis Mikhailovich ("Regesty," No. 971).

To this wholesale expulsion from Wilna reference is made in the preface of "Be'er ha-Golah" by R. Moses Ribkes: "And on the fourth day of the week, on the 23d of Tammuz, in 5415 [1653], the whole con-

gregation fled for its life from the city of Wilna, as one man. Those who had provided themselves with conveyances carried their wives, children, and their small belongings in them; but those who had no conveyances traveled on foot and carried

their children on their backs." Further reference to that catastrophe is made in the "Bet Hillel" on Yoreh De'ah (section 21), and in the responsa collection "Zemah Zedek" (No. 101). Among the exiles from Wilna in that year were the following prominent rabbis: Aaron Samuel b. Israel Kaidanover (who afterward became rabbi of Cracow, and who used to supplement his signature with the words,

"the exile from the city of Wilna"; see the preface to his "Birkat ha-Zebah"); Shabbethai b. Meir ha-Kohen (author of "Megillah 'Afah," in which the Wilna catastrophe of that year is described); and Ephraim b. Aaron (author of "Sha'ar Efrayim"). Wilna remained in the hands of the Russians for about six years, when it again came under the rule of the kings of Poland; the lot of the Jews, however, remained as bad as ever.

The vernacular of the Jews of Wilna at that time seems to have been Russian. This conclusion is drawn

from the following statement in the volume of responsa "Geburot Anashim" (p. 26): "It happened in the city of Wilna that a man, at the wedding ceremonies, used the Russian language in betrothing his bride, 'Ya tebja estum mekaddesh.'" The date following this is Dec. 26, 1636.

Nothing important of a favorable nature happened to the Jewish community of Wilna during the eighteenth century. In 1708, when Wilna was taken by

Charles XII. of Sweden, more than 20,000 died there from famine and pestilence in a comparatively short time; a great number of Jews being among these, the community became poverty-stricken, and many were compelled to leave the city ("Entziklopedicheski Slovar"). The author of the

Part of the Old Cemetery at Wilna. Star Shows Tombstone of Elijah Gaon.  
(From a photograph.)

"Rosh Yosef," in his memoirs (Preface), says: "The wrath of the oppressor compelled me to leave my place of residence, for his arm was stronger than ours, and the wo and terror which entered our locality deprived us of our resting-place in the country of Poland." The Jews now fell into such depths of poverty that they were unable to save their principal prayer-house from being sealed by creditors. In the "pinkes" of the Zedakah Gedolah (the principal charitable society), under date of the 2d of Elul, 5466 (Aug. 30, 1707), the following entry occurs: "In those days the synagogue was closed and sealed for almost a whole year. The cemetery also was closed." On the return to the throne of King August of Saxony in the year 1720, the populace of Wilna, mindful of its hatred toward the Jews, requested him to reduce the privileges heretofore granted to the latter in connection with the grain business. The king did not yield to the request at that time; but in 1742 the citizens secured the support of the magistrate, who compelled the representatives of the Jewish community to sign and execute an agreement in which they surrendered their former rights and privileges. Thus the Jewish community of Wilna continued to dwindle down to the time of the permanent occupation of Wilna by the Russians, when the position of the Jews improved somewhat—when, in fact, they lived under conditions much more favorable than those of the present day.

Following is a list of the more important known rabbis of Wilna: **Abraham Segal** (first rabbi of Wilna; mentioned by the author of "Sefer Toledot Yizhak," Prague, 1623); **Menahem Manus Hajes** (mentioned in "Etan ha-Ezrahi," Koretz, 1636); **Feibush Ashkenazi** (mentioned in the "'Abodat ha-Gershuni," No. 67, and in other works); **Moses b. Isaac Judah Lima** (author of "Helkat Mehokek"); **Isaac b. Abraham of Posen**; **Nahman b. Solomon Naphtali of Vladimir**; **Moses b. David** (known also as R. Moses Kremer); **R.**

**Rabbis.** **Simson** (in his old age settled in Palestine); **Hillel b. Jonah ha-Levi**;

**Baruch Kahana Rapoport**; **Joshua Heshel**; **Samuel** (the last head of the bet din). From R. Samuel's time the title "rosh bet din" was discarded, no rabbi subsequently elected being authorized to assume that title; since then the rabbi has been called "moreh zedek." The reason for the abolition of the title was a quarrel in which R. Samuel was involved as a result of his having treated the community with disrespect. The rabbinic school or yeshibah, founded in 1847, but closed in 1873, was one of the most prominent in eastern Europe. Wilna is distinguished not only by its rabbis but also by the large number of eminent Hebrew scholars who have been born or have resided there. Among these may be mentioned: Judah Löb GORDON, LEBENSOHN, Reichenson, etc.

In 1875 the Jews of Wilna numbered 37,909 in a total population of 82,688. The census of 1902 showed about 80,000 Jews in a total population of 162,633. The explanation of this rapid increase, which is out of all proportion to the ordinary growth of urban populations, lies in the "May laws" of 1882, which prohibited Jews from living in rural districts, and thus brought a large number to Wilna, as to other cities. In Hebrew literature Wilna is described

as the "mother city in Israel," or the "Lithuanian Jerusalem": the latter term originated, probably, with Napoleon I., when he was in Wilna in 1812.

Wilna contains a teachers' institute (Jewish), the only one of the kind in the whole of Russia. To it four subordinate elementary schools for Jewish children are attached. After graduating from the higher school the students receive diplomas as teachers; the number of such graduates is about twelve or thirteen annually. The money for the support of the institute, about 30,000 rubles per annum, is appropriated by the government from the municipal meat-tax of Wilna, the burden of which falls mainly upon the poor class of the Jewish population, since members of the liberal professions and college graduates are exempt from that tax, and the well-to-do class, not being strictly Orthodox as a rule, are more or less indifferent to the use of kasher meat. There are about twenty elementary schools for Jewish children, called "people's schools." But neither in these schools nor in the teachers' institute and its subordinate schools is instruction given in even one specifically Jewish subject.

A soup-kitchen for Jews is maintained in Wilna, in which a substantial meal, consisting of bread, soup, and meat, can be had for 4 copecks (2 cents). The kitchen is much used by Jewish soldiers stationed in the city; the extremely poor receive their meals free. It is supported by voluntary subscriptions, exclusively from Jews, and by the proceeds from certain Jewish balls and lectures. About 30,000 persons annually receive meals from it, one-half being non-Jews. About 112 soldiers are annually recruited, under the general conscription laws, from the Jewish community of Wilna. The Jews are mostly engaged in the export of lumber and grain, and in shopkeeping. Poverty, prevalent throughout Russian Jewry, is especially marked in Wilna. It may safely be maintained, although no actual statistics are available, that fully 80 per cent of the Jewish population of Wilna do not know in the evening where they will obtain food the next morning. In former days a considerable number of people made their living by the liquor trade, keeping saloons and inns; but a few years ago the Jews were excluded from that trade by governmental ordinances. Recently model tenement-houses have been erected for the Jewish workmen of Wilna by the Jewish Colonization Association.

The district of Wilna contains 1,706,357 inhabitants, of whom 245,771 are Jews. Of the latter 3,921 are occupied in agriculture.

B. R.

—**Typography:** A Hebrew printing-press was established in Wilna in 1799 by Baruch ROMM, as a branch of his establishment at Grodno. Through the action of the Russian censorship this press had practically a monopoly of the Russian and Polish markets from 1845 onward, when the printing of Hebrew books was restricted to Wilna and Slavuta. Between 1847 and 1857 the Wilna press produced no less than 460 different works (enumerated by Ben-jacob in Steinschneider, "Hebr. Bibl." iv-v.). This

yearly average of 41 works was raised to 63 in 1871 (E. Reclus, "Nouvelle Geographie," p. 436). Especially noteworthy were the Talmuds of 1835 and 1880, which have proved the standard editions for the east of Europe: a specimen page of the latter is given in illustration of the article TALMUD. Besides the many books printed by the Romms, the periodical "Ha-Karmel" is published at Wilna.

**WILNA GAON.** See ELIJAH BEN SOLOMON.

**WINAWER, SIMON:** Russian chess-player; born in Warsaw 1839. In 1867 he was in Paris; and while watching some games at the Café de la Régence in that city he decided to enter a tournament to be held there. To the surprise of every one he gained the second prize, defeating, among several noted players, Samuel Rosenthal. He now applied himself to the game so assiduously that in 1878 he gained the second prize at the international tourney held at Paris, Zukertort being first and Blackburne third. In 1881 at Berlin he divided the third and fourth prizes with Tchigorin; and in 1882 at Vienna he divided the first and second prizes with Steinitz. In 1883, playing in the international tourney held in London, he, for the first time in his career, was not placed; but at Nuremberg (19 entries) in the same year he gained the first prize, defeating Blackburne, who gained second place.

From this time Winawer seems gradually to have declined as a tournament player. At Dresden in 1892 and again at Budapest in 1896 he succeeded in gaining sixth place only, while at Monte Carlo in 1901 he was unable to gain a prize.

**WINCHESTER:** Ancient capital of England; county town of Hampshire. Jews appear to have settled there at an early date, one of the first entries in the pipe-rolls referring to a fine paid in 1160 by Gentill, a Jewess of Winchester, for the privilege of not marrying a certain Jew. The Jewry seems to have been located in Shorten street, afterward called Jewry street, leading to the North Gate. The synagogue was in Trussil, now Jail, street. The Jewry must have been a center of some importance, as Isaac of Chernigov was found there in 1182 (Jacobs, "Jews of Angevin England," p. 73). It has been conjectured that Moses b. Yom-Tob, who wrote the "Darke Nikkud" now found in the rabbinic Bibles, lived at Winchester (*ib.* p. 124).

When the massacres occurred in England (1189-1190), Winchester spared its Jews, though a couple of years later the blood accusation was raised against a Winchester Jew (see Richard of Devizes, "Chronicon," ed. Howlett, p. 435). A similar accusation was brought against the Winchester Jews in 1232 (Rigg, "Select Pleas," p. xiv.). In a description of the alleged murder of 1192 Winchester is called "the Jerusalem of the Jews" in those parts, and is stated to have had relations with Jews of France (probably Rouen). The most prominent Jew of Winchester in the eleventh century was probably Deulacresse or

Cresselin, who was an agent of AARON OF LINCOLN, and who obtained possession of some of the latter's lands after his death.

Several Jewesses are mentioned in the records as lending money at Winchester, notably Chera in the twelfth century, and Licorice in the thirteenth (*ib.* pp. 19-27). An elaborate list of transactions between the latter and Thomas of Charlecote about 1253 shows that Jewesses of those days had the right of holding land as security for payment of debt. Licorice agreed to pay the large fine of £5,000 on succeeding to the estate of her husband, David of Ox-

Plan of Winchester, England, in the Thirteenth Century, Showing the Position of the Jewish Quarter.

ford, in 1244 (*ib.* p. 27, note). Winchester had an ARCHA up to the time of the expulsion, and was, therefore, a licensed place of residence for the Jews while they remained in England. At the time of the expulsion a number of houses and outstanding debts fell into the hands of the king from the Jews of Winchester ("Trans. Jew. Hist. Soc. Eng." i. 137). The position of the Jews must have been exceptionally favorable in Winchester, because one of them was even received into the merchants' gild, a most unusual case, none other being known in early Anglo-Jewish history.

**WINDOWS** ("hallou," "arubbah"): The climate of Palestine and the customs of the ancient and the modern Orient alike rendered the house less important than it is in the Occident, since it was more a sleeping apartment than a place for work, or even for occupancy during the day (comp. HOUSE). Many large windows, therefore, were not desired, since they would admit heat in summer and rain and cold in winter. In like manner, the Assyro-Babylonian and the Egyptian house had few windows (comp. Perrot and Chipiez, "Art in Chaldea," i. 186 *et seq.*; Wilkinson, "Manners and Customs of the Ancient Egyptians," i. 362 *et seq.*). In this respect the houses of modern Palestine precisely resemble those of the ancient Hebrews, for the windows which look on the street are very small and are placed high in the wall, thus being analogous to the windows of the Temple of Solomon, which were narrow and high (I Kings vi.4). Large, wide windows were reserved, like panels of cedar-wood and

mural paintings, for the luxurious palaces of the great (Jer. xxii. 14).

Although excavations show that GLASS was known to the Assyrians and Babylonians, as well as to the Egyptians, at a very early time, it was never used for windows in the ancient East. Openings for light and air were either left entirely free, as was often the case in the simple peasants' huts, or they had a shutter or wooden lattice; even the windows of the Temple had immovable gratings of wood (I Kings vi. 4, R. V.). Usually, however, these lattices were so constructed that they could be removed, or thrown apart like doors. The windows could be opened (II Kings xiii. 17), for Ahaziah fell through an open window (II Kings i. 2). Such means of closure were naturally very unsafe, and thieves could easily enter the house by means of the window (Joel ii. 9; comp. Jer. ix. 21).

I. BE.

**WINDS:** Ancient Hebrew literature recognizes only four winds—north, south, east, and west, having no names for those from intermediate points, so that such a designation as "north" has a wide range of application. The dwelling-places of the winds were in the four corners of the earth ("keḳot ha-arez"); there they were confined in storehouses, from which יְהוָה sent them forth (Jer. x. 13, xlix. 36, li. 16; B. B. vi. 7). According to Rev. vii. 1, these storehouses were guarded by four angels, who restrained the winds, as they continually strove to break loose (comp. Enoch, lxxvi. 1 *et seq.*: "At the ends of the earth I saw twelve doors opened toward all the quarters of heaven, and the winds came forth from them, and blew over the earth"). The ancient Hebrews had no conception of the nature and causes of winds; for them, as for every ancient people, the wind was a mysterious creation, whose paths were always unknown (Eccl. xi. 5 [R. V.]; John iii. 8). Indeed, in their action, as in their origin, the winds were phenomena wholly without the sphere of human knowledge (Ps. cvii. 25-27; Mark iv. 41), and יְהוָה's power appeared the greater in that it was He who created them (Amos iv. 13), causing them to come from out His treasures (Ps. cxxxv. 7; Jer. x. 13, li. 16), and controlling their power and "weight" (Job xxviii. 25). He likewise made them His messengers and servants (Ps. civ. 4 [R. V.], cxlviii. 8), and used the "stormy winds" as instruments in the execution of His judgments (Isa. xxix. 6; Amos i. 14; Wisdom v. 23; Ecclus. [Sirach] xxxix. 28).

The Hebrews, as was natural, carefully distinguished the characteristics of the individual winds. The north wind was icy cold (Ecclus. [Sirach] xliii. 20; comp. LXX., Prov. xxvii. 16; Job xxxvii. 9), so that Jerome called it "ventus durissimus." When it came from the north it brought rain (Prov. xxv. 23), and, according to Josephus, the sailors on the coast called the stormy wind from the north, which scourges the waves, "the black north wind" ("B. J." iii. 9, § 3). The east wind, which came from the Syrian desert (Jer. iv. 11, xiii. 24; Job i. 19), was the hot wind, which parched the crops and blighted the trees (Gen. xli. 6, 23, 27; Ezek. xvii. 10, xix. 12; Hos. xiii. 15; Jonah iv. 8). Hence the Septuagint usually calls it καύσων ("the burner").

When it developed into a storm it was especially dangerous because of the violence of its blasts (Job i. 19, xxvii. 21; Isa. xxvii. 8; Jer. xviii. 17; Ezek. xxvii. 26; Ps. xlvi. 8 [A. V. 7]). The south wind also was a hot wind (Job xxxvii. 17; Luke xii. 55); although the due south wind blows but seldom in Palestine. From the west came the refreshing evening breeze which brought rain (Gen. iii. 8; Cant. ii. 17; I Kings xviii. 43 *et seq.*; Luke xii. 54; also Cant. iv. 16, where northwest and southwest winds are probably meant).

E. G. II.

I. BE.

**WINE.**—**Biblical Data:** The juice of the grape is the subject of special praise in the Scriptures. The "vine tree" is distinguished from the other trees in the forest (Ezek. xv. 2). The fig-tree is next in rank to the vine (Deut. viii. 8), though as food the fig is of greater importance (comp. Num. xx. 5) than the "vine which cheereth God and man" (Judges ix. 13; comp. Ps. civ. 15; Eccl. x. 19). Wine is a good stimulant for "such as be faint in the wilderness" (II Sam. xvi. 2), and for "those that be of heavy hearts" (Prov. xxxi. 6).

The goodness of wine is reflected in the figure in which Israel is likened to a vine brought from Egypt and planted in the Holy Land, where it took deep root, spread out, and prospered (Ps. lxxx. 9-11). The blessed wife is like "a fruitful vine by the sides of thy house" (Ps. cxxviii. 3). When peace reigns every man rests "under his vine and under his fig-tree" (I Kings v. 5 [A. V. iv. 25]). An abundance of wine indicates prosperity. Jacob blessed Judah that "he washed his garments in wine and his clothes in the blood of grapes" (Gen. xlix. 11).

Bread as an indispensable food and wine as a luxury represent two extremes; they were used as signs of welcome and good-will to Abraham (Gen. xiv. 18). A libation of wine was part of the ceremonial sacrifices, varying in quantity from one-half to one-fourth of a hin measure (Num. xxviii. 14).

Wine-drinking was generally accompanied by singing (Isa. xxiv. 9). A regular wine-room ("bet ha-yayin") was used (Cant. ii. 4), and wine-cellars ("ozerot yayin"; I Chron. xxvii. 27) are mentioned. The wine was bottled in vessels termed "nebel" and "nod" (I Sam. i. 24, xvi. 20), made in various shapes from the skins of goats and sheep, and was sold in bath measures. The wine was drunk from a "mizraḳ," or "gabia" (bowl; Jer. xxxv. 5), or a "kos" (cup). The wine-press was called "gat" and "puraḥ"; while the "yeḳeb" was probably the vat into which the wine flowed from the press. The "vine of Sodom" (Deut. xxxii. 32), which probably grew by the Dead Sea, was the poorest kind. The "vine of the fields" (II Kings iv. 39) was a wild, uncultivated sort, and the "soreḳ" (Isa. v. 2) was the choicest vine, producing dark-colored grapes; in Arabic it is called "surik."

There were different kinds of wine. "Yayin" was the ordinary matured, fermented wine, "tirosḥ" was a new wine, and "shekar" was an old, powerful wine ("strong drink"). The red wine was the better and stronger (Ps. lxxv. 9 [A. V. 8]; Prov. xxiii. 31). Perhaps the wine of Helbon (Ezek. xxvii. 18) and the wine of Lebanon (Hos. xiv. 7) were white wines. The vines of Hebron were noted for their large clus-

ters of grapes (Num. xiii. 23). Samaria was the center of vineyards (Jer. xxxi. 5; Micah i. 6), and the Ephraimites were heavy wine-drinkers (Isa. xxviii. 1). There were also "yayin ha-rekah" (spiced wine; Cant. viii. 2), "ashishah" (hardened sirup of grapes), "shemarim" (wine-dregs), and "homez yayin" (vinegar). Some wines were mixed with poisonous substances ("yayin tar'elah"; Ps. lx. 5; comp. lxxv. 9, "mesek" [mixture]). The "wine of the condemned" ("yen 'anushim") is wine paid as a forfeit (Amos ii. 8), and "wine of violence" (Prov. iv. 17) is wine obtained by illegal means.

E. G. II.

J. D. E.

—In Rabbinical Literature: Wine is called "yayin" because it brings lamentation and wailing ("yelalah" and "wai") into the world, and "tirosh" because one that drinks it habitually is certain to become poor (תהי'א רש=תירוש). R. Kahana said the latter term is written sometimes תירוש, and sometimes תיריש; that means, if drunk in moderation it gives leadership (ראש = "head"); if drunk in excess it leads to poverty (Yoma 76b). "Tirosh" includes all kinds of sweet juices and must, and does not include fermented wine (Tosef., Ned. iv. 3). "Yayin" is to be distinguished from "shekar"; the former is diluted with water ("mazug"); the latter is undiluted ("yayin hai"; Num. R. x. 8; comp. Sifre, Num. 23). In Talmudic usage "shekar" means "mead," or "beer," and according to R. Papa, it denotes drinking to satiety and intoxication (Suk. 49b).

In metaphorical usage, wine represents the essence of goodness. The Torah, Jerusalem, Israel, the Messiah, the righteous—all are compared to wine. The wicked are likened unto vinegar, and the good man who turns to wickedness is compared to sour wine. Elcazar b. Simeon was called "Vinegar, the son of Wine" (B. M. 83b). The wine which is kept for the righteous in the world to come has been preserved in the grape ever since the six days of creation (Ber. 34b).

The process of making wine began with gathering the grapes into a vat ("gat"). There were vats hewn out of stone, cemented or potter-made vats, and wooden vats ('Ab. Zarah v. 11). Next to the vat was a cistern ("bor"), into which the juice ran through a connecting trough or pipe ("zinnor"). Two vats were sometimes connected with one cistern (B. K. ii. 2). The building containing or adjoining the wine-presses was called "bet ha-gat" (Tosef., Ter. iii. 7). The newly pressed wine was strained through a filter, sometimes in the shape of a funnel ("meshammeret"; Yer. Ter. viii. 3), or

**Presses and Receptacles.** through a linen cloth ("sudar"), in order to remove husks, stalks, etc. A wooden roller or beam, fixed into a socket in the wall, was lowered to press the grapes down into the vat (Shab. i. 9; Toh. x. 8).

The cistern was emptied by a ladle or dipper called the "mahaz" (Toh. x. 7), the wine being transferred to large receptacles known variously as "kad," "kan-kan," "garab," "danna," and "habit." Two styles of habit, the Lydian and the Bethlehemite (Niddah vi. 6), were used, the former being a smaller barrel or cask. All these receptacles were rounded earthen

vessels, tightly sealed with pitch. The foster-mother of Abaye is authority for the statement that a six-measure cask properly sealed is worth more than an eight-measure cask that is not sealed (B. K. 12a). New wine stood for at least forty days before it was admissible as a drink-offering ('Eduy. vi. 1; B. B. 97a). When the wine had sufficiently settled it was drawn off into bottles known as "lagiu" or "leginah" and "zarzur," the latter being a stone vessel with a rim and strainer, a kind of cooler (Sanh. 106a); an earthen pitcher, "hazab," was also used (Men. viii. 7). The drinking-vessel was the Biblical "kos." The wine was kept in cellars, and from them was removed to storerooms called "heftek," or "apotik" (ἀποθήκη), a pantry or shelves in the wineshop. Bottles of wine from this pantry were exposed for sale in baskets in front of the counter ('Ab. Zarah ii. 7, 39b).

The quality of a wine was known by its color and by the locality from which it came, red wine being better than white wine. Kerulim (probably the Coreæ of Josephus) in Palestine produced the best wine (Men. viii. 6), after which came the red wine

of Phrygia (Perugita; Shab. 147b), the **Varieties.** light-red wine of Sharon (Shab. 77a), and "yayin Kushi" (Ethiopian wine; B. B. 97b). There were special mixtures of wine. Among these were: (1) "alunhit," made of old wine, with a mixture of very clear water and balsam; used especially after bathing (Tosef., Dem. i. 24; 'Ab. Zarah 30a); (2) "kafrisin" (caper-wine, or, according to Rashi, Cyprus wine), an ingredient of the sacred incense (Ker. 6a); (3) "yen zimmukin" (raisin-wine); (4) "inomilin" (οἶνόμελι), wine mixed with honey and pepper (Shab. xx. 2; 'Ab. Zarah l.c.); (5) "ilyoston" (\*ἰλύστον), a sweet wine ("vinum dulce") from grapes dried in the sun for three days, and then gathered and trodden in the midday heat (Men. viii. 6; B. B. 97b); (6) "me'ushshan," from the juice of smoked or fumigated sweet grapes (Men. l.c.); not fit for libation; (7) "enogeron" (οὐνόγαρον), a sauce of oil and garum to which wine was added; (8) "apikzewizin" (ἀποκοτταβίξιν), a wine emetic, taken before a meal (Shab. 12a); (9) "kundiṭon" ("conditum"), a spiced wine ('Ab. Zarah ii. 3); (10) "pesintiṭon" ("absinthiatum"), a bitter wine (Yer. 'Ab. Zarah ii. 3); (11) "yen tappulim," made from apples; cider; (12) "yen temarim," date-wine. Wine made from grapes grown on isolated vines ("roglit") is distinguished from that made of the grapes of a vine suspended from branches or trained over an espalier ("dalit"); the latter was unfit for libation (Men. 86b).

During the time of fermentation the wine that was affected with sourness was called "yayin kosos" (Yer. Pe'ah ii. end), and when matured sour it was "homez" (vinegar). Good vinegar was made by putting barley in the wine. In former times Judean wine never became sour unless barley was put in it; but after the destruction of the Temple that characteristic passed to the Edomite (Roman) wine. Certain vinegar was called the "Edomite vinegar" (Pes. 42b).

Fresh wine before fermenting was called "yayin mi-gat" (wine of the vat; Sanh. 70a). The ordinary wine was of the current vintage. The vintage of the previous year was called "yayin yashan" (old wine). The third year's vintage was "yayin me'yushshan" (very old wine). Ordinary, fermented wine, accord-

ing to Raba, must be strong enough to take one-third water, otherwise it is not to be regarded as wine (Shab. 77a). R. Joseph, who was blind, could tell by taste whether a wine was up to the standard of Raba ('Er. 54a).

Wine taken in moderation was considered a healthful stimulant, possessing many curative elements. The Jewish sages were wont to say, "Wine is the greatest of all medicines; where wine is lacking, there drugs are necessary" (B. B. 58b). R. Huna said, "Wine helps to open the heart to reasoning" (B. B. 12b). R. Papa thought that when one could substitute beer for wine, it should be done for the sake of economy. But his view is

**Medicinal Value.** opposed on the ground that the preservation of one's health is paramount to considerations of economy (Shab.

140b). Three things, wine, white bread, and fat meat, reduce the feces, lend erectness to one's bearing, and strengthen the sight. Very old wine benefits the whole body (Pes. 42b). Ordinary wine is harmful to the intestines, but old wine is beneficial (Ber. 51a). Rabbi was cured of a severe disorder of the bowels by drinking apple-wine seventy years old, a Gentile having stored away 800 casks of it ('Ab. Zarah 40b). "The good things of Egypt" (Gen. xlv. 23) which Joseph sent to his father are supposed by R. Eleazar to have included "old wine," which satisfies the elderly person (Meg. 16b). At the great banquet given by King Ahasuerus the wine put before each guest was from the province whence he came and of the vintage of the year of his birth (Meg. 12a). Until the age of forty liberal eating is beneficial; but after forty it is better to drink more and eat less (Shab. 152a). R. Papa said wine is more nourishing when taken in large mouthfuls. Raba advised students who were provided with little wine to take it in liberal drafts (Suk. 49b) in order to secure the greatest possible benefit from it. Wine gives an appetite, cheers the body, and satisfies the stomach (Ber. 35b). After bleeding, according to Rab, a substantial meal of meat is necessary; according to Samuel, wine should be taken freely, in order that the red of the wine may replace the red of the blood that has been lost (Shab. 129a).

The benefit derived from wine depends upon its being drunk in moderation, as overindulgence is injurious. Abba Saul, who was a grave-digger, made careful observations upon bones, and found that the bones of those who had drunk natural (unmixed)

wine were "scorched"; of those who had used mixed wine were dry and transparent; of those who had taken wine in moderation were "oiled," that is, they had retained the marrow (Niddah 24b). Some of the rabbis were light drinkers. R. Joseph and Mar 'Ukba, after bathing, were given cups of inomilin wine (see above). R. Joseph felt it going through his body from the top of his head to his toes, and feared another cup would endanger his life; yet Mar 'Ukba drank it every day and was not unpleasantly affected by it, having taken it habitually (Shab. 140a). R. Judah did not take wine, except at religious ceremonies, such as "Kiddush," "Habdalah," and the Seder of Passover (four cups). The Seder wine affected him so seriously that he was

compelled to keep his head swathed till the following feast-day—Pentecost (Ned. 49b).

The best remedy for drunkenness is sleep. "Wine is strong, but sleep breaks its force" (B. B. 10a). Walking throws off the fumes of wine, the necessary amount of exercise being in the proportion of about three miles to a quarter-measure of Italian wine ('Er. 64b). Rubbing the palms and knees with oil and salt was a measure favored by some scholars who had indulged overmuch (Shab. 66b).

For religious ceremonies wine is preferable to other beverages. Wine "cheereth God" (Judges ix. 13); hence no religious ceremony should be performed with other beverages than wine (Ber. 35a). Over all fruit the benediction used is that for "the fruits of the tree," but over wine a special benediction for "the fruits of the vine" is pronounced (Ber. vi. 1). This latter benediction is, according to R. Eliezer, pronounced only when the wine has been properly mixed with water. Over natural wine the benediction is the same as that used for the "fruits of the tree" (Ber. 50b). The drinking of natural wine on the night of Passover is not "in the manner of free men" (Pes. 108b). "Kiddush" and "Habdalah" should be recited over a cup of wine. Beer may be used in countries where that is the national beverage (Pes. 106a, 107a). According to Raba, one may squeeze the juice of a bunch of grapes into a cup and say the "Kiddush" (B. B. 97b). The cup is filled with natural wine during grace, in memory of the Holy Land, where the best wine is produced; but after grace the wine is mixed.

The words introducing the grace, "Let us praise Him whose food we have eaten, and by whose goodness we live," are said over a cup of wine, part of which is passed to the hostess (Ber. 50a). Ulla, when the guest of R. Nahman, was invited to pronounce the grace over wine, and the latter suggested the propriety of sending part of the wine to his guest's wife, Yalta; but Ulla demurred, declaring that the host is the principal channel of blessing, and passed it to R. Nahman. When Yalta heard this she was enraged, and expressed her indignation by going to the wine-room ("be hamra") and breaking up 400 casks of wine (Ber. 51b). R. Akiba, when he made a feast in honor of his son, proposed, "Wine and long life to the Rabbis and their disciples!" (Shab. 67b).

Following the Scriptural precept, "Give strong drink unto him that is ready to perish, and wine unto those that be of heavy hearts" (Prov. xxxi. 6), the Rabbis ordered ten cups of wine to be served

with the "meal of consolation" at the mourner's house: three cups before the meal, "to open the bowels," three cups between courses, to help diges-

tion, and four cups after the grace. Later four cups were added in honor of the *hazzanim*, the *parnasim*, the Temple, and the nasi Gamaliel. So many cups producing drunkenness, the last four were afterward discontinued (Ket. 8b). Apparently this custom was in force when the Temple was in existence, and persisted in Talmudic times; it disappeared in the geonic period. R. Hanan declared that wine was created for the sole purpose of consoling the bereaved and rewarding the wicked for

whatever good they may do in this world, in order that they may have no claim upon the world to come (Sanh. 70a). After the destruction of the Temple many Pharisees, as a sign of mourning, vowed to abstain from eating meat and drinking wine, but were dissuaded from issuing a decree which the public could not observe (B. B. 60b). R. Judah b. Bathyra said, "Meat was the principal accompaniment of joy in the time of the Temple, wine in post-exilic times" (Pes. 109a).

Rab said that for three days after purchase the seller is responsible if the wine turns sour; but after that his responsibility ceases. R. Samuel declared that responsibility falls upon the purchaser immediately upon the delivery of the wine, the rule being "Wine rests on the owner's shoulders." R. Hiyya b. Joseph said, "Wine must share the owner's luck" (B. B. 96a, b, 98a). If one sells a cellarful of wine, the purchaser must accept ten casks of sour wine in every hundred (Tosef., B. B. vi. 6). Whoever sells spiced wine is responsible for sourness until the following Pentecost (*i. e.*, until the hot weather sets in). If he sells "old wine," it must be of the second year's vintage; if "very old wine" ("meyushshan"), it must be of the third year's vintage (B. B. vi. 2).

The question of responsibility on the part of carriers of wine ("shekulai") is discussed. When Rabbah bar Hana's hired carriers broke a cask he seized their overgarments; thereupon the carriers appealed to Rab, who ordered Rabbah to return their garments. "Is this the law?" asked Rabbah in astonishment. "It is the moral law," answered Rab, citing, "That thou mayest walk in the way of good men" (Prov. ii. 20). When the garments had been returned the carriers appealed again: "We are poor men; we have worked all day; and now we are hungry, and have nothing." Rab then ordered Rabbah to pay them their wages. "Is this the law?" inquired Rabbah. "It is the higher law," replied Rab, completing the verse previously cited—"and keep the paths of the righteous" (B. M. 83a).

As a commodity, wine has an important place in the business world. A large proportion of the trade in wine for the Feast of Passover is controlled by Jews. The agricultural activity of Palestine is directed mainly to viticulture. The Rothschild cellars at Rishon le-Ziyyon receive almost the entire produce of the Jewish colonists, which, through the Carmel Wine Company, is distributed throughout Russia, Austria, Holland, Switzerland, France, England, and the United States. The vintage of 1904 in the Rothschild cellars exceeded 7,000,000 bottles, of which 200,000 were sold in Warsaw. See AGRICULTURAL COLONIES IN PALESTINE.

Regarding the interdiction of wine prepared or handled by Gentiles see NĒSEK.

**WINNIPEG**: Capital of the province of Manitoba, Canada; situated at the junction of the Assiniboine and Red rivers. Jews had relations with Winnipeg when it was merely a small Hudson Bay post, but the first permanent Jewish settlers went thither about 1878. The Russian anti-Jewish outbreaks of 1881 and 1882 caused about three hundred Jews to settle there in the latter year, most of whom worked upon the Canadian Pacific Railway, then in the course of construction; and subsequent persecutions of the Jews in eastern Europe sent periodic waves of Jewish immigration to the Manitoban capital. In 1898 and 1899 there was an influx from Rumania, and from 1903 to 1905 there was a further considerable accession of settlers from Russia. The census of 1891 placed the Jewish population at 1,156, and at present (1905) the community numbers between 2,500 and 3,000 in a total population of about 80,000. In professional, mercantile, and industrial pursuits the Jews of Winnipeg have done their full share toward the development of the city, and they are extensive holders of its real estate. In 1904 one of their number, Moses Finkelstein, was elected alderman for the most important and populous ward of the city, receiving a large majority. In 1892 and 1893, through the exertions of Asher, Charles, and Michael Pierce, a number of Winnipeg Jews established a colony in Oxbow without calling for outside aid. These colonists were afterward joined by others from eastern Canada and South Africa, and the colony is to-day in a flourishing condition.

Winnipeg now possesses six Jewish congregations. The earliest was the B'nai Israel, established in 1883, and then came Congregation Beth-El, founded in 1885; in 1889 these two congregations amalgamated under the name "Shaary Zedek," and built a synagogue in King street. Congregation Rosh Pina was organized in 1890, with a synagogue on Martha street, Congregation B'nai Israel, in 1893, with a synagogue on Martha street; and Congregation Beth Jacob, in 1902, with a synagogue on Schultz street. In 1904 the Holy Blossom congregation came into existence, and was reorganized the following year under the name "Shaar Hashamoyim"; and Congregation Adas Yeshurun was founded in 1905.

The Jews of Winnipeg have established a number of communal societies, including the Dr. Gaster Benevolent Society, the Winnipeg Hebrew Benevolent Society, the Shaary Zedek Ladies' Aid Society, the Rosh Pina Ladies' Aid Society, the Winnipeg Hebrew Literary Society, and the Shaary Zedek Talmud Torah. The last-mentioned has erected a spacious building for educational purposes. In 1898

the first Winnipeg Zionist society was established, and at present there are in the city three large and active branches of the movement.

C. I. DE S.

**WINTER, SOLOMON:** Hungarian philanthropist; born in the county of Zips, Hungary, in 1778; died at Hunsdorf, in the same county, Feb. 24, 1859, after laboring for sixty years for the advancement of the Jewish race in his locality. The erection of the synagogue in Hunsdorf about 1820, and the construction of the school in 1840, were due to him; and he was a representative of the collective communities of the county in the Budapest congress of Jewish notables.

**WINTERNITZ, MORIZ:** Austrian Orientalist; born at Horn Dec. 23, 1863. He received his earliest education in the gymnasium of his native town, and in 1880 entered the University of Vienna, receiving the degree of doctor of philosophy in 1886. In 1888 he went to Oxford, where until 1892 he assisted Max Müller in the preparation of the second edition of the Rig-Veda (4 vols., Oxford, 1890-92), collating manuscripts and deciding on the adoption of many new readings. Winternitz remained in Oxford until 1898, acting in various educational capacities, such as German lecturer to the Association for Promoting the Higher Education of Women (1891-98), librarian of the Indian Institute at Oxford (1895), and frequently as examiner in German and Sanskrit both for the university and for the Indian Civil Service. In 1899 he went to Prague as privat-docent for Indology and general ethnology, and in 1902 was appointed to the professorship of Sanskrit (made vacant by the retirement of Ludwig) and of ethnology in the German University of Prague. In addition to valuable contributions on Sanskrit and ethnology to various scientific journals, Winternitz edited the "Apastambiya Grihyasutra" (Vienna, 1887) and the "Mantrapatha, or the Prayer-Book of the Apastambins" (part i., Oxford, 1897); translated Müller's "Anthropological Religion" and his "Theosophy, or Psychological Religion" into German (Leipzig, 1894-95); and published "Das Altindische Hochzeitsrituell" (Vienna, 1892), which contains also valuable ethnological material; "A Catalogue of South Indian Manuscripts Belonging to the Royal Asiatic Society of Great Britain and Ireland" (London, 1902); and "Geschichte der Indischen Literatur" (part i., Leipzig, 1905).

L. H. G.

**WINTERNITZ, WILHELM:** Austrian physician and hydropathist; born at Josefstadt, Bohemia, March 1, 1835; educated at Vienna and at Prague (M.D. 1857), where he settled and became an assistant at the institute for the insane. In 1858 he entered the Austrian navy, but resigned his position as surgeon in 1861 and established a practise in Vienna. There he became interested in hydropathy, and was soon regarded as one of the leading authorities. Admitted to the medical faculty of the University of Vienna as privat-docent for hydropathy in 1865, he was one of the founders of the General Vienna Dis-

pensary, where he is now (1905) departmental chief. In the same year he opened a private hospital near Vienna. In 1874 he became privat-docent in medicine, and was appointed assistant professor seven years later, becoming a full professor in 1899.

Winternitz is a collaborator for hydropathy on Von Ziemssen's "Handbuch der Allgemeinen Therapie" (ed. 1881), Eulenburg's "Realencyclopädie der Gesammten Heilkunde" (ed. 1897), and Eulenburg's "Lehrbuch der Allgemeinen Therapie und der Therapeutischen Methodik" (Berlin, 1898-99). In 1890 he founded the "Blätter für Klinische Hydrotherapie," of which he is still the editor.

In addition to several essays and monographs in medical journals, Winternitz is the author of the following works: "Kaltenlentgeben und Meine Wasserheilanstalt" (Vienna, 1869); "Die Hydropathie auf Physiologischer und Klinischer Grundlage" (*ib.* 1877-80; 2d ed. 1890-92; translated into English, French, Italian, Spanish, and Russian); and "Cholera, Lungenphthise und Fieber: Klinische Studien" (*ib.* 1887-88).

**WINTERSTEIN, SIMON, FREIHERR VON:** Austrian railroad magnate; born at Prague 1819; died at Vöslau June 11, 1883. The son of poor parents, he had to learn early to support himself. He chose a commercial career, and worked as a clerk in Prague and in Vienna, later establishing a business of his own in the latter city. After acting for some time as shipping agent for the Nordbahn, he entered the executive board of this railroad, and finally became its president. Through business connection with the house of Rothschild he became a member also of the boards of directors of the Südbahn and of the Creditanstalt. Winterstein was for a number of years president of the Jewish community of Vienna. He was a member of the Austrian House of Lords.

**WINTERTHUR.** See SWITZERLAND.

**WISCONSIN:** State in the Upper Lake region of the United States of America; admitted to the Union in 1848. In 1792 a Jew named Jacob Franks went to Green Bay, and in 1805 he erected the first grist- and saw-mill in that section of the country. There were doubtless other Jews possessing business and other interests in the region which later became the state; but the early records are very scanty. The oldest congregation in the state is B'ne Jeshurun, in Milwaukee, organized in 1853 by Lohl Rindskopf, Leopold Newbauer, Solomon Adler, Emanuel Silverman, and others, all of whom were among the first Jewish settlers in that city.

Wisconsin contains the following Jewish communities: **Appleton**, with a congregation (Zion) comprising 34 members and founded in 1873, and a ladies' aid society having a membership of 32 and founded in 1878; **Ashland**, which has a congregation organized in 1887, an auxiliary society, a ladies' benevolent association, and a cemetery; **Duluth**, with a congregation, Adas Israel; **Eau Claire**, with a con-

gregation, a religious school, and an aid society comprising 50 members; **Fond du Lac**, containing a community that holds holy-day services; **Gillette** and **Green Bay**, each with a congregation; **Hurley** and **Ironwood**, which form a congregation jointly; **Kenosha**, with the Congregation B'nai Zedek, incorporated in 1904 and having 27 members; **La Crosse**, which has two congregations (Anshe Cheset, founded in 1856, and Shearith Israel, in 1899), a benevolent society, and a cemetery; **Madison**, possessing a congregation, **Ahawah Achim**, and a cemetery; **Manitowoc**, whose congregation, **Anshe Polia Sadek**, was founded in 1900; **Marinette**, which has a congregation (founded in 1888 and having 32 members), a religious school, and a cemetery; **Milwaukee** (see *Jew. Encyc.* viii. 594); **Monroe**, **Oshkosh**, **Racine**, and **Sheboygan**, each with a congregation; and **Superior**, which has three congregations, all organized within the last ten years.

The state has a Jewish population of 15,000 in a total of 2,069,042 (1904).

A. M. Ho.

**WISDOM** (Hebr. חכמה; Greek, σοφία): Practical intelligence; the mental grasp which observes and penetrates into the nature of things, and also the ability skillfully to perform difficult tasks. The former faculty is intuitive, the latter creative. Hence the word connotes both deep understanding and artistic skill. Wisdom is at once a human and a divine property.

All human wisdom and skill come from God. The spirit of God made Joseph discreet and wise (Gen. xli. 38-39), inspired and prepared Bezaleel and other artists for the work of the Tabernacle (Ex. xxxi. 3-6), and was also the source of the wisdom of Joshua (Deut. xxxiv. 9) and Solomon (I Kings iii. 12, 28). "The Lord giveth wisdom" (Prov. ii. 6; comp. Job xxxviii. 36; Ps. li. 8 [A. V. 6]; Dan. ii. 21), and He annuls the wisdom of the wise (Isa. xxix. 14). Great blame, therefore, attaches to those who disregard the di-

**Wisdom in the Bible.** vine source of their wisdom and be- come conceited and sinful (Isa. v. 21, xxix. 14; Jer. iv. 22, viii. 8-9, ix. 22).

Wisdom is acquired, moreover, by the observation of nature (Prov. vi. 6; Job xxxv. 11) and of history (Deut. xxxii. 29; Hos. xiv. 10 [A. V. 9]; Prov. viii. 33, xix. 20), as well as by study and by association with the wise (Prov. ix. 9, xiii. 20; Job xxxii. 7).

The wise were sought out for their counsel (Deut. i. 13, 15; II Sam. xiv. 20, xvi. 23; Prov. xii. 18, xiii. 14), so that, like the priest with his Torah and the prophet with his revealed word of God, they formed a special class (Jer. xviii. 18). In more primitive times "wise women" were consulted (II Sam. xiv. 2; xx. 16, 22), and at a later period females who were skilled in the art of music and song were called "wise women" (Jer. ix. 17).

As contrasted with the Law and the Prophets, which were intended for the people of Israel exclusively, wisdom was less restricted. "The children of the east country," as well as of Egypt and the south, were regarded as the possessors of wisdom from of old (comp. I Kings v. 10-11 [A. V. iv. 30-

31]; Jer. xlix. 7), and Daniel was considered a representative of them (Ezek. xxviii. 3). This spirit of universal wisdom was also typified by King Solomon (I Kings v. 9-14 [A. V. iv. 29-34], x. 1-24; Eccl. i. 13, 16); and to him, accordingly, was ascribed the entire Wisdom-literature preserved in the form of proverbs, secular songs (Song of Solomon), philosophic thought (Ecclesiastes), and, later, the Wisdom of Solomon. As soon as monotheism was firmly established as a result of the labors of the Prophets,

the wisdom of the East could be consulted by Israel's sages, and questions concerning the origin of all things could be answered, in both poetry and prose, far more intelligently than had been possible for the ancient Babylonians. This was done occasionally by the Deutero-Isaiah (xl. and elsewhere), by the interpolator of Amos iv. 13 and v. 8, by the authors of Proverbs (viii. 22-31), of Job (xxviii. and elsewhere), and of Ps. civ., and, most authoritatively of all, by the composers of Gen. i.-x. Wisdom, which dwelt, according to the Babylonian cosmology, in the depths of the sea with Ea, the creative deity, became in Biblical literature the all-encompassing intelligence of God, the helper of the Creator, the foundation of the world (comp. Jeremias, "Das Alte Testament im Lichte des Alten Orients," 1904, pp. 29, 80). In exact proportion as Israel's God was believed to be the God of the universe, wisdom was regarded as the cosmic power, God's master workman (Prov. viii. 30), the first of His works (*ib.* viii. 22), and His designer (*ib.* iii. 19; Ps. civ. 24), while at the same time wisdom became the law of life and the divine guide and ruler of man. Virtue, or the fear of God which is the avoidance of evil, was developed into the dominant teaching of the Proverbs and Job. The ceremonial laws are scarcely mentioned, and only the ethical side of religion is considered. At times the ethics assumes too worldly an aspect and becomes commonplace morality (Prov. vi. 34, xiv. 22, xxiv. 17-18, xxix. 3), although other passages point to high ideals (Job xxix. 15-16, xxxi.; Prov. x. 12).

The Book of Ecclesiastes, written by some Sadducean pessimist under the influence of Greek Epicureanism and skepticism, reflects the impressions made by a worldly wisdom no longer permeated by the spirit of the Torah, so that the Solomonic wisdom, which had lost sight of the ethical ideal, was mocked and shown to be a failure.

In the main, wisdom was greatly valued and eagerly sought during the Second Temple, and the wise became the teachers of the young and the models of the old. An extensive Wisdom-literature, of which large portions may have been lost, sprang up in continuation of the Proverbs of Solomon.

**Wisdom in the Apocrypha.** Ecclesiasticus (SIRACH) proves, on analysis, to be a compilation of writings which belong in part to an older generation; and the **TESTAMENTS OF THE**

**TWELVE PATRIARCHS**, which recent research has reclaimed for Jewish literature, may also be classed among these Wisdom-books. Concerning the Book of Wisdom see **WISDOM**, **BOOK OF**. The table-talk of the wise men of Jerusalem at the court of King Ptolemy of Egypt in the Letter

of Aristeas, §§ 187-300, as well as the answer of Zerubbabel, the page of King Darius (I Esdras ii.-iii.), indicates the Jewish longing to appear as wise men like Daniel and Joseph before the kings of the world.

In all these books wisdom is extolled and invested with divine attributes (Ecclus. [Sirach] i. 1-26, iv. 11-29, li. 13-30, and especially xxiv. 1-29, where it is identified with the law of Moses; Test. Patr., Levi, 13; Enoch, xlii. 1-2). The book on astronomy and cosmography in the writings of Enoch is described as celestial wisdom (Enoch, xxxvii. 2, xlix. 1-3, lxxxii. 2-3; comp. Book of Jubilees, iv. 17, xxi. 10), and Noah's book on healing (Book of Jubilees, x. 13) belongs to the same class.

Under the influence of Greek philosophy wisdom became a divine agency of a personal character (Wisdom vii. 22-30), so that Philo terms it the daughter of God, "the mother of the creative Word" ("De Profugis," §§ 9, 20), while as the creative principle of the world, wisdom

Traces in occurs in Targ. Yer. to Gen. i. 1

Post- (comp. Hag. 11b; Gen. R. i., where

Biblical the Torah takes the place of wisdom;

Literature. see also the midrash on Prov. iii. 19 in Jellinek, "B. H." ii. 23-39, v. 63-69). In Christian and Gentile Gnosticism, wisdom became the center of speculation (see Gnosticism). The so-called Fourth Book of Maccabees, a philosophical sermon on self-control with reference to the seven martyred sons of the Maccabean heroine, is another contribution to the Hellenistic Wisdom-literature.

"The wise man" was the title of the early master of the Law (Ab. i. 4, ii. 15), but at a later period the masters bore the epithet of "rabbi," and only those who had died retained the name of "the wise," while the learned were called "disciples of the wise" (see Levy, "Neuhebr. Wörterb." s.v. חכם). In general, "wisdom" ("hokmah") connotes universal or worldly wisdom, and is thus contrasted with the Torah (Kid. 49b; Niddah 69b; Sanh. 104b; Yer. Mak. ii. 31d). There are records of disputations between Jewish masters and Gentile sages, such as the one between R. Joshua b. Hananiah and the men of Athens (Bek. 8-9; Lam. R. i. 4 *et seq.* [comp. ATHENIANS]; Tamid 32a, b). In Pes. 94b (comp. R. H. 12a) the opinion of the wise men of the Gentiles is preferred to that of the Jewish sages. At the sight of Gentile sages one should recite the benediction: "Blessed art Thou, O Lord our God, King of the Universe, who hast imparted of Thy wisdom to flesh and blood" (Ber. 58b). "Ten measures of wisdom came down from heaven, and nine of them fell to the lot of the Holy Land" (Kid. 49b). "Since the destruction of the Temple the wise have taken the place of the Prophets" (B. B. 12a). "Who is wise? He who learneth from every one" (Ab. iv. 1). "The Shekinah rests only upon the wise, the strong, the rich, and the tall" (Shab. 92b); but the members of the Sanhedrin must possess universal wisdom (Sanh. 17a). Among the masters of the Mishnah, R. Johanan b. Zakkai and R. Akiba were considered the paragons of universal wisdom (Soṭah ix. 15, 49b). "Greek wisdom" was fostered in the house of Gamaliel, but was forbidden

elsewhere after the Hasmonean war (B. K. 82b-83a; Soṭah 49b). The sciences of music (R. H. 29b) and astronomy (Shab. 75a) are called "wisdom," and the midwife is termed the "wise woman" (Shab. xviii. 3), while the fourth benediction in the "She-moneh 'Esreh" is called the "Benediction of Wisdom" (Ber. 33a).

In rabbinical and philosophical literature the various sciences are termed "hokmot"; and as the seven sciences of the medieval university ("trivia" and "quadrivia") were based on Prov. ix. 1, "Wisdom hath builded her house, she hath hewn out her seven pillars," so Jewish writers allude to the seven branches of wisdom (see Joseph Kimḥi on Prov. ix. 1; Steinschneider, "Jüdische Literatur," in Ersch and Gruber, "Encyc." section ii., part 27, pp. 424, 434-435, where the various "hokmot" are enumerated).

K.

**WISDOM OF SOLOMON, BOOK OF THE** (LXX. *Σοφία Σολομώντος*; Vulgate, "Liber Sapientiae"): Apocryphal book written in Alexandria about the middle of the first century B.C. That it was composed in Greek by an Alexandrian Jew has been conclusively shown by Freudenthal ("J. Q. R." iii. 722-753). The book has neither an introductory verse nor a regular conclusion. In fact, it consists of three independent parts which have no real connection, and which treat of subjects altogether different, a fact clearly recognized by Bretschneider, Eichhorn, and others, but disputed by Grimm ("Kurzgefasstes Exegetisches Handbuch zu den Apocryphen des Alten Testaments," vi. 9-24, Leipzig, 1860) and his followers.

The first six chapters of Wisdom form an address to the rulers of the earth (i. 1; comp. iii. 8; vi. 1-2, 9, 21). They accentuate the necessity of wisdom as indispensable to rulers (i. 6, vi. 9-25), although they are chiefly directed against the Epicureans, the ungodly who deny immortality, indulge in lust and incest, and mock the righteous and the learned, who in their turn upbraid them for their lawlessness and licentiousness (ii. 1-16). In contrast with them the

"saints" (Ḥasidim) whom they expose  
**Contents of** to torture (ii. 19, iii. 1) and to a martyr's death (iii. 2) are called "sons of God," initiated into His mystery, promised an inheritance in eternal life (i. 14; ii. 13, 21, 23; iii. 4, 15; iv. 1; v. 15) like Enoch (iv. 10-16), and assured of a crown of glory in the world to come (v. 16). Finally, wisdom is introduced in vi. 9-25 as the speaker, and as the one who bestows the divine kingdom and confers immortality (vi. 20-21); whereas sin brings death, since "through envy of the devil came death into the world" (ii. 24). The second part (ch. vii.-ix. 17) contains an address of King Solomon, relating how his life was guided solely by wisdom, and closing with a prayer offered by him to God that he might obtain her. Here wisdom is represented as a mystic power which imparts not only knowledge of all mysteries and the spirit of prophecy (vii. 17-21, 27), but even immortality (viii. 13), while it is also a cosmic force invested with twenty-one divine attributes, this number being either a triple multiple of seven, or, if originally twenty-two instead of twenty-one, corresponding to the twenty-two letters of the Greek alphabet (vii.

22-23). At the same time, wisdom, as in the Platonic system, is believed to teach the four cardinal virtues of temperance, prudence, justice, and fortitude (viii. 7). The prayer of Solomon refers to the heavenly tabernacle prepared from the beginning, and to his own predestination (ix. 7-8; see **PREEXISTENCE**). Wisdom is described as a cosmic principle dwelling on the throne of glory next to God, and as knowing and designing all things (ix. 1, 4, 10), being identical with the creative Word (ix. 1) and the Holy Spirit (ix. 17).

While these two portions of the book form a unity to some extent, and probably gave the entire work its title of "Wisdom of Solomon," the last section (ix. 18-xix. 22) is devoid of all connection with what precedes. The speaker is no longer Solomon, but the author or the saints (xvi. 28, xviii. 6 *et passim*), who recite the history of Israel's redemption from Egypt and other enemies. In like manner, the words are not addressed to the kings of the earth (ix. 18; x. 20; xi. 4, 9, 17, 21; *et passim*), but to God, the deliverer from the Red Sea. The whole appears on close observation to be part of a Passover Haggadah recited in Egypt with reference to Gentile surroundings, and it accordingly abounds in genuine haggadic passages of an ancient character. The tenth chapter serves as a connecting-link between the Solomonic Wisdom-book and this Passover-Haggadah fragment, and must, therefore, be taken with the last verse of the ninth chapter and the first of the eleventh, in both of which wisdom forms the theme. Here, however, it has nothing in common with the Solomonic wisdom, which, enabling the king to penetrate into all the mysteries of heaven and earth, to study the world of the spirits, and to learn the virtues of stones and roots, thus came

very close to the Platonic wisdom (vii. 17-26).

**Passover Haggadah.** The wisdom of the haggadist is exclusive and hostile to the Gentile world, rather than cosmopolitan and broad, saving only the righteous and bringing ruin upon the wicked (ix. 18, x. 1-21). From this point of view the lives of the Patriarchs are recounted to lead up to the story of the Exodus. Wisdom taught Adam to rise from his fall by repentance (comp. "Vita Adæ et Evæ," viii.; Pirke R. El. xx.); but it caused Cain and his generation to perish (x. 1-3). It saved Noah, Abraham, and Lot, but brought lasting doom upon the offenders (x. 4-9). It showed Jacob the kingdom of God in the vision of the ladder (comp. Gen. R. lxviii. 16; Targ. Yer. to Gen. xxviii. 12) and gave him victory over all his pursuers (x. 10-12). It preserved Joseph the righteous from sin, went with him into the pit and the prison, and raised him to the throne and to glory, but covered his detractors with shame (x. 13-15). It delivered Israel from its heathen oppressors, entered into the soul of Moses, enabling him to work all his miracles before Pharaoh, and, in the shape of a protecting pillar of cloud by day and of an illuminating fire by night, guided the people through the wilderness and through the Red Sea, while it drowned the Egyptians and cast them up again from the deep to enrich the Israelites with the spoils that floated upon the water (x. 15-20; comp. Mek., Beshallah, 6; Targ. Yer. to Ex. xiii. 21; xv.

12, 20; Josephus, "Ant." ii. 16, § 6). It also opened the mouths of the dumb so that they joined in the song of the people in praise of God at the Red Sea (x. 21; comp. Mek. to Shirah [Song of Moses], 1), and it prospered the work of Moses in the wilderness (xi. 1-4).

This section is followed (xi. 5-xix. 21) by a haggadic discourse in the form of a prayer of thanksgiving on the Egyptian plagues and other miracles connected with the Exodus, obviously to be recited on the eve of the Passover (xviii. 6-9; comp. Josephus, "Ant." ii. 16, § 4; Book of Jubilees, xlix. 2-6). The fundamental principle of the ancient Haggadah is that God metes out the perfect justice expressed by the Rabbis in the phrase "middah keneged middah" (= "measure for measure"), so that the book declares: "Wherewithal a man sinneth, by the same also shall he be punished" (xi. 16). This was applied to the Egyptians with reference to Ex. xviii. 11 (see Targum *ad loc.*; Soṭah 11d). Here, however, the haggadist goes so far as to maintain that the very thing which proved an instrument of vengeance to the Egyptians became a means of safety for Israel (xi. 5). The water in which the Israelitish children were to be drowned was turned to blood for the parched Egyptians, while it flowed forth from the rock to quench the thirst of the children of Israel in the desert (xi. 4-7). In like manner, the animals worshiped by the

Egyptians became the source of terror and harm to them (xi. 15-19, xii. 24-27); "for these [the Israelites] thou didst admonish and try, as a father: but the other [the Egyptian people], as a severe king, thou didst condemn and punish" (xi. 10), even though God loves all His creatures, and waits for the repentance of the sinner because He is the lover of souls (xi. 24-xii. 2). The real cause of the doom of such Gentile nations as the Canaanites was their commission of the capital sins of idolatry and murder (xiii. 4-7; comp. Sibyllines, i. 150, 178; iii. 36-40, 585-605, 761-764; *et passim*). Yet even they were given time for repentance; wherefore God sent the wasps before Israel to destroy the Canaanites gradually, instead of killing them all at once (xii. 8-11; comp. Ex. xxiii. 28; Soṭah 36a); for God blends mercy with justice, to teach "that the just man should be merciful" (xii. 19; comp. i. 6), and unrepentant Egypt was thus severely punished until she acknowledged the God she had denied (xii. 27).

Egyptian (and Greek) idolatry is declared (xiii. 1-10) to be far less excusable than Babylonian star-worship, and it is therefore derided (xiii. 11-19) in terms borrowed from Isa. xliv. 13-20. Idolatry was first introduced by the giants who were descended from the fallen angels. Its purposes were corruption and fornication (xiv. 1-13); it owed its hold on mankind to the honor paid the images of dead sons (xiv. 14-21; comp. Book of Jubilees, xi. 4;

**The Folly of Idolatry.** Bezold, "Die Schatzhöhle," p. 31), and it led to murder, adultery, theft, and perjury (xiv. 22-31). Knowledge of God alone guides to righteousness and immortality, while the enemies (the Romans and the Greeks of Alexandria, as well as the Egyptians)

who hold Israel in subjection are termed foolish image-worshippers (xv. 1-15; comp. Ps. cxv., recited on the eve of the Passover). The Egyptian animal-worship again suggests to the haggadist the idea that while the beasts became a torment to Egypt, the quail became nourishing food for the people of God (xvi. 1-4); and though the serpents bit the Israelites in the wilderness, they were in the end a sign of salvation for them, admonishing them to look to God as the savior whose word heals all (xvi. 5-12; comp. R. H. iii. 8c). The fire which fell with both the hail and the rain (Ex. ix. 24; Tan., Wayera, ed. Buber, p. 22), as well as in the sea (Ex. xiv. 24; Targ. Yer. *ad loc.*; Josephus, "Ant." ii. 16, § 3), like the fire which would not destroy the frogs in the oven (xix. 21; Pes. 53b), manifested the wondrous power of God (xvi. 16-19). On the other hand, the manna, which fell like hoar frost and was flavored to suit every wish and taste, did not melt in the heat of the wilderness, but disappeared under the first rays of the sun that the people might offer their praise early in the morning (comp. Yoma 75a; Targ. Yer. to Ex. xvi. 21; Mek., Wayassa', 4 [ed. Weiss, p. 58a]; for the Essene prayer at sunrise see Josephus, "B. J." ii. 8, § 5; Ber. 9b; and comp. ESSENES). The Egyptian plague of darkness, in striking contrast to the light in the houses of the children of Israel (Ex. x. 21-23), is declared to have been a punishment for their imprisonment of the Israelites, the future bearers of the light of the Law, and for their pride in their intellectuality, besides being a token of their future doom (xvii. 1-xviii. 4). The last plague, the death of the first-born, was the punishment for the intended murder of the Israelitish children (xviii. 5).

**Plagues upon Egypt.** This same night of watching proved to be the doom of the Egyptians and the election of Israel, so that on the one side resounded cries of lamentation, and on the other were heard songs of thanksgiving (xviii. 7-17). The almighty "Word" carried the sword of death throughout Egypt, and by this same power Aaron, with his robe, his breastplate, and his diadem decked with divine mysteries, subdued the angel of death (xviii. 20-25). Finally, the destruction of the Egyptians in the Red Sea is described as a renewal of the miracle of Creation (xix. 1-6), since out of the sea rose a green field (comp. Targ. Yer. to Ex. xv. 19). The Egyptians had been more brutal in their treatment of the strangers than had the inhospitable Sodomites, thus accounting for the severity of their punishment (xix. 13-22). Here the Haggadah breaks off abruptly.

It is evident that these three parts, or at least the first two (i.-ix., x.-xix.), can not have emanated from the same author, for neither the style nor the views can be ascribed to one and the same person. This leads to the supposition that the original Wisdom of Solomon and the Passover-Haggadah fragment were probably joined together and then treated as one book. Grätz ("Gesch." 4th ed., **Authorship** iii. 382-385, 611-613) finds in the work **and Date.** allusions to the apotheosis of Caligula (38-40 C.E.), but the deification of the Ptolemies goes back to Egyptian custom. Ch. ii. and iii. refer to Jewish converts, not to Greeks in

Alexandria. The character of the book as regards the creative Wisdom, Word, and Spirit indicates a stage prior to the Philonic system, and the Biblical story shows a haggadic form still fresh and not yet compressed into a rigid system, as in Philo (see Siegfried, "Philo von Alexandria," pp. 22-24, Jena, 1875). The apostle Paul (see Grafe, "Das Verhältniss der Paulinischen Schriften zur Sapientia Salomonis," Freiburg-im-Breisgau, 1892; comp. also SAUL OF TARSUS), the author of the Epistle to the Hebrews (Heb. i. 3, iv. 12; comp. Wisdom vii. 22, 26), and others have drawn from the Book of Wisdom. This places the date of the book, or at least that of the first part, with certainty in the first century B.C.

A Hebrew translation of the Wisdom of Solomon is mentioned by Nahmanides in the preface to his commentary on the Pentateuch. A Hebrew version with a commentary was published by Hartwig Wesely (Berlin, 1780), and a German translation with notes, valuable for the references to rabbinical literature, was made by M. Gutmann (Altona, 1841).

**BIBLIOGRAPHY:** For the extensive literature see Schürer, *Gesch.* 3d ed., iii. 377-383. The chief editions, besides that contained in Fritzsche's *Apocryphi Græci*, are: Reusch, *Liber Sapientiae Græce*, Freiburg-im-Breisgau, 1858; Deane, *Book of Wisdom*, Oxford, 1881. On the question of the original language see Margoliouth, *Was the Book of Wisdom Written in Hebrew?* in *J. R. A. S.* 1890, pp. 263 *et seq.*; answered by Freudenthal, *What Is the Original Language of the Wisdom of Solomon?* in *J. Q. R.* iii. 722-753.

**WISDOM OF GOD.** See God.

**WISE, AARON:** American rabbi; born at Erlau, Hungary, May 2, 1844; died in New York March 30, 1896; son of Chief Rabbi Joseph Hirsch WEISS. He was educated in the Talmudic schools of Hungary, including the seminary at Eisenstadt, where he studied under Dr. Hildesheimer. Later he attended the universities of Leipsic and Halle, receiving his doctorate at the latter institution. He assisted Bernard Fischer in revising the Buxtorf lexicon, and was for several years a director of schools in his native town. He was for a time identified with the ultra-Orthodox party in Hungary, acting as secretary to the organization Shomere ha-Datt, and editing a Judæo-German weekly in its support. In 1874 Wise emigrated to the United States, and became rabbi of Congregation Beth Elohim in Brooklyn; two years later he was appointed rabbi of Temple Rodeph Shalom in New York, which office he held until his death.

Wise was the author of "Beth Aharon," a religious school handbook; and he compiled a prayer-book for the use of his congregation. He was for some time editor of the "Jewish Herald" of New York, and of the "Boston Hebrew Observer"; and he contributed to the year-books of the Jewish Ministers' Association of America, as well as to other periodical publications. He was one of the founders of the Jewish Theological Seminary, and the first vice-president of its advisory board of ministers. Wise founded the Rodeph Shalom Sisterhood of Personal Service, which established the Aaron Wise Industrial School in his memory.

S. S. W.

**WISE, ISAAC MAYER:** American Reform rabbi, editor, and author; born at Steingrub, Bohemia, March 29, 1819; died at Cincinnati, Ohio, March 26, 1900. He was the son of Leo Wise, a school-teacher, and received his early Hebrew education from his father and grandfather, later continuing his Hebrew and secular studies in Prague. He received the hattarat hora'ah from the Prague bet din, composed of Rabbis Rapoport, Samuel Freund, and E. L. Teweles. In 1843 he was appointed rabbi at Radnitz, Bohemia, where he remained for about two years, emigrating to the United States in 1846. He arrived in New York on July 23 of the same year, and in the following October was appointed rabbi of the Congregation Beth-El of Albany, New York. He soon began agitating for reforms in the service, and his was the first Jewish congregation in the United States to introduce family pews in the synagogue. Sermons in the vernacular, a mixed choir, and confirmation were also among the innovations introduced by Wise, who even went so far as to count women in forming a minyan or religious quorum.

In 1850 some unfortunate events caused a split in the Albany community, and the consequent formation of a new congregation, the Anshe Emeth, by the friends and supporters of the rabbi. Wise remained with this congregation until April, 1854, when he became rabbi of the Bene Yeshurun congregation of Cincinnati, Ohio, where he officiated for the remaining forty-six years of his life. Wise was active in so many directions, and was so great a power in the history of Judaism in the United States, that it is necessary to treat under distinct headings the various achievements of his long and successful career. He was above all an organizer, and the numerous institutions that he called into being attest to the great influence he wielded during his life.

In 1847, at the suggestion of Max Lillenthal, who was at that time stationed in New York, a bet din was formed, which was to act in the capacity of an advisory committee to the congregations of the country, without, however, exercising hierarchic powers. As members of this bet din, Lillenthal named Wise and two others, besides himself. At a meeting held in the spring of 1847 Wise submitted to the bet din the manuscript of a prayer-book, to

be entitled the "Minhag America," and to be used by all the congregations of the country. He had noticed that nearly every prominent rabbi in Europe, and, later, in the United States, issued his own prayer-book, and in order to stem this individualistic tide he advocated the adoption of a common prayer-book. Nothing definite was done in the matter, however, until the Cleveland Conference of 1855, when a committee consisting of Wise, Rothenberg, and Kalisch was appointed to edit such a prayer-book. This book appeared under the title "Minhag America," and was practically Wise's work; it was adopted by most of the congregations of the Western and Southern states. So pronounced was Wise's desire for union, that when in 1894 the "Union Prayer-

Book" was published by the Central Conference of American Rabbis, he voluntarily retired the "Minhag America" from his own congregation.

As early as 1848 Wise issued a call to the "ministers and other Israelites" of the United States, urging them to form a union which might put an end to the prevalent religious anarchy. His call appeared in the columns of the "Occident," and was ably seconded by its editor, Isaac Leiser. Wise suggested that a meeting be held in the spring of 1849 at Philadelphia, to establish a union of the congregations of the entire country. This meeting did not take place; but the originator of the idea never ceased advocating it, especially after he had established his own newspaper, "The Israelite" (July, 1854), in the columns of which he indefatigably expounded his views upon the subject.

His persistence won its reward when in 1873, twenty-five years after he had first broached the idea, the UNION OF AMERICAN HEBREW CONGREGATIONS was organized at Cincinnati. Earnest as he was in proclaiming the necessity for union among the congregations, he was equally indefatigable in insisting upon the pressing need of a theological seminary for the training of rabbis for American pulpits. In his "Reminiscences" he gives a vivid picture of the incompetency of many of the men who posed as spiritual guides of the congregations during the early days of his residence in the United States. He had scarcely arrived in Cincinnati when, with his characteristic energy, he set to work to establish a college in which young men could receive a Jewish

Isaac Mayer Wise.

**Hebrew  
Union  
College.**

education. He enlisted the interest and support of a number of influential Jews of Cincinnati and adjacent towns, and in 1855 founded the Zion Collegiate Association. The venture, however, proved a failure, and the society did not succeed in opening a college. Nothing daunted, Wise entered upon a literary campaign, and year in and year out he presented the subject in the columns of "The Israelite." His indomitable perseverance was crowned with success when, on October 3, 1875, the HEBREW UNION COLLEGE opened its doors for the reception of students, four of whom were ordained eight years later.

The first outcome of Wise's agitation for union among the Jews was the Cleveland Conference held in 1855, and convened at his initiative. This conference was unfortunate, for, instead of uniting the rabbis of all parts of the country in a

**Rabbinical** bond of fellowship, it gave rise to strained relations between Wise and his followers on one side, and prominent rabbis in the eastern part of the

country on the other side. These differences were partly removed during the rabbinical conference of Philadelphia (1869), which Wise attended. The New York conference of 1870, and the Cincinnati conference of 1871 were efforts in the same direction; but a controversy ensuing from the latter served only to widen the breach. Yet was the great "unionist" not discouraged. He continued agitating for a synod which was to be the central body of authority for American Judaism. In 1881 he submitted to the meeting of the Rabbinical Literary Association a report urging the formation of a synod; but the matter never passed beyond the stage of discussion. However, he lived to see the establishment of the Central Conference of American Rabbis in 1889, which was the third enduring offspring of his tireless energy and unflinching perseverance. During the last eleven years of his life he served as president of the conference which he had called into existence (see CONFERENCES, RABBINICAL).

Besides the arduous labors that the organization of these national institutions entailed, Wise was active in many other ways. In 1857, when a new treaty was to be concluded between the United States and Switzerland, he visited Washington as chairman of a delegation to protest against the ratification of this treaty unless Switzerland should cease its discriminations against American Jews. In his own city, besides officiating as rabbi of the Bene Yeshurun congregation and as president of the Hebrew Union College, he edited the "American Israelite" and the "Deborah," served as an examiner of teachers applying for positions in public schools, and was also a member of the board of directors of the University of Cincinnati. He traveled throughout the United States, lecturing, dedicating synagogues, and enlisting the interest of the Jewish communities in his plans and projects.

Wise was the author of the following works: "The History of the Israelitish Nation from Abraham to the Present Time," Albany, 1854; "The Essence of Judaism," Cincinnati, 1861; "The Origin of Christianity, and a Commentary on the Acts of the Apostles," 1868; "Judaism, Its Doctrines and Duties," 1872; "The Martyrdom of Jesus of Naza-

reth: a Historico-Critical Treatise on the Last Chapter of the Gospel," 1874; "The Cosmic God," 1876; "History of the Hebrews' Second Commonwealth," 1880; "Judaism and Christianity, Their Agreements and Disagreements," 1883; "A Defense of Judaism vs. Proselytizing Christianity," 1889; **His Works.** and "Pronaos to Holy Writ," 1891.

In his early years he wrote a number of novels, which appeared first as serials in the "Israelite," and later in book form; these were: "The Convert," 1854; "The Catastrophe of Eger," "The Shoemaker's Family," "Resignation and Fidelity, or Life and Romance," and "Romance, Philosophy, and Cabalah, or the Conflagration in Frankfort-on-the-Main," 1855; "The Last Struggle of the Nation," 1856; "The Combat of the People, or Hillel and Herod," 1858; and "The First of the Maccabees." He wrote also a number of German novels, which appeared as serials in the "Deborah"; among these may be mentioned: "Die Juden von Landshuth"; "Der Rothkopf, oder des Schulmeisters Tochter"; and "Baruch und Sein Ideal." In addition to all these works Wise published in the editorial columns of the "Israelite" numerous studies on various subjects of Jewish interest. He even wrote a couple of plays, "Der Maskirte Liebhaber" and "Das Glück Reich zu Sein."

During his lifetime Isaac M. Wise was regarded as the most prominent Jew of his time in the United States. His genius for organization was of a very high order; and he was masterful, rich in resources, and possessed of an inflexible will. More than of any of his contemporaries, it may be said of him that he left the impress of his personality upon the development of Judaism in the United States.

**WISE, LEO:** American journalist and publisher; born at Albany Oct. 28, 1849; son of Isaac Mayer Wise. He was educated at St. Xavier College and Farmers College, Cincinnati; College Hill, Ohio; Trinity College, Hartford; and the University of Michigan (A.B., Farmers College, 1867; L.B., University of Michigan, 1869). In 1863 he served a brief term in the river flotilla of the United States navy, and in 1872 was one of the original prospectors in the diamond fields in South Africa, where at Dutoit's Pan he opened a new digging which was at first called "New Rush" and afterward became the famous "Colesburg Kopje," now in the Kimberley district.

From 1875 to 1890 Wise published "Die Deborah," and from 1884 to 1892 he owned the "Jewish Annual." In 1885 he established the "Chicago Israelite" at Chicago, and is still its publisher, in addition to being the managing editor and publisher of the "American Israelite" of Cincinnati, Ohio. Wise has also published most of the books written by his father.

**BIBLIOGRAPHY:** *American Jewish Year Book*, 5665 (1904-5).

F. T. H.

**WISE, STEPHEN SAMUEL:** American rabbi; born at Budapest March 17, 1863; son of Aaron WISE. He studied at the College of the City of New York (1887-91), Columbia College (B.A. 1892), and Columbia University (Ph.D. 1901), and later pursued rabbinical studies under Gottheil, Kohut, Gersoni, Joffe, and Margolis. In 1893 he was appointed assistant to Rabbi Henry S. Jacobs of the Congregation B'nai Jeshurun, New York city, and later in the same year, minister to the same congregation. In 1900 he was called to the rabbinate of the Congregation Beth Israel, Portland, Ore.

Wise was the first (honorary) secretary of the American Federation of Zionists; and at the Second Zionist Congress (Basel, 1898) he was a delegate, and secretary for the English language. He was a member also of the International Zionist Executive Committee in 1899. In 1902 he officiated as first vice-president of the Oregon State Conference of Charities and Correction; and in 1903 he was appointed Commissioner of Child Labor for the state of Oregon. He is the founder of the People's Forum of Portland. Wise is the editor of the Arabic original of "The Improvement of the Moral Qualities," an ethical treatise of the eleventh century by Solomon ibn Gabirol (New York, 1902), and of the "Beth Israel Pulpit." **WISMAR.** See MECKLENBURG.

**WISSENSCHAFTLICHE ZEITSCHRIFT FÜR JÜDISCHE THEOLOGIE.** See PERIODICALS.

**WISSOTZKY, KALONYMOS ZEEB WOLF:** Russian philanthropist; born in Zhagory, government of Kovno, July 8, 1824; died at Moscow May 24, 1904. Wissotzky, whose father was a merchant of moderate means, received the usual Jewish education. He married at eighteen, and six months later left for the yeshibah at Volozhin, where he studied for a short period, settling afterward in Yanishki. At about this time the government organized a Jewish agricultural colony at Dubno, near Dvinsk, and Wissotzky became one of the colonists. The soil proving unproductive, he was obliged to return to Yanishki, where he engaged in business. His love of study, however, soon led him to Kovno, where he became a pupil of Israel LIPKIN. At the end of 1854 he returned to Yanishki, and in 1858 went to Moscow, where he engaged in the tea trade; this, however, did not prevent him from taking an active interest in the affairs of the local Jewish community.

Kalonymos Wissotzky.

He organized a Sabbath-school and Sabbath readings for the cantonists of the district, and had special meals prepared for the soldiers during Passover. He was instrumental also in restoring many a cantonist to Judaism and to his long-lost relatives. With his increasing wealth Wissotzky devoted constantly growing amounts of money to charity. He contributed 10,000 rubles to the Alliance Israélite at Paris, on condition that this sum be allowed to accumulate

at compound interest for 100 years, when it would amount to 100 million francs, and that the money be then used for national purposes.

**The** Subsequently he made frequent and  
**Wissotzky** liberal additions to this fund, which  
**Fund.** now amounts to about half a million francs, and has become generally known as the "Wissotzky Fund."

Wissotzky was an enthusiastic believer in Zionism, and one of its prime movers in Russia. When, in the eighties of the nineteenth century, the idea of Jewish colonization in Palestine began to be realized, Wissotzky spent much time and money in effecting the organization of the Chovevei Zion. He journeyed to Palestine as a delegate, and laid there the foundation for future colonization. His letters from Palestine, together with other material, were published in book form. He made generous contributions to the Palestinian organizations, and furnished practically all the money necessary for the establishment and support of the Bet ha-Sefer school in Jaffa. When the publication of a Jewish encyclopedia was suggested to Wissotzky by Ahad ha-Am, he offered to give 20,000 rubles toward this purpose. When told that this sum would be but a small portion of the amount required for the colossal work, he decided to let the matter rest; he refused, however, to take back his contribution, and ordered the money to be transferred to the Society for the Promotion of Culture Among the Jews of Russia. At the instance of his son-in-law, Joseph Zeitlin, he gave 6,000 rubles toward the publication of a monthly magazine, "Ha-Shiloah," under the editorship of Ahad ha-Am.

Aside from his gifts for literary enterprises and Palestinian affairs, Wissotzky expended large sums of money in contributions to yeshibot and Talmud Torahs. On the occasion of the marriage of his son, David Wissotzky, in 1898, he presented 70,000 rubles for the establishment in the city of Byelostok of a Talmud Torah with technical classes; this institution was opened in 1904. In his will Wissotzky bequeathed the sum of one million rubles for Jewish national purposes. Without specifying the manner in which this money was to be expended, he left it in charge of Ahad ha-Am, Rabbi Jacob Maze of Moscow, and the banker Shmelkin.

A. Lu.

**WITCHCRAFT:** "Witchcraft" and "sorcery" are the terms used in the Bible to designate the practise of the arts of divination, which were tabooed by orthodox religious sentiment. As this orthodox sentiment was not a constant quantity, practises which at one time were regarded as innocent at another were relegated to the domain of sorcery or witchcraft. These practises were varied, and are denoted by several different Hebrew words.

One of the oldest of these practises was that of consulting the dead. The spirit of the dead was called "ob," and the consultation of such a spirit was accomplished through a woman who was called a "mistress of an ob" ("ba'alat ob"). The earliest and most famous instance of this on record is that of King Saul on the night before the fateful battle of Gilboa, in which he lost his life (comp. I Sam. xxviii. 3, 7 *et seq.*). It appears from the account

that this method of gaining information was under the ban even at that early date. The "mistress of the ob" whom Saul found at En-dor

**The Ob** is said to have been able to summon and the Samuel's spirit from the under world **Yidde'oni**, and to talk with it. The narrative represents her as able to call up any "ob" desired. Wherever "obot" are mentioned there also is found the term "yidde'oni" (R. V., incorrectly, "wizard"). It is, apparently, a synonym of "ob" as a designation of a departed spirit (comp. Lev. xix. 31; xx. 6, 27; Deut. xviii. 11; I Sam. xxviii. 3, 9; II Kings xxi. 6, xxiii. 24; Isa. viii. 19, xix. 3; II Chron. xxxiii. 6). "Ob" designated a subterranean spirit, but perhaps "yidde'oni" was a more general term. It is probable that the wizards who consulted the dead were ventriloquists, for Isaiah (comp. viii. 19) describes them as those that "chirp and mutter." Probably the ventriloquist impersonated the dead as speaking in a faint voice from the ground, whence this description. Deut. xviii. 11 adds to consulting an ob or a yidde'oni, "inquiring of the dead," as though there were still another means of consulting them. If this be so, no information as to the method of consultation has been preserved.

Another class of diviners is called "me'onenim" (comp. Judges ix. 37; II Kings xxi. 6; Isa. ii. 6; Mic. v. 12). This class also was very ancient. It appears from Judges ix. 26 that a sacred tree at Shechem was named from it. As this tree is probably identical with the "oak of Moreh" (Gen. xii. 6, R. V.), it is probable that the method of divination alluded to was also employed by the Canaanites. Isaiah (ii. 6) also alludes to the "me'onenim" as existing among the Philistines. It is evident, therefore, that this method of divination was common to Palestinian heathendom. W. R. Smith (in "Journal of Philology," xiv. 116 *et seq.*), who is followed by Driver, derives the word from  $\text{ḥy}$  (comp. the Arabic "ghanna" = "to emit a hoarse, nasal sound"), and thinks that it denoted the "murmurer" or "hoarsely humming soothsayer"; he remarks that the characteristic utterances of an Arabic soothsayer are a monotonous croon called "saj'" and a low murmur, "zamzama," or whisper, "was-washa."

An obscure class of soothsayers was called "mekashshefim" (comp. the "nomen abstractum" "kasha"; see Deut. xviii. 11; II Kings ix. 22; Mic. v. 12; Nah. iii. 4). W. R. Smith (*l.c.*

**Drugs and Charms.** p. 125) argues that the root "kashaf" means "to use magical appliances, or drugs"; and many interpreters follow him. Those who doubt the correctness of this explanation are unable to suggest an alternative. This interpretation receives some support from the facts that the Septuagint in Nah. iii. 4 gives  $\phi\acute{\alpha}\rho\mu\alpha\kappa\alpha$ , and that the belief in the use of drugs or herbs is very old, as is shown by the mention of mandrakes in Gen. xxx. 14-19. In the oldest code capital punishment is ordained for this class of sorcerers (comp. Ex. xxii. 18).

A further branch of witchcraft was "lahash," or charming (comp. Isa. iii. 3). In Jer. viii. 17 and Eccl. x. 11 the word is used of snake-charming.

Kindred in function to the "lahash" was the "hober" (comp. Deut. xviii. 11), which Ps. lviii. 5 makes parallel to "lahash." "Lahash," curiously, does not appear in Deut. xviii. 10-11, a passage which Ewald and W. R. Smith regard as an exhaustive list of forbidden enchantments. In its place there is "nahash" ("menahesh"). As  $\text{h}$  and  $\text{h}$  are both liquids, possibly the two roots are connected. In reality, however, "nahash" seems to have had a different meaning. Gen. xlv. 5 says that Joseph divined ("yehash") by means of a eup, perhaps by watching the play of light in a cup of liquid. Balaam (Num. xxiv. 1) is said to have occupied himself with enchantments ("nehashim"). Since Balaam observed omens on the hilltops, his oracles must have been deduced from some other natural phenomena. As the equivalent term in Syriac, "nāshā," is one which covers portents from the flight of birds as well as other natural occurrences, "lahash" probably refers, as W. R. Smith concludes, to divination by natural omens and presages. If so, it was not always tabooed by the best men in Israel, for David once received an omen for a successful military attack from the sounds in the tops of certain trees (II Sam. v. 24).

Another term often used to describe sorcery is "kesem" (Num. xxiii. 23; Deut. xviii. 10; I Sam. xv. 23; II Kings xvii. 17; Isa. iii. 2; Ezek. xxi. 21). This method of divination is elucidated in Ezek. xxi., R. V., where the King of Babylon is represented as standing at the parting of the ways, and using divination to determine whether to proceed first against Rabbah of Ammon or against Jerusalem. "He shook the arrows to and fro, he consulted the teraphim, he looked in the liver." In verse 22 (Hebr.) it is declared that in "his right hand was the kesem for Jerusalem." It would appear, therefore, that "kesem" was a method of divination by arrows. Arabian analogy here throws much light upon the practise, as this system of drawing lots by means of arrows, and thus obtaining an oracle, was practised by the Arabs, and the details are quite well known (comp. W. R. Smith in "Journal of Philology," xiii. 277 *et seq.*). The lots were drawn with headless arrows in the presence of an idol, and were accompanied by a sacrifice. The method was thoroughly analogous to that which Ezekiel describes. The "kesem" was accordingly a method of casting lots. Among the Arabs judicial sentences were obtained in this way, so that it became a kind of ordeal. Such, probably, was the case in Israel, for Prov. xvi. 10 declares that "A divine sentence ["kesem"] is in the lips of the king: His mouth shall not transgress in judgment" (R. V.).

Indeed, all through the earlier period of Israel's history important matters were decided by lot. The land was assigned to the tribes by lot (Josh. xiv. 2); Saul is said to have been chosen king by lot (I Sam.

x. 10); Jonathan, when he had violated **Ordeals and Lots.** a taboo, was detected by lot (I Sam. xiv. 41 *et seq.*); in fact, some form of casting lots was the one way of obtaining a divine decision (comp. Prov. xvi. 33). The EPHOD was probably an instrument for casting lots.

Ewald and W. R. Smith have both observed that

Deut. xviii. 10-11 contains a formal list of all the important kinds of witchcraft or divination known at the time the passage was written. These various modes of obtaining oracles really diverted popular attention from spiritual prophecy. The Deuteronomist banished them from the realm of legitimate practise and promised in lieu of them a perennial succession of prophets. Among these various kinds of divination, "kesem" (by sacred lots in the presence of an idol) held a foremost place. It stands next in the list to making one's son or daughter "pass through the fire." This was a part of Moloch-worship, and was probably a means of obtaining an oracle: hence it was classed with witchcraft.

If the date of the Deuteronomic code given by modern critics is accepted (about 650 B.C.), the prominence given to "kesem" is easily understood. The Prophets were raising popular practises to a higher level; and arts which had before been esteemed innocent, or regarded as the handmaids of religion, were now condemned as witchcraft. It is probable that other forms of sorcery in the list had passed through a similar history. Isaiah (viii. 19) indicates that in the eighth century B.C. necromancy (consulting the dead by either an ob or a yidde'oni) was the most popular competitor of prophecy for popular favor. It can not be supposed, as Stade and others hold, that ancestor worship in a pronounced form ever existed among the Semites (comp. Frey, "Seelenglaube und Seelenkult im Alten Israel," Leipsic, 1898, and Grüneisen, "Der Ahnenkultus und die Urreligion Israels," Halle,

**Relation to Ancestor Worship.** how easily an ancestor or a departed sheik becomes a "wali" among the modern Arabs, it is not difficult to believe that the necromancy of ancient Israel had a semi-religious origin. The movement against necromancy was much older than that against "kesem," for it began as early as the reign of Saul (comp. I Sam. xxviii. 3); but old customs are persistent, and "seeking unto the dead" was still a popular practise in the time of Isaiah.

The denunciations of Isaiah and the Deuteronomist did not, however, annihilate witchcraft. It still existed in the time of the author of the Ethiopic Book of Enoch, although it was then in bad odor. This writer ascribes all kinds of sorcery and divination to the angels, who, in Gen. vi. 2-4, are said to have come down to earth and taken human wives (comp. Ethiopic Enoch, vii. 1, viii. 1, ix. 7, and xvi. 3). In this writer's view sin came into the world through these angels, and not through the eating of the fruit in paradise (viii. 1 *et seq.*). His idea of witchcraft as consisting of nefarious knowledge is expressed in ch. xvi. 3, where he says that the angels had been in heaven, and so knew "illegitimate mysteries."

The Book of Tobit represents even the pious Tobias as using a charm against evil spirits (vi. 4-8, viii. 2, xi. 11). This charm consisted of the smoke of the gall of a fish.

The Apocalypse of Baruch (ix. 1) regards the religion of the Amorites as "spells and incantations," but its author also remembers that Israel in the days of the Judges was polluted by similar sins.

XII.—35

Any foreign religion is here counted as witchcraft and a wicked mystery. This is analogous to the classification as sorcery, in Deut. xviii. 10-11, of Moloch-worship, which is attributed to the Ammonites. See **MAGIC**.

**WITTELSHÖFER, LEOPOLD:** Austrian physician; born at Nagy-Kanizsa, Hungary, July 14, 1818; died at Vienna Jan. 8, 1889; educated at the University of Vienna (M.D. 1841). After practising medicine for ten years in Raab, Hungary, he moved to Vienna (1851) and became editor of the "Wiener Medizinische Wochenschrift," to which periodical he contributed many essays. He was the author also of "Wiener Heil- und Humanitätsanstalten," Vienna, 1856.

**WITTMANN, FRANZ:** Hungarian electrician and physicist; born at Hod-Mezö-Vasarhely Jan. 16, 1860. He was educated at the university of Budapest, and continued his studies in Vienna, Berlin, Paris, Frankfort-on-the-Main, Darmstadt, and Hanover. In 1892 he was appointed professor of physics at the polytechnic in Budapest; and five years later he became a member of the royal patent-bureau and secretary of the board of examiners for teachers in intermediate schools.

Wittmann's works, which have made him the leading Hungarian authority on electrotechnics, include the following: "Az Inductiv Taszításról" (on inductive repulsion); "Periodikus Áramok Optikai Vizsgálata" (optical tests of periodical currents); "Budapest Villamvilágításáról" (electric lighting of Budapest); "Az Erős Villamáramok Technikája" (technics of strong electric currents); "A Leydeni Batteriák és Induktoriumok Áramának Vizsgálata és Objektív Előállításáról" (objective production of currents from Leyden jars and inductors); "Kondensátorok Áramának Vizsgálata és Objektív Előállításáról" (test and objective production of currents from condensers); and "Akusztikai Kísérletek" (acoustic experiments). In addition to these works, Wittmann has published numerous articles on the technical uses of electricity and heat.

**WODIANER, PHILIP:** Hungarian communal worker; flourished in Szegedin during the latter part of the eighteenth and the beginning of the nineteenth century. He was president of the Jewish community there from 1793 to 1809, and presented the congregation with the site for its first synagogue, and with silver holy vessels for its hebra kaddisha.

His son **Cosman** (b. Veprovae 1788; d. at Győr-Sziget Aug. 18, 1831) studied Talmudies under Samuel

C. Brody and Lebusch Harif in Szegedin, under R. Moses Sofer in Mattersdorf, and under R. Moses Minz in Alt-Ofen. In Győr-Sziget, where he settled after his marriage, he maintained a yeshibah of his own, which was usually frequented by forty to fifty pupils; and he enjoyed a high reputation as a Talmudist. His writings, left in manuscript, were published by his son **Arnold** (born in Raab 1817) under the editorship of Prof. W. Bacher. They appeared in 1890 in two volumes entitled "Sefer Naḥalat Yehoshua", Liber Hereditatis Josuæ, Commentationes in Plerisque Talmudi Babylonii Tractatus Additis Commentationibus in Pentateuchum," and consisted of Talmudic novellæ and of explanations of passages in the Torah.

Wodianer's son **Samuel**, who, after the death of his father, kept a large warehouse in Szegedin for tobacco, wool, and corn, was president of the community from 1812 to 1821. Later he settled in Pesth, where he and his children were baptized. His son **Albert** (born at Szegedin Aug. 13, 1818; died in Budapest July 17, 1898) studied technology in Pesth and Vienna, and was in 1867 appointed royal commissary of the Hungarian Northern Railroad. In 1869 he received the Iron Cross of the second class, and in 1870 the cross of the papal Order of St. George; and in 1886 he was elevated to the Hungarian nobility.

**WOGUE, JULES:** French author; son of Lazare Wogue; born in Paris Dec. 4, 1863; educated at the Ecole Normale Supérieure in his native city ("agrégé ès lettres," 1885). After successive professorships at the lycéums of Saint Quentin and Reims, as well as at the Lycée Michelet and the Collège Rollin in Paris, he was appointed professor at the Lycée Buffon, which position he still holds (1905).

Wogue is the author of the following works: "Le Poète Gresset" (Paris, 1894); "Contes et Récits des Dix-Septième et Dix-Huitième Siècles"; "Les Portraits de La Bruyère"; and "Le Théâtre Comique aux Dix-Septième et Dix-Huitième Siècles" (Paris, 1905). He has published also editions of Racine's "Esther" and "Athalie," with historical introductions and commentaries, including copious Biblical notes. He is a contributor to the "Revue Bleue," the "Grande Revue," and "Le Temps."

s.

J. KA.

**WOGUE, LAZARE ELIEZER:** French rabbi; born at Fontainebleau, Seine-et-Marne, July 22, 1817; died at Paris April 14, 1897; educated at the Lycée Charlemagne at Paris, and at the Collège Royal and the Ecole Centrale Rabbinique at Metz. Receiving his rabbinical diploma in 1843, he returned to Paris, and became assistant preacher under Marchand Ennery, chief rabbi of Paris. Eight years later Salomon Munk and Adolphe Franck established a chair of Jewish theology at the Ecole Centrale Rabbinique at Metz, to which Wogue was appointed, remaining in this position until his retirement, with the title of professor emeritus, in 1894. Upon the transfer of the college from Metz to Paris (1859) as the Séminaire Israélite de France, his duties were extended to embrace instruction in Hebrew

grammar, Biblical exegesis, and German. From 1879 to 1895 he was the director and editor-in-chief of the "Univers Israélite," being at the same time a member of the Imperial Academy of Metz, and of the Society of Archeology and History of the Moselle. On Jan. 11, 1885, he was made a chevalier of the Legion of Honor.

Wogue, who was a prolific writer, is best known for his translation of the Pentateuch, with notes which include the chief rabbinical interpretations, and for his history of Bible exegesis. His works are as follows: "Sermon sur la Tolérance" (Metz, 1841); "Le Rabbinat Français au Dix-Neuvième Siècle" (Paris, 1843); "L'Avenir dans le Judaïsme" (*ib.* 1844); "Shomer Emunim, Le Guide du Croquant Israélite" (Metz, 1857; 2d ed., with a preface by Zadoc Kahn, Paris, 1898), a collection of prayers, hymns, and meditations in prose and verse; "Le Pentateuque" (Paris, 1860-69), a new translation, with Hebrew text and notes, and a version of the *Haftarot*; "L'Anthropomorphisme et les Miracles Selon le Judaïsme" (*ib.* 1867); a translation of the "Kol Kore" of Elijah Soloweyczyk (2 parts, *ib.* 1870-75), a harmony of the Bible, the Talmud, and the Gospels; a translation of Schleiden's "Bedeutung der Juden für Erhaltung und Wiederbelebung der Wissenschaften im Mittelalter" (*ib.* 1877); a revised and annotated edition of the "Sefer Sekiyot ha-Ḥemdah" by D. Cahen (Mayene, 1877); a translation of Gabriel b. Joshua's "Petaḥ Teshubah," which appeared originally at Amsterdam in 1651 (Paris, 1879); a revised edition of letters A-C of Léon Hollaenderski's "Dictionnaire Universel Français-Hébreu" (*ib.* 1879); "Histoire de la Bible et de l'Exégèse Biblique Jusqu'à Nos Jours" (*ib.* 1881); a translation of the first two volumes of Grätz's "Geschichte der Juden" (*ib.* 1882-84); "Esquisse d'une Théologie Juive" (*ib.* 1887); and "La Prédication Israélite en France" (*ib.* 1890). In addition to these works, Wogue translated and annotated Lipmann Sofer's "Gan Raweh," and revised the "Semaine Israélite" of Baruch Créhange, the "Sentier d'Israël" and the "Rituel des Prières" of Elcan Durlacher (10 vols., with Hebrew text and French translation), and Ullmann's "Catéchisme."

**WOHLERNER, JETTY:** Galician Hebrew writer; born at Lemberg in 1813; died there in 1891. When a little girl of eight, Jetty, after having passed her examination in primary instruction, was taken by her father, Michael Kehlmann, into his office as an accountant. She was so devoted to the study of Hebrew, however, that she always attended the Hebrew lessons given her brothers, and in her spare moments she used to read the Bible in Hebrew. The Hebrew letters of the Christian Anna Maria Schurmann stimulated her still more, and she induced her father to engage a teacher for her. The physician Goldschmied, then a student at Lemberg, was entrusted with her Hebrew education. At the age of fourteen she was betrothed to L. Rosanes of Brody, and carried on a correspondence with him which was styled by Rapoport "the echo of the Song of Songs." Her fiancé died, however; and she

was married several years later to Samson Wohlerner. She continued to write her Hebrew letters notwithstanding; and the greater portion of her correspondence, which is noteworthy for its style and purity of language, was published in "Kokebe Yizhak" and "Ha-Boker Or," while two letters, one to Kayserling and one to Goldschmied, are found in "Ozar ha-Sifrut" (i. 60-62).

**WOLF** (Hebr. "ze'eb"; for the rendering of "iyyim," Isa. xiii. 22, and "tannim," Lam. iv. 3, see Fox): The wolf (*Canis lupus*) is still found in Palestine, where the animals prowl in pairs or droves about sheepfolds at night. As a type of boldness, ferocity, and bloodthirstiness, it is mentioned in Gen. xlix. 27; Isa. xi. 6, lxxv. 25; Jer. v. 6; Ezek. xxii. 27; Hab. i. 3; and Zeph. iii. 3.

According to the Talmud, the wolf (זאב, לביא, and לוקים [= Greek *λύκος*]) resembles in external appearance the dog, with which it can copulate (Ber. 9b; Gen. R. xxxi. 6); and its period of gestation is three years (Bek. 8a). It is the enemy of flocks, and directs its attacks especially against the he-goats (B. K. 15b; Shab. 53b). The wound caused by the wolf's bite is oblong and ragged (Zeb. 74b). Although when pressed by hunger the wolf attacks even man (Ta'an. 19a), it can be tamed (Sanh. 15b). For a comparison of the otter with the wolf see Suk. 56b and Gen. R. cxii. 3; and for fables of which the wolf is the subject see Rashi on Sanh. 39a and 105a.

**WOLF, AARON BENJAMIN.** See AARON B. BENJAMIN WOLF.

**WOLF, ABRAHAM NATHAN:** German scholar; born at Dessau in 1751; died there in 1784. On account of his liberal views he was highly esteemed by Moses Mendelssohn, but when he endeavored to harmonize the usual Jewish system of training with modern European culture, he was persecuted by the conservative element among the Jewish scholars, and even his friends nicknamed him "the backslider." Wolf was the author of the "Peshar Dabar" (Berlin, 1777), a comprehensive commentary on the Book of Job, which was highly praised by Moses Mendelssohn on account of the thorough rabbinical scholarship which it evidenced ("Der Sammler," 1785, p. 43). He also wrote "Grundzüge der Jüdischen Religion" (*ib.* 1782), in which he expounded the teachings of Judaism in simple language without reducing the moral and religious contents of Jewish law to arbitrary articles of faith. The latter work has been lost for the last fifty years. Wolf was likewise a contributor to "Ha-Meassef" and to the first three volumes of the "Bikkure ha-Ittim."

**WOLF, ADOLPH GRANT:** American jurist; born at Washington, D. C., Jan. 11, 1869; educated at Johns Hopkins University (A. B. 1890) and at the George Washington (formerly Columbian) University of Washington, D. C. (LL. B. 1892; LL. M. 1893). He was admitted to the bar in 1893, and then took a postgraduate course at the University of Berlin. Upon his return to the United States (1895) he became financial secretary of the United Hebrew Charities at Washington; and in 1902 he was appointed associate justice of the Supreme Court of Porto Rico.

**BIBLIOGRAPHY:** *American Jewish Year Book*, 5665 (1904-5). A. F. T. H.

**WOLF, EMMA:** American authoress; born June 15, 1865, in San Francisco, Cal., to which city her parents had migrated from France, and where she received her education. In addition to several short stories, which appeared in various American magazines, she is the author of the following novels: "Other Things Being Equal," San Francisco, 1892; "A Prodigal in Love," *ib.* 1894; "The Joy of Life," *ib.* 1896; and "Heirs of Yesterday," *ib.* 1900. Her Jewish novels attracted particular attention.

**BIBLIOGRAPHY:** *American Jewish Year Book*, 5665 (1904-5). A. F. T. H.

**WOLF, GEORGE GARCIA:** South-African merchant, and member of the Cape Parliament; born at Great Yarmouth 1838; died in London March 18, 1899. He commenced business as an apprentice in Manchester, but soon emigrated to Montreal, where he became a general merchant. In 1860 he went to Kimberley, where he opened a general store. He then became associated with the leading men of the diamond fields, and in 1882 was elected representative for Kimberley in the Cape Parliament. He was presented by his constituents with a gold casket containing 500 guineas and accompanied by an illuminated address. Wolf held several other public offices in Kimberley for some years, until his return to England.

**BIBLIOGRAPHY:** *Jew. Chron.* March 24, 1899.

G. L.

**WOLF, GERSON:** Austrian historian and educator; born at Holleschau, Moravia, July 16, 1823; died in Vienna Oct. 29, 1892. He began the study of Hebrew at a very early age, and later received instruction in German and in Latin from Dr. Egenter, then stationed in Holleschau as military surgeon. Intending to pursue a rabbinical career, he went in 1836 to Pohlitz, and later to Nikolsburg, where he engaged in Talmudic studies, attending at the same time the gymnasium. Three years later (1839) he went to Vienna, where he attended the university, his studies embracing pedagogics, philosophy, and modern languages. In 1845 his first article, "Das Lustspiel des Aristophanes und das Lustspiel Unserer Zeit," appeared in Saphir's "Humorist." Three years later he published in Frankl's "Sonntagsblätter" his "Das Sterben eines Kindes," his only attempt in the field of fiction.

Wolf was personally engaged in the political struggles of 1848-49, his "Die Demokratie und der Socialismus" appearing in the latter year. On account of several radical articles published in "Die

Oesterreichische Zeitung" and in "Die Zeit," he was ordered to leave Vienna; but owing to the intervention of influential friends the order was revoked. He then decided to abandon journalism, and presently accepted a position in a school for Jewish girls. In 1850 he was appointed religious instructor in the state industrial high school in the Leopoldstadt, one of the districts of Vienna, which position he held till 1876. In 1851, in response to a request from the mayor of Vienna for suggestions as to school reforms, he published his "Ueber die Volksschulen in Oesterreich," in which he advocated the elimination of religious instruction from all public schools. Toward the end of 1852, on account of a secret denunciation, his home was searched by the authorities,

and Guizot's "La Démocratie en France," a work which had been placed under the ban, was found in his library. He was court-martialed, held in custody for seventeen days during trial, and finally sentenced to four weeks' confinement in a fortress. In the same year he received his degree of Ph.D., and two years later was appointed religious instructor to the Jewish community of Vienna. Wolf was active in various public undertakings. In 1859 he founded a library for the young; and in 1861, together with Noah Mannheimer,

Baron Königswarter, and Julius von Goldschmidt, he organized a society for the aid of poor Jewish students in Vienna. This society, which is still (1905) in existence, has assisted more than 200 students annually since its foundation. Until 1872 Wolf officiated as pastor to the Jewish inmates of the houses of correction of Vienna and Stein-on-the-Danube; and from 1884 to 1892, as inspector of all the Jewish religious schools of Vienna.

Wolf is the author of the following works: "Geschichte Israels für die Israelitische Jugend" (Vienna, 1856), introduced as a text-book in various Jewish schools of the United States; "Ferdinand II. und die Juden" (ib. 1859; 2d ed., Leipsic, 1860); "Vom Ersten bis zum Zweiten Tempel. Geschichte

der Israelitischen Cultusgemeinde in Wien, 1820-60" (Vienna, 1860); "Zur Geschichte der Juden in Worms und des Deutschen Städtewesens" (Breslau, 1862); "Judentaufen in Oesterreich" (Vienna, 1863); "Isaak Noah Mannheimer. Eine Biographische Skizze" (ib. 1863); "Die Juden in der Leopoldstadt" (ib. 1863); "Zur Geschichte der Jüdischen Aerzte in Oesterreich" (1864); "Zur Geschichte Jüdischer Tartüffe" (pseudonymously; Leipsic, 1864); "Das Hundertjährige Jubiläum der Israelitischen Cultusgemeinde" (Vienna, 1864); "Zwei Geschichten der Israelitischen Cultusgemeinde in Wien" (ib. 1865); "Zur Lage der Juden in Galizien" (1867); "Joseph Wertheimer, ein Lebens- und Zeitbild" (Vienna, 1868); "Die Vertreibung der Juden aus Böhmen im

Jahre 1744, und deren Rückkehr im Jahre 1748" (Leipsic, 1869); "Kurzgefasste Religions- und Sittenlehre" (Vienna, 1870; 2d ed., ib. 1877), used as a text-book in Jewish schools of North America; "Geschichte der Juden in Wien von 1156-1876" (ib. 1876); "Joseph II." (ib. 1878); "Die Jüdischen Friedhöfe und die Chevrah Kadischah in Wien" (ib. 1879); "Die Alten Statuten der Jüdischen Gemeinden in Mähren, nebst den Darauf folgenden Synodalbeschlüssen" (ib. 1880); "Das Unterrichts-wesen in Oesterreich Unter Kaiser Joseph II." (ib.

1880); "Aus der Zeit der Kaiserin Maria Theresia" (ib. 1888); "Josefina" (ib. 1890); and "Kleine Historische Schriften" (ib. 1892).

**BIBLIOGRAPHY:** Wurzbach. *Biog. Lex.; Allgemeine Deutsche Biographie; Mühlrens Männer der Gegenwart*, s.v. **WOLF, JOHANN CHRISTOPH:** Christian Hebraist and polyhistor; born at Wernigerode Feb. 21, 1683; died at Hamburg July 25, 1739. He studied at Wittenberg, and traveled in Holland and England in the interest of science, coming in contact with Vitringa, Surenhuis, Reland, Basnage, and others. He especially occupied himself with the study of Oriental languages and literature, of which he became professor at the Hamburg gymnasium in 1712. At this time the Oppenheimer Collection was housed at Hamburg, and Wolf determined to devote himself to a description of Jewish literature based upon this collection. His researches resulted in "Bibliotheca Hebræa" (4 vols., Hamburg, 1715-33), the first volume of which contains a list of Jewish authors, while the second deals with the subject matter under the headings "Bible," "Talmud," "Cabala," etc. The knowledge of Christendom about the Talmud was for nearly a century and a half derived from Wolf's statements. Vol. iii. is a supplement to vol. i.; vol. iv. to vol. ii. Wolf's work forms the basis of Steinschneider's catalogue of the Bodleian Library, which has references to it on nearly every page. Besides this work he issued a history of Hebrew lexicons (for his doctor's dissertation; Wittenberg, 1705), and "Notitia Karæorum" (Hamburg, 1721).

**WOLF BEN JOSEPH OF DESSAU:** German scholar and author; born at Dessau in 1762; died there March 16, 1826. Left an orphan at an early age, he was educated by his father-in-law, Reb Gumpel; and in 1775 he lived with his uncle, Jacob Benscher, at Berlin, where he attended the communal school. He officiated as a teacher in Freienwalde-on-the-Oder from 1780 to 1782, was in Wriezen from 1782 to 1789, and lived in Sandersleben from 1789 to 1796, when he settled in Dessau, having been appointed tutor in the Herzog Franz Schule. At the same time he discharged the duties of secretary to the Jewish community of Dessau, and also officiated as preacher. Wolf was the author of the following works: "Minhah Tehorah" (2 vols., Dessau, 1805), the Hebrew text of the Minor Prophets, with a German translation, and a Hebrew preface entitled "Solet la-Minhah"; "Daniel" (*ib.* 1808), with the original text, a Hebrew commentary, and a German translation; a collection of sermons delivered in the synagogue, with a Hebrew translation (*ib.* 1812); "Shir" (*ib.* 1812), a eulogy on the Book of Esther, to which it was appended; a collection of sermons (*ib.* 1813); "Charakter des Judentums" (Leipsic,

1817), an apology written in collaboration with Gotthold Solomon; and "Yesode ha-Limmud" (Dessau, 1819), an elementary text-book of Hebrew, with a glossary. He was also a collaborator on the ninth and tenth volumes of "Ha-Meassef."

E. C.

S. O.

**WOLF, LUCIEN:** English journalist and Anglo-Jewish historian; born in London Jan. 20, 1857. He began his journalistic career at a very early age on "The Jewish World," which he joined in 1874, and was principal leader-writer for that journal until 1893. He was assistant editor of the daily "Public Leader" in his twentieth year, and after other journalistic experience became foreign subeditor and leader-writer of the "Daily Graphic" in 1890, a position which he still (1905) holds. He is a fellow of the Institute of Journalists, and has held honorary positions in connection with it. For four years (1893-97) he was London correspondent of "Le Journal" of Paris. Wolf is one of the best-informed English writers on foreign politics, and for many years his articles signed "Diplomaticus" on that subject in the "Fortnightly Review" were one of the characteristic features of the magazine. In 1905 some communications by him to the London "Times" on Russian finance attracted international comment, and evoked the unique compliment of a disclaimer by the Russian Minister of Finance.

Wolf has shown a strong interest in Anglo-Jewish history. He was intimately connected with the Anglo-Jewish Historical Exhibition, compiling the official catalogue and the "Bibliotheca Anglo-Judaica," a bibliography of Anglo-Jewish history, both in collaboration with Joseph Jacobs. He suggested the Jewish Historical Society of England, and became its first president, in addition to editing for it the volume devoted to "Manasseh ben Israel's Mission to Oliver Cromwell" (London, 1901). He has devoted considerable attention to Anglo-Jewish pedigrees, of which he has made large collections, and wrote "Sir Moses Montefiore," a centennial biography (1885). He also contributed important articles on "Anti-Semitism" and "Zionism" to the "Encyclopædia Britannica," and on the latter subject wrote adversely in controversy with Israel Zangwill, with whom, however, he joined forces in 1905 for the Jewish Territorial Organization. J.

**WOLF, MAX:** Austrian composer; born at Weisskirchen, Moravia, Feb., 1840; died in Vienna March 23, 1886. His father, a wealthy business man, desired him to pursue a commercial career, but Max early evinced a marked inclination for music. He began studying composition at the age of sixteen, later continuing his studies under A. B. Marx in Berlin and Otto Dessoff in Vienna. It is told that General von Moltke, having heard one of Wolf's productions played at a concert in Berlin, requested the artist to compose a military march, "that a bit o' fire may get into the boys."

In his earlier compositions Wolf somewhat imi-

tated the style of Offenbach; but later he acquired more originality and inventive talent. Among his works may be mentioned: "Die Schule der Liebe" (1868), a one-act operetta, which passed through thirty-four consecutive performances in Berlin under the title "Die Blaue Dame"; "Im Namen des Königs," an operetta, performed in Berlin and on various other German stages; "Die Porträtdame," staged at Gratz and in Vienna; "Die Pilger" (Vienna, 1872), a three-act opera; "Cesarine"; and "Rafacla."

**WOLF, SIMON:** American jurist, publicist, and philanthropist; born at Hinzweiler, Bavaria, Oct. 28, 1836; emigrated to the United States in

Simon Wolf.

1848 and settled as a merchant at Ulrichsville, Ohio. He studied law at the Ohio Law College, Cleveland, and was admitted to the bar at Mount Vernon, Ohio, in 1861. He practised law at New Philadelphia, in the same state, for a year, and then moved to Washington, where he opened an office. From 1869 to 1878 he was recorder of the District of Columbia. President Hayes appointed him one of

the civil judges at Washington, but he resigned in 1881 to accept the appointment of consul-general of the United States to Egypt, from which office he retired the following year. He was appointed and re-appointed member of the Board of Charities for the District of Columbia, and at present practises law in Washington.

Wolf has been for many years chairman of the Board of Delegates of Civil and Religious Rights, and in that capacity has had many occasions for submitting to the federal government grave questions of Jewish interest. He has been very active in the Independent Order B'nai B'rith, of which he was president from 1903 to 1905. He was the founder and president of the Hebrew Orphans' Home at Atlanta, Ga., and is president of the Board of Children's Guardians, Washington.

He is a prominent freemason, an able lecturer, and a recognized orator who has devoted much time to philanthropic work among all classes.

Wolf is the author of "The American Jew as Patriot, Soldier, and Citizen" (Philadelphia, 1895) and of biographies of M. M. Noah and Com. U. P. Levy.

**WOLFENBÜTTEL:** German city, particularly noted for its **Samson-Schule**, a school, originally at Brunswick, founded by Herz Samson, on a legacy

by his father. On June 4, 1786, Philip, the brother of Herz, opened a Talmud school at Wolfenbüttel for boys. The funds of these schools were increased by subsequent gifts of the founders and their descendants. In 1805 the two foundations were combined as the "Samson Free School," and were transformed into a German seminary and school in charge of four teachers. Instruction was given in German, French, arithmetic, geography, history, and calligraphy, and the school consisted of one class with eight free scholars. In 1813 the Brunswick school was incorporated with the free school, and the funds were combined, with the condition that five additional free scholars should be admitted. As paying boarding pupils had also been received at the request of many parents, a second class was organized. Instruction in the Talmud was subsequently discontinued. In 1843 the institution was changed to a grammar-school with three classes, and was named "Samson-Schule." After 1871 it was gradually enlarged to a high school, and by 1903 it had gained the status of a real-school with six classes. It was under the direction and supervision of the ducal school-board of Brunswick, and was empowered to give certificates for one year's military service. Since 1881 Christian boys have been admitted as pupils and receive special religious instruction. In 1903 the faculty included the director, Ludwig Tachau, five teachers with university training, and three elementary teachers, one of whom also acts as resident teacher. The trustees are Counselor of Justice Magnus of Brunswick, Gustav Cohen of Hanover, and L. Samson of Wolfenbüttel. Among the former pupils of the institution may be mentioned M. I. Jost, Leopold Zunz, and Samuel Meyer Ehrenberg (1807-46), who was later its director. Although the institution was frequently enlarged, in 1895-96 a new and larger building with all modern improvements was erected to accommodate the constantly increasing attendance. In 1903 there were 148 boarders and 11 day pupils. There are twenty-five full and between eighteen and twenty partial scholarships, in addition to numerous foundations for the assistance of pupils, even after they have left the institution.

**WOLFENSTEIN, MARTHA:** American authoress; born at Insterburg, Prussia, Aug. 5, 1869. During her infancy her parents emigrated to the United States, settling in Cleveland, Ohio, in the public schools of which city she received her education.

Martha Wolfenstein has contributed short stories to nearly all the leading Jewish journals, and to various other magazines. Among her writings may be mentioned: "A Priest from the Ghetto" and "A Sinner in Israel" (in "Lippincott's Magazine"); and "The Renegade" (in the "Outlook"). In 1901 the Jewish Publication Society of America published a book from her pen entitled "Idyls of the Gass" (German transl. in "Die Zeit" of Vienna).

**WOLFF:** American family which derives its origin from the Robles family of Surinam, Dutch Guiana. The following is the family tree:

WOLFF PEDIGREE.

**WOLFF, AARON:** Danish merchant; born in the Island of Saint Christopher on Aug. 6, 1795; died in London, England, Jan. 12, 1872. He was a descendant of Daniel Robles de Fonseca. Soon after 1814 he removed to the Island of St. Thomas, Danish West Indies, where he was appointed to the office of "Stadthövidsmaud" (mayor), which ranked him next to the governor of the island. He received from the King of Denmark the decoration of the Order of Dannebrog; and he was a member of the Royal Council; president of the Bank of St. Thomas, which he managed for thirty-two years; chairman of the Marine Slip; president of the St. Thomas Marine Insurance Company; and for many years president of the synagogue. Wolff anticipated the action of the King of Denmark by emancipating all his slaves previous to the Emancipation Proclamation of 1843.

J. L. N. LE.

**WOLFF, ABRAHAM ALEXANDER:** German rabbi; born at Darmstadt April 29, 1801; died at Copenhagen Dec. 3, 1891. His first teacher was his father, Alexander Wolff, a merchant, who was well versed in the Talmud and who destined his son for a rabbinical career. At the age of six the boy astonished the scholars of Darmstadt by his knowledge of Hebrew. He continued his studies under Rabbi C. Meklenburg, and at the same time attended the gymnasium of his native city. In 1817 he went to Mayence, where he studied under Herz Scheyer and Michael Creizenach, the latter teaching him mathematics. He then pursued his education under

Abraham Bing in Würzburg, and entered the university there. Three years after his graduation at Giessen (Ph.D. 1821), he was ordained rabbi, and in 1826 was appointed "Landesrabbiner" of the province of Oberhessen with a residence at Giessen. In 1828 he received a call from the community of Copenhagen; and he assumed office as chief rabbi of Denmark on May 16, 1829.

The synagogue of Copenhagen had been burned in 1795 and was still in ruins, so that the Jewish community—both Sephardim and Ashkenazim—was split into several congregations. Wolff, by his great energy, induced the Jews to build a new synagogue, which was dedicated on April 12, 1833; and in the same year Wolff published in Danish the agenda for the synagogal liturgy. He is credited also with improving the relations between the Jews and the Christians of Denmark. In recognition of his services in the organization of the Royal Library of Copenhagen he was created a knight of the Order of Dannebrog (Oct. 6, 1854), and was also awarded the title of professor.

Wolff was the father of Danish homiletics; and during his long rabbinical career of sixty-five years he delivered about 5,000 sermons, of which over forty in German and about 300 in Danish have been published. His works are as follows: "Der Prophet Habakkuk" (Darmstadt, 1822), the Book of Habakkuk with literal and metrical German translations, a critical commentary, and an introduction on prophecy; "Torat Yisrael" (German title, "Lehrbuch der

Israelitischen Religion"; Mayence, 1825), a text-book for instruction in Judaism in schools (an abridged Danish edition was published by Paul Martin Möller in "Bibliotheca Theologica," xvii. 67-81, and the entire work was translated into Swedish by M. Henriques, Stockholm, 1844); "Einige Worte an das Publicum über Mein Israelitisches Religionsbuch" (*ib.* 1826); "Abhandlung über den Eid" (in Weiss, "Archiv für Kirchenrecht," 1830); "Drei Vorlesungen als Einleitung zu Vorträgen über das Judentum" (Copenhagen, 1838); "Agende for det Mosaiske Trossamfunds Synagoge" (Leipsic, 1839); "Ateret Shalom we-Emet" (first published under the pseudonym of "Aniam ben Schmida" in "Orient, Lit." ii., Nos. 23-26, and then, in enlarged form, as a book, Leipsic, 1857), a compilation of the opinions of ancient rabbis with regard to the piyyuṭim; "Tefillat Yisrael," the prayers with a Danish translation (*ib.* 1856); "Aufgefundener Briefwechsel Zwischen einem Hochgestellten Protestantischen Geistlichen und einem Rabbiner" (first in "Ben Chananja," 1860, and then in book form with additions and corrections, Leipsic, 1861); "Lærebog i den Israelitiske Religion" (*ib.* 1861); "Bibelhistorie for den Israelitiske Ungdom" (*ib.* 1862); "Bibelhistorie for Skole og Hjem" (*ib.* 1867); and "Talmudfjender" (*ib.* 1878). He also made a Danish translation of the Pentateuch, which was published on his ninetieth birthday.

M. SEL.

**WOLFF, JOSEPH:** Missionary and Oriental traveler; born at Weilersbach, near Bamberg, Germany, in 1795; died at Ile Brewers, Somerset, England, May 2, 1862. His father, who was rabbi at Württemberg, sent him to the Protestant Lyceum at Stuttgart, and while still a youth he learned Latin, Greek, and Hebrew. Leaving home on account of his inclination toward Christianity, he was converted after many wanderings, and was baptized on Sept. 13, 1812, by Leopold Zolda, abbot of the Benedictine monastery of Emmaus, near Prague. In 1813 he commenced to study Arabic, Syriac, and Aramaic, and in the following year attended theological lectures in Vienna. In 1815 he entered the University of Tübingen, and by the liberality of Prince Dalberg was enabled to study theology for nearly two years, as well as Arabic and Persian, Biblical exegesis, and ecclesiastical history. In 1816 he arrived in Rome, where he was introduced to Pope Pius VII. by the Prussian ambassador. He was soon afterward admitted as a pupil of the Collegio Romano, and later of the Collegio di Propaganda; but in 1818, having publicly attacked the doctrine of infallibility, he was expelled from the papal dominions on account of erroneous opinions. After a brief stay at the Monastery of the Redemptorists at Val Sainte, near Freiburgh, he went to England to visit the eccentric Henry Drummond, M.P., whose acquaintance he had made at Rome. He soon declared himself a member of the Church of England.

**Friendship with Henry Drummond.**

At Cambridge he resumed the study of Oriental languages, with the purpose of visiting Eastern lands to prepare the way for missionary enterprises. Between 1821 and 1826 he traveled as a missionary in Egypt and the Levant, and was the first modern missionary to preach to the Jews near Jerusalem. He sent Christian boys from Cyprus to England for education, and then continued his travels through Persia, Mesopotamia, Tiflis, and the Crimea.

About 1828 Wolff commenced an expedition in search of the Lost Ten Tribes. After suffering shipwreck at Cephalonia and being rescued by Sir Charles Napier, whose friendship he retained through life, he passed through Anatolia, Armenia, and Khorassan, where he was made a slave, but ultimately set free. Undaunted, he traversed Bokhara and Balkh, and reached Cabul in a state of nudity, having walked six hundred miles through Central Asia without clothing. In 1836 he went to Abyssinia, and afterward to Sana in Yemen, where he preached to the Wahabites. His next journey was to the United States. He preached before Congress and received the degree of D.D. at Annapolis, Md., in 1836. He was ordained deacon by the Bishop of New Jersey, and in 1838 priest by the Bishop of Dromore. In 1843 he made another journey to Bokhara to ascertain the fate of Lieut.-Col. Charles Stoddart and Captain Connolly, a committee formed in London having raised the sum of £500 for his expenses. The men for whom he searched had been executed, and the same fate threatened Wolff. According to his own story he confronted the sovereigns of Central Asia with imperturbable audacity, refusing to conform to their court etiquette or to observe any ceremony in his speech; on being asked to become a Moslem he returned a defiant reply. The threat of execution was, however, a pretense, and he was ultimately rescued through the efforts of the Persian ambassador. In 1845 he was presented with the vicarage of Ile Brewers in Somerset, where he resided until his death.

Before joining the Church of England, Wolff had entertained all sorts of religious opinions. He was a member of the little band which met in Henry Drummond's house at Advent, 1826, for a six days' study of the Scriptures, which resulted in the origination of the Catholic Apostolic Church under the leadership of Irving. In his missionary travels he went fearlessly among the most fanatical peoples, and he may be said to have been one of the pioneers of modern missionary enterprise. His greatest opposition came from the Jews, and to overcome this he made use of extraordinary methods, as when, in Bombay, he wished to inspect the synagogue of the Beni-Israel. In spite of his education and his extensive travels, Wolff was possessed of many erratic ideas. In India he was considered a fanatic; in England he was at one time ostracized by the clergy; and he bent all facts to suit his theories of the lost tribes. He believed the East India Company to be the "kings of the east" (*Rev.* xvi. 12).

In 1827 Wolff married the sixth daughter of the Earl of Orford, Georgiana Mary Walpole, by whom he had a son, **Sir Henry Drummond Wolff**, the politician and diplomatist. After her death he mar-

ried (1861) Louisa Decima, daughter of James King, rector of St. Peter-le-Poer, Loudon. Wolff signed himself "Apostle of Our Lord Jesus Christ for Palestine, Persia, Bokhara, and Balkh." He was the author of the following works: "Missionary Journal" (Loudon, 1824; 2d ed. 1827-29); "Sketch of the Life and Journal of Joseph Wolff" (Norwich, 1827); "Journal of Joseph Wolff for 1831" (London, 1832); "Researches and Missionary Labors Among the Jews, Mohammedans, and Other Sects Between 1831 and 1834" (Malta, 1835; 2d ed., London, 1835); "Journal of the Rev. Joseph Wolff Continued, An Account of His Missionary Labors for 1827-31 and from 1835 to 1838" (London, 1839); "A Narrative of a Mission to Bokhara to Ascertain the Fate of Colonel Stoddart and Captain Connolly" (London and New York; 7th ed. 1852); "Travels and Adventures of Joseph Wolff" (London, 1860; 2d ed. 1861; translated into German, 1863).

**WOLFF, JOSEPH**: Russian historian; born at St. Petersburg; died at Heidelberg 1900. The son of a book-dealer, he early developed a passion for reading historical works. After completing a course of study at the gymnasium of his native city, he entered the University of Leipsic, where he devoted himself to the study of history, especially of Polish and Lithuanian affairs. Among his works the following may be mentioned: "Senatorowiei Dignitarze Wielkiego Ksiestwa Litewskiego, 1386-1795" (Cracow, 1885); "Syd Ministrem Króla Zygmunta" (*ib.* 1885), a historical sketch; "Ród Gedymina" (*ib.* 1886); and "Knizowie Litewsko-Rusey od Końca xiv w." (Warsaw, 1895). Wolff was a corresponding member of the Academy of Cracow.

**WOLFF, JULIUS**: German surgeon; born at Märkisch Friedland, West Prussia, March 21, 1836; died at Berlin Feb. 18, 1902. He received his education at the Grauekloster Gymnasium, and at the University of Berlin, graduating in 1860, whereupon he established himself as surgeon in the Prussian capital. He took part in the wars of 1864, 1866, and 1870-71, receiving the Iron Cross for non-combatants. In 1868 he was appointed privat-docent, and in 1884 assistant professor of surgery, at the University of Berlin. In 1890 he became chief surgeon of the newly founded orthopedic dispensary at the university. In 1899 he received the title of "Geheimer Medizinalrat."

Wolff contributed more than a hundred essays to medical journals, treating of orthopedics, osteopathy, and laryngology. He was the author also of "Das Gesetz der Transformation der Knochen" (Berlin, 1892), published by the Royal Prussian Academy of Sciences.

**WOLFF, MAURICE**: Swedish rabbi; born in 1824 at Meseritz, Prussia, where his father officiated as rabbi. He studied at the universities of Berlin and Leipsic, and was in 1849 appointed rabbi in

Culm, Prussia, whence he was called in 1857 to the rabbinate of Göteborg, Sweden. He is the author of the following works: "E Senusi's Begriffs-entwicklung des Muhammedanischen Glaubensbekenntnisses" (Arabic and German), Leipsic, 1848; "Philonische Philosophie," *ib.* 1849 (2d ed., Göteborg, 1858); "Moses ben Maimou's Acht Capitel," Leipsic, 1863; "Muhammedanische Eschatologie," *ib.* 1872; "Bemerkungen zu dem Wortlaute der Emnot we-Deot," *ib.* 1878 (2d ed. 1880); "Philos Ethik," Göteborg, 1879; "Beiträge zur Philosophie der Historie," Stockholm, 1882; and "Zur Charakteristik der Biblexegese Saadia Alfajjumis," 1884-85.

**WOLFF, OSKAR LUDWIG BERNHARD**: German improvisator and novelist; born at Altona July 26, 1799; died at Jena Sept. 13, 1851. He early manifested an unusual aptitude for acquiring languages, and while still in college he translated Shakespeare's "Macbeth" into German verse. In 1817 he entered the University of Berlin, where he devoted himself to the study of medicine, history, and literature, afterward settling in Hamburg, where he pursued a literary career. The success of the Italian improvisators Gianni and Spricci developed in him a desire to embrace a similar career; and in 1825 he started on his first tour, visiting Bremen, Hanover, Brunswick, Wolfenbüttel, Weimar, Leipsic, and Dresden, and meeting everywhere with marked success. Among his admirers were Goethe and Grand Duke Karl August, the latter of whom appointed him to a professorship in Weimar. At this period of his career Wolff embraced Christianity; and in 1829 he was appointed assistant professor of modern literature at the University of Jena, being promoted to a full professorship in 1837.

Among Wolff's works may be mentioned: "Sammlung Historischer Volkslieder und Gedichte der Deutschen" (1830); "Altfranzösische Volkslieder" (1831); "Poetischer Hausschatz des Deutschen Volkes" (1839; 15th ed. appeared before the author's death); "Die Geschichte des Romans von dessen Ursprung bis auf die Neueste Zeit" (1841); "Hausschatz der Deutschen Prosa" (1845); and "Handbuch Deutscher Beredsamkeit" (1846). A collection of his novels and stories was published in Jena in 1841-1842.

M. Z.

**WOLFF, ULLA** (pseudonym **Ulrich Frank**): German authoress; born at Gleiwitz, Silesia, April 2, 1850; daughter of Max Hirschfeld. She received her education at home and in Breslau and Vienna. In 1880 she took up her residence in Berlin, where she still lives (1905). In 1876 her first production, "Der Vampyr," appeared at the Lobetheater in Breslau, and was well received; in 1878 this was followed by "Der Herr Kollege," staged at the Nationaltheater in Berlin, but meeting with scant success. She thereupon gave up writing for the stage, and devoted her literary activity to stories and nov-

els, among which may be mentioned: "Das Waldgeheimnis," Bremen, 1879; "Das Wunderkind," Berlin, 1884; "Frau Ottilie" and "Bettlers Heim," *ib.* 1886; "Weltliche Beichte," *ib.* 1887; "Der Kampf ums Glück," *ib.* 1888; "Rechtsanwalt Arnau," *ib.* 1891; "Der Kompagnon," *ib.* 1895; "Adelig," *ib.* 1896; "Gestern und Heute," *ib.* 1897; "Margarethe Eilert," *ib.* 1898; "Die Lene," *ib.* 1902; "Die Einsiedlerin"; "Die Geschichte Zweier Sabbathnachmittage" (appeared in English translation in "The New Era Illustrated Magazine," New York, Nov. and Dec., 1904); "Beim Patriarchen"; "Die Toten"; "Können Damen Allein Reisen?"; and "Die Frühlingsgnade."

s. F. S. W.

**WOLFKAN OF RATISBON**: Jewish convert to Christianity and traducer of the Jews; lived in the second half of the fifteenth century. He was prominent in the SIMON OF TRENT affair (1475), on which occasion he, in order to vent his spite against his former coreligionists, asserted that the Jews had very likely killed the child, since they needed Christian blood for the Passover festival. This affair, and particularly Wolfkan's testimony, a few months later afforded Bishop Henry a pretext for making a similar accusation against the Jews of Ratisbon, whom he charged with having eight years previously bought a Christian child, which they then murdered for ritual purposes.

**WOLFEIN OF LOCHAMEN (LOCHHEIM)**: Medieval Bavarian litterateur; known for his compilation of the so-called "Lochheimer Liederbuch" (about 1450), a collection of medieval German folk-songs, numerically arranged. Under No. 15 appears the following dedication in Hebrew characters: "Der Allerliebsten Barbara Meinem Treuen Liebsten Gemaken," which seems to indicate that Wolfein was a Jew; as does also the expression "Vil guter Jar," which appears under No. 5, and which was used only by Jews. On the other hand, it is noteworthy that "Barbara" is not a current name among Jewish women, and that a Christian grace after meals appears under song No. 36.

s. M. SEL.

**WÖFLER, BERNARD**: Austrian physician; born at Praschnoangez, Bohemia, Dec. 8, 1816. After having studied philosophy at the gym-

nasium of Prague, he attended the University of Vienna (1836-42), where he devoted himself to the study of medicine. From 1843 to 1845 he acted as assistant physician at the communal hospital of Vienna; from 1845 to 1849 he was a private practitioner in Prague; and in 1849 he was appointed director of the Jewish hospital of Vienna. When Baron Anselm von Rothschild, impressed by the efficiency of the hospital in spite of its limitations, erected a better building and presented it to the congregation, Wöfler devoted his whole energy to the new institution, and visited several hospitals of western Europe in order to study their methods.

Wöfler founded (1872) a society for the gratuitous care of consumptives, without distinction of creed. Two country houses at Kierling, near Klosterneuburg, were secured; and every summer a number of patients have enjoyed a stay there with proper professional attendance. Wöfler has been a curator, and for many years president, of the institute for the blind founded at the Hohe Warte by Dr. Ludwig August Frankl. In 1866 the government conferred upon him the Order of Francis Joseph, and in 1873 he received the title of imperial counselor. On the occasion of his eightieth birthday (1896) the committee of the Jewish community of Vienna hung his portrait, painted in oil by the Countess Adrienne Pötting, on the wall of the committee-room in the hospital, among the portraits of its benefactors.

**WOLFNER, THEODORE**: Hungarian deputy; born at Uj-Pest June 18, 1864; educated at the gymnasium and at the school of technology at Budapest. After spending some time in his father's tannery in order to acquire a practical knowledge of the manufacture of leather, he undertook an extensive journey, visiting Germany, Egypt, Palestine, and Turkey.

Wolfner is an alderman of Uj-Pest, a member of the county council of Pesth, president of the national association of leather manufacturers, director of the technological industrial museum, and a member of the chamber of commerce and industry in Budapest. Since 1896 he has represented Gödöllő in the Hungarian Parliament, a fact which is the more noteworthy because of the circumstance that this district is the favorite residence of Francis Joseph I., and is under the influence of court officials. In 1904 Wolfner was the recipient of a rare honor, when the king appointed him a captain of hussars in the reserves and elevated him to the Hungarian nobility.

**WOLFSOHN, AARON**. See HALLE, AARON BEN WOLF.

**WOLFSOHN, WILHELM**: German poet and essayist; born at Odessa Oct. 20, 1820; died at Dresden Aug. 13, 1865; studied medicine and philosophy at Leipsic. He began his literary career with translations from Latin into German under the pseudonym **Carl Maier**. In 1843 he traveled in Russia, lecturing on German literature with such success that he was offered a professorship on condition that he would embrace Christianity; this, however, he declined. Re-

turning to Germany, he became assistant editor of the "Blätter für Literarische Unterhaltung," and later edited, in connection with Robert Prutz, "Das Deutsche Museum." In 1852 he moved to Dresden, where he continued his literary activity.

In addition to several volumes of poems, Wolfsohn was the author of the following works: "Jeschurun" (1841), a Jewish almanac; "Die Schönwissenschaftliche Literatur der Russen" (Leipsic, 1843); "Russlands Novellendichter" (3 vols., 1848-51), with an introduction; "Neues Laienbrevier" (1851), an anthology of German poetry; and "Schauspiele" (1857-59). Of his plays, "Nur eine Seele" became very popular, while "Die Osternacht," the plot of which was based on the blood accusation, was less successful. Besides contributing literary essays to the "Leipziger Zeitung," he edited a magazine of his own which from 1862 to 1864 appeared under the title "Russische Revue," and afterward under the title "Nordische Revue." His "Russische Geschichten" were published after his death by his son (Leipsic, 1884). Wolfsohn married outside of his faith, and his children were brought up as Christians.

**WOLLEMBORG, LEONE:** Italian economist; born at Padua 1859; graduated from the university of his native city (1878). He made a special study of political economy, and his most noteworthy achievement was the establishment of rural savings-banks for the peasantry and small farmers of Italy. He represented the city of Padua in the legislative assembly during several consecutive terms, and from 1900 to 1903 he held the portfolio of finance in Zanardelli's cabinet.

Wollemborg is the author of the following works: "Alcune Lettere Inedite" (Padua, 1880); "Il Costo di Produzione Come Norma per la Determinazione del Valore" (Bologna, 1882); "La Prima Cassa Cooperativa di Prestiti in Italia" (Padua, 1883); "L'Ordinamento delle Casse di Prestito" (Verona, 1884); "Le Casse Cooperative di Prestito" (*ib.* 1884); "Sull' Ordinamento Economico Giuridico delle Latterie Sociali Cooperative" (Bologna, 1887); "Sul Dazio Compensatore pei Cereali" (Padua, 1887); "Sull' Istituzione di un Consorzio fra gli Agricoltori del Friuli" (Udine, 1887); "Sull' Assicurazione in Generale e in Particolare sull' Assicurazione Contro i Danni della Mortalità del Bestiame" (*ib.* 1887); "Sull' Assicurazione Contro i Danni della Mortalità del Bestiame e sui Modi di Ordinaria" (*ib.* 1887); "La Teoria della Cooperazione" (Bologna, 1887); "Les Caisses Rurales Italiennes, Rapport pour l'Exposition Universelle de Paris en 1889" (Rome, 1889); and "Che Cosa è una Cassa Rurale?" (Cuneo, 1895).

**WOLLHEIM, ANTON EDUARD W. DA FONSECA:** German playwright and journalist; born in Hamburg Feb. 12, 1810; died in Berlin Oct. 24, 1884; studied at the University of Berlin (Ph. D. 1831). Shortly after the completion of his studies he removed to Paris, where he became infatuated

with the daughter of a Portuguese nobleman who lived there in exile. In order to win her he enlisted in Don Pedro's regiment, and was wounded during an engagement. His fiancée having died in the meantime, Wollheim left Paris for Hamburg; and upon the death of his father he went to Copenhagen, where he was engaged in cataloguing the valuable Pali manuscripts in the royal library, being later appointed by King Frederick VI. secretary to the private council. In 1838 he went to Vienna, where he produced his first play, "Andrea," which represented the adventures of the French marshal Andrea Massena. Ten years later his "Raphael Sanzio" was staged in Vienna; while his "Rosen im Norden," or "Des Teufels Wette," was received with equal favor both in Berlin and in Hamburg. In 1849 he was appointed instructor in Oriental and modern languages at the University of Berlin, being at the same time engaged as the Berlin correspondent of the London "Morning Chronicle."

From 1854 to 1858 Wollheim was employed in the diplomatic service of the Austrian government; and during the following six years he edited at Hamburg a weekly journal, the "Controle," devoted to the promotion of Austrian interests. In 1868 he established his own summer theater at St. Georg, a suburb of Hamburg; and two years later he went to Berlin, where he became editor of the "Moniteur Officiel du Gouvernement Général." From 1871 to 1872 he was attached to the German embassy at Paris. Among his works may be mentioned: "National-Literatur der Skandinavien" (1876-77); "Deutscher Seehandel und die Französischen Prisengerichte"; "Indiscretionen" (1883); and "Neue Indiscretionen" (1884), containing many autobiographical data. He died in poverty in St. Hedwig's Hospital at Berlin.

**WOLOWSKI (Hebr. Shor):** Polish family, several members of which became converted to Christianity. It flourished in southern Poland in the seventeenth and eighteenth centuries, and was directly descended from Osias Tebu'at-Shor. It was not until the family had become Christianized that it adopted the Polish form of the name, "Wolowski." Jewish members of this family bearing the name Twiaschor, and Christian members of the name of Wolowski are still living in Brody and Lemberg. The following are the more important members:

**Elisha Shor:** Rabbi of Rohatyn, Galicia, during the middle of the eighteenth century. He was a zealous adherent of the Shabbethians, and, having become a follower of Jacob Frank, he was a leader of the Frankists before that party joined the Catholic Church. When internal friction among the Frankists led to public proceedings against them (June 11, 1756), Elisha was charged with being the leader of those who seduced the people to lewdness. The prosecution failed, however, to make out a strong case against the Frankists, and Elisha returned to Rohatyn. Upon the death of Bishop Dembowski of Lemberg, which took place shortly after, the Frankists lost a staunch protector; they were out-

lawed, and the Polish rabble began murdering and pillaging among them, Elisha being one of the first victims (Nov., 1757).

**Hayyah Wolowski:** Daughter of Elisha. She played a conspicuous part among the Shabbethaians, and later among the Frankists. She had an excellent knowledge of the Zohar, and whenever she fell into one of her trances she would cite it from memory.

**Nathan ben Elisha;** after baptism, **Michael Wolowski:** Brother of Solomon, and like him prominently identified with the Frankists, although in a lesser degree.

**Solomon ben Elisha;** after baptism, **Lucas Franciszek Wolowski:** A son of Elisha, and a prominent figure in the Frankist movement in Poland, and later in Offenbach. Together with Judah Koysa, he was one of the chief delegates of the Frankists at the disputation held at Kamenetz-Podolsk (June 20, 1757) at the suggestion of Bishop Dembowski. Two years later (May 16, 1759) he went to Lemberg at Frank's request, in order to seek official recognition for the sect from Wratislav Lubienki, later primate of Gnesen. As a condition of the baptism of all Frankists, he asked that the newly appointed Archbishop Mikolsky should arrange a disputation between them and the rabbis, which request was granted (as to the time and result of this disputation see FRANK, JACOB, AND THE FRANKISTS). On Sept. 19, 1759, Solomon, together with 1,000 followers of Frank, embraced the Catholic faith in Lemberg, whereupon he assumed the name of Wolowski. Even after the death of Frank he was active as a mediator between Eve, Frank's daughter, and the Polish Jews. He died in Poland at the close of the eighteenth century, prior to the final division of Poland.

S. O.

**WOLPER, MICHAEL:** Russian educator and author; born in Wilna 1852; educated in the rabbinical school of his native city. He was graduated in 1872, since when he has been active as a teacher in Jewish elementary schools. At present (1905) he officiates also as inspector of the Jewish seminary in Wilna, and as censor of Hebrew publications.

Wolper is the author of: "Pervaya Uchebnaya Knizhka po Zakonu Yevreiskoi Religii" (Wilna, 1880; 3d ed. 1882); "Mesillah Hadashah" (ib. 1888), a method for the study of Hebrew; and, in collaboration with Nemser, a catechism of Judaism. He has published also various other Russo-Jewish school-books.

**WOMAN, CREATION OF.** See EVE.

**WOMAN, RIGHTS OF:** The problem of the rights of woman in Jewish law and custom is presented mainly in five phases: (1) the power of the father over his daughter; (2) woman's right of inheritance; (3) the powers and duties of the husband; (4) woman's opportunities for self-improvement and

for following various occupations; and (5) the position of the mother.

(1) An early intimation of woman's freedom to choose her mate in life is found in Gen. xxiv. 58, where Rebekah, when her hand is sought for Isaac by the steward of Abraham, is asked:

**Paternal Power.** "Wilt thou go with this man?" Apparently, however, Isaac was not consulted at all as to whether he preferred

a wife from Mesopotamia or a Canaanite or Hittite damsel. Although the story of Rebekah proves a deep-seated sentiment that a girl should not be coerced into marriage, the civil law gave no force to this sentiment, but recognized (Ex. xxi. 7) the power of the father to sell his daughter into bondage with the evident intention that she should become the wife of her master or of her master's son. The limitations to the rights of the father, as established by tradition, have been discussed under SLAVES AND SLAVERY. The daughter must be under the age of puberty, and the sale is justified only by extreme poverty, although the principle that the father can dispose of the daughter's hand remains intact, as is attested by expressions found elsewhere in the Torah, such as Deut. xxii. 16: "I gave my daughter to this man to wife." Tradition teaches (Kid. ii. 1), however, that a mature girl (בגורת), *i. e.*, one more than twelve and a half years of age, had the right to give herself in marriage, and the same privilege was allowed to a "widow from marriage," even in case she was immature. On the other hand, the father had the power to take a wife for his infant son without the son's consent (Ket. ix. 9).

Although marriages are celebrated between very young grooms and brides in Europe, it has for centuries been unusual, even in the eastern part of the Continent, to give immature girls in marriage. The form of the ketubah, as found in the "Nahalat Shib'ah," published in 1666, speaks only of the bride as personally accepting the groom's proposal, and has no alternative form by which the father might accept for her.

The father is entitled to the work of his daughter's hands, and to what she finds (Ket. iv. 4), until she attains the age of maturity, which is reached very early; and he has the same rights over his infant son, the term here lasting six months longer.

The father was empowered to release his daughter from her vows (Num. xxx.), although, according to the Mishnah (Ned. x. 2), this power ceased when she attained her majority. This power of loosing vows was a great step in the progress of woman's freedom, marking an advance over both Babylonian and Roman law, under which the father could impose vows on his daughter even against her will.

(2) While in some systems of ancient law daughters or sisters were excluded from all rights of inheritance, and while in other systems they were put on an equality with sons or brothers, the Mosaic law gave the inheritance to the daughter or daughters

when there were no sons, and, by analogy, to sisters or paternal aunts when there were no brothers (see **Female Inheritance.** **AGNATES**). In no case, however, either under Mosaic or under rabbinic law, did an inheritance go to the mother (B. B. viii. 1). The

institution of maintenance for minor daughters, and the rule that the father's estate must provide a dowry for the younger daughters which should equal the portion received by their elder sisters (unless the father had become impoverished, when the minimum dowry should be fifty zuzim), show that in the great majority of cases the daughters fared better than the sons (see B. B. ix. 1; Ket. iv. 11; and the clause concerning "benan nuḳban," or "female children," in the ketubah). No such favor was shown, on the other hand, to sisters or other kinswomen of the decedent, and traditional law sought merely to soften the hardships of agnatic succession in accordance with the natural feelings of a dying father, instead of setting the inheritance aside, as was done by the one hundred and eighteenth novel in the Roman Code and by American statutes enacted since the Revolution.

The position of the daughter or sister in regard to the right of inheritance was at least no worse than it is now under the law of England in case of landed estates.

(3) The position of married women in Israel was naturally improved when the wife brought a dowry to her husband instead of being purchased. **שלוהים**, the word for "dowry," appears for the first time in the arrangements for the

**Relations** wedding between King Solomon and to Pharaoh's daughter (I Kings ix. 16).

**Husband.** The literal meaning of the term is "dismissal," since it was the father's present to his daughter when she left his house. The use of the word in this place proves the existence of a custom of bestowing on the daughter such gifts as would inure to the husband's benefit. In later times the Babylonian word "nedunya" was substituted for the Hebrew term. The "moḥar," or "price," which the groom had to weigh out according to the Pentateuch, was originally the sum paid for the bride, like the "tirḫatu" of Babylonian law; but in Israel, as in Babylon, it early became customary for the bride's father to restore this price to the husband at the wedding, whereupon it was secured by contract (the ketubah) to the wife as a jointure, payable upon the death of the husband or in case of divorce. Thus the moḥar was no longer incompatible, either in Babylonia or in Canaan, with the dowry bestowed upon the bride from her father's house. The obligation to return the dowry and to pay the jointure (ketubah) served as a good security against divorce on insufficient grounds.

**POLYGAMY** must have been very rare during the period of the Mishnah and Gemara; for though the wives of many rabbis are mentioned, there are no allusions to plural marriages. Among the personages named by Josephus, King Herod is almost the only polygamist. Concubinage, or the taking of an inferior wife (see **PILEGESH**), was no longer practised in mishnaic times.

The husband's duties to the wife are set forth in detail under **KETUBAH**. In the body of that instrument he binds himself to work for her, and to honor, support, and maintain her. The wife, if she brings no dowry, is bound to do such housework for the husband as grinding, baking, washing, cooking,

suckling her child, spreading the bed, and working in wool (spinning, knitting, and the like). If she brings one slave woman, or the means to buy one, she need not grind, bake, nor wash clothes; if two, she need not cook, nor suckle her child; if three, she need not spread the bed nor work in wool; if four, she may "sit still in her chair" (Ket. v. 5). She must, however, do certain small services for her husband which it would be improper for any but the wife to perform, such as washing his hands and face (comp. the Talmud *ad loc.*). R. Eliezer maintained, however, that though she brought a hundred slaves, the husband might insist on her working in wool, lest idleness should lead her into intrigues; and R. Simeon ben Gamaliel declared the husband should not allow idleness in his wife, as it would drive her into melancholia. It is noteworthy that a married woman was never bound to work in the field.

As shown under **ASSAULT AND BATTERY**, the husband must not strike his wife; if he does, he is liable for "damage, pain, and shame," the same as to a stranger. The legal remedy was less effectual as a protection to the wife, however, than the religious warning (B. M. 59a), which ran: "A man should always be careful lest he vex his wife: for as her tears come easily, the vexation put upon her comes near [to God]; since, though all other gates be shut, the gate of tears is never closed."

(4) The fear that an idle wife would fall either into intrigues or into melancholia shows that study or reading was not a common diversion of women. The Talmud (*ad loc.*) suggests that they might maintain cheerfulness by playing chess ("nardeshir").

On the other hand, it would appear from a passage of the Mishnah (Ned. iv. 3), that it was usual to teach girls to read, which of course meant to read the Bible, though it was regarded as highly improper to instruct them in the oral law.

The tone which pervades the Bible and the Talmud, however, is not very different from that which runs through the literature of other nations, showing that woman was held of less account than man. Leah boasts of the many sons she has borne to Jacob; Hannah prays to the Lord for a man child; and the Mishnah speaks of him who prays that his wife may bring forth a son rather than a daughter. In Hebrew law women were not competent witnesses either in civil or in criminal cases. It was a disgrace to a warrior to be killed or disabled by a woman, while a woman who could not find a man to marry her was held in contempt. Recognition was won, however, by women of high talent, such as Deborah in Israel's heroic epoch, the prophetess Huldah in the later days of the kingdom of Judah, and R. Meir's wife in the mishnaic period; while the nine years' reign of Queen Salome was a golden age in Jewish history. The last chapter of Proverbs could not have been written among a nation which despised its women. Wives were frequently empowered by their husbands to manage a shop or store ("ḥanut"), and widows were appointed guardians for their infant children; so that business was not an unknown field to them (Ket. ix. 4-5.) In modern times much of the retail trade of the Jews, and not a little even of wholesale com-

**Woman  
and  
Culture.**

merce, has been carried on by women, while their husbands have been poring over the Bible or Talmud, either at home or in the bet ha-midrash.

(5) The position of the mother is higher under the Mosaic law than under any other system of antiquity. By the fifth commandment the mother is to be honored equally with the father, while in the moral law (Lev. xix. 3) the command to "fear" the

mother, that is, to treat her with respect, is placed even before the duty of

**Woman as Mother.** "fearing" the father. Death is threatened him who strikes or who curses his mother, as well as him who thus offends against his father. The Talmud, in showing under what extreme provocation the righteous man will maintain an outward regard for his parents (Kid. 30b-32a), gives stories of outrageous mothers who were treated with the utmost respect. This sentiment was not shown by the Greeks toward even the best of mothers; for in the first book of the "Odyssey" Telemachus reproves Penelope, and imperiously sends her away to her own apartment to mind her own womanly business. In the so-called Sumerian family laws, the Babylonian code goes farther than Mosaic legislation, for the son must leave the parental house at his mother's bidding. The Book of Proverbs is full of expressions of reverence for the mother, who is the teacher of all virtues. It states that King Lemuel was taught wisdom by his mother. A curse is foretold for the man who forgets to reverence his mother.

The Baraita teaches the influence of the mother on her offspring through simple heredity when it says: "Most sons follow the nature of the mother's brothers" (B. B. 110a). This very belief that the mother gave her child a legacy of good or evil qualities which, though hidden in her, appeared in her brothers, must have raised the standing of mothers and of womankind in general.

**WOOD FESTIVAL, THE.** See AB, FIFTEENTH DAY OF.

**WOODBINE:** Borough in Cape May county, New Jersey; established as an industrial village Aug. 28, 1891; incorporated as a borough in April, 1903. It is situated on a tract of land which originally comprised 5,300 acres, and was purchased by the trustees of the Baron de Hirsch Fund as a site for an agricultural and industrial colony. The primary intention of the founders of Woodbine was the establishment of an agricultural colony for Jewish immigrants from eastern Europe. Farming was to be the chief occupation, but, to make it more remunerative, it was decided at the same time to reserve a certain portion of the tract as

**Early Development.** a site for the future village of Woodbine, which should contain a local market for farm produce as well as factories to give employment to members of the farmers' families.

By the summer of 1892 about fifty farmhouses were completed, and all were occupied in the fall of

that year. In the same year the firm of Meyer Jonasson & Co. opened a cloak-factory which gave employment to more than one hundred persons. Almost all of these employees lived on farms, some of them residing at a distance of three miles from the village. Unfortunately, the economic depression of 1893 affected the cloak industry unfavorably, and the decreased demand led to a partial suspension of work in the Woodbine factory. The discontent among the operatives and the strikes which followed caused the factory to shut down; and the firm finally removed from the village. In addition to this, many of the farmers, unable to earn a living either from the land or in the factory, left for New York or Philadelphia. A large number of those who remained were employed to cut cord-wood; and others were engaged in clearing the town lots of stumps, while the young people picked huckleberries, or sought work in the tomato-canning factory in Ocean View near Sea Isle City.

In 1894 and 1895 the outlook became much brighter. A clothing-factory was established in the village by Daniel & Blumenthal of

**Factories Philadelphia;** and the population began to increase. This was followed

**Es-** by the establishment of several other **tablished.** manufactories in Woodbine; and these additions, though gradual, were accompanied by an almost uninterrupted growth of population. While the early settlers were mostly from southern Russia, later arrivals increased the proportion of Lithuanians and added to the number from the government of Kherson, the latter immigrants being chiefly from Odessa. A small group of Rumanians also went to Woodbine.

The early plans of the founders of Woodbine have not been realized. Instead of becoming an agricultural colony with an industrial adjunct, it is an industrial village with a few farmers. In 1905 there were probably only twenty farmers who derived a part or all of their income from the soil; and, although many of the villagers cultivated small gardens, a number of the more distant farms were entirely unoccupied. Considerable farming skill and capital are required to bring about much improvement in the soil; and the Woodbine farmers possess

but a limited amount of either. Notwithstanding all these drawbacks, however, the farmers of Woodbine

**Failure of Farms.** have made real progress within recent years. Those who supply the local demand for milk have learned something of balanced rations and of economy in feeding, while the truck-gardeners and the fruit-growers have acquainted themselves with market conditions and have increased the fertility of their soil. Grapes, which were once sold in Woodbine itself, now find a market at Vineland; and garden-truck, which formerly could not be disposed of at a profit, is sold to advantage at Ocean City and Sea Isle City.

The farmers of Woodbine have profited unmistakably from the Baron de Hirsch Agricultural School, which was established in 1895 and has gradually extended the cultivated area of the school farms. It has a model poultry-plant and an apiary, as well as orchards, vineyards, and greenhouses,

and covers in all about 300 acres of land. The establishment of the school was largely due to the efforts of H. L. Sabsovich. Its curriculum is chiefly practical, attention being given primarily to various branches of applied husbandry and to farm mechanics, while the theoretical instruction is mainly directed toward familiarizing the pupils with the principles underlying modern farming. A considerable number of the alumni of the school are devoting themselves to practical agriculture. One of them is the successful manager of the Allivine farm near Vineland, N. J.; three are farming for themselves in Connecticut, two in Colorado, one in northern New Jersey, one in New York state, and two in Woodbine. A much larger number are working for other farmers. The alumni include four college graduates, two graduates of a medical school, one lawyer, twelve college students, three members of the United States navy, one of the United States army, and a number of machinists.

The four local public schools had in 1905 an enrollment of over 500, and the average attendance in 1904 was 450. At first included in the school district of Dennis township, the Woodbine schools were organized into a separate district in April, 1903, and temporary trustees were appointed until the spring of 1904. Woodbine has also a kindergarten and a Talmud Torah. The public buildings include two synagogues, a bath-house, a hospital (formerly a hotel), and an engine-house and meeting-hall for the volunteer fire-company. The local industries are housed in five brick buildings, while water and electric lighting are supplied to most of the houses in the borough from the central pumping-station.

In 1901 the average individual income was \$7.30 per week, and the average earnings per family were \$675 per annum. There were in that year 175 single and double cottages in Woodbine, of which 14 were owned by the Baron de Hirsch Fund and 161 by the people; of the latter only 23 were rented. Seventy per cent of the cottages varied in cost of construction between \$575 and \$1,000, the remainder being erected at a cost of over \$1,000 each. Their estimated total cost was \$157,450, of which \$58,200 had been paid in 1901. In 1905 the borough proper had 223 private houses, these and the outlying farmhouses being inhabited by 325 families. Jacob Kotinsky, entomologist for the territory of Hawaii, Joseph W. Pincus, agriculturist of the Baron de Hirsch School, and Jacob G. Lipman, soil chemist and bacteriologist of the New Jersey State Experiment Station, were among the early settlers in Woodbine. The population is now (1905) 1,900, of whom 94 per cent are Jews. See also JEW. ENCYC. i. 262, & v. AGRICULTURAL COLONIES.

**Schools and Synagogues.**

**WOOLF, ALBERT EDWARD:** American chemist and inventor; born in New York Sept. 26, 1846; educated in the public schools of that city and at the College of the City of New York. Among Woolf's achievements may be mentioned: the introduction of peroxid of hydrogen for bleaching ostrich-feathers and for use as an anti-

septic (1876), and the discovery (1889) of the anti-septic properties of sea-water decomposed by electrolysis (electrozone), a discovery now widely applied in the treatment of drinking-water, garbage, and sewage, and used by the United States authorities in suppressing yellow fever in Havana, Cuba (1899). Woolf is a member of the American Institute of Electrical Engineers, and of the Society of Arts, London, England.

BIBLIOGRAPHY: *Who's Who in America*, 1903-5.

A. F. H. V.

**WOOLF, EDWARD:** American musician and novelist; born in London, England, Sept., 1803; died in New York March 14, 1882. After acting as a musical conductor in his native city, he emigrated (1839) to New York, where his abilities were soon recognized, and where he was engaged as orchestral leader, musical instructor, and choirmaster. He contributed many novels to "The Jewish Messenger" during the early part of the existence of that periodical; among these may be mentioned "The Jewess of Toledo," "The Vicomte d'Arblay," and "Judith of Bohemia."

Woolf's sons all attained more or less prominence: **Solomon**, as a professor of art and drawing for forty years in the College of the City of New York; **Benjamin E.** (born in London Feb., 1836; died in Boston, Mass., Feb. 6, 1901), as a dramatist and composer ("The Mighty Dollar" and "The Doctor of Alcantara"); **Michael Angelo** (born in London 1837; died in New York March 4, 1899), famous for his street caricatures; **Philip** (born in New York Feb. 7, 1848; died in Boston 1903), as a physician and novelist; and **Albert Edward**, as an inventor.

**WOOLF, SIDNEY:** English lawyer; born in London 1844; died March 12, 1892; educated at Neumege's school and at University College, London. After passing the examination of the Incorporated Law Society, he joined his brother as a partner in a firm of solicitors. Then, after having been a pupil of Murphy, queen's counsel, he was called to the bar by the Middle Temple in 1873. He began to practise in mercantile and criminal cases, and later became the leading advocate of his day in bankruptcy matters. On Jan. 24, 1890, he was appointed queen's counsel.

Woolf's first legal book dealt with the law on adulteration of food (1874). He afterward wrote, in collaboration with Middleton, on the law and practise of compensation, as well as on the liquidation of business firms by the court. He was active as a communal worker, was one of the principal supporters of the Westminster Jews' Free School; and served as warden and as council member of the Berkeley Street Synagogue. He was a member also of the council of the Anglo-Jewish Association.

J. G. L.

**WORM:** "Rimmah" and "tole'ah" are the terms most frequently employed in the Bible to connote not only the earthworm, but any elongated crawling creature, such as the maggot, caterpillar, larva

of an insect, and the like. Thus, in the account of the "worms" which appeared in the manna (Ex. xvi. 20, 24) the terms evidently refer to caterpillars which feed on putrefying matter, while the "worms" described as destroying vineyards and the gourd (Deut. xxviii. 39; Jonah iv. 7) were some variety of beetle or insect larva, and the "worms" in Isa. xiv. 11, Job xvii. 14, xxi. 26, and similar passages were maggots or larvæ which feed on dead bodies. For the meaning of "zohale erez" (Mic. vii. 17) see SERPENT.

Metaphorically, the worm symbolizes lowliness and helplessness (Isa. xli. 14; Ps. xxii. 7 [A. V. 6]; Job xxv. 6), but in Isa. lxvi. 24 the worm and fire together connote eternal pain.

There are several species of earthworm (*Lumbri-cus*) in Palestine, and *Myriapoda* abound.

In the Talmud also "rimmah" and "tole'ah" are found as general terms for "worm," while the generic denomination for all crawlers is "shekazim u-remasim" (see REPTILES). Several species are mentioned under special names, such as כרוש, a kind of water-worm (*Nais tulifex*; Zeb. 22a); שילשיל, rainworm (Hul. 67b); כורנא, the worm which lives in the tracheæ of sheep and causes them to cough (*Strongylus filaria*; ib. 49a); and קוקאני, worms found in the intestines of fishes (*Lingula cingulum*; ib. 67b). Since the raven is heartless toward its young, Providence, according to B. B. 8a, takes care of them by causing maggots to arise from their excrement, thus furnishing them with food (comp. Rashi on 'Er. 22a). With the worms which arose from rotten bran Noah fed the chameleon in the ark (Sanh. 108b). A host of worms infest the human body, both living and dead (Tem. 31a; Ab. iii. 1). There are worms in the liver (ארקתא; Shab. 109b) and in the belly (כירעא), a remedy for the latter being the milk of an ass mixed with the leaves of the bay, or bread and salt taken with fresh water before breakfast (Git. 69b; B. M. 107b). Garlic is a cure for worms in the great intestine (Bek. 82b), while the tapeworm is driven out by the raw meal of barley or by hyssop (Ber. 36a; Shab. 109b). כורנא is the name of a worm which finds lodgment between the prepuce and glans penis and is removed by circumcision, so that even Gentiles submitted to the operation ('Ab. Zarah 26b). From the mouths of the false spies whom Moses sent to Canaan came forth worms (Soṭah 35a), and Yer. Yoma 39a records similar phenomena proceeding from the nose of a heretic (comp. also Yoma 19b; B. M. 84b).

**WORMS**: Town in Rhein-Hesse, grand duchy of Hesse, Germany. Like Mayence and Cologne, it has one of the oldest Jewish communities in Germany. A legend relates that the Jews of Worms were descended from the Benjamites who had migrated from Palestine to Germany (Brüll's "Jahrbücher," 1879, iv. 34 *et seq.*). It is possible that there was a congregation there in the time of the Romans, but the first historical reference is the statement that Jews from this city visited the fair at Cologne about the year 1000 (Aronius, "Regesten," No. 149; Kober, "Studien zur Mittelalterlichen Geschichte der Juden in

Köln am Rhein," p. 9, note 3, Breslau, 1903). The earliest authentic information regarding the community, however, dates back only to 1034.

**Early History.** On Jan. 18, 1074, Emperor Henry IV. granted the "Jews and other citizens of

Worms" exemption from customs duties in the royal-customs ports of Frankfort, Boppard, Dortmund, Goslar, etc., as a reward for their fidelity. Already at this time the Jews lived in a special quarter of the city. About 1090 Henry IV. granted the community, which was represented by the Jew-bishop Solomon, the privileges of free commerce and exemption from taxation; he designated

Exterior of the Old Synagogue at Worms.  
(From a drawing by C. Gross Mayer.)

the Jews as "subjects of his treasury," and placed them under his immediate protection, so that neither royal nor episcopal functionaries could exercise any jurisdiction over them, their only authority being the Bishop of the Jews, appointed by themselves, and confirmed in his office by the emperor. These privileges were renewed by the emperors Frederick I., Barbarossa (April 6, 1157), and Frederick II. (about 1236).

On May 18 and 25, 1096, the Crusaders murdered all the Jews of Worms—about 800 in number—with the exception of some who committed suicide and a few who were forcibly baptized. Later a new community was formed in Worms; and this suffered during the Second Crusade (1146), and again in 1196, when the victims included Dulcinea, wife of R. Eleazar, his daughters Belat and Hannah, and his son Jacob. During the division of the kingdom at the close of the twelfth century Worms was besieged by King Otto, and the Jews, who sided with Philip of Swabia, took part in the defense. On July 8, 1230, Pope Honorius III. issued from San Rieti an order directing the Archbishop of Mayence to compel the community to pay the sum of 1,620 marks before the following Easter, threatening it with exclusion from all

**Taxation.** dealings with Christians if it failed to raise the amount. In 1241 the state taxes of the Jews of Worms amounted to 130 marks in silver, and on Feb. 28, 1255, Bishop Richard of

Worms transferred to the chapter of the local cathedral, among other revenues from the city, the sum of 40 pounds heller which the congregation was obliged to pay annually on St. Martin's Day (Nov. 11). Between 1254 and 1271 the Jews of Worms were taxed 2,870 pounds heller and 250 marks in silver for the public peace insured by the Rhenish Alliance; and from 1269 to 1275 they were compelled to pay 200 marks annually to King Richard of Cornwall. In 1294 orders were issued by King Adolphus and by the bishop, forbidding the Jews to acquire real estate in the parish of St. Martin. By an edict dated March 9, 1316, Louis the Bavarian granted the city of Worms the privilege of levying on the Jewish community a yearly tax of 100 pounds heller in addition to the 300 pounds it had thitherto paid; and on May 1, 1338, he informed the council of Worms that the Jews of that city were bound by agreement to pay the sum of 2,000 gulden toward the king's expedition against France, and that, if necessary, force might be employed in collecting this sum.

By an edict dated at Speyer Jan. 4, 1348, the emperor Charles IV. surrendered the Jews of Worms to the city government, but on March 1, 1349, at the time of

the Black Death, the community was practically annihilated, the Jews setting fire to their houses, and more than 400 persons perishing in the flames. The women's wing of the synagogue, added in 1213 through the munificence of Meir and his wife, Judith, was also destroyed. An edict of Charles IV., dated March 29, 1349,

**Fourteenth** gave to the citizens of Worms the property left by the Jewish community; and  
**Fifteenth** but a few years later (1353) the city  
**Centuries.** desired to again admit Jews, and on

Nov. 20, 1355, Charles IV. allowed it to grant them the right of residence. In May, 1377, the Jewish community of Worms, numbering

thirty-six persons, pledged itself, in a Hebrew document addressed to the city council, to pay in "voluntary" taxes the sum of 20,000 gulden; and in the following year (Aug. 28, 1378) the city was granted the right of extending protection to the Jews. This privilege was renewed by King Wenceslaus on May 5, 1400, after he had already ordered the city (by edict dated April 22, 1391) to afford protection to his "Kammerkuechte," as he styled the Jews. On March 17, 1398, the city council enacted that every Jew or Jewess over twelve should pay one old tournois in LEIBZOLL, but not one farthing more. On Oct. 31, 1400, King Ruprecht confirmed the

privileges granted the Jews of Worms by Henry IV., by virtue of which they were allowed to exchange money in any part of the city, except in front of the mint or in the minters' offices of exchange. The same king enacted also, by a decree dated at Heidelberg July 29, 1406, that the Jews of Worms might be tried only by the municipal court, a privilege which was at first granted for a period of six years only, but was extended by King Sigismund (1414).

In 1409 the Jews of Worms were accused of the murder of a Christian child, but as there was no evidence against them, they were ac-

quitted by the council, although they lost part of their property. In 1422 the community, encouraged by the council, refused to pay the "Hussite taxes," and was therefore outlawed by King Sigismund, who, through the margrave of Baden, confiscated and sold the houses vacated by the Jews. On Aug. 1, 1431, King Sigismund assured the Jews of Worms that all edicts annulling the outstanding debts owed them would be declared invalid upon the payment by each Jew of an indemnity. This caused an uprising among the peasantry, which was, however, speedily quelled, the ringleaders being punished. Two years later (1433) the community presented Sigismund with the sum of 20 florins as a coronation tribute, and

Exterior of the Old Synagogue at Worms.  
(From a photograph.)

promised to pay an additional 100 florins in the middle of the following Lent. On Nov. 6, 1441, regulations referring to the Jews were enacted by the guilds of the bakers, butchers, and marketmen. About 1470 the Jews of Worms occupied thirty-two houses, for which they paid the city a ground rent of 960 gulden. In 1484 the citizens of Worms wished to expel the Jews, but this was prevented by the emperor, and ten years later (June 14, 1494) Maximilian confirmed the Jews in all their privileges, while on April 4, 1500, he forbade the city to encroach upon the imperial prerogative concerning them. In 1495, and again in

1496, the palgrave Philip and his son, **Sixteenth Century.** Duke Ludwig, visited the "Juden-schul" at Worms (Boos, "Urkundenbuch der Stadt Worms," iii. 395, 401).

In 1509 complaint was lodged against the Jews of Worms charging them with violence against mes-

pecially Dr. Chemnitz, advocated the expulsion of the Jews from Worms, whereupon the elector Frederick took the congregation under his protection; the opposition of the guilds, however, forced the Jews to emigrate (April 20, 1615), after which their synagogue was demolished, the cemetery laid waste, and the tombstones destroyed. After the suppression of the uprising by the troops of Frederick, an imperial decree was promulgated (Jan. 19 or 20, 1616) ordering both the palgrave and the Bishop of Speyer to readmit the Jews; in commemoration of this event the eve of the Feast of Shebat was designated as a fast-day for the community of Worms. During the Thirty Years' war the Jews of the city were compelled to pawn even the silver of the synagogue in order to raise the manifold contributions exacted from them. At the same time they suffered from a pestilence which raged in the Jewish quarter in 1632 and

CEMETERY AT WORMS.

(From a photograph.)

sengers of the imperial court. In the following year (1510) Emperor Maximilian gave the community permission to hold a public meeting in Worms ("Sulamith," 1811, iii. 416 *et seq.*; Hormayr's "Archiv," 1812, iii., Nos. 11, 12). On Nov. 22, 1539, Ferdinand I. issued from Vienna an order to the city council of Worms, directing it, under penalty of heavy punishment, to protect the Jews in all their privileges during the quarrel between the city and Bishop Dietrich, and forbidding the levying of any special taxes. Ordinances regulating Jewish affairs were issued by the council of Worms on Dec. 6, 1570; Nov. 1, 1584; Dec. 23, 1605; as well as in later years.

In 1615 some members of the city magistracy, es-

pecially Dr. Chemnitz, therefore issued an edict (Vienna, May 16, 1636) directing the council of Worms to be lenient in levying

**During the** taxes upon the Jews, and ordering the release of Jews who had been imprisoned on account of inability to pay. Three years later Ferdinand

**Thirty Years' War.** III. gave his nephew Anselm Casimir, Elector of Mayence, full authority to appoint a committee consisting of the Bishop of Worms, the Prince of Dalberg, and the council and Jews of Worms, or their representatives, for the purpose of framing new Jewish regulations. On May 31, 1689, the city of Worms was invaded by the French under Melac, and at the same time a terrible catastrophe

visited the Jews. The entire Jewry, which displayed the imperial arms on both gates, was burned, together with the interior of the synagogue, and the so-called Rashi Chapel. The ruins of the synagogue were used as a stable and storehouse. In 1698 a committee was formed for the purpose of restoring the Jewish community of Worms, which had been broken up by the French invasion. By an agreement dated June 7, 1699, the council of Worms pledged itself to grant the Jews certain concessions, and this arrangement was confirmed by Joseph I. (April 19, 1707) in order to protect the Jews against any infringements of their rights on the part of the council; it was later approved also by Emperor Charles VI. (Oct. 26, 1714).

In 1751 one-fifth of the revenues of the city of Worms was furnished by the Jewish taxes. The treaty of 1699 was again confirmed by a decree dated at Vienna March 10, 1766 ("Jeschurun," iv. 99 *et seq.*). In 1872 a Jew named Edinger represented Worms in the Hessian Diet, while Levy was second mayor. In 1874, prior to the enactment of the new liberal school law, S. Rothschild was appointed teacher in the non-sectarian school.

The Jewish community of Worms, which in 1875 numbered 1,000 members, consists now (1905) of about 1,200. In addition to a large number of other institutions, the city has a Jewish hospital, a *hebra kaddisha*, a society for the support of sick women, an endowment society, a society for the distribution of fuel, and an association for the support of school children. There is also the Dalberg Lodge of the Order B'nai B'rith.

D.

A. LEW.

Until the close of the twelfth century the Jews of Worms engaged in extensive and remunerative business enterprises, but through restrictive measures these were gradually rendered unprofitable, and at length only trading in money was left open to them. In 1165 even this branch of

**Social Condition.** business was denied them, and during the thirteenth century more and more of them engaged in usury. In 1255 orders were issued regulating the interest on loans, and the Jews were thereby prohibited, under pain of severe punishment, from charging more than 33 $\frac{1}{3}$  per cent per annum.

During the Middle Ages the Jews, as citizens of Worms, were permitted to acquire real estate; they might even occupy the commons (that is, territory belonging to the commonwealth), until Adolf of Nassau on July 28, 1294, issued an order against this. In spite of their various privileges, however, the Jews might not dwell among the Christians, but were assigned a special quarter of the town, separated from the Christians by walls and gates. These gates had various names, of which may be mentioned "Porta Judæorum," "Juden Borter," and "Juden Burgetor." The synagogue formed the center of the Jewish quarter. It was erected in

1034 through the munificence of a wealthy Jew, Mar Jacob, and his wife, Rachel; and in spite of the many accidents that have befallen it in the course of time its appearance has changed but little. It is built in early Moorish style, and was originally intended for men only. It had three entrances. The apse for the Torah scrolls consisted of a semicircular protuberance of the wall. The women's wing of the synagogue, connecting with the northern wall of the older structure, was built in 1213. The men's synagogue had five inscriptions; the women's, four.

Prominent in the legendary and historic accounts of the Jews of Worms is the so-called Rashi Chapel, built in 1624 by David ben Isaac Joseph Oppenheim. This building was erected so close to the synagogue that it prevented the use of one of the entrances of the latter.

The fact that Rashi lived for a short while in Worms, where he was a pupil of Isaac ha-Levi,

**Rashi Chapel.** gave rise to the legend that he taught in the edifice erected 500 years after his death. According to a report by Juspa Shammes (1648-78), in which mention

is made of a "prayer-house of Rashi," the congregation took occasion to place an inscription in the building, which they termed the Rashi Chapel. Abraham Epstein of Vienna discovered in a niche of the Rashi Chapel an inscription designating the niche as the seat of David Oppenheim. The synagogue and the chapel stand in a court, and are surrounded by one wall. Inside this court is a square space enclosed by a wall two meters high, and in which there formerly grew a nut-tree. The use and purpose of this space can no longer be deter-

Michael Gernsheim, a Judenbischof of Worms, Seventeenth Century.

(From a drawing in possession of M. Gernsheim, New York.)

mined. From the chapel a path inside the courtyard led to the Judenbäder, which were located underground. In 1895 the work of excavating them was begun, but they are not yet accessible.

The cemetery dates from the first half of the eleventh century, and is located on the left side of the present Andreasstrasse, near the old Andreas gate. The oldest tombstone bears date of 1077, and is that of one Jacob Bahur. Of other tomb-

**Cemetery.** stones may be mentioned a monument erected in honor of twelve elders of whom a legend reports that, during the Crusade of 1096, they asked the town councilors for protection, and, on being refused, murdered the councilors, whereupon they all committed suicide in the cemetery. There are also the tombstones of Jekuthiel ben Jacob (1261); Baruch ben Meir, father of Meir of Rothenburg (1275); and Meir of Rothenburg (1307); a tombstone of four sisters, with inscriptions arranged in four rows (1419); and also those of Jacob Mölln (1427) and Juspa Shammes (1678). Mention may be made also of thirteen inscriptions relating to members of the Bacharach family (seventeenth and eighteenth centuries). The Jewish congregation of Worms had its own public park, for the care of which each member had to contribute a yearly sum fixed by the Jewish council. The guarding and keeping of the park devolved upon the communal servant, who officiated as "schulklopfer" and sexton also.

The internal affairs of the community were arranged by a Jewish council of twelve members headed by the BISHOP OF THE JEWS. This institution dated back to the eleventh century. The Jewish bishop was elected by the council, and his appointment originally had to be sanctioned by the emperor. On July 25, 1312, however, Bishop Emrich ordered that the Jew-bishop should no longer be confirmed in his office by the emperor, but by the bishop of the diocese; and also that a Jew-bishop once appointed should retain his title until his death, although his official duties should each year

devolve on another member of the council. On the death of a Jew-bishop the new appointee was to pay to the bishop 60 pounds Worms pfennigs; this stipulation, however, was changed by Bishop Frederick (Feb. 8, 1439), who ordered that the Jewish community should pay 20 florins each year on St. Martin's Day, in lieu of the former payment.

Next to the communities of Mayence and Speyer, that of Worms occupied the most prominent place in the fields of science and literature, and many of the foremost Lorraine savants were born in Worms; it was from that city also that the most famous "takkanot Shum" were issued. Among the most prominent rabbis and scholars of Worms may be mentioned:

Isaac ben Eleazar ha-Levi, Rashi's teacher (11th cent.); Isaac ben Judah, a contemporary of Rashi; Eleazar ben Judah Rokeah (13th cent.); Moses ben Aaron, teacher of the last-named (d. 1240); Baruch ben Meir, father of Meir of Rothenburg (d. 1275); Nathan ben Isaac (d. 1333); Jacob Mölln (d. 1427); Meir ben Isaac (1511); Abraham Samuel Bacharach (d. 1615); Elijah Loanz (d. 1636); Simson Bacharach (d. 1670); Aaron Teomim (rabbi until 1687; d. Cracow, 1690); Jair Hayyim Bacharach (rabbi, 1689-1702); Naphtali Hirsch Spitz (d. 1712); Menahem Mendel Rothschild (d. 1732); Moses Broda of Ungarisch-Brod (d. 1742); Hirsch Auerbach of Brody (1743-78).

Worms had the distinction of having the first Jewish mayor in Germany in the person of Ferdi-

nand Eberstadt (born there Oct., 1808; died at Mannheim March 10, 1888). He was elected to the mayoralty in 1848, having proved himself a leader in the liberal movement of the time. He held office till 1851, when, owing to the reaction, he resigned, and later removed to Mannheim. He represented the same district, Alzey-Worms-Oppenheim, in the upper house of the Hessian Landtag.

A man of considerable importance in the history of the Jews of Worms was the sexton and "schulklopfer" Jephthah Juspa ben Naphtali, known also by the name **Juspa Shammes**. He was born in Fulda in the beginning of **Shammes**. the seventeenth century, and studied until 1623 under R. Phinehas Horwitz in his native town. In that year he went to Worms, where he remained until his death in 1678.

Interior of the Old Synagogue at Worms.  
(From an old lithograph.)

He was the author of the following works: (1) "Shir Musar" (Amsterdam, 1690), a poem on morals; printed on one folio sheet. (2) "Ma'ase Nissim" (Frankfort-on-the-Oder, 1703), a Hebrew work in which history and fiction are intermingled, and of which only one copy is extant (in Oxford). It was translated into Judæo-German (Amsterdam, 1723; Homburg, 1725; Fürth, 1767). (3) A "Tehnuah"

Interior View of Women's Section in the Old Synagogue at Worms.

(From an old lithograph.)

for the eve of the first day of the month of Adar; still recited in Worms on that day. His work on the internal organization of the Jewish community of Worms, written in Hebrew and in Judæo-German, is in the possession of A. Epstein of Vienna.

J.

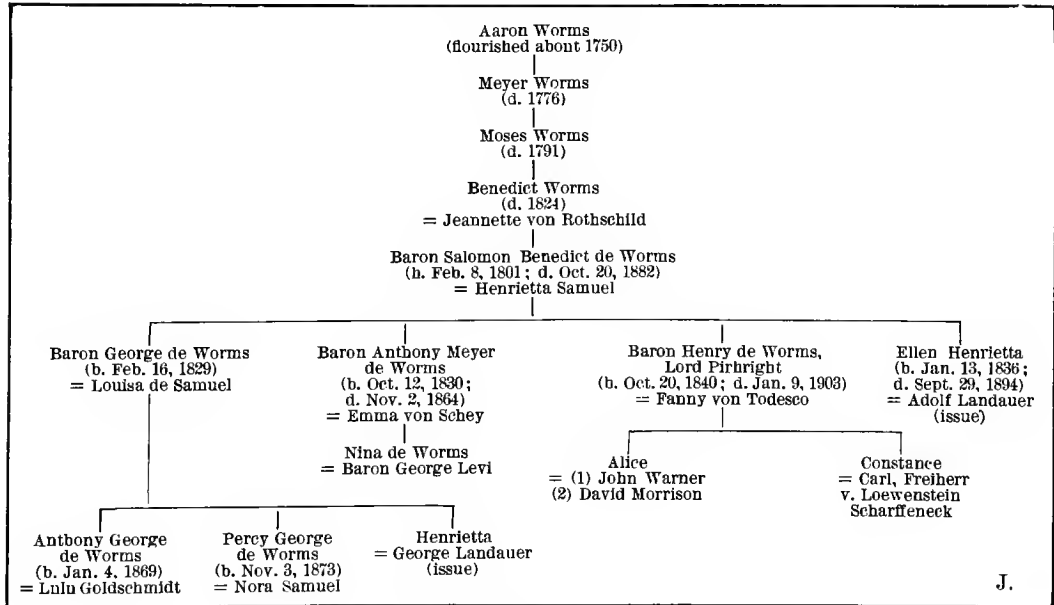

S. O.

**WORMS:** Frankfort and English family, tracing its descent from Aaron Worms of Frankfort-on-the-Main in the middle of the eighteenth century. Aaron's great-great-grandson was created hereditary baron of the Austrian empire April 23, 1871; and a later descendant, Baron Henry de Worms, was raised to the British peerage as Lord Pirbright (see pedigree below).

J.

**WORMS, AARON.** See AARON WORMS.

**WORMS, ASHER ANSHEL:** German physician, mathematician, and Hebraist; born at Frankfort-on-the-Main toward the end of the seventeenth century; died there in 1769. Worms was graduated as Ph.D. and M.D. in 1723, and shortly afterward was appointed physician at the Jewish hospital of his native town, holding that position for more than forty-five years. Before graduating Worms published his "Mafteah ha-Algebra ha-Ḥadashah" (Ofenbach, 1722), a manual of algebra, with problems and their solutions. Four years later he published in Frankfort-on-the-Main a revised edition of the "Ma'adanne Melek," a chess manual (wrongly ascribed to Jedaiah Bedersi), adding to it a preface and a German poem. After graduation he occupied himself with mathematics, astronomy, natural history, philosophy, and music, the result of his studies being a number of unpublished scientific works, all of which are enumerated in his "Sevag la-Torah" (*ib.* 1766), a Masoretic commentary on the Pentateuch followed by a commentary on Saadia Bekor Shor's poem on the number of letters in the Bible. Before its publication this work circulated among rabbis and other

M. SEL.

**WORMS, ÉMILE:** French jurist; born at Frisange, Luxembourg, May 23, 1838; educated at the University of Heidelberg and at Paris (LL.D. 1864). In 1863 he received a prize from the Institut de France for an essay on the commercial history of the Hanseatic League; and in 1867 he was again awarded a prize. In that year he was appointed assistant professor of law at the University of Paris; and later in the same year he received a call as professor of law at the University of Rennes, which position he held until 1898, when he removed to Paris.

Worms represented the French government at the statistical congresses of Florence (1867), The Hague (1869), St. Petersburg (1872), and Budapest (1876). He is the author of the following works: "Histoire Commerciale de la Ligue Hanséatique," 1864; "Sociétés par Actions et Opérations de Bourse," 1867; "Théorie et Pratique de la Circulation Monétaire et Fiduciaire," 1869; "Les Rapports du Droit Pénal avec l'Economie Politique," 1870; "L'Allemagne Economique, ou Histoire du Zollverein Allemand," 1874; "Sociétés Humaines et Privées," 1875; "Exposé Elémentaire de l'Economie Politique," 1880; "Nouveau Catéchisme d'Economie Politique," 1881; "De l'Etat au Regard des Erreurs Judiciaires," 1884; "Les Ecarts Législatifs," 1886; "De la Liberté d'Association au Point de Vue du Droit Public à Travers les Ages," 1887; "De la Propriété Consolidée, ou Tableau Historique et Critique de Tous les Systèmes les Plus Propres à la Sauvegarde de la Propriété Foncière et de Son Démembrement," 1888; "Une Association Douanière Franco-Allemande, avec Restitution de l'Alsace-Lorraine," 1888; "Les Attentats à l'Honneur," 1890; "Doctrine, Histoire, Pratique et Reforme Financière, ou Exposé Elémentaire et Critique de la Science des Finances," 1891; "Les Condamnations Conditionnelles Suivant la Loi Française et Etrangère," 1891; "Essai de Législation Financière; le Budget de la France dans le Passé et le Présent," 1894; "La Politique Commerciale de l'Allemagne," 1895.

**WORMS, GUSTAVE HIPPOLYTE:** French actor; born in Paris March 21, 1837. He was graduated from the Conservatoire in 1857, winning the first prize for tragedy and the second for comedy. Soon afterward he was engaged at the Théâtre Français, where he made his début in 1859 as *Achille* in "Duc Job." In 1862 Léon Laya, appreciating the clever comedy work of Worms, engaged him to create the part of *Horace* in "Loi du Cœur," and his success was so marked that he secured a contract with the Théâtre-Michel, St. Petersburg, where he repeated his French successes. In 1875 he returned

to Paris, making his reappearance at the Gymnase as *Armand Duval* in "La Dame aux Camélias" with great success. After a short sojourn in Russia Worms was called to the Comédie-Française, Paris, in 1877, and elected a "sociétaire" in the following year. He retired from the stage in 1901.

Worms's original creations are: *Elie Mareau* in "Anne de Kerviller," *Georges* in "Les Rantzau," *Issarts* in "Service en Campagne," *Lude* in "Portraits et la Marquise," *Henri* in "Les Maucroix," *André de Bardannes* in "Denise," *Capitain Olivier* in "Antoinette Rigaud," *Stanislas de Grand-Redon* in "Francillon," *Marquis de Simiers* in "La Souris," *Jacquemin* in "Le Flibustier," *Sam* in "La Bûcheronne," and *François* in "Margot."

**WORMS, BARON HENRY DE.** See PIRBRIGHT, HENRY DE WORMS, BARON.

**WORMS, JULES:** French physician; born in Paris Jan. 24, 1830; died there April 15, 1898; educated at the University of Strasburg (M.D. 1852). From 1853 to 1854 he acted as an assistant at the military medical school in Paris, and from 1854 to 1858 as first assistant surgeon of an infantry regiment. He took part in the Crimean war as a surgeon; was from 1858 to 1864 assistant physician at the Gros-Caillou Hospital in Paris; and from 1865 to 1875 was surgeon at the Rothschild Hospital. From 1870 to 1880 he officiated as statistician of the board of health of Paris, and in 1875 was appointed chief physician to the Northern Railroad (Chemin du Fer du Nord). Of his works may be mentioned "De l'Extirpation des Cystes de l'Ovaire," Paris, 1860.

**WORMS, JULES:** French genre painter; born in Paris Dec. 16, 1832. He studied under Philippon and Lafosse, and made his début at the Salon of 1859, his first painting, "Dragoon Making Love to a Nurse on a Bench in the Place Royale," auguring his success in the humorous vein. In 1861 he exhibited the painting "Arrest for Debt," and thereafter visited various countries, sojourning for some time in Spain, where he made several sketches of the manners and costumes of the people.

Worms was awarded medals for his exhibits at the Salons of 1867, 1868, 1869, and 1878, and was in 1876 created a chevalier of the Legion of Honor. Following is a list of his paintings, several of which were purchased at high prices by American collectors: "Fountain in Burgos" (1863; Laval Museum); "Tavern in the Asturias" and "Departure of Smugglers" (1865); "Kitchen in Valencia" (1866); "Scene in Old Castile" (1867); "Romance à la Mode" (1868; Luxembourg Museum); "Welcome Visitor" and "Precocious Talent" (1869); "Sale of a Mule" and "A Letter Box" (1870); "Sheep-Shearing in Granada" (1872); "An Aunt-in-Law" (1873); "The Little Cabinet-Maker" (1874); "A Sensational Novel" and "One's Vocation" (1875); "The Dance of the Vito at Granada" and "Going to the Review" (1876); "The Bull Fountain in Granada" (1877); "Distracted Barber" and "Every Age Its Pleas-

ures" (1878); "Pastoral Tournament" (1879); "Before the Alcalde" (1880); "Public Writer" (1882); and "Politicians" (1883).

F. C.

**WORMS, MAURICE BENEDICT DE:** English financier and agriculturist; born in Frankfort-on-the-Main 1805; died in London 1867; grandson of Meyer Auselm de Rothschild, and son of Benedict de Worms, a distinguished member of the Jewish community of Frankfort. On a visit to the Far East in 1841, Maurice and his brother **Gabriel de Worms** purchased a large estate in Ceylon, which became known as the Rothschild Estate. Acre by acre was added to this estate, which was among the best-cultivated tracts of land in the island; and when the Worms brothers in 1865 disposed of their holdings, they had no less than 2,000 acres under cultivation, and more than 6,000 acres of forest land to be reclaimed. The brothers were among the pioneer settlers in Ceylon, and contributed largely to its prosperity. In his will Maurice de Worms bequeathed large sums of money to various Jewish charitable institutions.

**BIBLIOGRAPHY:** *Jew. Chron.* June 14, 1867.

J.

G. L.

**WORMS, RENÉ:** French auditor of the council of state; son of Emile Worms; born at Rennes Dec. 8, 1869; educated at the lyceum of his native city and at the Lycée Charlemagne and the Ecole Normale-Supérieure in Paris ("docteur en droit," 1891; "docteur ès lettres," and "docteur ès sciences politiques et économiques," 1896). Worms, who is a laureate of the French Institute (Académie des Sciences Morales et Politiques), became a member of the higher statistical board in 1897 and of the consulting committee for agricultural statistics in 1903, besides being a member of many learned societies. He began his legal career as an advocate at the Court of Appeals in Paris in 1891, and was appointed auditor of the council of state three years later. He has been on the examining board for commercial high schools since 1897. In 1904 he was the secretary of the extra-parliamentary board of marine investigation, and in the following year was appointed recording secretary of the French colonial congress. His talents found university recognition in 1895, when he was appointed lecturer on political economy in the faculty of law of the University of Paris. He held this position until 1897, when he was chosen associate professor in the same faculty at Caen, remaining there until 1902; he was instructor in the faculty of law, section of economic sciences, and in the Ecole Normale Supérieure in 1897, and was appointed in 1902 honorary professor of political economy at the Commercial Institute, Paris, which position he still (1905) holds.

In 1893 Worms established the "Revue Internationale de Sociologie," of which he became the editor, and later founded the "Bibliothèque Sociologique Internationale," besides organizing the Institut International de Sociologie and the Société de Sociologie de Paris. He is, furthermore, a prolific

writer, his principal works being as follows: "De la Volonté Unilatérale Considérée Comme Source d' Obligations" (Paris, 1891); "Précis de Philosophie" (3d ed. 1905); "Éléments de Philosophie Scientifique et de Philosophie Morale" (*ib.* 1891); "La Morale de Spinoza" (crowned by the Académie des Sciences Morales et Politiques; *ib.* 1892); "De Natura et Methodo Sociologiæ" (*ib.* 1896); "Organisme et Société" (*ib.* 1896; Russian translation, St. Petersburg, 1897); "La Science et l'Art en Economie Politique" (Paris, 1896); and "Philosophie des Sciences Sociales" (3 vols., *ib.* 1903-5). In addition he has contributed briefer studies to technical magazines.

Worms is a devoted adherent of Judaism, and was chosen as its apologist at the Mole conference, where he twice defended the decree of Crémieux regarding the Jews of Algeria against those members who demanded its repeal. He was created a chevalier of the Legion of Honor Feb. 18, 1905.

**WORMS, BARON SOLOMON BENEDICT DE:** English financier; born at Frankfort-on-the-Main Feb. 5, 1801; died at Brighton, England, Oct. 20, 1882; son of Benedict de Worms of Frankfort. He was taken to England at an early age, and eventually went to Ceylon, where, by his judgment and perseverance, he contributed greatly to the advancement of the colony. He was a generous benefactor to various Jewish charities, was a life-member of the council of the United Synagogue, and acted as a trustee of several metropolitan synagogues. In 1871 he was created a baron of the Austrian empire in recognition of services rendered that country; and in consideration of the efforts made by him and his brothers in developing the colony of Ceylon, Queen Victoria granted him and his heirs, by royal warrant of 1874, the right of using the title in England.

G. L.

**WORMS, VICTOR:** French lawyer; younger brother of Emile Worms; born at Luxembourg Nov. 16, 1853; educated at Paris and Rennes ("docteur en droit," 1878). In 1880 he was appointed "conseiller de préfecture" for the department of Ille-et-Vilaine, and at Rennes made the acquaintance of Waldeck-Rousseau, who appointed him his private secretary when he entered Gambetta's cabinet as minister of the interior. On the retirement of Waldeck-Rousseau, Worms returned to his former post, but when his patron accepted a portfolio in the cabinet of Jules Ferry, Worms was made president of the "conseil de préfecture" for the department of Seine-et-Marne. On the fall of this ministry Worms retired from the administrative magistracy and entered the judiciary. Appointed a judge in the civil tribunal of Reims in 1886, he was transferred three years later in a similar capacity to Versailles, where he was made vice-president of the tribunal by a decree of Nov. 22, 1904.

J. KA.

**WORMSER, ANDRÉ ALPHONSE:** French composer; born in Paris Nov. 1, 1851; studied at the Paris Conservatoire under Bazin and Marmontel. In 1875 he was awarded the Prix de Rome. Besides a great number of concert overtures, piano composi-

tions, operettas, farces, and ballets, he has written two operas, "Adèle de Ponthière" (Aix-la-Chapelle, 1887) and "Rivoli" (Paris, 1896).

**WORSHIP, IDOL-**: All idolatrous cults are condemned by the Biblical insistence on worship of YHWH only. The Decalogue begins with the command to reverence the one true God and to recognize no other deities. On this theme the Pentateuch dilates from every point of view, and the efforts of the Prophets were chiefly directed against idolatry and against the immorality connected with it. To recognize the true God meant also to act ac-

**Historical** cording to His will, and consequently  
**Outlines.** to live a moral life. The thunderings

of the Prophets against idolatry show, however, that the cults of other deities were deeply rooted in the heart of the Israelitish people, and they do not appear to have been thoroughly suppressed until after the return from the Babylonian exile. There is, therefore, no doubt that Jewish monotheism was preceded by a period of idolatry; the only problem is that which concerns the nature of the cults (comp. the articles ADAMMELECH; ANAMMELECH; ASHERAH; ASS-WORSHIP; ASTARTE WORSHIP AMONG THE HEBREWS; ATARGATIS; BA'AL AND BA'AL-WORSHIP; BAAL-PEOR; BAAL-ZEBUB; BAAL-ZEPHON; BAMAHA; CALF, GOLDEN; CALF-WORSHIP; CHEMOSH; DAGON; HIGH PLACE; MOLOCH; STAR-WORSHIP; STONE AND STONE-WORSHIP; TAMMUZ; TERAPHIM; and WITCHCRAFT).

**I. Biblical Data:** The narratives in Genesis presuppose monotheism as the original religion. After its decline Abraham was called to spread the true knowledge of God (Gen. xii.; Josh. xxiv.), but the prophetic books still reflect the struggle against idols and idolatry. Even Jeremiah, who lived to see the end of the Jewish state,

complains: "According to the number of thy cities are thy gods, O Judah" (ii. 28). The various terms, sometimes expressive of scorn and disdain, which were applied to idols and idolatry are indicative of the wide diffusion of polytheistic cults and of the horror with which they filled the Biblical writers. Thus idols are stigmatized "non-God" (Deut. xxxii. 17, 21; Jer. ii. 11), "things of naught" (Lev. xix. 4 *et passim*), "vanity" (הבל, Deut. xxxii. 21 *et passim*; frequently in Jer.), "iniquity" (און, I Sam. xv. 23 *et passim*), "wind and confusion" (Isa. xli. 29), "the dead" (Ps. cvi. 28), "carcasses" (Lev. xxvi. 30; Jer. xvi. 18), "a lie" (Isa. xli. 20 *et passim*), and similar epithets. They are made of gold, silver, wood, and stone, and are graven images, unshapen clods, and, being the work of men's hands, unable to speak, see, hear, smell, eat, grasp, or feel, and powerless either to injure or to benefit (Scholz, "Götzendienst und Zauberesen," pp. 45 *et seq.*).

Idols were either designated in Hebrew by a term of general significance, or were named according to their material or the manner in which they were made. They were placed upon pedestals, and fastened with chains of silver or nails of iron lest they should fall over or be carried off (Isa. xl. 19, xli. 7; Jer. x. 14; Wisdom xiii. 15), and they were also clothed and

colored (Jer. x. 9; Ezek. xvi. 18; Wisdom xv. 4). At first the gods and their images were conceived of as identical; but in later times a distinction was drawn between the god and the image. Nevertheless it was customary to take away the gods of the vanquished (Isa. x. 10 *et seq.*, xxxvi. 19, xlvi. 1; Jer. xlvi. 7, xlix. 3; Hosea x. 5; Dan. xi. 8), and a similar custom is frequently mentioned in the cuneiform texts.

Temples, altars, and statues were erected to the gods, and figures of oxen and of other animals are also mentioned (Ezek. viii. 10 *et seq.*). In Israel the

worship of high places was a favorite  
**Forms of** form of polytheistic cult, as is shown  
**Idol-** by the Book of Kings, where the reign  
**Worship.** of each monarch is judged chiefly from

the standpoint of his participation in the worship of idols, so that the words "but the high places were not removed" form a stereotyped phrase. Prayer was offered to the gods (Ex. xx. 5, xxiii. 24, *et passim*), the hands were stretched out to them (Ps. xli. 21 [A. V. 20]), they were invoked by name (I Kings xviii. *et seq.*, xxiv.), their names were praised (Josh. xxiii. 7), knees were bent before them (I Kings xix. 18), incense was burned in their honor (I Kings xi. 8 *et passim*), they were invoked in the taking of oaths, and sacrifices were immolated to them (Jer. vii. 18; Ex. xxxiv. 15), the victims including even human beings, such as the offerings made to Moloch. The custom of worshiping stars and idols by throwing kisses to them is mentioned in Job xxxi. 13. The exchange of clothes, by which men put on women's clothes and women donned men's garments, was an idolatrous custom, and was consequently forbidden (Deut. xxii. 5). Human hair also served as a sacrifice, and the prohibition against shaving the head or having writing burned into one's body (Lev. xix. 18, 27; xxi. 5; comp. Jer. ix. 26, xxv. 23, xlix. 82) was recognized by the Talmud (Mak. iii. 6) and by Maimonides ("Moreh," iii. 37; "Yad," 'Ab. Zarah xii. 5) as connected with idol-worship. There were, moreover, many other forms of worship, and numerous commandments of the Pentateuch, even though they omit the term "abomination" as a synonym of idolatry, refer to polytheistic worship; for idolatry was deeply rooted in the national character, as is shown by the many proper names compounded with names of idols, so that it became necessary to make every effort for its eradication.

**II. Post-Biblical Period:** It is generally supposed that idolatry was completely crushed in Israel after the return from the Exile. This assertion is somewhat exaggerated, however, as is evident from the continual warnings against idols and idolatry both in the Apocrypha (Kautzsch, "Apokryphen,"

Index, *s.v.* "Götzen") and in Jewish tradition. The Talmud has a special treatise on idolatry (see 'ABODAH ZARAH), and also discusses the subject elsewhere in many passages, so that its data concerning this matter would

fill a volume. The gods of the Greco-Roman epoch, especially those of the Oriental world, appear in its pages in variegated profusion. "If one wished to write all the names of idols, all the skins [parchment scrolls] would be insufficient" (Sifre, Deut. 43). The monotheism of the masses, it is true, was

not endangered, for when it was threatened by the Syrians and Romans, the Jews revolted, refusing to permit Roman troops to enter their territory with flags; they even detected idols in the portraits of the Cæsars stamped on coins, and this was not unjustifiable, in view of the divine worship paid the emperors (see ZEALOTS). Despite this fear of idols and images, the danger of inroads among the Jews by idolatrous customs and usages, which permeated the whole ancient world around them, was so great that the scholars could not invent too many "fences." They accordingly aimed at making intimate association with the heathen impossible, and thereby succeeded in protecting the Jewish people from the evil which threatened them.

The ancient world regarded the Jews as atheists because of their refusal to worship visible gods. "Whosoever denies idols is called a Jew" (Meg. 13a, b). To statements such as this the Jew responded: "Whosoever recognizes idols has denied the entire Torah; and whosoever denies idols has recognized the entire Torah" (Sifre, Deut. 54 and parallel passages). "As soon as one departs from the words of the Torah, it is as though he attached himself to the worship of idols" (Sifre, Num. 43).

Although the Jews were forbidden in general to mock at anything holy, it was a merit to deride idols (Meg. 25b), and Akiba decreed that the

**Attitude** of names of the gods be changed into derogatory names (Sifre, Deut. 61, end, **Jews** *et passim*). Thus, Baal-zebul (II Kings

**Idolatry.** i. 2, 6) is called Beel-zebul (בעל זבול = "dominus stercoris") in Matt. xii.

24, 27, and elsewhere, and the word with which the Talmud designates sacrifice to idols (זבול) Yer. Ber. 13b) literally means "to manure." The Hellenistic Jews also observed this custom, so that they applied the term *ειδωλόθυτος* to what the Gentiles called *ερόθυτος* (Deissmann, "Die Hellenisierung des Semitischen Monotheismus," p. 5, Leipsic, 1903). It was forbidden to look upon images (Tosef., Shab. xvii. 1 [ed. Zuckerman, p. 136] and parallels), and even thinking of idolatrous worship was prohibited (Ber. 12b); if one saw a place where an idol had once stood, he was commanded to utter a special prayer (Ber. 61a). Sacrifice to an idol or anything which in any way might be associated with idolatry was forbidden. It was even insufficient to reduce an idol to powder and scatter it to the winds, since it would fall to earth and become a fertilizer; but the image must be sunk in the Dead Sea, whence it could never emerge ('Ab. Zarah iii. 3); nor might the wood of the "asherah" be used for purposes of healing (Pes. 25a; see MAGIC). Among the three cardinal sins for which the penalty was death, idolatry stood first (Pes. 25a and parallels). "Dust of idolatry" is a technical expression for the prohibition of anything related to idol-worship ("'abodah zarah").

To prevent any possible inducement to idolatry, all association of Jews with Gentiles was rendered difficult. For three days before a Gentile feast-day no Jew might have any commercial dealings with the idolaters ('Ab. Zarah i. 1), and it was forbidden to attend the fairs connected with such festivals, or even to go on a road which led to the image of a deity, or

to arrange a meeting in the vicinity of such a statue. No cattle might be housed in the stalls ('Ab. Zarah ii. 1). The Jews were driven to this intolerance partly through the wickedness and immorality of the Gentiles.

**III. Post-Talmudic Period:** In the century between the return from the Exile and the termination of the Babylonian Talmud, the Jews were thoroughly weaned from all belief in idols, although superstition itself can never be wholly eradicated.

Through mysticism and magic many **Survivals of Idol-worship.** polytheistic ideas and customs again found their way among the people, and the Talmud confirms the fact that idolatrous worship is seductive (Sanh.

102h). The fight for a pure belief in one God and worship of Him was waged by the religious philosophers, while the authorities on rabbinical law strove for purity of worship. Philosophy and law were united by Maimonides, who in his philosophical "Moreh Nebukim" and in his legal "Yad ha-Hazakah" devoted separate sections to idolatry and thoroughly exposed its teachings. The Shulhan 'Aruk, Yoreh De'ah, also has a separate section on idolatry.

**BIBLIOGRAPHY:** See, in general, works on the history of Israel and on Biblical theology. Special works of this nature are: Baudissin, *Studien zur Semitischen Religionsgeschichte*, i.-ii., Leipsic, 1876-78; Dillmann, *Alttestamentliche Theologie*, ib. 1895; Hastings, *Dict. K.

L. B.

**WREATH:** Garland placed on the head as a token of honor. The wealthy bridegroom and bride, on the day of their nuptials, were ornamented with crowns of precious metal and jewels, while the poor adorned themselves with twisted bands of roses, myrtles, and olive-leaves. The Mishnah mentions wreaths made from vine-branches and from ears of corn ('Ab. Zarah iv. 2). When Jerusalem was besieged the Rabbis forbade the wearing of crowns, but permitted wreaths of flowers (Soṭah 49a, b). R. Jeremiah as a groom wore a wreath of olive-leaves, while Samuel regarded the prohibition as including wreaths also, as a sign of mourning for the destruction of Jerusalem (Yer. Soṭah ix. 15). When Rabina discovered Mar bar R. Ashi in the act of twisting a wreath for his daughter, Ashi claimed that women were exempted from the prohibition (Giṭ. 7a).

The first-fruit offerings were tastefully arranged, and the ox which the people took to Jerusalem for a sacrifice was crowned with a wreath of olive-leaves on its horns (Bik. iii. 3). A scholar, on being ordained, was garlanded with a wreath known as "the crown of the ḥakam" ('Er. 53b; Tan., Ki Teze, 6). In Talmudic times the cup of wine for grace was decorated with a wreath (Kohut, "Aruch Completum," vi. 189). The "vine" referred to in Gen. xl. 10 is sym-

bolic of Israel, and the "three branches," or wreaths, represent the Temple, the king, and the high priest (Hul. 92a). See CROWN.

J. D. E.

**WRESCHEN:** A town in Posen, Germany, three miles from the Russian frontier. Its Jewish community formerly ranked among the largest of southern Prussia, and is mentioned as one of the congregations which suffered severely during the persecutions of the years 1648-51. Unluckily, however, all the early documents were destroyed in the conflagration of 1873, in which the synagogue, a beautiful old wooden building, also was burned. The gravestones of the ancient cemetery, which has been closed for about forty years, afford no historical data, since the great majority of the older inscriptions have been obliterated.

Among the members of the community special mention may be made of Rabbi Zebi Hirsch b. Aaron Mirels, Rabbi Aaron Mirels (Kaufmann, "Die Letzte Vertreibung der Juden aus Wien und Niederösterreich," pp. 79 *et seq.*, Vienna, 1889), and the Bible commentator Rabbi Meir Löb Malbim. Zebi Mirels, who was called also Hirsch Aaron London, was the author of the "Mispar Zeba'am," and presented a Hebrew hymn to General Möllendorf when the latter was sent by the Prussian king Frederick William II. to receive the allegiance of the new province of southern Prussia ("Das Jahr 1793," p. 16, note, Posen, 1895). Rabbi Aaron Mirels, the author of the "Bet Aharon," is buried in the cemetery at Hirschberg in Silesia. In Wreschen, Malbim wrote his first work, the collection of annotations on the first chapters of the Shulhan 'Aruk, Oraḥ Hayyim, which laid the foundation of his renown as a scholar. In Wreschen, moreover, the musical director Louis Lewandowski was born April 3, 1821.

The population of Wreschen now (1905) numbers 5,435, of whom 490 are Jews. The present rabbi is Dr. M. Lewin. The community has a religious school and a public school, the former having an attendance of forty and the latter of thirty-five.

**WRITING.** See ALPHABET; MANUSCRIPTS; SCRIBES; SCROLL OF THE LAW.

**WRITTEN INSTRUMENTS.** See DEED; SHETAR.

**WUNDERBAR, REUBEN JOSEPH:** Russian pedagogne and author; born at Mitau Sept. 12, 1812; died there Aug. 16, 1868. He received the usual Jewish education under a private teacher, and at the age of eighteen entered his father's business. In 1834 he married, and, having lost his fortune, supported himself as a private tutor. At the beginning of the colonization movement inaugurated by Czar Nicholas (see JEW. ENCYC. i. 252), Wunderbar wrote an address to the colonists who went from Courland to Kherson ("Betrachtungen über die aus Kurland nach dem Cherson'schen Gouvernement Auswandernden Israelitischen Kolonisten-Familien," Mitau, 1840); this address attracted the attention of Max LILIENTHAL, who appointed him teacher at the Riga school under his management. After Lilien-

thal had been called to St. Petersburg, Wunderbar acted temporarily as principal of the school and as rabbi. In 1848 he was called to Mitau as teacher of religion and as Hebrew interpreter to the government, acting occasionally as rabbi also; this position he held until his death.

In addition to various pamphlets and sermons, as well as articles contributed to the "Orient" and to the "Allgemeine Zeitung des Judentums," Wunderbar was the author of the following works: "Biblich-Talmudische Medizin" (3 vols., Riga and Leipsic, 1850-60); "Geschichte der Juden in der Provinz Liv- und Kurland" (Mitau, 1853); and "Immerwährender Kalender der Juden" (Dessau, 1854). A bibliography of his earlier writings is given in his history of the Jews in Livonia and Courland.

**WÜNSCHE, AUGUST:** German Christian Hebraist; born at Hainewalde July 22, 1839. He has devoted his attention almost exclusively to rabbinic literature. After completing his commentaries on Hosea (1868) and Joel (1872), he wrote "Neue Beiträge zur Erläuterung der Evangelien aus Talmud und Midrasch" (1878), the most complete collection of the parallel passages of the Talmud and the New Testament since the works of Lightfoot and Schöttgen. In his "Bibliotheca Rabbinica" (Leipsic, 1880-85) he made a German translation of the whole of the Midrash Rabbah and the Midrash to the Five Megillot, and he has also translated haggadic portions of the Jerusalem Talmud (1880) and of the Babylonian Talmud (1886-89), as well as the Pesikta (1885) and the Midrash to the Psalms (1891). Smaller works of his are: "Die Rätselweisheit bei den Hebräern" (1883); "Die Freude im Alten Testament" (1896); "Naturbildersprache des Alten Testaments" (1897); and "Die Schönheit der Bibel" (Leipsic, 1905). Together with Winter he compiled the "Geschichte der Jüdischen Litteratur" (3 vols., Leipsic, 1892-95), the best existing anthology of Jewish literature in a modern language.

**WÜRTEMBERG:** Kingdom of southwestern Germany. The earliest traces of Jews in this country are found in Bopfingen (1241), Ulm (1243), Esslingen (1253), Oehringen (1253), Calw (1284), and Weil (1289); and their numbers, as well as the places where they lived, may be ascertained by investigating the persecutions to which they were subjected by Rindfleisch and his followers (1298). Albrecht I. of Austria had been chosen King of Germany, and Ulrich I. and Eberhard I. were ruling

**Distribu-** in Würtemberg, when RINDFLEISCH  
**tion and** and his wild hordes attacked the Jews  
**Per-** in Creglingen, Ellwangen, Forchten-  
**secution.** berg, Gartach, Göglingen, Ingelfin-  
gen, Künzelsau, Leonberg, Mockmühl,  
Mergentheim, Stetten, Sindringen, Sontheim, Walden-  
burg, Weinsberg, Widdern, and Weikersheim. In the large community of Heilbronn alone there were 200 martyrs, among them Johanan ben Eliakim, the rabbi, and R. Asher, the president of the community. There was at that time a large community also in Ulm, which had its own cemetery,

and which enjoyed certain privileges granted it by a municipal law of 1274, this law being in force in Ravensburg also. In the fourteenth century there were Jews also in Baldern, Geislingen, Göppingen, Schwäbisch Hall, Rohrbach, Hoheburg, Horb, Reutlingen, Rottweil, Stuttgart, Sulm, Tübingen, Vaihingen, and Wolfegg. The counts of Württemberg owed money to the Jews of Colmar and Schlettstadt, but Louis IV. canceled their indebtedness (1346), as had also Henry VII. and Louis the Bavarian (1311 and 1316) in the case of the citizens of Esslingen.

During the night of April 19, 1316, the Bavarian party of Ulm succeeded in introducing Bavarian troops into the city, aided, as alleged, by a Jew. In the same night, however, the Austrian party, which was in the majority, appeared and drove out the Bavarians. In commemoration of this event a mass was instituted to recall the treachery of the Jews; but this was abolished in 1322, when the Bavarians gained possession of Ulm. New persecutions soon broke out, however, the Jews being charged with being enemies of the Christians, and with stealing and desecrating the host. The community of Esslingen was almost annihilated in 1334; and two years later the Jews in Hohenburg, Landenbach, Mergentheim, Weikersheim, and Widdern were persecuted. The situation became still worse toward the end of 1348, when the plague and fanaticism combined brought destruction upon the Jewish communities of Baldern, Bopfingen, Ellwangen, Esslingen, Göppingen, Geislingen, Schwäbisch Hall, Heilbronn, Hohebach, Horb, Krailsheim, Mengen, Mergentheim, Nagold, Oehringen, Ravensburg, Reutlingen, Rottweil, Stuttgart, Sulgen, Sulm, Ulm, Vaihingen, Waldenburg, Weilderstadt, and Widdern.

For the protection afforded them the Jews of Ulm had to pay large sums to the municipal council, to the citizens, and to the counts of Helfenstein. The plunder taken from the Jews became a bone of contention among the cities, the emperor, and the counts; and their disputes led to renewed despoliations of the Jews. As the latter still

**Ulm.** found advocates, some counts and rulers united against them; and when the emperor's demand for a share of the plunder was unheeded, he made war against the cities, confiscated their possessions, and compelled them to pay high taxes. The city of Ulm being unable to raise the exorbitant sums demanded, the Jews came forward to aid it in its distress (1374), chief among them being Säcklin, son-in-law of Moses of Ehlingen, who was a citizen of Ulm. In order to exact money from the few wealthy Jews still residing in the city, the emperor declared them to be under the ban, and they had to pay large sums to have the edict revoked. In 1385 the federation of cities declared void all promissory notes held by the Jews within its jurisdiction; and in some cases it released the Christian debtors from paying interest on their loans, while in other cases it annulled part of the debt. Two years later the federation issued a decree that no German or Italian merchant might thenceforth have money transactions with the Jews. Emperor Wenceslaus, following the example of the federation, canceled in 1390 all the debts owing to the Jews, demanding,

however, that the debtors pay him. All these measures were explained and justified on the grounds that the Jews were body and soul the property of the emperor, with which he could do as he pleased, and that the usury of the Jews had become intolerable. In spite of this, the counts of Württemberg permitted the Jews to reside in Stuttgart (1434), Kirchheim (1435), Tübingen (1459), Cannstadt, and Göppingen (1462), on definitely stated conditions, and on payment of large taxes for protection. Count Ulrich (1433-80) was commissioned by the emperor to protect the Jews, and at the same time rigorously to suppress their usury; the fines imposed were to be sent to the imperial treasury. Thus money flowed into the coffers of the count and of the emperor.

Count Eberhard im Bart (1459-96) was a pronounced enemy of the Jews. He removed them from Tübingen in 1477; and in 1495 he decreed that they should be expelled from his dominions. This order was confirmed by decree of June

**Expulsion, 14, 1498; and the Jews of Ulm, who 1498.**

were wealthy and well educated, had to leave the city on Aug. 6 of that year. The exiles were deprived of their property; and the emperor demanded that the people of Ulm should mention him in their prayers because he had delivered them of the Jews.

The fifteenth century was ominous also for the Jews of Ravensburg. A blood accusation brought against them induced Emperor Sigismund to burn some of the Jews of that city, and to expel others. The Jews were expelled from Esslingen in 1438; but ten years later they were again admitted, only to be expelled a second time in 1490. From Heilbronn, where Jews had settled anew in 1414, a number of them were expelled in 1469; and seven years later the city council insisted on a general expulsion, notwithstanding the imperial order to protect the Jews. The Jews expelled from the cities scattered among the villages; but in many cases they returned to the urban communities. Thus, there were Jews in Gmünd and Reutlingen in 1433; in Braekenheim, 1434; in Nersheim, 1454; in Giengen, 1486; and in Lauterburg, Pflaumloeh, and Uzmemmingen, 1491. Between the end of the fifteenth century and 1806 no Jews settled in Ulm; individual Jews were permitted to enter the city only temporarily, and the citizens were warned against having any business transactions with them. When Württemberg became a dukedom, the treatment of the Jews remained on the whole the same; all money transactions with them were forbidden. These ordinances were frequently renewed and enforced; not even JOSEF OF ROSHEIM, the great advocate of the Jews, was permitted to travel through the country. Strict ordinances were issued regarding the commercial and religious status of the Jews (1536). Jews traveling through the country were subjected to many annoyances, and no attention was paid to the repeated imperial edicts for their protection. Josef of Rosheim had succeeded in regulating by a compact the convoy charges of traveling Jews; but Duke Christoph, from whom he had obtained this agreement, was so inimical to the Jews that in the Reichstag of Augsburg in 1559 he advocated their expulsion from Germany. Frederick I. (1593-1608) tried in the face of the most violent op-

position to establish a Jewish mercantile association under the direction of Maggino Gabrieli and a Jewish magician, Abraham Calorno; the attempt, however, was an absolute failure.

During the reign of Eberhard Ludwig (1677-1733) a favorable change of attitude toward the Jews took place; and they were now permitted to frequent the fairs (1706) and to trade in horses (1707). The Countess of Würben procured the privilege of free trade for the Jews of Freudenthal (1728) and for those of Gochsheim (1729). Under Carl Alexander (1733-37), Joseph Süß OPPENHEIMER was appointed privy factor, and subsequently financial

**Joseph Süß Oppenheimer.** his influence several Jews were permitted to settle at Stuttgart and Ludwigsburg. Oppenheimer's subservien-  
cy to the duke brought upon him the enmity of the people, and after his master's death (1737) he fell into disgrace. He was executed in 1738, and in the following year all the Jews were mercilessly expelled. They were soon permitted to return, but they were severely restricted in the exercise of their religion, as well as in their business; and the people were warned against having any dealings with them in monetary affairs. Court factors were treated more leniently, and important government contracts were given to them (1759, 1761, 1764) in spite of the objections of the populace. Karl Eugen, as also his successors, Ludwig (1793-1795) and Friedrich (1795-97), treated the Jews considerately. These rulers were the last of the line of Catholic dukes; and under the succeeding Protestant régime a new era dawned for the Jews of Württemberg.

With the nineteenth century the whole country received an entirely new political constitution. It was not only made a kingdom, but considerable territory was added to it (1806); and its Jewish population increased until in 1828 it numbered 8,918 souls. King Frederick I. (1797-1816) took the first steps toward the emancipation of the Jews. He annulled the body-tax and admitted the Jews into the army (1807); instituted family registers; included the Jews in the general taxation (1808); opened up to them all trades; and regulated the organization and

**Emancipation.** government of their communities. The Jews so treated showed themselves loyal citizens during the Napoleonic wars.

The work of ameliorating the condition of the Jews was continued by William I. (1816-64), and completed under Charles I. in 1869. King William instituted the Israelitische Oberkirchenbehörde; and, by a law enacted in 1828, he regulated the constitution of the Jewish communities, and made it obligatory upon Jewish parents to let their children receive a common-school education as provided by the general school-law of 1825. In the work of purifying the worship from the neglect and irregularities that had crept in, Dr. Maier, as theological member of the Oberkirchenbehörde, was most active. His aim was to eliminate completely all non-German elements, and to approach as closely as possible to the culture of the time, maintaining the idea of Jewish unity and morality, while abandoning the specifically Jewish laws of exclusion. Similar ideas actuated his succes-

or, Church Councilor Dr. von Wassermann (1872-1893). Most of the communities in the northern part of the country clung, however, to the Hebrew language and to the Biblical and Talmudic rules of life; and at present the majority of the Jewish children are instructed in Hebrew, while the form of worship has remained almost unchanged.

According to the census of 1900, the Jews in the kingdom of Württemberg numbered 11,016 in a total population of 2,169,480. They thus constitute

0.54 per cent of the population, distributed among the four districts of the country as follows: (1) **Neckar Forest**, 1,296, or 0.25 per cent; **Jagst**, 2,990, or 0.74 per cent; and **Danube**, 2,086, or 0.40 per cent, of the total population. The Neckar district is divided into five rabbinates, the seat of which is in Stuttgart; the Black Forest district constitutes one rabbinat, the seat of which is in Mühringen; the Jagst district embraces the rabbinates of Heilbronn, Oberdorf, Mergentheim, Braunsbach, and Weikersheim; and the Danube district, the rabbinates of Göppingen, Laupheim, Buchau, and Ulm, making a total of fifteen rabbinates for the kingdom. Laws and decrees regulating the communal affairs were issued as follows: April 25, 1828; Oct. 27, 1831; Jan. 31, 1834 (rabbinical examinations); 1838 (rituals); 1841 (duties of rabbis and choir-leaders); March 25, 1851; March 26, 1873; Feb. 22, 1875; and Feb. 18 and April 24, 1876 (taxation); Aug. 5, 1875; and April 23, 1900 (pensioning of rabbis); and July 8, 1878; and March 25, 1900 (qualifications of choir-leaders).

According to the school statistics of 1900-1, the thirteen rabbinates had under their care 61 school districts, with 1,757 Jewish pupils, of whom 1,523 (736 boys and 787 girls) were under

**Statistics.** fourteen, and 234 (92 boys and 142 girls) more than fourteen, years of age. They are instructed in part in twenty-seven Jewish parochial schools, receiving their specifically religious instruction in thirty-one religious schools. In some places the religious instruction is given also in evening-schools and Sunday-schools. All but 140 children receive religious instruction. According to the statistics of the penal institutions of the country for 1900-1, fourteen Jews were sentenced in the course of the year, ten of whom were of Württemberg. The criminal status of the entire population of 2,169,480 is 0.089 per cent; that of the Jews, 0.083 per cent.

There are in Württemberg the following Jewish philanthropic institutions: the orphan asylum Wilhelmspflege at Esslingen; the Society for the Relief of Teachers, Widows, and Orphans; and the District Asylum and Relief Society. Since 1896 the rabbis of the country, as well as the Jewish teachers and choir-leaders, have been holding yearly conventions in Stuttgart. Among the most noteworthy synagogues are those at Stuttgart, Heilbronn, Ulm, Buchau, and Unterdeufstetten. There are very old cemeteries at Aufhausen, Oberdorf, Esslingen, Affaltrach, Unterbalbach, Neckarsulm, Wankheim, and Laibach. The Israelitische Oberkirchenbehörde, which is under the immediate su-

pervision of the ministry for ecclesiastical and educational affairs, regulates the affairs of all the Jewish communities of the country. This body is composed of a Jewish theologian, a Jewish lawyer, and four Jewish associates, with a Christian ministerial counselor at their head. In all communities there are institutions for the instruction of adults, as well as burial societies, dispensaries, and societies for the relief of the resident and traveling poor. Stuttgart and Hall have societies for the promotion of a knowledge of rabbinical literature. The ancient ritual is observed in most of the communities, though some innovations have been introduced in Stuttgart, Heilbronn, Ulm, and Göppingen. See also HEILBRONN; STUTTGART; ULM.

**WÜRZBURG**: Capital of Lower Franconia, Bavaria, Germany. It ranked as a city in 741, and had a Jewish community as early as the eleventh century, although the first documentary evidence of the existence of Jews in the town is dated in 1119. The Crusade of 1147 brought much suffering on the Jews, and they were also persecuted in 1298, and again in 1349, when in their synagogue the men, together with their wives and children, met a voluntary death in the flames. Bishop Julius continued the work begun by Bishop Friedrich, who had expelled the Jews of Würzburg in 1565, and banished the community from the city. The cemetery was, accordingly, no longer used, and Bishop Julius confiscated it by illegal means, even ignoring the emperor's admonition to treat the Jews with justice.

After the expulsion from Würzburg the Jewish community of the neighboring town of Heidingsfeld flourished greatly, and to it were transferred the rabbinical office of Würzburg and the Jewish court. The rabbinical office of Würzburg has always been held by prominent men, including Eliezer ben Nathan, Isaac Or Zarua', Meir of Rothenburg, Israel Koppel Fränkel and his son Samson Fränkel, Jacob of Reckendorf, Aryeh Löb Rapoport, and Levin Fahrenbach. Under Fahrenbach's successor the Jews were again permitted to settle in Würzburg; and Rabbi Abraham Bing, who was appointed chief rabbi of Franconia in 1798, took up his residence in the city. When Bing retired from active service in 1839 the chief rabbinate was abolished, and a district rabbinate was created in its place. The first district rabbi of Würzburg was Seligmann Baer BAMBERGER, who died in 1878 and was succeeded by his son Nathan Bamberger. Seligmann Baer Bamberger founded various important institutions, including a Jewish school, a teachers' seminary, and a yeshibah. He also originated the movement for the establishment of a Jewish hospital.

Würzburg has numerous societies which support all forms of Jewish activity, among them being four associations for the promotion of the study of the Torah. The Jews of Würzburg number 4,000 out of a total population of 90,000, and constitute one of the most important communities in Bavaria.

**WÜRZBURGER, JULIUS**: American journalist; born in Bayreuth, Germany, 1819; died in New York city Sept. 14, 1876; studied at the University of Erlangen. In 1848, the year of the revolution, he was editor of the "Bayreuth Tageblatt." Removing to Munich, his liberal views and writings attracted the attention of the government; and in 1849 he was banished from Bavaria. He went to Italy and France, where he acted as correspondent, and finally emigrated to America, where he became connected with the "New-Yorker Staats-Zeitung" (1856-75), editing its Sunday supplement with marked ability and success.

A. S. I.

**WYSBER, LUDWIG**: Hungarian journalist and author; born 1817. Originally a street pedler in Pesth, he obtained employment as a chorus singer in the German theater of that city, and afterward held minor positions on several local newspapers. At the outbreak of the March Movement in 1848, he obtained permission to publish "Der Patriot," while Julian Chownitz, or Chowanetz, a Jew who had been active as a revolutionist, was given permission to publish "Die Opposition." These two journals represented Kossuth's party, and acquired considerable influence. Between 1850 and 1870 Wysber appears to have been guilty of numerous speculations among the merchants and clergy of Hungary, extending his operations even to Vienna. He employed various aliases, as "Arthur von Alaven," "Jonas Földváry," and "Wysbersi"; and warrants were issued for his arrest. He was the author of "Lebensbilder aus Ungarn," mentioned in Von Helfert's "Geschichte Oesterreichs vom Ausgange des Wiener October Aufstandes 1848" (Prague, 1876; Appendix, p. 135, note 311).

**XABILLO.** See **HABILLO.**

**XANTEN:** Town of Rhenish Prussia, in the district of Düsseldorf. Like most Rhenish towns, Xanten had a Jewish community in early medieval times. Two massacres of Jews occurred during the First Crusade (June 1 and 27, 1096). On the latter occasion some Jews committed suicide in order to escape the fury of the Crusaders (Aronius, "Regesten," p. 89, No. 188; p. 92, No. 195). In 1187 the martyrs of Neuss were brought to Xanten to be buried by the side of those martyred in 1096 (*ib.* p. 144, No. 322).

In the latter part of the nineteenth century the attention of the Jewish world was attracted to the small congregation of Xanten by a blood accusation. On June 29, 1891, John Hegemann, the five-year-old son of a local cabinetmaker, was found dead in a neighbor's barn, with his throat cut from ear to

ear. Anti-Semitic agitation connected the Jewish butcher and former shoemaker Adolf Buschoff with this crime; and

the local priest Bresser lent support to this rumor by publishing articles on ritual murder in the "Bote für Stadt und Land," of which he was the editor. The agitation in the anti-Semitic press, as well as at anti-Semitic meetings, where it was insinuated that the Jews had bribed or intimidated the authorities in order to prevent the discovery of the truth, compelled the government to arrest Buschoff and his family (Oct. 14, 1891). The evidence against the man, who had always borne a good reputation, was so flimsy, however, that he was discharged (Dec. 20). This action aroused the anti-Semites to still stronger agitation, which culminated in a heated debate in the Prussian Diet; in the course of this argument Stoecker, the ex-court chaplain, cleverly repeated the accusation of ritual murder, and hinted at Jewish influence as the cause of the failure to find the murderer (Feb. 7, 1892). Under pressure of this agitation Buschoff was rearrested (Feb. 8), and tried before a jury at Cleve (July 4-14, 1892). During this trial it was found that the accusations were based on mere hearsay, and contained absolutely impossible assertions. The prosecuting attorney himself moved for the dismissal of the charge, and the jury rendered its verdict accordingly. The real murderer was never discovered, and the possibility that the death of the child was due to an accident was not entirely disproved. The agitation had the effect of reducing the Jewish population of the city, and Buschoff himself had to leave. At present (1905) Xanten has about thirty Jews in a total population of 3,770.

**XERES (JEREZ) DE LA FRONTERA:**

City in the Spanish province of Cadiz. It had a Jewish community with a separate Juderia as early as the time of the Moors. When Alfonso X, the Wise, conquered the city in Oct., 1264, he assigned houses and lands to the Jews. The Juderia, which was located near S. Cristobal street and extended along the city wall, included ninety-six houses, large and small, and had two synagogues and two "casas de la merced," institutions for aiding and housing the poor. Near one synagogue were the "casas del reab" (houses of the rabbi); Don Todros, father of Don Yuçaff, is mentioned as being the occupant in 1264. Near the other synagogue was the house of Rabbi Yuçaff. Upon the conquest of the city the following persons received houses by command of the king: Don Yeluda Mosca (as he is several times expressly called in the list drawn up in 1338), who made translations from Arabic into Spanish for the king; the "almoxarife" Don Mayr, or rather Mür de Malhea, and his son Çag (Isaac); Çimba (Simhah) Xtaruçi, whose father lost his life and the whole of his large fortune during the rebellion of the city; Don Vellocid (Vellecid), "ballestero del rey a caballo"; Solomon Ballestero; and Axucuri Ballestero—the last three being in the king's army.

Among the richest and most influential Jews in Jerez were the following: Çag aben Açot, who was the representative of the community at the repartition of the taxes in 1290, and his relatives Judah aben Açot, Bonet aben Açot, Abraham aben Açot; likewise Samuel de Cadiz, Jacob Castellano, Çag aben Colmiel or Calamiel, Samuel Barracli, Levi de Faro, Abraham Saltos, Vellido de Castro, and Abraham de Carrion. The Jews of Jerez engaged in business. One Yuçaff Alcaçabi, who had laid in large quantities of salt pork in his houses and lost everything he possessed, because he had favored the Moors, did not receive the house which had first been assigned him. The Jews engaged in viticulture also, Jerez wine being the most valued wine of Spain. There were also tailors (Cedillo Alfayate is mentioned), rope-makers (Çag el Cordonnero), and shoemakers among them. The Jerez Jews, who in 1294 paid King D. Sancho IV. 5,000 maravedis in taxes, were freed by the king from the payment of tolls throughout the kingdom, and were assured of the same favor as was enjoyed by Christians and other inhabitants of the city—a privilege which was confirmed by Kings Fernando IV. and Alfonso XI. (Dec. 30, 1332).

In the second half of the fifteenth century the Jews of Jerez suffered from the enmity of the Christian population. In 1459 the city council gave a portion of the Jewish cemetery to a Christian inhabitant; and in spite of the protests of Joseph de Paredes and Samuel Corcos, who represented the Israelite community, and regardless of their appeal to a decree of May 25, 1455, issued by King Henry IV.,

according to which the synagogues and Jewish cemeteries were not in any way to be violated, the council in March, 1460, granted another portion of the cemetery to a Christian who desired to build a house upon it. At the same time the following incident, related by Abraham Arama, took place in Jerez: Certain monks who appealed to a rich Jew for alms and received blows instead, desired to avenge themselves on the whole community. They accordingly exhumed the body of a baptized Jew that had been buried in the Christian cemetery, and took it to the Jewish burial-ground, hoping to create the impression that the act had been committed by the Jews. The affair came before the duke or the governor, who wished to have the king's opinion on the subject and to keep all the Jews in the city under arrest until the king's decision should arrive. The influential Judah ibn Verga of Seville exerted himself in behalf of the terrified Jews; and as the innocence of those who had been slandered was soon proved, two of the monks were burned at the stake, while the others, at the intercession of the people, were banished for life. See SPAIN.

**XERXES:** Son of Darius, King of Persia (485-465 B.C.). His name, which is Khshayarsha in Persian, Ikshiyarshu (with variants) in Babylonian, and Ξέρξης in Greek, frequently occurs in the Old Testament. It is often written with *y* instead of *x*, as in the Masoretic text, where it is spelled אַחַשְׁוֵרֶשׁ (Ahashwerôsh) instead of אַחַשְׁיָרֶשׁ (Ahashyarsh), with the prothetic vowel indispensable in Semitic before initial double consonants. Xerxes is mentioned in the Book of Ezra (iv. 6) in connection with a complaint lodged against the Jews by the Samaritans (comp. Meyer, "Entstehung des Judenthums," pp. 16 *et seq.*). He is the "king" of the Esther romance, and in the Book of Daniel (ix. 1) he is mentioned as the father of Darius, "of the seed of the Medes."

E. ME.

**XIMENES DE CISNEROS:** Spanish priest, statesman, regent, and grand inquisitor; born 1436; died 1517. He studied in Rome, and upon his return to Spain was appointed confessor to Queen Isabella of Castile. In 1507 the pope invested him with the dignity of a cardinal, and at the same time he was appointed grand inquisitor, being the third to hold that office in Spain. Two years later he accoutered an army at his own expense, and invaded North Africa in order to forcibly introduce Christianity. It is said that he succeeded in conquering the city of Oran by employing some Jewish spies. Upon his return to Spain he founded the University of Alcalá de Henares, with the establishment of which is connected the publication of the first polyglot Bible. Ximenes was dismissed from the government service by Charles V. in 1517.

During the beginning of his incumbency as grand inquisitor, De Cisneros was less severe than his predecessors, Torquemada and Diaz. When, however, Charles V., in accordance with the advice of his Flemish councilors, began negotiating with the Ma-

ranos, offering them religious liberty on payment of 800,000 gulden (gold), the grand inquisitor proceeded mercilessly against both Maranos and Jews; and 2,500 persons were given over to autos da fé during his inquisitorship.

When the University of Alcalá de Henares was founded, Ximenes commenced the work of compiling the polyglot Bible, which was completed in 1517, and published in Alcalá under the title "Biblia Hebraica, Chaldaica, Græca et Latina." Volume iv. of this work was supplied with a Hebrew grammar, "Introductio Artis Grammaticæ Hebraicæ," adapted from Reuchlin's grammar; while a glossary entitled "Lexicon Hebraicum et Chaldaicum" was appended to the last volume.

**XIMENES, SIR MORRIS (MOSES):** Born at London about 1762; died there after 1830. He was a member of the London Exchange, where he made a large fortune. In 1802 he was elected a warden of the Bevis Marks Synagogue, but declined to accept; and on being fined he resigned from the community and became converted to Christianity. He appears afterward to have adopted a military career, and was known as Captain Ximenes; he was knighted, and became a high sheriff of the county of Kent.

His son, **Sir David Ximenes**, had no connection with the Jewish community.

**XYSTUS:** A building in Jerusalem, erected, as is shown by the name, in the Hellenistic period, probably under the Herodians. The term properly denotes a covered colonnade in the gymnasia, although the Romans employed the word "xystus" to designate open terraces before the colonnades of their country-houses. That the Xystus of Jerusalem was an open terrace, as Buhl rightly assumes, is clear from the fact that from it Titus conducted his negotiations with the leaders of the Jews while they stood in the upper city, a proceeding which would scarcely have been possible had it been a covered building. The translation "colonnade" is erroneous. It was artificially formed by erecting on the western edge of Mount Moriah a structure supported by pillars, the roof, which was practically level with the Temple area, constituting the Xystus. Similar buildings, also called Xysti, were found in a number of Greek cities, as in Elis.

The site of the Xystus of Jerusalem can be approximately, though not definitely, determined. The first wall on the north, beginning at the so-called tower of Hippicus, extended to the Xystus, then skirted the council-house (*βουλή*),

**Site.** and ended at the western cloister of the Temple (Josephus, "B. J." v. 4,

§ 2). Both the Xystus and the council-house were, therefore, situated within the wall, the former lying to the north and the latter to the south. When Titus negotiated with the Jews concerning their surrender, he stood on the western side of the

outer Temple, facing the upper city, taking this position on account of the gates upon the Xystus, and also being influenced in his choice by the bridge which connected the upper city with the Temple and which lay between the Jewish leaders and himself (*ib.* vi. 6, § 2). The Xystus was, moreover, the scene of an assembly of the people before the outbreak of the rebellion, when Agrippa II. addressed them while his sister Berenice remained in sight of the populace in the house of the Hasmoneans, which overlooked the Xystus (*ib.* ii. 16, § 3). In his account of this conference, Josephus states, curiously enough, that the bridge connected the Temple with the Xystus and not with the upper city. This can be explained only on the assumption that the Xystus, as was natural, lay below Mount Moriah itself, and was, perhaps, separated from the hill by a ravine. A bridge running from the upper city would, therefore, connect the Xystus with Mount Moriah, and this agrees with the assumption that the bridge, like the gates, was constructed "above the Xystus." During the factional strife between Simeon bar Giora and John of Giscala a fortified tower was built on the Xystus (*ib.* iv. 9, § 12), and this edifice later marked the limit set by Titus for the burning of the Temple cloister (*ib.* vi. 3, § 2).

It thus becomes evident that the Xystus formed a portion of the western cloister of the Temple, while the council-house lay to the south, but in the same direction and probably built into the cloister. The Hasmonean palace, raised still higher by Agrippa II. (Josephus, "Ant." xx. 8, § 11), stood opposite, on the western heights of the upper city, which was at that point connected with the Xystus by a bridge. Many investigators regard "Robinson's Arch," which

is still preserved, as an anchorage for this bridge, but the absence of any corresponding structure on the western hill opposite inclines

**Connection** others to identify "Robinson's Arch" with the remains of the stair-tower mentioned by Josephus (*ib.* xv. 11, § 5). An additional argument against any identification of "Robinson's Arch."

Arch" with the Xystus is found in the fact that it lies in the lowest portion of the wall and almost in the bottom of the valley, while the Xystus evidently equaled Mount Moriah in height. It must have been situated, moreover, where the first wall joined the cloister of the Temple and turned toward the south. Mommert's hypothesis that the lower city, which was called Akra and which was leveled and graded by the Maccabees, included the open space of the Xystus, is disproved by the fact that the Temple, on which the Xystus bordered, did not extend to the lower city.

Equally erroneous is the theory of Schürer, supported by Buhl, that the so-called hall of hewn stone ("lishkat ha-gazit"), in which the Sanhedrin held its sessions, was built on the Xystus and that לית is identical with ξυστός; because, according to the Mishnah, this body deliberated within the precincts of the Temple, and not in the buildings which surrounded it, so that this hypothesis is rightly rejected by Bacher and Büchler.

## Y

[NOTE: For topics beginning with **Y** not found in alphabetical place see under **J**.]

**YA'ABEZ.** See EMDEN, JACOB ISRAEL BEN ZEBI ASHKENAZI.

**YA'ALEH:** The introductory hymn prefixed to the selihot which follow the evening service proper of the Day of Atonement (comp. *KOL NIDRE*) in the northern rituals. The author of the hymn has not been identified with certainty. It consists of eight strophes in reverse alphabetical order, each composed of three lines, with the twenty-second Hebrew letter thrice repeated to complete the twenty-four lines. The scheme of construction is as follows:

"Let our **Z** ascend from eventide,  
And our **Y** approach from morning,  
And our **X** appear till eventide."

The verbs are drawn from the prayer "Ya'aleh we-yodeh," etc., specially inserted before the three concluding benedictions of the "Amidah" (see *SHEMONEH 'ESREH*), and in the grace after meals, on all festal days (comp. *Shab.* 24a), including the Day of Atonement. The thought, if not the form, is the basis of G. Gottheil's hymn "To Thee we give ourselves . . . from eventide to eventide" ("Union Hymnal," No. 103), for which, however, a

tune from another section of the penitential services (see *KEROBOT*—*Kaliric strophic hymn*) was selected.

A fine eighteenth-century melody for "Ya'aleh" has been preserved as a general setting through its adaptation by Isaac Nathan in 1815 to Lord Byron's verses "The Harp the Monarch Minstrel Swept," which was published, with pianoforte accompaniment, in the "Hebrew Melodies," issued in that year. The melody as now usually sung is somewhat less elaborate than in Nathan's version. It has been traditional in the Great Synagogue, London, since 1750 at least, and is well known on the Continent also. Its expressive swing had made it widely known and treasured in connection with the Atonement hymn even before it received a further appreciation from the fascination with which it appealed to Louis Lewandowski, the premier synagogue musician of his generation. In his "Todah u-Zimrah" (Berlin, 1876) he not only includes it with its original text for the service of the Day of Atonement (vol. ii., No. 94), but he has set it also to the chief hymn chanted by the hazzan in the "dew" and "rain" supplications on the Passover and Tabernacle festivals (see *GESHEM*).

The melody is here transcribed with Byron's Eng-

lish verses, as presented in 1815. It extends to two stanzas of the Hebrew hymn. This application in the manner in which the old-time vocal accompanists rather than choristers, the "meshorerim," otherwise known as "singer and bass" (see MUSIC, SYNAGOGAL), would alternate with and imitate the solo of the precentor, are further shown in the transcription by the addition of the Hebrew text of the opening strophes.

**YAD** (lit. "hand"; Judæo-German, *teitel*): A pointer to guide the reading in public of the text of the Sefer Torah. During the reading of the Law in the synagogue the reader stands on the right side, the one "called up" being in the center, and the "segan," or deputy representing the congregation, on the left. The segan points out with the "yad" the text for the reader to follow.

From the remotest times the Hebrew teacher used a pointer somewhat similar to the tapering stick employed by the professional lecturer in modern times to point out places, figures, or words on a map or blackboard. The earliest reference to

**Origin from the School.** its use is in connection with the schools of BETHAR before the destruction of that place in the war of Bar Kokba (132-135). Bethar had a larger number of schools and scholars than any other town in Judea; when an enemy forced himself into one of the schools the teachers stabbed him with their pointers (Git. 58a). The use of the "teitel" by the teacher of primary classes in the heder or Talmud Torah is still common in the eastern countries of Europe.

The use of the yad by the segan for guiding the

reader of the Sefer Torah is not obligatory, as the reader may guide himself with it, or it may be dispensed with entirely. It is for the convenience of the reader only, and it is handled by a second person, the segan, perhaps in order to impress the ceremony upon the reader, and to prevent errors in the reading. It serves also to keep the reader from touching the text with his fingers in a desire to guide his reading; for touching the bare Sefer Torah with the hands without a "mappah" rendered them impure for handling "terumah," the priests' share of the heave-offering (Yad. iii. 2). This is one of the eighteen enactments or "gezerot" (Shab. 14a); and the motive of the edict was doubtless to compel the priests, who had easy access to the Sefer Torah, to handle it with special care.

There are various styles of yad for the Sefer Torah. The usual size is about 12 inches long. It is made in the fashion of a staff or scepter, narrowed down at the end, which is in the shape of a closed hand with the index-finger extended. Most frequently the staff is made of silver, ornamented sometimes with a gold hand and sometimes even with jewels; but hard wood also is used, preferably the olive-wood of the Holy Land, with an ivory hand. Often the yad is inscribed with an appropriate Biblical verse, such as "The law of the Lord is perfect, converting the soul" (Ps. xix. 7), or with the name of the donor. There is a ring attached to the top of the staff, with a chain by which to hang it to the rollers (= "ez hayyim") of the scroll after the latter has been rolled up. The yad is one of the "kele qodesh" (= "holy vessels") ornamenting the Torah. See SCROLL OF THE LAW.

**YADAYIM** ("Hands"): Treatise of the Mishnah and the Tosefta, dealing with the uncleanness of the hands and their ablution. It stands eleventh in the order *Tohorot* in most editions of the Mishnah, and is divided into four chapters, containing twenty-two paragraphs in all.

Ch. i.: The quantity of water necessary to cleanse the hands by pouring it over them (§ 1); the vessels from which the water may be poured over the hands (§ 2); kinds of water which may not be used to cleanse the hands, and persons who may perform the act of manual ablution (§§ 3-5).

Ch. ii.: How the water should be poured over the hands, and the first and second ablutions (§§ 1-3); the hands are regarded as clean in all cases where doubt exists as to whether the ablution was properly performed (§ 4).

Ch. iii.: Things which render the hands unclean; the canonical books make the hands unclean. The holy writings were kept together with the equally sacred heave-offering ("terumah") of the priests, and were injured by mice; to prevent this it was enacted that the holy writings defiled the hands as well as the heave-offering, thus leading to a discontinuance of the custom of keeping them together; discussion of the question whether the Song of Solomon and Ecclesiastes are canonical, and thus render the hands unclean; on the day of the election of Eleazar b. Azariah as nasi these books were declared canonical.

Ch. iv.: Other verdicts rendered on the same day in which the Song of Solomon and Ecclesiastes were declared canonical, these rulings being corollaries of that decision (§§ 1-4); the Aramaic language in

Ezra and Daniel, the ancient Hebrew writing ("ke-tab 'Ibri"), and dissensions between Pharisees and Sadducees (§§ 5-8).

The Tosefta to this treatise is divided into two chapters, and contains, in addition to amplifications of the mishnaic sayings, various interesting maxims, of which the following may be mentioned: "The book of Ben Sira (Ecclesiasticus [Sirach]) and all books of later date are no longer canonical" (ii. 13). The "Tobele Shahaarit" (= "Morning Baptists"; see *Jew. Encyc.* v. 230) said to the Pharisees: "We reproach you for uttering the Holy Name before your bodies have been cleansed of their impurities" (ii. 20).

**YAH SHIMEKA**: Hymn of five long stanzas which forms the introduction to the *Kaddish* before "Bareku" in the morning service of the second day of New-Year in the ritual of the Sephardim; it is signed with the acrostic "Yehudah," and is attributed to Judah ha-Levi (Zunz, "Literaturgesch." p. 413). The refrain, "Yishtabbah," etc., is quoted from the *Kaddish* mentioned, and suggested by its rhythm the shaping of the whole hymn in one of the favorite rhythmic figures of Arab music. As with so many other melodies of the Sephardic tradition, and particularly with those for the penitential season, its ancient Oriental tune is also utilized for other hymns. Such are the verses "Shinanim" by Solomon ibn Gabirol, occupying a similar position in the Atonement services, and Judah ha-Levi's other hymn, "Yede rashim," which takes its place on the first day of New-Year, as well as the following *Kaddish* itself and the more familiar hymns *EN KELO-*

**HENU** and **ADON 'OLAM** at the close of the devotions on the same solemn days. The melody thus becomes in the Spanish and Portuguese ritual a "representative theme" for the New-Year festival. The quaint tune presents several antique and Oriental features. One is the repetition of the middle phrase as many times as the varying length of the texts to which it is chanted may render necessary. The presence in the same melody of a note sometimes natural and sometimes flat is explained by the fact that the scale is that of the "immutable system" of the ancients (see Gevaert, "Histoire et Théorie de la Musique de l'Antiquité," i. 105 *et seq.*). A very similar peculiarity in melodies from Asia Minor is exhibited and discussed in Bourgault-Ducandray, "Trente Mélodies Populaires de Grèce et d'Orient," No. 16.

F. L. C.

**YAHBI'ENU.** See **NE'ILAH** (HYMN TUNES, 1).

**YAHYA:** Portuguese family of the Middle Ages, members of which were prominent in Portugal, Spain, Italy, and Turkey. Certain individuals of the family bore the additional cognomen "Negro," with reference to the Moors, from whom several of their estates had been obtained. The more prominent members of the family are as follows:

1. **Yahya ibn Ya'ish** (י"יש): Flourished in Lisbon in the eleventh century; died about 1150. He was held in high esteem among the Jews, and King Alfonso I. honored him for his courage. After the conquest of Santarem the king presented him with two country houses that had belonged to the Moors, wherefore he assumed the name "Negro."

2. **Joseph ibn Yahya ha-Zaken:** Grandson of Yahya ibn Ya'ish (No. 1); lived in Lisbon in the middle of the thirteenth century, and was so wealthy that he built a synagogue at his own expense. He was the author of a Talmudic commentary that is no longer extant.

3. **Solomon ibn Yahya ha-Zaken:** Son of Joseph ibn Yahya (No. 2); died before 1300. He endeavored to check the growing love of luxury among his coreligionists, in order that they might not incur the hatred and envy of the Christians.

4. **Gedaliah ibn Yahya ha-Zaken ben Solomon:** Body-physician to King Ferdinand until 1370, when he lost the favor of his master. He thereupon entered the service of Henry of Castile, who made him the head of the Jewish communities of his realm; and he enjoyed a yearly income of 5,000 gold ducats, which sum was levied as a tax. He died at a ripe age in Toledo.

5. **Joseph ibn Yahya ben Solomon:** Brother of Gedaliah (No. 4); famous for his physical beauty and also for his poetic ability. He left Portugal with his brother and settled in Castile. He was the author of some liturgical poems, but they were destroyed in a conflagration. Joseph was a pupil of Solomon ben Adret, at whose death he wrote an elegy in so-called echo rime that has often been reprinted. He defrayed the cost of repairing a synagogue built in Calatayud by one of his ancestors, **Aaron ibn Yahya.**

6. **David ibn Yahya Negro ben Gedaliah** (ha-Rab shel Sefarad): A prominent figure dur-

ing the war between the kings of Castile and Portugal. By divulging a secret he succeeded in frustrating the plot of Queen Leonora to murder her son-in-law, and as a reward he was appointed chief rabbi of Castile, while King João of Portugal disposed of his estates in that country. At the time of his death, which occurred at Toledo in Oct., 1385, he held the post of "almoxarife" for King Ferdinand of Castile. His tombstone has been preserved.

7. **Judah ibn Yahya Negro ben David:** Born in Toledo in the middle of the fourteenth century. Together with his brother Solomon he emigrated to Portugal in the year of terror, 1391. Judah was employed for a long time in the service of Queen Philippa, the consort of João I., and he had also considerable influence with the king. When Vicente Ferrer asked permission to carry on a propaganda against the Jews in Portugal, the king, at the instigation of Judah, informed him (Ferrer) that his request would be granted on condition that he place a red-hot crown upon his head. Judah was one of the most prominent poets of his time, and wrote several elegies deploring the unhappy fate of his Spanish brethren. Among these poems may be mentioned: (1) an elegy beginning with the words יהודה וישראל and written in continuous rime; (2) one beginning with the words אל אל אשר ברא; (3) an elegy on the persecutions of 1319 in Seville, Andalusia, Castile, Provence, and Aragon (printed in Landsbuth's "Ammude ha-'Abodah," p. 30); (4) three poems that have been printed in Carmoly's "Dibre ha-Yamim li-Bene Yahya," p. 12; (5) an elegy for the Ninth of Ab. He was also the author of responsa and of several piyyuṭim; among the latter are a hymn to be recited before the prayer ברוך שאמר, and another which appeared in "Sheḳel ha-Ḳodesh," pp. 67, 68.

8. **Gedaliah ibn Yahya ben Solomon** (Mestre Guedelha Fysico e Astrologo): Portuguese philosopher and astrologer; born in Lisbon about 1400. Before he was thirty years of age he was appointed court astrologer to João I.. Upon the death of that king (1433) the latter's son Duarte prepared for his coronation, but Gedaliah warned him against it; and when the prince insisted on assuming the crown the astrologer prophesied that his reign would be brief and unhappy. Later, when Duarte fell sick he attributed his illness to this evil prophecy, and the oppressive measures against the Jews were made still more severe.

9. **Solomon ibn Yahya ben David:** A person of prominence during the reign of Alfonso V. of Portugal, he and his entire family being admitted at court. He was rabbi of the Lisbon community, and forbade his children and relatives to accumulate property because he foresaw the coming persecutions. His death occurred before that of Alfonso V.

10. **Solomon ibn Yahya ben David:** Prominent scholar who was highly honored by Alfonso V. He was the father of the author of "Leshon Limudim"; he died in Lisbon, where his grave is still shown.

11. **Joseph ibn Yahya ben David:** Born 1425; was an intimate friend of Alfonso V., who called him "the wise Jew." He was blamed by the king for not dissuading the Jews from indulging

their love of luxury. When some of the exiled Spanish Jews settled in Portugal, they were regarded with disfavor by the Portuguese Jews, and Joseph did his best to remove this animosity. King João at the beginning of his reign allowed the Jews to settle in the kingdom, and when he endeavored later to convert them to Christianity he chose Joseph as the first to receive baptism (1495). Joseph thereupon fled, together with his sons David Meir and Solomon, taking with him 100,000 crusados. He cruised in the Mediterranean for some time, and finally landed in Castile, where he was sentenced to be burned at the stake. Through the intervention of Duke Alvarez de Bragança he was permitted to continue his journey; and after a five months' voyage he landed in Pisa, Italy, where he and his family were put in irons by the troops of Charles VIII., who was about to invest that city. By sacrificing enormous sums of money he obtained his liberty, and placed himself under the protection of the Duke of Ferrara. In the beginning he was well treated, but later he was accused of endeavoring to induce the Maranos to return to Judaism and was tortured. He freed himself from this charge by paying 7,000 gold pieces, but he died as a result of the tortures he had endured (1498). A legend relates that his tomb was located near that of the prophet Hosea. It is said that a copy of Maimonides' "Yad" was made for him in 1472 by Solomon ben Alsark, or Alsarkon.

**12. Dinah Yahya:** Wife of David ibn Yahya ben Joseph (No. 15). Disguised in masculine attire she fled from Portugal together with her father-in-law and her husband; and during the flight she abstained from meat, subsisting on bread and water only. Arriving in Pisa, she sought refuge from the French troops on top of a tower twenty meters high; and when discovered she is said to have leaped to the ground without suffering injury. She fled to Florence, where she gave birth to her son Joseph.

**13. Gedaliah ibn Yahya ben David:** Philosopher; born in Lisbon 1437; died at Constantinople in Oct., 1487. He was the author of "Shib'ah 'Enayim," on the seven cardinal virtues of the Jews, which appeared in Constantinople in 1543, and later in Venice. During a sojourn in Constantinople he advocated a union of the Karaites and Rabbinites.

**14. David ibn Yahya ben Solomon:** Born 1455; died 1528. He was rabbi of the Lisbon community in 1476. Accused of inducing the Maranos to relapse into Judaism, he was sentenced by King João II. to be burned at the stake. He fled to Naples with his family, but was captured; and he was compelled to sell his library in order to secure sufficient money to purchase his liberty. On his release he fled to Corfu, and later went to Larta, where he died in extreme poverty. He was the author of a Hebrew grammar entitled "Leshon Limmudim," which was published in Constantinople (1506, 1528) and in Venice (1542). While at Larta he wrote to the wealthy Jew Isaiah Messene, asking his aid; and this letter was copied by Joseph David Sinzheim, and later published by Grätz ("Gesch." viii. 482-483). According to Carmoly, David was the author of the following works also: "Kab we-Naki" (Lisbon, n. d.), a commentary on the Mishnah; a selection of the best explanations by various commentators on the Bible

(2d ed., Venice, 1518; 4th ed., Salonica, 1522); "Shekel ha-Kodesh" (Constantinople, 1520), on the rules for Hebrew poetry; "Tehillah le-David," an uncompleted commentary on the Psalms; "Hilkot Terefot" (*ib.* 1520); and a commentary on Maimonides' "Moreh," appended to his above-mentioned letter of supplication to Messene.

**15. David ibn Yahya ben Joseph.** See *JEW. ENCYC.* vi. 553.

**16. Solomon ibn Yahya ben Joseph:** A Portuguese exile who fled with his family to Pisa. He left his relatives and went to Rhodes, where he died in 1533.

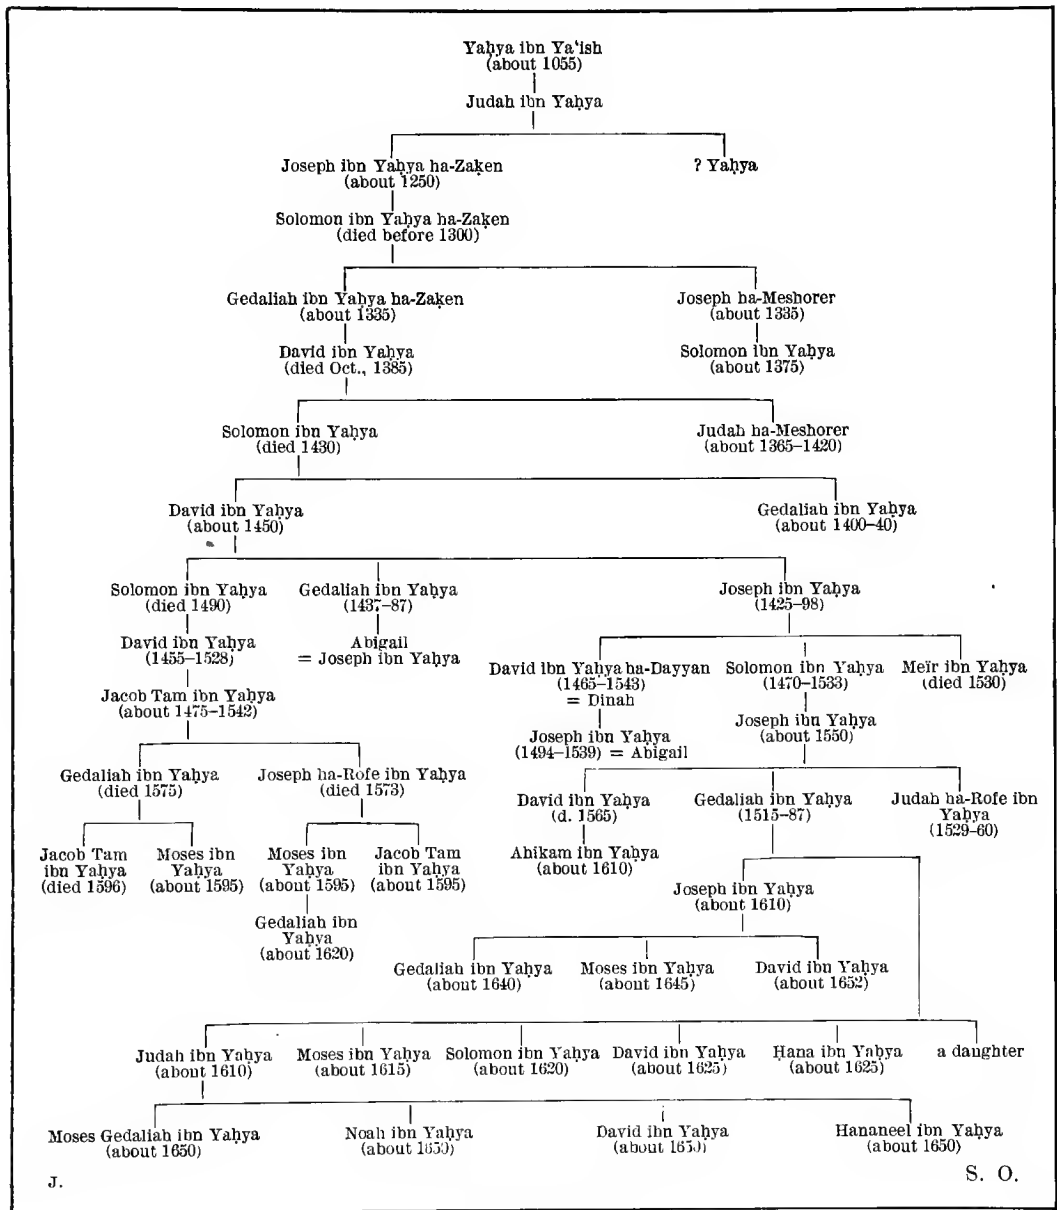

**17. Meir ibn Yahya ben Joseph:** Author of a poetic introduction to the "Cuzari" (Fano, 1506). He lived at Pisa, and later settled in Oulina (אולין), Italy, where he died in 1530.

**18. Joseph ibn Yahya ben David.** See *JEW. ENCYC.* vi. 553.

**19. Judah ibn Yahya ben Joseph:** Physician; born in Imola, Italy, 1529; died in Bologna 1560. He studied medicine at Padua, and was at the same time a pupil of Meir Katzenellenbogen. Receiving his medical degree in 1557, he settled as a practitioner in Bologna.

**20. David ibn Yahya ben Joseph:** President of the Jewish community of Naples; died in 1565. He was a cousin of David ibn Yahya (No. 14), the author of "Leshon Limmudim," under whom he studied, and was the author of a eulogy which appeared in that work.

**21. Gedaliah ibn Yahya ben Joseph:** Talmudist; born at Imola, Italy, 1515; died, probably in Alexandria, about 1587. He studied in the yeshibah at Ferrara under Jacob Finzi and Abraham and Israel Rovigo. In 1549 he settled in Rovigo, where he remained until 1562, in which year the burning of the Talmud took place in Italy. He then went to Codiniola, and three years later to Salonica, whence he returned in 1567 to his native town. Expelled with other Jews by Pope Pius V., and suffering a loss of 10,000 gold pieces, he went to Pesaro, and thence to Ferrara, where he remained till 1575. During the ensuing eight years he led a wandering life, and finally settled in Alexandria. His chief work was the "Sefer Shalshelet ha-Kabbalah," called also "Sefer Yahya," on which he labored for more than forty years. This work is not without defects, having suffered either by reason of the author's itinerant mode of life or through faulty copying of the original manuscript. Its contents are as follows: (1) history and genealogy of the Jews from the time of Moses until that of Moses Norzi (1587); (2) account of the heavenly bodies, Creation, the soul, magic, and evil spirits; (3) history of the peoples among which the Jews have dwelt, and a description of the unhappy fate of the author's coreligionists up to his time. The value of this work is, however, lessened considerably by the facts that the writer has included many oral narratives which he gathered partly in his home, partly in Salonica and Alexandria, and that he often lacks the ability to distinguish truth from fiction. For these reasons the book has been called "The Chain of Lies"; but Loeb has proved that it is more accurate than many have supposed it to be. The "Shalshelet ha-Kabbalah" was

published at Venice, 1587; Cracow, 1596; Amsterdam, 1697; Zolkiev, 1802, 1804; Polonnoye, 1814; and Lemberg, 1862.

Gedaliah was the alleged author of twenty-one other works, which he enumerates at the end of his "Shalsholet," and which are mentioned also in Ben-jacob's "Ozar ha-Sefarim" (pp. 590-591).

**22. Jacob Tam ibn Yahya ben David:** Turkish rabbi; lived from about 1475 to 1542. He was probably rabbi of Salonica, and was a Talmudist of repute. Benjamin ben Abraham Mutal, in the preface to his "Tummat Yesbarim," mentions Jacob

Tam as the author of the following works: a commentary on Alfasi; the completion of Nissim Gerondi's halakot entitled "Ma'aseh Nissim"; a commentary on R. Nissim's halakot entitled "'Al ha-Nissim"; controversial writings against R. Nissim; Talmudic decisions; and responsa and derashot. All these works were destroyed in a fire at Constantinople. Jacob Tam published Leon ben Massoni's "Sefer Yosippon" (1510), and wrote an opinion of Abraham ben Solomon Treves's "Birkat Abraham" (1512). He was a member of the rabbinical conference which convened in May, 1520, to dissolve the

ban placed on Shaltiel, "kahijalik" ("præfectus aule") to Sultan Sulaiman, on account of which Shaltiel had been discharged from his office.

**23. Joseph ibn Yahya bar Jacob Tam:** Born in Constantinople; body-physician to Sultan Sulaiman. Joseph was obliged to be in constant attendance during the sultan's travels and in time of war; and he met his death in battle (1573). The poet Saadia Lougo wrote an elegy in Joseph's honor which was printed in the "Seder Zemaunim." Joseph defrayed the cost of publishing the "Shib'ah 'Euayim," the "Leshon Limmudim," and the "Sheḳel ha-Kodesh," all written by his ancestors.

**24. Gedaliah ibn Yahya ben Jacob Tam:** Physician and scholar; born in Constantinople; died there 1575. He officiated as rabbi and teacher in Salonica and Adrianople until 1548, in which year he went to Constantinople and devoted himself to Hebrew literature. He left numerous manuscripts, several of which are still extant in the Orient.

**25. Tam ibn Yahya ben Gedaliah:** Born in Constantinople in the middle of the sixteenth century. He inherited a large fortune from his father, and used his wealth to promote Jewish literature. Upon the death of his father he settled in the neighborhood of Salonica, where he was intimate with several well-known poets, among them Abraham Reuben and Saadia Lougo. His own literary efforts consisted in compiling the commentaries left by his forefathers on the writings of Alfasi, R. Nissim, and Moses ben Nahman. He completed this task in 1595, but died before the work was published. Eliczer Shoshan and Me'ir Yizḥaḳi were called to his deathbed and entrusted with the task of publishing the work, which appeared at Venice in 1622, under the title "She'elot u-Teshubot Ohole Shem."

**26. Moses ibn Yahya ben Gedaliah:** Turkish physician of the latter half of the sixteenth century. He resided in Constantinople, and during an epidemic of the plague he not only devoted a large part of his fortune to aiding the sufferers, but also rendered medical assistance at the risk of his life. He was known throughout Turkey for his generous hospitality.

**27. Gedaliah ibn Yahya ben Moses:** Born at Salonica in the latter half of the sixteenth century; son of Moses ibn Yahya (No. 26). He was a liberal patron of letters, and gathered about him no less than thirty-two littérateurs in order to cultivate Hebrew poetry. Among the most prominent members of this circle were Judah Zarḳa and Israel Najara. The names of these poets and some of the verses written by them in Gedaliah's honor have been printed in Carmoly's "Dibre ha-Yamim."

Other members of the Yahya family whose relationship to the persons mentioned above has not been established are as follows:

**28. Bonsenior ibn Yahya** (called also **Maestro ibn Yahya**): Author of a poem on chess. It appeared first at Mantua (1549) and later in a Latin translation at Oxford (1702), Frankfort-on-the-Main (1767), and Presburg.

**29. Judah ibn Yahya ben Gedaliah:** Italian scholar of the eighteenth century; lived in Padua and in Venice. He sought the advice of Me'ir Katzenellenbogen with regard to intimate family affairs,

the incident being mentioned in Meir's responsa (No. 53).

**30. Reuben ibn Yahya ben Solomon Hezekiah:** Born in Lugo, Italy, at the close of the seventeenth century. He was a pupil of Isaac Fano, and was appointed rabbi of Lugo during the lifetime of his teacher. He was the author of a *haskamah* which appears in the preface to Lampronti's "Paḥad Yizḥak."

**31. Samuel ibn Yahya:** Rabbi in Amsterdam in the sixteenth and seventeenth centuries; author of "Trinta Discursos" (Amsterdam, 1629), thirty sermons in Spanish.

**32. Solomon ibn Yahya:** A Portuguese exile who settled in Ancona, where he was burned at the stake by order of Pope Paul IV.

**33. Zerariah ibn Yahya:** Scholar of Lugo, Italy; flourished about 1730. In his latter years he held the office of *ab bet din* in his native town. He is mentioned in Lampronti's "Paḥad Yizḥak" (iii. 20a).

S. O.

**YAKKAR BEN SAMUEL HA-LEVI II.:** German scholar and liturgical poet of the second half of the thirteenth century; flourished in Cologne

and in Mayence. He was related to Meir of Rothenburg, in whose responsa he is several times mentioned; and he was a pupil of R. Jehiel of Paris. His marginal glosses to Abot are still preserved in manuscript. He was, besides, the author of the following liturgical poems: a "yozer" for a Sabbath festival; an "ofan"; a "zulat," poem to be sung before the recital of the "Shemoneh 'Esreh"; a "Kedushshah," to be sung at the repetition of the "Shemoneh 'Esreh"; a *zulat*, poem beginning with the words "Ezkerah Elohim" and meant for the Sabbath following the 20th of Tammuz, in memory of the martyrs of Pforzheim, 1267; a *Kedushshah*, poem in eleven lines, with continuous rime; a "Ge'ullah" of three cantos, each consisting of two stanzas of five lines; and an elegy on Zion, in which the author's name is twice mentioned. As Yalkut and his father, Samuel ben Abraham, fell victims in the butchery of 1271, the *zulat* in memory of the Pforzheim martyrs must have been written shortly before his death.

**BIBLIOGRAPHY:** Zunz, *S. P.* p. 2; idem, *Literaturgesch.* pp. 487-488; idem, *Z. G.* pp. 100, 101, 105, 193; Landshuth, *'Am-mude ha-'Abodah*, p. 132; Gross, *Gallia Judaica*, pp. 566-568; Kohn, *Mordekai ben Hillel*, pp. 127-128; Fuenn, *Keneset Yisrael*, p. 670.

S. O.

**YALKUT** ("Compilation"); called also **Yalkut Shim'oni** ("The Compilation of Simeon"): A haggadic compilation on the books of the Old Testament. From such older haggadot as were accessible to him, the author collected various interpretations and explanations of Biblical passages, and arranged these according to the sequence of those portions of the Bible to which they referred. The individual elucidations form an organic whole only in so far as they refer to the same Biblical passage.

**Contents.** Lengthy citations from ancient works are often abridged or are only partially quoted, the remainder being cited elsewhere. Since the interpretations of the ancient exegetes usually referred to several passages, and since the Yalkut endeavored to quote all such explanations, repetitions were inevitable, and haggadic sayings relating to two or more sections of the Bible were often duplicated. In many instances, however, only the beginning of such an explanation is given, the reader being referred to the passage in which it is recorded in its entirety.

The work is divided into sections, which are numbered from Genesis to the end of Deuteronomy, and are numbered anew from the beginning of Joshua, the first non-Pentateuchal book, so that the Yalkut falls into two parts. The first division treats of the Pentateuch and contains 963 sections, of which §§ 1-162 relate to Genesis; §§ 163-427 to Exodus; §§ 428-682 to Leviticus; §§ 683-788 to Numbers; and §§ 789-963 to Deuteronomy. The second part deals with the non-Pentateuchal books (the Prophets and the Hagiographa), and contains 1,085 sections. In this part the redactor followed the Talmudic order of the prophetic books (B. B. 14b), §§ 1-252 being devoted to the first prophets (Joshua, Samuel, and Kings); §§ 253-335 to Jeremiah; §§ 336-384 to Ezekiel; §§ 385-514 to Isaiah; §§ 515-595 to the twelve minor prophets; §§ 596-609 to Ruth; §§ 610-890 to Psalms; §§ 891-928 to Job; §§ 929-

965 to Proverbs; §§ 966-979 to Ecclesiastes; §§ 980-994 to The Song of Solomon; §§ 995-1043 to Lamentations; §§ 1044-1059 to Esther; §§ 1060-1066 to Daniel; §§ 1067-1071 to Ezra and Nehemiah; and §§ 1072-1085 to Chronicles.

In the arrangement of the Hagiographa the author deviates from the Talmudic order (B. B. *l.c.*) by placing Esther before Daniel, while the reverse order is followed in the Talmud. The division into sections is arbitrary, and the sections are very unequal in length; Deut. 818, for example, in the Wilna edition containing only five lines, while Deut. 988

comprises eighteen columns. In his **Order and Arrange-ment.** exegesis of each passage, often in the text itself, the author indicates the sources from which his explanations are derived. In the Salonica edition

they are given at the beginning of each corresponding Biblical passage, although in later editions they were placed in the margin. In many instances, however, the sources are given in an inconvenient place or are entirely eliminated; while some references are even indicated by a later redactor, as, for example, Job 921, where the source (Ex. R.) is a later addition, the original redactor being unacquainted with Exodns Rabbah (comp. Epstein, "Rabbi Shimeon Kara weha-Yalkut Shim'oni," in "Ha-Hoker," i. 137). The sources embrace not only the major portion of halakic and haggadic literature during the ancient and geonic epochs, but also the haggadic literature as late as the twelfth century. The author made use of the older midrashic works, such as Seder 'Olam, Sifra, Sifre, Sifre Zuta, Melkita, the Baraita on the Thirty-two Middot, the Baraita on the Forty-nine Middot, and

**Sources.** the Baraita on the Erection of the Tabernacle ("Meleket ha-Mishkan"); and he availed himself also of the Mishnah, both Talmudim, and Semahot, Kallah, and Soferim. He drew from the ethical and historical Haggadah, such as Abot de-Rabbi Natan, Tanna debe Eliyahu (Rabbah and Zuta), Derek Erez, Masseket Gan 'Eden, Midrash Wayissa'u, the Chronicle of Moses, and the Midrash on the Death of Moses. The author's chief source, however, was the explanatory midrashim, such as the rabbot on Pentateuch (with the exception of Exodus Rabbah), Pesikta, Pesikta Rab-bati, Yelammedenu, Tanhuma, Debarim Zuta, Midrash Abba Gorion, Esfa, Tadshe, Abkir, Pirke Rabbi Eli'ezer, and the midrashim on Samuel, Psalms, Proverbs, and Job. The latter works are often cited simply as "Midrash," without any more definite identification. In that portion of the Yalkut which treats of the books of Samuel, Psalms, and Proverbs, the term "Midrash" designates the midrash on the respective books. The term "Midrash" is used also to indicate the source of passages which belong to older or more recent works. In these few instances the author was apparently either uncertain of his references or he used an older collection known under the name of "Midrash," but did not have access to the original documents. It must also be borne in mind that the redactor failed to use various sources, such as the Midrash on the Ten Commandments and the Midrash on the Death of Aaron, and that he likewise ignored the Targumim

and writings relating to esoteric doctrines, with the exception of the "Otiyyot de-R. Akiba," to which he alludes in Gen. 1., § 1.

The author of the Yalkut can not be determined with certainty. The title-page of the Venice edition ascribes the composition of the work to R. Simeon of Frankfort, "the chief of exegetes" ("rosh ha-darshanim"), and this was accepted by Conforte and Azulai, who called him Simeon Ash-

**Author and Date.** kenazi of Frankfort. Rapoport (in "Kerem Hemed," vii. 7 *et seq.*), on the other hand, maintained that R. Simeon (the father of R. Joseph Kara), who flourished in the eleventh century, was its author; but this assertion is untenable since the compiler of the Yalkut used midrashim of a later date. If the Yalkut was so old, moreover, it would be difficult to explain why no mention of it is made by R. Nathan b. Jehiel, the author of the "Aruk," or by Rashi. All the proofs advanced by Rapoport have been refuted by Epstein, who inclines to agree with Zunz that the author of the Yalkut flourished in the early part of the thirteenth century. According to Zunz, the work was written by R. Simeon Kara, who lived in southern Germany at that period, and the title "ha-Darshan" was bestowed upon him probably at a later date. It is certain that a manuscript of the Yalkut, mentioned by Azariah dei Rossi, existed in 1310 (comp. Zunz, "G. V." pp. 295-303); but despite this, there is scarcely any allusion to the work during the fourteenth and fifteenth centuries. This may be ascribed, however, to the unhappy position of the German Jews and to the repeated persecutions of the period; for peace and prosperity were necessary for the copying of so extensive a work, and the Jews of Germany had neither. After the beginning of the fifteenth century, on the other hand, the work must have been disseminated in foreign countries, for it was used by Spanish scholars of the latter half of that century, Isaac Abravanel being the first to mention it (comp. Epstein, *l.c.* p. 134).

The editio princeps of the Yalkut was printed in Salonica in 1521, the latter part of the work, relating to the Prophets and the Hagiographa, appearing first. The part treating of the Pentateuch appeared between 1526 and 1527, and the entire work was later published in Venice (1566) with certain emendations and deviations from the Salonica edition. All later texts are

**Editions.** merely reprints of the Venetian edition, with the exception of one published at Leghorn (1650-59), which contained additions and corrections as well as a commentary by R. Abraham Gedaliah. The latest text (Wilna, 1898) is based on the editions of Lublin, Venice, and Leghorn, and contains foot-notes giving the sources, a glossary of difficult words, and an index of the chapters and verses of Biblical passages. To this edition is appended a brief commentary by Abraham Abele Gumbiner of Kalisz entitled "Zayit Ra'anah."

J. Z. L.

**YANNAI:** Palestinian amora of the third century; father-in-law of Ammi. According to his

own statement, he had a grandson of the same name (Hul. 111a). He is known as having taken part in a controversy regarding the succession of the writings of King Solomon, he himself maintaining that the book *Kohelet* is the last one written by him (Cant. R. i. 1).

**BIBLIOGRAPHY:** Bacher, *Ag. Pal. Amor.* ii. 145a, iii. 573-574; Heilprin, *Seder ha-Dorot*, ii. 116d.

S. O.

**YANNAI:** First payyetan to employ rime and introduce his name in acrostics; flourished, probably in Palestine, in the first half of the seventh century. He was apparently a very prolific poet, for reference is made to "the liturgical poems of Yannai"; he is also said to have composed "kerobot" for the "orders of the year" (perhaps for the weekly lessons). Most of his poems are lost; some are perhaps still extant, but they can not be recognized with certainty as Yannai's work. The following fragments alone remain to show his style:

1. אֹנִי פִטְרֵי הַמַּחֲמִים: A "kerobah" for Sabbath ha-Gadol. It is said to include also אֲרוֹב נְסִים אֲרוֹב בְּלִילָה הַפְּלֵאָה, found in the Pesah Haggadah.

2. שִׁיר הַשְּׂרִים אֲשֶׁר נָא לִירֵד: A "shib'ata" for the seventh day of Pesah. The middle portion is missing. It is designated as רְמוּזָה (this reading must be substituted for the senseless לְרְמוּזָה in the superscription), *i.e.*, "bolt" or "beam" (*δρόμος*, otherwise called רְדִיט), and forms a sort of textual variation of Canticles, following the conception and interpretation of that book in the Midrash.

3. תַּעֲנוּ אֲנִי בַפְּתוּרִים: A "silluk" for Sabbath Shim'u, *i.e.*, the second Sabbath before the Ninth of Ab.

Yannai, like his predecessor Jose b. Jose, is not as obscure in his vocabulary and in his metaphors as is Kalir, who is said to have been Yannai's pupil and to have been killed by his master out of jealousy. The extant examples of Yannai's work do not indicate any great poetic talent.

**BIBLIOGRAPHY:** Rapoport, in *Bikkure ha-Yittim*, 1829, p. 111; *idem*, in *Kerem Hemed*, 1841, vi. 25; Luzzatto, *Meho*, p. 10; Zunz, *Literaturgesch.* p. 28; Landshuth, *'Ammude ha-'Abodah*, p. 102; Harkavy, *Studien und Mittheilungen*, v. 103; S. A. Wertheimer, *Ginze Yerushalayim*, ii. 18b.

D. H. B.

**YANNAI** (known also as **Yannai Rabbah** = "the Great"): Palestinian amora of the first generation (2d and 3d cent.). A genealogical chart found at Jerusalem traced his descent from Eli (Yer. Ta'an. iv. 2; Gen. R. xcvi. 13). Yannai was very wealthy; he is said to have planted four hundred vineyards (B. B. 14a) and to have given an orchard to the public (M. K. 12b). His first residence was at Sepphoris (Yer. Ber. iv. 6 *et al.*), where he seems to have held a public office, since at the death of R. Judah ha-Nasi I. (Rabbi) he gave an order that even priests might attend the funeral of the great teacher (*ib.* iii. 1). Halevy, however, has concluded that Yannai always lived at 'Akbarah, or 'Akbari, where he established a school (see below).

Yannai was prominent both as halakist and hag-gadist. He was a pupil of Rabbi, in whose name he transmitted several halakic sayings (Yer. Hag. iii. 2; Yer. Kid. iii. 14; *et al.*). The best known of his senior fellow pupils was Hiyya Rabbah, who, as an assistant teacher in Rabbi's school, sometimes acted as

Yannai's tutor (Yer. Dem. vii. 1; Yeb. 93a). But several discussions between Hiyya and Yannai (Yer. Ber. iv. 5, and Babli *passim*) show the real relationship. Their friendship was afterward cemented by the marriage of Yannai's daughter to Hiyya's son Judah (Yer. Bik. iii. 3; Ket. 62b). Yannai transmitted also some halakot in the name of the council ("ḥaburah") of the last tannaim (Mak. 21b). He established an important school at 'Akbarah (Yer. 'Er. viii. 4), often mentioned in both Talmuds and in the Midrash as the "debe R. Yannai" or the "bet R. Yannai," and which continued after his death. His school differed from others in that the pupils were treated as belonging to the master's family; they worked on

**His School.** (comp. Yer. Sheb. viii. 6). His chief pupil, of whom he thought highly, was

R. Johanan, who transmitted most of his halakot (Yer. Kil. viii. 1; Soṭah 18b; Ḳid. 64b). Others of his many pupils were Simeon b. Lakish (Yer. Yoma iii. 10; Ta'an. ii. 6; Hul. 82a), R. Aibu (Ḳid. 19), and R. Hoshaiiah (Ket. 79a).

In regard to the Mishnah of Rabbi he shared the opinion of Hiyya. In fact, Yannai ascribed no greater authority to the Mishnah than to the collections of halakot or baraitot compiled by Hiyya and other disciples of Rabbi (comp. Yer. Pes. i. 5; Yer. Yoma iv. 2). When his pupil R. Johanan remarked that the Mishnah rendered a decision different from his, he answered, "The Mishnah gives only the decision of a single tanna, while I decide conformably to the Rabbis as a whole" (Shab. 140a). He was independent in his decisions, and sometimes had all his contemporaries against him (Yer. Niddah iii. 4; Shab. 65a). His decisions were generally rigid as regards private persons (Yer. Ber. ii. 6; Yer. Ket. i. 10; Shab. 14a), but liberal when the whole community was concerned. Yannai's disregard of R. Judah Nesi'ah (Judah II.), Rabbi's grandson, was notorious (B. B. 111a, b), and so was his attitude toward R. Ḥanina, an ardent believer in Rabbi's Mishnah (Yer. Kil. ix. 7; Ber. 30a; *et al.*). Referring to Ḥanina, Yannai said, "He who studies the Law under only one teacher sees no sign of blessing" ('Ab. Zarah 19a).

Yannai is conspicuous in both Talmud and Midrash as a prolific haggadist, and he occupies an important place among the Biblical exegetes of his time. In reference to a man who studied much but did not

**His Haggadah.** fear God, he said: "Wo to the man who, before he gets a house, makes the door" (Shab. 31b). He recommended submission to the government (Zeb. 102a; Men. 98a). When old age had impaired his sight he requested Mar 'Ukba to send him some collyrium prepared by Samuel (Shab. 108b). He enjoined his children to bury him neither in white nor in black clothes, as they would not know whether his place would be in paradise or in hell (Shab. 114a; Yer. Kil. ix. 4).

**BIBLIOGRAPHY:** Bacher, *Ag. Pal. Amor.* i. 35-47; Frankel, *Mebo*, p. 103a, b, Breslau, 1870; Grätz, *Gesch.* 3d ed., iv.; Hulevy, *Dorot ha-Rishonim*, ii. 273-282; Heilprin, *Seder ha-Dorot*, ii.; Weiss, *Dor*, iii. 50, 51.

M. SEL.

**YANNAI BEN ISHMAEL:** Palestinian amora of the third century; a contemporary of

Ze'era and of Abba bar Kahana. There exist a few halakot transmitted in his name, among them one referring to the prayer "Shomea' Tefillah" (Ta'an. 14a). A question, likewise referring to the "Shemoneh 'Esreh," is addressed to Yannai by Ze'era through R. Nahum (Yer. Ber. 5a). R. Zerikan quotes a halakah in the name of Yannai, referring to the circumcision of slaves (Yer. Yeb. 8d). Several haggadot of Yannai's have been preserved, among which may be mentioned one treating of Adam's meeting with the angels (B. M. 86b), and a farewell address based on the verse Judges i. 15 (Soṭah 46b). Once, during an illness, Yannai was visited by Ze'era and Abba bar Kahana (Yer. Ter. 45c), with the latter of whom he engaged in a controversy relating to Solomon's plantations.

**BIBLIOGRAPHY:** Bacher, *Ag. Pal. Amor.* iil. 572-573; Heilprin, *Seder ha-Dorot*, ii. 117a; Frankel, *Mebo*, p. 103b; Yufassin, ed. Filipowski, p. 15b.

S. O.

**YANNAI THE YOUNGER:** Palestinian amora of the fourth generation; called "the Younger" ("ze'era") to distinguish him from Yannai b. Ishmael. When his father-in-law died Yannai was exempted from the priestly laws of purity in order that he might attend to the interment of the dead (Yer. Ber. 6a; Yer. Naz. 6i). A sentence treating of the importance of an oath and how it is to be made has been preserved in Lev. R. vi. It appears that at Yannai's funeral his pupils did not follow current customs, for which reason they were reproved by R. Mani (Yer. M. Ḳ. 82c).

**BIBLIOGRAPHY:** Bacher, *Ag. Pal. Amor.* ii. 442, note 5; iii. 448, 623; Frankel, *Mebo*, pp. 103b-104a; Heilprin, *Seder ha-Dorot*, p. 116d.

S. O.

**YARHI, ABRAHAM.** See ABRAHAM BEN NATJAN.

**YARMOOUTH:** Seaport of Norfolk, England. Jews must have resided in this town at an early date. In the Lansdowne MS. under date of 1280 mention is made of a certain Ysaac de Gernemutha, and in "Hebrew Deeds" ("Shtarot"), edited by M. D. Davis, there is an allusion to one Isaac of Yarmouth who resided at Norwich. Row 42 has been known traditionally as Jews' or Synagogue Row, and in 1847 a synagogue which had been erected there was consecrated by Rev. M. B. Levy of the Brighton congregation, the building taking the place of an older one which had become dilapidated. In 1877 the synagogue was closed in consequence of the decrease in the Jewish population, and it is at present used as a parish mission-room. For some time after its closing, services were held at the house of Michael Mitchell. The first minister was probably Rabbi I. Cohen; the second was Levi Levenberg, who died in 1870.

A plot of land for a cemetery was granted by the town council on April 7, 1801, on the petition of Simon Hart, a silversmith, who had resided in Yarmouth for forty years and who was the first to be interred there, in the following year. The cemetery is in the Alma road and contains sixteen tombstones and one headstone, all bearing inscriptions in Hebrew or English.

Among other relics of former days existing in the parish church are an illuminated Hebrew scroll of

Esther, said to date back to the end of the fifteenth century; a copy of the Yosippon in pointed characters and printed at Basel in 1541; and a Hebrew and Latin Bible printed at Antwerp in 1584.

V. E.

**YARMUK** (modern **Shari'at al-Manaḍirah**): River of Palestine; its various sources rise in the mountains of Hauran and Jaulan; it flows generally west and empties into the Jordan four English miles south of the Lake of Gennesaret. Although it is narrow and shallow throughout its course, at its mouth it is nearly as wide as the Jordan, measuring thirty feet in breadth and five in depth. The Matthew Bridge, which crosses the Yarmuk at its confluence with the Jordan, and which is built of volcanic stones, is celebrated. According to R. Johanan, the Yarmuk was the second largest river in Palestine (B. B. 74b), but its water was not to be used for the water of atonement with the ashes of the red heifer (Parah viii. 10).

S. O.

**YAROSLAV (JAROSLAW)**: Town in Galicia, known as one of the principal seats of the COUNCIL OF FOUR LANDS. The fair of Yaroslav, at which the Council decided matters regarding the various communities, and at which also the heads of yeshivot used to discuss Talmudic themes ("shiṭ-ṭot") with their pupils, was held toward the end of the summer. It is known that in the second half of the seventeenth century Yaroslav began to supplant the other towns with regard to the Council of Four Lands; so that Moses Ḥagiz, in his "Mishnat Hakamim," No. 349, mentions only the Yaroslav fair, where the rabbis used to assemble once every three years. In 1671 the Council decided to meet in a place a few miles from Yaroslav, as the town was deemed unsafe; but the decision was soon revoked. It was at the fair of Yaroslav that the Council gave judgment in the eighteenth century in the dispute between Jonathan Eybeschütz and Jacob Emden. Among other important acts of the Council was the giving of approbations of literary works, and many of these were issued at Yaroslav. Thus, in the autumn of 1677, under the presidency of Issachar Bärusch b. Höschel, at this town, permission was granted to print Jekuthiel Blitz's German translation of the Bible; and on the eighth of Tishri, 5452 (= Oct. 1, 1691), under the presidency of Löb Ḥasid, a similar approbation was granted for the Midrash Rabbah.

M. SEL.

**YASHAR, SEFER HA-**: One of the latest works of the midrashic Haggadah; known also under the titles "Toledot Adam" and "Dibre ha-Yamim be-'Aruk." It is written in correct and fluent Hebrew, and treats of the history of the Jews from the time of Adam to that of the Judges. Three-fourths of the work is devoted to the pre-Mosaic period, one-fifth to the Mosaic period, and only three pages to later history. In his endeavors to explain

all Biblical subjects the author invented entire narratives, interweaving them with certain passages of the Bible.

Among such narratives and additions originating with the author may be especially mentioned an explanation of the murder of Abel by

**Contents.** Cain, and also an extended and ingenious genealogy of the descendants of Shem, Ham, and Japheth. In this genealogy the origin of Seir, which Ibn Ezra states to be shrouded in obscurity, is explained by the assertion that Seir was the son of Hur, the grandson of Hori, and the great-grandson of Cainan. The life of Abraham is described at great length, the account beginning with his birth and the appearance of the star (viii. 1-35), and including the smallest details, such as, for example, his two journeys to his son Ishmael (xxi. 22-48). Similar minuteness is displayed with regard to the last days of Sarah and her funeral, which, according to the author, was attended not only by Shem, Eber, Auer, Eshkol, and Mamre, but also by Canaanitish kings with their retinues (xxii. 41-44). The enumeration of the doctrines which the three Patriarchs received through Shem and Eber also occupies considerable space; and the life of Joseph is depicted in an especially impressive manner (xxxvii.-xli.).

In connection with the different "blessings" which Jacob before his death gave to his sons, the author depicts the bloody warfare waged between the kings of Canaan and the sons of Israel on account of the violation of Dinah, the war ending with the victory of Israel (xxxiv.-xxxv.). In the history of the sojourn of the Israelites in Egypt and of their exodus from that country are also interwoven several legends, though these lack the completeness that marks the narratives of the pre-Mosaic history (part ii.). The author, moreover, gives an entire song of Joshua, which is merely indicated in the book of that prophet (x. 13); but this consists only of Biblical passages artistically put together.

In the compiling of the work the following sources were made use of, namely: the Babylonian Talmud; Bereshit Rabbah; Pirke R. Eliezer; the Yalkuṭ; the Chroniele of Moses; Yosippon; Midrash Abkir; and various Arabic legends. As to the place and time of the work's origin various legendary accounts are given in the preface of the first edition (Naples, 1552).

In 1750 the London printer Thomas Ilive issued an English translation of the work, asserting that he had published the real "Book of Yashar" mentioned in the Bible; and in 1828 the London "Courier" (Nov. 8) reported that a man from Gazan in Persia, by name Alcurin (Noah has "Alcuin"), had discovered the book named after Joshua, and brought it with him to London. Eleven days later (Nov. 19) a Jew of Liverpool named Samuel reported in the same paper that he was working on a translation of this work, which he had obtained in

**Modern Translations.** North Africa. Zunz thereupon found himself compelled to assert, in the "Berliner Nachrichten" of Nov. 29, 1828, that the work mentioned was the same as that published in Naples in 1552 or 1613; and in his "Gottesdienstliche Vorträge," 1832, the

same author declared that the book originated in Spain in the twelfth century. That Italy, however, was the land of its origin seems evident from the author's knowledge of Italian names, as Tuscany, Lombardy, and the Tiber (x. 7-36), and also from the description of the rape of the Sabines (xvii. 1-14). The appearance of Arabic names, such as Sa'id, Allah, Abdallah, and Khalif, only tends to show that the book was written in southern Italy, where Arabic influence was strongly felt even in the eleventh century.

The "Yashar" has appeared in the following editions: Naples, 1552; Venice, 1625; Cracow, 1628; Prague, 1668; Frankfurt-on-the-Main, 1785; Amsterdam, 1707; Constantinople, 1728; Fürth, 1768; Koretz, 1785; Frankfurt-on-the-Oder, 1789; Grodno, 1795; Lemberg, 1816 and 1840; Warsaw, 1846; Wilna, 1848; Lemberg, 1850; Wilna, 1852; Warsaw, 1858. It was translated into Judæo-German by Jacob ha-Levi, and published with various annotations and Arabic glosses (Frankfurt-on-the-Main, 1674; Sulzbach, 1783). A Latin version by Johann G. Abicht appeared in Leipsic in the middle of the eighteenth century under the title "Dissertatio de Libro Recti." The work was first translated into English by Thomas Ilive, as mentioned above, and later by M. M. Noah under the title "The Book of Yashar" (New York, 1840).

**BIBLIOGRAPHY:** The passages mentioned in this article refer to the New York edition, since the Hebrew editions are not divided into either chapters or paragraphs. See also Zunz, *G. V.* 2d ed., pp. 162-165 and notes; Carmoly, in *Jost's Annalen*, 1838, I., No. 19, pp. 149-150; M. M. **YATES PEDIGREE.** See SAMUEL AND YATES PEDIGREE.

**YATES, BENJAMIN ELIAKIM.** First minister of the congregation at Liverpool, England; died there 1798. He was the elder son of Eliakim Getz (Goetz) of Strelitz, and he himself also appears to have been a native of Strelitz. On going to England he became an itinerant seal-engraver, and probably settled in one of the southwestern counties. Subsequently he located in Liverpool, where he became an engraver and working jeweler; and with this calling he combined that of minister or rabbi of the infant Liverpool congregation, acting also as hazzan, shoḥet, and mohel. His residence, at 109 Frederick street, is believed to have been the first regular synagogue of the Liverpool Jews. Its small garden was used as a burial-ground, and Benjamin Yates was the last person interred in it.

After Benjamin's death his younger brother, **Samuel**, settled in Liverpool, probably in order to manage the engraving and jewelry business left by his brother, and to look after the latter's young and helpless family. Samuel Yates became, by his marriage with Martha Abrahams, of Shaftesbury, Somersetshire, a progenitor of the leading families of the Liverpool community (see SAMUEL AND YATES).

**YAWAN.** See JAVAN.

**YEAR-BOOK** (German, *Jahrbuch*): An annual publication that contains not only a calendar and a review of the year, but also articles of literary interest, and communal information, being thus distinguished from the almanac, though the line of distinction can not be very sharply drawn. The earliest work of this kind seems to have been that of J. Heineman (Berlin, 1818-20), entitled "Almanach für die Israelitische Jugend." This, however, lasted only a couple of years, whereas the "Jahrbuch" of Isidore Busch was published in Vienna for six years (1842-47), with contributions from the most distinguished Jewish scholars of the time, including Zuuz, Rapoport, Picciotto, Sachs, Ludwig Frankl, Kompert, and L. Löw; the latter work was followed by Wertheimer's (1854-68); and Klein's "Jahrbuch" was published in Breslau for nineteen years (1841-61). For two or three years the Institut für Förderung der Jüdischen Wissenschaft issued a year-book on Jewish history, and the Société des Etudes Juives also produced an "Annuaire" for four years after its establishment (1880-84).

A somewhat different variety of this class of publications was started by J. Jacobs in the "Jewish Year Book" (1896), which contained statistics, lists of communal institutions and of communal celebrities, a glossary, and a "Who's Who." "The American Jewish Year Book," edited by Cyrus Adler (1899 *et seq.*; later with Henrietta Szold), has some of these features, together with other characteristics (see ALMANAC). It may here be mentioned that in M. H. Myer's "Calendar and Diary," which appeared in London (1876-96), I. Zangwill produced some of his earliest sketches under the pseudonym "Baroness von S."

The Hebrew year-books deserve special mention, as in a measure they precede the rest in the twelve volumes of "Bikkure ha-'Ittim," which were published in Vienna from 1820 to 1831; these were edited chiefly by I. S. Reggio, and included many articles by Rapoport that were of great value. A kind of supplement was produced at Vienna in 1845, and two volumes of "Bikkurim" were edited by N. Keller in the same place (1864-65). Still more recently two series have appeared in Warsaw: "Ha-Asif" (1894-1903), edited by N. Sokolow; and "Aḥiasaf," begun in 1893 and still in progress. A Hebrew and Dutch "Muzen Almanak" was produced by G. Pollak at Amsterdam in 1844, but appeared only one year. The Jüdischer Verlag of Berlin issued in 1904 the first volume of a "Jüdische Almanach" that was mainly devoted to Zionistic literature, although it contained also much decorative work by E. M. Lilien. The Austrian Jewish Union produces a calendar which often includes literary matter, and which therefore comes under the year-book category (Vienna, 1892; still in progress). A somewhat curious year-book entitled "Bethlehem" was produced in Budapest in 1871, being entirely restricted to the promotion of agriculture among the Jews of Hungary; it was edited by I. Reich, and

appeared for one year only. A still earlier Hungarian example was the "Jahrbuch für die Israelitischen Cultusgemeinden in Ungarn," edited by Leopold Rosenberg and published at Budapest in 1860. The Israelitisch-Ungarische Literaturgesellschaft, since its foundation in 1895, has published a year-book of literary contents. In Rumania, Julius Barasch produced a historical year-book at Bucharest, and this is still continued under the title "Anuarul Pentru Israelitizii."

**YEDAYA.** See BEDERSI or BEDARESI, JEDAIATI BEN ABRAHAM.

**YEHUDAI BEN NAHMAN** (usually cited as **Yehudai Gaon**): Gaon of Sura from 760 to 764. After the office of the gaonate was left vacant by the death of Mar Aha, the exilarch Solomon, departing from the usual custom, decided to appoint a scholar of the Pumbedita Academy, Yehudai ben Nahman, as gaon of Sura. Shortly afterward Yehudai's brother Dodai was appointed gaon of Pumbedita (761-767). Yehudai was blind, and was perhaps so afflicted, as I. H. Weiss suggests, at the time when he was appointed gaon. If this was the case his appointment was contrary to Sanh. 49a, according to which a man blind in both eyes is incapable of acting as a judge or as president of a court. It is interesting, however, that it was Yehudai Gaon who decided that blindness should not act as a bar to the appointment as hazzan of a man otherwise irreproachable ("Or Zarua'," i, 116). As far as is known, Yehudai had one son, Joseph (see "Halakot Pesukot," ed. Schlossberg, p. 122); Mar Aḥinai is mentioned as his pupil.

Yehudai was highly respected as a halakic authority, and later geonim as well as rabbis hesitated to decide against his opinion (comp. "Teshubot ha-Geonim," ed. Lyck, No. 43, end; Jacob Emden, "She'elat Ya'hez," i., No. 145). His responsa, generally written in Aramaic, are precise and usually very short; they sometimes consist of only one or two words, giving merely the decision. But when he was asked to explain Talmudical passages his responsa naturally went more into detail; and there are also some long responsa dealing with property rights. Some Hebrew responsa are supposed to have been translated by his pupils or by the compiler. The majority of Yehudai's responsa deal with the order of the prayers and the readings from the Scriptures; with traveling on board a vessel and disembarking on the Sabbath, and various laws concerning the observance of the Sabbath and of holy days; with the tefillin (see Ḥayyim M. Horowitz, "Halachische Schriften der Geonim," i. 45 *et seq.*); and with dietary laws, divorce, and ḥalizah cases of Jews who had embraced Islam and returned to Judaism (comp. especially "Teshubot ha-Geonim," ed. Lyck, No. 45; Müller, "Mafteah le-Teshubot ha-Geonim," pp. 66 *et seq.*).

Alfasi in his "Halakot" (Nedarim, end) asserts that it was Yehudai Gaon who did away with absoluteion from vows ("hattarat nedarim"), which was so carelessly granted by the rabbis of his time that it gave occasion for Karaite attacks. He even went

so far as to abolish the study of the Talmudical treatise Nedarim ("Vows"), and his successors were anxious to adhere to this reform (see L. Löw, "Gesammelte Schriften," iii. 363).

Yehudai Gaon, however, is best known as the author of halakot, which are quoted under the titles of: "Halakot de-R. Yehudai Gaon," "Halakot Pesukot" or "Hilkot Re'u," "Halakot Keṭu'ot," and "Halakot Kezubot" or "Halakot Keṭannot" (as distinguished from the "Halakot Gedolot" of Simeon Kayyara). The relation to one another of these several versions, which are obviously adaptations from one and the same original work, is not yet quite clear, and indeed forms a very difficult problem in literary criticism. According to A. Epstein, who devoted an important study to the problem, this work was a collection of legal decisions (halakot), mainly in Aramaic, which first appeared in Yehudai's short responsa or were taken down from his lectures by his pupils and probably arranged by them later. Owing to the fact that the responsa are so short and confine themselves to a mere statement of the decision in question they were called "Decisive Laws" ("Halakot Pesukot" or, according to a more Arabic mode of speech, "Halakot Keṭu'ot"). Of the numerous evidences brought forward by Epstein to prove that the responsa were

actually called thus, only one may be indicated here. At the end of a collection of Meir of Rothenburg's "She'elot u-Teshubot" (MS. Prague) some "Halakot Kezubot de-R. Yehudai" are given. Soon after this heading occurs the stereotyped form for "responsa," **וְשִׂאֲלָתָם** or **וְשִׂאֲמַרְתָּם**, etc. These halakot have been published according to this manuscript by Joel Müller under the title "Handschriftliche, Jehudai Gaon Zugewiesene Lehrsätze." Besides, there must have been incorporated into these "Halakot Pesukot" or "Halakot Keṭu'ot" a collection of "dinim," arranged according to the order of the Talmud or according to subject-matter; for such dinim are quoted by geonim and later rabbis as "Halakot Pesukot" and "Halakot Keṭu'ot," sometimes with and sometimes without a mention of the authorship of Yehudai Gaon or his pupils (for the reference see Epstein, "Ma'amar 'al Sefer Halakot Gedolot," in "Ha-Goren," iii. 57 *et seq.*).

Simeon Kayyara, author of the "Halakot Gedolot," as well as R. Anram, author of the well-known "Siddur," borrowed largely from these halakot of Yehudai Gaon, for which, as Epstein points out, the two terms "Halakot Pesukot" and "Halakot Keṭu'ot" were used promiscuously in the geonic period; only later, when the varying recensions of them increased in number, were the titles distinguished as designating two different recensions.

Yehudai's halakot were translated from Aramaic into Hebrew, including even the Aramaic quotations from the Talmud. This translation has been

preserved in an Oxford manuscript under the original title "Halakot Pesukot," being also known, according to the first word of the text, as "Hilkot Re'u"; and it was published by A. L. Schlossberg, Versailles, 1886. It was probably made in a Greek-speaking country, as Halberstam showed

in his introductory letter to Schlossberg's edition, and was brought thence to Babylonia. A very great part of it, however, is taken from the "Halakot Gedolot" in an abridged form, so that Epstein did not recognize it as being a translation of the "Halakot Pesukot," but rather deemed it a compilation of the "Halakot Gedolot," containing at the same time Hebrew quotations from the Aramaic "Halakot Pesukot."

The "Halakot Kezubot" seem to be a compilation from the "Halakot Pesukot" and the "Halakot Gedolot." They are preserved in a Parma manuscript that has been published by Hayyim M. Horowitz in "Halachische Schriften der Geonim," first part, pp. 14 *et seq.*, Frankfort-on-the-Main, 1881. According to the beginning of the text, however, these "Halakot Kezubot" are ascribed to Yehudai Gaon. Since the term "Kezubot," a synonym of "Pesukot,"

seems to have been prevalent in Western countries (see "Sefer we-Hizhir," ed. Freimann, ii., Introduction; "Halakot Gedolot," ed. Hildesheimer, p. 469; "She'elot u-Teshubot Sha'are Ze'ek," p. 29a; Zunz, in Steinschneider, "Hebr. Bibl." viii. 20), and as the "Halakot Kezubot" are not quoted in geonic literature, Epstein supposes Palestine or Italy to have been the birthplace of this compilation, which afterward was widely known in Germany and France, and was often copied and enlarged by additions. It is quoted especially in the "Sefer ha-Pardes," in the Vitry Mahzor, in the "Sefer Issur we-Hetter" (Merzbacher MS. No. 6), and others.

Much has been written about the relation between the "Halakot Pesukot" and the "Halakot Gedolot" and their respective authors. The note in Abraham ibn Daud's "Sefer ha-Kabbalah" ("M. J. C." i. 63) that Yehudai Gaon gathered his "Halakot Pesukot" from the "Halakot Gedolot" of Simeon Kayyara, and the supposition of the medieval Jewish scholars of Germany and northern France that Yehudai Gaon was the author of the "Halakot Gedolot," caused great confusion regarding the authorship, and also regarding the dates of these two authors. Recently, however, the disputed points have gradually been cleared up.

The writing of halakic compendiums was always censured by those who were afraid that such works might displace the study of the Talmud itself, the mass of the people being perfectly satisfied to know the final halakic decision without caring for its development in the Talmud. It is interesting to observe that as old a compendium as the "Halakot Pesukot" of Yehudai Gaon met with the disapproval of Paltoi, gaon of Pumbedita (842-858), for the very same reason (see Epstein, *l.c.* p. 57).

M. Sc.

**YEKATERINOSLAF (YEKATERINOSLAV):** Russian city founded in 1787 during the reign of Catherine II.; capital of the government of the same name. It is one of the most important commercial and industrial centers of southern Russia, the census of 1897 crediting it with a population of 121,216 persons, including 36,600 Jews. The latter are actively identified with the trades and industries of the city, about one-third of the entire Jewish population (2,388 families; in all 11,157 persons) deriving its income from commercial pursuits, and another third (2,712 master artisans and 480 apprentices) being engaged in industrial occupations. The city has more than thirty shops and factories, mainly grist-mills, lumber-mills, foundries, machine-shops, and tobacco-factories. Almost all of these establishments are owned by Jews, but the number of Jewish factory employees is comparatively low, although in one cigarette-paper factory and in one tobacco-factory the workmen are all Jews. There are 847 Jewish day-laborers, mainly drivers, porters, etc.

On account of its busy commercial and industrial life, Yekaterinoslaf serves as a center of attraction for the population of a very extensive region. The concentration in this city of such a considerable number of Jews, for the most part impecunious, was stimulated by a series of government measures enacted during the last twenty years, which limited the sphere of Jewish economic activity. Among these were the so-called temporary measures of 1882; the exclusion of the Don region (1880) and of Rostov and Taganrog from the Pale of Settlement; and the establishment of a government monopoly in the manufacture of alcoholic beverages (1896). All of these measures led to the increase in Yekaterinoslaf of a Jewish proletariat which, for lack of employment, became dependent on charity. Thus, in 1898, 1,830 families, representing 9,000 persons, were given aid for Passover. In the same year the local Jews supported the following charitable organizations: a hospital, a maternity home, a dispensary, a free-loan association ("gemilut hasadim"), a lodging-house ("haknasat orehim"), and a clerks' mutual aid society. The expenditures of these institutions, amounting to about 74,000 rubles, were defrayed mainly from the basket-tax (43,067 rubles) and from voluntary contributions and membership fees. At present (1905) the most important charitable organization is the Association for the Aid of Poor Jews, founded toward the end of 1898; its income in 1900 was 52,509 rubles, and its expenditures 47,611. The society maintains a free employment bureau.

Yekaterinoslaf has the following Jewish educational institutions: ten private schools, a Talmud Torah (400 pupils) founded in 1857, a yeshibah (74 students), and ninety-two hadarim (855 pupils). The Zionistic movement has made great progress in the city, the propaganda being carried on by several societies under the leadership of Michael URSINKIN. The attitude of the Christian population toward the Jews was expressed in 1881 in the decisions of the provincial commission concerning the Jewish question, formed here as in other government cities in order to determine the causes of the anti-Jewish outbreaks. This commission saw a way to the solution of the Jewish question in the passing of a series

of regulations limiting the rights of the Jews in commerce, in the acquisition of real estate, in the participation in local government, etc. The anti-Jewish outbreaks did not spare Yekaterinoslaf. On July 20, 1883, a mob invaded the Jewish houses and wrought great destruction. Many ruined families were compelled to seek safety in flight.

**YELAMMEDENU.** See TANHUMA MIDRASIM.  
**YELISAVETGRAD (ELIZABETHGRAD):**

Town in the government of Kherson, Russia. It was founded in 1754, and soon became one of the most important cities of southern Russia. The name of Yelisavetgrad recalls sad memories to the Russian Jews; for from that town issued the signal for the riots which brought upon them incalculable affliction and misery. As soon as Alexander III. had ascended the throne rumors of a rising against the Jews reached Yelisavetgrad, which caused the leaders of the Jewish community to apply to the governor for special protection. No notice was taken of the appeal, and on Wednesday, April 27, 1881, the dreaded outbreak took place.

A religious dispute in an inn concerning the use of Christian blood by the Jews served as a pretext for the rioters, who proceeded to the Jewish quarter and commenced a systematic destruction of Jewish shops and warehouses. At first the Jews attempted to protect their property; but, seeing that this only served to increase the violence of the mob, and that the soldiers, who were called to protect them, took part in the pillage, they barricaded themselves in their houses. For two days the rioters perpetrated, under the very eyes of the officials, and with the cooperation of the soldiers, the most barbarous and hideous deeds. Synagogues were wrecked and Jewesses outraged. Two young girls, in dread of violation, threw themselves from windows. An old man named Pelikov, who attempted to save his daughter, was thrown from the roof by the enraged soldiery. Many persons were killed; 500 houses and 100 shops were demolished; and 2,000,000 rubles' worth of property was stolen or destroyed.

In the revolutionary uprisings of 1905 the town was burned, and the mob killed the Jews and plundered their quarter.

**BIBLIOGRAPHY:** Jacobs, *Persecution of Jews in Russia*, 1881, p. 4; *Russkaya Mysl*, June, 1881, pp. 96-99; Sychewski, *Proti Yevreiskiya Bezobraziya*; H. Rosenthal, in *JEW. ENCYC.* i. 347, s.v. *Alexander III.*; Semenov, *Geographical-Statistical Dictionary of the Russian Empire* (in Russian), s.v. H. R. I. BR.

According to the census of 1897, Yelisavetgrad had a population of 61,841, including 24,340 Jews. The latter are prominent in the city's commerce, trade, and industries, and three-fourths of its factories are controlled by them. The number of factories exceeds eighty, among them being grist-mills, machine- and tool-factories, foundries, soap-factories, brick-yards, vinegar-distilleries, and tobacco-factories. Only tobacco manufacture, however, engages any considerable number of Jewish workers. There are in all 522 Jewish factory-laborers, 363 day-laborers, and 3,164 artisans.

The Jewish community supports a number of charitable institutions, among which may be mentioned a society for the aid of the poor (founded 1899), a loan society which lends money to the poor at a low rate of interest, and a Jewish dispensary with infirmary attached. More than 1,000 Jewish families have recourse to charity. In the winter of 1898, 1,100 families received fuel from charitable organizations, while 1,300 families applied for aid for Passover.

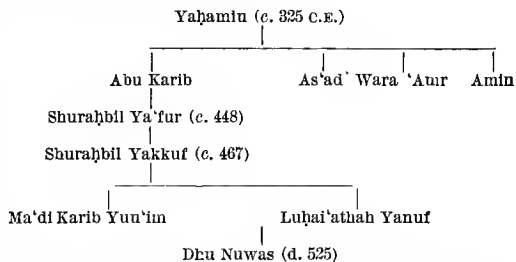

The Jewish children are sent either to the general or to the Jewish schools, although Jewish boys are not freely admitted to the former. The Jewish schools include a Talmud Torah with industrial classes, two government schools (one with industrial classes), several private schools, a school founded by the local Zionists, and 122 *hadarim*, including a free *heder* with sixty pupils. Early in 1881 there was organized among the Jews of Yelisavetgrad a Bible Brotherhood (see *BIBLETTZ*).

**YEMEN:** Province comprising the southwestern part of Arabia. Various traditions trace the earliest settlement of Jews in this region back to the time of Solomon, and the Sanaite Jews have a legend to the effect that their forefathers settled there forty-two years before the destruction of the First Temple. Under the prophet Jeremiah 75,000 Jews, including priests and Levites, are said to have gone to Yemen; and when Ezra commanded the Jews to return to Jerusalem they disobeyed, whereupon he pronounced an everlasting ban upon them. Tradition states, however, that as a punishment for this hasty action Ezra was denied burial in Palestine. As a result of this tradition, which is devoid of historicity, no Jew of Yemen gives the name of Ezra to a child, although all other Biblical appellatives are found there.

The actual immigration of Jews into Yemen appears to have taken place about the beginning of the second century c.e., although the province is mentioned neither by Josephus nor by the Mishnah or Talmud. According to Winckler, the Jews of Yemen enjoyed prosperity until the sixth century c.e., and the fourth sovereign before Dhu Nuwas was a convert to Judaism. The kingdoms of Sheba, Raidan, Haḍramaut, and Yamanat (Yemen) were united under the hegemony of the Yemenite kings, who were as follows:

Until recently Dhu Nuwas was regarded as the first king who was zealous for Judaism, but a chronicle of saints in the British Museum gives the name

of the martyr Arkir, who was condemned to death by Shurahbil Yakkuf at the instigation of his counselors, the rabbis. Although all these legends are extremely biased and are chiefly devoted to the portrayal of the persecution of Christians by the Jews, it is evident that Judaism had in the fourth century taken a firm hold upon the royal house. In this legend, as in others, the city of Najran is important. Two Jewish youths are said to have been killed there, whereupon Dhu Nuwas conquered the city and executed the king after offering him his choice between Judaism and death. The effect of these traditions was a bitter oppression of the Jews, first by the Christians and later by the Arabs.

The average Jewish population of Yemen for the first five centuries C.E. is said to have been about 3,000. The Jews were scattered throughout the country, but carried on an extensive commerce and thus succeeded in getting possession of many Jewish books. When Saladin became sultan in the last quarter of the twelfth century and the Shiites revolted against him, the trials of the Yemenite Jews began. There were few scholars among them at that time, and a false prophet arose, proclaiming the amalgamation of Judaism and Mohammedanism, and pretending to be able to prove the truth of his teachings from the Bible. In this hour of need the greatest Jewish scholar of Yemen, Jacob ben Nathan-

**Yemen and ael al-Fayyumi**, wrote for counsel to **Maimonides**, who replied in a consolatory epistle entitled "Iggeret Teman."

This letter made such an impression on the Jews of Yemen that, according to Saphir, they included the name of Maimonides in the Kaddish prayer. The false prophet was condemned to death and died in his illusion. Although Benjamin of Tudela did not personally visit Yemen, he gives certain data concerning the Yemenite Jews. Their capital was Teima and they called themselves Rechabites, while at their head stood the nasi Hanan. They were in constant strife with their Ismaelitic neighbors, from whom they won many victories and took much booty.

At the beginning of the nineteenth century the condition of the Jews of Yemen was miserable. They were under the jurisdiction of the Iman, and were forbidden to wear new or good clothes, nor might they ride an ass or a mule, being compelled to make the longest journeys on foot when occasion required it. They were prohibited, moreover, from engaging in money transactions, and were all mechanics, being employed chiefly as carpenters, masons, and smiths. At the beginning of the nineteenth century they are said to have numbered 30,000, and to have lived principally in Aden (200), Sana (10,000), Sada (1,000), Dhamar (1,000), and the desert of Beda (2,000). In recent times there have been no Jews in the Tahama (the low coast-land) nor in Hodeida, but they now reside in the interior of the plateau. Settlements of considerable size are found in the vicinity of Sana, and are divided between Manakhah, with 3,000 Jews, and Sana, which has a separate quarter containing about 8,000. The Jews have also special sections of the city in Kaukaban, Weilan, and Dhamar. Special mention should likewise be made of the Jewish village of Al-Gharaba, two kilometers from

Reda'. The chief industry of the Jews of Yemen is the making of pottery, which is found in all their settlements and which has rendered them famous throughout the East. They engage very little in commerce. An important personage among the Yemenite Jews in the last quarter of the nineteenth century was Aaron Chehip, known as the "Coffee King." He came to a violent end, however, being murderously assaulted and robbed by the natives.

According to the most recent investigations, there is no longer any doubt that the Jews of Yemen, whatever the date of their settlement, brought with them the Bible and a large part of the traditional Haggadah, which also had an influence on the Koran. The Talmud, or at least a part of it, was likewise known in Yemen, and the fact that it was less widely distributed there than in Europe was due solely to the poverty of the people, which made it impossible to buy more copies. The Jews of Yemen must have been in close touch with Babylonia, since they reckoned time according to the Seleucid era, and this chronology is found on tombstones as early as the ninth century. All the Hebrew manuscripts of Yemen, moreover, show the superlinear, or Babylonian, system of punctuation. It is clear from the "Iggeret Teman" that though the Yemenite Jews were not Talmudists, they acted according to the decisions of Rab Ashi in traditional law, at least after they had come under the influence of Maimonides. The "Yad," which they called "Hibbur," and the Shulhan 'Arnk of Joseph Caro were regarded by them as the highest authorities in Jewish law.

The oldest Yemenite manuscripts are those of the Bible, which the Yemenite Jews call "Taj" (= "crown"). They date from the ninth century, and each of them has a short Masoretic introduction, while many contain Arabic commentaries. The Masorah was highly valued by the Jews of Yemen, and a special compilation, made by Yahya Salih, was called by Ginsburg the "Masorah of Teman." They were acquainted with Saadia, Rashi, Kimhi, Nahmanides, and Isaac Arama, besides producing a number of exegetes from among themselves. In the fourteenth century **Nathanael b. Isaiah** wrote an Arabic commentary on the Bible, full of haggadot and almost wholly destitute of any real Biblical hermeneutics, while in the second half of the fifteenth century **Saadia b. David**

**al-'Adani** was the author of a commentary on Leviticus, Numbers, and Deuteronomy, and **Abraham b. Solomon** wrote on the Prophets (British Museum). Of the Talmud the following treatises are now known to exist in manuscript: Bezaḥ, Pesahim, Mo'ed Qatan, Megillah, and Zebahim. The Yemenite **Abner b. Ker ha-Shoshani** wrote a double commentary in Hebrew on the "En Ya'akov" of Jacob Habib, and between 1478 and 1483 Saadia b. David al-'Adani composed a gloss on the "Yad" of Maimonides. Among the midrashim compiled in Yemen mention should be made of the "Midrash ha-Gadol" of **David bar Amram al-'Adani** (vol. i., ed. Schechter, 1902). Between 1413 and 1430 the physician **Yahya Zechariah b. Solomon** wrote a compila-

tion entitled "Midrash ha-Hefez," which included the Pentateuch, Lamentations, Esther, and the haftarah, while between 1484 and 1493 **David al-Lawani** composed his "Midrash al-Wajiz al-Mughni." In the thirteenth and fourteenth centuries supercommentaries on the "Yad" were written by **Salih Musa al-Hadhari**, **Isaac b. Abraham**, and **David b. Solomon**.

The Cabala was and is very popular among the Yemenite Jews, who are familiar with the Zohar and with the work of all the European cabalists. One of them, **Solomon b. Dawid ha-Kohen**, has written a cabalistic treatise in thirteen chapters, entitled "Lehem Shelomoh."

Among the Yemenite poets who wrote Hebrew

Manuscripts of the Yemen Siddur are in the British Museum. The prayers agree in part with the Sephardic and in part with the Ashkenazic liturgy, and their language is partly Hebrew and partly Aramaic and Arabic, while the daily so-called "Ma'amadot" prayers are written in Aramaic. The Yemenite Siddur appeared in Jerusalem 1892 (2d ed. 1898), and in Vienna 1896.

and Arabic hymns modeled after the Spanish school, mention may be made of **Yahya al-Dhahri** and the members of the Al-Shabbezi family. A single non-religious work, inspired by **Hariri**, was written in 1573 by **Zechariah b. Saadia** (identical with the **Yahya al-Dhahri** mentioned above), under the title "Sefer ha-Musar." The philosophical writers include: **Saadia b. Jabez** and **Saadia b. Mas'ud**, both at the beginning of the fourteenth century; **Ibn al-Hawas**, the author of a treatise in the form of a dialogue written in rimed prose, and termed by its author the "Flower of Yemen"; **Hasan al-Dhamari**; and **Joseph ha-Levi b. Jefes**, who wrote the philosophical treatises "Ner Yisrael" (1420) and "Kitab al-Masahah."

**YESHIBAH:** A high school; a rabbinical college. It is the oldest institution of Jewish learning, and ranks higher than the **HEDER** or the **TALMUD TORAH**. The term "yeshibah" and the Aramaic equivalent "metibta" (both found in the Talmud) originally meant a session, a council, or a meeting of scholars, over which presided the "elder." The Patriarchs were all elders of a yeshibah (Yoma 28b). R. Pappa was elected "rosh yeshibah" (or "resh metibta"), *i.e.*, president of the yeshibah, and it was his duty to deliver a lecture and discussion before the yeshibah of a large and mixed assembly (Ber. 57a and Rashi *ad loc.*; B. K. 117a). At first the bet ha-midrash was the place where the yeshibah assembled, one or two (morning and afternoon) sessions being held daily. Later, when the number of students increased, it became necessary to hold the sessions in a separate large hall adjoining the bet ha-midrash, and this hall was known by the name of "yeshibah." The general term for the lecture was probably "pesikta" or "mekilta," which, like the modern term "sh'ur," means "measure," indicating the fixed and limited time occupied by the rosh yeshibah in delivering the discourse—from two to three hours.

During the Talmudic period the principal Palestinian yeshivot were at Sepphoris, Tiberias, and Cæsarea, while the leading Babylonian ones were at Mahuza, Nehardea, Sura, and Pumbedita. Those at the last two towns were maintained in the geonic period (see **ACADEMIES**). The principal seat of the Rabbis after the days of the Second Temple was Pumbedita ("Iggeret Rab Sherira Gaon," ed. Goldberg, p. 32, Mayence, 1873). The attendance at the Babylonian yeshivot gradually decreased. Rab had 1,200 students at his yeshibah; R. Huna had 800 students, with 13 amoraim as interpreters; Rabbah and R. Joseph each had 400; and R. Ashi had only 200 (Ket. 106a). The sessions of the Babylonian yeshivot were interrupted on several occasions, and were finally suspended by the Persian persecutions, the last being held at Bagdad. Benjamin of Tudela (1160-73) found ten yeshivot there, and he enumerates the names of every rosh yeshibah, the principal one being R. Samuel b. Eli. The "rosh ha-golah" (president of the Captivity) bestowed "semikah" (ordination) upon the

graduates of the yeshibah (Benjamin

of Tudela, "Itinerary," ed. Asher, p.

**Babylon.** 60, London, 1840). Pethahiah of Regensburg, in his "Sibuh" (travels),

written in the same century, describes the Bagdad yeshibah as follows: "The rosh yeshibah [R. Samuel ha-Levi b. Eli] has about 2,000 students at a time, and there are over 500 around him who are well informed. The students receive lessons from other teachers before they are admitted to the yeshibah. The rosh ha-golah is R. Eliezer, and under him is the rosh yeshibah. The latter occupies a large house covered with tapestry. He is dressed in a gold-trimmed garment and sits on high, while the students sit on the ground. He discourses through an interpreter or explainer ["meturge-

man"], who answers all questions asked by the students, and if he does not know inquires of the rosh yeshibah. Sometimes there are several interpreters, each expounding a treatise in a different part of the yeshibah. The whole study is with an intonation" (ed. Benisch, p. 16, London, 1861). Toward the end of the eleventh century an important yeshibah at Bagdad was under the guidance of Isaac ibn Sakin, and later it was under Samuel b. David ha-Kohen, who defended Maimonides against the edict of excommunication (1289).

The example of the yeshivot of Babylon was followed throughout the Levant. It is curious that even the Karaites carried along with them the title of "rosh yeshibah," bestowing it in the tenth century on Jacob ha-Tamani (= "of Tuman," on the Bosphorus) (d. 958; see Pinsker, "Liḳḳuṭe Qadmoniyot," Appendix, p. 86; the date is disputed by Deinaud in "Ha-Shahar," viii. 452). Until the ninth century the Jews in European countries and elsewhere depended entirely upon the decisions of the authorities in the yeshivot of Babylon, which they supported liberally. It was largely due to the encouragement of Charlemagne that the learned men of Babylon emigrated and later established yeshivot in France and Germany. During the tenth century three new yeshivot were founded: the first by Shemariah b. Elhanan at Miẓr (Cairo), Egypt; the second by Hushiel at Kairwan in North Africa; and the third by Moses b. Enoch (d. 965) at Cordova (Abraham ibn Daud, "Sefer ha-Qabbalah").

The yeshibah of Narbonne was perhaps the most famous of its time, drawing eager students from all parts of France and Germany. Benjamin

**In** the traveler says: "R. Abraham [ibn **France.** Dand] is rosh yeshibah at Narbonne, whence the study of the Law spreads

over all countries. At Lunel the foreign students who attend the yeshibah are supplied with food and raiment at the public expense. At Beaucaire there is a grand yeshibah under the presidency of Abraham ibn Dand, an eminent scholar of the Scriptures and Talmud, who attracts students from distant countries, and who provides for them from his private means, which are quite considerable. At Marseilles, in the upper city near the fortress, is a great yeshibah which boasts of very learned scholars, headed by R. Simon Anatolio, Abba Mari b. Isaac [author of the "Ittur"], and others. The scholars and descendants of Rasli hold yeshivot at Troyes and Ramerupt. Paris contains many learned men whose equals are not to be found anywhere upon earth" ("Massa'ot," pp. 4, 6, 112). The yeshibah of Paris was closed by order of King Philip Augustus (1181), but the yeshibah at Champagne, where the tosafists pursued their work, still flourished, as did also that at Dampierre, where a grandson of Rashi conducted a yeshibah of considerable authority. R. Isaac, a nephew of R. Tam, guided a yeshibah of sixty pupils, each one studying for himself a different treatise of the Talmud, and all together taking up one treatise at a time in rotation under the rosh yeshibah ("Zedah la-Derek," Introduction, ed. Ferrara, 1554, p. 4a). A yeshibah was reopened at Ferris for a short time in the thirteenth century by R. Jehiel, who emigrated to the

Holy Land. Mattithiah b. Joseph of Provence reestablished a yeshibah at Paris in the fourteenth century, and Jacob of Orleans (d. 1189), a pupil of R. Tam, crossed the Channel and opened a yeshibah in London.

The first yeshibah in Spain was established at Cordova, and attracted the scholars of the Levant. Later were founded the yeshibah of Granada and that of Lucena, the latter being suc-

**In Spain,** cessively conducted by Isaac Alfasi **Germany,** (1090) and his pupil Ibn Migash. **Italy, and** These examples were followed by Jehiel ben Asher at Toledo, where he

**Holland.** changed the whole tone of Spanish Judaism; by Solomon ben Adret at Barcelona in 1305; and by R. Nissim at the same city in 1372. R. Gershom (960-1028) emigrated from France to Mayence, where he founded a yeshibah and gathered many students from Germany and Italy. This yeshibah flourished for more than eighty years and became a center of Talmudic activity. Joseph Colon (1420-80), the author of a collection of responsa, had a yeshibah at Pavia, Italy; and Judah Minz of Mayence founded a yeshibah at Padua (1504-26). Joseph Ottolenghi opened a yeshibah in Cremona, northern Italy, prior to the public burning of the Talmud in 1559. The yeshibah 'Ez Hayyim in Amsterdam flourished during the eighteenth century, and its publications of responsa under the title "Peri 'Ez Hayyim" extended from 1733 to 1792. In the same century there were celebrated yeshibot at Altona-Hamburg, Frankfort-on-the-Main, Fürth, and Metz. At Nikolshurg Mordecai Benet had a yeshibah with from 300 to 400 students.

Jacob Pollak (1460-1541), the founder of "hillukim" (the sophistic method of Talmudic discussions), was the first to transfer the rabbinical science from Germany to Poland; he opened a yeshibah at Cracow, which later was presided over by Moses Isserles and became the most celebrated school throughout the whole European Jewry. All who sought sound learning betook themselves

**In Poland.** thither; and the fact that a man had been educated in the yeshibah of Poland was of itself a high recommendation if he sought to obtain a position as rabbi. Other German scholars settled in Lithuania, Ruthenia, and Volhynia and founded new centers of rabbinic study.

The three documents mentioned below describe the yeshibah at various times and in various countries, and illustrate the life, methods, regulations, and course of studies in the old yeshibah. A document called "Hukke ha-Torah" (= "the laws of the Torah," *i. e.*, rules or bylaws regulating the teaching of the Torah), and appended to the "Semaḥ" of Isaac Corbeil under date of 1309, throws light on the attitude and conditions of the yeshibah in northern France in the thirteenth century. There were

two schools, one called "midrash gadol" and the other "midrash kaṭon," **Curriculum, 13th Century.** corresponding respectively to the Christian cathedral school and parochial school at that time; the lower schools were known also as "petites écoles," and in some paragraphs the "higher midrash" is referred to as

"yeshibah." The "Hukke ha-Torah" is composed of three different collections, and may have been added to from time to time, as the occasion required, to complete and perfect the regulations. The rules for the higher and lower schools are mixed indiscriminately. The students of the higher midrash were called "perushim" (= "Pharisees"), a title still retained by married students in the yeshibah. The length of the term was seven years, during which time the pupils dwelt in the midrash, food and lodging being provided for them. The head teacher, called "rosh yeshibah," also lodged there during the week, but returned to his home on Friday night. Interpreters were employed, one for every ten students, to explain the lecture of the rosh yeshibah (Güdemann, "Gesch. des Erziehungswesens," etc., i., note 3; Jacobs, "Jews of Angevin England," pp. 343 *et seq.*).

The following is a summary of the chief provisions of this important code of education. The separate sections sometimes occur in more than one of the three recensions, here indicated by the letters A, B, C. Jacobs ("Jews of Angevin England") is of the opinion that A was composed in England in the thirteenth century, on account of the references to the capital and to the long winter nights:

(i.) Every first-born male is to be set apart ("separated") for the study of the Law from the eighth day after circumcision (A 1, B 5).

(ii.) At five years of age every Jewish boy is to be brought in the month Nisan to the small school of the province, and taught to read; then put to Leviticus, then to read the weekly portion in Hebrew, then in the vernacular, and then in the Targum (A 7, 8; B 6; C 1).

(iii.) At ten years he studies the Mishnah, beginning with the tractate Berakot of the Talmud, and going through the smaller tractates of the order Mo'ed in the next three years (B 6, C 2).

(iv.) At thirteen years the education of the ordinary boy is completed; that of the separated continues in the same school till the lad is sixteen, when he decides for himself whether he will devote his life to the Law, and, if so, goes up to the great school of the separated in the capital for another seven years (A 2, 3; C 3).

(v.) The small school of the province is to be held in a two-story house, capable of holding 100 pupils, 10 teachers, and a rector to supervise. No teaching is to be done at home, and the rector must not reside at the school with his family, but must go home every Sabbath (B 6, A 5, B 3).

(vi.) The rector gives two lectures—one in the morning, one in the afternoon. The teachers go over each lesson twice with their classes [this probably refers to the great school of the capital]. At the end of each week there is repetition of the week's work; similarly at the end of the month, and at the end of the summer and of the winter session. No teacher may take more than ten pupils, nor may he have any other calling than teaching (B 7; A 6, 10, 12).

(vii.) The lads are encouraged to examine one another every evening in the day's lessons. Dull scholars are to be sent away, so as not to keep back the more forward. Teaching is to be by book, not from memory. In winter the evening lessons are to be short, on account of the light (A 5, 7, 9, 11).

(viii.) Every member of the community pays twelve pence yearly as school-fees, instead of the half-shekel of old. The great school is to be bought, and then let out to the separated. The separated pay for their lodging, and a share of the teachers' salaries. The rector gets 20 marks yearly, a teacher 8 (A 4; B 1, 6).

Nathan Hannover, in "Yewen Mezulah" (ed. Venice, 1653, end), relates the history of the Chmielnicki massacres and describes the yeshibah at that period: "Nearly all communities in Poland supported a yeshibah. They maintained the students and gave them out of the public funds fixed sums weekly for ordinary expenses. The bahurim taught the smaller

boys. A community consisting of fifty 'ba'ale battim' [= "householders"] supported about thirty students. In addition to receiving

**Yeshibah  
Culture,  
17th Cen-  
tury.**

fixed stipends the students were invited as guests to the tables of the community, every household having invariably one or more such guests from the yeshibah. Consequently the number of ḥakamim increased to such an extent that very often there were found twenty ḥakamim bearing the title of 'morenu' or 'haber' in a community of fifty householders. The rosh yeshibah was above all in rank. The terms of study were as follows: in summer from the 1st of Iyyar to the 15th of Ab, and in winter from the 1st of Heshwan to the 15th of Tebet, the intervals being devoted to private studies. In the first part of each season, namely, from the 1st of Iyyar to Pentecost, and from the 1st of Heshwan to Ḥannukah, the studies in the yeshibah consisted of Gemara with Rashi and tosafof, one page daily. This was called one halakah. The rosh yeshibah sat on a chair, and the students stood around him. The students prepared themselves beforehand by carefully studying the halakah of the day, and then asked the rosh yeshibah to explain the difficult passages. After he had answered, all kept silence, and he then discussed a 'hilluk,' a pilpulistic review of the halakah in detail. This lasted till noon or a little later. The second half of the term was devoted to the study of Alfasi and the posekim [decisions and codes], particularly the four volumes of the Turim with commentaries. A few weeks before the term expired the rosh yeshibah permitted the best students to deliver a discourse, in order to familiarize them with the art of delivering a hilluk. The Talmud was studied in the order of the sederim. Every rosh yeshibah had a 'shammash' [= "attendant"], whose business was to see that the students in every class attended strictly to their studies. Every Thursday the students were ushered into the presence of the gabbai, who examined them. For failure in the examination the student was sometimes chastised with a rod by the shammash and sometimes admonished in the presence of the other students. In the last days of the term the pupils reviewed what they had learned during the term. When the session ended the students traveled with the rosh yeshibah to the fairs on market-days ["yerid"]: in summer to the fairs of Zaslav and Yaroslav, and in winter to the fairs of Lemberg and Lublin. The students were allowed to choose any yeshibah in those places during the fairs. The gathering of so many students at the fairs, where merchants congregated to sell or purchase goods, was the occasion of making hundreds of marriage engagements; the best students were selected on the recommendation of the rosh yeshibah, and the amount of dowry offered varied according to the student's knowledge of the Talmud and his skill in delivering a hilluk. Both the students and the rosh yeshibah were held in high esteem by rich and poor alike. The rosh yeshibah received many presents in money and goods; if neither a Kohen nor a Levite, he was entitled to the third portion ["shelishi"] in the order of persons called up to read the sidra. In leaving the syna-

gogue, the rosh yeshibah led the students, who were followed by the people. On Sabbaths and holy days he was visited by the prominent members of the community."

Yeshivot began to flourish again in the Holy Land in the sixteenth century—in Safed under Berab and Caro, and in Jerusalem under Levi ibn Ḥabib. Some

private yeshivot were supported by individual donors from abroad; and in Palestine. this became the prevailing fashion.

Two brothers named Vega in Leghorn supported the yeshibah of Jacob Ḥagiz in the seventeenth century. A document dated 1758 and copied by Hazan in his bibliography "Ha-Ma'alot li-Shelomoh" (p. 102b, Alexandria, 1898) gives a list of the yeshivot in Jerusalem at that time and shows that a majority of them were supported by private charity. The list is interesting as to the details of management and the courses of study in the eighteenth century among the Sephardim, and is as follows:

Yeshibat Jacob Pereira: Subsidized by Jacob Pereira of Holland; income 1,200 piasters per annum; rosh yeshibah, Ḥakam Meyuḥas b. Samuel, author of "Peri ba-Adamah," aged 53; 30 baḥurim, 3 melamedim. Order of study: each student separately one halakah; in the afternoon same halakah by all together, and also one chapter of Mishnah with commentaries.

Yeshibat Neweh Shalom: Supported by Isaac di Mayo & Co. of Constantinople; income 700 piasters; rosh yeshibah, Raphael Moses Bulah, author of "Ge' Mekushshar," etc.; 20 students, 2 melamedim. Order of study: in the forenoon halakah; in the afternoon 5 folios of [Di Vida's] "Resnit Ḥokmah," and Tur with "Bet Yosef."

Yeshibat Yefat'er 'Anawim: Supported by Joseph and Raphael Franco of Leghorn; income 600 piasters; rosh yeshibah, Abraham ibn Asher, etc. Order of study: in the forenoon 3 chapters of Mishnah with commentaries.

Yeshibat Hased le-Abraham u-Binyan Shelomoh: Income 1,000 piasters; rosh yeshibah, R. Zemah, etc.; 6 baḥurim. Order of study: in the forenoon 3 hours halakah, in the afternoon 3 hours Tur.

Yeshibat Damesek Eliezer: Supported by Eliezer Ashkenazi; income 450 piasters; rosh yeshibah, Judah Nabon, etc.; 8 students. Order of study: all together one halakah lasting 1½ hours; the rest of the day each one studies for himself; on Wednesday the pupils review what they have studied during the past week.

Yeshibat Keneset Yisrael: Organized by Ḥayyim ibn 'Attar and supported by donations from abroad; income 600 piasters; rosh yeshibah, Ḥayyim Mundichi, etc.; 4 baḥurim. Study: halakah.

Yeshibat Mordecai Taluk: Supported by Mordecai Taluk; income 400 piasters; rosh yeshibah, Jonah Nabon, etc.; 4 baḥurim.

Yeshibat Abraham Meyuḥas: income 1,000 piasters; rosh yeshibah, Meir Sornaga, etc.; 5 baḥurim. Study: halakah 7 hours daily.

Midrash ha-Ḥasidim: Rosh yeshibah, Shalom Sherebi, etc.

Among the rabbis was Abraham ha-Kohen Eskir, who never let midnight pass without study, and who studied all night on Sabbaths and holy days. Three other yeshivot were composed of laymen ("ba'ale battim"), who studied the Bible, Mishnah, and Musar (ethics). The Midrash ha-Ḥasidim is now called "Bet El," and is a congregation of cabalists who study the Zohar and the works of Luria. The other yeshivot of the Sephardim are still subsidized by individual donors abroad. The yeshivot of the Ashkenazim were not established before the latter part of the nineteenth century.

The drift of the Reform movement in Germany from the time of Mendelssohn, when the need of secular knowledge became apparent, caused the gradual decline of the yeshivot, until they were

partly replaced by the rabbinical and theological seminaries. There is now no trace of the great yeshibot in France or elsewhere in western Europe. When civil rights were granted to the Jews by France in 1831 there remained only the yeshibah in Metz, officially named "Collège Rabbinique," which, like all other religious institutions, was supported out of the public budget. The yeshibah still existed in Bohemia and Moravia, but had lost many of its former characteristics.

The Reform movement on one side and the ensnaring Hasidic tendencies on the other caused the pupils of the Wilna Gaon to deliberate how they might preserve the true Jewish learning and perpetuate the method and style of study inaugurated by the Gaon, who was rather opposed to pilpul and the *hillukim* as practised in the yeshibot of Poland. With this aim, R. Hayyim, the chief disciple of the Gaon, organized in 1803 the celebrated yeshibah of

**Volozhin** Volozhin, a small town in the government of Wilna, and his own birth-place. His chief object was to make the students independent of private charity; and, being a merchant and possessing considerable wealth, he provided at first for the comfort of the students out of his own means, maintaining some at his table and paying for the board and lodging of others. He started with ten students, and when the number became too large for his means, he issued appeals for assistance to the neighboring communities, which were promptly responded to. At the time of his death in 1838 the number of students was about 100. The yeshibah was continued under the leadership of his son R. Isaac and his son-in-law R. Hillel; and in 1854 Naphtali Zebi Berlin, a son-in-law of R. Isaac, succeeded to the position of rosh yeshibah of Volozhin. The *Maskilim* advocated the introduction into the yeshibah of secular sciences and modern methods of pedagogy; and the attention of the government having been drawn to the matter, it decided to close the yeshibah in 1879. Two years later Berlin succeeded in inducing the government to revoke the edict, and reopened the yeshibah, which he conducted with renewed energy till 1891; it was then closed again by the government, which accused some of the students of having joined the revolutionary movement. After Berlin's death in 1893 the yeshibah was reopened under the management of Joseph Baer Solovitchik. At present (1905) there are about 200 students, and the rosh yeshibah is Raphael Schapiro.

Under the leadership of Berlin the Volozhin yeshibah attained its highest efficiency, having nearly 400 students, among whom were about 60 *perushim*. The cost of its maintenance was about 40,000 rubles annually, which sum was collected by *meshullahim* in Russia and America. Poor and rich students alike flocked to this yeshibah from all parts of Europe and even from America. The rich students simply followed the advice of the *Mishnah*: "Wander forth to a home of the Torah" (Ab. iv. 18). Those students who received a regular allowance from home and paid their own expenses were known as "*köstnikers*" (= "easy boarders"), while the poor students who

depended on the weekly allowance of the *halukkah* from the yeshibah fund were called "*wochernikers*" (= "weeklies"). The amount ranged from 60 to 75 copecks per week for the *baḥurim*, and from 2 to 3 rubles per week for the *perushim*, who sent about two-thirds of the allowance home to support their families. A special fund created by Brodsky draws an income which provides 20 *perushim* with 4 rubles each per week. Books were furnished free by the yeshibah. The small stipend was not sufficient to provide food, lodging, and clothing for the indigent students, and the majority of them were obliged to lodge in the class-rooms of the yeshibah or its annex, sleeping on the floor, on the seats, or on the tables in both summer and winter, and having as bedding sacks of straw seldom furnished with linen. They endured great privation, as described in the injunction: "Eat a morsel of bread with salt, drink water by measure, sleep upon the ground, and live a life of tribulation whilst thou toilest in the Torah" (Ab. vi. 4). Some students were invited to board free one day in the week in the houses of the charitably disposed. In fact, the charitable spirit of the town was remarkable; the poorest washer-woman deemed it her duty to give board to one or two students systematically during one or two days a week, and there was hardly a Jewish family in the town that did not shelter in its house one or more students every night, these lodgers taking regular turns one night a week. The days for free lodging were called in the yeshibah vernacular "eating days."

The students in the yeshibah were grouped according to the cities whence they came. Thus one would be known as "Itzel der Kovner" (Isaac of Kovno) and another as "Getzil der Warsawer." Some received the title "*illui*" (= "the excellent") or "*matmid*" (= "diligent student"), such a one being known, for example, as "Der Kovner *Illui*" or "Der Lomzer *Matmid*," assuming that only one from a town was so designated. The title was given by the general consent of the students. They studied singly or in pairs, there being no classes in the general sense of the term; the single pupils or pairs studied according to their grade of learning, asking explanations of difficult passages from those of a higher grade or from the rosh yeshibah. Nearly all studied the Talmud and *poskim*, and more especially the laws relating to civil and religious matters in common practise. The Haggadah of the Talmud was excluded from their studies. The only occasion on which the students were together was when the rosh yeshibah delivered his lecture, called "*shi'ur*," for a certain "*sugya*" (lesson) on a halakic subject, which lasted about two hours; after this the students discussed the subject among themselves and with the rosh yeshibah. This generally took place in the afternoon session, but sometimes the assistant rosh yeshibah delivered a similar lecture in the forenoon. The rest of the session was spent in studying the subject of the *shi'ur* beforehand, or in private study.

Sometimes the rosh yeshibah would call in to see if the students attended to their studies. Besides there were "*mashgihim*" (supervisors), whose duty

was to watch the class-rooms as monitors and keep the students from idling. They served also in the capacity of censors or inquisitors, especially to see that no student smuggled into the yeshibah Neo-Hebrew books or modern literature, such as novels or works that developed "liberal" views on religion. Such books were characterized by the "mashgiāh" as "terefah" and "pasul," *i. e.*, not fit to be read. When a student was detected reading such a book he was reprimanded, fined, or suspended by the rosh yeshibah. The Volozhin mashgiḥim, however, did not go beyond the enclosure of the school, and the student was not interfered with outside of the yeshibah when reading "sefarim ḥizouim" (books outside of the Jewish sphere). These supervisors even encouraged the students to acquire secular knowledge in private, but those in other yeshibot were more strict in this respect.

The official hours of study extended from sunrise to sunset, time being allowed for prayers and meals; but the enthusiasm of some students knew no bounds, and they often studied till midnight. The yeshibah was open all night, and the cost of candles was a large item in its expenditure. Usually, however, the night sessions were suspended between the 15th of Iyyar and the 15th of Ab (three summer months) in compliance with the advice of R. Judah he-Ḥasid ("Sefer Ḥasidim," § 565, old ed.). Vacation time was in the holiday months of Nisan and Tishri, when the perushim went home to their families and the baḥurim to their parents to enjoy the holidays. Those who remained in Volozhin visited the house of the rosh yeshibah and entertained themselves by singing "zemirot" and drinking "le-ḥayyim," *i. e.*, toasting long life to the rosh yeshibah. "At the conclusion of every 'zemer' [song] a student knocks with his fist on the table and cries, 'Hurrah for the rabbi!' and all answer, 'Hurrah, hurrah, hurrah!'" ("Ila-Shaḥar," viii. 166, note). Another enjoyable occasion was at the completion of a "masseket" or "seder" (סיוּמָן), when all students and invited guests participated in an elaborate meal.

In almost every Russian town with a large Jewish population there are yeshibot under the immediate supervision of the local rabbis, but account is taken here only of those which established a wide reputation and attracted students from the neighboring towns and foreign countries.

**Other Yeshibot in Russia.** The yeshibah of Minsk, presided over first by Aryeh Loeb, author of "Sha'agan Aryeh" (d. 1785), and later by Joshua Eisik Ḥarif, preceded the yeshibah of Volozhin. In 1831 a yeshibah was founded at Wilna by a band of forty young scholars, and was known as the "Ferziglach" (= "party of forty"). The rosh yeshibah was David Cohen, the "Kosover." In the same year a yeshibah named after R. Maila was organized there under the presidency of R. Mordecai and R. Eliezer Teitz. The Maila yeshibah still (1905) exists; and its cost of maintenance is about 5,000 rubles annually ("Ozar ha-Sifrut," iv. 532; "Ha-Asif," 1885, p. 149). Two other yeshibot, one founded by Mordecai Melzer (Klatzki) and the other by Israel Salanter, were opposed to each other in the mode of learning, the

former adopting the style of pilpul and the latter that of peshat (logical reasoning).

Other noted yeshibot are at Slonim, Mir, and Eisheshek. The yeshibah of Slobotka was organized by Israel Salanter. The yeshibah at Kovno was opened in 1872 by Isaac Blazer (now in Jerusalem) under the auspices of Isaac Elhanan Spector, being attended mainly by perushim. In 1877 a banker of Berlin named Lachman donated 75,000 rubles in property for the maintenance of this yeshibah (see "Ha-Meliz," 1888, Nos. 177, 186). The yeshibah at Vitebsk conducted by Zalman Landau, later rabbi in St. Petersburg, was noted for the method by which its students learned in company every halakah in Talmud according to the decision in the codes (= מַסְקֵנְתָּה אֵלֵיכָּה דְהַלְכוּתָּה). At Chelm (government of Kovno) Simḥah Süssel conducted a yeshibah with a somewhat more modern method (about 1880). In 1882 Isaac Jacob Reines proposed to meet the demands of the government by establishing a yeshibah with a ten-year course, during which the student was to acquire the rabbinical knowledge necessary for ordination as a rabbi, and at the same time secure the secular education required of a government rabbi. The plan met with opposition, however, and after an experiment of four years the yeshibah was closed by the authorities. Reines opened at Lida in 1885 a regular yeshibah on the lines of that at Kovno.

The Ḥasidim, who were always opposed to the yeshibah for spending time on dry legalism instead of in "devotion," recently showed a conciliatory spirit and change of opinion by recognizing the worth of the yeshibah; and under the leadership of their "rebbe" and "zaḏdik," Menahem Mendel of Lubavitz, they have organized the society Tomeke Temimim, which supports no less than four yeshibot. They are located at Lubavitz, Zemin, Dokshitz (government of Minsk), and Horoditch (government of Vitebsk), and are attended by a total of 200 students, with an expenditure of nearly 40,000 rubles per annum.

Hungary is noted for its yeshibot, the most prominent of which is that of Presburg established by Moses Sofer, author of "Ḥatam Sofer." Others are

at Eisenstadt (Kis-Marton), Nyitra, In Papa, Mattersdorf (Nagy-Marton), Hungary. Szik-Udvarhely, Grosswardein (Nagy-

Varad), Szatmár, Huszth, and twenty other places. These, however, have not established so high a reputation as have the Russian yeshibot. Ruben Brainin compares the type of the Russian yeshibah baḥur with that of Hungary, and gives his opinion that "the former is more improved internally [in mind] and the latter externally [in dress]" ("Ha-Zofeh," i. No. 219).

Among the modern yeshibot in Jerusalem is the 'Ez Ḥayyim, organized in 1851, with Eliezer Dan, son-in-law of Joseph Schwarz, as rosh yeshibah. This yeshibah has about 100 students and is connected with a Talmud Torah. It is patronized by Rabbi Samuel Salant (see Lunetz, "Luah," 5664, pp. 121-167). The yeshibah at Me'ah She'arim, a suburb of Jerusalem, has about 100 students. The rosh yeshibah is Rabbi S. H. Hurwitz, known as the "Dubrowner." Yeshibat Ohel Mosheh has about 35

students, and Jacob Urnstein is its rosh yeshibah. It was founded by R. Diskin. The principal yeshibah is the Torat Hayyim, with about 150 students, and Isaac Wiuegrad as rosh yeshibah. The Sephardim maintain the Tif'eret Yerushalayim and other private yeshibot.

The yeshibah system was transplanted in America by the Russian immigrants. The first yeshibah,

'Ez Hayyim (Talmudical academy),

In America. It was organized in 1836 in New York, and owns its school property at 85 Henry street. Its general expense is \$5,000 per annum, and the average attendance about 175 students, with 6 melammedim teaching as many classes; namely, 2 for Humesch (Pentateuch) and 4 for Talmud, consisting of the three Babot (B. K., B. M., B. B.) with Rashi. The hours of study are from 9 A.M. to 12 M. and from 1 to 4 P.M. for Hebrew, and from 4 to 6 P.M. for English secular subjects. Saturday is review day for the Hebrew studies of the week. The course of study requires from three to four years.

Yeshibat Rabbenu Jacob Joseph, located at 197 Henry street, New York, was organized in 1902. The president and general superintendent is Samuel Isaac Andron, and the principal R. Meir Hecht. There are about 250 students, with 8 teachers and as many classes, including 2 in English and 2 in Talmud. Hebrew studies last from 8.30 A.M. to 12 M. and from 1 to 3.30 P.M.; English studies from 4 to 7 P.M. The course occupies three years. The English students are prepared for entrance examinations for public grammar-school and college.

The most important yeshibah in New York is Yeshibat Rabbi Isaac Elhanan (Theological Seminary Association), organized in 1897 and located at 156 Henry street. It has about eighty students, ranging in age from thirteen to twenty-three. Dr. Philip (Hillel) Klein is president, and Nahum Dan Barhon is mashgiach, with Moses Löb Schapiro as rosh yeshibah and Solab and Hirschberg as his assistants. Each student receives a stipend of \$3 per week and clothing; expenditure about \$15,000 per annum. The Talmud and posekim are the only subjects taught there, chief attention being given the treatises of the three Babot, Giṭṭin, Ketubot, and Kiddushin. Of the Shulḥan 'Aruk only Yoreh De'ah, Ḥoshen Mishpat, and Eben ha-'Ezer are studied. After a course of three or four years the graduates receive semikah. One of the graduates, Naphtali Rosenberg, was elected rabbi of Syracuse, N. Y. This yeshibah is planned on the model of that of Volozhin. Other yeshibot of less importance are in Boston, Philadelphia, Pittsburg, and Chicago.

The advocates of the yeshibah system contend that it is still necessary to produce a true rabbinical training. Thus Isaac Hirsch Weiss says that it requires at least ten years of diligent study, and scrupulous and strict examination, before the hat-tarat hora'ah is issued to a candidate. Weiss admits, however, the need for a modern rabbi to be familiar with modern knowledge and literature ("Zikronotai," pp. 73-83). Isaac Rabbinowitz, the Hebrew poet, remarks that experiments with the Rabbinerschule in Wilna and Jitomir have proved the impossibility of producing in the modern schools

of learning acceptable rabbis for the old-fashioned Russian congregations ("Ha-Kerem," p. 33, Warsaw, 1887). See TALMUD TORAH.

#### YESHU'AH (JESHUAH) BEN ELIJAH

**HA-LEVI:** African scholar and, perhaps, liturgical poet; of unknown date. He collected the poems of JUDAH HA-LEVI into a diwan, providing the volume with an Arabic introduction and heading most of the poems with superscriptions in which both the contents and the occasion of each poem are indicated. In the introduction, which was translated into German by Geiger ("Nachgelassene Schriften," iii. 154), Yeshu'ah says that he utilized three collections of his predecessors, Ḥiyya al-Ma'arabi, David b. Maimon, and Abu Sa'id ibn Alkash; but he added many more poems, for which he does not guarantee Judah's authorship. Sachs ("Religiöse Poesie," p. 290, note 2) identifies the subject of this article with the author of the two poems found in the Tripolitan Mahzor, one a "pizmon" beginning "Ye'erab sihi lifne kadosh" and signed "Yeshu'ah," and the other a "mustajab" beginning "Emune lebab habinu" and signed "Yeshu'ah Hazzan." Both are to be recited on Yom Kippur night.

#### YESHU'AH (JESHUAH) BEN JOSEPH

**HA-LEVI:** Algerian Talmudist of the fifteenth century; born at Tlemçen. In 1467, owing to the massacres of the Jews of Tlemçen committed by the Spaniards at that time, Yeshu'ah, still a young man, fled from his native town, with the intention of returning thither when the troubles should be over. He arrived at Toledo about 1469, and there received the hospitality of Don Vidal ibn Labi, the head of a flourishing school in that city. Perceiving that the young Algerian possessed a profound knowledge of the Talmud, Don Vidal requested him to write a methodology of the Talmud, which he would establish as the standard manual for the yeshibot. Yeshu'ah accordingly wrote the "Halikot 'Olam" (Lisbon or Spain, c. 1490), a methodology of the Talmud in five "gates" ("she'arim") or parts, each divided into chapters. The first gate treats of the order of the Mishnah and the manner of its composition; the second, of the method of the Gemara; the third, of the method of the Mishnah; the fourth, of the hermeneutic rules; and the fifth, of the method of the halakic decisions. In his preface Yeshu'ah praises his principal teacher, Jacob ha-Kohen Ashkenazi, and his benefactor, Don Vidal, whom he also eulogizes in a metrical poem at the end of the preface. This work was republished several times; and in 1634 an edition was issued in Leyden with a Latin translation made by L'Empereur. Later, Henry Jacob Bashuysen reedited it with L'Em-

pereur's Latin translation and with notes of his own (Hanau, 1714). Finally, an adaptation from it was made by J. J. Struve under the title "Logicæ Hebraicæ Rudimenta" (Jena, 1697).

**YEYREISKAYA BIBLIOTEKA.** See **RUS-  
SIA, PERIODICALS.**

**YEZER HA-RA':** Evil inclination or impulse, popularly identified with the lusts of the flesh. The idea is derived from Gen. viii. 21: "the imagination of the heart of man is evil from his youth." Yet from the use of the two "yods" in Gen. ii. 7, the Rabbis deduced that there are in man two Yezerim: the good (**Yezer Tob**) and the evil (Ber. 61a). Cain defended himself before God for having slain Abel by arguing that God had implanted in him the Yezer ha-Ra' (Tan., Bereshit, 25 [ed. Buber, p. 10]). "It lies at the door of the heart like a fly" (Ber. 61a; comp. **BEELZEBUB**). Yet in a way the Yezer ha-Ra', like all things which God made (Gen. i. 31), is good. Without it, for example, a man would never marry, beget, build a house, or trade (Gen. R. ix. 9). Therefore, man is enjoined to love God with both the Yezerim implied in "with all thy heart" of the Shema' (Sifre, Deut. 32 [ed. Friedmann, p. 73a]). It would appear that the Yezer Tob comes with reflection, and at the age of bar mizwah or confirmation, because it is said to be thirteen years younger than the Yezer ha-Ra', which is an inborn impulse (Eccl. R. ix. 14). The Yezer Tob delivers the Citadel of the body from the Yezer ha-Ra' by means of temperance and good works (Ned. 32b). The "little city" of Eccl. ix. 14, 15 is interpreted by the Targum and Eccl. R. (*ad loc.*) as the kingdom of the heart, and the "great king" who comes against it as the Yezer ha-Ra'.

According to the Rabbis, the Yezer ha-Ra' has seven different epithets in the Bible: evil (Gen. viii. 21); uncircumcised (Deut. x. 16); unclean (Ps. li. 12); the enemy (Prov. xxv. 21); stumbling-block (Isa. lvii. 14); stone (Ezek. xxxvi. 26); and hidden (Joel ii. 20).

The greater the man the greater his Yezer ha-Ra'; and it is among the four things which God regretted to have created (Suk. 52a, b). It is identified with Satan and with the angel of death (B. B. 16a; comp. Maimonides, "Moreh," ii. 12, iii. 22). Against the Yezer ha-Ra' the Torah is the great antidote (Suk. 52b; Kid. 30b; Ab. R. N. 16). The Yezer ha-Ra' grows with a man, as is deduced from the parable in II Sam. xii. 4. At first it is a mere traveler; then it becomes a guest; and at last it is the man himself (Suk. 52b). Yet the heart of man contains both the Yezer ha-Ra' and the Yezer Tob, as is deduced by Midrash Tehillim from Ps. ix.

"Yezer ha-Ra'" does not refer exclusively to the body; this can be inferred from its close association with the Yezer Tob. It undoubtedly leads to sensual sins with great power; hence

**Characteristics.** both Akiba and Meir were saved from its influence only by heavenly intercession (Kid. 81a). It was to avoid the temptations of the Yezer ha-Ra' that women were ordered to take separate seats in the galleries of

synagogues (Suk. 51b). Revenge and avarice are also given as the outcome of the Yezer ha-Ra' (Sifre, Deut. 33 [ed. Friedmann, p. 74a]); and anger is another of its manifestations. Ps. lxxxi. 10 (A. V. 9) is interpreted as referring to the Yezer to whose influence one should not yield (Shab. 105b), submission being, therefore, compared to idolatry (Yer. Ned. 41b). It is with reference to anger that he is called mighty who overcomes his Yezer ha-Ra' (Ab. iv. 2). Vanity is still another form in which the Yezer ha-Ra' displays itself. When the Yezer sees a conceited man it says: "He is mine" (Gen. R. xxii. 13). The Yezer ha-Ra' belongs only to this world, and does not exist in angels or other higher beings (Lev. R. xxvi.). It is for this reason that there is no eating or drinking, procreation or barter, envy or hatred, in the world to come (Ber. 17a; comp. Mark xii. 25, and synoptic parallels).

In a discussion between Rabbi and the emperor Antoninus, the latter contends that the Yezer ha-Ra' comes to man at birth, and not before, and Rabbi agrees (Sanh. 91b). All the sportive devilry of young children is attributed to the Yezer ha-Ra' (Eccl. R. iv. 13). The Yezer ha-Ra' was not due to man, but to God as the Creator of all; but man is responsible for yielding to its influence, since he, as has been seen above, is able to put it to a good use. Hence the Yezer ha-Ra' is placed on a level with the woman and the child: the left hand should reject it, while the right hand draws it near (Soṭah 47a; Sanh. 107b). Under the Second Temple the Yezer ha-Ra' continued to exist because needed in the world. The Rabbis interpret Neh. ix. 4 as referring to the call of the people: "Wo, wo, it is the Yezer ha-Ra'. He destroyed the sanctuary, killed the righteous, drove the Israelites out of their land, and still dances among us. Why was he given unto us? Only that we may receive reward for conquering him." The Israelites are then reported to have got rid of the Yezer of idolatry and of the grosser forms of unchastity, but found it necessary to preserve the Yezer ha-Ra' lest the world should come to an end (Yoma 69b; comp. Sanh. 64a). It has been conjectured by Taylor that the clause in the Lord's Prayer, "Deliver us from evil," is probably "Deliver us from the evil Yezer" ("Sayings of the Jewish Fathers," pp. 128-130, 186-192).

There is a tendency to give personality and separate activity to the Yezer, as in the case of the angel of death and of Satan, with each of whom, indeed, it is identified (B. B. 16a).

**Personification.** Objections to the Law which in Sifra 86a are attributed to the Yezer are in Yoma 67b attributed to Satan.

According to R. Jonathan, the Yezer, like Satan, misleads man in this world, and testifies against him in the world to come (Suk. 52b). Hence in the prayers one asks to be delivered "from evil man and from evil act, from evil Yezer, from evil companion, from evil neighbor, and from Satan" (Ber. 16b). Here, however, the Yezer is clearly distinguished from Satan. On other occasions it is made exactly parallel to sin. Thus, in Gen. R. xxii. 11 the parable of II Sam. xii. 4 is applied to sin, though elsewhere it is applied to the Yezer (see above). Similarly, Akiba interprets Isa. v. 18 as

applying to sin, while Rab Ashi applies it to the Yezer (Suk. 52a). "At the beginning they are like the thread of the spinning web, at the end like a cart rope." The connection of the Yezer with habit is exactly parallel to the growth of sin through habit. Man's Yezer overpowers him every day (Kid. 30b). At first it befools him; then it dwells in him (comp. Hos. iv. 12, v. 4). So too Ps. xxxvi. 2, "sin speaks to the wicked," is applied to the Yezer ha-Ra' (Ab. R. N. 32). In the same passage all men are divided into three classes: the righteous, under the rule of the Yezer Tob; the wicked, under the rule of the Yezer ha-Ra'; and the middle class, ruled now by one, now by the other. According to others, there are only two classes: the righteous with the good Yezer; and the wicked, who submit to the evil Yezer (Eccl. R. iv. 15, 16). The first part of Eccl. xi. 9 is said to relate to the joy of youth derived from the Yezer ha-Ra'; the latter part indicates that God will bring all transgressors under judgment to the Yezer Tob (Shab. 63a).

Just as iron can be made into all sorts of vessels if cast into the fire, so one can make the Yezer ha-Ra' useful by words of the Law; for it is learned from Prov. xxv. 21 that "if thine enemy be hungry [that is, "when the Yezer ha-Ra' prompts thee"]

give him bread to eat" (*i.e.*, bread of

**The Law** the Law; Pesik., ed. Buber, 80b). Both the Yezerim are to be utilized; similarly

**Antidote.** a man having two oxen, one meant for plowing and the other not, puts the yoke upon both. The promise of Gen. iv. 7 is applied to the Yezer ha-Ra' (Kid. 30b). There is a contrast of strength between the two Yezerim; hence, "Blessed is he that considereth the poor" (Ps. xli. 2) is applied to him who makes the poor and weak Yezer Tob rule over the Yezer ha-Ra' (Lev. R. xxxiv.). Though the latter is seemingly so powerful, resistance easily overcomes it, as Abraham found after it had brought about the Flood and the dispersion of the nations (Gen. xxii. 12). If a man find that the Yezer ha-Ra' is too strong for him, he should go to a place where he is not known, and not profane the name of heaven openly (Hag. 16a). The Law is like a plaster to the wound made by the Yezer ha-Ra'; if the plaster is taken away, an evil ulcer will come forth (Kid. 30b). Or, again, the Law will wear away the Yezer as water wears away stone (Suk. 52b). As the Law is called a stone (Ex. xxiv. 12), and the Yezer ha-Ra' also is called a stone (*ib.* xxxvi. 26), let one stone guard the other stone (Cant. R. vi. 11). The stone of Gen. xxix. 2 is also compared to the Yezer ha-Ra': as the stone is rolled away from the mouth of the well, so the Yezer ha-Ra' departs when men go into the synagogue to drink of the Law (Gen. R. lxx. 8); hence, the night prayer said in connection with the "Shema'" includes the clause "let not the Yezer ha-Ra' rule in me" (Ber. 60b).

God will finally destroy the Yezer ha-Ra', as is promised in Ezek. xxxvi. 26. Yet to the righteous who have struggled against it, it will appear like a high mountain; but to the wicked, like a hair (Suk. 52a). It is because the Yezer ha-Ra' anticipates this final punishment that it brings man to destruc-

tion (Ab. R. N. 16). Meanwhile, like a stone (see above), it gradually crumbles away until it no longer forms a stumbling-block.

While the expression "yezer" is used both in Deut. xxxi. 21 and in Isa. xxvi. 3 for the disposition or mind, "heart" or "evil heart" usually takes its place in Biblical theology as the seat and

**Rise of the** power of temptation and sin in man.

**Idea.** The first definitive passage in which the term occurs is in the lately recovered Hebrew text of Ecclus. (Sirach) xv. 14: "God created man from the beginning . . . and gave him into the hand of his Yezer." And in vi. 22 (Heb.) man is compared to the fruit of a tree, while his thoughts are according to his Yezer. So, too, the "wicked heart" referred to in Ezra iv. 18 is analogous to the Yezer ha-Ra' in being offset by the Law and in not having power to overcome the Law, and also because God will ultimately remove it. This is an approach to the dualism of Paul (Rom. vii. 7-24), but the contrast between the flesh and the spirit nowhere exists in Jewish theology, and is probably derived from Plato.

**YEZERAH, SEFER** (ספר יצירה = "Book of Creation"): The title of two esoteric books. Of these the older is also called "Hilkot Yezerah" (Rules of Creation), and is a thaumaturgical work that was popular in the Talmudic period. "On the eve of every Sabbath, Judah ha-Nasi's pupils, Rab Hanina and Rab Hoshaiah, who devoted themselves especially to cosmogony, used to create a three-year-old calf by means of the 'Sefer Yezerah,' and ate it on the Sabbath" (Sanh. 65b, 67b). According to the tradition given by Rashi on both passages, this miracle was accomplished by the letters of the Holy Name ("zeruf ottyot"), and not by witchcraft. In like manner, according to Rab, Bezaleel, the architect of the Tabernacle in the wilderness, worked by the permutations of the letters with which God created heaven and earth (Ber. 55a). All the miraculous creations attributed to other amoraim in Sanh. 65b and Yer. Sanh. 52d are ascribed by the commentators to the use of the same thaumaturgical book. Such a work, entitled *Κοσμοποιία* ("Creation of the World"), circulated in many forms among the Gnostics of the second century B. C., and was a combination, as Dieterich ("Abraxas," pp. 3-31) has shown, of many Jewish, Greek, and Egyptian names and elements.

**The Power** of papyri. It formed also part of magic  
**of** mystic powers that were at work in the  
**the Name.** creation of the world should also aid the magician in performing his miraculous feats (*ib.* pp. 136 *et seq.*). While in the cosmogony of ABRAXAS, however, the seven worlds were created by the emission of seven sounds followed by three others, the older cosmogonies, which were nearer their Egyptian sources, make the twenty-eight letters corresponding to the twenty-eight days of the astrological calendar the creative elements constituting both the names and the essence of the Deity (Reizenstein, "Poimandres,"

pp. 256-291). Both the macrocosm (the universe) and the microcosm (man) are viewed in this system as products of the combination and permutation of these mystic characters (*ib.* pp. 261, 267), and such a use of the letters by the Jews for the formation of the Holy Name for thaumaturgical purposes is attested by magic papyri that quote an "Angelic Book of Moses," which was full of allusions to Biblical names (Reizenstein, *l.c.* pp. 14, 56).

While the mystic use of letters and numbers undoubtedly points to a Babylonian origin, the idea of the creative power of the various sounds is Egyptian, as well as the division of the letters into the three classes of vowels, mutes, and sonants is Hellenic, although this classification necessarily underwent certain changes when applied to

**Origin.** The Hebrew letters. The origin of the "Sefer Yezirah" is accordingly placed by Reizenstein (*l.c.* p. 291) in the second century B.C. Some data regarding the age of this system may also be derived from the work of Philo of Byblos on the Phœnician letters, in which they are explained as symbols of the (Egyptian) gods and at the same time as cosmic "elements" (see Baudissin, "Studien zur Semitischen Religionsgeschichte," i. 18, 270). How far these mystic uses of the alphabet influenced the rabbis of the Talmudic period is still a problem. Rab of Babylonia combined the ten creative potencies with the Forty-two-Lettered Name and the twelve letters which constitute the Holy Name (see Bacher, "Ag. Bab. Amor." pp. 17-20), and R. Akiba in particular was credited with a knowledge of the mystic significance of the letters (Bacher, "Ag. Tan." i. 347-348). When, therefore, the rationalistic "Sefer Yezirah" was developed from the thaumaturgical work of the same name, which was known only to a few, the authorship was ascribed to Akiba. The closing mishnah (vi. 15), however, expressly declares that Abraham was the recipient of the divine revelation of mystic lore; so that the oldest geomim (see Hai Gaon in the responsum cited in "Kerem Hemed," viii. 57) and such philosophers as Saadia, Donnolo, and Judah ha-Levi ("Cuzari," iv. 25) never doubted that Abraham was the author of the book.

It is noteworthy that in a manuscript (see Margoliouth, "Catalogue of the Hebrew and Samaritan Manuscripts of the British Museum," part II., p. 190) the "Sefer Yezirah" is called "Hilkot Yezirah" and declared to be treated as esoteric lore not accessible to any but the really pious (comp. *ib.* p. 255, where it is mentioned as being used by Nahmanides for cabalistic purposes). K.

The later "Sefer Yezirah" is devoted to speculations concerning God and the angels. The ascription of its authorship to R. Akiba, and even to Abraham, shows the high esteem which it enjoyed for centuries. It may even be said that this work had a greater influence on the development of the Jewish mind than almost any other book after the completion of the Talmud. The Aristotelian Saadia, the Neoplatonist Ibn Gabirol, the speculative cabalists of France, and the mystics of Germany deemed themselves justified in deriving their doctrines from this remarkable work, although it often suffered the same treatment as other sacred books, since its commentators read into it far

more than the text implied. The "Sefer Yezirah" is exceedingly difficult to understand on account of its obscure, half-mystical style, and the difficulty is rendered still greater by the lack of a critical edition, the present text being admittedly much interpolated and altered. Hence there is a wide divergence of opinion regarding the age, origin, contents, and value of the book, since it is variously regarded as pre-Christian, Essene, Mishnaic, Talmudic, or geonic.

As the book is the first speculative treatise in Hebrew, and at the same time the earliest known work on the Hebrew language, the philological part may

**The Phonetic System.** for an elucidation of the philosophical speculations of the work. The twenty-two letters of the Hebrew alphabet are classified both with reference to

the position of the vocal organs in producing the sounds, and with regard to sonant intensity. In contrast to the Jewish grammarians, who assumed a special mode of articulation for each of the five groups of sounds, the "Sefer Yezirah" says that no sound can be produced without the tongue, to which the other organs of speech merely lend assistance. Hence the formation of the letters is described as follows: אההע with the tip of the tongue and the throat; בומ"ף between the lips and the tip of the tongue; גיב"ק in the middle ([על שלישייתה?]) of the tongue; וסש"רין by the tip of the tongue; and דטל"ת by the tongue, which lies flat and stretched, and by the teeth (ii. 3). The letters are distinguished, moreover, by the intensity of the sound necessary to produce them, and are accordingly divided into: mutes, which are unaccompanied by sound, such as מ, which the book calls מ'דוממת; sibilants, such as ש, which is therefore called ש'שורקת, the "hissing shin"; and aspirates, such as א, which holds a position between the mutes and sibilants, and is designated as the "airy א, which holds the balance in the middle" (iv. 1; in some eds. ii. 1). Besides these three letters (אמ"ש), which are called "mothers," a distinction is also drawn between the seven "double" letters (בגדכפתר) and the twelve "simple" letters (פשוטה), the remaining characters of the alphabet.

The linguistic theories of the author of the "Sefer Yezirah" are an integral component of his philosophy, its other parts being astrological and Gnostic cosmogony. The three letters אמ"ש are not only the three "mothers" from which the other letters of the alphabet are formed, but they are also symbolical figures for the three primordial elements, the substances which underlie all existence. The mute מ is the symbol of the water in which the mute fish live; the hissing ש corresponds to the hissing fire; and the airy א represents the air; while as the air occupies a middle position between the fire which reaches upward and the water which tends downward, so the א is placed between the mute מ and the hissing ש. According to the "Sefer

**Cosmogony.** Yezirah," the first emanation from the spirit of God was the רוּח (= "spirit," "air") that produced fire, which, in its

turn, formed the genesis of water. In the beginning, however, these three substances had only a potential existence, and came into actual being only by means of the three letters אמ"ש; and as these are

the principal parts of speech, so those three substances are the elements from which the cosmos has been formed. The cosmos consists of three parts, the world, the year (or time), and man, which are combined in such a way that the three primordial elements are contained in each of the three categories. The water formed the earth; heaven was produced from the fire; and the **רוח** produced the air between heaven and earth. The three seasons of the year, winter, summer, and the rainy season (**רוייה**), correspond to water, fire, and **רוח** in the same way as man consists of a head (corresponding to fire), torso (represented by **רוח**), and the other parts of the body (equivalent to water). The seven double letters produced the seven planets, the "seven days," and the seven apertures in man (two eyes, two ears, two nostrils, and one mouth). Again, as the seven double letters vary, being pronounced either hard or soft, so the seven planets are in continuous movement, approaching or receding from the earth. The "seven days," in like manner, were created by the seven double letters because they change in time according to their relation to the planets. The seven apertures in man connect him with the outer world as the seven planets join heaven and earth. Hence these organs are subject to the influence of the planets, the right eye being under Saturn, the left eye under Jupiter, and the like. The twelve "simple" letters created the twelve signs of the zodiac, whose relation to the earth is always simple or stable; and to them belong the twelve months in time, and the twelve "leaders" (**מנהיגים**) in man. The latter are those organs which perform functions in the body independent of the outside world, being the hands, feet, kidneys, gall, intestines, stomach, liver, pancreas, and spleen; and they are, accordingly, subject to the twelve signs of the zodiac. In its relation to the construction of the cosmos, matter consists of the three primordial elements, which, however, are not chemically connected with one another, but modify one another only physically. Power (*δυναμεις*) emanates from the seven and the twelve heavenly bodies, or, in other words, from the planets and the signs of the zodiac. The "dragon" (**תליל**) rules over the world (matter and the heavenly bodies); the sphere (**גלגל**) rules time; and the heart rules over the human body. The author sums up this explanation in a single sentence: "The dragon is like to a king on his throne, the sphere like a king traveling in his country, and the heart like a king at war."

While the astrological cosmogony of the book contains few Jewish elements, an attempt is made, in the account of the creation, to give a Jewish coloring to the Gnostic standpoint. To harmonize the Biblical statement of the creation "ex nihilo" with the doctrine of the primordial elements, the "Sefer Yezirah" assumes a double creation, one ideal and the other real. The first postulate is

**The Creation.** The spirit of God, from which the prototypes of matter emanated, the world being produced, in its turn, by the prototypes of the three primordial substances when they became realities. Simultaneously with the prototypes, or at least before the real world, space was produced, and it is here conceived as the three di-

mensions with their opposite directions. The spirit of God, the three primordial elements, and the six dimensions of space form the "ten Sefirot," which, like the spirit of God, exist only ideally, being "ten Sefirot without reality" as the text designates them. Their name is possibly derived from the fact that as numbers express only the relations of two objects to each other, so the ten Sefirot are only abstractions and not realities. Again, as the numbers from two to ten are derived from the number one, so the ten Sefirot are derived from one, the spirit of God. The spirit of God, however, is not only the commencement but also the conclusion of the Sefirot, "their end being in their beginning and their beginning in their end, even as the flame is connected with the coal" (i. 7). Hence the Sefirot must not be conceived as emanations in the ordinary sense of the word, but rather as modifications of the spirit of God, which first changes to **רוח**, then becomes water, and finally fire, the last being no further removed from God than the first. Besides these abstract ten Sefirot, which are conceived only ideally, the twenty-two letters of the alphabet produced the material world, for they are real, and are the formative powers of all existence and development. By means of these elements the actual creation of the world took place, and the ten Sefirot, which before this had only an ideal existence, became realities. This is, then, a modified form of the Talmudic doctrine that God created heaven and earth by means of letters (Ber. 58a). The explanation on this point is very obscure, however, since the relation of the twenty-two letters to the ten Sefirot is not clearly defined. The first sentence of the book reads: "Thirty-two paths, marvels of wisdom, hath God engraved . . .," these paths being then explained as the ten Sefirot and the twenty-two letters. While the Sefirot are expressly designated as "abstracts" (**בלי מה**), it is said of the letters: "Twenty-two letters: He drew them, hewed them, combined them, weighed them, interchanged them, and through them produced the whole creation and everything that is destined to come into being" (ii. 2). The basal theory of the letters apparently regards them neither as independent substances nor yet as mere forms, so that they are, as it were, the connecting-link between essence and form. They are designated, therefore, as the instruments by which the real world, which consists of essence and form, was produced from the Sefirot, which are merely formless essences.

In addition to the doctrine of the Sefirot and the letters, the theory of contrasts in nature, or of the syzygies ("pairs"), as they are called by the Gnostics, occupies a prominent place in the "Sefer Yezirah." This doctrine is based on the

**Syzygies.** assumption that the physical as well as the moral world consists of a series of contrasts mutually at war, yet pacified and equalized by the unity, God. Thus in the three prototypes of creation the contrasting elements fire and water are equalized by **רוח**; corresponding to this are the three "mothers" among the letters, the mute **מ** contrasting with the hissing **ש**, and both being equalized by **ס**. Seven pairs of contrasts are enumerated in the life of man: life and death, peace and strife, wisdom and folly, wealth and poverty,

beauty and ugliness, fertility and sterility, lordship and servitude (iv. 3). From these premises the "Sefer Yezirah" draws the important conclusion that "good and evil" have no real existence, for since everything in nature can exist only by means of its contrast, a thing may be called good or evil according to its influence over man by the natural course of the contrast. The Jewish bent of the author's mind comes out, however, in the concession that as man is a free moral agent, he is rewarded or punished for his actions. It must be noted, on the other hand, that the conceptions of heaven and hell are foreign to the book, the virtuous man being rewarded by a favorable attitude of nature, while the wicked finds it hostile to him. Notwithstanding the seeming unity of the book, its system is composed of divergent elements, and the differences of opinion regarding it can never be harmonized so long as emphasis is laid on any one component rather than on the book as a whole. The doctrine of the three primordial substances is doubtless an element of ancient Semitic theosophy, and was probably adopted by the Greeks from the Semites. In the seventh chapter of the "Timæus" Plato has the following statement, which is very similar to the views expressed in the "Sefer Yezirah" (iii. 3): "And thus God placed water between fire and earth, and air in the middle . . . and connected and thus joined heaven so that it became sensible to touch and sight." Even the expression "mother" (אִמָּה) is found in Plato (*l.c.* xix.), who speaks of the "nurse" of creative force. The idea of the three substances is likewise found in mythological form in the Midrash (Ex. R. xv. 23) and in other midrashim of the geonic period (Midr. Konen, in Jellinek, "B. H." ii. 23).

Far more important is the similarity of the "Sefer Yezirah" to various Gnostic systems, to which Grätz has called special attention. As the "Sefer Yezirah" divides the Hebrew alphabet into three groups, so the Gnostic Marcus divided the Greek letters into three classes, regarded by him as the symbolic emanations of the three powers which include the whole number of the upper elements. Both systems attach great importance to the power of the combinations and permutations of the letters

**Gnostic Elements.** in explaining the genesis and development of multiplicity from unity (comp. Irenæus, "Adversus Hæreses," i. 16).

The Clementine writings present another form of gnosis which agrees in many points with the "Sefer Yezirah." As in the latter, God is not only the beginning but also the end of all things, so in the former He is the ἀρχή and τέλος of all that exists; and the Clementine writings furthermore teach that the spirit of God is transformed into πνεῦμα (= רוּחַ), and this into water, which becomes fire and rocks, thus agreeing with the "Sefer Yezirah," where the spirit of God, רוּחַ (= πνεῦμα), water, and fire are the first four Sefirot (Uhlhorn, "Homilien und Recognitionen," pp. 181-182; the rocks in the Clementine writings correspond to the אֲבָנִים in the "Sefer Yezirah," i. 11). The remaining six Sefirot, or the limitations of space by the three dimensions in a twofold direction, are also found in the Clementina, where God is described as the boundary of the universe and as the

source of the six infinite dimensions (Hom. xvii. 9; comp. Lehman, "Die Clementinischen Schriften," p. 377). Regarding points of contact between the "Sefer Yezirah" and Buddhistic doctrines see Epstein in "R. E. J." xxviii. 101; and Rubin, "Yesod Mistere ha-'Akkum," pp. 19-20. The "dragon," which plays such an important part in the astrology of the book, is probably an ancient Semitic figure; at all events its name is not Arabic, as scholars have hitherto assumed, but either Aramaic or possibly a Babylonian loan-word (A. Harkavy, "Teli Atlia," reprinted from "Ben 'Ammi," i. 27-35).

The essential elements of the book are characteristic of the third or fourth century; for a work of this nature, composed in the geonic period, before the Jews had become acquainted with Arabic and Greek learning, could have been cast only in the form of Jewish gnosis, which remained stationary after the fourth century, if indeed it had not already become extinct. The date of the book, as regards its present form, resolves itself, therefore, into a problem of literature;

**Date.** for the contents were certainly derived from ancient sources. It must be borne in mind, however, that the Talmudic period contains absolutely nothing to show how abstract philosophical questions were treated in Hebrew; and since, moreover, the "Sefer Yezirah" contains many new expressions that are not found in the earlier literature, there is nothing to disprove that the book was written in the sixth century. It may be noted that Kalir, who certainly lived before the ninth century, used not only the "Sefer Yezirah," but also the Baraita of Samuel, which was written about the same time. Saadia advanced the view (end of the preface to his commentary on the "Sefer Yezirah") that the book was circulated orally for a long time before it was reduced to writing, his statement being somewhat more than an excuse for his free treatment of the text.

As already stated, the date and origin of the book can not be definitely determined so long as there is no critical text of it. The editio prin-

**History of the Text.** cipalis (Mantua, 1562) contains two recensions, which were used in the main

by the commentators of the book as early as the middle of the tenth century. The shorter version (Mantua I.) was annotated by Dunash ibn Tamim or by Jacob b. Nissim, while Saadia and Donnolo wrote commentaries on the longer recension (Mantua II.). The shorter version was also used by most of the later commentators, such as Judah b. Barzillai and Nahmanides, and it was, therefore, published in the ordinary editions. The longer recension, on the other hand, was little known, the form given in the editio princeps of the "Sefer Yezirah" being probably a copy of the text found in Donnolo's commentary. In addition to these two principal recensions of the text, both versions contain a number of variant readings which have not yet been examined critically. As regards the relation of the two recensions, it may be said that the longer form contains entire paragraphs which are not found in the shorter, while the divergent arrangement of the material often modifies the meaning essentially. Although the longer recension

doubtless contains additions and interpolations which did not form part of the original text, it has many valuable readings which seem older and better than the corresponding passages in the shorter version, so that a critical edition of the text must consider both recensions.

The history of the study of the "Sefer Yezirah" is one of the most interesting in the records of Jewish literature. With the exception of the Bible, scarcely any other book has been the subject of so much annotation. Aristotelians, Neoplatonists, Talmudists, and cabalists have used the book as a source, or at least thought they did so. Two points must be taken into consideration in judging the importance of the work: the influence which it exerted on the development of Jewish philosophy, especially on its mystic side, and the reputation

**Jewish Study of the Book.** This may best be illustrated by the following chronological list of authors

who have interpreted the book or tried to do so: Saadia; Isaac Israeli; Dunash ibn Tamim (Jacob b. Nissim); Donnolo; Judah b. Barzillai; Judah ha-Levi; Abraham ibn Ezra; Eleazar of Worms; pseudo-Saadia (time and school of Eleazar); Abraham Abulafia; (pseudo-?) Abraham b. David; Nahmanides (although the work may be ascribed to him incorrectly); Judah b. Nissim of Fez; Moses Botarel; Moses b. Jacob ha-Goleh; Moses b. Jacob Cordovero; Isaac Luria; Elijah b. Solomon of Wilna; Isaac Haber; and Gershon Enoch b. Jacob. To these twenty commentators, who represent the period from the beginning of the tenth to the end of the nineteenth century and include scholars of the highest rank, must be added men like Hai Gaon, Rashi, and others who diligently studied the book.

If Botarel's statement may be credited, many commentaries were written on the "Sefer Yezirah" in the geonic period. It is far more difficult, however, to decide how many of the opinions and doctrines contained in the book influenced the views of later Jewish thinkers. The fact that scholars of so many different views quoted it in support of their theories justifies the assumption that none of them really based his hypotheses on it, and this view is adopted by most modern scholars. It must be borne in mind, however, that an intimate relation exists between the "Sefer Yezirah" and the later mystics, and that, although there is a marked difference between the Cabala and the "Sefer Yezirah" as regards the theory of emanations, yet the system laid down in the latter is the first visible link in the development of cabalistic ideas. Instead of the immediate creation "ex nihilo," both works postulate a series of emanations of mediums between God and the universe; and both consider God as the first cause only, and not as the immediate efficient cause of the world. Although the Sefirot of the cabalists do not correspond to those of the "Sefer Yezirah," yet the underlying problem is identical in both. The importance of the "Sefer Yezirah" for mysticism, finally, lies in the fact that the speculation about God and man had lost its sectarian character. This book, which does not even mention such words as "Israel" and "revelation," taught the cabalists to

reflect on "God," and not merely on the "Ruler of Israel."

A book of the same name, which, however, had nothing else in common with the "Sefer Yezirah," was circulated among German mystics between the eleventh and thirteenth centuries. Judging from the examples collected by Epstein in "Ha-Hoqer," ii. 1-5, it was a mystic and haggadic work on the six days of creation, and corresponded in part to the small Midrash Seder Rabbah de-Bereshit which was edited by Wertheimer ("Batte Midrashot," i. 1-31).

**BIBLIOGRAPHY:** Editions and translations: Editio princeps, Mantua, 1562; other important editions: Amsterdam, 1642; Zolkiev, 1745; Korzec, 1779; Constantinople, 1791; Grodno, 1806 (five commentaries); Warsaw, 1834 (nine commentaries); Goldschmidt, *Das Buch der Schöpfung . . . Kritisch Redigirter Text*, Frankfurt-on-the-Main, 1894 (the edition, however, by no means represents a critical text). Translations: Latin: Postel, *Abraham Patriarcha Liber Yezirah*, Paris, 1552; Pistor, *Liber Yezirah*, in *Ars Cabalistica*, Basel, 1557; Rittangel in the Amsterdam edition of 1642; German: Johann F. von Meyer, *Das Buch Yezira*, Leipzig, 1830; English: I. Kalisch, *A Sketch of the Talmud*, New York, 1877; W. W. Westcott, *Sepher Yezirah*, London, 1893; French: Karpe, *Etude sur les Origines . . . du Zohar*, pp. 139-158, Paris, 1901. **YIBBUM.** See LEVIRATE MARRIAGE.

**YIGDAL:** The hymn which in the various rituals shares with ADON 'OLAM the place of honor at the opening of the morning and the close of the evening service. It is based on the thirteen ARTICLES OF FAITH (usually called the Thirteen Creeds) formulated by Moses ben Maimon, and was written by Daniel ben Judah Dayyau (Zunz, "Literaturgesch." p. 507), who spent eight years in improving it, completing it in 1404 (S. D. Luzzatto, "Mebo," p. 18). This is not the only metrical presentment of the Creeds; but it has outlived all others, whether in Hebrew or in the vernacular. A translation is to be found in the Daily Prayer-Book.

With the Ashkenazim only thirteen lines are sung, one for each creed; and the last, dealing with the resurrection of the dead, is solemnly repeated to complete the antiphony when the hymn is responsorially sung by hazzan and congregation. The Sephardim, who sing the hymn in congregational unison throughout, use the following line as the fourteenth: "These be the thirteen bases of the Rule of Moses and the tenets of his Law."

"Yigdal" far surpasses, "Adon 'Olam" in the number of its traditional tunes and the length of time during which they have been traditional. In the Spanish ritual, in its Dutch- and English-speaking tradition, the hymn is often sung, according to the general Sephardic custom (comp. e.g., **Sephardic YAH SHIMEKA**), to some "representative" melody of the particular day.

Thus, for example, it is chanted at the close of evening service on New-Year to the tune of 'ET SHA'ARE RAZON. On Friday evening the Sab-

bath "Yigdal" is customarily sung to the same melody as are "Adon 'Olam" (see JEW. ENCYC. i. 206, melody A) and EN KELOHENU. On the three festivals the melody here transcribed under A is the tune favored. Its old Spanish character is evident.

In the Ashkenazic ritual "Yigdal," though always commencing the morning prayer, is not invariably sung at the close of the evening service on Sabbaths and festivals, being often, especially in Germany, replaced by "Adon 'Olam." In Polish use, however, it is more regularly employed as the closing hymn, while in the synagogues of northwestern Germany, Holland, and England, where the influence of the Sephardic ritual has been felt by that of the Ashkenazim, "Yigdal" is considered an integral portion of the Sabbath and

**Ashkena-** zic Tunes. festal evening prayer; and in London for fully two centuries there has been allotted to the hymn, according to the occasion, a definite tradition of tunes, all of which are antiphonal between hazzan and congregation. The most familiar of these tunes is the Friday evening "Yigdal," transcribed here under B. It has passed into the repertory of the Anglican and non-conformist churches under the title of "Leoni" (see JEW. ENCYC. viii. 229). It is utilized also in Germany and in some parts of Poland and Bohemia as a festival "Yigdal." The melody may date from the sixteenth century or perhaps earlier. Next in importance comes the beautiful and plaintive air reserved for the solemn evenings of New-Year and Atonement, and introduced, in the spirit of Ps. cxxxvii. 6, into the service of the Rejoicing of the Law. This melody, here transcribed under C, is constructed in the Oriental chromatic scale (EFG # ABCD # E) with its two augmented seconds (see MUSIC, SYNAGOGAL), and is the inspiration of some Polish precentor, dating perhaps from the early sixteenth century, and certainly having spread west-

ward from the Slavonic region. In the German use of Bavaria and the Rhineland the old tradition has preserved a contrasting "Yigdal" for New-Year and Atonement that is of equally antique character, but built on a diatonic scale and reminiscent of the morning service of the day. This interesting melody is here transcribed under D.

For the evenings of the three festivals the old London tradition has preserved, from at least the early eighteenth century, three characteristic melodies, probably brought from north Germany or Bohemia. That for the Passover, here transcribed under E, illustrates the old custom according to which the precentor solemnly dwells on the last creed, that on the resurrection of the dead (in this case to a "representative" theme common to Passover and to Purim), and is answered by the choristers with an expression of confident assurance. The choral response here given received its final shaping from Mombach. The "Yigdal" for Pentecost, transcribed under F, is of a solemn tone, thus strikingly contrasting with those for the other festivals.

The tune for Tabernacles, here transcribed under G, displays a gaiety quite rare in synagogal melody. It was employed by Isaac Nathan, in 1815, as the air for one of Lord Byron's "Hebrew Melodies," being set by him to the verses "The Wild Gazelle" in such a manner as to utilize the contrasting theme then chanted by the hazzan to the last line as in the Passover "Yigdal." Other old tunes for the hymn, such as the melody of Alsatian origin used on the "Great Sabbath" before Passover, are preserved in local or family tradition (comp. ZEMITROT).

A.

F. L. C.

**YIMLOK ADONAI:** The tenth and final verse of Ps. cxlvi., which opens the series of Halleluiah

Psalms that conclude the Psalter. The verse is employed as a response at prominent points in the liturgy, and is always the concluding response in the קְדוּשַׁת־שָׁמַיִם. In the rite of the Ashkenazim it also introduces (in association with Ps. xxii. 4 [3]) the responsory hymnus in the קְרֹבוֹת. In the ritual of the Sephardim it is chanted four times, by officiant and congregation alternately, before the scroll is returned to the Ark during the singing of the processional MIZMOR LE-DAWID. The melody to which it is thus chanted is a quaint strain long preserved by tradition and doubtless of Peninsular origin.

also a pupil of Saadia, and was the author of a commentary on Chronicles, some fragments of which were united by a compiler with writings of other commentators, among them Judah ibn Kuraish, the whole being edited by Kirchheim under the title "Ein Kommentar zur Chronik aus dem 10. Jahrhundert" (Frankfort-on-the-Main, 1874). There are extant only three fragments of Yir'am's commentary: the first is taken from Saadia's commentary; the second is a haggadic explanation of certain words; and the third is an interpretation of the subject-matter, as to which Yir'am is charged by the compiler

## YIMLOK ADONAI

### (A)—OF THE SEPHARDIM (Before the Scroll Is Returned to the Ark)

*Maestoso.*

Yim - lok A - do nai le - 'o - - - lam, E - lo -

ha - yik Zi yon le - dor..... wa - dor: Ha - le - lu - yah!

### (B)—OF THE ASHKENAZIM (as Closing Response on Festivals)

*Maestoso.*

Yim - lok A - do nai... le - 'o - lam, E lo - ha yik

Zi yon le dor wa - dor: Ha le lu yah!

Among the Ashkenazim the tradition, handed down from the Middle Ages, was to recite "Yimlok" in a monotone, closing with the cadence of the prayer-motive to which the remainder of the benedictions in the Standing Prayer were intoned by the precentor (comp. Music, SYNAGOGAL, Prayer-Motives). But on the festive days on which the HALLEL is chanted this monotone has long since developed into a tuneful phrase shaped on the melody-type of the festival intonation. The two strains alluded to are given herewith.

**YIR'AM OF MAGDIEL:** Italian Biblical commentator; lived at Rome in the tenth century. Yir'am was styled "of Magdiel" in conformity with the rabbinical interpretation which refers the name "Magdiel" (Gen. xxxvi. 43) to Rome (comp. Rashi *ad loc.*). He was a junior contemporary and perhaps

with not having thoroughly penetrated into the meaning of the passage.

T.

M. SEL.

**YISHAI (JESSE) BEN HEZEKIAH:** Exilarch of Damascus toward the end of the thirteenth century. He was a very prominent defender of the writings of Maimonides against the attacks of the anti-Maimonists. Thus, when he was informed of the agitation of the mystic Solomon Petit against the "Moreh," he warned him, under the penalty of the ban, to cease vilifying Maimonides. Solomon Petit paid no heed to the threats of Yishai, and the latter convoked several rabbis, among them those of Safed, and in the month of Tammuz, 1286, wrote a formal excommunication of the agitator of Acre and his followers (see "Kerem Hemed," iii. 169 *et*

seq., where Yishai's letter is published; Halberstam, in Kobak's "Jeschurun," vi. 66, however, declares that the year was 1291). The letter of excommunication was stamped with the seal of the exilarch, representing a crouching lion with a hand raised over its head, and was signed by Yishai and twelve rabbis. It declared that whoever was in possession of any writing hostile to Maimonides should deliver it immediately to David Maimuni or to his son.

M. SEL.

**YISHAR KOHEKA** ("May thy strength be firm"): A frequent exclamation and expression of thanks. The first part of the formula is derived by Levy and Kohut from "yashar" = "to be firm or healthy." The phrase occurs in the Talmud in the

Hebrew form "yishar koheka" (Shab. 87a) and in the Aramaic form "yishar heylak" (Shab. 53a, 62b; Lam. R. 52b; Gen. R. 54), and is now used, for example, as a response to the preacher after the sermon, to the hazzan after the prayer, and to the priest after the priestly blessing, while it serves as a formula of thanks also.

A. S. O.

**YISRAEL NOSHA'**: A hymn composed by an early medieval writer named Shephatiah (Zunz, "Literaturgesch." p. 235), and forming the pizmon, or chief responsory verses, in the seliḥot of one of the mornings in the week preceding the New-Year festival. It is chanted on the Monday in the Polish use and on the Tuesday in the German. The initial verse is employed also in the NE'ILAH service of the former ritual. The melody is of particular interest as one of the few metrical airs of medieval German

origin which were constructed in scales of an Eastern character. Such were more familiar to those Jews resident in the region of the Greek Church, who came under the influence of the Byzantine rather than of the Roman plain-song. The melody exists in four parallel variants. In the English tradition the singing of the first verse in the closing service of the Day of Atonement has led to the modification of the concluding phrases of the tune by attraction into the melody employed for several other hymns similarly used in that service (comp. NE'ILAH [HYMN TUNES] and see "The Voice of Prayer and Praise," No. 286, London, 1899). Of the other traditional forms of the air, that used in northern Germany appears nearest to the original. It falls in the key of the dominant of the minor scale, recalling the fourth Byzantine mode (in the variety entitled *λέγερως*; comp. Bourgault-Ducondray, "Etudes sur la Musique Ecclésiastique Grècque"). In the Polish and South-Russian traditions the consistent sharpening of the leading note of the minor, so familiar in Hungarian Gypsy melody, brings the tonality into a form of the Oriental chromatic mode (see MUSIC, SYNAGOGAL) and lends the air the wailing plaintiveness favored by the Jews of north-eastern Europe.

A. F. L. C.

\* **YIZHAK (ISAAC)**: Tanna of the early post-Hadrianic period (2d cent. C.E.); a halakic exegete whose Biblical exegesis mostly belongs to the Mekilta and the Sifre. In the Tosefta he transmits sayings in the name of Eliezer ben Hyrcanus (Ter. i. 1, 15; ii. 5). He was a disciple of Ishmael, but associated also with the pupils of Akiba, with one of whom, named Nathan, he originated a halakah (Mek., Ex. xii. 2). He was also intimate with Jonathan and with the proselyte, sons of Judah in the yeshibah of Simeon ben Yoḥai (Gen. R. xxxv.; M. K. 9a; Pesik. 87b). Of his non-halakic exegeses may be mentioned: on Ex. xii. 7: "The blood upon the doors at Passover shall serve the Egyptians as tortures for their souls" (Mek.); on Ex. xx. 9: "Count the days of the week after the Sabbath" (*l.c.*); on Deut. xiv. 11: "Unclean birds are called עוף קדוש, while clean are called either עוף טהור or צפור" (Sifre); on Ezek. i.: "The paragraph treating of the chariot of God

extends to the word **הושע** only" (Hag. 13a). Another of his sayings is: "The prayer in need is adapted to all occasions" (R. H. 18a).

J. S. O.

**YIZHAK BAR ADDA**: Palestinian amora of uncertain period. He interpreted Ps. xcii. 13 as meaning that even as the shade of the palm-tree extends far and wide, so shall the reward of the pious extend to the future world (Shoḥet Toḥ to Ps. xcii.; Gen. R. xl., beginning). With reference to Ps. lvii. 9, he said that David procured an eolian harp in order that its tones might awaken him for midnight prayer (Ber. 4a).

BIBLIOGRAPHY: Bacher, *Ag. Pal. Amor.* iii. 767 and note 7.

J. S. O.

**YIZHAK HA-BABLI**: Palestinian amora. His period is unknown. Two haggadot of his are extant. The king Melchizedek, who went to meet Abraham, was called Salem, says Yizhak, because he was perfect; that is, he had early submitted to circumcision (Gen. R. xliii. 7). With reference to Jacob's promise, the amora interprets the words "Which my lips have uttered, and my mouth hath spoken when I was in trouble" (Ps. lxvi. 14) by saying that one makes a vow when in need, in order to keep the commandments of the Torah (Gen. R. lxx. 1; Midrash Shemuel ii.).

BIBLIOGRAPHY: Bacher, *Ag. Pal. Amor.* ii. 209, iii. 768.

J. S. O.

**YIZHAK OF CARTHAGE**: In an edition of the *Pesiḳta Rabbati* by Buber (xiv. 64a) occurs the word קרטיקי, written incorrectly for קטדיקי = *καρδίκη* ("punishment," "penance"). Buber, however, in his preface (p. 80) attempts to identify this with the name of one Yizhak of Carthage mentioned in Ber. 29a; but according to Bacher such a person never existed. The confusion may have arisen from the fact that Yer. Ber. 8a and Ta'an. 65c mention an Abba of Carthage who transmitted in the name of R. Yizhak.

BIBLIOGRAPHY: Bacher, *Ag. Pal. Amor.* ii. 218, 225.

J. S. O.

**YIZHAK B. ELEAZAR OF CÆSAREA**: Palestinian amora of the fourth century. He was a teacher of law in the old synagogue of Cæsarea, where he was so loved by pupils and friends that

\*Through a misunderstanding a number of Talmudic authorities named "Isaac" were not treated under that heading; they are here entered under the transliterated Hebrew form of the name.

Jacob of Kefar Nibburaya placed him as high in this synagogue as is God Himself in the Temple of Zion (Yer. Bik. 65d; Midrash Shemuel vii. 6). The following halakic decisions of his may be mentioned: one concerning sale and purchase, rendered to his pupil Hoshaiab b. Shammai (Yer. M. K. 81b); another on religious law in a case referred to him by Samuel bar Abdimi (Yer. Shab. 16d); a ruling concerning fraud (Suk. 35b); instruction in regard to the writing of a letter of divorce (B. B. 163a); halakic deduction to the effect that, although a tithe of dates need not be rendered, honey made from them must be tithed (Yer. Bik. 63d); decision concerning marital law (Yer. Kid. 63b); regarding signs for detecting murder upon finding a corpse (Yer. Naz. 57d); and a halakah concerning the lifting of the *terumah* (Yer. Dem. 26b). He appears as a traditionalist of Jeremiah (Lev. R. xxxiii. 2) and of Nahman bar Jacob (Yer. Shab. 9a), and was famed for his gastronomical art (Lam. R. to iii. 17; Yer. Ber. 61c; Yer. Hag. 78a). He gives examples of the ban from the Mishnah (Yer. M. K. 81a), and a prescription in accordance with them (Yer. Ta'an. 69b).

In the vicinity of Caesarea is a cliff extending into the sea. One day as Yizhak was walking along this cliff he saw a large bone on the ground, and tried several times to cover it with earth, so that no one should stumble over it; but his efforts were unsuccessful, as the bone became uncovered as fast as he heaped the earth upon it. He accordingly considered the bone to be an instrument of God, and waited patiently to see what would happen. Soon afterward an imperial messenger named Veredarius came that way, stumbled on the bone, and died as a result of his fall; this messenger had been sent to Caesarea bearing malicious edicts against the Jews (Gen. R. x. 7; Lev. R. xxii. 4; Num. R. xviii.; Eccl. R. to v. 8). In answer to a question as to how it came about that two great prophets like Jeremiah and Daniel should suppress attributes of God which had been given Him by Moses himself, he said that these prophets knew that God was a lover of truth, and that any dissimulation on their part would have been punishable (Yer. Ber. 13c; Meg. 74c). He made a comparison between wisdom and humility (Yer. Shab. 3c); and he explained the expression *הַלְעִיטִי* in Gen. xxv. 30 by a comparison with the insatiability of Rome, saying that Esau sat like a camel with jaws wide open and that Jacob had to fill his mouth with food (Pesik. R. xvi.; Pesik. 59a). Yizhak, moreover, connected the expression *יִשְׁטֵם* in Gen. xxvii. 41 with the word "senator," in order more clearly to express Rome's hatred of Judah (Yer. 'Ab. Zarah 39c).

Yizhak must be distinguished from an amora of the same name who lived half a century earlier, and in whose house Hiyya bar Abba, Ammi, and Yizhak Nappaha used to assemble to study (Hag. 26a; 'Ab. Zarah 24a; M. K. 20a). This earlier amora delivered a funeral address at the death of Johanan (M. K. 25b; but see Bacher ["Ag. Pal. Amor." iii. 718, note 4] for different version).

S. O.

**YIZHAK BEN HAKOLA:** Palestinian amora of the third century. He was a contemporary of Joshua ben Levi and Johanan, and belonged to the school of Eleazar ben Pedat. He transmitted halakot in the names of Abba ben Zabda, Judah II. (Yer. 'Er. 24d), Hezekiah ('Orlah i. 2), and Simeon (Yer. Suk. i., end; Ket. ii. 8). There has been preserved a haggadah by him dealing with the quarrel between the shepherds of Abimelech and those of Abraham, and with the settlement of the dispute (Gen. R. liv., end).

BIBLIOGRAPHY: Bacher, *Ag. Pal. Amor.* i. 109, ii. 206, iii. 588-589; Frankel, *Mebo*, 107a; Heilprin, *Seder ha-Dorot*, ii. 238.  
J. S. O.

**YIZHAK BEN HIYYA THE SCRIBE:** Palestinian amora of the fourth century; contemporary of Mani. He was well known as a scribe, and was the author of a halakah in which he asserted that Torah scrolls might be written on various parchments, but that this rule did not apply in the case of tefillin and mezuzot (Yer. Meg. p. 71c). In the name of Johanan he transmitted a halakah relating to the marriage law (Yer. Yeb. 14a). Three other haggadot by him have been preserved: (1) on the future fate of the good and the wicked (Gen. R. lxiv. 4); (2) explaining why Saul did not consult the Urim and Thummim instead of the witch of Endor (Lev. R. xxvi. 7; Midr. Shemuel xxiv. 6); and (3) setting forth that the Torah is compared to the tree of life (Prov. iii. 18) because it is equal in value to all living men (Midr. Shoher Tob to Ps. i. 19).

BIBLIOGRAPHY: Bacher, *Ag. Pal. Amor.* iii. 449 (note 8), 718-717; Heilprin, *Seder ha-Dorot*, ii. 241.  
J. S. O.

**YIZHAK BAR JOSEPH:** Palestinian amora of the third and fourth centuries. He was a pupil of Abbahu and of Johanan, and transmitted almost entirely in the name of the latter. It is related that he was once about to be killed by a spirit to which he was speaking, when a cedar-tree saved him (Sanh. 101a; Rashi on the passage). It was said to be due to him that the Samaritans were declared to be a heathen people, the following narrative being told in this connection: "Yizhak was once sent into the Samaritan district to purchase wine, and met there an old man who told him that no one in that region observed the laws. The amora returned with this report to Abbahu, and the latter, together with Ammi and Assi, declared the Samaritans to be heathens" (Hul. 6a; comp. also Rashi and the Tosafot on the passage).

In his teacher's company Yizhak often visited Usha, by whom the takkanot were enacted; and he attended lectures in that city (Kid. 50a; Pes. 72a). It was he who brought most of these takkanot to the knowledge of the Babylonians; he was in fact one of the most prominent intermediaries between Palestine and Babylonia in matters pertaining to religious decisions, and was greatly respected in the latter country, being on terms of intimate friendship with Abaye (Ber. 42b).

Thirteen halakic decisions transmitted by Yizhak in the name of Johanan have been preserved: regarding circumcision on Yom Kippur (Yeb. 64b); on an undecided question (Shab. 45b); on the differ-

ence between Palestine and Babylonia with reference to 'erub (Er. 22a); on the ḥalīẓah (Yeb. 104a); on the testimony of two witnesses before a court of law (Sanh. 4a); five sentences regarding ṭerefah (Hul. 43a); on sexual intercourse (Niddah 65b); on sacrifices (Tem. 26a); and on the gall and liver of slaughtered animals (Hul. 48a). He transmitted also three halakic maxims in the name of Yannai: two on the custom of washing the hands (Hul. 105b) and one on Nazir (Naz. 42b).

In addition to his occasional journeys in Palestine in the company of Abbahu, Yizhak is once mentioned as undertaking a journey to Babylonia, where he associated with Abaye, as well as with Rabin and Pappa, the sons-in-law of Yizhak Nappaḥa (Hul. 110a). Yizhak relates that Judah I. had a private entrance to his yeshibah in order to spare his pupils the inconvenience of rising when he entered (Men. 33a).

**BIBLIOGRAPHY:** Bacher, *Ag. Pal. Amor.* i. 420; ii. 96, 211; iii. 99, 402, 520; Heilprin, *Seder ha-Dorot*, ii. 240.  
J. S. O.

**YIZHAK BAR JUDAH:** Babylonian amora of the fourth century; a junior contemporary of Ulla. He was educated at his father's house in Pumbedita; and once when Ulla visited there the latter expressed displeasure at the fact that Yizhak was not yet married (Kid. 71b). Yizhak was once told by his father to go to Nehardea in order to see how Ulla pronounced the Habdalah benediction at the close of the Sabbath; but Yizhak sent Abaye in his place, and for so doing was severely reprimanded by his father (Pes. 104b). Yizhak was a pupil of various scholars. First he attended the lectures of Rabbah (Sheb. 36b), and later those of Rami bar Ḥama, whom he soon left in order to study under R. Sheshet, Rami bitterly reproaching him for the slight. Among Yizhak's nearest friends and companions may be mentioned Aḥa bar Ḥana; Samuel, son of Rabbah bar bar Ḥana (Sheb. 36b); and Rami bar Samuel.

**BIBLIOGRAPHY:** Bacher, *Ag. Pal. Amor.* ii. 299; Heilprin, *Seder ha-Dorot*, ii. 242b.  
J. S. O.

**YIZHAK OF MAGDALA:** Palestinian amora of the third century. He engaged in various midrashic controversies. Among them was one with Levi concerning I Kings vii. 50 (Cant. R. on iii. 10), and another with Kabana concerning Joseph's abstention from wine after his imprisonment by his brothers (Shab. 139a; Gen. R. xcii., xviii.). With reference to the saying that the curse inflicted upon the world consists in the bringing forth of gnats, flies, and other insects, Yizhak states that even these creatures are of use in the world (Gen. R. v. 9).

**BIBLIOGRAPHY:** Bacher, *Ag. Pal. Amor.* i. 443, ii. 448, iii. 588; A. Perles, in *Bet Talmud*, i. 153; Heilprin, *Seder ha-Dorot*, p. 241a.  
J. S. O.

**YIZHAK BEN MARYON:** Palestinian amora of the third century; contemporary of Eleazar ben Pedat (Yer. Suk. 53a). He transmitted some haggadic maxims in the names of Ḥanina (Eccl. R. ix. 12) and Jose ben Ḥanina (Pesik. 99a). With reference to Gen. ii. 4 and 8 he remarked that since

God is proud of His creation, no one may venture to find fault with it (Gen. R. xii. on xv. 5). Commenting on II Sam. xx. 21, he states that he who offends a great man is just as guilty as he who offends the king himself (Eccl. R. on ix. 18). Other haggadic maxims of his have been preserved as follows: on Gen. xxxi. 36 and I Sam. xx. 1 (Gen. R. lxxiv. 10); on Ezek. xxi. 21 (Shoḥet Tob to Ps. lxxviii. 19); on Job ii. 4 (Eccl. R. to iii. 9); and on Ruth ii. 14 (Lev. R. xxxiv. 8).

**BIBLIOGRAPHY:** Bacher, *Ag. Pal. Amor.* i. 10, 286, 327, 427; iii. 589-591; Heilprin, *Seder ha-Dorot*, p. 241a.  
J. S. O.

**YIZHAK BAR NAḤMAN:** Palestinian amora of the third century; a friend of Jacob bar Idi, together with whom he officiated as poor-law commissioner (Yer. Shek. 49a). The two friends often engaged in halakic controversies (Yer. Shab. 14d). Yizhak twice transmits sayings by Joshua ben Levi on the conversion of purchased slaves, Ze'era having addressed a question to him on this point (Yer. Yeb. 8d). He had a dispute with Abdima of Ḥaifa concerning some question of religious law (Yer. Niddah 50a), and also engaged in a controversy with Simeon ben Pazzi (Meg. 23a). Jacob bar Aḥa transmits a saying in his name (Yer. Yeb. 12a).

**BIBLIOGRAPHY:** Bacher, *Ag. Pal. Amor.* i., ii., iii.; Heilprin, *Seder ha-Dorot*, ii. 241a.  
J. S. O.

**YIZHAK NAPPAḤA:** Palestinian amora of the third and fourth centuries. He is found under the name "Nappaḥa" only in the Babylonian Talmud, not in the Palestinian. As a haggadist he stands in the foremost rank of his contemporaries. In the Babylonian Talmud he is identified with various other Yizhaks (Pes. 113b), and since that was due to the arbitrary action of a later amora, the real name of his father can no longer be determined. As regards the name "Nappaḥa" (the smith), there had been an older Yizhak of the same name, who was rich and who is said to have owned five courts in Usha; it has not yet been possible, however, to ascertain any relationship between the two, and if the elder was an ancestor of this Yizhak, the latter could well have inherited the name without ever having practised the trade. In the later midrashic literature he is called Yizhak Nappaḥa, whereas the older works call him only R. Yizhak.

Although he was a pupil of Johanan, his associations with the latter are indicated in only one passage (B. M. 24b), which tells of his once appearing before Johanan. As a traditionist of the haggadah of Johanan, he appears only in the

**Relations** Babylonian Talmud (Ber. 62b). He was in Babylonia only temporarily,

**Johanan.** probably soon after the death of Johanan; and while there he visited in the house of the exilarch (M. K. 24b), together with Sheshet (*ib.* 24b) and Joseph (R. H. 3b; Shab. 52b). Raba quoted in his name (Ber. 32a; Tem. 15a); but sometimes tradition maintains that it is uncertain whether the sayings originated with Yizhak or with Raba (Sanh. 94a; Ned. 39a; Naz. 23b). Rabbin bar Adda also cites in his name (Ber. 6a; Pes. 8b). His

home was originally in Caesarea, but he afterward went to Tiberias to live. He associated intimately with Ammi, with whom he often discussed halakic questions (Soṭah 34a; Men. 11b; Hag. 26a; Ber. 41a; Yoma 42b); and together they sometimes rendered decisions in matters pertaining to religious law (Hul. 48b; Ned. 57b; Ber. 27a). Yizhak, Abbahu, and Hanina bar Pappai constituted a board of judges (Ket. 84b; 'Ab. Zarah 29b; Ber. 38a, b; B. K. 117b; Git. 29b). Helbo referred to Yizhak two liturgical questions addressed to him from Galilee: the first question he answered immediately; the second he expounded publicly in the seminary (Git. 60a). A thesis on the creation of light, formulated anonymously, was made public by R. Yizhak (Gen. R. iii., beginning). He also engaged in haggadic discussions with the celebrated Levi (Gen. R. xix. 14; Pesik. R. xxiii., beginning; Ber. 4a; Yer. Ta'an. 65b); with Abba b. Kahana (Gen. R. xliii. 7; Lev. R. ii. 1; Midr. Teh. to Ps. xlix. 1); with Aḥa (Pesik. R. xv.; Gen. R. v. 7; Yer. Pe'ah 15d); and with Hiyya bar Abba (Lev. R. xx. 7; Pesik. R. xxii.). Among those who transmitted in the name of Yizhak were the famous halakist Haggai, the latter's sons Jonathan and Azariah (Gen. R. xxii. 18, xl. 6; Midr. Shemuel xxii., end), and Luliani ben Tabrin (Gen. R. *passim*; Midr. Teh. to Ps. xxiv. 4; Yer. Meg. 75c).

That Yizhak was a great authority on the Halakah, as well as on the Haggadah, is shown by an anecdote which is told and according to which Ammi and Assi would not let him speak, because the one wished to hear Halakah and the other Haggadah (B. K. 60b). So after telling them the celebrated story of the man who had two wives, one of whom pulled out all his white hairs because she was young, whereas the other extracted his black hairs because she was old, R. Yizhak presented to them a haggadah with a halakic background, in order to satisfy both at the same time. Yizhak, however, devoted himself to the Haggadah with more zeal, because he regarded it as a necessity in the adverse circumstances of the Jews. The poverty of the Palestinians had increased to such an extent that people no longer waited for the harvest, but ate the green ears of wheat (Gen. R. xx. 24); consequently they were in need of comfort and refreshment of soul (Pes. 101b). Yizhak tried to make his lectures as effective as possible, and they show him to have been an unusually forceful rhetorician and a skilful exegete.

Yizhak's haggadic material may be divided according to contents into the following four groups: I. Proverbs and dicta: concerning sins (Suk. 52a, b; Hag. 16a; Kid. 31a; Ber. 25a; R. H. 16b; Yoma 87a; B. B. 9b; Pes. 190b); concerning the relation of man to God (Ned. 32a; Soṭah 48b;

**His Sayings.** Ruth R. i. 2); on the relation of man to his fellow beings (B. M. 42a; Meg. 28a; B. K. 93a); concerning prayer (Pes. 181a; Lev. R. xxx. 3; Midr. Shemuel i. 7; R. H. 16b; Yer. Kid. 61b; Yer. Ned. 41b); concerning study and the Law (Pes. 193a, b; Meg. 6b; Lev. R. ii. 1; Sanh. 21b, 24a; Hul. 91a; Yoma 77a); concerning Israel (Pes. 165a; Gen. R. lxiii. 8); concerning the nations (Esther R. i. 10; Lev. R. i. 14; Ex. R. xxxviii. 3); concerning Jerusalem (Pesik. R. xli.

1; Pes. 6a). II. Exegesis: general (Sanh. 82a, 89a, 95b; Tem. 16a; Yer. R. H. 57c; Gen. R. liii. 20; Hul. 91b; Soṭah 48b; B. B. 16a); halakic (Ber. 13b; Git. 59b; Pes. 31b; Yoma 77a; Yer. Soṭah 17a); Biblical personages (Gen. R. xxxiv. 11, xxxix. 7, lviii. 7; Yeb. 64a); Biblical narratives (Soṭah 34a; Deut. R. xi. 2; B. B. 91a; Midr. Teh. to Ps. vii. 13; Sanh. 106b; Men. 53b; Esther R. iii. 9; Pesik. R. xxxv. 1). III. Homiletics (Gen. R. xix. 6, xxxviii. 7; Sanh. 96a; B. M. 87a; Yer. Soṭah 17b; Ex. R. xliii. 4; Sanh. 102a; Ber. 63b; Eccl. R. iii. 19; Tem. 16a; Yer. Ta'au. 65b; Hor. 10b). IV. Proems (Gen. R. iii. 1, lix. 2, lxx. 7; Pes. 101b; Ex. R. xxxii. 5; Lev. R. xii. 2); maxims (Gen. R. lvi. 1; Deut. R. ii. 27; Lev. R. xxxiv. 8); similes (Yer. R. H. 57b; Lev. R. v. 6; Ex. R. xv. 16; Yer. Ber. 13a; B. B. 74b); Messianic subjects (Eccl. R. i. 11; Deut. R. i. 19; 'Ab. Zarah 3b); eschatology (Lev. R. xiii. 3; Midr. Teh. to Ps. xlix. 1; Shab. 152a; B. M. 83b).

According to the unanimous testimony of several writers of the tenth century, the gaon Hai b. David ascribed to Yizhak Nappaha the calculation of the Rabbinite calendar. The only fact known concerning Yizhak's family is that his daughter married the Babylonian amora Pappa (Hul. 110a).

**YIZHAK BEN PARNAK:** Palestinian amora of uncertain period. He is named as the author of an apocryphal work entitled *פרק ר' יצחק בן פרנך מניהנם* which describes the events that take place at the death of a human being. When a man is dying three angels come to his bedside—the angel of death, the recording angel, and the guardian angel; and these three review his entire life. If he has been a pious man, three more angels appear; and while the struggle with death is going on one of these angels recites Isa. lvii. 1, the second *ib.* lvii. 2, and the third *ib.* lviii. 8. At last four more angels descend to the bedside; and when the dying man cries out to the earth to help him, the first angel answers him with the words of Ps. xxiv. 1; when he implores the aid of his relatives, the second angel recites Ps. xlix. 8 (A. V. 7); when he turns to his money for solace, the third angel answers him with Ps. xlix. 9 (A. V. 8); and when he appeals to his good deeds, the fourth angel recites Isa. lviii. 8. There is clearly some influence here of the Buddhist legend of "The Three Friends" (comp. "Barlaam and Josaphat," ed. Jacobs, Appendix). Yizhak's father, Parnak, transmitted in the name of Johanan (Gen. R. liii., end; M. K. 9a; Shab. 14a; B. M. 85a).

**BIBLIOGRAPHY:** Bacher, *Ag. Pal. Amor.* i. 219, note 3; iii. 767-768; Jellinek, *Bet ha-Midrash*, v. 48-49, Vienna, 1873. J. S. O.

**YIZHAK BAR REDIFA:** Palestinian amora of the fourth century; the transmitter of the haggadah of R. Ammi (Lev. R. xii., beginning; Ex. R. xliii., end; Yer. Shek. 48a; Ex. R. iii. to Ex. iii. 14). He once requested the amora Jeremiah to decide a question, but received only an evasive reply (Yer. Sheb. 39a). He was the author of several explanations of the stories concerning Samson (Soṭah 9b).

Especial mention should be made of his interpretation of the word העכסנה in Isa. iii. 16, which he derives from the Greek ἔχης ("serpent"), saying: "The women used to place myrrh and balsam in their shoes, and when meeting young men in the streets they stamped their feet so that a strong odor arose which awakened evil impulses in the youths, as though they were under the influence of a serpent's poison" (Shab. 62b).

Yizhak transmitted dissertations on the salvation of the tribe of Benjamin, with reference to Judges xxi. 7 (B. B. 116a); on the list of idolatrous priests referred to in Hosea xiii. 2 (Sanh. 62a); on the pronunciation of the words "Praised be the name of His glorious kingdom" (ב"ש"כ"מ"ל"ו) after the "Shema" (Pes. 56a); on the act of rising when the name of God is uttered, as deduced from Judges iii. 20 (Sanh. 60a); and on the assumption of the sex of an expected child, with reference to Lev. xii. 2 (Ber. 60a; Niddah 25b, 31a).

S. O.

**YIZHAK BEN SAMUEL BEN MARTA:**

Babylonian amora of the third and fourth centuries. He was a pupil of R. Nahman, to whom he directed questions relating to sacrifice (Men. 81a) and to differentiation between sanctified and unsanctified things (Hul. 35a). In the name of Rab he transmitted sayings relating to the presentation of letters of divorce (Git. 13a, 63b), and to Rab's method of pronouncing the Sabbatical benediction (Pes. 166a). Rabbah transmitted sayings of Yizhak's (Meg. 16b); Ze'era addressed him as "Rabbenu" (Hul. 30b); and Rami bar Hama directed a question to him (*ib.* 35a). Yizhak once met Simlai in Nisibis, where he heard the latter denounce the free use of oil among the Jews; and he later furnished a report of this denunciation ('Ab. Zarah 36a; comp. Yer. 'Ab. Zarah 41d).

**BIBLIOGRAPHY:** Bacher, *Ag. Pal. Amor.* i. 569; Heilprin, *Seder ha-Dorot*, ii. 239-240.

J.

S. O.

**YIZHAK BEN TABLAI:** Palestinian amora of the fourth century; a contemporary of Jacob ben Zabdai and Helbo, together with both of whom he was called upon to decide a question of religious law (Yer. Niddah 50a). When asked whether the law of Demai applied to the Syrian leek, he was unable to decide the question by himself, and had to seek the advice of R. Jose (Yer. Dem. 22d); and on another occasion, when a question relating to the divorce law was addressed to him, he had to refer it to Eleazar (Yer. Kid. 63c). A tradition handed down from the above-mentioned Eleazar was differently transmitted by the amoraim Jonah and Jose (Yer. Sheb. 33d).

In the Babylonian Talmud (Pes. 113b) Yizhak has been identified with five other amoraim of similar name, but this has been refuted by Bacher, who disproved also the allegation of S. Krauss that the names יזחא and יזחא are identical. The Babylonian Talmud (Ned. 81b) mentions Yizhak as the transmitter of an interpretation of Mal. iii. 20. To him is ascribed also the haggadic explanation identifying the name לבנן with the Temple, with reference to the paro-

nomasia on לבנן and מלבין, which latter word, meaning "to make white," has been used with regard to the Temple in the sense of "atone." Yizhak was the author, moreover, of haggadot on Deut. xxix. 10 and Josh. x. 4 (Midr. Tan. to Deut. xxix.) and of a haggadah comparing Israel to the stubborn princess (Pesik. R. xxviii.; Midr. Teh. to Ps. cxxxviii. 5).

**YIZHAK BEN ZE'ERA:** Palestinian amora of the fourth century. He interpreted the word חרן in Ps. xix. 6, in connection with Gen. xviii. 11, as signifying that the descending sun resembles a drop of blood not larger than a mustard-seed (Lev. R. xxxi. 9). He is credited also with an interpretation of a verse of the Song of Solomon (vii. 10); but some confusion exists with regard to the name, that of Bar Nazira occurring instead of his in some passages (Yeb. 97a; Bek. 31b).

**YIZHAKI.** See RASIII.

**YIZHAKI, ABRAHAM:** Turkish Talmudist; lived at Salonica toward the end of the sixteenth century. He was dayyan under Rabbi Solomon ha-Levi, after whom Yizhaki signed third under a decision issued in 1597, and second under a decision of 1598. Yizhaki was the author of the work "Ahot Ke'tannah," which is quoted in Joseph Almosnino's "Edut bi-Yehosef" (i., No. 54) and in Hasdai Perahya's "Torat Hessed" (No. 65), and printed at the end of Jacob Hagiz's "Halakot Ke'tannot," and which is erroneously ascribed by Heilprin ("Seder ha-Dorot," iii., s. v.) to Michael b. Moses ha-Kohen. It is a work in four parts on the laws relative to the "get" of a minor.

**BIBLIOGRAPHY:** BenJacob, *Ozar ha-Sefarim*, p. 34, No. 646; Fuenn, *Keneset Yisrael*, p. 30; Michael, *Or ha-Hayyim*, No. 141.

**YIZHAKI, ABRAHAM BEN DAVID:** Palestinian rabbi and anti-Shabbethaian; born in 1661; died at Jerusalem June 10, 1729; on his mother's side a grandson of Abraham Azulai. He was a pupil of Moses Galante, and was in his turn the teacher of Moses Hagiz. Yizhaki was prominent in opposition to the followers of Shabbethai Zebi, and exhorted the rabbis of Smyrna to investigate the writings of Miguel Cardoso. He signed the letter of excommunication launched against Nehemiah Hayyun by the rabbinate of Jerusalem in 1708. Later, Yizhaki was sent to Europe to collect contributions, and when at Constantinople he wrote a preface to Jacob Sason's "Bene Ya'akov." In 1711 he arrived at Leghorn, where he agitated strongly against Hayyun; and he did the same at Amsterdam in the following year, together with Zebi Ashkenazi. On his way back to Jerusalem in 1714 Yizhaki passed through Constantinople, where he joined the other rabbis in the excommunication of Hayyun.

Of Yizhaki's works, only the "Zera' Abraham," responsa on the four Turim, was published (vol. i., on Oraḥ Hayyim and Yoreh De'ah, Smyrna, 1733; vol. ii., on Eben ha 'Ezer and Hoshen Mishpat, Constan-

tinople, 1732). His other works are: "Iggeret Shibbukin" and "Ketobet Ka'akea," both on Hayyun's heresies; a work on Maimonides' "Yad"; and novellæ on the Shulhan 'Aruk.

**YIZIDRO (YSIDRO), ABRAHAM GABBAL.** See GABBAL.

**YOD (י):** Tenth letter of the Hebrew alphabet. The name seems to be connected with "yad," meaning "hand"; the Phenician "yod" remotely resembles a hand in form. The letter is a palatal semivowel, identical in sound with the English "y." Preceded by the cognate vowel "i" (= Eng. "ee"), it blends with it, the resulting combination being long "i." With a preceding a-vowel it forms the diphthong "ai," which in Hebrew (that language having preserved no diphthongal sounds) has become "ë" (= Eng. "ay"). As a radical, "yod" sometimes interchanges with "waw." As a numeral, it has in the later usage the value 10. The Tetragrammaton is sometimes represented by "yod," its first letter.

**YOKE.** See AGRICULTURE.

**YOM, HA-**. See PERIODICALS.

**YOM KIPPUR.** See ATONEMENT, DAY OF.

**YOM KIPPUR KAṬAN:** The "Minor Day of Atonement"; observed on the day preceding each Rosh Ḥodesh or New-Moon Day, the observance consisting of fasting and supplication, but being much less rigorous than that of Yom Kippur proper. The custom is of comparatively recent origin and is not mentioned in the Shulhan 'Aruk. It appears to have been inaugurated in the sixteenth century at Safed by the cabalist Moses Cordovero (Da Silva, "Peri Ḥadash," Rosh Ḥodesh, § 417), who called the fast "Yom Kippur Kaṭan"; and it was included by Isaac Luria in his "Seder ha-Tefillah." R. Isaiah Horowitz refers to it by that name, and says it should be observed by fasting and repentance: "Following the custom of the very pious, one must repent of his ways and make restitutions both in money and in personal acts, in order that he may enter the new month as pure as a new-born infant" ("Shelah," ed. Amsterdam, 1698, pp. 120b, 140a, 179a). When Rosh Ḥodesh occurs on a Sabbath or Sunday, Yom Kippur Kaṭan is observed on the preceding Thursday. The fasting is not obligatory, and only the very pious observe that act of self-denial.

The liturgy of the day, which consists of seliḥot, is recited at the Minḥah prayer in the afternoon. Tallit and tefillin are adjusted, and if there are among the congregation ten persons who have fasted, they read from the scroll "Wa-Yehal" (Ex. xxxii. 11 *et seq.*). The seliḥot are taken partly from the collection used on the general fast-days and Yom Kippur, with the "Widdui ha-Gadol" (the great confession of sin by Rabbenu Nissim) and "Ashamnu," and also a beautiful poem written for the occasion by Leon of Modena and beginning with "Yom zeh." Some congregations add "Abinu Malkenu." The fast ends with the Minḥah prayer. For the text see Baer, "Abodat Yisrael," pp. 317-319; Emden's Siddur "Bet Ya'aqob," ed. Warsaw, pp. 212a-216b.

J. D. E.

**YOM-TOB BEN ABRAHAM ISHBILI** (called also **RIṬBA**, from the initials of his name, ריטבא): Famous Talmudic commentator of the first half of the fourteenth century. He received his name from the city of Seville; but was living at Alcolea de Cinca in 1342. He was gifted with a clear, acute mind, and was a pupil of Aaron ha-Levi and Solomon Adret at Barcelona, although it is doubtful whether he studied under Meïr ha-Levi Abulafia also, as some scholars think (Perles, "R. Salomo b. Abraham b. Adret," p. 59, Breslau, 1863). He was engaged in a controversy with Rabbi Dan Ashkenazi, who had emigrated to Spain. Yom-Ṭob's voluminous works include valuable novellæ on many of the Talmudic treatises, and commentaries on the writings of Alfasi and certain works of Naḥmanides. His published novellæ include those on 'Eruvin, Ta'anit, Mo'ed Kaṭan, Ketubot, and Baba Mezi'a (Amsterdam, 1729; Prague, 1810), Ta'anit and Mo'ed Kaṭan (Prague, 1811), Ḥullin (*ib.* 1734), Giṭtin (Salonica, 1758), Yebamot (Leghorn, 1787), Shabbat (Salonica, 1806), Yoma (Constantinople, 1754; Berlin, 1860), 'Abodah Zarah (Ofen, 1824), and Rosh ha-Shanah (Königsberg, 1858). Most of the novellæ have been collected under the title "Hiddushe ha-Riṭba" (Lemberg, 1860-61), while extracts from his commentaries on haggadic passages are quoted by the author of the "En Ya'aqob" (Berlin, 1709; Fürth, 1766; etc.). The "Migdal 'Oz" of Shem-Ṭob ibn Gaon and the "Maggid Mishneh" of Vidal of Tolosa have been erroneously ascribed to him.

**YOM-TOB BEN ISAAC OF JOIGNY** (called also **ha-Ḳodesh**): Tosafist and liturgical poet who suffered martyrdom at York, England, in March, 1190, as has been proved by Grätz ("Gesch." vi. 455). The Jews of York sought refuge in the fortress from the fury of the populace; and after offering a vain resistance for several days the most of them, on the advice of Yom-Ṭob ben Isaac, joined him in voluntary death.

Yom-Ṭob was a pupil of R. Tam, and was prominent as a tosafist, being frequently mentioned with the epithet "ha-Ḳodesh" (= "the Holy" or "the Martyr"). He also was a Biblical exegete and a liturgical poet. His best-known productions are OMNAM KEN, a hymn sung on the eve of the Day of Atonement, and a penitential prayer in fourteen stanzas. He wrote also an elegy beginning with the words "Yah tishpok" and lamenting the death of the Jews of Blois who perished in 1071.

**YOMA:** A treatise in the Mishnah, in the Tosefta, and in both Talmudim, treating of the divine

service on the Day of Atonement, of the fasting ceremony on that day, and of other regulations pertaining to the occasion. In the Tosefta this treatise is entitled "Yom ha-Kippurim" (Day of Atonement), while in the Mishnah (ed. Lowe), as well as by Sherira Gaon, it is called simply "Kippurim" (Atonement). The Day of Atonement was known also as "Yoma Rabba" (The Great Day), often shortened to "Yoma" (The Day); hence this treatise was given the name of "Yoma" in the Mishnah as well as in the Talmudim. In most Mishnah editions the treatise is the fifth in the order of Mo'ed. It is divided into eight chapters, containing a total of sixty-one paragraphs.

Ch. i.: On the high priest's seven days of preparation for his service on the Day of Atonement; how the stipulated order of the sacrificial ceremony was read to him, and how the elders impressed upon him that he should proceed only according to the prescribed order, and not in harmony

**Contents:** with Sadducean customs (§§ 1-5); **Ch. i.-viii.** guarding the night of the Day of Atonement; if the high priest was a wise man and a scholar, he preached a sermon; if not, the sages present delivered a lecture or read from Holy Script, choosing only passages from the Hagiographa; how the young priests watched to see that the high priest did not fall asleep (§§ 6-7); on the removal of the ashes from the altar upon the Day of Atonement and upon other days (§ 8).

Ch. ii.: In connection with the rules regarding the removal of the ashes (i. 8), it is said that this duty originally devolved on all priests without any specific allotment, such distinction being introduced only in the course of time (§§ 1-2); other allotments made in order to distribute the Temple duties among the priests (§§ 3-4); when the daily sacrifice ("tamid") was offered, and regulations concerning other sacrifices (§§ 5-7).

Ch. iii.: Further regulations regarding the divine service in the Temple on the Day of Atonement; how the high priest was to bathe five times and wash himself ten times on that day; regarding the various dresses he should wear for the different services (§§ 1-7); the presentation to the high priest of a bullock, and the confession of sin he was to speak while holding his hands on the bullock's head (§ 8); the casting of lots for the two he-goats; Ben Gamla had made two golden dice for this purpose, and was therefore mentioned with words of praise (§ 9), as were also Ben Kattina, King Monobaz, Queen Helene, and Nicanor, who had all introduced improvements or embellishments in the sanctuary (§ 10); words of blame directed against the family of Garmu for being unwilling to teach others how to prepare the showbread; similar comment on the family of Abtinus for refusing to teach the method of compounding the incense ("ketoret"), and on Hugros (or Hugdos) ben Levi and Ben Kamzar, who refused to give instruction in singing and writing respectively (§ 11).

Ch. iv.: How lots were cast by the high priest over the two he-goats, one of which was slaughtered, while the other was sent to Azazel; how the high priest marked the he-goats by placing a red ribbon upon the head of one and around the neck of

the other; the confession of sin pronounced by the high priest for the priestly caste (§§ 1-2); particulars of the incense-offering on the Day of Atonement; the ascension of the high priest to the altar, and his washing of hands and feet (§§ 3-6).

Ch. v.: What was done in the sanctuary; the incense-offering; the sprinkling of the blood, first of the bullock, and later of the he-goat; the short prayer spoken by the high priest; the foundation-stone ("eben shtiyah") in the most holy part of the Temple, upon which the high priest, in the absence of the Ark of the Covenant from the Second Temple, placed the incense; the purification of the golden altar; and other regulations regarding the order of service on the Day of Atonement.

Ch. vi.: What was done with the he-goat sent to Azazel; the confession of sin pronounced by the high priest for all Israel while he held his hands upon the head of the Azazel goat; who might lead the animal to Azazel (§§ 1-3); how the Babylonians present in Jerusalem used to pluck hair from Azazel's goat; how the aristocratic Jerusalemites accompanied the goat to the first halting-place; regarding the ten stations in the journey from Jerusalem to the mountain-top from which the animal was thrown down; how it was thrown; how color-signals were used to make it known in Jerusalem and in the Temple that Azazel's goat had reached the wilderness; how to the door of the Hekal was tied a red ribbon, which turned white when the goat had arrived in the wilderness (§§ 4-8).

Ch. vii.: The ceremony attending the high priest's reading from the Law; the paragraphs read by him, and what he repeated; the benediction pronounced by him; the remainder of his duties; the eight articles of dress which he had to wear when conducting the service and when questioning the Urim and Thummim; on what occasions the Urim and Thummim were consulted.

Ch. viii.: Regulations concerning fasting on the Day of Atonement; from what enjoyments one must abstain; the means by which atonement is made—through sin-offering, guilt-offering, death, Day of Atonement, and penance; cases in which no atonement takes place; sins against God are expiated through the Day of Atonement, while sins against one's fellow men can be blotted out only when pardoned by those trespassed against. On the original form of this mishnaic treatise see Joseph Derenbourg, in "R. E. J." vi. 41 *et seq.*

The Tosefta to this treatise is divided into five chapters, and contains additions to and amplifications of the Mishnah, and also several haggadic and ethical maxims, among which the following may be mentioned: "Ben 'Azzai used to say, 'What belongs to you [*i.e.*, 'What you have deserved'] is given to you; by your name [*i.e.*, 'the name you have made for yourself'] you are called; and on the place to which you are entitled you are stationed. God forgets no one; and no man can take to himself that which is intended for another'" (ii. 8). "He who induces others to lead good and pious lives will be prevented from committing any sin, in order that he may not be excluded from the future world while those taught by him partake therein.

and  
**Gemara.**

On the other hand, he who leads others to sin is prevented from doing penance, that he may not partake of the eternal life from which those seduced by him are excluded" (v. 10-11). The Tosefta defends those who in the Mishnah are blamed for refusing to give instruction, saying they did so because they feared that, if they imparted their knowledge, those whom they taught might use their attainments in the service of a temple of idolatry (ii. 5-8). Other items of interest in the Tosefta are an account of the miraculous saving of the Gate of Nicanor (ii. 4), and R. Jose's assertion that he had seen in Rome the curtain from the sanctuary of the Temple in Jerusalem, and that it still had upon it stains caused by the sprinkling of blood by the high priests on the Day of Atonement (iii. 8).

Both the Babylonian and the Palestinian Gemara discuss and explain the various mishnaic maxims, and contain in addition a wealth of haggadic explanations and proverbs, as well as many interesting parables and narratives. The following passages from the Babylonian Gemara may be quoted here: "If one is told anything by another, he must keep it secret even though not explicitly requested to do so; only when he has received express permission may he relate it further" (4b). "The First Temple stood for 410 years, during which time 18 high priests officiated successively; the Second Temple stood 420 years, and during that time more than 300 high priests officiated" (9a). "During the time of the Second Temple the people studied the Law, observed the commandments, and did deeds of charity; only the causeless hatred between the factions brought about the destruction of the Temple and the fall of the state" (9b). It is told how Hillel endeavored to study the Law in spite of his poverty, and how he, with danger to his life, attempted to attend the lectures of Shemaiah and Abtalion. It is likewise related of Eleazar ben Harsum that, in spite of his wealth, he led a life of self-denial in order that he might study the Law (35b). Another interesting passage narrates how the Jews, on their return from Babylonia, succeeded in rooting out from among themselves the existing tendency to idolatry (69b). A description is given (73b) of the mode of questioning the Urim and Thummim, and of the manner in which their replies became visible upon the stones; the passage §§ 75a-76b tells how the manna fell, how thick it lay upon the ground, and how it tasted. It is related in § 83b that once when R. Meir, R. Judah, and R. Jose visited an inn the first-named formed a correct estimate of the innkeeper's character.

J.

J. Z. L.

**YORK:** Capital town of Yorkshire, England, and seat of a metropolitan see. In the Angevin period it was the second city in the kingdom, and Jews flocked thither in considerable numbers. It is recorded that at the coronation of Richard I. two "noble" Jews of York, Joce and Benedict, went up to London, probably as a deputation from the York community. During a riot which followed the festivities Benedict was forced to submit to baptism, but was permitted by Richard to revert on the following day (Howden, "Chronica," ed. Stubbs, iii. 14); he died shortly afterward at Northampton. Joce es-

caped and returned to his home in York, which was looked upon as a royal residence on account of its strength and magnificence. He had been one of the agents of Aaron of Lincoln, among whose debtors was one Richard de Malbis, who in 1182 had paid £4 out of the great debt which he owed to Aaron.

De Malbis and others of the York nobles who were contemplating joining Richard in the Third Crusade took advantage of a fire that broke out in the city to raise a tumult against the Jews. The houses of Benedict and Joce were attacked, and the latter obtained the permission of the warden of York Castle to remove his wife and children and the rest of the Jews into the castle, where they were probably placed in Clifford's Tower. This was surrounded by the mob, and when the warden left the castle the Jews in fear would not readmit him. He appealed to the sheriff, who called out the county militia; and Clifford's Tower was surrounded for several days. A certain Premonstratensian monk paced the walls each morning and took the sacrament, as if the work of bounding on the mob was a holy office. He was crushed by a stone thrown by the besieged Jews; this changed the wrath of the mob to a frenzied madness. When the Jews in Clifford's Tower found that they had no alternative but to submit to baptism or perish at the hands of the mob, YOM-TOB OF JOGNY, who had become their chief rabbi some time before, recalled the practise of their ancestors, and urged that they should kill themselves rather than surrender to the cruelty of their enemies. Those who disagreed were permitted to withdraw; and the remainder, having set fire to their garments and goods that these might not fall into the hands of the mob, found refuge in death. Joce with his own hand cut the throat of

his wife, Hannah, with the knife used  
**The** in shehitah; and finally Joce was killed  
**Massacre.** by Yom-Tob, who then stabbed himself, being the only person of the

number to take upon himself the crime of suicide. In the morning the few who had withdrawn summoned the besiegers, who killed most of them, sending the remainder to London in the hands of the sheriff. The mob searched the castle for the Jews' deeds of indebtedness, and, not finding them, hastened to the minster and took the deeds from the cathedral treasury, thus showing the real motive of their acts.

William de Longchamp, the ruler of the kingdom in Richard's absence, was much incensed at this insult to the royal dignity, the Jews being under the king's protection. He accordingly marched to York, imposed heavy fines on fifty-two of the chief citizens, and banished Richard de Malbis and various members of the Percy, Faulconbridge, and Darrel families, who had clearly been the leaders of the riot, and each of whom, according to unimpeachable evidence, was indebted to the Jews. Richard de Malbis returned from Scotland ten years later, when he "obtained warren" for his land at Acaster Malbis, five miles south of York, the name of which still recalls the arch villain of the York tragedy.

For some time after this there is no record of Jews at York. Among the contributions to the Northampton donum of 1194 none are mentioned as

coming from York, although it was the second city in the kingdom; but in the early part of the thirteenth century Jews began again to settle there. In 1208 a Jewess of York

**Later History.** was murdered, three Christians being suspected of the crime; a charge of murder was brought against them by Milo, her husband, while her brother Benedict brought a similar charge against Milo himself ("Select Pleas of the Crown," Selden Society, i., Nos. 59, 103). Joce's son, AARON OF YORK, became the chief Jew of the kingdom in the reign of Henry III., being presbyter, or chief rabbi, of England for a short time in 1237. The widow of Aaron of York claimed dower from Thomas Kyme of Northampton, and in 1270 attempted to re-

cover a considerable number of debts due to her deceased husband (Rigg, "Select Pleas of the Jewish Exchequer," pp. 52-53, London, 1902). When the regulation was issued permitting Jews to reside only in certain towns where archæ were kept for the preservation of Jewish deeds, York was included in the list, showing that it was still an important center of Jewish commerce in 1272. Among the eminent Jews of London mentioned at the time of the expulsion was Bonamy of York. On the expulsion

of the Jews from England the lands and chattels of those living in York fell into the king's hands. The Jewish burial-ground at York was between St. Morris and the River Fosse, and the synagogue was on the north side of the Jubbergate, in close proximity to the castle, under the warden of which the Jews of the city were placed by the king's authority.

Since the return of the Jews to England there has been no congregation at York, but a few Jewish tailors have settled there in recent years (E. S. Rowntree, "Poverty, a Study of Town Life," p. 11, London, 1903), and for their benefit a synagogue was erected in the Aldwark in 1892.

**YOSIPPON.** See JOSEPHUS.

#### YOUNG MEN'S HEBREW ASSOCIATION:

Communal institution organized in various cities of the United States for the mental, moral, social, and physical improvement of Jewish young men. The first established was that in New York, which was organized on March 22, 1874, at the house of Dr. Simeon N. Leo. The board of directors was elected on May 3, 1874, and included Isaac S. Isaacs, Adolph L. Sanger, Oscar S. Straus, Lewis May, and others. The first president was Lewis May (1874-76). On March

27, 1876, the association removed from its temporary quarters to the Harvard Rooms, Forty-second street and Sixth avenue.

The functions of the New York branch are philanthropic and benevolent. The social work includes public lectures by prominent citizens, literary and debating meetings, free classes in Bible, Hebrew, stenography, book-keeping, mechanical drawing, and other subjects, as well as in physical culture. A library was founded, and in 1886 became the basis of the Aguilar Free Library,

which was recently merged into the New York Public Library. For about ten years (1875-85) the association had rather varying fortunes; and in the following decade its affairs became so unsatisfactory that the question of disbanding was considered. A downtown branch was opened on the East Side, out of which in 1891 grew the Educational Alliance. In 1895, however, a reorganization took place; and on Jan. 10, 1897, Jacob H. Schiff presented the association with a new home at 861 Lexington avenue, which gift was followed on Dec. 20, 1898, by the donation of a new building at Ninety-second street and Lexington avenue. This structure, which was dedicated on May 30, 1900, is provided with all modern requisites, including a library, reading-rooms (containing more than 9,000

Clifford's Tower, York, England.

(From a photograph.)

volumes for reference), a gymnasium, and rooms for recreation. In addition to evening classes in a large number of subjects, the association holds religious services on Friday evenings, and has established a vacation camp. For the year ending April 30, 1905, the total attendance was no less than 166,289; the income was \$39,423.21; and the disbursements amounted to \$38,673.32. Percival S. Menken has been president of the association since 1895.

The Young Men's Hebrew Association of New York city is the parent institution of similar organizations that have been established throughout the United States. In 1875 there was founded in the city of Philadelphia, Pa., a Young Men's Hebrew Association, which has continued in existence to the present time. It is located in a rented building; and its activities consist principally in the delivery of public lectures during the winter season, an annual ball, and the encouragement of literature and of debating societies, besides numerous classes, a gymnasium, and entertainments. It also awards prizes for essays; and several periodicals have been issued under its auspices. Joint public debates have been held at various times between the Philadelphia association and that of New York. The former has a small library for the use of members.

The Young Men's Hebrew Association of New Orleans, La., has been established for a number of years. It is largely devoted to social purposes, and therefore performs for the most part the functions of a club. The handsome building occupied by the association for a number of years was recently destroyed by fire; it contained a ballroom, a billiard-room, parlors, meeting-rooms, and a library. This is one of the principal Jewish organizations of the city.

In St. Louis, Mo., there is a Young Men's Hebrew Association of considerable size and importance. It attempts to combine the features of both the New Orleans and the New York organization; social purposes, however, predominate, and in its functions and activities it is a club rather than a philanthropic association like the New York branch.

San Francisco, Cal., has a Young Men's Hebrew Association with a considerable membership. It is conducted practically on the lines of the organization in New Orleans, being confined largely if not exclusively to club features.

In Louisville, Ky., there is a Young Men's Hebrew Association; but it is not in a flourishing condition, and it seems to be very difficult to arouse interest in its welfare.

In Washington, D. C., there was for a number of years a Young Men's Hebrew Association; but for causes similar to those which affect the organization in Louisville, Ky., it was some time ago abandoned, and has not since been revived.

Chicago, Ill., has never had a Young Men's Hebrew Association of any significance.

In addition to those mentioned above, there are numerous other Young Men's Hebrew Associations of more or less importance throughout the United States. In Springfield, Mass., there is an association which was established a few years ago and which is principally a social and literary organization. Memphis, Tenn., has for a num-

ber of years supported a Young Men's Hebrew Association, which follows closely in its methods the branch in New Orleans. It is one of the principal Jewish organizations in Memphis, and performs to a large extent the functions of a social club, dramatic performances being among the entertainments provided by its members.

The Young Men's Hebrew Association of Boston, Mass., is now located in a home of its own, the gift of a public-spirited Jewish citizen, and has recently been reorganized, being devoted chiefly to philanthropic and benevolent work. It maintains public classes, debating and literary societies, religious work, a library, reading-rooms, and other features, in all of which it follows closely the lead of the New York organization.

In the following cities Young Men's Hebrew Associations have been established on a small scale, confining themselves principally to social activities and serving as small social clubs: Nashville, Tenn.; Mobile, Ala.; Savannah, Ga.; Stamford, Conn.; Chelsea, Mass.; Wilkesbarre, Pa.; Salem, Mass.; Milwaukee, Wis.; Baltimore, Md.; Newport News, Va.; Fort Worth, Tex.; and Newark, N. J.

P. S. M.

**YOZEROT**: The collective name for the piyyuṭim introduced in the recitation of the morning service on the festivals and on special Sabbaths throughout the year in the Northern rituals (see ZUNZ, "S. P." *passim*). These hymns are termed **KEROBOT** if intercalated in the repetition of the 'AMIDAH, but are called in turn "Yozer" (creator), "Ofan" (angel), "Me'orah" (light), "Ahabah" (love), "Zulat" (besides), and "Ge'ullah" (redemption) if introduced in the blessings which precede and follow the **SHEMA'** at the points where these respective words or subjects occur in the ordinary liturgy. The benediction "Yozer" coming first, its title has been extended to cover the whole class of introduced hymns, and, even further, the section of the service itself that centers around the "Shema'" as a whole. The modern tendency is to omit the "Yozerot" because their recitation results in excessive prolongation of the services (comp. **HAZZAN** and **LITURGY**).

Owing to the comparative lateness of their adoption into the ritual, there is much less uniformity in the traditional melodies for these piyyuṭim than for any other section of the synagogal melody which dates from before the modern period. The scheme discussed under **KEROBOT** is sometimes followed; but more generally the **hazzan** founds his intonation, with much freedom of treatment, on the prayer-motive or model musical interpretation of the particular service in which he is engaged (see **MUSIC**, **SYNAGOGAL**). When he departs from it, his florid melody is conceived in the spirit of modern instrumental virtuosity (comp. 'AL HA-RISHONIM) or closely reproduces the old-world folk-song of northern Europe (comp. MA'oz ZUR). But while following the local tradition, he draws a sharp distinction not merely between the jubilant praise of the three festivals and the pleading supplication of the Day of Penitence, but also between the historical reminiscence of the Sabbaths preceding Passover, with their proud reference to the glories of the Temple ritual, and the agonized lament of those coming between Passover

and Pentecost, with their distressful memory of the barbarity of the Crusaders and other persecutors of the dark Middle Ages. This latter sentiment often makes itself felt even amid the joyous melody of the festival days (comp. **BERAḤ DODI**).

Whatever may have been the melodies to which such piyyuṭim were chanted when first introduced, the great number of them in the Northern liturgies produced so much inconvenience by lengthening the service that the tunes were soon ignored, and the verses themselves were quickly read through in an undertone, only the concluding stanza being intoned by the ḥazzan (comp. **ḲEROBOT**). In the Sephardic ritual, however, the number of "Yozerot" is so small that the originally chosen musical settings, also usually of a folk-song character, have been retained in living tradition till the present (comp. **ADONAI BE-ḲOL SHOḲAR**; **'ET SHA'ARE RAḲON**; **YAH SHIMEKA**).

**YSIDRO, ABRAHAM GABBAI.** See **GABBAI**.

**YUDAN:** Palestinian amora of the fourth century. His name does not occur in the Babylonian Talmud, whereas it is often mentioned in the older Palestinian midrashim, as well as in the Jerusalem Talmud, where he is repeatedly referred to as a halakist (Pe'ah 16b; Dem. 25d; Kil. 29b; Ma'as. Sh. 52c; 'Er. 20d; etc.). He was a pupil of Abba (Yer. Soṫah 16c), and became a colleague of Jose, the principal of the school at Tiberias, with whom he often engaged in halakic controversies (Yer. Pe'ah 16c; Sheb. 36d; Suk. 52a; etc.). He appears to have held the office of judge simultaneously with Jose, it being stated (Yer. Ket. 34b) that the latter once rendered alone a decision on a question of civil law at a time when Yudan had fled to Nawe. This statement concerning Yudan's flight from Tiberias to Nawe, in Peræa, is the only biographical datum known with regard to his career, no mention being made of his family relations, of his native place, or even of the name of his father. His own references to older contemporaries throw but little light upon his personality. Mention is made of an objection relating to a halakic thesis which Yudan

**Relations** personally brought to the attention of  
**with** Ze'era (Yer. Sanh. 24d); and several  
**Ze'era.** comments which Yudan made upon

Ze'era's halakic maxims have been preserved (Yer. Suk. 54a; Yer. R. H. 57d; Yer. Ber. 61b). Of his pupils, Mana, the son of Jonah, is the only one known (Yer. Pes. 33a; Ta'an. 66a). On a certain day Yudan did not visit the school, and Mana referred to him the halakic questions which had been brought up during the session (Yer. Git. 47a).

This amora is one of the best-known transmitters of haggadic literature, he having handed down maxims of many of the older amoraim, as Ḥanina, Johanan, Ḥama ben Ḥanina, Simeon b. Laḳish, and Joshua ben Levi. He often transmitted also tannaitic maxims. In many instances maxims originating with older amoraim have been ascribed to him (comp. Bacher, "Ag. Pal. Amor." p. 242, note 8); and he often places transmitted maxims side by side with his own (Yer. Ber. 13a; Gen. R. ix. 1). Together with his own

haggadic maxims there are often handed down the divergent expositions of other haggadists on the same subjects. Among the haggadists whose opinions are thus given by Yudan may be mentioned Huna, Berechiah, Phinehas, and Azariah (comp. Bacher, *l.c.*). His maxims extend to all branches of the Haggadah, and include exegetic and homiletic explanations of Biblical passages, as well as comments on Biblical personages and narratives, sentences relating to the study of the Law, and eschatological and Messianic sayings.

Some of Yudan's haggadic maxims may be mentioned here. With reference to the atoning power of suffering, he remarks that if a slave is liberated because of pain inflicted upon a single member of his body (Ex. xxi. 20), how much more entitled to liberty in the world to come is a man who has been afflicted with sufferings in his whole body?

**Haggadic** (Gen. R. xcii. 1). He who publicly  
**Maxims.** teaches the Torah shall be found worthy to have the Holy Spirit rest upon him,

even as it rested on Solomon, who, because he had preached the Torah, was thought worthy to write the books of Proverbs, Ecclesiastes, and the Song of Solomon (Cant. R., Introduction, § 9). The words "the law of the Lord" in Isa. v. 24 refer to the written law, while "the word of the Holy One" in the same verse means the oral law (Pesik. 121b). To "the nations"—by which term the Christians are probably meant—the Sabbath has been given with the word "Remember" (Ex. xx. 8), because, although they remember that day, they do not keep it; but to Israel it was given with the word "Observe" (Deut. v. 12; Pesik. R. xxiii. 115b). The visit to Seir promised by Jacob (Gen. xxxiii. 14) is meant for the future, when the "saviors shall come up on Mount Zion" (Obadiah, verse 21; Yer. 'Ab. Zarah 40c). The words "and man became a living ["ḥayyah"] soul" (Gen. ii. 7) are explained by Yudan as meaning that man was originally created with a rudimentary tail, so that he resembled an animal ("ḥayyah"); later, however, God removed this appendage in order that man's dignity should not suffer (Gen. R. xiv., where the name "Judah" occurs erroneously for "Yudan").

Yudan often interpreted Biblical words according to their consonantal formation, without referring to their vowel-sounds (Gen. R. xxxv. 1, xxxviii. 8); and he also used the numerical values of the letters as a basis for explanations (*ib.* xxxix. 11, lxxix. 1). He interpreted numbers in other ways, asserting, for instance, that the fact that the name of Barzillai occurs five times in II Sam. xix. 31-40 (corresponding to the five books of the Torah), teaches that he who supports the pious with the necessities of life, as Barzillai sustained David (II Sam. xvii. 27), is regarded as having kept all the precepts of the five books (Gen. R. lviii.). With regard to the sentence "I saw your fathers as the firstripe in the fig-tree at her first time" (Hosea ix. 10), he remarked that even as one plucks first one fig from the fig-tree, then two, then three, and at length a whole basketful, so at first "Abraham was one" (Ezek. xxxiii. 24), then there were two (Abraham and Isaac), then three (Abraham, Isaac, and Jacob), and at length "the children of Israel were fruitful, and increased abundantly" (Ex. i. 7; Gen. R. xlvi. 1).

Many of Yudan's exegetic interpretations give the correct and simple meanings of the words or passages to which they refer. Thus he explains, with regard to Ps. ix. 18, that the word **לֹא** in the first part of the

verse refers to the word **הַמֵּכָר** in the second part: "For even as the needy shall not always be forgotten, so shall not the expectation of the poor perish forever" (Midr. Teh. to Ps. ix.). In I

Sam. xxiii. 27 the word **מַלְאָךְ** denotes a messenger, and not an angel (Midr. Shemuel xvii. 2); and the word **עַפְיָיִם** in Ps. civ. 12 is to be interpreted "leaves" in analogy with the word **עַפְיָה** in Dan. iv. 9 (Midr. Teh. to Ps. civ. 9). Yudan also frequently employs parables, the following being a representative example: "Every one has a patron; and when he is in need he may not suddenly enter into the presence of his benefactor to ask for aid, but must wait at the door while a slave or an inmate of the house carries his request before the master. God, however, is not such a patron; when man is in need he shall call neither upon Gabriel nor upon Michael, but upon God direct, who will hear him without any mediators" (Yer. Ber. 13a).

BIBLIOGRAPHY: Bacher, *Ag. Pal. Amor.* iii. 237-272.

J. J. Z. L.

**YUDAN BEN ISHMAEL:** Palestinian amora of the third century; probably a brother of Yannai ben Ishmael. He solved the question whether instructors in the Law should be paid for their services, by declaring that they ought to be remunerated for the time during which they might have earned something by other work (Yer. Ned. 38c). The words "he weigheth the waters by measure" (Job xxviii. 25) were interpreted by him as implying the law of God, which is compared to water. The words of the Law are given to each individual by measure; one is accorded a knowledge of the Bible, another of the Mishnah, a third of the Halakah, and a fourth of the Haggadah, while many are learned in all (Lev. R. xv. 2, where "ben Ishmael" should be read instead of "ben Samuel").

BIBLIOGRAPHY: Frankel, *Mebo*, p. 95a; Bacher, *Ag. Pal. Amor.* iii. 603-604.

J. J. Z. L.

**YUDAN BEN MANASSEH:** Palestinian amora of the third century. One of his halakic maxims has been preserved in the Jerusalem Talmud (Kil. 27a), and the Babylonian Talmud contains two haggadic sayings by him, both based on the interpretation of a Biblical word with varied vocalization, and both referring to I Sam. ii. 2 (Meg. 14a; Ber. 10a; see "Dikduke Soferim" on both passages). In emphasizing the decorous mode of expression adopted in the Bible, Yudan declared that "even those passages which enumerate the characteristics of the unclean animals first give the marks of their cleanness" (comp. Lev. xi. 4-7); and this aphorism is frequently quoted in midrashic literature (Lev. R. xxvi. 1; Pesik. iv. [ed. Buber, p. 31a]; Num. R. xix. 1).

BIBLIOGRAPHY: Bacher, *Ag. Pal. Amor.* iii. 604.

J. J. Z. L.

**YUDAN BEN SIMEON** (called **Judah ben Simeon** in the Babylonian Talmud): Palestinian

amora of the third century; a contemporary of Johanan, who in his name transmits a ruling relating to the law of inheritance, as well as a discussion which took place between them (B. B. 114b-115a). Reference is often made to a controversy between Johanan and Yudan ben Simeon concerning written and oral law (Yer. Pe'ah 17a; Meg. 74d; Hag. 76d).

Several haggadic interpretations of Yudan's have been preserved; and of these many are of cosmogonic and cosmological content, while others refer to questions of natural history. Among the latter may be mentioned the following explanation of Job xxix. 18: "The phenix lives a thousand years; and at the end of that period its body shrinks, its feathers fall off, and only a kind of egg remains. From this egg new members grow, and the phenix returns to life" (Gen. R. xix. 5). The giant animals behemoth and leviathan, according to him, were created in order to serve as quarries for the pious in the future world. Those who have not seen the hunts and animal contests among the heathen peoples in this world will be found worthy to view the chase in the world to come (Lev. R. xiii. 3). In his haggadic interpretations Yudan employs parables also, explaining, for example, Hosea xii. 4 by a beautiful allegory (Lev. R. xxvii. 6; Num. R. x. 1). Moreover, he made use of the system of **NOTARIKON**, interpreting the first word of the Decalogue, **לֹא**, by decomposing the letters, so that it read **לִמְדוּ אֵלֶיךָ**, *i. e.*, "learn thousands," that is, "study the numberless words of the Law" (Pesik. xxii.).

J. J. Z. L.

**YUDGHANITES:** Members of the Jewish sect called "Al-Yudghaniyyah," after the name of its founder, Yudghan or Judah of Hamadan, a disciple of Abu 'Isa al-Isfahani. Shortly after the defeat of Abu 'Isa and his followers, the 'Isawites, at Rai (the ancient Rhage) early in the eighth century, Yudghan conceived the project of forming a new sect from the scattered followers of his master. More prudent than the founder of the 'Isawite sect, Yudghan did not pretend to have been entrusted by God with the mission of delivering the Jews from the rule of the Gentiles and of making them politically independent, but confined himself to the rôle of a prophet and teacher, assuming the surname of "al-Ra'i" (= "the Shepherd"; not "al-Da'i," as given erroneously by Shahrastani in his "Kitab al-Milal wal-Nihal," ed. Cureton, p. 168).

Influenced by the doctrines of **SUFISM**, which at that time began to spread among the Mohammedans in the land of the Magi, Yudghan set aside the literal meaning of the words of the Torah in

**Influence of Sufism.** favor of a mystic or spiritual interpretation. Like the Sufis, he taught that all religious beliefs, such as those

relating to paradise, hell, etc., are allegories; but, on the other hand, he opposed the Sufic doctrine of predestination, and declared that man is absolutely free in the choice of good and evil and is therefore responsible for his actions. From among the tenets of the 'Isawites Yudghan retained the prohibition of wine and animal food, and probably also the in-

stitution of seven daily prayers instead of the three rabbinical ones. In opposition to the ancient traditional view, according to which the Biblical accounts of God's deeds and thoughts must be taken literally, he asserted, probably under the influence of the Motazilites, that one is not allowed to represent God with material attributes, *i. e.*, anthropomorphically. Yudghan attached more importance to praying and fasting than to the observance of the ceremonial laws. He held that the laws concerning the Sabbath and the festivals were not binding in the Diaspora, but were observed merely as a remembrance.

Like Abu 'Isa, Yudghan declared that Jesus and Mohammed were prophets, and that each was sent as a missionary to his nation. According to Kirksani, both Abu 'Isa and Yudghan took this attitude for diplomatic reasons; for had they not recognized the post-Biblical prophets, their own claim to prophetic inspiration would very likely have been challenged. Yudghan gained many followers, who maintained their beliefs long after the death of their master. Their faith in him was so great that they declared he had not died, but would appear again in order to bring a new doctrine with him. Shahrastani relates that after the death of Yudghan a follower of his named Mushka founded

“Al-Mushkaniyyah.” The tenets of the new sect were the same as those of the Yudghanites, with the single addition of an injunction to forcibly impose the doctrines of Yudghan upon all Jews. Mushka marched out of Hamadan with a troop of followers, but they were all killed in the vicinity of Koom (east of Hamadan and southwest of Teheran).

According to some scholars, Saadia, in criticizing in his “Emunot we-De'ot” (vi.) the belief in metempsychosis of “the so-called Yehudim” (שניקראים יהודים), had reference to the Yudghanites, who were still in existence in his time. Although this is not impossible, as maintained by Rapoport (introduction to the “Hegyon ha-Nefesh” of Abraham bar Hiyya, p. lii.), it is highly improbable, since no mention is made by either Shahrastani or Kirksani of such a belief among the tenets of the Yudghanites. It is more probable that Saadia referred not to a special Jewish sect, but to all those, among either the Karaites or the Rabbinites, who held to the doctrine of Pythagoras.

**YULEE, DAVID LEVY**: American politician; born in St. Thomas, West Indies, in 1811; died

in New York city Oct. 10, 1886. He went to Richmond, Va., where he applied himself to classical studies and the law. Later he removed to Florida and became a planter. He was elected as a delegate from Florida to the 27th and 28th Congresses as a Democrat, at that time bearing the name of Levy. He was later known as David Levy Yulee, and under this name was a delegate to the first state constitutional convention of Florida. He was twice elected United States senator from Florida as a Democrat, serving from Dec., 1845, to 1851, and again from 1855 until his retirement on Jan. 21, 1861. He served also in the Confederate Congress, and was a prisoner of state at Fort Pulaski in 1865. After the Civil war he was president of the Atlantic and Gulf Railroad of Florida, and was interested in the financial and commercial growth of Fernandina and Cedar Keys, Fla.

**YULY (YULEE), SAMUEL**: Moorish envoy to England; born in Mogador, Morocco, at the end of the eighteenth century; died at Portsea, England, in Jan., 1873. He was connected with the Guedella family, agents for the Sultan of Morocco and one of the wealthiest merchant firms in Mogador. In 1820 Yuly went to England, as the accredited representative of the Sultan of Morocco, with letters to the British government. He afterward resided permanently in England, but kept up a trading connection with Mogador. See MOROCCO.

**YUSUF IBN NUḤ, ABU YA'QUB**. See JOSEPH B. NOAH HA-BAṢRI.

**YUSUF IBN TESHUFIN**: Almoravid king of Spain in the eleventh and twelfth centuries. He was the only Almoravid ruler hostile to the Jews, and he once endeavored to force Islam upon them. Passing through Lucena in 1105, he noticed the flourishing Jewish community there, and convoked its representatives, telling them that Mohammed had granted the Jews religious freedom only on condition that the Jewish Messiah should come within five hundred years after the Hegira, and that the Jews had agreed to embrace Islam if at the end of the half-millennium the Messiah had not appeared. He informed them further that as the term was then just at an end, he would withdraw from them his protection and declare them outlaws if they did not accept the religion established by the Prophet. The Jews of Lucena averted the danger, however, by presenting Yusuf, through his vizier 'Abd Allah ibn 'Ali, with large sums of money.

## Z

**ZABARA, JOSEPH.** See JOSEPH ZABARA.

**ZABDAI BEN LEVI:** Palestinian amora of the first generation (third century). He belonged to the scholarly group of which Hoshaiab Rabbah was the chief (Yer. Dem. vii. 26a), and his halakot were transmitted by R. Johanan (Zeb. 28b; Ker. 5a). Zabdai was particularly prominent in the Haggadah and in Biblical exegesis, in both of which he disputed with Rab, Joshua b. Levi, and Jose b. Petrus. Thus the words "le-ruah ha-yom" (Gen. iii. 8; A. V., "in the cool of the day") are explained by Zabdai to mean "the side of the setting of the sun," in opposition to Rab's interpretation, "the side of the rising of the sun" (Gen. R. xix. 8). The phrase "Ka-'et hayyah" (Gen. xviii. 14; A. V., "At the time appointed") is explained by Zabdai as meaning "in a year from hence." God made a scratch on the wall, saying that when a year later the sun should arrive at that mark Sarah would bear a son (Pesik. R. 6 [ed. Friedmann, p. 24b]; Tan., Wayera, 36; see also Pesik. xxv. 158a; Gen. R. lxxiv. 11; Lev. R. vii. 2).

Two poems to Lam. R. (Nos. 29 and 30) are by Zabdai; in the second of them he contrasts the different prayers of four kings with regard to their enemies. David prayed to God that he might overtake his foes and defeat them (Ps. xviii. 38); and his prayer was granted (I Sam. xxx. 8). Asa prayed to God that he might pursue the enemy, but that God would smite him; and it was so (II Chron. xiv. 12). Jehoshaphat said that he was too feeble to pursue the enemy, and prayed God to exterminate the foe while he would sing the praises of his divine helper; and his prayer was satisfied (*ib.* xx. 22). Finally, Hezekiah said that he had no strength even to sing the praises of God, but he prayed that his enemy might be routed while he himself would lie in his bed; and it so happened (II Kings xix. 35). It is related that Zabdai, having survived Joshua b. Levi, wished to see him in a dream. Joshua accordingly appeared to him, and showed him people with faces raised and people with faces cast down. When Zabdai asked the reason for the difference in posture, Joshua answered that those who arrived there with the study of the Law in their memories had their faces raised, while those who had forgotten it had their faces cast down (Eccl. R. ix. 10).

**ZABIM** ("Sufferers from Discharges"): Ninth tractate in the Mishnah and Tosefta of the sixth Talmudic order Tohorot. It deals with the uncleanness caused by discharges from either man or woman, the regulations concerning which form the subject of Lev. xv. According to the Pentateuchal law, when a man has a running issue out of his flesh, or when a woman has a discharge of her blood beyond the time of her menstruation, such person is unclean. Anything upon which the sufferer sits, lies, or rides is unclean; so that any person sitting in the

same seat, lying in the same couch, or riding in the same vehicle with one thus afflicted, or carrying any vessel which the sufferer has used, is unclean until the evening and must wash himself and his clothes in water. If a person having a discharge touches any one without having previously washed his or her hands, the individual so touched is unclean until the evening. An earthen vessel that has been touched by the sufferer must be broken; a wooden one that has been similarly defiled must be rinsed with water. After the discharge has ceased the afflicted one must count seven days, and at the end of that term must wash his or her clothes and must take a bath in running water; and on the eighth day an offering of two doves must be brought, one for a sin-offering and one for a burnt offering.

The treatise consists of five chapters, divided respectively into six, four, three, seven, and twelve paragraphs or mishnayot. It gives in detail all particulars of uncleanness and purification, specifies the degrees of the discharges which render an individual subject to the laws stated above, and mentions what persons are subject to those laws and in what way they cause vessels or other people to become unclean. The contents of the respective chapters may be summarized as follows:

Ch. i.: In order to be liable to all the laws mentioned above, a "zab" must have his discharge three times, either all on one day or on two or three consecutive days; consideration of the length of the intervals between the discharges.

Ch. ii.: All are subject to the laws of Zabim, including proselytes, slaves, minors, deaf-mutes, and eunuchs; description of the different methods by which the zab is examined, and an explanation of the manner in which he makes people and things unclean by his touch.

Ch. iii. and iv.: Specification of the different ways in which a man or a woman suffering from a discharge makes unclean another person. For instance, if a zab and a clean person sit together in a small boat or ride together on a beast, even though their garments do not come in contact the clean person becomes unclean by the pressure; but, according to R. Judah, if both of them sit on a tottering bench, the clean person does not become unclean.

Ch. v.: The ways in which a person becomes unclean by touching a zab, and also in which things become unclean through the touch of the zab and by touching other unclean things.

**ZABLUDOWSKI, ISRAEL (ISIDOR):** Russian physician; born at Byelostok, in the government of Grodno, July 30, 1850. At the age of twelve he wrote a Hebrew novel entitled "Ha-Yaldut we-ha-Shaharut" (Wilna, 1863). In 1869 he was admitted to the military academy of medicine at St. Petersburg (M. D. 1874), and seven years later was appointed physician in one of the military hospitals of southern Russia. During the Russo-Turkish war he served as chief physician of a Cossack regiment near Plevna, and so distinguished himself by

his work that Alexander II. awarded him the second rank of the Order of Saint Stanislas.

In the field-hospital Zabludowski's attention was attracted to the massage treatment practised by a Bulgarian monk named Makari, and, adopting this as his specialty, he was sent abroad by the Russian government at the close of the war to perfect himself in the theory of massage. After visiting Vienna, Munich, Paris, Amsterdam, and Berlin, he returned to St. Petersburg in 1881, and was soon appointed chief physician in the hospital of the Preobrazhenski regiment of the imperial guards. He then began to make experiments in massage on persons in sound health, and published a voluminous treatise on this subject in the "Voyenno-Meditziuski Zhurnal" (St. Petersburg, 1882). In the same year Zabludowski settled in Berlin at the request of Bergmann, whose clinical assistant he became. There he published several essays on massage, and in 1884 lectured on this subject before the medical congress of Copenhagen. He is also the author of a long series of articles on his specialty, including a description of a machine invented by him for the cure of writers' cramp ("Berliner Klinische Wochenschrift," 1886, Nos. 26 *et seq.*). In 1896 he was appointed titular professor of massage in the University of Berlin, a position which he still (1905) holds.

**ZACHARIAH OF KIEV.** See JUDAIZING HERESY.

**ZACUTO, ABRAHAM BEN SAMUEL:** Spanish astronomer mathematician, and historian; born at Salamanca about 1450; died in Turkey after 1510. An astronomer of wide-spread reputation, he was appointed professor at the university of his native city, and later at that of Saragossa. After the Spanish exile, Zacuto settled at Lisbon, where he was soon appointed court astronomer and historiographer to John II. He retained his office under D. Manuel, and in this capacity he was consulted by the king regarding the practicability of the projected expedition of Vasco da Gama, which he approved and encouraged. The ships fitted out for the expedition were provided with Zacuto's newly perfected astrolabe, which was the first to be made of iron instead of wood. The great services rendered by Zacuto did not protect him, however, from

the persecutions inaugurated by Manuel at the instigation of Ferdinand and Isabella; and he and his son Samuel were forced to seek safety in flight. After an eventful voyage in which he was twice taken prisoner, Zacuto reached Tunis, where he lived until the Spanish invasion, when he fled to Turkey, residing there for the remainder of his life. In 1504, during his sojourn at Tunis, he wrote a chronological history of the Jews from the Creation to 1500, making constant reference to Jewish literature, and entitling his book "Sefer ha-Yuhasin." In this work Zacuto gives an account of the oral law as transmitted from Moses through the elders, prophets, sages, and the like, and also records the acts and monuments of the kings of Israel, as well as of some of the surrounding nations. In like manner space is given to the Babylonian captivity, the events which occurred during the period of the Second Temple, the characteristics of that period, the princes of the Captivity, and the rectors of the academies of Sura and Pumbedita. Although the author was far from discriminating as to his sources, and thus fell into many errors, his work is of great value to the student of Jewish literary history.

The "Sefer ha-Yuhasin" was edited by Samuel Shalom with many omissions and additions of his own (Constantinople, 1566), and was reprinted at Cracow in 1581, at Amsterdam in 1717, and at Königsberg in 1857, while a complete edition was published by Filipowski in London in 1857. In 1473, while still at Salamanca, Zacuto wrote his "Bi'ur Luhot," which was published in a Latin translation under the title "Almanach Perpetuum" by Joseph Vecinbo (Leiria, 1496), who also rendered it into Spanish and appended it to his "She'erit Yosef." Zacuto was likewise the author of three other works: "Sefer Tekunat Zakkut," an astronomical work which is believed to be still extant in manuscript (see "Ha-Shaḥar," i., No. 12); "Arba'im la-Binah," a treatise on astrology; and "Hosafot le-Sefer ha-'Aruk," a rabbinic Aramaic lexicon, of which an account is given by A. Geiger in "Z. D. M. G." xii. 144.

**ZACUTO, MOSES BEN MORDECAI** (abbreviated רמ"ז = **Rabbi Moses Zacuto**): Cabalistic writer and poet; born about 1625; died at Mantua Oct. 1, 1697. It is generally supposed that his birthplace was Amsterdam, although, like the Amsterdam rabbi Saul Levi MORTTEIRA, he probably lived in Venice, the residence of a brother named Nehemiah. He was a pupil of Morteira, on whose death he composed a long elegy (edited by Kaufmann in "R. E. J." xxxvii. 115 *et seq.*), and he was also a fellow student of Baruch SPINOZA. He was inclined to mysticism from his youth, and at one time fasted forty days that he might forget the Latin which he had learned, since, in his opinion, it could not be reconciled with cabalistic truths. To continue his Talmudic studies he went from Amsterdam to Posen or Poland, as is clear from the let-

ter of recommendation which he gave at Venice in 1672 to the delegates who had come to Italy to collect money for the oppressed Polish communities. It was his intention to make a pilgrimage to Palestine, but on the way he was persuaded to remain as rabbi in Venice, where he stayed, with the exception of a short residence in Padua, from 1645 until the summer of 1673. He was then called to Mantua at a fixed salary of 300 ducats, and remained there until his death, twenty-four years later. His epitaph is given by Wolf ("Bibl. Hebr." iv. 1200) and by Landshuth ("Ammude ha-'Abodah," p. 215).

Zacuto applied himself with great diligence to the study of the Cabala under Hayyim Vital's pupil Benjamin ha-Levi, who had come to Italy from Safed; and this remained the chief occupation of his life. He established a seminary for the study of the Cabala; and his favorite pupils, Benjamin ha-Kohen and Abraham Rovigo, often visited him for months at a time at Venice or Mantua, to investigate cabalistic mysteries. Zacuto was not without poetic talent, but his verses seldom rise above mediocrity. He composed forty-seven liturgical poems, chiefly cabalistic, enumerated by Landshuth (*l.c.* pp. 216 *et seq.*). Some of them have been printed in the festal hymns "Heu Kol Hadash," edited by Moses Ottolenghi (Amsterdam, 1712), and others have been incorporated in different prayer-books. He wrote also penitential poems ("Tikkun Shobabim," Venice, 1712; Leghorn, 1740) for the service on the evening before the day of New Moon, as well as prayers for Hoshana Rabbah and similar occasions, all in the spirit of the Cabala. Zacuto was, moreover, the author of a poem containing a thousand words, each beginning with the letter "alef" ("Elef Alpin"; printed with a commentary at the end of the "Iggerot ha-ReMeZ," pp. 43 *et seq.*); a long poem, "Toftah 'Aruk," or "L'Inferno Figurato" (Venice, 1715, 1744), in which he depicts the punishments of hell; and the oldest dramatic poem in the Hebrew language, which A. Berliner first edited under the title "Yesod 'Olam" (Berlin, 1874).

Other published works of Zacuto's are "Shudda de-Dayyane," a guide for decisions on commercial law (Mantua, 1678; reprinted in "Ha-Goren," iii. 181 *et seq.*); "Kol ha-ReMeZ" (published posthumously), a commentary on the Mishnah (which he knew by heart), with elucidations of the commentaries of Bertinoro and others (Amsterdam, 1719); a collection of responsa with the decisions of contemporaries (Venice, 1760); and "Iggerot ha-ReMeZ," containing letters of cabalistic content written by himself and others (Leghorn, 1780). He edited and emended also the Zohar (Venice, 1663) and other writings. A considerable number of his works, such as a commentary on the Jerusalem Talmud, homilies, and cabalistic writings, are still unpublished.

M. K.

**ZADDIK.** See HASIDIM.**ZADUKIM.** See SADDUCEES.

**ZADOK:** 1. A priest, perhaps the high priest during the reign of David. He was the son of Ahitub (II Sam. viii. 17), but the attempt to trace his genealogy back to Eleazar, the third son of Aaron, as opposed to Abiathar, his contemporary and colleague, who was regarded as a descendant of Eli and considered a member of the house of Ithamar, was first made by the Chronicler (I Chron. v. 30-34 [A. V. vi. 4-8]; comp. vi. 35-38 [A. V. vi. 50-53]), thus assuring the preeminence of the Zadokites over the descendants of Eli. In the beginning of his career he was associated with Abiathar (II Sam. xx. 25) and with his son (*ib.* viii. 17; I Chron. xxiv. 3, 6, 31). The hypothesis has accordingly been advanced that Zadok officiated in the Tabernacle at Gibeon (I Chron. xvi. 39; comp. I Kings iii. 4), while the sons of Eli were stationed as high priests at Jerusalem or, more probably, at Shiloh (comp. Keil on I Kings i. 8). Such a division of functions is very doubtful, however; and it is more plausible to suppose that Zadok gradually won equality of rank with the sons of Eli by his good fortune in gaining the favor of David.

According to the somewhat improbable statement of the Chronicler, a certain Zadok, as a young man, had been one of those who joined David at Hebron and helped him win the crown of all Israel, his house then including twenty-two captains (I Chron. xii. 29); and Josephus expressly identifies this Zadok with the high priest of the same name ("Ant." vii. 2, § 2).

During the rebellion of Absalom, Zadok gained still greater prominence. He and the Levites wished to accompany the fleeing David with the Ark of the Covenant, but the king begged them to remain at Jerusalem, where they could do him better service (II Sam. xv. 24-29; comp. 35), so that it actually happened that Ahimaaz, the son of Zadok, and Jonathan, the son of Abiathar, brought the king an important message (*ib.* xvii. 21). In all these passages Zadok is mentioned before Abiathar. According to the Hebrew text of II Sam. xv. 27, David addressed the priest with the words "ha-ro'eh attah," and the Vulgate consequently regards Zadok as a seer, although this interpretation is incorrect. These two difficult words are emended by Wellhausen to *הכרן הראש אתה*, thus implying the promise of the high-priesthood to him. On the suppression of the rebellion, the king sent Zadok and Abiathar to the elders of Judah, urging them to hasten to bring the monarch back (*ib.* xix. 12). Zadok again manifested his loyalty to the king when he espoused the cause of Solomon against Adonijah (I Kings i. 8 *et seq.*), and in his gratitude the new king appointed him sole high priest (*ib.* ii. 35). In his account of this event Josephus states ("Ant." viii. 1, § 3) that Zadok was a scion of the house of Phinehas, and consequently a descendant of Eleazar.

Reliable historical data show that the high-priesthood remained in the hands of the Zadokites from this time until the rise of the Maccabees. The descendants of Zadok increased in rank and influence, so that his son Azariah was one of the princes of Solomon (I Kings iv. 2), and the Ahimaaz who mar-

ried a daughter of Solomon was probably another of Zadok's children (*ib. iv. 15*). Either Zadok himself or his grandson was the ruler of the Aaronites (I Chron. xxvii. 17), and Jerusha, the mother of Jotham, is apparently termed the daughter of Zadok to emphasize her noble lineage, since her father may have been a descendant of the first Zadok (II Kings xv. 33; II Chron. xxvii. 1). A Zadok is also mentioned in the genealogy of Joseph, the father of Jesus (Matt. i. 14).

S. Kr.

**2. Sadducean leader.** The only data concerning the origin of the Sadducees are based on certain deductions drawn from their name, for a late rabbinical source alone appears to be founded on actual knowledge. Two pupils of ANTIGONUS OF SOKO are said to have misinterpreted their teacher's statement that God should be worshiped without hope of reward as meaning that there is no recompense, either for good or for evil, in the world to come. These two scholars, Zadok and Boethus, are accordingly regarded as the founders of the heresies of the SADDUCEES and the BOETHUSIANS (Ab. R. N. recension A, 5; recension B, 10). This statement is devoid of historicity, however, since it incorrectly postulates denial of the future life as the cardinal doctrine of the Sadducees, while it betrays also its lack of authenticity by making the origin of the Boethusians synchronous with the rise of Sadduceism, although the former sect derived its name from the high priest Boethus, who flourished during the reign of Herod.

The only historical portion of this legend is the part which connects the origin of each of these heresies with a personal name, for the Hebrew צדוקים is derived from צדוק just as are ביתוסים from ביתוס and אפיקורסים from אפיקורוס, while Herod was the eponym of the party of the HERODIANS.

Geiger's theory of the derivation of the name of the Sadducean party from the Biblical appellation "Zadok" is, therefore, the most probable one. This name צדוק, which occurs ten times in Ezekiel, Ezra, and Nehemiah, is transliterated *Zaddok* throughout by the Septuagint in these books, as well as in other passages in Lucian's version of the Septuagint. The same form appears in Josephus; and even a manuscript of the Mishnah (Codex De Rossi No. 138) vocalizes the name of the rabbi Zadok צדוק (= "Zadduk"). The only moot point is the problem whether the appellation of the sect is to be derived from a Zadok who is no longer known or from the priestly family of the Zadokites. An unknown Zadok was assumed to be the founder of the Sadducees by Kuenen (though he later adopted the opposing theory), Graetz, Montet, and Lagarde, while the second hypothesis, which is the more probable, was maintained by Geiger and Schürer, and is now confirmed by the Hebrew Ben Sira (see Schechter's note in "The Wisdom of Ben Sira," 1899, p. 35). A third conjecture, deriving the word from the adjective צדיק, which was advocated in ancient times by Jerome and Epiphanius, and was defended more recently by Joseph Derenbourg and Hamburger, is untenable both on linguistic and on historical grounds.

From the days of Solomon the descendants of the

priest Zadok were regarded with great reverence, which must have been much increased by the Deuteronomic legislation concentrating all cults at Jerusalem. In Ezekiel's prophetic vision the "sons of Zadok" are described as the only priests worthy to discharge their holy office (Ezek. xl. 46, xliii. 19, xlv. 15, xlvi. 11); and although in the Second Temple certain prerogatives were allowed the sons of Ithamar, the Zadokites alone formed the priestly aristocracy, so that the Chronicler assigns twice as many priestly divisions to the Zadokite descendants of Eleazar as to the Ithamarites (I Chron. xxiv.). In Ecclesiasticus (Sirach), in like manner, the Zadokites alone receive praise (ii. 12 [9], Hebr.). Despite the fact that those members of this powerful family who adopted the Sadducean doctrines were but few, they gave the teachings such support that the entire sect bore their name, and Josephus expressly states that scions of the priestly aristocracy, *i. e.*, the Zadokites, were preeminently adherents of Sadduceism. See SADDUCEES.

**3. Tanna of priestly descent; father of Eleazar.** He flourished in the years preceding and following the beginning of the common era. According to an account which must refer to him in the prime of life, he was taken as a captive to Rome, where he was sold to an aristocratic house. Its mistress attempted to force him to marry one of her beautiful slaves, but Zadok refused, claiming that not only did he belong to one of the most influential families of Jerusalem, but that he was of priestly lineage, whereupon his mistress gave him his freedom (Ab. R. N., ed. Schechter, p. 32a and note 11; *Kid.* 40a). A historical account dating from the time of the Temple vouches for the fact that he was a priest. During a sacrifice a strife broke out between two priests, perhaps brothers, because one had taken precedence of the other at the altar, and one of them was stabbed. There was great excitement among the congregation, whereupon Zadok ascended the steps of the "ulam," from which the priests were accustomed to give the benediction, and there calmed the people by an address based on Deut. xxi. 1 *et seq.* Since, however, it has been proved that only priests were allowed to mount the ulam, Zadok must have been a priest (Yoma 23a; Tosef., Yoma, i. 12; Yer. Yoma ii. 39d).

Together with Eliezer b. Hyrcanus and Joshua b. Hananiah, Zadok was present at the marriage of the son of Gamaliel II. in Jabneh. On that occasion Gamaliel II. himself poured out the wine and handed it round. Joshua and Eliezer Zadok and began to praise Gamaliel, whereupon Gamaliel. Zadok became angry, declaring that they should not turn away from the worship of God, who had created everything for man, and worship a mortal (*Kid.* 32a). According to Bacher, however, this incident occurred not at a wedding, but at another feast, which Gamaliel gave to the scholars of Jabneh.

The whole life of this tanna fell within the period of the dissolution of the Jewish state, and he de-

clared that he had fasted forty years in his endeavor to prevent the destruction of the Temple. When this took place, however, Zadok had become so weak that Johanan b. Zakkai was obliged to appeal for him to Titus, who had him treated by a physician (Git. 56b; Lam. R. i. 5). Zadok moved to Jabneh together with Johanan b. Zakkai and other scholars, and his few halakot, found in 'Eduy. vii. 1-5, date from this period. He was the most influential personality in Gamaliel's tribunal, and always sat at the right of the latter (Ycr. Sanh. 19c), while on one occasion he was present at the eating of the sacrificial lamb in Gamaliel's house (Pes. 74a). Together with Johanan b. Zakkai and Gamaliel, he rendered a decision on the conditions under which food might be eaten outside the Tabernacle during the Feast of Weeks (Suk. 26b). Although he was theoretically an adherent of the principles of the Bet Shammai, in practise he always made his rulings in accordance with the Bet Hillel (Yeb. 15b). His motto in ethical matters was, "Do not make learning a crown to make thyself great thereby, nor a spade to dig with it" (Ab. iv. 5). The thirtieth chapter of the Tanna debe Eliyahu Rabbah relates that Zadok once came to the place where the Temple had formerly stood. In his grief at the desolation he reproached God Himself, whereupon he fell into a sleep in which he saw God and the angels mourning over the destruction of Zion. The Pirke de-Rabbi Eli'ezer ascribes to Zadok haggadic sayings concerning the descendants of the giants (ch. xxii.), the sacrifices of Cain and Abel (ch. xxi.), the Flood (ch. xxiii.), and Noah's prayer in the ark (*ib.*).

**ZADOK GAON** (called also **Isaac b. Ashi**): Gaon of Sura from 820 to 821. On the basis of a responsum quoted in the "Sha'are Zedeq" (iv. 311, No. 2), Weiss refers to him as follows in his "Dor": "If a case was brought before him and he found the defendant guilty, but was unable to inflict an adequate punishment, he would say to him: 'I charge thee to go to the man thou hast injured and implore his pardon or give him an indemnity.' If the accused did not obey this injunction, he was excommunicated." Zadok was one of the first geonim to take exception to many of the Talmudic regulations, although he inclined toward rigor rather than leniency in their application.

**ZADOK 'IMANI** or **'AMANI** (עמאני): African liturgical poet, who wrote the following eight poems that are found in the Tripolitan Maḥzor: (1) "El hekal ḳoḏsho"; (2) "Le-bet el banu"; (3) "La-Adonai et yom ha-shebi'i berak"; (4) "Meḥolel kol be-ḳaw yashar"; (5) "Ezri yabi el me-'ayin"; (6) "'Al rob 'awoni"; (7) "'Ammeka le-shahareka kamu"; (8) "Ki bo Elohim dibber be-ḳoḏsho." No. 3 consists of thirteen strophes, and each of the others consists of five strophes. Nos. 3, 4, 7, and 8 are to

be recited on the Sabbaths of the month of Elul. Only No. 3 bears the complete signature צדוק עמאני; No. 7 is signed עמאני, while all the others show only the name צדוק. Nos. 3 and 8 are both "mustajabs"; in the former every strophe begins with "la-Adonai" and terminates with "Adonai," while in the latter the strophes begin with "ki bo" and rime in "to."

**ZAG.** See **BENVENISTE, ISAAC**; **MALEA, MEYR DE**; **ISAAC IBN SID**; **ALFONSINE TABLES.**

**ZAHALON** (צהלון): A family of Spanish origin; represented by members who, after the exile from Spain, settled in Italy and the Orient, where they distinguished themselves as rabbis and scholars.

**Abraham ben Isaac Zahalon**: Talmudist and cabalist of the second half of the sixteenth century. He was the author of: "Yad Ḥaruzim," on the Jewish and Mohammedan calendars (Venice, 1594-95); "Yesha' Elohim," interpretations of Esther compiled from earlier commentators (*ib.* 1595); and "Marpe la-Nefesh," a cabalistic dissertation on ethics, especially on penitence, according to the system of Isaac Luria (*ib.* 1595).

BIBLIOGRAPHY: Fürst, *Bibl. Jud.* iii. 541; Steinschneider, *Cat. Bodl.* col. 711; Fuenn, *Keneset Yisrael*, p. 58.

**Jacob ben Isaac Zahalon**: Italian rabbi and physician; born at Rome 1630; died at Ferrara 1693. Acquiring early a high reputation both as physician and Talmudist, he was called to the rabbinate of Ferrara and held this position until his death. He was the author of the "Ozar ha-Ḥayyim," a medical work in thirteen parts, the last of which remained unpublished for lack of funds (Venice, 1683), and of the "Margaliyyot Ṭobot," an abridgment of the "Ḥobot ha-Lebabot" of Bahya b. Joseph ibn Paḳuda, divided into thirty chapters corresponding to the number of days of the month, each chapter being followed by prayers for various occasions (*ib.* 1665). In his preface Jacob enumerates the following works which he left in manuscript: "Morashah Kēhillat Ya'aḳob," on Maimonides; "Yeshu'ot Ya'aḳob," a commentary on Isaiah; "Titten Emet le-Ya'aḳob," homilies on the Pentateuch; "Ḳol Ya'aḳob," an index to the Yalkuṭ, called also "Or ha-Darshanim" ("Ozrot Ḥayyim," No. 30); "Zahalāh u-Rinnah," on the Song of Solomon; "Ḳohelet Ya'aḳob," on Ecclesiastes; "Derushim 'al-Daniel," on Daniel; "Milhemet Ya'aḳob," subject unknown; "Ozar ha-Shamayim," on theology and philosophy; and "Shubu Elai," on the SHEMA' and the benedictions which accompany it.

Jacob was much consulted on halakic questions by his contemporaries. His decisions and responsa are found in the "Teshubot ha-Remez" of Moses Zacuto (§ 36), in the "Paḥad Yizḥaq" (*s.v.* בן יצחק אהרן שנה יום אהרן) of Isaac Lampronti, and in the "'Afar Ya'aḳob" of Nathanael Segre; the last-named declares that Jacob was one of the three most learned men of his generation.

**Mordecai ben Jacob Zhalon:** Physician and rabbi of Ferrara; died there Nov. 30, 1748. He wrote the following works: "Megillat Naharot," describing the miraculous rescue of the Jewish community of Ferrara from the inundation that occurred in 1707 (Venice, 1707); "She'elot we-Teshubot Mezi' u-Meliz," a lecture delivered at the Talmud Torah of Ferrara on the modulation of the priestly blessing (*ib.* 1715); and halakic decisions quoted by Lampronti in the "Paḥad Yizḥaq," by Samson Morpurgo in his "Shemesh Zedaḳah" ("Yoreh De'ah," § 61), and by Raphael Meldola in his "Mayim Rabbim" ("Yoreh De'ah," § 7). Mordecai was a talented Hebrew poet, and several of his religious verses on local events are still recited in the synagogue of Ferrara, while one of his sonnets is also found at the head of the poem "'Eden 'Aruk."

**BIBLIOGRAPHY:** Nepi-Ghirondi, *Toledot Gedole Yisrael*, pp. 228, 235; Carmoly, *Histoire des Médecins*, p. 239; Steinschneider, *Cat. Bodl.* col. 1675.

**Yom-Tob ben Akiba Zhalon:** Talmudic scholar of Constantinople in the second half of the seventeenth century; grandson of Yom-Tob ben Moses. He was the author of "She'elot u-Teshubot," containing 296 responsa and novellæ on the fifth and sixth chapters of the treatise Baba Mezi'a (Venice, 1694). This collection includes many decisions made by his grandfather, to whom the author ascribes also a commentary on the Abot de-Rabbi Natan which is probably identical with that given by Azulai under the title "Magen Abot."

**BIBLIOGRAPHY:** Conforte, *Kore ha-Dorot*, p. 42a; Azulai, *Shem ha-Gedolim*, i. 74; Steinschneider, *Cat. Bodl.* col. 1414; Fuenn, *Keneset Yisrael*, p. 444.

I. BR.

**Yom-Tob ben Moses Zhalon:** Palestinian Talmudist; rabbi at Safed; born in 1557; died about 1638. At the early age of twenty-five he was requested by Samuel Yafeh, a rabbi of Constantinople, to decide a difficult and complicated problem which had been referred to himself (Zhalon, Responsa, No. 40); and he corresponded with most of the authorities of his time, one of his chief antagonists being the elder Moses Galante. Although a Sephardi, Zhalon rendered a decision in favor of an Ashkenazic congregation in a controversy which arose between the Sephardim and Ashkenazim at Jerusalem, and in his love of truth he did not spare even his teacher, Joseph Caro (*ib.* No. 238), declaring that the Shulḥan 'Aruk was written for children and laymen (*ib.* No. 76). Zhalon was the author of a commentary on Esther, entitled "Leḳaḥ Tob" (Safed, 1577). He was the author of responsa and novellæ which were published with a preface by his grandson Yom-Tob (Venice, 1694), and he mentions also a second part (*ib.* No. 102), of which nothing more is known. He likewise wrote a commentary on the Abot de-Rabbi Natan, entitled "Magen Abot," which is still extant in manuscript. In his preface to this latter work Zhalon terms himself Yom-Tob b. Moses ha-Sefardi, whence it is clear that the family came originally from Spain, although it is not known when it emigrated or where Zhalon was born.

E. C.

I. GRÜ.

**ZAKKAI:** 1. Palestinian tanna of the second century; contemporary of Judah ha-Nasi I. and apparently a pupil of Simeon b. Yoḥai. He is mentioned as having transmitted a halakah of R. Jacob and one of Simeon b. Yoḥai (Tosef., *Yad.* ii. 9; *Shab.* 79b); and he had a halakic controversy with Simeon b. Gamaliel and Simeon b. Eleazar, the former being the father and the latter the companion of Judah ha-Nasi (Ber. 25b). Zakkai was prominent in the Haggadah, where he is styled "Zakkai Rabbah" (Zakkai the Great). He interpreted the words "we-yidgu la-rob" (Gen. xlviii. 14) as referring to the haggadic statement that 600,000 children were once thrown into the river by command of Pharaoh, but were saved through the merits of Moses (Gen. R. xvii. 5; comp. Cant. R. vii. 5; *Yalḳ.*, Isa. 472). Zakkai attained to a very great age, and when his pupils asked him through what virtue he lived so long, he said that he never called his neighbor by a nickname and never neglected to buy wine for the Kiddush of the Sabbath. His aged mother even once sold her cap to purchase wine for him, and when she died she left him 300 kegs of wine, while he himself bequeathed to his children 3,000 kegs (Meg. 27b).

2. Babylonian amora of the third century. He emigrated to Palestine, where he was the chief lecturer in R. Johanan's school ('Er. 9a; *Yeb.* 77b; *Sanh.* 62a; and elsewhere). In *Sanh.* 62a and in *Yer. Shab.* vii. 2, R. Johanan calls him "the Babylonian." The press-house (מעצרתה) which he left in Babylon was the meeting-place of certain rabbis ('Er. 49a; B. B. 42b). From Palestine he sent a halakah to the exilarch Mar 'Uḳba (Ket. 87a), who transmitted a haggadah of Zakkai (*Sanh.* 70a). The latter seems to have been a good preacher; and in one of his sermons he gives an interpretation of Micah iv. 10 (*Yer. Suk.* 54c).

**ZALINSKI, EDMUND LOUIS GRAY:** American soldier and inventor; born at Kurnich, Prussian Poland, Dec. 13, 1849. In 1853 his parents emigrated to the United States and settled in Seneca Falls, N. Y. He was educated at the public school there and at the Syracuse high school. In 1864 he entered the army as a volunteer, was promoted second lieutenant, Second New York Heavy Artillery, for gallantry at the battle of Hatcher's Run, and served till the close of the war in 1865. Appointed second lieutenant, Fifth United States Artillery, in 1866, in the following year he was promoted first lieutenant. He was professor of military science at the Massachusetts Institute of Technology from 1872 to 1876. In 1880 he graduated from the United States Artillery School at Fort Monroe, Va., and from the School of Submarine Mining at Willets Point, N. Y. He became captain in 1887, and in 1889 and 1890 traveled in Europe to study military affairs. He did garrison duty at San Francisco in 1892, and retired from the service in 1894. Since that time he has resided in New York city and in Washington, D. C.

Zalinski invented the pneumatic dynamite torpedo-gun, an intrenching tool, a ramrod-bayonet, a tele-

scopic sight for artillery, and a system of range- and position-finding for seacoast and artillery firing.

**ZALINSKI, MOSES G.:** American soldier; born in New York city Jan. 23, 1863; educated in the public schools. He joined the regular army as a private in 1885, and was appointed second lieutenant, Second Artillery, in 1889. Graduating from the Artillery School in 1894, he became first lieutenant, Fourth Artillery, in 1895, and was transferred to the Second Artillery in the same year. In 1898 he was promoted captain and quartermaster, and since 1903 has been stationed at Washington, D. C., as major-quartermaster.

**BIBLIOGRAPHY:** *American Jewish Year Book*, 5665, p. 2.

**ZALMUNNA:** Midianite king defeated and slain by Gideon (Judges viii. 5-7, 10, 12, 15, 18, 21; Ps. lxxxiii. 12 [A. V. 11]). Zalmunna is always mentioned together with Zebah, who was also a Midianite king.

E. G. H.

B. P.

**ZAMENHOF, LAZARUS LUDWIG:** Founder of the universal language "Esperanto"; born at Byelostok in Dec., 1859. His father, **Markus Zamenhof**, and his grandfather, **Fabian Zamenhof**, were teachers of French and German, the latter being the pioneer of general culture among the Jews of Byelostok. In 1873 Markus Zamenhof removed to Warsaw, where he became professor of German, first at the Veterinary Institute, and subsequently at the real-gymnasium. He was one of the three Jews of his time who held such an official appointment, and he became a state councilor. He compiled many text-books, and was the author of a rabbinical phrase-book in Hebrew (i., Warsaw, 1905) and a polyglot phrase-book (i., *ib.*, 1905).

Zamenhof pursued general medical studies at Warsaw and Moscow (M. D. 1884), and settled in Warsaw as an oculist. He later practised at Kherson and Grodno, but in 1897 returned to Warsaw, where he now (1905) practises among the poorer Jews.

Zamenhof's reputation is due to the fact that he is the founder of Esperanto, the new universal language which has taken the place of Volapük. The

idea of an international form of speech was suggested to him by the polyglot character of his native town; four different languages were spoken there,

and to this fact he attributed the constant dissensions and misunderstandings which disturbed the city. In the gymnasium and at the university he threw himself heart and soul into the study of languages while pursuing his medical work; but the idea of Esperanto did not dawn on him at once. At one time he entertained the idea of mathematical construction, and later the claim of the dead languages, especially Hebrew, appealed to him. For three years he worked at Yiddish and compiled a grammar which is still unpublished, hoping that, since Judæo-German was a modern tongue in use among millions of his coreligionists, it might be universalized. Discarding this idea in its turn, he

finally reached the conclusion that no language could ever become a universal medium of communication if it identified itself with any individual nationality or country; it must be neutral. In 1878 he succeeded in building up such a language on the basis of the Romance and Teutonic roots of modern European tongues, but it was not until 1887 that, after several unsuccessful attempts to find a publisher, he gave to the world his first brochure, published anonymously under the pen-name of "Doktoro Esperanto" (Dr. Hopeful).

The success of his pamphlet was immediate, and from that time to the present Esperanto has steadily increased in popularity. In the following year the Volapük Society at Nuremberg ceased to exist, and its place was taken by the first Esperanto club. In 1891 a second club was founded at Upsala, in Sweden; St. Petersburg followed, with branches at Odessa and in Siberia; France and Denmark joined the movement in 1897; and Brussels and Stockholm were included in the following year. The first Esperantist group in Paris was started in 1900, and the

next year Esperanto made its first official appearance on American soil in the city of Montreal. Since then associations for its study have been founded in all parts of the world.

There are now about 120 societies in existence, and the language is spoken by at least 200,000 persons. At the St. Louis Exposition it was accorded official recognition by the French sectional committee. There is a large and constantly increasing literature in Esperanto, and more than twenty journals are in circulation, including a braille monthly magazine for the blind, a Roman Catholic organ, a Socialist paper, and an "International Scientific Review." Two plays of Shakespeare, "Hamlet" and "The Tempest," have been rendered into Esperanto, the former by Zamenhof himself; and the language is also coming into commercial use.

In compiling his universal language Zamenhof appears to have regarded primarily the needs of his Yiddish-speaking coreligionists, whom he has described as "speechless, and therefore without hope of culture, scattered over the world, and hence unable to understand one another, obliged to take their culture from strange and hostile sources."

In other writings and labors, unconnected with Esperanto, Zamenhof has manifested great interest in Jewish affairs. At one time he was an ardent Zionist, and established at Warsaw the first Zionist association (Friends of Zion). More mature reflection, however, caused him to abandon the idea of a Jewish political nationality, and in 1901 he published a Russian pamphlet on Hillelism as a project for solving the Jewish question. The main contention of this work is that the troubles of the Jewish people are due to "the pseudo-Palestinian character of their religion"; Judaism should reform itself and become Hillelism, or, in other words, a pure monotheism with no other law than that of love of one's neighbor. The new Jewish sect should, however, retain its ancient manners and customs, but as traditions, not as laws. It should also acquire some simple medium of intercommunication, which must not be Hebrew; and

it should obtain a geographical center, which would be the seat of a Jewish synod.

**ZAMOSZ, ABRAHAM BEN ISAAC HAKOHN:** Polish rabbi and anti-Shabbethaean of the eighteenth century; rabbi of Tarly. He was very prominent in persecuting the Shabbethaean who had established themselves in Podolia, and on this subject he corresponded with Jacob Emden in 1759 and 1760. In the quarrel between Jacob Emden and Jonathan Eybeschütz, Zamosz, as is evident from his letters reproduced in Emden's "Shot la-Sus," sided with Emden. Zamosz was the author of "Bet Abraham" (Berlin, 1753), a work containing two responsa followed by novellæ on the Talmud.

**BIBLIOGRAPHY:** Fuenn, *Keneset Yisrael*, p. 22.

M. SEL.

**ZAMOSZ, ISRAEL BEN MOSES HALEVI:** Polish Talmudist and mathematician; born at Buberki about 1700; died at Brody April 20, 1772. He was appointed one of the lecturers in the yeshibah of Zamosz, but at the same time he occupied himself with the study of secular sciences, particularly with mathematics, and while there wrote many notes on the "Yesod 'Olam" of Isaac Israeli and on the "Elim" of Joseph Delmedigo. During his residence at Zamosz he also wrote his "Arubbot ha-Shamayim" (still unpublished), a work on descriptive geometry and astronomy, in which many haggadot relating to cosmogony are explained, with a vindication of their accuracy. About 1742, after he had published his "Nezah Yisrael," Zamosz went to Berlin, where he remained several years. There he instructed Moses Mendelssohn in mathematics and logic, and his scholarship was much appreciated by Lessing (see Levinsohn, "Zerubbabel," i. 68).

Zamosz was a versatile writer, his knowledge comprising rabbinics, religious philosophy, and secular sciences. The only works of his published during his lifetime were the "Nezah Yisrael" (Frankfort-on-the-Oder, 1741) and his edition of the "Ruah Hen" of Ibn Tibbon or Jacob Anatolio, to which he appended a commentary of his own (Jessenitz, 1744). After his death appeared the "Nezer ha-Dema'" (Dyhernfurth, 1773), a work in poetical prose on man's desire for luxury; the "Ozar Nehmad" (Vienna, 1796), a commentary on the "Sefer ha-Kuzari" of Judah ha-Levi; and the "Tub ha-Lebanon" (ib. 1809), a commentary on the "Hobot ha-Lebabot" of Bahya b. Joseph. Like the "Arubbot ha-Shamayim," his "Eben Yisrael," a collection of responsa, is still unpublished (comp. Levinsohn, "Te'uddah be-Yisrael," ch. xlv.).

**ZAMOSZ, JOSEPH BEN JACOB ISAAC:** Polish rabbi of the eighteenth century; rabbi of Zamosz. He was the author of "Mishnat Hakamim" (Lemberg, 1792), an analytical work on the commandments, based on the ancient authorities and

showing which laws were derived from the Pentateuch ("mi-dibre Torah") and which were added by the scribes ("mi-dibre soferim"). It is divided into two parts: "Yabin Shemu'ah," explaining the words of the ancients; and "Zofnat Pa'neah," casuistic novellæ. The work is followed by an appendix entitled "Ma'alot ha-Middot" and composed of notes on the "Sefer ha-Madda'" of Maimonides. In this book Zamosz mentions his "Otot le-Mo'adim," which contained the laws, expressed in the form of responsa, concerning the Sabbath and holy days.

**BIBLIOGRAPHY:** BenJacob, *Ozar ha-Sefarim*, p. 385; Fuenn, *Keneset Yisrael*, p. 469; Steinschneider, *Cat. Bodl.* col. 1477.

**ZAMOSZ, ZEBI HIRSCH BEN BENJAMIN:** German rabbi; born in 1740; died at Altona in 1807. He was rabbi of several communities, including Brody and Glogau, and from 1803 until his death he held the rabbinate of the three communities of Altona, Hamburg, and Wandsbeck. He was the author of several works, which consist for the most part of responsa and of notes on the Bible, Talmud, and casuists ("poskim"); but his only publication was a collection of his responsa on the Shulhan 'Aruk, Oraḥ Hayyim and Yoreh De'ah, entitled "Tif'eret Zebi" (Lemberg, 1811). Some of his responsa are also included in Meshullam Zalman's "Bigde Kehunnah" and in Isaac Abraham's "Keter Kehunnah," No. 9.

**BIBLIOGRAPHY:** Fuenn, *Keneset Yisrael*, pp. 281-282; Steinschneider, *Cat. Bodl.* col. 2751.

M. SEL.

**ZAMZAM:** A sacred well in the mosque of Mecca; identified by Islamitic legend with the spring from which Hagar and Ishmael drank (Gen. xvi. 14; see Abraham ibn Ezra's commentary *ad loc.* and HAGAR IN ARABIC LITERATURE). Some Mohammedan Arabists explain the name as a reduplication of "zamm" (= "fill, fill"), since Hagar commanded Ishmael to fill the jar as soon as she saw the water. Sale (quoted by Hughes, "A Dictionary of Islam," s.v.) interpreted it similarly, but thought that its etymology was Egyptian and meant "stay, stay," since Hagar had bidden Ishmael to cease his wandering when she found the well. The spring is naturally regarded as miraculous, and the water, which is held in high esteem, is used for drinking and ablutions. It is exported to distant countries, and religious Moslems break their fasts with it; it is also applied to the eyes to brighten the sight, thus presenting a close analogy to the beverage of the Habbalah cup, with which many Jews moisten their eyes on the night of the Sabbath. The water of Zamzam is likewise thought to aid students in the pronunciation of Arabic in non-Arabic countries.

M. SEL.

**ZANGWILL, ISRAEL:** English man of letters; born in London Feb. 14, 1864. When he was young his parents moved to Bristol, where he attended the Red Cross School; and after their return to London he entered the Jews' Free School, later becoming a teacher there and taking the degree of B.A. at London University. A misunderstanding with the directors of the school caused him to re-

sign his position, and he then devoted himself to literature. He had already shown considerable taste in this direction, having edited and partly written as early as 1880 an annual called "Purim"; and shortly after leaving the Free School he published, under the pseudonym "J. Freeman Bell," an elaborate novel written in collaboration with Lewis Cowen and entitled "The Premier and the Painter"

Israel Zangwill.

(1888), a work somewhat in the style of Lord Beaconsfield, but with passages of Dickensian humor and with an entirely original plot. He had been appointed editor of "Ariel," and for a time was associated with a number of young literati like Jerome K. Jerome and Robert Barr, who represented what was known as the "new humor." This phase of his work was represented by his "Bachelors' Club,"

issued in 1891, and by "The Old Maids' Club," produced in the following year, each of these books being a series of fantastic sketches replete with the wit and humor of topsyturvydom.

Meanwhile Zangwill had been contributing to the "Jewish Standard" (edited by H. S. Lewis) a weekly causerie under the pseudonym "Marshallik," commenting with freakish humor on communal incidents. He gave evidence also of higher powers and touched

a deeper note in two sketches, "Satan

**His Jewish Mekatrig**" and "The Diary of a Me-

**Novels.** shumad," contributed to M. H. Myers'

"Diary" (1888-89) under the pseudonym "Baroness von S.," and afterward reprinted in his "Ghetto Tragedies." These and his other works (including a remarkable analysis of modern English Judaism in "J. Q. R." i.) drew to him the attention of the Jewish Publication Society of America, and it requested him to write a novel on modern Jewish life, which commission he executed in the well-known "Children of the Ghetto, Being Pictures of a Peculiar People" (Philadelphia and London, 1892), a work that at once made him famous. The author's profound knowledge of the life and problems of the ghetto, his command alike of pathos and of humor (especially in the first part of the book), his scintillating style, and the evidence of the application of a keenly logical intellect to the perplexities of modern Judaism place this book of Zangwill's at the head of artistic presentations of the ghetto. It attracted very general attention, and was translated into German, Russian, Hebrew (in part), and Yiddish. This work was followed by "The King of Schnorrers" (London, 1894), which also was translated into Yiddish, and by "The Dreamers of the Ghetto" (1898); the former work applying to the London ghetto life of the eighteenth century the bizarreries of the "new humor," the latter work dealing with a series of his-

toric scenes ranging from the times of Shabbethai Zebi and Spinoza to those of Lassalle and Disraeli. In "The Dreamers of the Ghetto" Zangwill is not altogether successful in reproducing the past, but he shows a keen insight into the characters of such men as Solomon Maimon, Heine, and Beaconsfield.

In general literature also Zangwill has achieved considerable success. His novels "The Master" (1895), dealing with art life, and "The Mantle of Elijah" (1901), treating of imperialism and the political problems connected therewith, have been widely read; and various shorter sketches, published by him in volumes entitled "They That Walk in In General Darkness" (1899) and "Gray Wig" Literature. (1903), show remarkable versatility and brilliance. He contributed to "The Pall Mall Gazette" a series of critical causeries, part of which were republished under the title "Without Prejudice" (London, 1896); and these perhaps show Zangwill's powers in their most characteristic form. He has also published many poems and verses, including some striking translations from the medieval Jewish poets that are now being included in the authorized festival prayers of the English Jewish congregations. Most of these poems have been collected under the title "Blind Children" (London, 1903).

Zangwill has written several dramatic sketches which have been produced with more or less success, among them curtain-raisers like "Six Persons," "Three Penny Bits," "The Revolting Daughter," and "The Moment of Death," a striking and original melodramatic study produced at Wallack's Theater, New York, 1901. In addition he dramatized his "Children of the Ghetto," which was produced with success in the United States, where it ran for nearly a year. It was likewise produced at the Adelphi in London (1899); but the Boer war diverted public attention, and the play was withdrawn. Zangwill's dramatization of his Christmas story "Merely Mary Ann," written in 1893, was very well received both in England and in America (1904-5), and was followed by "Jinny the Carrier," in the United States (1905).

Zangwill has been a successful lecturer, traveling in that capacity in the United States (1898), through Great Britain, Ireland, and Holland, and to Jerusalem, which he visited in 1897. He has taken great

**As** interest in Zionism, and has attended  
**Lecturer** most of the congresses at Basel, at first  
**and** merely as a critic and onlooker, but  
**Zionist.** later being drawn into the movement,  
of which he has become one of the  
leading spirits. He has written and

lectured much on the subject, advocating in the United States (1904) and elsewhere the acceptance of the British government's offer of an autonomous settlement in British East Africa. On the refusal of the Seventh Zionist Congress to consider any further offer of the kind, Zangwill formed a separate body, the **Jewish Territorial Organization**, intended to obtain, preferentially from the British government, an adequate tract of country in which persecuted Jews can live their own life under Jewish conditions. Among those whom he has attracted to his views is Lucien Wolf, with whom he had

previously had a somewhat sharp controversy on Zionism in the "Jewish Quarterly Review."

Zangwill was one of the "Wandering Jews" who met at the house of Asher I. Myers, and was one of the founders of the Maccabæans.

J.

**ZANGWILL, LOUIS:** English novelist; born at Bristol, England, July 25, 1869; brother of Israel ZANGWILL. He was educated at Jews' Free School, and for a time acted as teacher there, but left together with his brother, and set up a printing establishment. Afterward, however, he turned to literature, and produced, under the pseudonym "Z. Z.," "A Drama in Dutch" (London, 1895), which attracted some attention for its local color. It was followed by "The World and a Man" (1896), "The Beautiful Miss Brook" (1897), and "Cleo, the Magnificent" (1899), all distinguished by a certain realistic vividness and somewhat cynical humor. More recently he has produced a more sympathetic study, "One's Womenkind" (London, 1903).

Zangwill is a chess-player of high rank.

**BIBLIOGRAPHY:** *Who's Who*, 1905.

J.

**ZANTE:** Island in the Ægean Sea. According to a study, as yet unpublished, by Leonidas Zoë, a lawyer of Zante, Jews did not settle there as a community until 1498, and this statement is confirmed by the silence of Benjamin of Tudela. In that year, however, the republic of Venice offered special privileges to those who wished to reside in the island, which had become depopulated as a result of the frequent Turkish invasions; and many Jews of Corfu, Patras, Lepanto, and other parts of Greece welcomed the opportunity. The Jewish families mentioned in the earliest published documents are those of Abdela (1499) and Mila (1510). In 1527 the Jewish population of the island was 240, but by 1555 it had dwindled to 140, although it had risen to 300 in 1809. Although the Jewish names of Zante are Romance in type, the Jews have always spoken Greek; and their features, like those of their coreligionists of Chalcis, are so purely Hellenic that Carres asserts that they "are genuine Greeks."

At present the community of Zante has no spiritual head, and the people in their poverty are constantly emigrating, so that there are almost as many Zantiots in Corfu as in their native island. In both places the Zante Jews are usually tinsmiths. The Zante community possessed two synagogues, one Zantiot and the other Candiot, but the latter was destroyed by an earthquake some years ago. The Zantiot synagogue was built in the latter part of the seventeenth century by Cretan Jews who had sought refuge in Zante from a revolution. Abraham Coen (b. 1670; d. 1729) is the only well-known rabbinical author of the island. He was a Cretan by ancestry, but was born in Zante, and graduated as a physician at the University of Padua. In 1700 he published his "Derashot 'al ha-Torah," which was followed by his "Kehunnat Abraham," a paraphrase of the Psalms in various meters (Venice, 1719). In 1879

M. Ventura of Corfu found a Hebrew poem by Coen inscribed on the wall of the Candiot synagogue, and later edited his discovery.

During the period of Venetian dominion the Jews of Zante were subjected to the same restrictions as were their coreligionists throughout the republic, being obliged to wear the BADGE, and losing all rights of citizenship, while they were forced to bear all civic burdens and to live in a ghetto. English control (1815-64) improved their status greatly, but they were still forbidden to become citizens, and the gates of the ghetto were not torn down until 1862. In 1864, however, when the island was annexed to Greece, the Jews of Zante were granted all civil and political rights.

In connection with the riots of CORFU in 1891, serious excesses were committed against the Jews of Zante on May 1 of that year, during an ecclesiastical procession. The blood accusation of Corfu had excited the population to such an extent that many Jews left the island. Archbishop Latas of Zante took occasion at the Parliament of Religions in Chicago, Sept. 23, 1893, to make a declaration against this calumny, and he even appealed to the congress to give his protest its official sanction.

**ZANTE, ABRAHAM.** See ABRAHAM BEN SHABBETHAI COHEN OF ZANTE.

**ZAPATEIRO, JOSEPH.** See ÇAPATEIRO, JOSEPH.

**ZAPHNATH-PAANEAH:** Name given by Pharaoh to Joseph (Gen. xli. 45). It seems to be an Egyptian name, but its etymology is in doubt. It is not plain on what (Hebrew?) etymology the earliest explanations of Hebrew scholars were founded. Targum Onkelos gives the meaning of the name as "the man to whom mysteries are revealed"; pseudo-Jonathan, "one who reveals mysteries"; Josephus ("Ant." ii. 6, § 1), "a finder of mysteries." Many other old writers offer similar definitions, and even the A. V. has in the margin: "Which in the Coptic signifies, 'A revealer of secrets,' or 'The man to whom secrets are revealed.'" There is, however, no Egyptian etymology by which these guesses can be supported. Jerome claims that his suggestion, "savior of the world," rests on the Egyptian, and possibly the reading of the Septuagint has been followed by the authors of this etymology; the Coptic "eneh" = Egyptian "nḥ" (= "eternity," "eternal"), seems to be discernible, to which erroneously the later meaning of the Hebrew "'olam" ("eternity," "age"; later, "world") has been given, overlooking the "'ayin." Thus this inadmissible interpretation, which is accepted even by Jablonski, clearly betrays rabbinical influence.

Modern Egyptologists have tried a great many untenable etymologies for the element "Zaphnath," but have mostly agreed that "paaneah" contains the Egyptian "p-'ōnh," meaning "the life" (thus first Lepsius, "Chronologie," i. 382). Steindorff's explanation (in "Zeitschrift für Aegyptische Sprache," xxvii. 42; modifying Krall's etymology in "Trans. 7th Orientalist. Congr." p. 110) differs somewhat; it is "se(d)-p-nute(r)-ef-ōnh" = "the god speaks, [and] he lives." This has become popular, and is philo-

logically possible; however, it does not convey the allusion to Joseph's office or merits which we should expect. "P-ônh" (= "the life") would still answer better in this respect; only "Zaphnath" does not admit a quite convincing explanation. The Septuagint (Ψο[or Ψομ]θουφανήχ) and the Hexaplaric versions, however, differ so widely from the Hebrew in the first half of the name that it may have been disfigured by copyists.

**BIBLIOGRAPHY:** Marquardt, *Philologus*, vii. 676; Cheyne and Black, *Encyc. Bibl.* col. 5379 (where a disfigured Hebrew original is suspected); *Zeitschrift für Aegyptische Sprache*, 1883, p. 59; *Proc. Soc. Bibl. Arch.* xx. 208 (where the other theories have been collected).

W. M. M.

**ZAPPERT, BRUNO:** Austrian dramatist and journalist; born in Vienna Jan. 28, 1845; died there Jan. 31, 1892. The Zappert family, many members of which have gained prominence as merchants, originally settled in Bohemia, and spread thence to Hungary and lower Austria. Bruno, who was the son of August Zappert, a manufacturer, received his early education at the gymnasium; and, though desiring a university training, he entered the Vienna commercial academy in 1863 with a view to fitting himself to continue the business of his father. The latter's untimely death, however, caused him to change his plans, and he engaged in the publishing business in Vienna, beginning with Wallishauser, and in 1869 assuming the sole management of Hügel's house, which he conducted till 1877. He then took up dramatic literature, becoming secretary and artistic director of the Presburg theater, and later dramatist of the Carltheater in Vienna, where he worked for two years under Director Steiner, and for three years under Tatarczy.

Zappert edited the "Wiener Leben" (from 1879), Langer's "Hans Jörgel" (1885-86), and the illustrated "Wiener Wespen" (1886-87); and he collaborated on other Vienna journals as feuilletonist. He also frequently collaborated for the theater, working with Robert Genée, Costa, Jul. Rosen, Mannstädt, Oeribaner, and others; and he wrote many comic and topical songs for the stage, as well as celebration plays and prologues.

His principal plays were: "Zwischen Zwei Uebeln," musical farce in one act, with music by Franz Roth (1870); acted and published under the pseudonym "Zeno Brunner"; "Die Czarin," operetta in three acts, with music by Max Wolf (1872); "Ein Hochgeborener," popular piece in three acts, with music by H. Delin (1877); "Ein Junger Drahrer," musical farce in three acts, with music by Paul Mestrozi (1878); "Rinicherl," parody in one act, with music by Gothov-Grüneke (1878); "Cri-cri," musical picture from life in one act (1879); "Die Glöckerln am Kornfeld," parody on Robert Planquette's "Les Cloches de Corneville," with music by Gothov-Grüneke (1879); "Eine Parforcejagd Durch Europa," extravaganza in three tableaux, with music by Jul. Hopp (1879); "Ein Böhm in Amerika," musical burlesque in six tableaux, with music by Gothov-Grüneke (1880); "Moderne Weiber," musical farce in three tableaux, with music by Gothov-Grüneke (1880); "Pressburger Luft," musical local farce in five tableaux (1882); "Der Para-

graphenritter," musical farce in four acts (1883; published as "Doctor Schimmel"); "Pamperl's Abenteuer," musical farce in three acts (1883); "Theaterblut," musical farce in three acts (1883); "Papa Palugyay," farce in one act (1884); Reschfesch," musical farce in one act (1884); "Sein Spezi," musical farce in five acts, with music by Franz Roth (1884); "Beim Sacher," musical farce in one act, with music by Paul Mestrozi (1887); (with Genée and Mannstädt) "Der Glücksritter," operetta in three acts, with music by Alf. Czibulka (1887); (with Genée) "Der Freibeuter," operetta in three acts from the French, with music by Planquette (1888); (with Genée) "Ein Deutschmeister," operetta in three acts, with music by C. M. Ziehrer (1888-89); "Johann Nestroy," musical popular piece in six tableaux (1888); (with Genée) "Die Jagd nach dem Glücke," operetta in three acts and an introduction, with music by Franz von Suppé (1888; printed as a text-book and translated into five languages); "Das Lachende Wien," farce in six tableaux, with introduction; (with Genée) "Die Herzogin von Newfoundland," operetta in three acts, with music by Ludwig Engländer; (with Genée) "Prinz Eugen," operetta in three acts, with music by I. R. Kral; "Im Flug um die Welt," fairy extravaganza (1891); etc.

**ZAPPERT, GEORGE:** Hungarian historian and archeologist; born in Alt-Ofen Dec. 7, 1806; died in Vienna Nov. 23, 1859. The son of well-to-do parents, Zappert was educated at the Pesth gymnasium and at the University of Vienna. He began the study of medicine, but relinquished it after renouncing Judaism for Roman Catholicism in 1829, then taking up theology. This too he was forced to abandon in the second year, owing to deafness caused by a severe illness; and after this disappointment, which he felt keenly, he devoted himself to what became his life-work, namely, the study of the Middle Ages. He led a retired life in Vienna; and it is noteworthy that he foretold the time of his death to the minute three days before it occurred, and that there have been in his family several cases of similar premonition. The Imperial Academy of Sciences elected him corresponding member on July 28, 1851.

Zappert published: "Gravure en Bois du XII. Siècle" (Vienna, 1837 *et seq.*); "Vita B. Petri Acontanti" (*ib.* 1839); and the following memoirs: "Ueber Antiquitätenfunde im Mittelalter" (in "Sitzungsberichte der Kaiserlichen Akademie der Wissenschaften," Nov., 1850); "Epiphania, ein Beitrag zur Christlichen Kunstarchäologie" (*ib.* xxi. 291-372); "Ueber Badewesen in Mittelalterlicher und Späterer Zeit" (in "Archiv für Kunde Oesterreichischer Geschichtsquellen," xxi. 5); "Ueber Sogenannte Verbrüderungsbücher in Nekrologien im Mittelalter" (in "Sitzungsberichte der Kaiserlichen Akademie der Wissenschaften," x. 417-463, xi. 5-183); "Ueber ein für den Jugendunterricht des Kaisers Max I. Abgefasstes Lateinisches Gesprächsbüchlein" (*ib.* xxviii. 193-280); etc.

**ZAPPERT, ISRAEL L.:** Austrian philanthropist; elder brother of George and grandfather of Bruno Zappert; born at Prague in 1795; died there in 1865. He was a grandson of Wolf Zappert, who was the founder of the family, and who was twice court jeweler, the second time to Emperor Joseph II. (1765-90). Wolf, who was distinguished for both uprightness and business ability, made two fortunes, the first of which he expended to secure the revocation of an order expelling the Jews from Trebitsch; and when his coreligionists were driven out of Prague he alone was allowed to remain. In his will he founded twenty-two charitable institutions endowed with considerable funds, which were administered by his son and, after him, by his grandson, the subject of this article. I. L. Zappert was also a director of many Jewish benevolent institutions in Prague, and himself founded several more, among them one for providing poor girls with dowries and trousseaux, and another for the care of the sick.

**ZARA'AT.** See LEPROSY.

**ZARFATI, ZAREFATI** ("French"): Epithet frequently applied in rabbinical literature to Jews of French birth or descent. Among those so called may be mentioned: **Meir Zarfati**, whom Carmoly sought to identify with the Meir ha-Kohen of Narbonne who emigrated to Toledo, dying there in 1263 ("Ha-Karmel," vii. 58); **Abraham Zarfati**, author of the "Tamid ha-Shahar," copied by Abraham of Chinon about 1370; **Perez זרפתי**, called **הזרפתי קטלני**, which probably indicates that he emigrated from his native country, France, to Catalonia; the physician **Jacob b. Solomon Zarfati**; and the mathematician **Joseph b. Moses Zarfati**. By far the most important Zarfati family, however, was that of **TRABOT** (Trabotti), which seems to have originated in Trévoux in the department of the Ain, and to have settled in Italy in the second half of the fifteenth century.

**Jacob ben Solomon Zarfati:** Physician who lived, probably at Avignon, in the second half of the fourteenth century. He was a native of northern France, and is believed to have settled at Avignon after the banishment of the Jews. He was the author of a work entitled "Mishkenot Ya'akov," which is still extant in manuscript (Bibliothèque Nationale, Paris, MS. No. 137). This work is divided into three books, which bear separate titles, as follows: (1) "Bet Ya'akov," containing allegorical interpretations of certain passages of the Pentateuch; (2) "Yeshu'ot Ya'akov," a treatise on the ten plagues of Egypt; (3) "Kehillat Ya'akov," a theological treatise on the laws, other than the Ten Commandments, which are believed to have been

given on Mount Sinai. An appendix, entitled "Ebel Rabbati," contains an account of the deaths of three children whom Zarfati lost in the space of three months during the plague of 1395. He was also the author of a treatise on the headache called in medical works "vertigine" (Neubauer, "Cat. Bodl." No. 2583, 2).

I. BR.

**Joseph ben Samuel Zarfati** (called by Christian writers **Josiphon**, **Giosifante**, **Giuseppe Galo**): Italian physician; lived at Rome in the fifteenth and sixteenth centuries. He acquired early in life a great reputation in his profession; and the privileges that had been granted (1504) to his father by Pope Julius II. were extended to him. These were renewed in 1524 by Leo X., who expressed himself toward the Jewish physician in the most flattering terms. He was the more willing, said he in his patent, to grant these privileges as Joseph was no less magnanimous and no less skilful in his profession than was his father.

Joseph was well versed in Hebrew, Aramaic, and Arabic, and was an accomplished Latinist and Hellenist; he possessed also a wide knowledge of mathematics and philosophy. He was the teacher of Teseo Ambrogio, subsequently professor of Oriental languages at the University of Bologna. In the latter part of his life Joseph met with many misfortunes. An unfaithful servant fled to Constantinople with all his savings. Joseph pursued him thither, but was accused by the thief as a spy of the pope, and had to seek safety in flight. During the siege of Rome in 1527 Joseph was attacked by four robbers. He succeeded in escaping; but while endeavoring to reach Vicovaro he was stricken with the plague. Refused entrance to the city, he died without assistance in the open field.

**Samuel Zarfati.** See **JEW. ENCYC.** xi. 31b.

**ZARFATI:** Oriental Jewish family, traced by the bibliographer Azulai to a line of French rabbis descended from Rashi through his grandson Rabbenu Tam.

**Elijah Zarfati:** Moroccan Talmudist; chief rabbi of Fez about 1770; grandson of Samuel Zarfati.

**Joseph Zarfati:** Turkish rabbinical scholar; lived at Adrianople in the early part of the seventeenth century. He was the author of a collection of sermons entitled "Yad Yosef" (1617).

**Samuel Zarfati:** Chief rabbi of Fez in the eighteenth century; died 1713; grandson of Vidal Zarfati II. He wrote a work entitled "Nimmuke Shemu'el," in which he defended the opinions of Maimonides.

**Vidal Zarfati I.:** Moroccan Talmudist; lived at Fez in the sixteenth century. He is the earliest known member of the family.

**Vidal Zarfati II.:** Chief rabbi of Fez; grandson of Vidal Zarfati I.; lived about 1660. He was the author of "Zuf Debash," a commentary on the Talmud.

**Zemah Zarfati:** Talmudic author and chief rabbi of Tunis in the early part of the eighteenth century; remarkable for the number of his pupils. In the latter part of his life he dwelt for several years at Damascus; but his last days were passed at Jerusalem. Some of his manuscript notes were published in the latter part of the eighteenth century by Joseph Cohen Tanugi in his "Bene Yosef."

M. FR.

**ZARIFA:** Name of a goddess mentioned in a single passage of the Talmud ('Ab. Zarah 12a) as having been worshiped at Ashkelon. Kohut, Levy, and other Jewish lexicographers identify her with Serapis; but the Hebrew spelling would seem to imply that the deity was the goddess Sarapia or Serapia, another name of Isis Pharia, whose festival was celebrated in April (Preller, "Römische Mythologie," 3d ed., ii. 382, Berlin, 1883). It is possible, however, since Zarifa is mentioned in connection with Ashkelon, that she is to be identified with Derceto, who was worshiped in that city (Diodorus Siculus, i. 4; Ovid, "Metamorphoses," iv. 3), the term "zarifa" (= "composit") being especially fitting for a goddess represented with a human head and the body of a fish. Joseph Halévy, on the other hand, suggests ("Revue Sémitique," vi. 177) that Zarifa represents the Babylonian divinity Zarpanit, wife of Marduk. For a variant view see ASHKELON.

**ZARKA.** See ACCENTS IN HEBREW.

**ZARĶO, JUDAH BEN ABRAHAM:** Hebrew poet distinguished for the elegance of his style; flourished at Rhodes in the sixteenth century. During a residence at Constantinople he wrote his "Lehem Yehudah" (Constantinople, 1560), which contains an allegory on the soul, metrical and non-metrical poems, and epigrams directed against various celebrities, including Maimonides and Judah Sabara. A letter written by him to congratulate Joseph Hamon on his marriage is given at the beginning of the anonymous Hebrew style-book "Yefeh Nof," and some of his shorter poems have been published by Edelman in his "Dibre Hefez" (London, 1853).

I. BR.

**ZARZA, SAMUEL IBN SENEH:** Spanish philosopher; lived at Valencia in the second half of the fourteenth century. According to Zunz, his surname is derived from the Spanish town Zarza (= "thorn-bush"), and is accordingly synonymous with the Hebrew "seneh." Of his life no details are known; for while in his notes on the "Sefer ha-Yuhasin" (ed. Filipowski, p. 226) Samuel Shalom states that Zarza was burned at the stake by the tribunal of Valencia on the denunciation of Isaac CAMPANTON, who accused him of denying the creation of the world, historians have proved this assertion a mere legend. Although a comparatively unimportant writer, if his two works may serve as a criterion, Zarza ranked high in the estimation of his contemporaries, so that the poet Solomon Reubeni

of Barcelona and the astronomer Isaac ibn Al-Ḥadib composed poems in his honor.

Zarza was the author of the "Meḳor Ḥayyim," a philosophical commentary on the Pentateuch (Mantua, 1559); and of the "Miklol Yofi," a philosophical commentary devoted to the haggadot found in both Talmudim and divided into 151 chapters and seven parts (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1296). In the introduction to the latter work Zarza draws a melancholy picture of the state of the Jews of Castile in his time, stating that in Toledo alone 10,000 perished in the course of the war between Don Pedro and his brother Henry. In his "Meḳor Ḥayyim," Zarza mentions four other writings of his which are no longer in existence: "Taharat ha-Kodesh," on the principles of religion; "Ezem ha-Dat"; "Zeror ha-Mor"; and "Magen Abraham."

**ZARZAL, ABRAHAM IBN** (called **Zarzar** by Arabic chroniclers): Spanish physician and astronomer; flourished in the first half of the fourteenth century at the court of the Nasserites in Granada, where a certain Pharez ben Abraham ibn Zarzal, who may have been his father, was physician in ordinary ("Monatsschrift," xxxiii. 479; Steinschneider, "Hebr. Uebers." p. 272); died after 1369. Fearing that he might become involved in the murder of the minister Reduan, he retired to Castile, where his medical and astrological fame, as well as the recommendation of Mohammed IV. of Granada, who was in friendly relations with the King of Castile, won him the appointment of astrologer and physician in ordinary to Pedro the Cruel. Abraham, who gained the favor of the king and was constantly near him, took every opportunity of smoothing over the difficulties between Castile and Granada. It is said that he, like other astrologers, prophesied to Pedro that the horoscope of his nativity destined him to become the mightiest king of Castile, to conquer the Moors everywhere, and to capture Jerusalem. At Seville, a few weeks before his death, Pedro summoned Zarzal and said: "Abraham, why have the events of my life been opposite to all that you and other astrologers have prophesied to me? I bid you tell me the entire truth of all that I ask, concealing nothing." Abraham replied: "Your Majesty, if I tell the whole truth, may I be certain that you will not be offended thereby?" Having been reassured on this point, he continued: "Will one perspire who takes a very hot bath on a very cold day in January?" "Certainly," replied the king. "Such a result would be contrary to the governing constellation," said Abraham; "and it is the same with the horoscope of your nativity: your sins and your government have brought about the direct opposite."

Abraham was actively interested in the religious and philosophic movements of the time; and he endeavored to gain recognition for Judaism.

**ZARZAL, MOSES IBN**: Spanish physician and poet; physician in ordinary to Henry III. of Castile; flourished in the latter half of the fourteenth and the first part of the fifteenth century; son of Abraham ibn Zarzal. On March 6, 1405, he was at Toro, where he celebrated the birth of John II. in a poem which is given in the "Cancionero de Baena" (p. 222); and in 1389, 1400, and 1409 he resided in the Calle de Rehoyo at Segovia. The date of his death can not be determined; the epitaph found at Carmona stating that he died in 1432 is a forgery.

**ZAUSMER, JACOB BEN SAMUEL**: Polish rabbi and preacher; flourished at Zausmer in the seventeenth century. He was the author of the "Bet Ya'akov" (Dyhernfurth, 1696), a work containing 174 responsa. In the preface he says that he wrote also "Toledot Ya'akov," homilies on the Pentateuch arranged in the order of the parashiyot.

**ZAYIN** (ז): Seventh letter of the Hebrew alphabet. The meaning of the name is uncertain. In sound the letter is a sonant sibilant, its phonetic value corresponding to the English "z." It interchanges with the surd sibilant ("s"), and occurs only as a radical, never as a formative element. In the later period it has the numerical value 7.

**ZBARAZER**. See EHRENKRANZ, BENJAMIN WOLF.

**ZBITKOVER, SAMUEL**. See WARSAW.

**ZEALOTS** (Hebrew, **Ḳanna'im**): Zealous defenders of the Law and of the national life of the Jewish people; name of a party opposing with relentless rigor any attempt to bring Judea under the dominion of idolatrous Rome, and especially of the aggressive and fanatical war party from the time of Herod until the fall of Jerusalem and Masada. The members of this party bore also the name **SICARII**, from their custom of going about with daggers ("sicæ") hidden beneath their cloaks, with which they would stab any one found committing a sac-

rilegious act or anything provoking anti-Jewish feeling.

Following Josephus ("B. J." ii. 8, § 1; "Ant." xviii. 1, §§ 1, 6), most writers consider that the Zealots were a so-called fourth party founded by Judas the Galilean (see Grätz, "Gesch." iii. 252, 259; Schürer, "Gesch." 1st ed., i. 3, 486).

**Origin and Meaning of the Name.** This view is contradicted, however, by the fact that Hezekiah, the father of Judas the Galilean, had an organized band of so-called "robbers" which made war against the Idumean Herod

("B. J." i. 10, § 5; "Ant." xiv. 9, § 2), and also by the fact that the system of organized assassination practised by the Zealots was in existence during the reign of Herod, if not long before (see below). The name "Ḳanna'im" (קנאים) not "Kenaim" as given in Herzog-Hauck, "Real-Encyc." 1886, s.v. "Zeloten") occurs twice in the Talmud; in Sanh. ix. 11 and in Ab. R. N. vi. (where the other version has סקרין ["Sicarii"]); see Schechter's edition, pp. 31 and 32). The former passage contains a statute, evidently of the Maccabean time, declaring that "Whosoever steals the libation cup [Num. iv. 7] or curses one with the aid of the Holy Name [Lev. xxiv. 16, Sifra] or has sexual intercourse with a Syrian [heathen] woman shall be felled by the Ḳanna'im or Zealots." This is explained in the Talmud (Sanh. 82a, b; Yer. Sanh. ix. 27b) to mean that, while the acts mentioned are not causes for criminal procedure, they fall into the same category as did the crime of Zimri the son of Salu, whom Phinehas, because "he was zealous for his God," slew flagrante delicto (Num. xxv. 11-14). Phinehas is set up as a pattern, being called "Ḳanna'i ben Ḳanna'i" (a Zealot, the son of a Zealot), inasmuch as he followed the example of Levi, the son of Jacob, who avenged the crime perpetrated upon Dinah by killing the men of Shechem (Sifre, Num. 131; Sanh. 82b; comp. Book of Jubilees, xxx. 18, 23, where Levi is said to have been chosen for the priesthood because he was zealous in executing vengeance upon the enemies of Israel, and Judith ix. 2-4, where Simeon as ancestor of Judith is praised for his zealous act).

This unfailing "zeal for the Law" became the standard of piety in the days of the Maccabean struggle against the Hellenizers. Thus it is asserted that when Mattathias slew the Jew whom he saw sacrificing to an idol, "he dealt zealously for the law of God, as did Phinehas unto Zimri the son of Salu"; and Mattathias' claim of descent from Phinehas implies that, like the latter, he obtained for his house the covenant of an everlasting priesthood (I Macc. ii. 24, 26, 54). Mattathias' call, "Whosoever is zealous of the Law, and maintaineth the covenant, let him follow me" (*ib.* verse 27; comp. verses 43-45), whether authentic or not, is practically a recognition of a league of Ḳanna'im or Zealots, no matter when or by whom the First Book of Maccabees was written. Similarly Elijah

**Phinehas the Model Zealot.** *ib.* is lauded for his zeal for the Law (also verse 58; comp. I Kings xix. 10, 14; Ecclus. [Sirach] xlviii. 2); and later

haggadists declared Phinehas and Elijah to have been the same person (Targ. Yer. to Ex. vi. 18; Pirke R. El. xxix., xlvii.). That Phinehas

was regarded during the Maccabean reign as the type of true (priestly) piety, in contradistinction to the Hellenizing Sadducees typified by Zimri, may be learned from the warning said to have been addressed by King Jannæus on his deathbed to his wife: "Fear not the Pharisees nor the Sadducees [non-Pharisees], but the hypocrites who conduct themselves like Zimri and expect the reward of Phinehas" (Sotah 22b).

Originally the name "Qanna'im" or "Zealots" signified religious fanatics; and as the Talmudic traditions ascribe the rigorous laws concerning marriage with a non-Jewess (Sanh. 82a) to the Hasidæan bet din of the Hasmoneans, so probably to the Zealots of the Maccabean time are due the rabbinical laws governing the relations of Jews to idolaters, as well as those concerning idols, such as the prohibition of all kinds of images (Mek., Yitro, 6) and even the mere looking upon them, or of the use of the shadow of an idol (Tosef., Shab. xvii.; 'Ab. Zarah iii. 8), or of the imitation of heathen (Amorite) customs (Shab. vi. 10; Tosef., Shab. vi.). The divine attribute "El qanna'" (= "a jealous God"; Ex. xx. 5; Mek., Yitro, *l.c.*) is significantly explained as denoting that, while God is merciful and forgiving in regard to every other transgression, He exacts vengeance in the case of idolatry: "As long as there is idolatry in the world, there is divine wrath" (Sifre, Deut. 96; Sanh. x. 6; comp. I Macc. iii. 8).

Regarding the original Zealots or Qanna'im, the source from which Josephus derived his description of the Essenes, and which has been preserved in more complete form in Hippolytus, "Origenis Philosophumena sive Omnium Hæresium Refutatio," ix. 26 (ed. Dunker, 1859, p. 482; comp. JEW. ENCYC. v. 228-230), has the following:

"Some of these [Essenes] observe a still more rigid practise in not handling or looking at a coin bearing an image, saying that one should neither carry nor look at nor fashion any image; nor will they enter a city at the gate of which statues are erected, since they consider it unlawful to walk under an image [comp. Sifra, Kedoshim, i.; Shab. 149a; Yer. 'Ab. Zarah iii. 42b-43b]. Others threaten to slay any uncircumcised Gentile who listens to a discourse on God and His laws, unless he undergoes the rite of circumcision [comp. Sanh. 59a; Sifre, Deut. 345]; should he refuse to do so, they kill him instantly. From this practise they have received the name of 'Zealots' or 'Sicarii.' Others again call no one Lord except God, even though one should torture or kill them."

It is only this last point which Josephus singles out as the doctrine of the Zealots of his day ("B. J." ii. 8, § 1; "Ant." xviii. 1, §§ 1-6) in order to give them the character of political extremists; the rest he omits. But even here he misstates the facts. The principle that God alone is King is essentially a religious one. It found expression in the older liturgy (comp. "Beside Thee we have no King," in "Emet we-Yazzib"; "Rule Thou alone over us," in the eleventh benediction of the "Shemoneh 'Esreh"; "And be Thou alone King over us," in "U-Beken Ten Pahdeka"; "We have no King besides Thee," in "Abinu Malkenu" and in "Yir'u 'Enenu"). Expressed in I Sam. viii. 7, and deemed by the Rabbis to be expressed also in Num. xxiii. 21 and Deut. xxxiii. 5 (see Targ. to Sifre, Deut. 346; Musaf of Rosh ha-Shanah; comp. also III Sibyllines, ii.; III Macc. ii. 4), it was to be pronounced in the "Shema" twice a day (Ber. ii. 1; Friedmann in his edition of

Sifre, p. 72b, note, erroneously ascribes the institution to the time of the Roman oppression). As early as 63 B.C. the Pharisaic elders in the name of the nation declared to Pompey that it was not befitting for them to be ruled by a king, because the form of government received from their forefathers was that of subjection to the priests of the God they worshiped, whereas the present descendants of the priests (Hyrcanus and Aristobulus) sought to introduce another form of government which would make slaves of them (Josephus, "Ant." xiii. 3, § 2). The kingship of God is indeed especially accentuated in the Psalms of Solomon, composed at that time (ii. 36; v. 22; vii. 8; xvii. 1, 32, 38, 51). "Either God is your king or Nebuchadnezzar" (Sifra, Kedoshim, at the close); "Whoso takes upon himself the yoke of the Torah will have the yoke of the worldly power removed from him," says R. Nehunya ben ha-Kanah ("the Zealot"; see Geiger's "Zeitschrift," ii. 38; comp. Ab. R. N. xx. [ed. Schechter, p. 72]); "My mother's sons were incensed against me" (Cant. i. 6); "These are Sanhedrin" ["Boulai"] of Judea who cast off the yoke of the Holy One and set over themselves a human king." See also Philo's description of the Essenes in "Quod Probus Liber Est," §§ 12-13: "They condemn masters; even their most cruel and treacherous oppressor [Herod] could not but look upon them as free men."

The reign of the Idumean Herod gave the impetus for the organization of the Zealots as a political party. Shemaiah and Abtalion (Ptolion), as members of the Sanhedrin, at first opposed Herod, but seem to have preferred a passive resignation in the end

(Josephus, "Ant." xiv. 9, § 4; xv. 1, § 1; xv. 7, § 10; xv. 10, § 4); though there were those who "could by no torments be forced to call him [Herod] king," and who persisted in opposing his government. Hezekiah and his so-called

"hand of robbers," who were the first to fall as victims under Herod's bloodthirsty rule ("B. J." i. 10, § 5; "Ant." xiv. 9, §§ 2-3), were by no means common robbers. Josephus, following his sources, bestows the name of "robbers" upon all the ardent patriots who would not endure the reign of the usurper and who fled with their wives and children to the caves and fortresses of Galilee to fight and to die for their conviction and their freedom ("Ant." xiv. 15, §§ 4-6; xv. 8, §§ 3-4; xvii. 10, §§ 5-8; xx. 8, §§ 5-6; "B. J." i. 18, § 1; ii. 13, §§ 2-4; iv. 4, § 3; and elsewhere). All these "robbers" were in reality Zealots. Josephus relates of one of them that he slew his wife and his seven sons rather than allow them to be slaves to the Idumean Herod ("Ant." xiv. 15, § 5; "B. J." i. 16, § 4); this man is possibly identical with Taxo, the Levite mentioned in the "Assumptio Mosis," ix. 1-7, as undergoing a martyr's death in a cave with his seven sons, saying: "Let us die rather than transgress the commands of the Lord of Lords, the God of our fathers; for if we do this our blood will be avenged before the Lord" (comp. Charles, "The Assumption of Moses," 1897, p. 36, who suggests the original reading נקנה ["the Zealot"] in place of נקנה, which he considers a corruption of the copyist; see also Schürer, "Gesch." 1st ed., iii. 3, 217, and Charles, *l.c.* pp. lv.-lviii.). Sepphoris in

Galilee seems to have been the main fortress in which the Zealots concentrated their forces ("Ant." xiv. 15, § 4; xvii. 10, § 5).

It was for the sake of punishing the crimes of idolatry and bloodshed committed by Herod that the Zealots of Jerusalem first appeared with daggers ("sicæ") hidden underneath their cloaks, bent upon slaying the Idumean despot. Josephus relates ("Ant." xv. 8, §§ 1-4) that it was the introduction

**The Sicarii.**

of Roman institutions entirely antagonistic to the spirit of Judaism, such as the gymnasium, the arena, and, above all, the trophies (that is, images to which homage was to be paid), which provoked the indignation of the people. Ten citizens of Jerusalem swore vengeance against Herod as an enemy of the nation, and, with concealed daggers, went into the theater, where Herod was supposed to be, in order to slay him there. Owing, however, to his system of espionage, Herod was informed of the conspiracy in time, and so escaped, while the conspirators suffered death with great torture, but gloried in their martyrdom. The people sympathized with them, and in their wrath tore to pieces the spy who had discovered the plot. Another outburst of indignation on the part of the Zealots occurred when Herod, toward the end of his life, placed a large golden eagle over the great gate of the Temple. Two masters of the Law, Judah ben Sarifai and Mattathias ben Margalot, exhorted their disciples to sacrifice their lives rather than allow this violation of the Mosaic law, which forbids as idolatry the use of such images; and forty young men with these two teachers at their head pulled down the golden eagle, for which act the entire company suffered the cruel penalty of death by fire inflicted by order of Herod ("B. J." i. 33, § 2; "Ant." xvii. 6, §§ 2-4).

The spirit of this Zealot movement, however, was not crushed. No sooner had Herod died (4 c.e.) than the people cried out for revenge ("Ant." xvii. 9, § 1) and gave Archelaus no peace. Judea was full of robber bands, says Josephus (*l.c.* 10, § 8), the leaders of which each desired to be a king. It was then

**Judas, the Zealot Leader.**

above-mentioned robber-captain, organized his forces for revolt, first, it seems, against the Herodian dynasty, and then, when Quirinus introduced the census, against submission to the rule of Rome and its taxation. Little reliance, however, can be placed upon Josephus regarding the character of Judas: at one point this author describes him as a leader "desirous only of the royal title" and bent upon "pillaging and destroying people's property" with the aid of "a multitude of men of profligate character"; elsewhere ("B. J." ii. 8, § 1; "Ant." xviii. 1, §§ 1, 6; comp. "B. J." ii. 17, § 8) he mentions Judas as "the founder of the fourth sect of Jewish philosophy, who taught that God is the only Ruler and Lord, and neither death nor any dread should make them call any man Lord"; and at the same time he says, "The nation was infected with their doctrine to an incredible degree, which became the cause of its many misfortunes, the robberies and murders committed."

JUDAS THE GALILEAN, the son of Hezekiah, is spo-

ken of in Eccl. R. i. 11 as one of the scholarly Hasidim to whom in the world to come God shall join a band of the righteous to place him at His side because he failed to receive due homage as a martyr (see Derenbourg, "Palestine," p. 161).

It was under the leadership of Judas and of his sons and grandson that the Zealots became an aggressive and relentless political party which would brook no compromise and would have no peace with Rome. They were those who would bring about "the kingdom of heaven," that is, the kingship of God, "by force and violence" (Matt. xi. 12). Of Judas' three sons, Jacob and Simon fell as martyrs to their cause in opposing the Roman rule under Tiberius Alexander ("Ant." xx. 5, § 2); his other son, Menahem, was the chief leader of the revolt in 66, and was slain on account of his tyranny by rivals in his own party when, surrounded with royal pomp, he went up to the Temple to be crowned ("B. J." ii. 17, §§ 8-9; comp. *ib.* § 3 and "Vita," § 5). Rabbinical tradition alludes to Menahem's Messiahship when stating that the Messiah's name is Menahem the son of Hezekiah (Sanh. 98b); and according to Geiger ("Zeitschrift," vii. 176-178), he is the one who went up with eighty couples of disciples of the Law equipped with golden armor and crying out: "Write upon the horn of the ox, 'Ye [yielding Pharisees] have no share in the God of Israel!'" (Yer. Hag. ii. 77b). His kinsman and successor at Masada was the Zealot leader Eleazar ben Jair ("B. J." ii. 17, §§ 9-10; vii. 9). In the speech attributed to him he declares that it is a glorious privilege to die for the principle that none but God is the true Ruler of mankind, and that rather than yield to Rome, which is slavery, men should slay their wives and children and themselves, since their souls will live forever (*ib.* 8, §§ 6-7). This is certainly not the language and conduct of the leader of a band of "robbers," as Josephus persists in calling this party. In their opposition to Rome the Zealots were clearly inspired by religious motives (Geiger, "Zeitschrift," v. 268 *et seq.*; Grätz, "Gesch." iii. 4, 259, 795-797).

As stated by Josephus ("B. J." iv. 3, § 9), they boastfully called themselves by the name of "Ḳanna'im" (Zealots) on account of their religious zeal. The right of the Ḳanna'im to assassinate any non-Jew who dared to enter the consecrated parts of the Temple was officially recognized in a statute inscribed upon the Temple wall and discovered by Clermont-Ganneau in 1871 (see Schürer, "Gesch." 1st ed., ii. 3, 274; comp. Josephus, "B. J." vi. 2, § 4; both Derenbourg and Grätz ["Gesch." iii. 4, 225] misunderstood the passage). "Ḳanna'im" was the name for those zealous for the honor and sanctity of the Law as well as of the sanctuary, and for this reason they at first met with the support and encouragement of the people and of the Pharisaic leaders, particularly those of the rigid school of Shammai. It was only after they had been so carried away by their fanatic zeal as to become wanton destroyers of life and property throughout the land that they were denounced as heretic Galileans (Yad. iv. 8) and "murderers" (הרצחנים; Soṭah ix. 9) and that their principles were repudiated by the peace-loving Pharisees.

When, in the year 5, Judas of Gamala in Galilee

started his organized opposition to Rome, he was joined by one of the leaders of the Pharisees, R. Zadok, a disciple of Shammai and one of the fiery patriots and popular heroes who lived to witness the tragic end of Jerusalem ("Ant." xviii. 11; Git. 56a; Grätz, "Gesch." iii. 4, 259, 796, and I. H. Weiss, "Dor Dor we-Dorshaw," i. 177, against Geiger, "Zeitschrift," v. 268). The

#### Their History.

Roman procurator, for the purpose of taxation was regarded as a sign of Roman enslavement; and the Zealots' call for stubborn resistance to the oppressor was responded to enthusiastically. The anti-Roman spirit of the Zealots, as Grätz has shown (*l.c.*), found its echo chiefly in the school of Shammai, whose members did not shrink from resorting to the sword as the ultimate authority in matters of the Law when anti-heathen measures were to be adopted (Shab. 17a; Weiss, *l.c.* p. 186). A great many of the laws that are so strikingly hostile to idols and idolaters ('Ab. Zarah 20a; Tosef., 'Ab. Zarah, iii. 3; Sanh. 63b; and elsewhere) appear to have emanated from these times of warfare against Rome (Grätz, "Gesch." iii. 4, 471), though such views were expressed as early as the time of John Hyrcanus (see JUBILEES, Book of).

The call for political activity was renewed with greater force when, after the death of Agrippa I. in the year 44, Judea became more emphatically a province of Rome and the Sanhedrin at Jerusalem was again deprived of its jurisdiction. Numerous bands of Zealots under the leadership of Tholomy, Amram, Hanibas (Tahina ?), and Eleazar (see below) roamed through the land, fanning local strifes into wars of rebellion; but in every case they were ultimately defeated, and their leaders were either beheaded or banished for a time ("Ant." xx. 1, § 1). Soon afterward Jacob and Simon, sons of Judas the Galilean, as mentioned above, organized a revolt against Tiberius Alexander, and paid the penalty of crucifixion (47). But matters reached a climax under the procurators Cumannus, Felix, and Florus (49-64), who vied with one another in bloodthirsty cruelty and tyranny when the Zealot leaders, in their desperate struggle against the overwhelming power of an implacable enemy, resorted to extreme measures in order to force the people to action.

Three men are singled out by Josephus and in rabbinical tradition as having shown boundless ferocity in their warfare against Rome and Romanizers: ELEAZAR B. DINAI, Amram ("Ant." xx. 1, § 1; 8, § 5), and Tahina (Josephus has "Hanibas," not "Hannibal" as Grätz reads, and in "B. J." ii. 13, § 4, "Alexander"; comp. Soṭah ix. 9; Cant. R. iii. 5; Grätz, "Gesch." iii. 4, 431). Of Eleazar ben Dinai and Amram it is said in the last-cited passage that "they desired to urge the Messianic deliverance of Israel, but fell in the attempt." Regarding Eleazar ben Dinai (comp. Kil. v. 10) and Tahina (called also the "Pharisaic saint"), R. Johanan b. Zakkai relates in Soṭah *l.c.* that, on account of the frequent murders committed by them and which won them the epithet of "murderers," the Mosaic law concerning expiation for unknown slain ones ("'eglah 'arufah") was set in abeyance. Obviously Josephus misrep-

resents these Zealot leaders, who, while tyrannical and cruel, were certainly no "robbers." However, their dealings with property, especially that belonging to those suspected of friendliness to Rome, created anarchy throughout the land, as may be learned from the rabbinical legislation concerning the "siḳariḳon" (Git. v. 6, 55b; Yer. Git. v. 47b). One of these, named Doras and mentioned by Josephus (*l.c.*), has become, like Eleazar ben Dinai, proverbial in rabbinical literature (Men. 57a; Yer. Shab. 14a, where he is mentioned as a type of a voracious eater).

As the oppression of the Roman procurators increased, so also the passion and violence of the Zealots grew in intensity, affecting all the discontented, while one pseudo-Messiah after another appeared arousing the hope of the people for deliverance from the Roman yoke ("Ant." xx. 5, § 1; 9, § 10; "B. J." ii. 13, § 5). It was quite natural that under the name of Sicarii all kinds of corrupt elements, men eager for pillage and murder, should join the party, spreading terror through the land. Finally the barbarities of Albinus and, above all, of Gessius Florus precipitated the crisis and played into the hands of the terrorists ("Ant." xx. 9-11; "B. J." ii. 14-15). The issue was between the peace party, which was willing to yield to cruel Rome, and the war party, which, while relying on God's help, demanded bold action; and under the leadership of the priestly governor of the Temple, Eleazar ben Anania, who refused to receive gifts from or offer sacrifice on behalf of Rome, the latter party prevailed ("B. J." ii. 17, § 2), another priest belonging to the Shammaite party, Zachariah b. Amphicalos, having decided in favor of Eleazar (Tosef., Shab. xvii. 6; Git. 56a; Grätz, "Gesch." iii. 4, 453-458, 818). At this opportune time Menahem, the son of Judas the Galilean, seized the fortress Masada in Galilee, killed the Roman garrison, and then drove the Romans out of other fortresses; and finally his kinsman and successor as master of Masada, Eleazar ben Jair, took up the war of rebellion against Rome and carried it to the very end ("B. J." ii. 17, §§ 2, 7, 10). True to the Shammaite principle that warfare against the heathen possessors of Palestine is permitted even on the Sabbath (Shab. 19a; Grätz, *l.c.* pp. 796-797), the war was carried on by the Zealots on that day ("B. J." ii. 19, § 2), and the Romans were everywhere overpowered and annihilated, Simon bar Giora being one of the heroic leaders whom none could resist. The whole army of Cestius, who had brought twelve legions from Antioch to retrieve the defeat of the Roman garrison, was annihilated by

**Zealots** the Zealots under the leadership of Bar  
**Annihilate** Giora and Eleazar ben Simon the priest.

**Cestius'** The Maccabean days seemed to have  
**Army.** returned; and the patriots of Jerusa-

lem celebrated the year 66 as the year of Israel's deliverance from Rome, and commemorated it with coins bearing the names of Eleazar the priest and Simon the prince (Bar Giora [?], or Simon ben Gamaliel as Grätz has it; "B. J." ii. 19, §§ 1 *et seq.*, 20, §§ 1-5; Grätz, *l.c.* pp. 469-470, 509, 818-841).

The news of the victory of the Zealots in Jerusa-

lem set the whole province of Galilee ablaze. Always a hotbed of revolution, it at once began an insurrection, and its thousands soon rallied round the fiery Zealot leaders John ben Levi of Giscala ("Gush-halab"), Justus the son of Pistus, Joshua ben Saphia of Tiberias, and Joseph of Gamala ("B. J." ii. 21, § 1; iv. 4, § 13; "Vita," §§ 12, 27, 35-36). Only Sepphoris, a city full of aliens, obstinately refused to join the revolution. Josephus was sent by the Jerusalem Sanhedrin, composed chiefly of Zealots, for the purpose of prevailing upon the Sepphorites to abandon the cause of Agrippa II. and Rome, and to help Galilee work hand in hand with the authorities at Jerusalem in the liberation of Judea; but he deceived the Zealots and played into the hands first of Agrippa and then of Rome. His "De Bello Judaico" and his "Vita," written for the purpose of pleasing his Roman masters, are full of aspersions upon the character of the Zealots and their leaders.

The year 67 saw the beginning of the great war with the Roman legions, first under Vespasian and then under Titus; and Galilee was at

**The Final Stage.** The Zealots fought with almost super-human powers against warriors trained

in countless battles waged in all parts of the known world, and when they succumbed to superior military skill and overwhelming numbers, often only after some act of treachery within the Jewish camp, they died with a fortitude and a spirit of heroic martyrdom which amazed and overawed their victors. Josephus' own description of the tragic end of the last great Zealot leader, Eleazar ben Jair, and his men after the siege and final capture of Masada ("B. J." vii. 8-9) is the best refutation of his malicious charges against them.

At the siege of Jerusalem the Zealots were not deterred even by the defeat in Galilee and the terrible massacre of their compatriots; their faith in the final victory of the Holy City and its massive walls remained unshaken. But there were too much enmity and strife between them and the ruling body, the Sanhedrin, which they distrusted; and their own leaders were also divided. Instead of working after the clearly mapped-out plan of one powerful leader, they had their forces split up into sections, one under Simon bar Giora, another under Eleazar ben Simon and Simon b. Jair (Ezron), a third under John of Giscala, and a fourth, consisting chiefly of semi-barbarous Idumeans, under Jacob ben Sosas and Simon ben Kathla ("B. J." v. 6, §§ 2-3; vi. 1). In order to force the wealthy and more peaceably inclined citizens to action, the Zealots in their fury set fire to the storehouses containing the corn needed for the support of the people during the siege ("B. J." v. 1, § 4). This tragic event is recorded in Ab. R. N. vi. (ed. Schechter, p. 32), the only Talmudical passage that mentions the Kanna'im as a political party. The second version (ed. Schechter, p. 31) has "Sicarii" instead, and agrees with Giṭ. 56, Lam. R. i. 5, and Eccl. R. vii. 11 in mentioning three rich men of Jerusalem who, being inclined to make peace with the Romans, had their storehouses burned by the Zealots; namely, Ben Kalba Shabua', Ben Zizit ha-Kassat, and Nicodemus (Nikomedes ben

Gorion; see Grätz, *l.c.* pp. 527-528; Derenbourg, *l.c.* p. 284). In Eccl. R. vii. 11 the instigation of the burning of the storehouses is ascribed to the leader of the Zealots ("Resh Barione"; see the articles ABBA SAḲKARA and BEN BAṬTAḤ).

Simon bar Giora and Johu of Giscala survived the fall of Jerusalem, and were taken as captives to Rome to glorify Titus' triumph; the former, with a rope around his head, was dragged to the Forum and cast down from the Tarpeian rock ("B. J." v. 5, § 6). Most of the Zealots fell under the sword or other instruments of death and torture at the hands of the Romans, and such as fled to Alexandria or Cyrenaica roused by their unyielding hostility to Rome the opposition of those eager for peace, until they too finally met the same tragic fate ("B. J." vii. 6, §§ 1-5; 10, §§ 1-4). It was a desperate and mad spirit of defiance which animated them all and made them prefer horrible torture and death to Roman servitude. History has declared itself in favor of the Pharisees, who deemed the schoolhouse (see JOHANAN BEN ZAKKAI) of more vital importance to the Jews than state and Temple; but the Zealot, too, deserves due recognition for his sublime type of steadfastness, as George Eliot points out in her "Impressions of Theophrastus Such" (1879, p. 212).

Among the disciples of Jesus there is mentioned a Simon the Zealot (Luke vi. 15; Acts i. 13); for the same person Matt. x. 4 and Mark iii. 18 have "the Canaanite," obviously a corruption of חַנְנַיִם ("ha-Kanna'i" = "the Zealot").

K.

**ZEBAHIM** ("Animal Sacrifices"): Treatise in the Mishnah, the Tosefta, and the Babylonian Talmud, dealing mainly with the laws and regulations to be observed in making animal offerings. In the Tosefta this treatise is called "Korbanot" (Sacrifices), while its older name, used in the Talmud (B. M. 109b), is "Shehitat Kodashim" (Slaughtering of Consecrated Animals). It is the first treatise in the order Kodashim, and consists of fourteen chapters divided into 101 paragraphs.

Ch. i.: Setting forth the intention necessary in the bringing of a sacrifice; the Passover sacrifice must be slaughtered at the proper time; by what acts performed with improper intention

**Mishnah.** the sacrifice becomes unfit ("pasul").

**Contents:** Ch. ii.: What makes a sacrifice unfit, and what makes it an abomination ("piggul"); a sacrifice becomes piggul

when the one who brings it intends to partake of it or to offer a part thereof later than the time prescribed by law.

Ch. iii.: Enumerating oversights in spite of which the sacrifice remains fit; the only wrongful intentions that can render the sacrifice unfit are the intentions to eat of the sacrifice later than the lawful time or in a place other than that stipulated by law. Passover sacrifices and sin-offerings are rendered unfit when not slaughtered with the proper intentions of making them Passover sacrifices or sin-offerings.

Ch. iv.: The sprinkling of the blood; the points of distinction between a sacrifice consecrated by heathen and one consecrated by Israelites; defini-

tion of the correct intentions necessary in the bringing of a sacrifice.

Ch. v.: Where the various animals are slaughtered according to their different degrees of holiness; where and how their blood must be sprinkled; where and for how long their flesh may be eaten.

Ch. vi.: Continuation of ch. v.; on the preparation and delivering of a sin-offering consisting of birds.

Ch. vii.: Further regulations concerning the sacrifice of birds.

Ch. viii.: Rules governing cases in which different animals or parts of different animals have been mingled, or in which the blood of one

**Contents:** sacrifice has been mixed with that of viii.-xiv. another.

Ch. ix.: In which cases that which has been placed on the altar may not be removed; things which in some instances the altar, the ladder, and the sanctified vessels render holy, and the cases in which they have no sanctifying powers.

Ch. x.: The order of the various sacrifices; which sacrifices precede others with regard to time, and also in degree of holiness; thus, the daily burnt offering ("tamid") precedes the additional offering ("musaf") brought on Sabbaths and festivals; how the priests partake of the sacrificial meat.

Ch. xi.: Cases in which a garment or utensil stained by the blood of a sacrificed animal may be washed, and when it may not be washed; on the cleansing of the vessels according to the flesh of different sacrifices which has been prepared in them.

Ch. xii.: Priests who do not partake of the flesh of the sacrifices; in which cases the skins belong to those who bring the sacrifices, and in which to the priests; exceptions among the latter cases; where the bullocks and he-goats are burned, and under what conditions the garments of those who attend to the burning are rendered unclean.

Ch. xiii.: Various offenses that may occur in connection with sacrifices.

Ch. xiv.: Regulations concerning the bringing of a sacrifice outside of the Temple in Jerusalem; before the erection of the Tabernacle it was permitted to sacrifice on the high places ("bamot"), and the first-born officiated as priests; but after the erecting of the Tabernacle this was forbidden, and the priests of the family of Aaron officiated; the sacrificing on high places was again permitted in Gilgal, but was anew prohibited in Shiloh; in Nob and in Gibeon permission was once more granted, but the practise was finally forbidden when the Temple was built in Jerusalem; description of the sanctuary in Shiloh.

The Tosefta to this treatise is divided into thirteen chapters, and contains not only elucidating amplifications of the Mishnah, but also several interesting maxims. Mention may be made of

**The Tosefta.** R. Tarfon's acknowledgment of the wisdom of R. Akiba (i. 8), to whom he says: "I have heard, but did not

know how to explain; you, however, explain, and your interpretation is in accord with the traditional Halakah. Therefore, he who disagrees with you is as though he had parted with life." Ch. vi. 11 contains a description of the altar; and xi. 1 interprets the name of the meal-offering ("shelamin")

as being derived from "shalom" (peace), explaining that at this sacrifice the altar, the priests, and the offerer of the sacrifice all receive a part thereof, so that all are satisfied. Ch. xiii. 6 sets forth the length of the various periods during which the sanctuary was in the wilderness, in Gilgal, in Shiloh, in Nob and Gibeon, and in Jerusalem.

The Gemara of the Babylonian Talmud discusses and explains the several mishnayot, and contains besides some interesting haggadic interpretations and maxims. A description is given of the manner in which David decided upon the place where the Temple should be built (§ 54b). When the Jews returned from the Babylonian exile there were among them three prophets: one pointed out to the people the place where the altar had formerly stood and where it should again be erected; the second told them that they might sacrifice, although the Temple had not yet been built; and the third instructed them that the Torah should be written in square characters (§ 62a). A description is also given of how, during the revelation on Mt. Sinai, the voice of God was heard by all the nations, and how they became frightened and went to Balaam, who explained to them the import of the noise (§ 116a).

J. Z. L.

**ZĒBA'OT ADONAI.** See ADONAI.

**ZĒBEDEE** (*Zēbedaios*; apparently from the Hebrew זְבִדִּיָּה = "the gift of יהוה"): Father of the apostles James and John, and husband of Salome; a native of Galilee and a fisherman by calling (Matt. iv. 21, xxvii. 56; Mark xv. 40). It seems from the mention of his boat and hired servants (*ib. i. 20*) that Zebedee was a man of some means, although he had to work himself.

J. M. SEL.

**ZĒBI BEN AARON.** See KAIDANOVER, ZĒBI HIRSCH.

**ZĒBI ASHKENAZI.** See ASHKENAZI, ZĒBI HIRSCH BEN JACOB.

**ZĒBI HIRSCH BEN HAYYIM:** Dayyan and hazzan at Posen toward the end of the seventeenth century. Under the title "Sefer Or Yashar" he edited (Amsterdam, 1709) an Ashkenazic ritual, to which he appended notes of his own, various commentaries collected from ancient authorities, the annotations of Isaac Luria, the dinim that are in daily use, and ethical dissertations taken from the "Hobot ha-Lebabot," "Reshit Hōkmah," and "Toze'ot Hayyim." Zebi Hirsch is not to be confounded with a printer of Wilmersdorf of similar name.

**BIBLIOGRAPHY:** Nepi-Ghrondi, *Toledot Gedole Yisrael*, p. 298; Steinschneider, *Cat. Bodl.* col. 2751.

J. I. BR.

**ZĒBI HIRSCH BEN ISAAC JACOB:** Shoḥet at Cracow in the sixteenth century; a pupil of Moses Isserles. He was the author of "Haggahot le-Sefer Sheḥitah u-Bediqah" (Cracow, 1631; n.p. 1723; Amsterdam, 1745; Zolkiev, 1793), annotations appended to Jacob Weil's work on the laws governing the slaughtering of animals and the examination of the lungs.

**BIBLIOGRAPHY:** Nepi-Ghrondi, *Toledot Gedole Yisrael*, p. 298; Fürst, *Bibl. Jud.* i. 396; Steinschneider, *Cat. Bodl.* col. 2753.

**ZEBI HIRSCH BEN JOSEPH BEN ZEBI HA-KOHEN**: Polish Talmudist of the seventeenth century; studied for some time at Cracow under Yom-Tob Lipmann Heller. He was the author of "Nahalat Zebi" (Venice, 1661), a commentary on Joseph Caro's Shulhan 'Aruk, Eben ha-'Ezer, and of "Ateret Zebi," a commentary on Oraḥ Ḥayyim. Zebi left several works in manuscript, among which are commentaries on the two remaining parts of the Shulhan 'Aruk.

**BIBLIOGRAPHY**: Fürst, *Bibl. Jud.* i. 395; Steinschneider, *Cat. Bodl.* col. 2755.

J.

I. BR.

**ZEBI HIRSCH B. SIMON**: Lithuanian Talmudist; lived in the middle of the eighteenth century. He was dayyan and preacher in the community of Vitebsk during the rabbinates of R. Isaiah and R. Löb, and was known as one of the first Talmudic authorities in that part of Lithuania. He corresponded with many rabbis who consulted him on difficult ritual questions. Of his numerous writings only one has been printed: "Hadrat Zeḳenim" (Dubrovna, 1802), edited by his grandsons Joshua and Abraham b. Meir. This work, intended as a codification of the halakot enacted during the period following the compilation of the Shulhan 'Aruk, does not treat the subject fully, the printed part developing inadequately the subjects contained in the first 200 paragraphs of the Shulhan 'Aruk, Yoreh De'ah. The unpublished part of the "Hadrat Zeḳenim" contains novellæ on Berakot and on all treatises of the order Mo'ed.

**BIBLIOGRAPHY**: *Hadrat Zeḳenim*, Introduction and notes of approbation.

L. G.

**ZEBID**: 1. Babylonian amora of the fourth century; a contemporary of Abaye, whose halakot he transmitted, and of whom he was perhaps a pupil (Ber. 46b; Soṭah 32b; *et passim*). Zebid also transmitted the halakot of Raba and R. Naḥman (B. Ḳ. 84a; B. M. 17a), but he particularly preferred the decisions of Abaye, and it is narrated ('Ab. Zarah 38b) that his adherence to Abaye caused his death. When the people of the exilarch once questioned R. Ḥiyya Parwa'ah regarding a certain halakah, he answered that Hezekiah and Bar Ḳappara had interpreted it, while R. Johanan had decided to the contrary, and that as the authorities thus stood two to one, the law would have to be interpreted according to the majority. Zebid said, however, "Do not listen to him, for Abaye decided according to R. Johanan"; whereupon the people of the exilarch forced Zebid to drink a cup of vinegar, which caused his death. R. Ḥinena b. R. Iḳa is recorded as his opponent in halakic decisions (Me'i. 19a). Zebid particularly explained to his pupils the baraitot of R. Hoshaiah or Oshaya ("bi-debe R. Osha'ya"; 'Ab. Zarah 6b, 56a; B. M. 92b; *et passim*).

2. Contemporary of the preceding, and generally called Zebid of Nebardea (Ḳid. 72b; comp. Rashi *ad loc.*). He was for eight years head of the yeshibah of Pumbedita; and among his pupils were Amemar, Huna b. Nathan, and R. Kahana (Ḳid. l.c.; B. M. 73b; Yeb. 18b; and elsewhere). At his

death R. Kahana delivered his funeral oration at Pum Nahara (M. Ḳ. 27b).

**ZEBU'IM**. See HYPOCRISY.

**ZEBULUN**: The sixth son of Leah (Gen. xxx. 20), and hence the name of the tribe descended from him (Num. i. 9, vii. 24, x. 16; Ps. lxxviii. 28 [A. V. 27]). In the division of the land Zebulun was assigned districts north of Issachar (Josh. xix. 11) and west and south of Naphtali (*ib.* verse 34) and east of Asher (*ib.* verse 27). Still, Gen. xlix. 13 and Deut. xxxiii. 18 *et seq.* suggest that Zebulun must have possessed also territory bordering on the sea; and, indeed, the boundaries detailed in Josh. xix. are unintelligible. Zebulun's possessions were not extensive, but were fertile and were crossed by important roads from the Jordan to the Mediterranean. This fact explains the reference to Zebulun's commerce with other clans, even such as were not Hebrews ("ammim"; Deut. xxxiii. 19; see Josephus, "Ant." v. 1, § 22), with whom at Mount TABOR Zebulun entered into commercial covenant relations (Deut. l.c.) = "zibhe-zedek" allusion to which the author of the verse seemingly recognizes by assonance in the name "Zebulun" (with "zebah"). Reported as rather populous while in the wilderness (Num. i. 30, xxvi. 26), Zebulun seems later to have had within its borders numerous Canaanites (Judges i. 30; Isa. viii. 23). Its prowess is mentioned in the song of Deborah (Judges v. 14, 18; comp. *ib.* iv. 6, 10; vi. 35). One of the judges, Elon, is said to have been of the tribe (Judges xii. 11). It is probable that Zebulun at a comparatively early period was incorporated in Issachar or Asher (see omission of Zebulun in I Kings iv., xv. 20; II Kings xii. 18). The territory was annexed to the Assyrian empire in 734-733 by Tiglath-pileser. E. G. H.

**ZECHARIAH**: One of the Minor Prophets, to whom is attributed the collection of prophecies and apocalyptic visions constituting the book bearing his name. He was a son of Berechiah and a grandson of Iddo (Zech. i. 1), and was loosely called the son of Iddo (Ezra v. 1, vi. 14); the latter was possibly identical with the Iddo mentioned as high priest in Neh. xii. 4, which would make the prophet himself the high priest named in Neh. xii. 16. Zechariah was probably born during the Captivity, but was brought back early to Palestine. He began his prophetic ministry in the second year of King Darius Hystaspes, a little later than HAGGAI (Zech. i. 1; Hag. i. 1), his preoccupation being the rebuilding of the Temple. According to the contents of that part of the book which without doubt is by him (i.-viii.; see ZECHARIAH, BOOK OF—CRITICAL VIEW), Zechariah received YHWH's messages largely through the medium of visions (i. 8; ii. 2, 5; and elsewhere), which excited his curiosity, and which, in answer to his inquiries, were interpreted to him as significant monitions bearing on the condition of the colony and the timeliness of proceeding with the rearing of the sanctuary (i. 16, ii. 14). He appeals for loyalty on the part of Joshua the high priest toward the Messianic prince, the "Branch" (iii. 8) or ZERUBBABEL (iv. 9). As the mediator of his visions, the

prophet names an angel of **YHWH**, called sometimes "the" angel, and it is he who introduces also "the" **SATAN** in the rôle of a mischief-maker confirming the people's hesitation and discouraged mood (iii. 1, 2). His method thus borders on the apocalyptic. His style is not lacking in directness in some passages, but in others it leans toward involved obscurity. Zechariah, however, proves himself to be an uncompromising critic of the ritual substitutes for true piety, such as fasting and mourning (vii. 5); and he reiterates the admonitions for mercy and righteousness, which according to the Prophets constitute the essence of the service of **YHWH** (vii. 8, 9). For neglect of this service Israel was visited with the sufferings that befell it (vii. 13, 14). Jerusalem is to be called the city of truth (viii. 3), and shall dwell in peace, so that old men and old women shall be found in its streets (verse 4), together with boys and girls (verse 5), and prosperity shall abound in the land (verses 7 *et seq.*).

While Zechariah lacks originality, he is distinguished from his contemporaries by the "gift of plain speech" (G. A. Smith). But while some of the obscurities and repetitions which mark his visions are probably due to other hands, there remain enough of these defects that come from him to indicate that the visions were not the spontaneous outflow of ecstasy, but the labored effort of a strained and artificial imagination. He was a prophet, but of a period when prophecy was rapidly running to its own extinction. E. G. H.

**ZECHARIAH, BOOK OF.**—**Biblical Data:** Prophetic book composed of fourteen chapters; the eleventh in the order of the Minor Prophets, following Haggai and preceding Malachi. Ch. i.-viii. comprise three prophecies: (1) an introduction (i. 1-6); (2) a complex of visions (i. 7-vi.); and (3) the seed of Peace (vii.-viii.).

(1) The introduction, dated in the eighth month of the second year of King Darius, is an admonition to repentance addressed to the people and rendered impressive by reference to the consequences of disobedience, of which the experience of the fathers is a witness.

(2) This introductory exhortation is followed on the twenty-fourth day of the month of Shebat by eight symbolic visions: (a) angel-horsemen (i. 7-17);

(b) the four horns and the four smiths

**Contents.** (i. 18-21 [English], ii. 1-4 [Hebrew]);

(c) the city of peace (ii. 1-5 [English]);

(d) the high priest and the Satan (iii.); (e) the Temple candlestick and the olive-trees (iv.); (f) the winged scroll (v. 1-4); (g) the woman in the barrel (v. 5-11); (h) the chariots of the four winds (vi. 1-8). To these is added a historical appendix, in which the prophet speaks of the divine command to turn the gold and silver offered by some of the exiles into a crown for Joshua (or Zerubbabel?), and reiterates the promise of the Messiah (vi. 9-15).

(3) The next two chapters (vii.-viii.) are devoted to censuring fasting and mourning (vii.) when obedience to God's moral law is essential, and to describing the Messianic future.

Ch. ix.-xiv. contain:

(1) A prophecy concerning the judgment about to

fall upon Damascus, Hamath, Tyre, Zidon, and the cities of the Philistines (ix.).

(2) Exhortation of the people to seek help not from **TERAPHIM** and diviners but from **YHWH**.

(3) Announcement of war upon unworthy tyrants, followed by an allegory in which the faithless people is censured and the brotherhood between Israel and Judah is declared to be at an end; fate of the unworthy shepherd (xi.). To this chapter xiii. 7-9 seems to belong, as descriptive of a process of purification by the sword and fire, two-thirds of the people being consumed.

(4) Judah versus Jerusalem (xii. 1-7).

(5) Results, four in number, of Jerusalem's deliverance (xii. 8-xiii. 6).

(6) The judgment of the heathen and the sanctification of Jerusalem (xiv.).

—**Critical View:** Inspection of its contents shows immediately that the book readily divides into two parts; namely, i.-viii. and ix.-xiv., each of which is distinguished from the other by its method of presenting the subject and by the range of the subject presented. In the first part Israel is the object of solicitude; and to encourage it to proceed with the rearing of the Temple and to secure the recognition of Zerubbabel and Joshua are the purposes of the prophecy. Visions, which are described and construed so as to indicate **YHWH**'s approval of the prophet's anxiety, predominate as the mediums of the prophetic message, and the lesson is fortified by appeals to Israel's past history, while stress is laid on righteousness versus ritualism. The date is definitely assigned to the second year of King Darius Hystaspes. The historical background is the condition which confronted the Jews who first returned from the Exile (see, however, Koster's "Herstel von Israel," 1894). Some event—according to Stade, the revolt of Smerdis; but more probably the second conquest of Babylon under Darius—seems to have inspired buoyant hopes in the otherwise despondent congregation in Jerusalem, thus raising their Messianic expectations (Zech. ii. 10 [A. V. 6] *et seq.* vi. 8) to a firm belief in the reestablishing of David's throne and the universal acknowledgment of the supremacy of **YHWH**. Angels and Satan are intermediaries and actors.

In the second part the method is radically different. Apocalyptic visions are altogether lacking, and historical data and chronological material are absent. The style is fanciful and contains many obscure allusions. That the two parts are widely divergent in date and authorship is admitted by all modern critics, but while there is general agreement that the first part is by the prophet Zechariah, no harmony has yet been attained concerning the identity or the date of the second part.

Many recent commentators regard the second part as older than the first, and as preexilic in date. They would divide it, furthermore, into at least two parts, ix.-xi. and xii.-xiv., the former by an author contemporary with Amos and Hosea. This assignment is based on the facts that both Israel and Judah are mentioned, and that the names of Assyria, Egypt, and the contiguous nations are juxtaposed, much as they are in Amos. The sins censured are false

prophecy and idolatry (xiii. 1-6). This group of chapters (xii.-xiv.), containing the denunciations familiar in all preexilic prophets, is regarded as later than the other division, since only Judah is mentioned. It is therefore assigned to the period after the fall of the Northern Kingdom, and more specifically, on account of xii. 11, to the last days of the Southern Kingdom after the battle of Megiddo and the death of King Josiah.

Other scholars have argued with much plausibility for the hypothesis that the second part belongs to a very late period of Jewish history.

**Date of the** In the first place, the theology (see **Second Eschatology**) of these chapters shows tendencies which are not found in Amos, Hosea, Isaiah, or Jeremiah, but are due to Ezekiel's influence, such as the war on Jerusalem preceding the Messianic triumph. Again, the Temple service (xiv.) is focal even in the Messianic age, and this suggests the religious atmosphere of the Sadducean and Maccabean theocracy with Zion as its technical designation. A mixture of races is also mentioned, a reminiscence of conditions described by Nehemiah (Neh. xiii. 23 *et seq.*), while deliverance from Babylonian exile underlies such promises as occur in ix. 12. The advent of a king is expected, though as yet only a Davidic family is known in Jerusalem (xii. 7, 12).

The second part of the book may thus be recognized to be a compilation rather than a unit, all its components being post-exilic in character. Two groups, ix.-xi. and xii.-xiv., are clearly indicated. The second group (xii.-xiv.) is eschatological and has no individual coloring, although from the contrast between Jerusalem and the country of Judah a situation may be inferred which recalls the conditions of the early stages of the Maccabean rebellion. The first group may likewise be subdivided into two sections, ix. 1-xi. 3 and xi. 4-17 and xiii. 7-9. The Greeks (see **JAVAN**) are described in ix. 13 as enemies of Judea, and the Assyrians and Egyptians are similarly mentioned in x., these names denoting the Syrians (**SELEUCIDÆ**) and the Ptolemies. In ix. 1-2 Damascus, Hamath, and Hadrach are seats of the Seleucid kings, a situation which is known to have existed in 200-165 B. C. The internal conditions of the Jewish community immediately before the Maccabean uprising appear in the second subdivision, where the shepherds are the tax-farmers (see **TOBIADS**; **MENELAUS**). In xi. 13 there seems to be an allusion to **HYRCANUS**, son of Tobias, who was an exception among the rapacious shepherds.

E. G. H.

**ZECHARIAH BEN ABKILUS** (**Amphikaios**): Palestinian scholar and one of the leaders of the **ZEALOTS**; lived in Jerusalem at the time of the destruction of the Second Temple. According to the Talmud, the authority which he enjoyed among the rabbis of Jerusalem was the cause of the downfall

of the city. Zechariah was present at the banquet famous for the affair of **ḲAMZA** and **BAR ḲAMZA** (comp. Josephus, "Vita," § 10); and though his influence might have prevented the disgrace of Bar Ḳamza, he did not exercise it. Again, when the emperor sent a blemished calf as an offering to the Temple, the Hillelites would have accepted it to frustrate Bar Ḳamza, had not Zechariah, acting in the interest of the school of Shammai, given a casting vote, or (according to Lam. R. iv. 2) refrained from voting, and thus rendered the decision negative. The people wished to kill Bar Ḳamza so that he should not be able to tell the emperor of the refusal, but Zechariah once more restrained them from carrying out their design. R. Johanan, on the other hand, or, according to another source, R. Jose, declared that the humility of Zechariah b. Abkilus, in refusing to cast his vote, caused the destruction of the Temple (Git. 56a; Tosef., Shab. xvi. [xvii.] 6; Lam. R. iv. 2). He is recorded as following neither the Bet Hillel nor the Bet Shammai with regard to holding date-stones on the Sabbath (Shab. 143; Tosef., Shab. l.c.). He is probably referred to by Josephus ("B. J." ii. 17, §§ 2-3).

M. SEL.—K.

**ZECHARIAH BEN JEHOIADA**.—**Biblical Data:** A reforming priest who lived under King Joash of Judah. He reproved the idolaters, announcing God's judgment against them; and a conspiracy was formed against him that resulted in his being stoned in the court of the Temple at the command of the king, who "remembered not the kindness which Jehoiada his father had done to him" (II Chron. xxiv. 22). Zechariah's dying words were: "YHWH look upon it, and require it" (*ib.* verses 20-22).

E. G. H.

B. P.

—**In Rabbinical Literature:** According to the Rabbis, Zechariah was the son-in-law of the king, and, being also a priest, prophet, and judge, he dared censure the monarch. He was killed in the priests' courtyard of the Temple on a Sabbath which was likewise the Day of Atonement. Later, when **NEBUZAR-ADAN** came to destroy the Temple, Zechariah's blood began to boil. The Assyrian asked the Jews what that phenomenon meant, but when they replied that it was the blood of sacrifices, he proved the falsity of their answer. The Jews then told him the truth, and Nebuzar-adan, wishing to appease Zechariah's blood, slew in succession the Great and Small Sanhedrins, the young priests, and school-children, till the number of the dead was 940,000. Still the blood continued to boil, whereupon Nebuzar-adan cried: "Zechariah, Zechariah! for thee have I slain the best of them; wouldst thou that I destroy them all?" And at these words the blood ceased to effervesce (Git. 57b; Sanh. 96b; Lam. R. iv. 13).

M. SEL.

**ZECHARIAH HA-KOHEN:** Greek or Turkish Biblical commentator and liturgical poet of the fifteenth century; maternal grandfather of Menahem ben Moses Tamar. According to the latter ("Tanhumot El," ch. x.), Zechariah wrote a pamphlet

("kontres") in which he refutes Nahmanides' strictures on Ibn Ezra's commentary on the Pentateuch, citations from which relating to the weekly lesson Wayiggash are made by Menahem in his commentary on Ruth. Hebrew MS. No. 249, 1 of the Vatican Library is a work by a certain Zechariah ha-Kohen refuting Nahmanides' strictures ("hassagot") on Maimonides' "Sefer ha-Mizvot," and its author is probably identical with the subject of this article. In this work, written in 1451, Zechariah is styled "the philosopher." He wrote two "tahanunim" beginning respectively "Anan adon 'olam" and "Zebah u-min-hah ne'edaru," both to be recited on Rosh ha-Shanah before the blowing of the shofar; and he produced also a metrical poem beginning "Be-'ikkarim ye-karim la-bekarim," on the thirteen Articles of Faith, all the words riming in פִּי. Moreover, a manuscript formerly in the possession of Osias Schorr contains several poems by Zechariah ha-Kohen. One poem beginning "Torat emet amun" and published by Schorr (in "He-Ḥaluz," ii. 162) and by Geiger (in his "Jüdische Dichter," p. 28, Hebr.) is also Zechariah's, although both scholars, misled by a difference in handwriting, ascribed it to another poet.

**ZECHARIAH MENDEL BEN ARYEH LÖB:** Polish Talmudist of the eighteenth century; a native of Cracow, and in later life chief rabbi and head of the yeshibah at Belz, Galicia. He was the author of "Be'er Heteb," a well-known commentary on the Shulhan 'Aruk, Yoreh De'ah, and Ḥosben Mishpat (first edition of the first part, Amsterdam, 1754; of the second, *ib.* 1764); the work is principally a compendium of the "Sifte Kohen" and "Ture Zahab."

**BIBLIOGRAPHY:** Azulai, *Shem ha-Gedolim*, ii., s.v. *Be'er Heteb*; Fuenn, *Keneset Yisrael*, p. 318.

J.

M. SEL.

**ZECHARIAH MENDEL BEN ARYEH LÖB:** Galician and German preacher and scholar; born at Podhaice in the early part of the eighteenth century; died at Frankfort-on-the-Oder Dec. 20, 1791. He was of the same family as Solomon Luria and Moses Isserles, who traced their genealogy to Rashi. Zechariah Mendel's principal teacher was Jacob Joshua, author of "Pene Yehoshua." Zechariah Mendel was preacher in the Talmud Torah at Frankfort-on-the-Oder. He left many writings, of which only the following three have been published (at Frankfort-on-the-Oder): "Menorat Zekaryah" (1776), a work containing novellæ on the treatise Shabbat and homilies for the Sabbath and holy days; "Zekaryah Meshullam" (1779), a sequel to the preceding work, and containing novellæ on the Talmud; "Zekaryah ha-Mebin" (1791), a guide to religious philosophy and to the knowledge of the true Cabala.

**ZECHARIAH IBN SA'ID AL-YAMANI:** Author of an Arabic version of the "Yosippon"; flourished in the tenth or eleventh century. His version exists in three recensions: (1) in several manu-

scripts which yet await thorough examination; (2) an abbreviated text printed in the Paris and London polyglots (1645, 1657) as II Maccabees ("Kitab al-Makabiyyin"), the term "Maccabees" here connoting the entire Hasmonean dynasty, since the book begins with the death of Alexander the Great and ends with the destruction of Jerusalem by Titus; and (3) an abstract printed under the title "Ta'rikh Yosippus al-Yahudi" (Beirut, 1873). According to a manuscript at Leyden (No. 1982), Ibn Ḥazm (d. 1063) was acquainted with the Arabic translation from the Hebrew. From an investigation of the Arabic version as contained in two Parisian manuscripts (No. 1906; De Siane, No. 287), Wellhausen has reached the conclusion ("Der Arabische Josippus," in "Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen," new series, i. 1-50, Berlin, 1897) that the translator was an Egyptian Jew who made his Arabic version from the Hebrew. Wellhausen believes, furthermore, that the Arabic and existing Hebrew texts have a common origin, and that the Arabic of the manuscripts is nearer to II Maccabees than to the Hebrew version; while all three are to be considered independent recensions and valueless as historical documents. Despite Wellhausen's researches, however, the relation of the Arabic "Yosippon" to the Hebrew text is a problem still unsolved. The Arabic recension was probably the source of the Ethiopic "Ziena Aihud" (comp. Goldschmidt, "Die Aethiopischen Handschriften der Stadtbibliothek zu Frankfurt-am-Main," pp. 5 *et seq.*, Berlin, 1897; Wright, "Catalogue of Ethiopic Manuscripts in the British Museum," No. ccclxxviii.).

**ZECHARIAH BEN SOLOMON ZEBSEL (= "Shabbethai") ASHKENAZI:** German Talmudist of the sixteenth century; rabbi of the Ashkenazic community at Jerusalem, where he died. He was the father-in-law of Joseph Caro, who speaks of him as of one well versed in rabbinics (Joseph Caro, "Abkat Rokel," No. 29). His signature has been found with that of David b. Zimra under a halakic decision (*ib.* No. 115). In 1565 a case of ḥalīzah was the occasion of a controversy between Zechariah and his companions on the one side and David b. Zimra on the other. The brother of the deceased, an Ashkenazic Jew who lived in Palestine and who already had a wife, married the widow instead of performing the rite of ḥalīzah, which was contrary to the Ashkenazic custom; and Zechariah and his companions put him under the ban. David b. Zimra, on the contrary, argued that as the man lived in a country where polygamy was not forbidden, the Ashkenazic rabbis had no right to excommunicate him. The other Sephardic rabbis, however, declared that Zechariah and his companions were right ("Bet Yosef," Hilkot "Yibbum wa-Ḥalīzah").

**ZEDAḲAH BOX:** A receptacle in which voluntary charitable contributions are deposited. The

earliest mention of such a device is in connection with Jehoiada the priest, who prepared a chest with a hole in the lid and placed it beside the altar opposite the general entrance at the south side of

Wooden Zedakah Box in the Synagogue at Lutomiensk, Russia.

(From Bersohn, "Kilka Slov.")

provided with sets of charity boxes, each bearing an inscription designating the purpose for which the money was collected. Among these boxes were one for "bedek ha-bayit" (repairs of the synagogue), one for candles in the bet ha-midrash, a third for the Talmud Torah, a fourth for "malbish

the Temple; in this chest all contributions were deposited to form a fund for repairing the sacred edifice (II Kings xii. 10). According to the Mishnah, there were in the Second Temple thirteen boxes shaped like a horn ("shofar"), being broad at the bottom and narrow at the top, where the coins were dropped in. The money placed in them was used for different sacrifices in the Temple and for charitable purposes. In later times the charity box was called "kuppah shel zedakah," *i.e.*, charity basket, or receptacle for the communal fund contributed to provide sustenance for the poor every Friday (Pe'ah viii. 7; B. B. 8b).

From time immemorial the synagogue and bet ha-midrash were

Zedakah Box.

(Designed by Leo Horowitz.)

"arummim" (= "to clothe the naked," *i.e.*, to provide clothing for the poor), and a fifth for "gemilat hasadim" (loans without interest to the poor). One special box was marked "mattan ba-seter" (= "a gift in secret"; comp. Prov. xxi. 14), in which large sums were often placed by anonymous donors, who some-

times specified how the money should be distributed. The charity boxes were under the supervision of a board of trustees called "gabba'in." A charity box is carried in front of a funeral by the shammas (beadle), who recites "Zedakah tazzil mi-mawet" (= "Righteousness [charity] delivereth from death"; Prov. x. 2). Charity boxes are also placed in private houses for the support of the yeshivot, hospitals, orphan asylums, etc., of the Holy Land, the funds being collected by the meshullahim of the various institutions. See CHARITY; HALUKKAH.

J. D. E.

**ZEDEK, JOSEPH KOHEN** - : Austro-English rabbinical scholar and preacher; born in Lemberg 1827; died in London 1903. His family claimed to trace its ancestry back to the exilarchs through Solomon Luria and Moses Isserles. Zedek was instructed by Joseph Saul Nathansohn, chief rabbi of Lemberg, and attended also the yeshibah of Joseph Yekeles, rabbi of Yavorov. While at Lemberg he produced a number of Hebrew poems of a patriotic character, and edited a volume of collectanea in honor of Sir Moses Montefiore, entitled "Neweh Tehillah" (Lemberg, 1869). He likewise edited at Lemberg the Hebrew periodicals "Meged Yerahim" (1855-57), "Ozar Hokmah" (1859-65), and "Ha-Yehudi ha-Nizhi" (1866). Zedek was a fluent preacher in Hebrew, and occupied temporary positions at Cracow and Altona, as well as at Frankfort-on-the-Main, where he issued the first numbers of another Hebrew periodical, "Or Torah" (1874). He went to London in 1875, and in that city he published the following works: "Mussar Haskel" (1878), a collection of his sermons; "Or Hadash" (1881); "Ha-Torah weha-Mizwah" (1884); and a collection of responsa entitled "Urim we-Tummin." He moreover edited Joseph Cohen's "Dibre ha-Yamim" (1859), Kalonymus' "Eben Bohan" (1865), and a curious account of a blood accusation at Granada in 1845 under the title "Ohole Shem" (London, 1883). During his later years this scholar collected a mass of material for a biographical and literary history of English rabbis, and published a volume of "Biographical Sketches of Eminent Jewish Families" (*ib.* 1897).

**ZEDEKIAH**: 1. One of the four hundred prophets (I Kings xxii. 11, 24, 25) whom Ahab summoned to inquire of them before Jehoshaphat whether he should attack the Syrians in battle at Ramoth-gilead. Zedekiah appeared as a rival of Micaiah, whom Ahab always feared, and who on this occasion ironically foretold Israel's defeat. Zedekiah struck him on the cheek because he explained by a figure that the words of the four hundred prophets were inspired by a lying spirit. Micaiah's reply was that his rival should see a verification of the adverse prophecy with his own eyes.

2. One of the evil men of Israel in the Captivity, whose false utterances and immoral acts aroused even Nebuchadnezzar, King of Babylon, to such a pitch of wrath that he ordered them to be roasted in the fire (Jer. xxix. 21-23), probably in some such fiery furnace as that mentioned in Daniel.

3. The last king of Judah. He was the youngest

son of Josiah and full brother of Jehoahaz (II Kings xxiii. 31, xxiv. 18), the first son of Josiah to reign, who was carried captive to Egypt by Pbarah-Necho in 608 B.C. (*ib.* xxiii. 33). Zedekiah's real name was "Mattaniah" (*ib.* xxiv. 17), but Nebuchadrezzar, who enthroned him (in 597) in the place of the rebellious and captive Jehoiachin, his nephew, changed it to "Zedekiah" (= "righteousness of Jah"). The new king assumed the throne under the sovereignty of Nebuchadrezzar; and an abundance of material descriptive of the events of his reign is furnished in II Kings (xxiv. 17-xxv. 7), in II Chronicles (xxxvi. 10-21), and in more than a dozen chapters of Jeremiah. The eleven years of Zedekiah's reign were notable for a steady decline in Judah's power and for the desperate efforts of Jeremiah to avert the coming disaster. As a ruler he was pliant in the hands of his princes and of Jeremiah, yielding readily to the influence of any adviser, whether prince or prophet. He made a journey to Babylon in the fourth year of his reign to assure Nebuchadrezzar that he would stand by his oath (Jer. li. 59); but the undying ambitions of the Egyptian kings kept turning toward Asia, and Zedekiah, with his usual wavering policy, could no longer resist the persuasions of Hophra (Apries), King of Egypt (589-569 B.C.), and in 588 B.C. broke off his allegiance to Nebuchadrezzar. This brought the Babylonian army against Jerusalem; but it had no sooner settled down to a siege than Judah's Egyptian ally appeared from the southwest. The Babylonians hastily raised the siege and gave Hophra's army such a blow that it retired to the land of the Nile. The siege of Jerusalem was then resumed, and after an investment of one and one-half years the walls yielded. Zedekiah and his retinue escaped through some hidden gate and fled toward the Jordan; but the Babylonians overtook him on the plains of Jericho, and carried him captive to the King of Babylon, whose headquarters were at Riblah. Here Zedekiah's sons, heirs to the throne, were slain in his presence, his own eyes were put out, and he was bound with fetters and taken to Babylon as an ignominious rebel prisoner. As a result of his conspiracies Jerusalem was taken, plundered, and burned; its best population was deported to Babylon as captives: the Jewish kingdom perished; and Israel ceased to exist as an independent nation. Zedekiah passed the remainder of his days in a Babylonian dungeon.

**ZEDEKIAH BEN ABRAHAM.** See ANAW, ZEDEKIAH BEN ABRAHAM.

**ZEDEKIAH BEN BENJAMIN:** Italian Talmudist and liturgist; lived in Rome in the thirteenth century; died after 1280; elder cousin of Zedekiah b. Abraham ANAW, by whom he is often quoted in the "Shibbole ha-Lešet." Zedekiah b. Benjamin was a pupil of Meir b. Moses at Rome; and he later went to Germany and studied under the tosafist Abigdor b. Elijah ha-Kohen, whom he often consulted afterward ("Shibbole ha-Lešet," i. 266, ii. 40). Abraham of Pesaro speaks of Zedekiah as his companion (*ib.* ii. 6). As Abraham Abulafia mentions one Zedekiah among his disciples and fol-

lowers, certain scholars suppose that this was Zedekiah b. Benjamin. He was the author of several *selihot* found in MS. No. 42 of the Foa collection.

**ZEDERBAUM, ALEXANDER OSSYPOVITCH:** Russian Hebrew journalist; born in Samostye, Lublin, 1816; died in St. Petersburg 1893; founder and editor of "Ha-Meliz," and other periodicals published in the Russian and Yiddish languages. A son of poor parents, he was in his early youth apprenticed to a tailor, but through energy and assiduity he succeeded in acquiring a knowledge of Hebrew literature, and of the Russian, Polish, and German languages. He married in Lublin, and in 1840 left his native town for Odessa, then the "Mecca" of the HASKALAH movement. He obtained there a commercial position, made the acquaintance of the Maskilim of the city, and in his leisure hours continued to work for his self-education. Later he opened a clothing-store, and was himself cutter in his tailoring-shop.

In 1860 Zederbaum succeeded in obtaining the government's permission to publish "Ha-Meliz," the first Hebrew periodical issued in Russia; and three years later he began publishing the pioneer Yiddish journal "Kol Mebasser." After an existence of eight years the latter paper was suppressed by the government, whereupon Zederbaum went to St. Petersburg, obtaining permission to transfer the headquarters of "Ha-Meliz" to that city. He was also granted permission to do his own printing, and to publish, besides "Ha-Meliz," a Russian weekly ("Vvestnik Ruskich Yedred"), which, however, enjoyed only a short existence, as did also the "Razsvyet," which he started a few years later. In 1881 he founded the "Volksblatt," a daily Yiddish journal which existed for eight years, although Zederbaum was its editor for only a few years.

Zederbaum was the author of "Keter Kehunnah" and "Ben ha-Mezarim," but neither of these works met with any success. His chief significance lies in the fact that he was a champion of the Haskalah. His Yiddish periodical "Kol Mebasser" offered an opportunity for many of the best jargon-writers to develop their talents; and among these may be mentioned Linetzky, Abramowitch, Spector, and Sholem Aleichem.

Zederbaum exercised considerable influence in government circles, and it was due to his intercession that an impartial judgment was obtained for many Jewish families accused of ritual murder in Kutais; he disclosed also the ignorance of the Russian anti-Semite Lutostansky, whose pamphlets threatened to become dangerous for the Russian Jews. The Palestine Association of Odessa, which aids the Jewish colonists in Syria and Palestine, owes its existence to Zederbaum's activity.

S. HU.

**ZEDNER, JOSEPH:** German bibliographer and librarian; born at Gross-Glogau Feb. 10, 1804; died at Berlin Oct. 10, 1871. After completing his

education, he acted as teacher in the Jewish school in Strelitz (Mecklenburg), where the famous German lexicographer Daniel Sanders was his pupil. In 1832 he became a tutor in the family of the bookseller A. Asher in Berlin, and later engaged in the book-trade himself; but being unsuccessful he accepted in 1845 a position as librarian of the Hebrew department of the British Museum in London, where he remained till 1869, when ill health compelled him to resign and to retire to Berlin, where he spent the last two years of his life. Shortly after his appointment, the British Museum acquired the library of the bibliophile Heimann J. Michael of Hamburg, which Zedner catalogued.

Zedner was the author of the following works: "Auswahl Historischer Stücke aus Hebräischen Schriftstellern vom Zweiten Jahrhundert bis in die Gegenwart, mit Vocalisiertem Texte, Deutscher Uebersetzung, und Anmerkungen" (Berlin, 1840); "Catalogue of the Hebrew Books in the Library of the British Museum" (London, 1867); and "Ein Fragment aus dem Letzten Gesange von Reineke Fuchs" (Berlin, 1871), a poetical satire on Napoleon III. He contributed to Asher's edition of the Travels of Benjamin of Tudela (London, 1840), and wrote poems on two collections of portraits ("Ehret die Frauen," and "Edelsteine und Perlen," Berlin, 1836-45). While in London, he published a second edition of Ibn Ezra's commentary on the Book of Esther, to which he wrote an introduction entitled "Wajosef Abraham."

**BIBLIOGRAPHY:** Steinschneider, in *Magazin für die Literatur des Auslandes*, 1871, No. 44, abstracts of which are given in *Allg. Zeit. des Jud.* 1871, pp. 116-118, and in *Generalanzeiger für die Gesammten Interessen des Judentums*, Berlin, Feb. 22, 1904.

D.

**ZEEBI, ISRAEL:** Prominent Talmudist; son of Benjamin Zeebi, and on his mother's side a grandson of Abraham Azulai; born at Hebron in 1651; died in 1731. Benjamin dying when Israel was but four years old, the latter was educated by his mother; and at the age of eighteen he married a daughter of Abraham Cuenqui (see Grätz, "Gesch." x. 463, note 6). For about thirty years he officiated as chief rabbi of Hebron. It is said that he was a partizan of Nehemiah Hiyya Hayyun. He corresponded with Abraham Yizhaki, Moses Hayyun, Ephraim Nabon, Jeshua Shababo, and other authorities. Zeebi's full name was Abraham Israel; the first prænomen he seems to have assumed in later years, probably after an illness. At his death he left one son, Isaac, who published at Smyrna in 1758 "Urim Gedolim," a volume of responsa, and "Or la-Yesharim," a collection of homilies, both works being by his father.

**BIBLIOGRAPHY:** Azulai, *Shem ha-Gedolim*, s.v. Abraham, Azulai, and Israel Zeebi.

E. C.

L. GRÜ.

**ZE'ENAH U-RE'ENAH** or **TEUTSCH HÜMESH:** Judæo-German paraphrase of the Pentateuch, the Haftarat, and the Five Megillot, written by Jacob b. Isaac of Janow, who flourished in the sixteenth and seventeenth centuries. The work is enriched with many haggadot taken either directly from the Midrash or from such homiletic commentaries as the "Toledot Yizhak," "Zeror ha-Mor,"

"Hazequni," and others. Very often the weekly lesson begins with a verse from Proverbs and is supplemented by extracts from the commentary of Bahya b. Asher and narratives found in various midrashim and other "Ma'aseh" collections. It is very likely that such a paraphrase was originally entitled "Teutsch Humesch," as it is still often called; but as the first printer placed on the title-page as a motto the words of Capt. iii. 11: "Ze'enah u-re'enah benot Ziyyon" (= "Go out and see, ye daughters of Zion"), and as the book was particularly intended for use by women, it came to be known by the first two words of this motto. Although a work of this kind had been compiled previously by ISAAC B. SAMSON HA-KOHEN at Prague, yet the "Ze'enah u-Re'enah" of Jacob b. Isaac far surpassed it in popularity, and it has continued until the present to be the most favored literary work with Jewish women. Neither the date nor the place of the first edition can be determined with certainty, but the edition of Cracow, 1620, seems to have been the second, and two years later the book was reedited in Basel, which shows that the editions were soon exhausted. Since then it has been very often reedited, and in the later editions (from that of Amsterdam, 1711, onward) there were added the Targum of Shir ha-Shirim in Judæo-German by Issachar Bermann ha-Koben, and Targum Shenai in Judæo-German by Simeon ben Meshullam. John Saubert translated into Latin the first parashah or Bereshit (Helmstedt, 1660; reproduced by Wolf in "Bibl. Hebr." iii. 474 *et seq.*), and Alexandre Créange adapted from it his "La Semaine Israélite, ou le Tseena Ourena Moderne," etc. (Paris, 1846). As to Jacob b. Isaac, the author, Steinschneider thinks ("Cat. Bodl." col. 1216) that he died at Janow shortly before 1623. Jacob b. Isaac wrote besides: "Sefer ha-Maggid" (Prague, 1576), a work of the same kind as the "Ze'enah u-Re'enah," and treating of the Prophets and the Hagiographa, with the exception of Chronicles; "Shoresh Ya'akov" (Cracow, 1585), a reference index for the laws contained in the Shulhan 'Aruk, Yoreh De'ah; "Meliz Yosher" (Lublin, 1622), Judæo-German homilies on the Pentateuch, being a supplement to the "Ze'enah u-Re'enah."

**BIBLIOGRAPHY:** Fürst, *Bibl. Jud.* ii. 19-20; Steinschneider, *Cat. Bodl.* cols. 1215 *et seq.*; idem, *Jewish Literature*, p. 238.

J.

M. SEL.

**ZE'ERA:** Palestinian amora of the third generation; born in Babylonia, where he spent his early youth. He was a pupil of Hisdai (Ber. 49a), of Huna (*ib.*), and of Judah b. Ezekiel in Pumbedita. He associated also with other prominent teachers of the Babylonian school, as Nahman b. Jacob (Yer. Ber. 8c), Hamnuna (Zeb. 105b; Ber. 24b), and Sheshet, who called him a great man (gabra rabba"; Yer. 66a). His love for the Holy Land led him to decide upon leaving his native country and emigrating to Palestine. This resolve, however, he kept secret from his teacher Judah, who disapproved of any emigration from Babylonia. Be-

**Love of Holy Land.** fore leaving, he spied upon Judah while the latter was bathing, and the words which he then overheard he took with him as a valuable and instructive memento (Shab 41a; Ket. 110b). A favorable dream, in which he

was told that his sins had been forgiven, encouraged him to undertake the journey to the Holy Land (Ber. 57a); and before starting he spent a hundred days in fasting, in order to forget the dialectic method of instruction of the Babylonian schools, that this might not handicap him in Palestine (B. M. 85a). His journey took him through Akrokonia, where he met Hiyya b. Ashi ('Ab. Zarah 16b), and through Sura (*ib.*). When he reached the River Jordan he could not control his impatience, but passed through the water without removing his clothes. When jeered at by an unbeliever who stood by, he answered, "Why should not I be impatient when I pursue a blessing which was denied even to Moses and Aaron?" (Yer. Sheb. 35c).

Ze'era's arrival in Palestine and his first experiences there have been recorded in various anecdotes. He was small of stature and of dark complexion, for which reason Assi called him "Black Pot" ('Ab. Zarah 16b), according to an expression current in Babylonia (comp. Meg. 14b; Pes. 88a; Ber. 50a); this name probably also contained an allusion to his sputtering manner of speech. With reference to a malformation of his legs, he was called "the little one with shrunken

**Arrival in legs,**" or "the dark, burned one with Palestine. the stubby legs" (comp. Bacher, "Ag. Pal. Amor." iii. 7, note 2). With these

nicknames is connected a legend which throws light upon Ze'era's ascetic piety (B. M. 85a). In Palestine he associated with all the prominent scholars. Eleazar b. Pedat was still living at the time (Niddah 48), and from him Ze'era received valuable instruction (Yer. Ter. 47d). His most intimate friends were Assi and Hiyya b. Abba. In his intercourse with Assi he was generally the one who asked questions; and on one occasion Assi made known his approval of one of Ze'era's questions by saying: "Right you are, Babylonian; you have understood it correctly" (Yer. Shab. 7c). Ze'era especially acknowledged the authority of Ammi, the principal of the school at Tiberias; and it is related that he asked Ammi to decide questions pertaining to religious law that had been addressed to himself (Yer. Dem. 25b; Yer. Shab. 8a; Yer. Yeb. 72d). Ze'era was highly esteemed by Abbahu, the rector at Caesarea, of whom he considered himself a pupil. He was ordained rabbi, a distinction usually denied to members of the Babylonian school; and though in the beginning he refused this honor (Yer. Bik. 65c), he later accepted it on learning of the atoning powers connected with the dignity (Sanh. 14a). His insignificant appearance was humorously referred to when at his ordination he was greeted with the words of a wedding-song: "Without rouge and without ornament, but withal a lovable gazel" (Ket. 17a).

With regard to Ze'era's private vocation, the only facts known are that he once traded in linen, and that he asked Abbahu **Social Con-** how far he might go in improving the **dition and** outward appearance of his goods with- **Family** out rendering himself liable in the **Life.** slightest degree to a charge of fraud (Yer. B. M. 9d). Information regarding his family relations is also very scanty; it is asserted that he became an orphan at an early age (Yer. Pe'ah 15c), and

that his wedding was celebrated during the Feast of Tabernacles (Suk. 25b); and he had one son, Ahabah or Ahava, who has become well known through various haggadic maxims (comp. Bacher, *l.c.* iii. 651-659).

Ze'era occupies a prominent place in the Halakah as well as in the Haggadah; with regard to the former he is especially distinguished for the correctness and knowledge with which he transmits older maxims. Among his haggadic sayings the following may be mentioned as throwing light upon his high moral standpoint: "He who has never sinned is worthy of reward only if he has withstood temptation to do so" (Yer. Kid. 61d); "One should never promise a child anything which one does not intend to give it, because this would accustom the child to untruthfulness" (Suk. 46b). On account of his lofty morals and piety Ze'era was honored with the name "the pious Babylonian." Among his neighbors were several people known for their wickedness, but Ze'era treated them with kindness in order to lead them to moral reformation. When he died, these people said, "Hitherto Ze'era has prayed for us, but who will pray for us now?" This reflection so moved their hearts that they really were led to do penance (Sanh. 37a). That Ze'era enjoyed the respect of his contemporaries is evidenced by the comment upon his death written by an elegist: "Babylonia gave him birth; Palestine had the pleasure of rearing him; 'Wo is me,' says Tiberias, for she has lost her precious jewel" (M. K. 75b).

J. Z. L.

**ZEFIRAH, HA-**. See PERIODICALS.

**ZE'IRI:** Amora of the third century; born in Babylonia. He sojourned for a long time in Alexandria, and later went to Palestine, where he became a pupil of Rabbi Johanan. In the name of Hanina b. Hama he transmitted the maxim that he who in the presence of a teacher ventures to decide a legal question, is a trespasser ('Er. 3a). He also transmitted a saying by Hanina to the effect that the Messiah would not arrive until all the arrogant ones had disappeared (Sanh. 98a). During his sojourn in Alexandria he purchased a mule which, when he led it to water, was transformed into a bridge-board, the water having lifted the spell which rested on the animal. The purchase-money was refunded to Ze'iri, and he was advised to apply the water-test thenceforth to everything he purchased, in order to ascertain whether it had been charmed (*ib.* 67b). When Eleazar arrived in Palestine he sought information from Ze'iri concerning men known in ancient traditions (B. B. 87a). Ze'iri was praised by Raba as an exegete of the Mishnah (Zeb. 43b). He was proffered the daughter of Rabbi Johanan for a wife, but refused because he was a Babylonian and she a Palestinian (Kid. 71b). Among those who transmitted in his name may be mentioned Rabbi Hilda (Ber. 43a), R. Judah ('Ab. Zarah 61b; Men. 21a), R. Joseph (Ned. 46b), R. Nahman ('Ab. Zarah 61b), and Rabbah (Ned. 46a).

J. S. O.

**ZEISEL, SIMON**: Austrian chemist; born at Lomnitz, Moravia, April 11, 1854; educated at the German gymnasium of Brünn and at the University of Vienna (Ph.D. 1879). He established himself as privat-docent for chemistry at the same university in 1887, and in 1892 was appointed assistant professor of general and agricultural chemistry at the agricultural high school of Vienna, where he became full professor seven years later (1899). In addition to monographs in technical periodicals, Zeisel is the author of "Die Chemie in Gemeinverständlicher Darstellung" (Vienna, 1890).

**BIBLIOGRAPHY**: Eisenberg, *Das Geistige Wien*, ii. 574, Vienna, 1893.

S. F. T. H.

**ZEISLER, SIGMUND**: American jurist; born at Bielitz, Austria, April 11, 1860; educated at the University of Vienna and at the Northwestern University, Chicago. He was admitted to the Chicago bar, and was associate counsel for the defense in the anarchist cases of 1886 and 1887. In 1893 he was elected chief assistant corporation counsel for Chicago, but resigned his position in 1894 on account of ill health. After traveling for several months in Europe, he returned to Chicago, where he has since been engaged in private practise. Zeisler is a prominent Democrat, and took an active part in the presidential campaigns of 1896 and 1900. He has contributed to reviews and law journals.

A. F. T. H.

**ZEISSL, HERMANN VON**: Austrian dermatologist; born at Vierzighuben near Zwittau, Moravia, Sept. 22, 1817; died at Vienna Sept. 23, 1884; educated at the University of Vienna (M.D. 1846). In 1846 he was appointed assistant in the ophthalmological, surgical, and dermatological hospitals of the University of Vienna, and four years later he established a practise and was admitted to the medical faculty of the university as privat-docent. He soon became an authority on skin-diseases and syphilis. In 1861 he was appointed assistant professor, and in 1869 he became professor and chief physician, of the second department for syphilis at the general hospital. These positions he held until his resignation in 1883. He was knighted by the Austrian emperor.

Zeissl wrote many essays for the medical journals, and was the author of the following works: "Compendium der Pathologie und Therapie der Tertiären Syphilis und Einfachen Venerischen Krankheiten" (Vienna, 1850); "Lehrbuch der Constitutionellen Syphilis für Aerzte und Hörer der Medizin" (Erlangen, 1864); "Lehrbuch der Syphilis und der mit Dieser Verwandten Oertlichen Venerischen Krankheiten" (Stuttgart, 1875); and "Grundriss der Pathologie und Therapie der Syphilis" (*ib.* 1876). The last two works have been translated into Russian, Dutch, English, and Italian.

**ZEITLIN, JOSHUA**: Russian rabbinical scholar and philanthropist; born at Shklov in 1742; died

at Kherson Aug. 18, 1822. He was a pupil of the casuist Aryeh Loeb, the author of "Sha'agat Aryeh"; and, being an expert in political economy, he stood in close relations with Prince Potemkin, the favorite of Catherine II. During the Turko-Russian war Zeitlin furnished the Russian army with various supplies, and managed that business so cleverly that he was afterward appointed imperial court councilor ("nadvorny sovyetnik").

On retiring from business Zeitlin resided on his estate Ustzia, where he was consulted by the rabbis with regard to rabbinical questions. He rendered pecuniary assistance to many Talmudists and scholars, and supported a magnificent bet ha-midrash, in which many Jewish writers were provided with all the necessaries of life, so that they could pursue their vocations without trammel of any kind. Among writers who benefited by his generosity may be mentioned: R. Nahum, author of "Tosafot Bikurim"; Mendel Lepin, author of "Heshbon ha-Nefesh"; and the physician Baruch Schick. Zeitlin was the author of annotations to the "Sefer Miẓvot Kaṭan," printed with the text (Kopys, 1820), and supplemented by some of his responsa.

**BIBLIOGRAPHY**: Fuenn, *Kiryah Ne'emanah*, p. 277; idem, *Keneset Yisrael*, p. 431.

M. SEL.

**ZEITLIN, JOSHUA B. AARON**: Russian scholar and philanthropist; born at Kiev Oct. 10, 1823; died at Dresden Jan. 11, 1888. While he was still young his parents removed to Chernobyl, where he associated with the ḤASĪDĪM, later devoting himself to the study of secular sciences as well as the Hebrew language and literature. He was married at Slutsk, where he studied for some time with Samuel Simchowitz, with whom he later engaged in business. Leaving Slutsk, Zeitlin resided for several years in St. Petersburg, and afterward settled in Moscow, where he became prominent as a benefactor of Talmudic students and Maskilim. During the Russo-Turkish war he was a contractor for the Russian army, and on Aug. 1, 1879, Czar Alexander II. awarded him a medal in recognition of his services.

In 1883 Zeitlin left Russia and settled in Dresden, where he collected a large library, which he placed at the disposal of Talmudic students. In the beginning of 1887 he undertook a journey to the Holy Land, where he celebrated the Passover. He visited Jerusalem and Hebron, and took great interest in the Jewish antiquities, as well as in the agricultural colonies of Palestine, to which he bequeathed 50,000 francs, in addition to many bequests to educational institutions.

J.

M. SEL.

**ZEITLIN, WILLIAM**: Russian scholar and bibliographer; born at Homel, government of Moghilef, about the middle of the nineteenth century. He is known especially as the author of "Kiryat Sefer," or "Bibliotheca Hebraica Post-Mendelssohniana" (Leipsic, 1891-95), a bibliographical dictionary of modern Hebrew literature from the beginning of Mendelssohn's epoch until 1890. The compilation of this work occupied Zeitlin for twenty years. He

made extensive use of Benjacob's "Ozar ha-Sefarim" and of Fürst's "Bibliotheca Judaica," and visited Wilna and Warsaw, the centers of the Hebrew book market, as well as many university cities—as Königsberg, Berlin, Geneva, and Paris—from the libraries of which he gathered additional material for his work. The "Kiryat Sefer" indexes not only works in book form, but also important periodical articles, biographical sketches, and scientific essays, in addition to giving biographical notes on several authors. Zeitlin had previously prepared an index of works written on the Jewish calendar, in which he enumerates seventy-seven Hebrew works; this index was published by Hayyim Jonah Gurland in "Yevreiski Kalendar" (St. Petersburg, 1882). In the "Zeit. für Hebr. Bibl." (ix. 3-4) Zeitlin has recently published an alphabetical list of anagrams and pseudonyms of modern Hebrew writers; and he is a contributor to several Hebrew periodicals, writing mostly biographical articles.

**ZEKOR BERIT:** A poem by GERSHOM BEN JUDAH (960-1040), the "Light of the Exile" (Zunz, "Literaturgesch." p. 239); it is chanted in the SELIHOT of the Northern rituals as the central hymn of the early penitential prayers on the eve of New-Year, to which day the hymn has given its name in familiar Jewish parlance. Other hymns with the same commencement, which bases an appeal for the redemption of the remnant of Israel on the remem-

brance of the merits of the Patriarchs, were afterward written by Kalonymus ben Judah and Samuel ben Majo (Zunz, *l.c.* pp. 255, 263), and were also adopted into some rituals. The hymn of Gershom is specially honored in the Polish ritual by being placed at the head of the extracts from the hymns in the selihot quoted in the course of the NE'ILAH service. It is there always chanted to an old air which obviously originated in western Europe, and which presents points of resemblance to some of the minnelieder of the twelfth century. The commencement of the second verse, on which the others are modeled, should be compared with the melodies transcribed under SHOFET KOL HA-AREZ.

F. L. C.

**ZELAZOWSKA, CATHERINE:** Polish convert to Judaism; born in 1460; martyred at Cracow in 1540. She was the widow of an alderman of Cracow; and at the time when, influenced by the Bible, Polish Christendom was divided into different sects, she followed the example of the daughter of Nicholas Radziwill and embraced Judaism. Peter Gamrat, Bishop of Cracow, condemned her to be burned, and, though eighty years old, she went gladly to meet a martyr's death.

**ZELOPHEHAD** (זֶלְפָחָד).—**Biblical Data:** A Manassite who in one passage is called the son of Hopher, the son of Gilead, the grandson of Manasseh (Num. xxvi. 29–33), and in another is set down as the second son of Manasseh (I Chron. vii. 15). The etymology of the name is very doubtful; some scholars think that the root is Syriac and means "first rupture," indicating that he was a first-born son (comp. ZELOPHEHAD in RABBINICAL LITERATURE). But the Septuagint *Σαλπαάδ* or *Σαλφαάδ* (B in Chron., *Σαλφαάδ*) shows that the Hebrew was vocalized זֶלְפָחָד (= "the shadow [or "protection"] of terror"). Zelophehad died in the wilderness and left five daughters, who subsequently claimed the inheritance of their father. Knowing that those who took part in the revolt of Korah were exceedingly objectionable to Moses, Zelophehad's daughters argued that their father was not of Korah's assembly, but that he "died in his own sin." Moses consulted YHWH about the matter, and was ordered to satisfy the daughters' demand. Thus after the conquest of the land under Joshua, Zelophehad's daughters obtained their father's lot (Num. xxvii. 1–7, xxxvi. 2–12; Josh. xvii. 3).

M. SEL.

—**In Rabbinical Literature:** Zelophehad and his father, Hopher, were among those who went out from Egypt, and consequently each of them had his part in the land. Zelophehad, as the first-born

son, had two parts in his father's lot, so that his daughters inherited "three shares" in the land (Sifre, Num. 133; B. B. 116b; Num. R. xxi. 13). The Rabbis interpret Num. xxvii. 3 as meaning that Zelophehad was not among those who murmured against God (Num. xi. 1 *et seq.*), nor among those who revolted against Him at the time of the spies (*ib.* xiv. 1 *et seq.*), nor of the company of Korah; for none of these three classes had a part in the land (Sifre, *l.c.*; B. B. 18b). The Rabbis, however, do not agree as to whether Zelophehad himself was a good man; for while he was righteous according to the anonymous opinion of the Sifre, R. Nathan concludes that he was wicked (Sifre, *l.c.*). In any case, the words "died in his own sin" (Num. xxvii. 3) are interpreted as meaning that while he did not induce others to sin, he himself sinned, for which he was punished. According to R. Akiba, Zelophehad was the man who was stoned to death for gathering sticks upon the Sabbath-day (Num. xv. 32–36), while according to Judah b. Bathyra, he was one of those who "presumed to go up unto the hilltop," and who were smitten by the Amalekites and Canaanites (*ib.* xiv. 44–45; Sifre, Num. 113, 133; Shab. 96b). As both events took place in the second year after the Exodns, the youngest of Zelophehad's daughters at the time they claimed their father's inheritance was at least forty years old. They were not yet married (comp. Num. xxxvi. 6, 11) because they had been waiting for men suitable to be their husbands (B. B. 119b).

han 'Aruk, Orah Hayyim, 293, 1), and that the departing Queen Sabbath might be escorted on her way with protracted song (comp. Zohar, p. 208a). These collections of hymns are still published in such old-fashioned prayer-books as the one containing the "Derek ha-Hayyim" of JACOB BEN JACOB MOSES OF LISSA. The authors are among the latest of the payyetanim, and the only early medieval hymn in the collections is the "Baruk Adonai Yom Yom" of SIMEON B. ISAAC B. ABUN.

Even later in origin than the hymns are the melodies. Indeed, the ordinary head of a household could scarcely be expected to do more than repeat in the domestic circle the folk-songs which he heard in the workaday world outside. With the growing elaboration of the florid chant of the *hazan*, it would be difficult for the children at the table even to approximate the intricate ornamental vocalization heard in the synagogue; nor

**Melodies.** would they be able to analyze the intonations and detect the basis on which they were constructed. Jewish characteristics are manifested chiefly in occasional phrases of synagogal character in which the traditional melody diverges from its folk-song model (comp. EN KELOHENU). It was the introduction of these occasional Hebraic phrases into the popular melodies of Gentile neighbors which Chopin deplored when he wrote (F. Niecks, "Chopin," i. 183): "Poor Polish airs! you do not in the least suspect how you will be interlarded with *Majufes*" (the Judæo-Polish pronunciation of "Mah Yaft," the opening words of a hymn by Mordecai ben Isaac for the eve of the Sabbath, one of the most popular zemirot). The most wide-spread melodies for the zemirot are those short phrases introduced into the chanting of the grace after meals when three or more adult males are present (comp. 'AL HET). They are South-German in origin, and recall many of the snatches of tune built into the fabric of the Passover home-service. Even

where other zemirot are not sung, the psalm preceding the grace is at least chanted. One of the best-known melodies for it is here transcribed. Its instrumental model may perhaps be identified in a violin composition of the eighteenth century.

When the whole collection of zemirot is used, they are not chanted to definite melodies, but are read in a sort of cantillation (comp. OREN), and where a selection is made, the most frequent air is a German melody employed either with the "Yom Zeh le-Yisrael" of Isaac LURIA or with the anonymous "Zur mi-Shello Akaluu."

A favorite melody, often used with "Mah Yaft," may be added as an example of the Sabbath-melody popular among the HASIDIM of southern Poland and Galicia. Together with the melody which follows it, it was first transcribed by Lewandowski (comp. his "Hebräische Melodien," op. 32, Berlin, 1882) as typical of its class.

The Hasidim affect the chanting both of zemirot and of "songs without words," or melodies set to meaningless sounds; nor are these cantillations restricted to the Sabbath table, since they aim at expressing the joy of the spirit upon all occasions. Two such airs, one from Russia and the other from Jerusalem, are here transcribed. Their recent Slavonic origin is obvious.

The Sephardic tunes for the zemirot are sung in a more florid fashion than is usual among German or even Polish Jews. They include many tender airs, of which that for "Ki Eshmerah Shabbat" (a poem often incorrectly attributed to Abraham IBN EZRA) may be instanced.

Sephardic tradition is particularly rich in melodies for the conclusion of the Sabbath. One has already been given elsewhere (see HA-MABDIL), and another, the air to BEMOZA'E MENUḤAH, also is well worth presentation.

Some of the original melodies for the zemirot may well have been composed or adapted by the authors

of the verses, especially in the case of Israel ben Moses NAJARA, whom Delitzsch calls the founder of the Jerusalem rite, and who wrote no less than 650 hymns after selecting from the folk-songs of the Levant the melodies for his verses. In his compilations, first published at Safed in 1587, the zemirot are arranged according to the order of the Perso-Arabic modes in which fall the melodies to which they were set, while the original Arabic, Turkish, Greek, Rumanian, Spanish, and Italian titles are prefixed to his Hebrew verses. His hymns "Yah Ribbon 'Olam" and "Yiggaleh Kebod Malkuteka" are frequently chanted as zemirot, especially among the Hasidim, but are set to melodies of much later date. Indeed, for the reasons stated at the beginning of this article, there are few zemirot which retain the same melody for more than two generations.

**BIBLIOGRAPHY:** Zunz, *Literaturgesch.* pp. 306, 364, 419, 484-486, 490, 511, 540, 546, 555, 565, 579, 583, 584, 591, 595, 597.

**ZEND-AVESTA.** See **AVESTA.**

**ZENOBIA SEPTIMIA:** Empress of Palmyra; regent (from 267 to 273) for her minor son Vollabathus, who had been appointed imperator by the emperor Aurelian. Zenobia appears to have been friendly to the Jews; and according to some accounts, which, however, lack authentication, she was herself of Jewish descent. That she came into close relations with the Jews is shown by Yer. Ta'an. viii. 46b (see also PALMYRA). Within a brief space of time she so extended her dominion over the whole of Egypt and Syria that Aurelian feared lest she should renounce her allegiance to Rome, and he accordingly made war on her in 272, conquered her, and led her and her son in golden chains in triumph through Rome, although he treated her with leniency and gave her a villa on the Tiber.

S. O.

**ZEPHANIAH:** One of the twelve Minor Prophets who describes himself as "the son of Cnshi, the son of Gedaliah, the son of Amariah, the son of Hezekiah, in the days of Josiah, the son of Amon, King of Judah" (Zeph. i. 1). He seems, therefore, to have been a descendant of Hezekiah, King of Judah, since otherwise only the name of his father would have been given (comp. Isa. i. 1; Ezek. i. 3; Joel i. 1). If he was of royal descent, he probably lived in Jerusalem; and evidence of this is seen in his prophecies, where he describes various parts of the city. According to the first verse of the book which bears his name, he flourished during the reign of Josiah, and on the basis of his utterances the majority of modern scholars date his activity prior to the reforms so rigorously inaugurated and promulgated after 621, the pictures of corruption and the approaching foe being most appropriately referred to the situation in Judah during the early years of Josiah and the Scythian invasion.

The contents of the book of this prophet fall into two parts: i. 1-iii. 8, the coming judgment on the world, including Israel and the nations; and iii. 9-20, a promise of universal salvation. Zephaniah's

special denunciations are directed against false worship and irreligion. The calamity will find every one, even in the hiding-places of Jerusalem; Philistia, Moab, Ammon, Cush, and Assyria shall be overwhelmed by punishment and disaster; Jerusalem in particular, being rebellious, corrupt, and disobedient to the word of YHWH, shall fall under the divine wrath. Yet, on the other hand, God's promise is made known to the nations, that He will so purify them that they may call on Him, and all shall bring Him offerings. After the storm of judgment Israel shall be humble, and shall trust in YHWH alone. New social conditions shall arise, and justice and righteousness shall prevail, so that the redeemed shall rejoice in the Lord.

Zephaniah is a forceful book. Its language is vigorous and picturesque, and betrays an acquaintance with the Earlier Prophets. The ideas most emphasized are the providential control of the nations of the world, the necessity of purity and justice as opposed to the prevalent corruption and injustice of the day, and the refining value of judgment and suffering.

**ZEPHANIAH BEN MORDECAI TROKI:** Karaite scholar and author; flourished during the latter part of the sixteenth century; brother of Joseph b. Mordecai Troki. He was the author of "Kiddush ha-Hodesh ve-Sod ha-'Ibbur," a work on the calendar, and of responsa on the laws governing שְׁהִיטָה. Both works are mentioned by Simḥah Luzki in his "Oral Zaddikim."

**BIBLIOGRAPHY:** Fürst, *Gesch. des Karäerthums*, iii. 39; idem, *Bibl. Jud.* iii. 448; Gottlober, *Bliskoret le-Toledot ha-Kara'im*, p. 209.  
J. M. SEL.

**ZERAHIAH BEN ISAAC HA-LEVI GERONDI** (known as **ZERAH** and **REZBI**): Talmudic author and liturgical poet of the twelfth century; disciple of Moses ben Joseph of Narbonne. Azulai and many others, influenced by the statement of Zacuto ("Sefer ha-Yuhasin," ed. Filipowski, p. 218) that Zerahiah completed in 1150 his "Sefer ha-Ma'or," which he is known to have begun at the age of nineteen, give 1131 as the year of his birth. This date can scarcely be correct, however, since the "Sefer ha-Ma'or" mentions the commentaries of Jacob Tam and Samuel ben Meir, which could not have been known so early in Provence. It is equally improbable that he died in 1186, as is asserted by Judah ibn Verga ("Shebet Yehudah," ed. Hanover, p. 112). Zerahiah belonged to a prominent Spanish family called Yizhari of Gerona, but early in life he left his native place, where he seems to have had many enemies, and settled at Lunel. There he appears to have devoted himself to teaching, his pupils including Samuel ibn Tibbon, son of Judah ibn Tibbon, who, in his ethical will, freely recognized Zerahiah as a greater scholar than himself. Zerahiah was not only a thorough Talmudist of great erudition, with an analytic and synthetic mind, but he was also deeply versed in Arabic literature, in philoso-

phy, and in astronomy, and was, above all, a gifted poet, combining elegance of style with elevation of sentiment.

Zerahiah's chief work was the "Sefer ha-Ma'or," which he began at the age of nineteen and completed late in life. It contains a critique of Alfasi as well as additions to his Halakot, and is divided into two parts, the first, entitled

**The "Sefer ha-Ma'or."** "Ha-Ma'or ha-Ḳaṭan," comprising the Seder Mo'ed and the treatises Berakot

and Ḥullin, and the second, called "Ha-Ma'or ha-Gadol," embracing the Sedarim Nashim and Neziḳin. In this work the author displays great erudition and a fine critical sense which recognizes no other authority than logical reasoning. His independence displeased the conservatives, however, and refutations of his criticisms were written by Nahmanides under the title "Milḥamot Adonai," and by Abraham ben David of Posquières (RABaD), who alluded in his harsh fashion to Zerahiah as an immature youth who had had the audacity to criticize his master, and even accused him of having appropriated some of his (RABaD's) own interpretations without mentioning the author. A justification of Zerahiah's critique was written by Ezra Malki under the title "Shemen la-Ma'or," and since 1552 the "Sefer ha-Ma'or" has always been printed together with Alfasi.

As a sequel to his "Sefer ha-Ma'or" Zerahiah composed the "Sefer ha-Zaba," in which he expounded the methodology of the Talmud, and at the same time endeavored to show that Alfasi had not observed the principles laid down in the Talmud for halakic interpretation. This work, like its predecessor, was criticized by Nahmanides, who justified Alfasi. Both the "Sefer ha-Zaba" and the criticism of Nahmanides were inserted in the "Sefer

**Other Works.** who justified Alfasi. Both the "Sefer ha-Zaba" and the criticism of Nahmanides were inserted in the "Sefer Temim De'im" (§§ 225, 226, Venice, 1622), and were also published separately at Shklov in 1803. Zerahiah was likewise the author of the following works: "Hilkot Sheḥiṭah u-Bediḳah," mentioned in the "Sefer ha-Ma'or" at the end of the first chapter on the treatise Ḥullin; "Hassagot 'al Ba'ale ha-Nefesh," a critique of RABaD's treatise on the laws relating to women, published in part with the "Ba'ale ha-Nefesh" (Venice, 1741; Berlin, 1762); "Dibre Ribot," a controversy with RABaD on civil jurisprudence, mentioned in the "Sefer ha-Ma'or" on Baba Mezi'a and cited in part by Bezaleel Ashkenazi in his "Shiṭṭah Mekubbeẓet" on Baba Mezi'a, p. 98a; "Sela' ha-Maḥaloḳot," mentioned in the "Sefer ha-Ma'or" at the end of the first chapter of Shebu'ot; "Pitḥe Niddah," quoted by the author's grandson in his "Bedeḳ ha-Bayit" (vii. 3); a dissertation on the Mishnah Kinim, published at Constantinople in 1795; and responsa, mentioned in the "Sefer ha-Ma'or" at the end of the second chapter of Giṭtin and quoted in the "Sefer ha-Terumot" (xlv. 1). Zerahiah was the author of numerous liturgical poems, eighteen of which are found in the Sephardic Maḥzor.

**ZERAHIAH HA-YEWANI (RaZaH):** Byzantine ethical writer of the thirteenth or fourteenth century. Of his life no details are known, except that he was the author of an ethical work entitled "Sefer ha-Yashar," which was confused with Jacob Tam's halakic work of the same name and erroneously attributed to the renowned tosafist. This error was detected by Menahem of Lonzano, who, in his poem "Derek Ḥayyim" ("Shete Yadot," p. 122), expressly states that the ethical work in question belonged to Zerahiah. Lonzano did not succeed, however, in correctly establishing the identity of its author, for a second error immediately arose. Since Zerahiah ha-Yewani had the same initials as Zerahiah ha-Levi Gerondi, the author of the well-known "Sefer ha-Ma'or," the "Sefer ha-Yashar" was attributed by some bibliographers to the latter.

The "Sefer ha-Yashar" is divided into eighteen short chapters, and treats of the ethical principles which underlie the relation of man to God. It is an imitation of Bahya's "Ḥobot ha-Lebabot," which Zerahiah acknowledges in his preface that he had studied, although he found it too long and too profound for the average reader. The indebtedness of the "Sefer ha-Yashar" to the "Ḥobot ha-Lebabot" is especially evident in the first chapter, entitled "Sod Beri'at 'Olam," which is simply a brief summary of the chapters called "Sha'ar ha-Yihud" and "Sha'ar ha-Behinah" in Bahya's work. The "Sefer ha-Yashar" was first published at Constantinople in 1526, and since then has passed through twenty-four editions.

**ZERA'IM** ("Seeds"): The first order of the Mishnah, containing eleven treatises: Berakot, Pe'ah, Demai, Kil'ayim, Shebi'it, Terumot, Ma'ase-rot, Ma'aser Sheni, Hallah, 'Orlah, and Bikkurim. With the exception of the first, all these treatises, as is implied by the name of the order, deal with the laws governing agriculture and farm products.

E. C. J. Z. L.

**ZERED, BROOK or VALLEY OF:** One of the stations of the Israelites in the wilderness, indicated as the end of the thirty-eighth year of wandering (Num. xxi. 12; Deut. ii. 13-14). The Targum of pseudo-Jonathan renders the name by "valley where willows grow," and thus apparently etymologizes it by the Talmudic זררתא, which is confirmed by the Septuagint reading *Záper*. The location of Zered is given as east of the Jordan on the border between Moab and Edom before one crosses the River Arnon. Most modern scholars, including Dillmann, identify it with the Wadi Karak, a deep and narrow ravine running northwest to the Dead Sea.

J. M. SEL.

**ZERFFI, GUSTAV** (real name, **Hirsch**): Hungarian journalist and revolutionist; born in Hungary about 1820. He was the author of "Wiener Lichtbilder und Schattenspiele," with twelve caricatures (Vienna, 1848); and as editor of "Der Ungar" in 1848, he became conspicuous by his attacks upon the Germans and the imperial family.

With Essernatoni, Stancits, Zanetti, Steiuitz, and others he set the tone for the revolutionists, and in 1848 he was Schweigel's captain and adjutant in the honved army. On the failure of the revolution he fled to Belgrade (1849), where he entered the service of the French consul. In 1850 he translated Kossuth's complete works into German for the "Europäische Bibliothek der Neuen Belletristischen Litteratur" (ccxcxii., ccxcxvii., ccxcxlix.), and two years later he visited Paris, going in 1853 to London, where he became a member of the Royal Medical College, and afterward secretary of the German National Association. He resigned this post under suspicion, however, although he was still in London in 1863.

N. D.

**ZERIKA:** Palestinian amora of the fourth century; a pupil of Eleazar, whose halakic maxims he transmitted (Sotah 4b; Zeb. 93b; Men. 7b, 86b), and of Ammi (see Hul. 46a). He was a colleague of Abba, with whom he decided the controversy of Judah I. and Nathan on the problem whether the night should be divided into three or four watches (Yer. Ber. 2d), and by whom he was informed of a correction in a halakic tradition given by Ammi (B. B. 130b). He was also acquainted with Ze'era (Yer. Bezah 60c), and especially with Jeremiah (Men. 88b; Suk. 37b). In Babylonia it was said that he had called Safra's attention to the difference between the modesty of "pious Palestine" and the audacity of "bold Babylonia" on the occasion of the prayer for rain (Ta'an. 23b). No haggadic maxims of Zerika's have been preserved, the only saying ascribed to him being one belonging really to Hidka, whose name was incorrectly transliterated "Zerika" (comp. Hag. 16a, where the correct name, "Hidka," is given).

**ZEROR, RAPHAEL JEDIDIAH SOLOMON BEN JESHUA:** Algerian rabbi; born at Algiers Sept. 8, 1681; died there Dec. 21, 1737. He was a descendant of a family of distinguished Talmudists, and his grandfather, Solomon Zeror, was, like himself, chief rabbi of Algiers. Together with the other rabbis of his city he signed the ban against Nehemiah HAYYUN (comp. Nepi-Ghirondi, "Toledot Godole Yisrael," p. 280). Zeror studied secular sciences, devoting himself especially to logic, physics, and geography, and he likewise occupied himself much with poetry in addition to acquiring a reputation as a skilful physician and carrying on an extensive commerce by both sea and land. Some of his responsa and novellæ were collected by his pupil Judah 'Ayyashi, and were published under the title "Peri Zaddik" (Leghorn, 1748), the edition being preceded by a preface written by Zeror's pupils and contemporaries.

M. SEL.

**ZERUBBABEL:** Son of Shealtiel (Ezra iii. 2, 8; Hag. i. 1; "Pedaiah" in I Chron. iii. 19 is probably a scribal error) and grandson of Jehoiachin. The name is either the Hebrew זְרוּבָבֶל (= "begotten of

[in] Babylon"), although compounds with the passive participle, frequent in Assyrian, are rarely, if ever, found in Hebrew; or, more probably, it is the Assyro-Babylonian "Zeru-Babel" (= "seed or offspring of Babylon"). It is a moot question whether or not he was identical with SHESHBAZZAR, "the prince of Judah" and leader of the first great band of exiles returning to Jerusalem from Babylon under Cyrus (Ezra i. 8). On the one hand, it is urged that he is regarded as the head of the community of returned exiles (Ezra iv. 2), that he is associated in this capacity with the high priest Jeshua in the general administration (Ezra iii. 2, 8; iv. 3; v. 2; Hag. i. 1; Zech. iii.-iv.), and that the same title of governor ("pehah") of Judah is given him by the prophet Haggai (i. 1; ii. 2, 21) as is attributed to Sheshbazzar by Ezra (v. 14); while it is supposed that he, like Daniel, bore a double name, the Hebrew "Zerubbabel" and the Babylonian "Sheshbazzar." In opposition to this view it is pointed out that "Zerubbabel" is in all probability a Babylonian name, and that no hint of this identity is given in those portions of Ezra in which both names occur. It has been suggested that "Sheshbazzar" may be identical with "Shenazar" (I Chron. iii. 18), one of the sons of Jehoiachin and an uncle of Zerubbabel. In that case it might be supposed that the nephew took a prominent part in the reorganization of the community and shortly afterward succeeded to the governorship. At all events, Zerubbabel was governor of Judah in the second year of Darius Hystaspis (520 B.C.; Hag. i. 1, 14; ii. 2). According to the story of the chronicler in Ezra iii.-iv. 5, Zerubbabel, together with the high priest Jeshua and others, erected an altar for burnt offerings in the seventh month, offered morning and evening sacrifices, and kept the Feast of Tabernacles. In the second month of the second year of the return they laid the foundation of the Temple, but the opposition of "the adversaries of Judah and Benjamin" (either descendants of Jews who had not gone into exile or interlopers who showed hostility to the returning exiles) caused a delay of seventeen years. Roused to fresh activity by the prophets Haggai and Zechariah, work was resumed in the second year of Darius (520 B.C.), but fresh obstacles were encountered in the suspicions of Tatnai, "governor beyond the river" (R. V.), and an appeal was made to Darius, who promulgated a decree authorizing the completion of the work. The Temple was finished and dedicated four years later (Ezra v.-vi.). Nothing further is certainly known of Zerubbabel, although a Jewish tradition says that he returned to Babylon and died there. His sons are named in I Chron. iii. 19, and in Ecclus. (Sirach) xlix. 11 his name appears in the list of the famous men of Israel.

In I Esdras iv. 13-63, followed by Josephus ("Ant." xi. 3, §§ 5-9), a story, which appears to lack historicity, is told to the effect that Zerubbabel was a soldier in the body-guard of Darius Hystaspis and commended himself to the king's notice by his ready wit, receiving as his reward permission to go to Jerusalem and rebuild the Temple. In recent times interest has been aroused by the ingenious hypothesis of Sellin ("Serubbabel: ein Beitrag zur Geschichte der Messianischen Erwartung," 1898), who

endeavors to show that Zerubbabel was actually made King of Judah, but was overthrown and put to death by the Persians. This kingdom, he believes, was regarded as Messianic, and in Isa. liii. he sees an allusion to Zerubbabel's martyrdom.

**ZHITOMIR (JITOMIR):** Russian city; capital of the government of Volhynia. It is one of the oldest towns in European Russia, having become part of Lithuania in 1320 and being one of its prominent towns in the middle of the fifteenth century. As late as the middle of the seventeenth century, however, there were probably no Jews there, or else their number was very small, for the destruction of the city during the uprising under CHMIELNICKI in 1648 is not mentioned in the records of the Volhynian massacres of that year. When Zhitomir became part of Russia in 1778, it had a large Jewish community, and was a center of the Hasidic movement. In 1861 it had 13,299 Jews in a total population of 40,564, and owned one large synagogue and twenty-six small ones. In 1891 the Jews numbered 24,062 out of a total population of 69,785, while the number of large synagogues had increased to three and the small batte ha-midrashot to forty-six.

The Russian government regards Zhitomir as the central point of the Jewish population of southwestern Russia, as Wilna is considered the Jewish center of the northwestern part of the country. The printing of Hebrew books was permitted only in these two cities during the monopoly of Hebrew printing from 1845 to 1862, and both of them were also chosen as the seats of the two rabbinical schools which were established by the government in 1848 in pursuance of its plans to force secular education on the Jews of Russia in accordance with the program of the Teutonized Russian HASKALAH movement. The rabbinical school of Zhitomir was considered the more Jewish, or rather the less Russianized, of the two (see "Ha-Meliz," 1868, No. 40). Its first head master was Jacob EICHENBAUM, who was succeeded by Hayyim Selig SLONIMSKI in 1862. The latter remained at the head of the school until it was closed (together with the one at Wilna) in 1873 because of its failure to provide rabbis with a secular education who should be acceptable to the Jewish communities. Suchastover, Gottlober, Lerner, and Zweifel were among the best-known teachers of the rabbinical school at Zhitomir, while Goldfaden, Mandelkern, and Paperna were among the students who later became famous in the Jewish world.

The teachers' institutes which were substituted for the rabbinical schools were scarcely more satisfactory, and the one in Zhitomir, which was probably the worst-managed Jewish institution in Russia of which there is any record (see Prelooker, "Un-

der the Czar and Queen Victoria," pp. 8-21, London, 1895), and of which Jonas Gurland was inspector from 1873 to 1880, was closed in 1885. The present educational institutions of the Jewish community include a Talmud Torah, a "government school" for boys, a girls' school, and several admirable private schools for both sexes. The other Jewish communal institutions of Zhitomir are considered to rank above the average in excellence.

Wolf (d. 1800), author of the "Or ha-Meir" (Koretz, 1795), a pupil of Bär of Meseritz and one of the leaders of early Hasidism, and Abraham Bär Mavruach, "rosh bet din" or acting rabbi of Zhitomir in the first half of the nineteenth century and author of the "Bat 'Ayin" (Zhitomir, 1850), are two of the few noteworthy rabbinical authorities of Zhitomir; indeed, the town has never been a center of rabbinical learning. Its best-known "crown rabbis" have been Lev Bienstok, Kulisher, and the present (1905) incumbent, S. Skomorovsky, who has held this position for nearly fifteen years. Hayyim Nahman Bialik (b. in Radi, Volhynia, 1873), who is considered the ablest of the younger Neo-Hebrew poets, was educated in Zhitomir.

About twenty Jews were killed and a large number were wounded during the disturbances which occurred in Zhitomir on May 7 and 8, 1905, when the section of the city known as "Podol" was devastated. Among the dead was Nicholas Blinov, a Christian student, who fell while defending the Jews, and thus acted in real life the part of "Boris" in Chirikev's drama "Yevrei," which he had often played as an amateur on the stage. Ten young Jews who started from a neighboring town to assist the Jews of Zhitomir were killed in the village of Troyanov, near the city. After the massacre of Zhitomir a committee was organized to collect money for the families of those who had been killed; it received about 33,000 rubles from Russia, 9,500 from England, 1,500 from Germany, and 6,000 from the United States.

The district of Zhitomir outside the city contains 22,636 Jews in a total population of 281,378. —**Typography:** The earliest Hebrew book printed in Zhitomir bears the date of 1804. After the misfortune which befell Moses SCHAPIRO at Slavuta (comp. Hillel Noah Steinschneider, "'Or Wilna," pp. 21-27, Wilna, 1900) and the suppression, by the Russian government, of all Hebrew printing-offices in Russia, excepting Wilna, about eight years passed before the brothers Hanina Lippa, Aryeh Loeb, and Joshua Heschel, "grandchildren of the rabbi of Slavuta," were permitted to establish a Hebrew printing-office in Zhitomir which was a revival of the Slavuta office, with the same beautiful type for which that establishment had been famous. In the sixties the Schapiros published at Zhitomir the finest edition of the Babylonian Talmud which had appeared in Russia until that time. Abraham Shalom Shadow and Isaac Moses BAKST also conducted printing establishments in Zhitomir in the second half of the nineteenth century.

P. Wl.

**ZIDON (SIDON):** 1. Eldest son of Canaan (Gen. x. 15; I Chron. i. 13).

2. According to Strabo (xvi. 2), the oldest city of Canaan; situated twenty miles south of Beirut. Its territory extended from the slopes of the Lebanon to the coast, and was bounded on the south by Asher and Zebulun (Gen. xlix. 13; Josh. xix. 25). In its flourishing period the city had a winter and a summer harbor, which are now filled with sand. The city is said to have been called after the eldest son of Canaan (Gen. x. 19; Josephus, "Ant." i. 10, § 2); but the name may also have been derived from the extensive fisheries (צִדְיָן) in which the inhabitants engaged. It was ruled by independent kings (Jer. xxvii. 3), and had its own cult (Judges x. 6; II Kings xxiii. 13). It had this advantage over Tyre, that it entered into relations with the Israelites when its king, Ethbaal, married his daughter Jezebel to Ahab (I Kings xvi. 31).

The prophets of Israel were continually referring to the great importance of Zidon as a commercial city (Isa. xxiii. 2, 4, 12; Joel iv. [A. V. iii.] 4-7). It lost this position when Nehuchadnezzar conquered Palestine and part of Phœnicia. Ezekiel's prophecy referring to it (Ezek. xxviii. 20-24) dates from a later time. Isaiah (xxiii. 1-14, according to Duhm; xxiv. 10, according to Cheyne) refers to the destruction of the city by Artaxerxes Ochus in 351 B.C. There are also various references in the Talmud to the city. Ze'era says (Meg. 6a): "The tribe of Zebulun, which borders upon Sidon, complains of its mountainous country, with its superabundance of streams and seacoast, and is answered by reference to Deut. xxxiii. 19, pointing out the advantages of this region." "sefune" is said to mean the murex from which the purple dye קֶלֶן is obtained; "te-mune" is said to be an allusion to the abundance of fish; and "hol" is said to refer to the Phœnician glass which is made from the sands. In the seventh century Zidon was identified with Zeboud in Galilee or with Bagdal of Yo (בגדל; Gen. R. xcvi. 16).

Down to the middle of the nineteenth century the population did not exceed 8,000 inhabitants, but this number has increased to 15,000 within the last fifty years; of this number about 10,000 are Mohammedans, and 800 Jews. The latter are very poor, and are dependent almost entirely upon the הַלֻּקָּאן. Zidon is still considered to be outside the Pale of Palestine; and pious Jews direct their bodies to be taken after death to a more southerly city.

**ZIEGLER, IGNAZ:** Austrian rabbi; born at Also-Kubin, Hungary, Sept. 29, 1861; educated at the Rabbinical Seminary and at the University of Budapest (Ph.D. 1888). Immediately after his graduation he was called to the rabbinate of Carlsbad, a position which he still (1905) holds. Through his efforts the Kaiser Franz Josef Regierungs-Jubiläum Hospiz was erected at Carlsbad, at a cost of 500,000 Austrian crowns, to provide food, shelter, and medical treatment for indigent Jews who come

to that city in large numbers in search of health. This institution was opened May 1, 1903. Ziegler's works are as follows: a Hungarian dissertation on the prophet Malachi (Budapest, 1888); "Religiöse Disputationen im Mittelalter" (Frankfort-on-the-Main, 1894); "Geschichte des Judentums" (Prague, 1900); and "Die Königsgelehnisse im Midrasch" (Breslau, 1903).

H. M.

**ZIKLAG:** Simeonitic town which, after the union of the tribes of Simeon and Judah, became Judean; first mentioned in the account of the territory and borders of the individual tribes (Josh. xv. 31, xix. 5). In the early part of the regal period Ziklag came into the possession of the Philistines, who retained it until King Achish gave it to his vassal David as a place of residence (I Sam. xxvii. 6; II Sam. i. 1, iv. 10; I Chron. xii. 1, 20). It was invaded and burned by the Amalekites when David joined the Philistine king in war (I Sam. xxx. 1-26), and after the return from the first Exile it was one of the towns assigned to the Judeans (Neh. xi. 28). The town has not yet been identified, although Conder and Kitchener believe that its ruins are represented by the remains called Zuhailika, discovered by them in 1877, and lying on three low hills east-southeast of Gaza and four miles north of Wadi al-Shari'ah.

**ZIMMER, NATHAN LÖB DAVID:** English pietist and scholar; born at Fürth, Bavaria, in March, 1831; died at London Jan. 10, 1895. He was noted in London for his intense piety, which he probably inherited from his father, who was a fervent zaddik. Zimmer went to England about 1850 and entered business. He was primarily engrossed with the study of the Law, however, and especially with the more occult commentaries, every moment not absolutely needed for worldly objects being devoted to contemplation and to study of the higher life as revealed in the Cabala. His knowledge of the Cabala, and especially of gematria, was profound, and astronomical calculations also had a strong attraction for him. He compiled an elaborate genealogical table of the chief rabbis of England and was a frequent contributor to the Jewish periodical press on questions of astronomical calculation and of ritual. He was one of the original founders of the London Federation of Synagogues, and is

supposed to be the original of *Karlkammer* in Zangwill's "Children of the Ghetto."

J.

**ZIMRAT HA-AREZ**. See PERIODICALS.

**ZIMRI**: 1. Son of Zerah and grandson of Judah (I Chron. ii. 6).

2. Son of Salu, a prince of the Simeonites. In the wilderness the Israelites were smitten at Shittim for worshipping Baal-peor, and while they were weeping before the door of the Tabernacle, Zimri took a Midianite woman named Cozbi, the daughter of Zur, in the presence of Moses and all the people. Thereupon Phinehas, the grandson of Aaron, seized a javelin, went into Zimri's tent, and slew the guilty pair (Num. xxv. 6-14).

3. Son of Jehoadah or Jarah (I Chron. viii. 36, ix. 42). He was a Benjamite and a descendant of Saul.

4. King of Israel for seven days; originally the captain of half the chariots of King Elah. He gained the throne by the murder of his master as Elah was reveling in the house of Arza, his steward, at Tirzah. In the midst of the festivity Zimri killed the king and all the house of Baasha, the predecessor of Elah; but when the army, then engaged in the siege of the Philistine town of Gibbethon, heard of the assassination, it immediately proclaimed its general Omri king. He marched at once against Tirzah and took the city, whereupon Zimri retreated to the royal palace, set it on fire, and perished in the flames (I Kings xvi. 9-20).

5. In Jer. xxv. 25 "kings of Zimri" are mentioned together with Elamitic and Median sovereigns. This Zimri may be identical with Zimran, a son of Abraham by Keturah (Gen. xxv. 2).

B. P.

**ZIN** (צן): Frontier post of Judah on the south, mentioned in the description (Num. xxxiv. 4; Josh. xv. 3) of the frontier between the "ascent of AKRABBIM" and Kadesh-barnea. The desert of Zin derived its name from this place. Kadesh-barnea was situated in this desert (Num. xiii. 2, xxxiii. 36; Deut. xxxii. 51; Josh. xv. 1, 3; comp. Num. xx. 1, xxvii. 14; Deut. xxxii. 51); and one passage (Num. xxxiii. 36) reads, "the wilderness of Zin which is Kadesh." The phrase "the wilderness of Kadesh," which occurs only once (Ps. xxix. 8), refers possibly not to any definite geographical locality, but to the region around Kadesh. The statement found in Num. xiii. 26, that Kadesh is situated in the wilderness of Paran, is due to the

fact that, of the two sources combined in that chapter, one (P) says that the spies started from the wilderness of Paran, and the other (JE) that they set out from Paran. The wilderness of Zin adjoined the wilderness of Paran on the north; hence it must be assigned to a locality immediately south of the southern part of Judah, on the plateau or on the mountain region (Josephus mentions the "mountains of Sin") in which the 'Azazime Bedouins now pitch their tents.

**ZIONIDES** or **SONGS OF ZION** (Hebr. *Shire Ziyyon*): The songs of Zion, *i. e.*, the lyrical hymns which express the longing of the Jewish nation to see the hill of Zion and the city of Jerusalem shine again in all their former glory, date back to the time immediately after the destruction of Solomon's Temple. Since that period the poets and singers of Israel have devoted their best talent to painting in the most brilliant colors the ancient glories of Zion. By far the greater number of these songs unite in voicing a heartfelt desire to see the nation, the city of Jerusalem, Mount Zion, and the Temple restored to their former splendor. The oldest song of Zion in Jewish literature was written in the fifth century B. C., and is a lamentation that the enemy compels Israel to live on foreign soil; this is the celebrated Ps. cxxxvii. 1-3. A similar Zionide of the same period is Ps. cxxvi.; in it the poet, full of hope, sings of the day when the Captivity shall be over and the joyfully returning exiles shall sing a new song of Zion. The elegy ending with a desire for deliverance, which is found in the fifth chapter of Lamentations, dates probably from the first pre-Christian century.

During the Middle Ages, Zionides from the pens of the greatest poets formed the chief comfort and consolation of the people. As early as the time of

Ibn Gabirol (11th cent.) songs of Zion were incorporated in the liturgy, partly as lamentations for the Ninth of Ab and partly as *tefillot* and *piyyuṭim*.

Among the songs of lamentation for Zion which are sung on the Ninth of Ab the following may be specially referred to: a song beginning with the words **בני שמרון קול תרון מצאוני עוני**, and in which Samaria and Jerusalem try to excel each other in the description of the misfortune which has fallen upon them; and, above all, the song with the refrain:

אלי ציון ועריה  
כמו אישה בצריה  
וכבתולה חגורת שק  
על בעל נעוריה

("Zion and her cities wail like a woman in childbirth, and like a virgin clothed in sackcloth for the man of her youthful choice"). Of other *tefillot* and *piyyuṭim* may be mentioned the song beginning:

קול ברמה נשמע ביללה  
אבן הראשה לעיים ולחרישה

and several strophes of the song "Lekah Dodi," composed by Solomon ha-Levi and incorporated in the Sabbath eve service.

The most important of Ibn Gabirol's Zionides are the poem beginning with the words:

שלה מנזר  
לעם ננור  
אשר הפזר  
הן והן

("Send a prince to the condemned people which is scattered hither and thither") and that beginning:

שעה נאמר  
אשר נאמר  
ביר בבל  
ונם שיעיר

("Turn thy face, O God, to the conquered, who is delivered up into the hand of Babel and of Seir").

Judah ha-Levi (1140) was the author of the Zionide beginning:

"Zion, wilt thou not send a greeting to thy captives,  
Who greet thee as the remnant of thy flocks?  
From West to East, from North to South, a greeting,  
From far and near, take thou on all sides.  
A greeting sends the captive of desire, who sheds his tears  
Like dew on Hermon; would they might fall on thy hills."

Besides this song, which has been translated into nearly all European languages in prose and in verse, Judah wrote several shorter songs, chief of which are לבי במזרח ואנכי בסוף מערב ("My heart is in the East, although I am at the end of the West") and ירושלים האנחי ודמעך ציון הסכי ("Sigh, O Jerusalem, and shed thy tears, O Zion").

Among other medieval writers of this class may be mentioned Abraham ibn Ezra, who composed the Zionide אלהי קדם מעונה ישוב יונה הללה ("O God, who art enthroned in the East, appease the mourning dove"); Judah al-Harizi (13th cent.), author of the song שלום לעיר שלם ("Peace be to the city of Salem [Jerusalem]");

**Various** and Israel Najara (16th cent.), who wrote the song יפרח כחמר ציץ ישע ("May the flower of salvation bloom like a palm"). In more modern times Samuel David Luzzatto wrote:

לבי לבי  
רב מכאובי  
הנה עצבי  
ישן נושן

("My heart, my heart is full of pain; see, my grief is an ancient one"); and equally well known is Joseph Almanzi's

מכל פנה  
תבוא רנה  
בקרא מקרא  
אל אל כי טוב

("From all corners comes rejoicing on the day of celebration to God, who is good").

The most prominent Hebrew poets have written Zionides, among the number being M. S. Rabener,

Micah Levisohn, Judah Loeb Gordon, S. Mandelkern, M. M. Dolitzky, and N. H. Imber. Countless songs have been produced under the influence of Zionism: of these may be mentioned the song adopted by all the Zionists of the world as their national song, and beginning with the words "There, where a slender cedar kisses the clouds"; the song of the academic society Kadimah in Austria, "Knowest thou whence freedom comes?"; the song of the united Zionists, "Sluchajcie bracia guesni tij"; and "Ha-Tikwah" (Hope), composed by N. H. Imber, which has the refrain:

עוד לא אברה תקותינו  
תקוה הנושנה  
לשוב לארץ אבותינו  
עיר בה דוד תנה

("Our hope has not yet gone, the old hope to return to the land of our fathers, to the city where David lived").

S. O.

**ZIONISM:** Movement looking toward the segregation of the Jewish people upon a national basis and in a particular home of its own; specifically, the modern form of the movement that seeks for the Jews "a publicly and legally assured home in Palestine," as initiated by Theodor Herzl in 1896, and since then dominating Jewish history. It seems that the designation, to distinguish the movement from the activity of the Chovevei Zion, was first used by Matthias Acher (Birnbau) in his paper "Selbstemancipation," 1886 (see "Ost und West," 1902, p. 576; *Ahad ha-'Am*, "'Al Parashat Derakim," p. 93, Berlin, 1903).

The idea of a return of the Jews to Palestine has its roots in many passages of Holy Writ. It is an integral part of the doctrine that deals with the

Messianic time, as is seen in the constantly recurring expression, "shub shebut" or "heshib shebut," used both

of Israel and of Judah (Jer. xxx. 7, 1; Ezek. xxxix. 25; Lam. ii. 14; Hos. vi. 11; Joel iv. 1 *et al.*). The Dispersion was deemed merely temporal: "The days come . . . that . . . I will bring again the captivity of my people of Israel, and they shall build the waste cities and inhabit them; and they shall plant vineyards, and drink the wine thereof . . . and I will plant them upon their land, and they shall no more be pulled up out of their land" (Amos ix. 14; comp. Zeph. iii. 20); and "I will bring them again also out of the land of Egypt, and gather them out of Assyria; and I will bring them into the land of Gilead and Lebanon" (Zech. x. 10; comp. Isa. xi. 11). In like strain the Psalmist sings, "O that the salvation of Israel were come out of Zion! When the Lord bringeth back the captivity of his people, Jacob shall rejoice, and Israel shall be glad" (Ps. xiv. 7; comp. cvii. 2, 3). According to Isaiah (ii. 1-4) and Micah (iv. 1-4), Jerusalem was to be a religious center from which the Law and the word of the Law were to go forth. In a dogmatic form this doctrine is more precisely stated in Deut. xxx. 1-5.

The belief that the Messiah will collect the scattered hosts (גלותיו של ישראל) is often expressed in Talmudic and midrashic writings; even though more universalistic tendencies made themselves felt, especially in parts of the Apocryphal literature (see JEW. ENCYC. viii. 507, *s. v.* MESSIAH). Among Jewish philosophers the theory held that the

**Relation to Messiah b. Joseph** "will gather the children of Israel around him, march to Jerusalem, and there, after overcoming the hostile powers, reestablish the Temple-worship and set up his own dominion" (*ib.* p. 511b). This has remained the doctrine of Orthodox Judaism; as Friedländer expresses it in his "Jewish Religion" (p. 161): "There are some theologians who assume the Messianic period to be the most perfect state of civilization, but do not believe in the restoration of the kingdom of David, the rebuilding of the Temple, or the repossession of Palestine by the Jews. They altogether reject the national hope of the Jews. These theologians either misinterpret or wholly ignore the teachings of the Bible and the divine promises made through the men of God."

The Reform wing of the Synagogue, however, rejects this doctrine; and the Conference of Rabbis that sat in Frankfort-on-the-Main July 15-28, 1845, decided to eliminate from the ritual "the prayers for the return to the land of our forefathers and for the restoration of the Jewish state." The Philadelphia Conference, Nov. 3-6, 1869, adopted as the first section of its statement of principles the following: "The Messianic aim of Israel is not the restoration of the old Jewish state under a descendant of David, involving a second separation from the nations of the earth, but the union of all the children of God in the confession of the unity of God, so as to realize the unity of all rational creatures, and their call to moral sanctification." This was re-

**Rejected by Reform Judaism.** affirmed at the Pittsburg Conference, Nov. 16-18, 1885, in the following words: "We consider ourselves no longer a nation, but a religious community; and we therefore expect neither a return to Palestine, nor a sacrificial worship under the sons of Aaron, nor the restoration of any of the laws concerning a Jewish state."

Historically, the hope of a restoration, of a renewed national existence, and of a return to Palestine has existed among the Jewish people from olden times. After the first Exile, the Jews in Babylonia looked forward continually to the reestablishment of their ancient kingdom. However much the Jews spread from land to land, and however wide the dispersion and consequent Diaspora became, this hope continued to burn brightly; and from time to time attempts were made to realize it. The destruction of the Temple by Titus and Vespasian (70 c. e.) was perhaps the most powerful factor in driving the Jews east, south, and west. Nevertheless, in a short time the hope of a restoration was kindled anew. The risings under Akiba and Bar Kokba (118) soon followed; and the Jews drenched the soil of Palestine with their blood in the vain attempt to regain their national freedom against the heavy hand of the Roman power. Despite these checks, the idea of the restoration persisted and became a matter of dogmatic be-

lief; as such it finds expression in Jewish literature, both prose and poetic. The Talmudic writings as a whole, while making suitable provision for the actual circumstances under which the Jews lived, are based upon the idea that at some time the ancient order of things will be reestablished, and the old laws and customs come again into vogue. These hopes found expression in numerous prayers which

**In Talmudic Times.** from time to time were inserted in the ritual. Various calculations were made as to when this time would arrive, *e. g.*, in the eighth century ("Relations of R. Simeon b. Yoḥai") and in the eleventh century (Apoc. Zerubbabel; see Zunz, "Erlösungsjahre," in "G. S." iii. 224; Poznanski in "Monatsschrift," 1901). The idea was given a philosophic basis by those who treated of Jewish theology. And the singers, both of the Synagogue and the home, were fervid in their lament for the glory that was past and in their hopes for the dignity that was to come (see ZIONIDES).

But the outward condition in which the Jews lived so many centuries made it impossible for them to think of realizing in fact that which they hoped and prayed for. The supernatural accessories with which theology had clothed the idea of the restoration also palsied any effort that might have been made. The Deity was supposed to lead the way; and the hand of man remained inert. From time to time, it is true, individual Jews or bands of Jews journeyed to Palestine, there either to lay their bones in sacred soil or to await the coming of the Messiah (see PILGRIMAGE). Only fitfully and at periods far distant from one another was any attempt made to anticipate Providence and to venture such a restoration on a practical basis. And even in such cases it was not always Palestine that was selected for the first attempt, because of the practical difficulties which were known to inhere in

**Joseph Nasi.** any such a scheme. An attempt of this kind was that of Joseph NASI in the middle of the sixteenth century, both in his endeavor to gain from the Republic of Venice an island to which the Portuguese Jews might emigrate and in his proclamation to the Jews of the Roman Campagna asking them to emigrate to Palestine.

By the side of such projects there were others of a more fantastic character. In 1540 an Augsburg Jew attempted to form a Jewish state upon a Messianic basis (see "Anzeiger des Deutschen Nat. Museums," 1894, p. 103). Of schemes based upon Messianic speculations and purely religious hopes, the most important was that of SHABBETHAI ZEBI (1626-76), who, personating the Messiah, announced that he would restore Israel to the Promised Land. How ardent and true the belief in the restoration was in the hearts of the Jews may be seen from the fact that numerous communities were ready to follow the impostor's lead. Even such men as Spinoza believed in the possibility of the accomplishment of the project; and after Zebi's fraud had been discovered, the belief in the impending restoration lingered for many years.

The problem, however, was attacked also from the philanthropic point of view. The condition of

the Jews in many parts of Europe occasioned well-meaning and charitable persons to seek some means of settling them under such conditions as would insure to them repose and freedom from persecution. Of such a kind was the project elaborated in England about 1654, an account of which is contained in the Egerton collection of manuscripts in the British Museum. This account is entitled "Privileges Granted

to the People of the Hebrew Nation  
**Colonizing That Are to Go to the Wilde Cust.**  
**Attempts** and, according to Lucien Wolf, has  
**Outside** reference to a Jewish settlement in  
**Palestine.** Surinam. Such colonies as these with

far-reaching administrative rights had been established in Curaçao in 1652 under the authority of the Dutch West India Company, and in 1659 in Cayenne by the French West India Company ("Tr. Jew. Hist. Soc. Eng." iii. 82). In 1749 Maurice de Saxe, a natural son of August II. of Poland, had in mind a project to make himself king of a Jewish state which was to be founded in South America (M. Kohler, in "Menorah," June, 1892). The invitation of Napoleon to the Jews of Asia and Africa to settle again in Jerusalem under his aegis (see "Moniteur Universelle," No. 243) was a political document and not meant to be taken seriously. Even Meudelssohn was approached with a proposal of a similar nature made by an unknown friend in the year 1770. He refused to entertain the project on the ground that the oppression under which the Jews had been living for so many centuries had robbed their spirit of all "vigueur," that they were too scattered to work in common, that the project would cost too much money, and that it would need a general consent of the great powers of Europe ("Gesammelte Schriften," v. 493, Leipsic, 1844). A like measure was elaborated in 1819 by W. D. Robinson, who proposed the formation of a Jewish settlement in the upper Mississippi and Missouri territory; and in 1850 the American consul in Jerusalem, Warder Cresson, a convert to Judaism under the name of Michael C. Boaz Israel, established a Jewish agricultural colony near Jerusalem, enlisting in its support the Rev. Isaac Leeser of Philadelphia, and L. Philippon of Magdeburg (M. Kohler, in "Publ. Am. Jew. Hist. Soc." No. viii., p. 80). The most persistent advocate, however, of such schemes was Mordecai M. Noah (see also ARARAT). As early as the year 1818 he actively propagated the idea of the necessary restoration of the Jews to Palestine. In a "Discourse on the Restoration of the Jews," delivered in 1845 before a Christian audience in the city of New York, he showed the wide range of his political

**Mordecai** views, and laid down the chief principles upon which a return of the  
**Noah.** Jews to Palestine could be effected.

In developing this idea, he conceived a plan for a preliminary settlement named "Ararat" on Grand Island in the Niagara River, near Buffalo. On Jan. 19, 1820, Noah's memorial to the New York legislature, praying for the sale to him of Grand Island, was presented. This project aroused much interest in Europe also. Of course nothing definite came of it (*ib.* No. viii., pp. 84 *et seq.*; No. x., p. 172; No. xi., p. 132); though in 1873 the London "Jewish Chronicle"

editorially suggested a Jewish colony in the United States upon a plan similar to that of Noah (July 4, p. 233).

All these projects of the preliminary stage were bound to fail because the Jewish people had not been educated to understand their true position in the modern world, nor had they been sufficiently stimulated by the great waves of feeling that had swept through Europe. The two influences that made themselves felt in such manner as to form the first stage in the development of modern Zionism were the rise of a strong nationalistic sentiment and the development of anti-Semitism. The last part of the eighteenth century and the first half of the nineteenth are characterized in Europe by a strong sentiment of cosmopolitanism which even exceeded the bounds of rational development. It was a natural reaction against the arbitrary grouping of nationalities which ignored all racial affiliations and was based simply upon political necessities. The swing of the pendulum went too far; and the counter-reaction in favor of personal freedom made

**Rise of** itself felt throughout the whole of the  
**Nationalist** first half of the nineteenth century.  
**Sentiment.** The idea of personal freedom brought  
in its wake the desire for racial freedom. The action of Switzerland, Hungary, and the various Balkan states, the attempt of Ireland to free itself from British rule, the unification of Italy and Germany upon racial lines, were bound to react upon the Jews. Upon the continent of Europe many of them had been in the front ranks of those who had fought for this racial freedom. The Jews little thought that the weapons which they had used against others would be turned against themselves, and would create within their own ranks a longing for racial unity and a communal life.

Under these influences there arose gradually, especially among the younger generation in eastern Europe, a sentiment in favor of Jewish national existence, which carried in its wake many of the brightest and most advanced Jews of the day. And the opening up of the Eastern question brought the needs of certain parts of the Ottoman empire prominently before Europe. The historian Joseph Salvador as early as 1830 believed in the possibility that a congress of European powers might restore Palestine to the Jews; and the founders of the Alliance Israélite Universelle had a similar idea in their minds when, under Albert COHN and Charles NETTER, the work of colonizing Jews in Palestine was taken up, and the agricultural school Mikveh Yisrael was founded near Jaffa.

In 1852 Hollingsworth, an Englishman, urged the establishment of a Jewish state, because of the necessity of safeguarding the overland route to India; and in 1864 there appeared in Geneva a pamphlet entitled "Devoir des Nations de Rendre au Peuple Juif Sa Nationalité," which occasioned a lengthy discussion in the "Archives Israélites."

**French** It was ascribed to Abraham Pétavel, a  
**An-** Christian clergyman and professor in  
**ticipations.** Neuchâtel. Pétavel was a member of the Alliance Israélite Universelle, although he was openly and honestly interested in the conversion of the Jews. Though he denied the

authorship of the pamphlet, it was generally believed to have been his work, especially as he published at the same time a long poem, "La Fille de Sion ou la Rétablissement d'Israël" (Paris, 1864). The "Archives" declared itself strongly opposed to the project; but Lazar Lévy-Bing, a banker of Nancy and later a member of the legislature (July 2, 1871), wrote warmly in favor of Jewish nationalism, with no thought of the economic condition of the Jews of his day. Jerusalem, he hoped, might become the ideal center of the world. Undoubtedly influenced by Pétavel, a Jew, J. Frankel, published in Strasburg in 1868 a pamphlet with the title "Du Rétablissement de la Nationalité Juive." The author, impressed on the one hand by the national movements of his time and on the other by the insecure conditions under which the Jews of eastern Europe lived, pleaded boldly and openly for the reconstitution of a Jewish state in Palestine by the purchase of the country from Turkey. "Should Palestine prove to be impossible," he adds, "we must seek elsewhere in any part of the globe some fixed home for the Jews; for the essential point is that they be at home and independent of other nations," thus approaching in a measure the modern territorialists (see below).

Various schemes with a similar end in view were elaborated. Between 1835 and 1840 Moritz Steinschneider was among those who founded in Prague

a student society for the purpose of

**In** propagating the idea of a Jewish state  
**Austria.** in Palestine; and in the latter year  
an anonymous writer in the "Orient"

(No. xxvi., p. 200) published an appeal to his brethren to make an attempt to procure Syria for the Jews under Turkish sovereignty while the blood persecution in Damascus was still fresh in memory; and in 1847 Barthélémy published in "Le Siècle" a lengthy poem inviting the Rothschilds to restore the kingdom of Judah to its former glory. Judah ben Solomon Alkalai, rabbi in Semlin, Croatia, published his "Goral Ladonai," Vienna, 1857 (2d ed., Amsterdam, 1858), in which he advocated the formation of a joint-stock company for the purpose of inducing the sultan to cede Palestine to the Jews as a tributary state. In similar manner Luzzatto, in Padua, wrote in 1854 to Albert Cohn, "Palestine must be colonized and worked by the Jews in order that it may live again commercially and agriculturally." The journeys of Sir Moses MONTEFIORE and Adolphe CRÉMIEUX to Palestine increased the interest of the Jews in their ancient home, and brought the matter prominently before the public. The founder of the Geneva Convention, Henry Dunant, worked incessantly with a similar object in view. He tried to interest in such projects the Alliance Israélite Universelle (1863), the Anglo-Jewish Association in London, and the Jews of Berlin (1866), even founding two societies for that purpose, the International Palestine Society and, in 1876, the Syrian and Palestine Colonization Society. All his efforts failed to evoke a response. A like fate befell both the project of Sir Moses Montefiore, who in 1840 laid before Mohammed Ali a plan to colonize Jews in Palestine, and that of Lord Shaftesbury, associated with the Society for the Relief of Persecuted Jews. In the year 1870 Benedetto

Musolino, a Christian and a fervent Italian patriot, worked out a complete plan for the establishment of a Jewish state in Palestine, demonstrating the advantage of such a state not only to the Jews, but also to the Ottoman empire and to England. In vain he tried to interest Lord Palmerston and the Rothschilds in the plan. Even his work "La Gerusalemme e il Popolo Ebreo" remained unpublished ("The Maccabæan," 1905, p. 225). Nor was Laurence Oliphant (1829-88), the English traveler and politician, more successful. In 1879, after having vainly attempted to procure from the Porte the concession of the Euphrates Valley Railway, on the sides of which he had proposed to settle Russian Jews, he conceived the idea of a Jewish settlement in Palestine, in the land of Gilead. A society was to be formed with a capital of 10,000,000 rubles. Upon 1,000,000 to 1,500,000 acres the Jewish proletariat of Poland, Lithuania, Rumania, and Asiatic Turkey were to be colonized, and an agrarian bank was to be founded. Oliphant failed both in 1879 and in 1882 to obtain the permission of the sultan to such a plan.

Among the early writers who pleaded for the repatriation of Palestine by the Jews

**Moses** were David b. Dob Baer GORDON

**Hess.** (1826-86), Zebi Hirsch KALISCHER  
(1795-1874), Elijah Guttmacher, Moses

Hess, and the historian Heinrich GRAETZ. This movement in course of time assumed the name of **CHOVEVEI ZION**. Gordon and Hess were its intellectual leaders, the first publishing in the year 1871 in his paper "Ha-Maggid" a number of articles on the colonization of Palestine as the basis for the future regeneration of Judaism. Hess wrote his "Rom und Jerusalem" in 1862, which book has remained one of the foundation works in Zionist literature; though a later edition of the work was burned by his family, in order to rid the world of this "scandal" ("Die Welt," ii., No. 9, p. 16). He confidently hoped for the assistance of France in the founding of such colonies. Kalischer, who lived in Thorn, was perhaps the first practical Zionist. His "Derishat Ziyyon" (Lyck, 1862) deals with the religious and theological problems involved. He advocated the colonization of Palestine, the cultivation of land there, and the founding of an agricultural school and of a Jewish military guard. He held that the salvation promised by the Prophets could come only gradually and by self-help on the part of the Jews. He traveled extensively in aid of these ideas; caused the first colonization society to be established in Frankfort-on-the-Main in 1861; and had some influence in the work that Charles Netter did in Palestine. Many Orthodox rabbis joined in this movement, e.g., J. Schwarz, S. Schwarz, and Hildesheimer. Rabbi Goldschmidt of Leipsic, writing in the "Allg. Zeit. des Jud.," referred to the colonization of the Holy Land as a "tatsächlich heilige Sache"; and in such cities as Brody, Tarnopol, and Vienna societies were founded for the purpose of studying the Hebrew language.

Two years after the appearance of Hess's "Rom und Jerusalem," and undoubtedly influenced by it, Graetz published in the "Jahrbuch für Israeliten" (1863-64) an essay entitled "Die Verjüngung des Jüdischen Stammes," in which he tried to show his-

torically that the Jewish nation was its own Messiah, and should bring about its own rejuvenescence and redemption, without waiting for the

**Heinrich Graetz.** coming of a single person as redeemer. The violent conflict engendered by this essay reached even in the courts of law (see T. Zlocisti in "Jüdischer Volkskalender," pp. 9 *et seq.*, Brünn, 1903-4, where Graetz's essay has been reproduced).

Toward the end of the seventies in the nineteenth century the national movement commenced to gain ground still further among the Jews. This was due to a recrudescence of national sentiment in Europe, as a result of which the Servians, the Bulgarians, and the Rumanians had gained complete liberty. Pinsker had not looked specifically to Palestine as a possible home for the Jews; but Jewish sentiment quickly led others in that direction. Ben Yehudah published in "Ha-Shahar" (1879) a series of articles proposing the colonization of the Holy Land and the gradual centralization of the Jews there as the only means to save both Jews and Judaism; and Isaac RÜLF in 1883 wrote his standard work "Aruhat Bat 'Ammi" on the same lines. Christian writers also became affected with the idea, which was thus brought prominently before the world. The rise of this national sentiment in Russia is closely connected with the names of Moses Löb LILLENBLUM and Perez SMOLENSKIN. The riots of 1880 and 1881 turned the attention of these authors to the Jewish question. The first in his "Derek la-'Abor Golim" and the second in his "Am 'Olam," and in his journal "Ha-Shahar" (even before 1880), gave literary expression to the national hopes. To these names must be added that of Lev Osipovitch Levanda. In England Disraeli had already declared that "race is the key of history," and George Eliot wrote her "Daniel Deronda" in 1876, and in 1879 her "Impressions of Theophrastus Such," the last chapter of which is entitled "The Modern Hep! Hep! Hep!" (republished by the Federation of American Zionists, 1899). In this she makes the Jew say, "The effect of our separateness will not be completed and have its highest transformation unless our

**George Eliot's "Daniel Deronda."** race takes on again the character of a nationality. That is the fulfilment of the religious trust that molded them into a people." "Daniel Deronda" was enthusiastically reviewed in the "Monatsschrift" (1877, pp. 172 *et seq.*) by David Kaufmann, who added, "Who will dare to say what may not result from this rising flood of feelings in the heart of the Jews, who will dare to insist that the imponderable mass of indefinite feelings and vague impulses which in the march of centuries has rather increased than decreased in the soul of the Jewish people, will pass off without leaving any trace?" In like manner Joseph Jacobs reviewed the work, adding, "And Mordecai's views of the resumption of the soil of the Holy Land by the holy people are the only logical position of a Jew who desires that the long travail of the ages shall not end in the total disappearance of the race" ("Jewish Ideals," p. 80). Influenced by "Daniel Deronda," Gustav Cohen of Hamburg privately printed his "Die Judenfrage und die Zukunft"

(1891, 1896), in which he developed the theory there expounded to its logical Zionistic conclusion. In the United States, a Jewess, Emma LAZARUS, moved by the immigration of large numbers of Russian Jews to America, wrote a stirring series of articles in the "American Hebrew" (1882, 1883) pleading for an independent Jewish nationality and a Jewish home in Palestine ("An Epistle to the Hebrews"; republished by the Federation of American Zionists, 1900).

The result of all this agitation was the founding of various colonization societies, not only in Russia (under the leadership of S. P. Rabinowitz, Pinsker, H. Schapira, Lilienblum, Max Mandelstamm, and Kalonymus Wissotzky), but also in Germany, France, England, and America; *e.g.*, the Central Committee at Galatz, the Esra at Berlin, the Chovevei Zion in London, the Shave Zion in the United States, and the Yishshub Erez Yisrael in Paris. The first Palestinian colony was founded in 1874; but the work did not commence in earnest till

1879. At the conference of the Chovevei Zion and of other societies, held at Kattowitz on Nov. 6, 1884, to regulate the help sent to the colonists, no less than fifty bodies were represented. A second conference was held in Drusgenik on June 15, 1887; and a third in Wilna, in 1889, at which thirty-five societies were represented and thirty-eight delegates were present. In 1891-92 Paul Friedmann made an unsuccessful attempt to establish a Jewish colony in Midian (see JEW. ENCYC. v. 519, *s.v.* FRIEDMANN, PAUL). The growth of the colonization movement upon philanthropic principles reached its height in 1894, when it was arrested largely by the fact that the Turkish authorities made it difficult for Jews to enter Palestine (see JEW. ENCYC. iv. 47, *s.v.* CHOVEVEI ZION). Even Baron de Hirsch was not in principle opposed to colonization in the Holy Land, as he told a deputation on July 22, 1891; he desired that a searching inquiry should first be made into its feasibility. He promised to aid any negotiations that should be undertaken in Constantinople if the report of a commission proved favorable ("The Maccabæan," p. 118, New York, 1904).

The second influence working to produce the modern Zionist movement was the rise and extension of ANTI-SEMITISM. The Jews had imagined that with their political emancipation, and, with the destruction of the walls of the ancient ghettos, their entrance into the comity of nations, the complete subsidence of the ancient "odium Judaicum" would result. In this they were sadly disappointed. Political liberty did not give them social equality; and the newly arisen nationalistic sentiment turned fiercely against them. At the very moment when their own dormant national feeling had been aroused, and when the work of colonization in Palestine had sent a thrill of fervor through the Jewish masses, the anti-Semitic movement grew in intensity. From 1881 it pursued its victorious march through Europe. The strength of the movement in eastern Europe was at first underrated in the hope that it would give way before the advance of culture and education in those countries.

This hope was doomed to failure; and when states like Germany, Austria, and France joined in it actively, with the more or less overt cooperation of the governments of the day, a reaction among Jews was bound to take place. Most of the latter, it is true, continued to hope that the phenomenon was but a passing one; but a small band in western Europe and in America sought its cause in sources that were deeper than a passing whim. They thought to find it in the impossibility felt by various peoples to assimilate the Jews and at the same time to allow them that measure of individual and collective freedom which the Jews considered necessary for the preservation of their individual character. In addition, they had witnessed the results of the attempt made by many of their brethren to meet fully the demands of the outside world. The consequence had been the almost complete conversion to Christianity of many of the leading families in the Mendelssohn epoch, and the loosening of the bonds that held the Jews together, which meant, if continued, the absorption of the Jews in the general population and the disappearance of Judaism as a distinctive faith. To meet anti-Semitism the great Jewish communities, contenting themselves with an attempt to ward off the blows as they fell successively, offered in general a passive resistance, to which many noble-minded Christians contributed in the German and Austrian societies for repelling anti-Semitism (see *VEREIN ZUR ABWEHR DES ANTI-SEMITISMUS*). On the other hand, the small band referred to above took up a more positive attitude, and found the answer to militant anti-Semitism in a recurrence to what they considered the basis of Jewish life—the idea of the continued national existence of the Jews as a people. This current among the Jews of modern Western culture combined with the two other currents, that of the national Jewish revival and that of the philanthropic colonization of Palestine, to form the modern Zionist movement.

It was at this time that Theodor HERZL, brooding over the strong rise of anti-Semitism in his own Austrian home and in Paris, in which city he was then living, wrote his "Judenstaat." According to his own statement, it was conceived and written during the last two months of his stay in Paris the year 1895, as a private expression of his opinion, and to be shown only to a small circle of his friends. One of these friends, after reading the pamphlet, declared its author to be of unsound mind. Any active agitation or discussion of the principles laid down in the book was far from Herzl's purpose. It was only in the spring of 1896 that the "Judenstaat" was published in Vienna. Translations of it were soon made into French, English, and Hebrew; and the original German has now (1905) gone through five editions (see also "Theodor Herzl's Zionistische Schriften," Berlin, 1905). The theories here laid down and the propositions made for their realization may be summed up in the following statement:

Starting with the fact that anti-Semitism is a continually growing menace both to the Jews and to the world at large and is ineradicable, that the Jews are a people that are not permitted to merge into

the social life around them, that true assimilation is possible only by means of intermarriage, he comes to the conclusion that it is necessary for the Jews, if they wish to preserve themselves, to have as their own some portion of the globe large enough for them to foregather therein and to build up a definite home. For the accomplishment of this object he suggests the formation of a "Society of Jews," which shall take up the preliminary scientific and political work, and of a "Jewish Company" similar to the great English and French trading companies, with a capital of £50,000,000 and having its center in London. The company was to develop the work prepared by the Society of Jews, and to organize the new community. As a possible territory for such an ingathering Herzl suggested either Argentina or Palestine; the incoming was to be brought about not by infiltration, but by organized immigration; and if Palestine was to be chosen, the sanctuaries of other religious faiths were to be made extraterritorial. It will be seen that the religious sanction, which had been the mainspring of the Orthodox Jewish hope in the restoration, was entirely wanting. The problem was attacked simply from its economic and political sides. In course of time, and as Herzl came into closer contact with his Jewish brethren than he had been before, he began to recognize the value of the religious sanction, as far as a large section of the Jewish people was concerned, and to see that the Jewish national consciousness was bound indissolubly to Palestine. The absolute separation, however, of church and state remained one of the fundamental ideas of his project; the arrangements between the Ottoman government and the Jews was to be in the form of a charter granted to the latter upon a purely political and mercantile basis.

It was largely through the instrumentality of Israel Zangwill that Herzl was induced to present his project publicly to the Jewish world. He was received by the Maccabæans in London Nov. 24, 1895. In a preliminary letter to the "Jewish Chronicle" (London, Jan. 17, 1896) he laid down the principal features of his plan; and on July 6, 1896, he was able to present the project in person to the Maccabæans. **Herzl's Reception in London.** though his "Judenstaat" had been translated (by Sylvie d'Avigdor) into English, and despite the publicity given to it by his appearance in London, the Jews in England, and even the old Chovevei Zion, refused to approve the new expression given to the old hope. On the Continent, however, such men as Max Nordau and Alexander Marmorek in Paris, Dr. Max Bodenheimer in Cologne, Prof. M. Mandelstamm in Kiev, and a number of other intellectuals came to his support.

However much Herzl had wished to remain in his purely literary career as feuilletonist, dramatist, and journalist, circumstances proved too strong. He had touched the core of the Jewish question as many of his brethren saw it, and reached the heart of the Jewish people. The wave of enthusiasm gradually pushed him forward and bore him high upon its crest. The first to take up the "Judenstaat" as a realizable program was the Zion Society in Vienna. Several thousand names were subscribed to an address sent out by Drs. M. T.

Schuirer and Oser Kokesch calling for the formation of a "Society of Jews" to be founded in July, 1896, in London; and a letter of adhesion to Herzl's principles was forwarded in the month of May to Herzl by the above-named as representing their society. According to Lucien Wolf ("Encyc. Brit." s. r. "Zionism") the Sultan of Turkey, having heard of Herzl's publication, sent a private messenger, the Chevalier de Newlinsky, in May, 1896, with the offer of a charter of Palestine for the Jews if they would use their influence to stop the agitation consequent upon the Armenian massacres. The offer was refused.

Herzl's call for the First Zionist Congress, which was to have been held in Munich in 1898, brought the whole subject prominently and forcibly before the Jewish public. In some quarters it was supposed that the gathering was to deal with general Jewish questions, and not specifically with Zionism (Bambus, in "Allg. Zeit. des Jud." April 23, 1897)—a misconception which could not possibly be due to those who had issued the call. But misconceptions were apt to occur, since feeling ran high on the part of both those who favored and those who opposed the Zionist proposition. It may be said at the outset that the Jewish people did not answer to the call of Dr. Herzl as he and his followers had expected. Only in certain quarters did there gather around him Jews who had been in a measure prepared for his coming. Those who had been affected by the Jewish national idea naturally looked to him as their standard-bearer. The Jewish masses, groaning under oppression in eastern Europe, saw in him their possible savior; and those of them who had escaped to western Europe and America were not slow to follow the lead of their brethren left behind. In addition to these a comparatively small number of intellectuals came to Herzl's aid. Some were moved thereto either by the results of the academic discussion of the questions involved, or by a reawakened feeling of attachment to old scenes and thoughts from which they had become estranged. Others in their own persons or in their immediate surroundings had felt the sting of anti-Semitism; while a large number were attracted to the new movement from a feeling of benevolent compassion for the sufferings of their more unfortunate brethren.

Opposition to Zionism arose from many quarters; and even as the movement embraced within its fold Jews of various religious convictions, so did the opposition emanate from different points of the horizon. Orthodox Judaism in Europe at first held severely aloof, believing that because some of the leaders were non-observants of Jewish ceremonial, the whole movement set rather away from than toward positive Judaism. It was supposed to be forcing the

**Opposition.** hand of Providence and to be contrary to the positive teachings of Orthodox Judaism in regard to the coming of the Messiah and the providential work of God in bringing about the restoration. In Russia the extreme Orthodox synagogue, not content with a simple protest, organized an active opposition which had for its center the Poltava rabbi Akiba Rabinowitz and the magazine "Ha-Peles" in Wilna. A library opened there by the

Zionists on April 14, 1902, had to be closed for a time. In common parlance this opposition was spoken of as the "Black Cabinet" (Lishkah ha-Shehorah).

A more theological aspect was given to the opposition by some of the European rabbis. Dr. Güdemann, chief rabbi of Vienna, in his "National-Judenthum" (Leipsic and Vienna, 1897) says that Israel has been since the Dispersion a purely religious community, a leader of peoples; that its historical task has consisted in opposing the idea of nationalism; and that if Judaism should reawaken in all its adherents the endeavor again to become a nation, it would be committing suicide. According to Güdemann, the vocation of Israel lies in the spiritual impress that it has been able to put upon humanity and in its endeavor to further the Messianic time which shall conciliate nations to one another. He holds that Judaism has acclimatized itself everywhere; that Zion is only a symbol of its own and mankind's future; that in this sense the word is used in the prayer-book of the Synagogue, and that true Zionism can not be separated from the future of humanity. In a similar spirit K. Kohler formulates his opposition to Zionism. He does not call himself an anti-Zionist; but believes that in a positive way Judaism has another future before it. For him Judaism is a religious truth entrusted to a nation destined to interlink all nations and sects, classes and races of men; its duty is to be a cosmopolitan factor of humanity, basing itself upon the Biblical passage, "Ye shall be unto Me a kingdom of priests and a holy nation." "The mission of the Jew is not only spiritual or religious in character; it is social and intellectual as well, and the true Zionism demands of the Jews to be martyrs in the cause of truth and justice and peace until the Lord is one and the world one." He repudiates the idea that Judea is the home of the Jew—an idea which "unhomes" the Jew all over the wide earth—and holds the entire propaganda a Utopian dream because even if Turkey were willing, none of the great powers of Christendom would concede the Holy Land to the Jew; that the high temperature of Palestine would no longer afford him a congenial and healthful soil; that Palestine has poor prospects of ever becoming a leading state and of attracting Jewish capital; that the incongruous elements of which a Jewish state would be composed would militate against a harmonious blending into one great commonwealth; and that so petty a commonwealth would be unable to cope successfully with the hostile forces arrayed against it. However, he looks with favor upon the colonization of Palestine by the Jews, and sees the "possibility of Zionism leading to a united Judaism and a pan-Judean congress" (see "The Judeans," pp. 68 *et seq.*, New York, 1899). Claude Montefiore proclaimed himself a convinced and determined antagonist of the plan on the ground that Zionism is calculated to beget and foster anti-Semitic feelings, more especially when it is looked upon as a glorious ideal instead of a mournful necessity. The Jews, he thinks, are to fight the good fight, not to despair, but with self-purification and brave endurance to await the better time that civilization will shortly bring, when their fellow citizens will claim them as their own (*ib.* pp. 86 *et seq.*).

Strong denunciations of Zionism were heard, especially in Germany. The appearance of the party organ "Die Welt" was declared to be a misfortune ("Allg. Zeit. des Jud." June 11, 1897); G. Karpeles maintaining even that Judaism was no religion, but a "sittliche Weltanschauung und geschichtliche Thatsache" ("Die Welt," 1905, No. viii.). In the name of the Association of Jewish Rabbis of Germany, S. Maybaum (Berlin) and H. Vogelstein (Stettin) issued a protest against the Zionists, who were declared to be "fauatics from Russia and youthful, hot-headed students." In a preliminary communication the protesters laid down the following principles: that the Jews are nothing more than a religious body, and those in Germany national Germans, though as such faithful to the divine religion of Sinai. They demanded a united protest of all the German congregations against political Zionism; anti-agitation to counteract that of the Zionists; and a public declaration of all societies composed of rabbis and teachers against the movement. Dr. Leimdörfer (Hamburg) associated himself with this protest (*ib.* June 11 and July 2, 1897). In Hanover the advocate Dr. Meyer proposed in addition an anti-Zionist meeting in Berlin at which the Jews should proclaim their German patriotic sentiments and in this way disarm the Zionists (*ib.*). No such action, however, seems to have been taken; though, in England, several rabbis were inhibited by the chief rabbi from preaching on Zionism, and the haham M. Gaster was prevented by the Mahamad of the Spanish and Portuguese congregation from touching on the subject in his official capacity (1899). The

formal protest appeared in the "Allgemeine Zeitung des Judenthums," July 16, 1897, signed by the Board of Rabbis. Ministers. It states, first, that the attempts of the Zionists to found a Jewish national state in Palestine are contrary to the Messianic promises of Judaism as laid down in Holy Writ and in the later religious authorities; secondly, that Judaism demands of its adherents to serve the state in which they live and in every way to further its national interests; thirdly, that no opposition thereto can be seen in the noble plan to colonize Palestine with Jewish agriculturists, because that plan has no connection with the founding of a national state. In the same spirit the Conference of American Rabbis, which met at Richmond, Va., on Dec. 31, 1898, declared itself as opposed to the whole Zionist movement on the ground (as one of the members stated) "that America was the Jews' Jerusalem and Washington their Zion."

A like uncompromising attitude against Zionism has been taken in England by Lucien Wolf. Starting with a bias not indistinctly favorable to the plan as formulated by Herzl, he has come to hold not only the impracticability of the scheme, but the untenableness of its premises. He believes that the Jews are of Aryan origin and that they are not anthropologically a separate race (a view held also by Solomon Reinach; see "R. E. J." xlvii. 1), and that at a later time only a centrietal anthropological movement set in; that there is peril in Zionism, in that it is the natural and abiding ally of anti-Semitism and its most powerful justification; that it is

an attempt to turn back the course of modern Jewish history; that it is "an ignorant and narrow-minded view of a great problem—ignorant because it takes no account of the decisive element of progress in history; and narrow-minded because it confounds a political memory with a religious ideal." As a means of alleviating Jewish distress in eastern Europe, Wolf considers it inadequate and in a certain sense unnecessary. The chances of emancipation in Russia he holds to be by no means desperate; and the Rumanian Jewish question he thinks is greatly improved and "a manageable one." The mission of the

Jew is the Mendelssohnian one: to show an example to the nations, to take its stand on lofty toleration and real universalism, and "its highest traditional ideal is undoubtedly national, but it is not the nation of a kept principality but the holy nation of a kingdom of priests" ("The Zionist Peril," in "J. Q. R." xvii. 1-25).

From the point of view of its effect upon the status of Jews in western Europe and America, Zionism has been strongly criticized by Laurie Magnus. This criticism may be summed up in the following extract:

"A flight which is no flight, an abandonment, and an evacuation—this is the modern rendering of the Messianic hope: instead of Gentiles coming to the light, Dr. Herzl offers the petty picture of Jews content, like foreign visitors, with a 'favorable welcome and treatment.' We have called this a travesty of Judaism. But it is more than satire—it is treason. Dr. Herzl and those who think with him are traitors to the history of the Jews, which they misread and misinterpret. They are themselves part authors of the anti-Semitism which they profess to slay. For how can the European countries which the Jews propose to 'abandon' justify their retention of the Jews? And why should civil equality have been won by the strenuous exertion of the Jews, if the Jews themselves be the first to 'evacuate' their position, and to claim the bare courtesy of 'foreign visitors'?" ("Aspects of the Jewish Question," p. 18, London, 1902).

This is also practically the position taken by Prof. Ludwig Geiger, the leader of the liberal Jews in Berlin, though with more special reference to the particular country in which he lives. He says:

"Zionism is as dangerous to the German spirit ["Deutschthum"] as are social democracy and ultramontaniam. It has something of each; of the one its radicalism, of the other its ultramontaniam ["Jenseitige"], the desire for a fatherland other than that belonging to it by language and culture. . . . Zionism may be able to raise its army up to hundreds of thousands, if no hindrance is placed in its way. Just as we are warned against ultramontane works on history and Social-Democratic teachings, so must we be warned against Zionist sophisms ["Afterweisheit"]. The German Jew who has a voice in German literature must, as he has been accustomed to for the last century and a half, look upon Germany alone as his fatherland, upon the German language as his mother tongue; and the future of that nation must remain the only one upon which he bases his hopes. Any desire to form together with his coreligionists a people outside of Germany is, not to speak of its impracticability, downright thanklessness toward the nation in whose midst he lives—a chimera; for the German Jew is a German in his national peculiarities, and Zion is for him the land only of the past, not of the future."

No opponent of Zionism has dared to say what Geiger adds:

"The withdrawal of citizen's rights appears to be the necessary consequence of German legislation against Zionism, the only answer that the German national conscience can give" (see "Stimmen der Wahrheit," pp. 165 *et seq.*, Berlin, 1905).

While criticisms such as these touched upon the basal principles of Zionism, other criticisms dealt in charges which are evidence of the

**Minor strong feeling raised on all sides in Objections.** Jewry by the successive progress of the Zionist movement. The "Univers Israélite" summed up the matter in saying:

"The long and short of it is, Zionists and anti-Semites are one and the same." The "Reform Advocate" of Chicago spoke of the "Anti-Semites, his [Herzl's] friends" (March 12, 1898). A rabbi in Marburg classed Zionism as "Messiaschwärmerel"; and the traveler Edward Glaser believed that Zionism was put forward by the British government in order to break up Turkey and form a buffer state. The hakam bashi in Constantinople posted a notice in the synagogue putting the Hebrew paper "Ha-Zefrah" under the ban; and Dr. Bloch, editor of the Vienna "Wochenschrift," first endeavored to procure a subvention from the Zionists, offering to give up eight pages of his newspaper to the cause, if "Die Welt" ceased to appear ("Die Welt," ii., No. 48); failing which, he became a most determined opponent. S. Bernfeld's "Am Ende des Jahrhunderts" (1899) has a bare mention of Zionism and the congresses; while that portion of the year's review by Martin Philipsohn in the "Jahrbuch für Jüdische Geschichte," 1898, mentioning the Basel Congress of 1897, was stricken out by the editor, G. Karpeles. When the "Trust" was founded, the report was spread that each of the directors was to have a bonus of 100,000 marks for passing the statutes, and that the sole object of the corporation was to combat Orthodoxy. The London "Financial News" (April 28, 1899, p. 872) spoke of the "harebrained and irresponsible promoters of the ridiculous Trust."

In the United States, too, the opposition grew apace.

The "Reform Advocate" in Chicago suggested editorially that the real object of Herzl and Nordau was to possess themselves of the savings of their poorer brethren. Isaac M. Wise, president of the Hebrew Union College, thought that the Zionists were "traitors, hypocrites, or fantastic fools whose thoughts, settlements, and actions are in constant contradiction to one another" ("Hebrew Union College Journal," Dec., 1899, p. 47); while Rabbi Samfeld wrote in the "Jewish Spectator" that "Zionism is an abnormal eruption of perverted sentiment." Prof. Louis Grossman held that the "Zionistic agitation contradicts everything that is typical of Jews and Judaism," and that the "Zionistic movement is a mark of ingenuity, and does not come out of the heart of Judaism, either ancient or contemporary" ("Hebrew Union College Journal," Dec., 1899, p. 72).

On the other hand, the attitude of the Christian world toward Zionism has been in nearly every case one of cordial attention; in some quarters, even one of active furtherance. While those of

**Christian Attitude.** were in Jewish hands either accorded the movement scanty attention or were absolutely silent (the Vienna "Neue Freie Presse," of which Herzl was feuilleton editor, never mentioned the word "Zionism" as long as Herzl lived), the other great dailies of the world freely opened their columns to news of the movement, as did also the great monthlies and quarterlies in England and the United States (e.g., "Contemporary Review," "Nineteenth Century," "Forum," "Fortnightly Review," "North American Review," "International Review," and "Century"). In Oct., 1897, the London "Daily Chronicle" and the "Pall Mall Gazette" publicly accepted the Zionist program and advocated the calling of a general European Congress. Many Christians, it is true, were led to such a course by religious hopes of a Messianic return of the Jews to Palestine and their possible conversion there; although the German "Allgemeine Missions Konferenz" declared that

"Zionism will not hasten the conversion of Israel, but rather delay it" ("Nathaniel," 1901). Others, however, had a sincere desire to advance this attempt at Jewish self-help.

In addition to those mentioned above who had been actively engaged in one project or another, there are a large number who by their voice and otherwise have encouraged Zionism. As early as 1885 Prof. K. Furrer of Zurich University spurred on the Russian Jewish students to work for the colonization of Palestine by the Jews; and in 1904 Secretary John Hay of the United States declared in an interview that Zionism was in his opinion quite consistent with American patriotism. The Grand Duke of Baden on Aug. 4, 1899, uttered these words to Dr. A. Berliner: "The movement is an important one and deserves vigorous assistance." The Preraphaelite painter Holman Hunt was one of the first to greet Herzl's proposal in London (1896) with friendly assistance. He has done the same (1905) to Israel Zangwill and the Territorialists. The Rev. W. H. Hechler of Vienna has been a constant attendant at the congresses, and has been of actual assistance in other directions. Prof. F. Heman of Basel, the author of "Das Aufwachen der Jüdischen Nation" (Basel, 1899), also deserves mention, as he sees in Zionism a conciliatory force, bringing Jews and Christians nearer to each other. Among those who have publicly pronounced themselves in favor of Zionism may be mentioned Leon Bourgois, the Rumanian premier Stourdza, Baron Maxim Manteuffel, Bertha von Suttner, Felix Dahn, Karl Peters, Prof. T. A. Masaryk, Björnsterne Björnsen, Rider Haggard, Hall Caine, Maxim Gorki, and Prof. Thomas Davidson. The philosopher Edward von Hartmann, however, is of opinion that Zionism plays into the hands of the anti-Semites, and August Rohling in his "Auf nach Zion" (1901) did indeed give color to this idea; but the conference of political anti-Semites in Hamburg in the year 1899 declared it necessary to oppose the movement, as it awakened sympathy for the Jews among the Christian population. The theological faculty of the University of Geneva set as the subject for the prize essay of the year 1905 the theme "Le Sionisme et Ses Aspirations Actuelles." A collection of opinions has been published by Emil Kronberger, "Zionisten und Christen," Leipzig, 1900, and by Hugo Hoppe, "Herrvorragende Nichtjuden über den Zionismus," Königsberg, 1904.

Though the number of shekel-paying Zionists has increased largely year by year, the opposition sketched above has hardly diminished, except in the case of those whose spokesman has been Lucien Wolf (see below). A large section of Orthodox Jewry still sees in Zionism or rather in its promoters a danger to established custom and time-honored rites, despite the fact that a specific resolution of the Second Basel Congress declared that Zionism would do nothing to militate against such customs and such rites. The Orthodox rabbis at Grodno in 1903 declared themselves opposed to the movement, as did a number of Hungarian rabbis in 1904. On the other hand, the Haside Ziyyon of Lodz is made up of Hasidim; and such men as Samuel Mohilever, Chief Rabbi J. H. Dünner in Holland, the hakam M. Gaster in England, and H. Pereira Mendes in

New York have joined the Zionist ranks. The stumbling-block has been the "Kultur-Frage," the question of the relation of Zionism to modern education and to the modern point

**The "Kultur-Frage."** of view. The use of the word "Kultur" in this connection was unfortunate, as the east-European Jew had been led to regard this term as connoting certain distinctive and anti-religious tendencies of modern society. The doubt has remained, despite all attempts to clear up the difficulty by definition. The question was mooted at the First Basel Congress (on the proposition of Birnbaum), but was really taken up at the Third, Fourth, and Fifth Congresses, at the last of which it was made part of the party's program. The advocacy of physical and mental advancement upon modern lines, has provoked the opposition of a large body of Orthodox Jews, who otherwise might have joined the Zionist body, as the idea of the restoration still forms a part of their theological equipment. The Jews connected with Reform synagogues, and those outside any distinctively Jewish organization, in most cases still look upon Zionism as a reaction, not only from a theological point of view, but from the standpoint of general culture as well; and this last, despite the reiterated pronouncements made at various congresses. In his opening address at the First Congress Herzl said: "We have no thought of giving up even one foot of the culture that we have acquired; on the contrary, we wish to broaden that culture," and at the Third Congress he added, "We desire to lift ourselves up to a higher moral plane, to open up new means of communication between nations and prepare the way for social justice. Just as the poet weaves songs out of his own pain, so shall we prepare from out of our own suffering the advancement of mankind in whose service we are." In fact, a formal resolution was adopted at the Second Congress to this effect: "Zionism seeks not only the economic and political but also the spiritual rebirth of the Jewish people and must ever remain upon the stand of modern culture, whose achievements it highly values."

To a still larger number of Jews, who might perhaps sympathize with Zionism, the seeming impracticability of carrying out the platform and the supposed insuperable difficulties in finding a home for the Jews in and around Palestine, coupled with the peculiar political circumstances which render those countries the bone of contention among the European powers, stand in the way; though some of those who now stand aloof have shown a readiness to join the Zionist ranks if another, and to their eyes more practical, policy should be evolved—*e.g.*, that connected with the offer of territory in East Africa (see below).

In spite of all opposition Herzl continued the elaboration of the policy set forth in the "Judenstaat." The first part of his program

**The Basel Congress.** was the calling of a congress of such Jews and such Jewish organizations as sympathized with the new movement. This congress was to have been held in Munich; but the Kultusvorstand of the Munich Congregation memorialized the committee that had

it in charge, asking them to change its venue. In face of this determined attitude on the part of the leaders of the community, the place of meeting was changed in July to Basel. At this congress there were 204 delegates. It is notable that the B'nai B'rith lodges in Rumauia sent two delegates; while the English Chovevei Zion organizations were not represented, on the ground that the congress was "dangerous." Additional difficulties attended the holding of this congress. Part vii. of the first volume of "Die Welt" had been confiscated by the Austrian authorities. Most of the Jewish newspapers of Europe had been actively opposed to Zionism, while that part of the daily press which was in any way controlled by Jews pursued a consistent policy of silence. Among the delegates there were representatives of the various Jewish national bodies, though most of the members came in their private capacity. The great Jewish beneficiary organizations of Europe and America were entirely without representation; and, with one or two exceptions, they kept themselves entirely free from any connection with Zionism. However, a number of noted Christians, whose interest was either purely humanitarian or theological, testified by their attendance to the kindly interest which large sections of the non-Jewish world brought to the new movement. Among such were Dunant, the founder of the Red Cross Society; the Rev. M. Mitchell; the Rev. Mr. Hechler, chaplain to the British embassy in Vienna; Baron Manteuffel; Col. Count Bentinck; and Dr. Johannes Lipsius, the editor of "Der Christliche Orient." This First Congress was in the main a manifestation; though the organization of the movement was commenced there and a number of propositions made which were carried out at a subsequent period; *e.g.*, the promotion of the study of the Hebrew language and literature, in the discussion of which the plan for a proposed Jewish high school in Jaffa or Jerusalem was brought forward; the formation of a general Hebrew school organization and a special literature commission (Chief Rabbi Ehrenpreis of Bulgaria); the formation of a Jewish national fund (Professor Shapira of Heidelberg). At this congress the Basel Program was drawn up, which states the object of Zionism to be "the establishing for the Jewish people a publicly and legally assured home in Palestine" (see Th. Herzl in the "Contemporary Review," 1897, pp. 587-600; German translation, "Der Baseler Congress," Vienna, 1897).

Between the First and Second Congresses the Actions Committee elected at the former busied itself with furthering the propaganda by means of a number of pamphlets, such as the addresses of Herzl and Nordau at the First Congress; "Das

**Propaganda** Ende der Juden Noth," by York-Steiner, in German, Hebrew, and Yiddish; **After the First Congress.** Nordau's "Ueber die Gegner des Zionismus"; and a pamphlet setting forth the aims of Zionism, printed in Hebrew, Arabic, and French for use in

the East. It furthered also the organization of the various groups that had sprung up; and it took the first measures for the founding of the Jewish Colonial Trust. A prefatory conference of the Actions Committee, together with some of the leaders from

various countries, was held in Vienna in April, 1898; and the Second Congress met in Basel Aug. 28-31 of that year. The spread of the movement may be gaged by the number of Zionist societies and groups that had come into being since the First Congress:

\* New York, 26; Chicago, 8.

A Russian preliminary conference had been held in Warsaw at which about 140 delegates took part, and a second one was held at Basel, those attending being Orthodox rabbis, presided over by Haham M. Gaster of London. More than forty telegrams of adhesion were received from Orthodox rabbis; and besides a number of crown rabbis of Russia, there were also present representatives of the Hasidim. A special colonization committee was appointed with a view to furthering colonization on the basis of the consent of the Turkish government; and an agreement was reached as to the formation of the Jewish Colonial Trust, a committee of nine being appointed for that purpose, with D. Wolfssohn of Cologne at the head. The founding of a general Hebrew-speaking nation was proposed by Chief Rabbi Ehrenpreis of Bulgaria; and the resolution on "Kultur," proposed by Haham Gaster, to which reference has been made above, was accepted.

The Third Congress likewise met in Basel, Aug. 15-18, 1899. It was here that Herzl announced that his endeavors were centered upon receiving a charter from the sultan. The

**The Third and Fourth Congresses.**

report of the Actions Committee showed that the number of societies in Russia (877) had increased by 30 per cent and in other countries by 25 per cent. The shekel-payers numbered more than 100,000, which meant that probably a quarter of a million Jews were actively identified with the Zionist movement. All the Chovevei Zionists in Rumania had become members of the congress. A new scheme of organization was submitted, which had for its object the building up of the inner structure of the movement. The "Kultur" question was further discussed, in the attempt to make it clear that "Kultur" in no way militated against Judaism in any form. The question of colonization in Cyprus was brought up by Davis Trietsch, who had held a preliminary conference to consider the proposal; but he was not allowed to proceed with the question in open congress, the great majority of the members being decidedly averse to even a consideration of the proposal.

The Fourth Congress was transferred to London, where it met in Queen's Hall Aug. 13-16, 1900. The transfer was made with a view to influencing British public opinion still further, as in no country had the Zionist propaganda been received by the

general public with more understanding or with greater sympathy. During the year that had elapsed the Russian societies had increased to 1,034, those of England to 38, and those of the United States to 135; while in a small country like Bulgaria there were no less than 42 such societies.

The hopes of the Zionist body in regard to Palestine and the good intentions of the sovereign power there were somewhat dampened by the instructions sent by the Porte in Nov., 1900, making it impossible for Jewish visitors to Palestine to remain there for a period longer than three months. The Italian government immediately protested that it made no difference between its Jewish and its Christian subjects; and the matter having been brought to the attention of Secretary Hay, the American ambassador in Constantinople was on Feb. 28, 1901, instructed to make a similar protest in the name of the United States government. This action by the Porte, which was merely the revival of a regulation that had been issued about fifteen or twenty years previously, was in many quarters said to have been due to the renewed Zionist activity; but on May 17, 1901, the sultan himself received Herzl in audience, the latter being accompanied by two other members of the Actions Committee, David Wolfssohn and Osear Marmorek.

**Herzl's Interview with the Sultan.**

Herzl was received on two further occasions; and upon leaving, the sultan conferred upon him the grand cordon of the Order of the Mejdide. From Constantinople Herzl went to London, where on June 11, 1901, he was again received by the Maccabæans, on which occasion he spoke with much confidence of the success of his mission to the sultan and asked the Jewish people for £1,500,000 in addition to the money in the bank for the purpose of obtaining the charter. But the Jewish people kept silent; and the negotiations which had proceeded so far were for the moment in abeyance.

The Fifth Congress was held at Basel in 1901, this time during the winter, Dec. 26-30. The new organization statutes were here finally accepted. They called for a meeting of the congress once every two years; and in the interval between the congresses a meeting of the Larger Actions Committee and the leaders in the various countries was to be held. It was also decided that a new territorial organization could be founded in any land if 5,000 shekel-payers demanded the same. All arrangements for opening the bank had been made; resolutions were passed to give a subvention to the National Library in Jerusalem, and as to the necessity of a Hebrew encyclopedia and the founding of a statistical bureau. A severe criticism of the Baron de Hirsch Trust was made by I. Zangwill, but his motion was not put before the congress. There was again along "Kultur" debate, which ended in the following pronouncement: "The

**Zangwill at the Fourth Congress.**

congress declares spiritual amelioration ["kulturelle Hebung"], i.e., the education of the Jewish people along national lines, to be one of the chief elements of the Zionist program, and lays it as a duty upon every Zionist to work toward that end." During this congress thirty-seven delegates, comprising the Democratic Fraction,

headed by Berthold Feiwel, being dissatisfied with the ruling of the president, left the congress in a body, but returned after the demonstration had been made.

On July 10, 1902, Herzl appeared before the Royal Immigration Commission, sitting in London, to determine what measures, if any, should be taken to prevent the large influx of a foreign proletariat into England. Herzl's plea was for a regulation of immigration, as far as the Jews were concerned, rather at its source in eastern Europe than at its outlet in western Europe and America. In the summer of the same year a deputation of the German Zionist body was received in audience at Carlsruhe by the Grand Duke of Baden, who has on several occasions testified to his deep interest in the movement.

In the autumn of 1898 and after preliminary audiences in Potsdam and Constantinople, Emperor William II. of Germany publicly received a Zionist deputation in Palestine. The delegation consisted of Dr. Theodor Herzl, Dr. M. T. Schnirer, D. Wolfsohn, Dr. M. Bodenheimer, and Engineer Seidener, president of the Zionist groups in Germany; and, after an introductory greeting on Oct. 28 at the Colony Mikweh Yisrael near Jaffa, it was received on Nov. 2 in the imperial tent in Jerusalem, State Secretary von Bülow being present. In answer to the address presented, the emperor said that "all such endeavors, as aiming at the promotion of Palestinian agriculture to the weal of the Turkish empire, and having due respect to the sovereignty of the sultan, might be sure of his good-will and interest."

Both at this time and subsequently Herzl had interviews with the sultan. His original program meant an understanding with that ruler upon the basis of a regulation of the Turkish finances ("Die Welt," i., No. 1). He tried also to impress upon the sultan the perfect loyalty of the Zionist body, as

shown in the public manner in which it dealt with the problem and in its opposition to any form of small colonization which meant the smuggling in of Jews to Palestine against the wishes of the sovereign power, as well as the value to Turkey of an industrious, law-abiding, and progressive element in the country. The concessions on the part of the sultan were to be in the form of a charter, the Turkish

government affording the Jews a large amount of municipal self-government, the Jews on their part paying a certain sum upon the delivery of the concession and a yearly tribute after that. The status was to be similar to that of the Island of Samos, which, on account of the part it had taken in the liberation of Greece in 1821, was accorded on Dec. 11, 1832, through the intervention of England, France, and Russia, a Christian autonomous prince, having his own army, flag, and congress, and paying to the sultan a yearly tribute of 300,000 piasters (W. Miller, in "The Speaker," 1898, p. 579). Though upon several occasions Herzl believed himself near to the realization of his policy, it failed because of the lack of monetary support from the Jews. At a later period the sultan proposed a scattered colonization of the Jews in the Turkish empire, which Herzl was bound to refuse, as being incompatible with the Basel

Interview Between William II. of Germany and Theodor Herzl

Program and the needs of the Jewish national movement ("Protokoll" of the Sixth Zionist Congress, p. 6).

In October of the same year (1898) negotiations were opened with some members of the English government for a land concession in the Sinai Peninsula. These negotiations were continued in Cairo by L. J. Greenberg with Lord Cromer and the Egyptian government. A commission, consisting of Engineer Kessler, Architect Marmorek, Captain Goldsmid, Engineer Stephens, Professor Laurant, Dr. S. Soskin,

Dr. Hillel Joffe, and Mr. Humphreys, representing the Egyptian government, left Egypt at the beginning of 1903 to make an exhaustive study of the territory under consideration; and it returned toward the end of March. The Egyptian government, although in part agreeing to the demands for a Jewish administration and extended municipal powers in the proposed settlement at Al 'Arish, felt itself not warranted in agreeing to the concession on account of the lack of water, which would necessitate the use of a certain portion of the Nile. It may be added that the Jewish Colonization Association had shown itself not unwilling to lend its assistance, had the concession been granted ("Die Welt," 1904, No. 1).

Russia having furnished the greatest number of Zionists, the trend of sentiment in that country may briefly be indicated. At the Minsk

**Zionism in Russia.** Congress held in Sept., 1902, 500 delegates attended, representing the Orthodox Party, the Democratic Fraction, a so-called Center Party, and the socialistic Bund. At this meeting the relation of orthodoxy to radicalism, the "Kultur" question, and especially colonization in Palestine were discussed. The congress was not indisposed to unite with non-Zionist colonization societies for the immediate purchase of land in Palestine, thus making the first break in the rigidity of the Basel Platform. Resolutions were passed to the effect that all moneys belonging to the National Fund should be used only for the purchasing of land in Palestine, and that the paragraphs of the National Fund statutes should be so changed as to preclude the collection of capital to which restrictions were attached (see M. Nurock, "Der i. Allrussische Zionisten-Congress in Minsk," Riga, 1902).

The year 1903 is memorable in the annals of Zionism. On June 24, Von Plehve, the Russian minister of the interior, issued a secret circular to the governors, city prefects, and chiefs of police, putting a ban upon all Zionist meetings and forbidding all collections for Zionist purposes. The moneys belonging to the Trust and to the Jewish National Fund, and the shekel collections were to be turned over to the Odessa society for assisting Jewish agriculturists in Palestine. The reason given for this action was the supposed impossibility of realizing the Zionist program except in the distant future; but the real motive was the fear that Jewish Socialists might make use of the Zionist platform for the propagation of their theories ("The Times," London, Sept. 2 and 11). This, together with the distressing condition of the Jews in general in that country, induced Herzl to visit Russia early in Aug., 1903. He there had interviews with Witte and Von Plehve, and was joyfully acclaimed by the Jewish proletariat of the cities through which he passed. The result of his interview with Von Plehve is given in a letter to Herzl dated Aug. 12, and published at the Sixth Zionist Congress. In it

**Herzl's Interview with Von Plehve.**

Von Plehve promises that if the Zionist movement confines its agitation to the creation of an independent state in Palestine and to the organized emigration from Russia of a certain number of Jewish inhabitants, the Russian government will give its

moral and material support to Zionist negotiations at Constantinople, and will facilitate the work of the emigration societies with certain moneys contributed by the Jews of Russia ("Die Welt," Aug. 25, 1903).

Ever since the negotiations in regard to Al 'Arish, Herzl and his agents had kept in contact with the English government. The project to effect a Jewish colonization in the East-African Protectorate seems not to have been an entire surprise. In the "Jewish Chronicle" of July, 1903, it was mooted by Robert T. Yates. It was, however, in no way sought by the Zionist leaders, but was spontaneously offered to Dr. Herzl by Joseph Chamberlain, after the latter's visit to South Africa upon the close of the Boer war. In an official letter dated from the Foreign Office, Aug. 14, 1903, Clement Hill wrote to L. J. Greenberg in regard to "the form of an agreement which Dr. Herzl proposes should be entered into between His Majesty's government and the Jewish Colonial Trust, Ltd., for the establishment of a Jewish settlement in East Africa." Hill was directed by the Marquis of Lansdowne to say:

"That he has studied the question with the interest which His Majesty's government must always take in any well considered scheme for the amelioration of the position of the Jewish race . . . If a site can be found which the Trust and His Majesty's Commissioner consider suitable and which commends itself to his government, Lord Lansdowne will be prepared to entertain favorably proposals for the establishment of a Jewish colony or settlement on conditions which will enable the members to observe their national customs . . . the details of the scheme comprising as its main features the grant of a considerable area of land, the appointment of a Jewish official as the chief of the local administration, and permission to the colony to have a free hand in regard to municipal legislation as to the management of religious and purely domestic matters, such local autonomy being conditional upon the right of His Majesty's government to exercise general control."

The Sixth Congress drew near without a shadow to presage the storms that were coming. It was held in Basel Aug. 23-28, 1903. It is true that on Aug. 23 a preliminary meeting was convened, in which the Government Party was severely criticized by Alfred Nossig, who pleaded for "national education" as being more important and of more immediate necessity than the acquisition of territory; but such criticism on the part of the opposition was expected. Although the basis of representation had been raised to 200 shekel-payers, no less than 592 delegates and more than 2,000 spectators were present. The announcement by Herzl of his interview with Von Plehve created a sensation among the Russian delegates, especially among those of Socialistic proclivities; while the offer made by the British government was received with very varied feelings. In his address Herzl distinctly said: "East Africa is indeed not Zion and can never become it"; and in an eloquent oration Max Nordau spoke of such a possible settlement simply as a "Nachtasyl." The Democratic Fraction as a whole was against the proposition, as were the majority of the Russian delegates. Feeling ran very high, and at one time threatened even to disrupt the meeting. The proposition before the congress was that a commission should be sent out to examine the territory in East Africa, and that before a final vote was taken on the merits of the

question a special congress should be called for that purpose. After several days of argument a vote was taken which showed 295 affirmative and 178 negative, 90 withholding their votes entirely. This vote represented the view of the congress not as to the advisability of accepting the offer of the British government, but merely as to the proper spirit in which so generous an offer ought to be received and upon the political necessities of the moment. Nevertheless, it was taken to have a much wider meaning; and although a rider was attached to the resolution prohibiting the use of any shekel moneys or any property of the Trust for the purpose of the expedition, the Russian members of the Actions Committee and a number of Russian delegates persisted in misunderstanding the purport of the vote and created a demonstration by publicly leaving the congress.

The East-African proposal acted like a firebrand in the Zionist camp. It threatened to divide the party into two opposed halves, and meetings of protest and discussion were everywhere

**The East-** held. The misunderstanding would  
**African** not down. On the one hand, some  
**Com-** groups in Rumania went so far as to  
**mission.** commence preparations to leave for

East Africa; and a special warning had to be issued by the Actions Committee. On the other hand, the inhibition placed upon Zionist moneys for the purposes of the commission caused a long delay in the formation and despatch of that body. In Sept., 1903, the Jewish Colonization Association was asked to bear one-half of the expense of the commission; and it consented to do so on the understanding that any settlement made in East Africa should be only in the way of simple colonization, and should have no political character whatsoever. This necessitated the withdrawal of the request, the greater part of the expense of the commission being at a later time borne by Christian friends of the movement. It was also noted that a strong opposition manifested itself in East Africa. Lord Delamere, the high commissioner, sent a cable protest ("Times," London, Aug. 28), which protest was endorsed by Lord Hindlip and Sir Harry H. Johnston (*ib.* Sept. 2); the latter, however, changed his position later on ("Die Welt," 1904, p. 42). Popular feeling had been so roused among the Jews that on Dec. 19, 1903, a Russian student of unsound mind, Haim Selik Loubau, made an attempt upon the life of Max Nordau at the Zionist ball given in the Salle Charras in Paris.

Simultaneously with the Sixth General Congress the first Jewish congress was held in Palestine. It was organized and led by Usisbkin. Seventy delegates and sixty teachers met in the colony Zikron Ya'akov. It was intended to be a Basel congress in miniature.

An organization was founded, to which all Jews in Palestine were to belong who were above eighteen years of age and who paid one franc a year. The delegates were to meet once a year, chosen by groups of fifty, for which purpose Palestine was divided into six sections:

1. Jerusalem, Hebron, Mozah, and Artuf.
2. The colonies around Ramleh.
3. Jaffa and Petah Tikhwah.
4. Nazareth, Tiberias, and the colonies in the neighborhood.
5. Hudaïriyah, Zikron Ya'akov, and Haifa.

#### 6. Safed and the Galilean colonies.

There was to be an actions committee of twenty-three members and an extra-Palestinian committee containing representatives of the Odessa body, the Jewish Colonization Association, the Alliance Israélite, the Esra, and Baron Edmond Rothschild. It is not known that the organization was perfected or that either it or its committees ever held further meetings.

The Russian members of the Actions Committee when they returned home were not inactive. In Oct., 1903, most of them held a secret conference at Kharkof, at which they resolved to send a committee to Vienna to demand of Herzl a written promise to relinquish the East-African project before the convening of the Seventh Congress, and in his capacity as a leader of the Zionists to engage in no further territorial projects. He was formally to promise also to take up the work in Palestine and the acquisition of land there and in Syria with the moneys of the National Fund. An organization of the Russian Actions Committee was determined upon in order to give it greater weight in the Zionist deliberations. If Herzl should refuse to give the promises demanded, the Russians were to

**Rise of** refrain from sending further contribu-  
**Territorial-** tions to Vienna and to commence an  
**ism.** active propaganda against the Govern-  
ment Party. It was this conference

that invented the name "Territorialism." This undoubted revolutionary action on the part of many members of the Larger Actions Committee living in Russia was received with an outburst of protests from Zionist organizations throughout the world, some of which came from St. Petersburg, Odessa, Warsaw, and Baku. The delegation of the Kharkof Conference, consisting of A. A. Belkowsky, S. J. Rosenbaum, and W. J. Temkin, went to Vienna and met a session of the Larger Actions Committee on April 11, 1904. Everything was done to convince the Russian members not only of the illegality of the position they had taken, but also of the groundlessness of their fears that either Herzl or the Actions Committee had swerved one iota from the Basel Platform; and the resolutions of the Kharkof Conference were allowed to pass without action.

They were, however, to leave an indelible mark upon the Zionist movement as a whole. The opposition to the proposed offer of the English government in many quarters turned into opposition against the president of the congress. He was bitterly attacked, notably by Haham M. Gaster of London; and he felt deeply the exposed position in which he had been placed. For some time past the cares of the great Zionist movement had weighed too heavily upon him. At the Sixth Congress he had complained that his physical powers were unequal to the task, and that an affection of the heart made the great work more difficult than it otherwise would have been. Still he was unremitting in his labors. On Oct. 11, 1903, the King of Italy received Rabbi S. Margulies of Florence in the interests of Zionism, and on Jan. 25 following Herzl had audience both of the king and of Tit-

**Death of** toni, the Italian Minister of Foreign Af-  
**Herzl.** fairs. On this occasion he saw also the  
pope and Cardinal Merry del Val. On

July 3, 1904, Herzl breathed his last, a martyr to the Jewish cause. There is no doubt that the discussions

and misrepresentations consequent upon the East-African proposal aggravated the disease that was slowly mastering his body. Perhaps the only Jewish statesman of modern times who had devoted himself to the service of his people, he had done more than any single person or group of persons to give the cause dignity and standing. He had been able to unite upon a common ground factors of varying opinions and divergent interests. His fascinating personality and his diplomatic tact had made him the spokesman of his brethren. He had found the Jewish question a philanthropic and at best an agricultural one. He left it an economic and diplomatic one. Whatever his merit as a German litterateur may have been (and this was testified to most bountifully at his death), as an upholder of Jewish ideals and a liberator of his people from mental and moral serfdom he stands almost unique in Jewish annals.

The death of Herzl naturally created consternation within the Zionist body. He had united so much in his own person that he took upon himself alone many of the burdens that others should have borne with him. The question of his successor as chairman of the Actions Committee and as president of the congress naturally preoccupied all minds. On Aug. 16, 1904, a meeting of the Larger Actions Committee was called to take over the affairs of the organization, and on the 17th the annual conference was held. An additional commission to the Smaller Actions Committee was elected, consisting of Nordau, Wolfsohn, Katzenelensohn, Warburg, Tschlenow, Usishkin, Alexander Marmorek, Bodenheimer, and Greenberg, although no provision for such a commission was contained in the constitution. On Nov. 18, 1904, a Zionist deputation, consisting of N. Katzenelensohn, J. Jasnowsky, Tschlenow, and Belkowsky, had an interview with Sviatopolk-Mirsky, the new Russian Minister of the Interior; and on Dec. 4 and 5 Dr. N. Bodenheimer and others, representing the Actions Committee, attended a meeting in Frankfurt-on-the-Main for the purpose of regulating the emigration of Jews from Russia. In Jan., 1905, the Larger Actions Committee again sat in Vienna, and it was resolved to legalize the National Fund in London under the control of the Jewish Colonial Trust. The Russian Zionists meanwhile commenced to arm themselves for the struggle which it was foreseen would arise at the Seventh Congress. On Jan. 14, 1905, a conference of forty-seven persons was held in Wilna, at which it was resolved that "as regards the view which considers it possible to realize the ultimate aim of Zionism in a country other than Palestine, it is agreed that such a view is opposed to both the historic ideal of Zionism and the Basel Platform."

The East-African Commission of Inquiry which had been sent out on Dec. 25, 1902, after the committee of nine members appointed by the congress of that year had examined the project in Europe, was composed of Major A. St. H. Gibbons, Prof. Alfred Kaiser, and Engineer M. Wilbusch. The British government had proposed to leave the delimitation of the proposed Jewish settlement to the commission and to the authorities in British East Africa. Herzl, however, preferred that the government should

offer a definite territory, which it did after communicating with the high commissioner. This territory is known as the Guas Ngishu

**Question of the Guas Ngishu Plateau.** covering "an area of about 6,000 square miles, bounded in the north by a line running parallel to the equator, and the starting-point of which is the Keremkie, a western

tributary of the Kerio River, which flows into Lake Rudolf. In the west it is bounded by the line of the meridian, which is to be counted from the Kismchanga Mountain to the equator, and which terminates at the Maragolia Hills. In the south the boundary-line as far as the main slope of the so-called Rift Valley, the great East-African depression, is formed by the equator, from which point the eastern boundary-line is drawn almost due north along the Elgeyo escarpment as far as the above-mentioned Keremkie River." The report of the commission was presented to the Actions Committee May 16, 1903, and has been printed as a Zionist Blue Book in English and German (London, 1905). The opinions of the members of the commission were divided; but in general the territory offered was found to be insufficient for a large number of Jewish settlers, and to be fit rather for grazing than for agriculture.

The Seventh Congress met in Basel on July 27, 1905, the first anniversary of the funeral of Theodor Herzl. Over 800 delegates had been elected, of whom more than 600 attended. As had been anticipated, the sessions were particularly

**The Seventh Congress.** exciting; indeed, at times they became turbulent. The various parties had previously made preparations, the

Ziyyone Zionists having held a preliminary conference in Freiburg. Dr. Max Nordau was elected president. Perhaps the most interesting report presented to the congress was that of the Palestine Commission. It told of the publication of its organ "Altneuland," of a geological expedition, of meteorological observation stations established, of the mission of Dr. S. Soskin to Palestine and Syria in the interests of the culture of cotton there, and of the lecture courses on colonization held at Köthen (March 27-April 8, 1905) in connection with the local technical institute. The real interest of the congress lay, however, in the vote that was to be taken on the report of the East-African Commission. Several days were spent in its discussion, and on July 30 the special congress was held provided for in the resolution of the Sixth Congress. The conclusion was foregone. The Actions Committee had, upon receipt of the commission's report, given its opinion that the proffered land was not sufficient in extent and resources for colonization on a large scale; and the Government Party, together with the Ziyyone Zionists and the Mizrahi faction, was known to be largely in the majority. Various resolutions dealing with the subject were offered; and the following compromise was finally proposed by Alexander Marmorek in the name of the Actions Committee:

"The Seventh Zionist Congress declares: The Zionist organization stands firmly by the fundamental principle of the Basel Program, namely, 'The establishment of a legally secured,

publicly recognized home for the Jewish people in Palestine, and it rejects, either as an end or as a means of colonizing, activity outside Palestine and its adjacent lands. The Congress resolves to thank the British government for its offer of a territory in British East Africa, for the purpose of establishing there a Jewish settlement with autonomous rights. A commission having been sent out to examine the territory, and having reported thereon, the Congress resolves that the Zionist organization shall not engage itself further with the proposal. The Congress records with satisfaction the recognition accorded by the British government to the Zionist organization in its desire to bring about a solution of the Jewish problem, and expresses a sincere hope that it may be accorded the further good offices of the British government where available in any matter it may undertake in accordance with the Basel Program. The Seventh Zionist Congress recalls and emphasizes the fact that, according to article i. of the statutes of the Zionist organization, the Zionist organization includes those Jews who declare themselves to be in agreement with the Basel Program."

In the final trial of strength on this motion the Territorialists abstained from voting, while Dr. Syrkin, in the name of twenty-eight delegates belonging to the Poale Zion, presented a protest against the decision, and together with his party left the hall, refusing to take further part in the congress.

The future work of the Zionist body in Palestine was also the subject of long discussion between the Government Party and the Ziyyone Zionists. A compromise resolution was likewise effected in this regard, to wit:

"The Seventh Zionist Congress resolves that, concurrently with political and diplomatic activity, and with the object of strengthening it, the systematic promotion of the aims of the movement in Palestine shall be accomplished by the following methods: 1. Exploration. 2. Promotion of agriculture, industry, etc., on the most democratic principle possible. 3. Cultural and economic improvement and organization of Palestine Jews through the acquisition of new intellectual forces. 4. Acquisition of concessions. The Seventh Zionist Congress rejects every aimless, unsympathetic, and philanthropic colonization on a small scale which does not conform to the first point in the Basel Program."

It was further voted that no land in Palestine was to be bought with the moneys of the National Fund until this could be done in a judicial way.

It is difficult to estimate the number of Zionist societies at present (1905) in existence. They run up into many thousands, and the work they do is of varying complexions according to the needs of Jews living under different conditions. Some are purely national Jewish gatherings, others are literary, while others again are devoted to a development of social intercourse among their members. Many have libraries attached to their places of meeting, and do a certain amount of settlement work.

All have one object in view: to foster the national Jewish sentiment, and to band their members together in the further development of Jewish character. The payment of the shekel (25 cents) confers the right to vote for delegates to the congress. Yearly or half-yearly meetings are held by all the societies within a certain district, and federations are gradually being formed in the various countries. The first such organization was the **FEDERATION OF AMERICAN ZIONISTS**, founded in 1898 for the purpose of gathering into one body the societies in and around New York, but gradually including within its scope all the societies in the United States and the Philippine Islands. In 1905 this federation comprised 238 socie-

ties, with eighty societies in a second organization, the **Knights of Zion** (Chicago), only loosely connected with the federation. The **English Zionist Federation**, into which most of the older Chovevei Zion societies were merged after a conference held at Clerkenwell Town Hall, March 6, 1898, was founded in Feb., 1899, and to it were soon added the Canadian and South-African federations, the **Societati Sion Istilor diu Rominia**, the **Zionistische Vereinigung für Deutschland**, the **Niederlandsch Zionistenbund**, and the **Dansk Zionistisk Forening**. Russia is divided into thirteen "rayons," each one of which is presided over by a member of the **Larger Actions Committee**.

The constitution of the whole Zionist organization is democratic in its very foundations. Full authority resides only in the congresses, in whose hands lie the direction of all Zionist affairs and the election of all officers. While Theodor Herzl was

**Constitution.** alive the chairman of the **Smaller Actions Committee** was at the same time president of the congress. At

the Seventh Congress the two offices were separated, and it was made impossible for a member of the **Actions Committee** to be an executive officer of a congress. The congress has its own manual of procedure, which has been modified from time to time. Representation at the congress is upon the basis of one delegate for every 200 shekel-paying Zionists. Up to the Seventh Congress the president carried on the affairs of the organization with six other members living in the same city, who with him formed the **Smaller Actions Committee**. By the side of this there was a **Larger Actions Committee**, composed of the leaders of the various organizations in different countries, proposed by their own territorial organizations and elected by the congress. The number of members in this larger committee has continually grown; in 1898 it was 37, in 1900 it was 42, and in 1905 it reached 53. In this last year the **Larger Actions Committee** was made the executive body of the congress, while the **Smaller Actions Committee**, consisting of David Wolfsohn, Professor Warburg, Jacobus Kann, Kohen-Bernstein, M. Usishkin, L. J. Greenberg, and Alexander Marmorek, was simply a committee of the larger body. Wolfsohn is at present (1905) chairman of the **Smaller Actions Committee**, which has its seat in Cologne. The annual budgets of this committee from 1898 to the present time are given in the following table:

Year.	Value in Francs.	Year.	Value in Francs.
1898-1899 . . . .	158,212	1902-1903 . . . .	158,637
1899-1900 . . . .	173,018	1903-1904 . . . .	114,911
1900-1901 . . . .	146,631	1904-1905 . . . .	170,119

The founding of the **JEWISH COLONIAL TRUST** has been described elsewhere (**JEW. ENCYC.** vii. 176). Its purposes are not financial but political. As a body with corporate rights, it is the practical instrument of the Zionist organization. The original memorandum declared its purpose to be to work in Palestine, in Syria, or, when in

the opinion of the advisory council the interests of the Jewish people should demand it, in any other manner (than specified) and in any other part of the world. Fear was soon felt that this latitude was too great and opened the door to a possible misuse of the funds. The bank's activity was therefore circumscribed. At the Third Congress (Aug. 17, 1899) the clause was changed so as to read "to promote, develop, work, and carry on colonization schemes in the East, by preference in Palestine and Syria; further, to promote, develop, and carry on industries and undertakings in Palestine, in Syria, or in any other part of the world." At the Seventh Congress (Aug. 1, 1905), under the influence of the anti-territorial majority present, the action of the Trust was further circumscribed, and the clause amended so as to read "in Palestine, Syria, any other part of Asiatic Turkey, the Sinai Peninsula, and the Island of Cyprus"; but at the second special meeting called in London, Aug. 31, 1905, the proper voting power was not present and the necessary resolution could not be passed. The shares of the Trust are largely held in very small numbers, the shareholders numbering in the neighborhood of 300,000. Various means have been employed to make their purchase possible in this manner; *e.g.*, the Joint Share Clubs which were founded in London in 1901. The funds in the Trust amounted in Dec., 1903, to £296,887, and in Dec., 1904, to £321,345. Dividends of 2 per cent in 1903 and 2½ per cent in 1904 have been paid. In order to prosecute the work of the Trust in Palestine, and to give stability to Jewish interests there, it was proposed at the Fifth Congress to open up a branch at Jaffa. This was done in 1903, a new corporation, the Anglo-Palestine Company, being established, all the shares of which are held by the Jewish Colonial Trust. In Aug., 1904, a branch of the Anglo-Palestine Company was founded in Jerusalem, which is to be followed by one in Haifa. The Anglo-Palestine Company paid in 1904 a dividend of 4 per cent. The Jewish Colonial Trust has also joined in the foundation of the Palästina Handels Gesellschaft (1903, 22,500 M.) and the Deutsch Levant Baumwoll Gesellschaft (1903, 25,000 M.). At one time an attempt was made to ruin the Trust, the "Israelite" of Mayence (March 20, 1902) and a correspondent in the "Jewish Chronicle" of London (March 21, 1902) charging it with making false entries. The accusation was reproduced by Dr. Bloch in his "Wochenschrift" (Vienna). The "Jewish Chronicle," upon receipt of better information, of its own accord withdrew the charges; the other two journals were forced to do so by process of law ("Wochenschrift," Feb. 10, 1903). In 1905 the Bezalel society was formed in Germany for the purpose of introducing a more artistic development into Palestinian industries. Together with the Anglo-Palestine Company and the Palästina Handels Gesellschaft, many Jews not affiliated with Zionism have joined hands with them in this attempt to elevate Jewish workmanship in Palestine. Boris Schatz and E. M. Lilien have gone there in order to introduce a "Kunstgewerbeschule."

At the First Congress, in 1897, the idea of a Jewish National Fund (Territorial Fund) was mooted by Prof. Herman Shapira. At the Fourth (1900) it was

accepted in principle. The purpose of the Fund is to produce a permanent capital which shall be the property of the Jewish people for the exclusive purpose of buying land in Palestine. It is not to be touched until it reaches \$1,000,000, half of which sum is always to remain on hand. The statutes as laid down by the National Fund Commission were accepted by the Fifth Congress (1901); and in 1904 the Fund ("Keren Kayemet") was legally domiciled in London, its moneys being placed in possession of the Jewish Colonial Trust. The Fund is derived from the use of stamps placed on Zionist letters, invitations, and the like, from free-will offerings, and from payments made to inscribe persons and societies in the "Golden Book" ("Sefer ha-Zahab"). Since June 1, 1902, these collections have produced a little over \$205,000. The resolution to refrain from using the Fund until it has reached a certain point was violently opposed by the Ziyiyone Zionists, and a resolution against the statute was adopted by the Minsk Convention; but the Jews in Palestine themselves pleaded (1903) for the original form.

In its intellectual and spiritual influence upon the Jewish people Zionism has specifically and in many various ways influenced Jewish life. Education has been one of the principal objects in view. Thus, in the district around Yelisavetgrad it has founded about forty-eight model *hadarim*; and it has established reading-rooms, evening courses, and the like. In 1903 Zionists founded a school in Temir Khan Shusa in Daghestan, and the national school for girls (Bet ha-Sefer) in Jaffa receives an annual subvention from the society.

**Education-  
al Work.** The same is true of the Jewish Central Library (Abarbanel Library; see *Jew. Encyc.* i, 27) founded by an ardent Zionist, Joseph Chazanowicz of Byelostok. A complete program for a Jewish university was elaborated by Buber and Weizman and published by the Jüdischer Verlag (Berlin, 1901). In Paris the Université Populaire Juive owes its existence to the Zionist societies there, headed by Alexander Marmorek; and the Jewish Toynbee halls in Vienna (opened Dec. 2, 1900), Brünn, Hamburg, Lemberg, Amsterdam, and Tarnopol have had a similar origin.

In attempting to estimate the effect of the Zionist upheaval it must not be forgotten that, though it tended to consolidate previous efforts in various directions, and to create new efforts along similar lines, the movement itself was merely the culminating point of a previous development. It brought to a head the Jewish Renaissance and provided a channel into which the various activities of this renaissance might flow and find a concerted expression. This is seen, for instance, in the student organizations in Austria and partly in Germany.

Even before the rise of anti-Semitism in the former country, as early as 1882, Jewish students in Vienna, from Russia, Galicia, and Rumania, had banded together for the purpose of conserving Jewish feeling and of cherishing Jewish literature. Perez Smolenskin gave this society its name, "Kadimah," which, meaning both "Forward" and "Eastward," indicated the direction of its activity. Pinsker's "Autoemancipation" became its Bible, and its practical

interest was enlisted in the colonization of Palestine. Its first announcement in Hebrew and German upon the blackboard of the university created consternation. It was strongly opposed by the great mass of Vienna Jews, but in spite of this it continued to further the physical and mental advance of its members. The ordinary "Burschenschaften," "Corps," and "Landsmannschaften" gradually became "Judenrein," under strong pressure from without, even going so far as to declare the Jewish students unworthy of satisfaction by duel. The answer on the part of the Jewish students was the formation of further societies: in 1892 the "Unitas" for students coming from Moravia, and the "Ivria" for students from northern Moravia and Silesia (reorganized 1894); in 1895 the "Libanonia," at first for veterinary students, and later on for students at large; in 1897 the "Bar Kochba" for those coming from Galicia, in which Hebrew courses of instruction were established; and in 1898 the "Maccabaea" for technical students, and the "Bar Giora" for students from the south-Slavic countries. The "Rede- und Lesehalle Jüdischer Hochschüler" and the "Vereinigung der Zionistischen Finkenschaft an der Wiener Universität" are open to all comers. At other universities and high schools similar societies were founded, e.g., the "Ferialverbindungen"; the "Emunah" in Bielitz, the "Astra" in Kanitz, the "Massada" in Vienna, the "Severitas" in Loschitz. To these must be added the "Veritas" in Brünn, the "Charitas" in Graz, the "Kolko Akademickie" in Kolomea, the "Hasmonea" and "Zephirah" in Czernaowitz, the "Bar Kochba" in Prague, the "Przedsut" ("Ha-Shabar") in Cracow, the "Akademische Verbindung" in Yaroslav, the "Makkabaea" in Breslau, the "Hasmonae" in Berlin, the "Herzl" in Königsberg, the "Zionist Society" at Columbia University, New York, and the "Jüdische Studentenverbindung Zionah" at Giessen. At various times general meetings of delegates of these societies have been held, e.g., the "Zionistischen Studententag" in Lemberg on July 25, 1899, and the "Studententag" in Vienna, June 30, 1903, and in June, 1905. In general, see "Ost und West," 1901, p. 415; Albert M. Friedenberg, "Zionist Studies," p. 23, New York, 1904.

Along similar lines were founded a large number of "Turnvereine" (gymnastic societies), which had as their object the development of Jewish muscle and the strengthening of Jewish conscience in the rising generation. The movement in this direction commenced even before the First Zionist Congress,

#### JEWISH GYMNASTIC SOCIETIES.

Date of Foundation.	Place.	Name of Society.

	Munich.....	Ezra.
	Breslau.....	Jüd. Turn- und Sport-Verein.

such a society having been founded in Constantinople in the year 1894. It received a great moral support from the national spirit engendered by the Zionist propaganda, and the outward impulse to the formation of such

**Gymnastic Societies.** separate societies was given by the exclusion of Jewish students from the "Bundesgenossen-schaft" of gymnasts in Austria and from the academic "Turnvereine" in Germany. It was in the latter country that these Jewish societies were most sharply attacked, notably by a Jew,

Rathenau, and by the "Kölnische Zeitung." The governing body of the "Jüdische Turnerschaft" in Germany answered the attack (Sept. 2, 1903) in order to assure the public that there was nothing anti-German in their action. Whereupon the "Kölnische Zeitung" and the "Frankfurter Zeitung" changed in a measure their attitude; but the "Allgemeine Zeitung des Judenthums" hoped that such "extravagances" could not be laid at the door of German Jews; while the "Mittheilungen zur Abwehr des Anti-Semismus" fought the movement tooth and nail, looking upon it only as a means of Zionistic propaganda. On the other hand, such Jewish weeklies as the "General Anzeiger" of Berlin, the "Israelitisches Familienblatt" of Hamburg, and the "Israelitisches Gemeindeblatt" reflected the sentiments of a part of the Jewish community by heartily welcoming the new movement. As the foregoing table will show, the work of the "Turnvereine" has grown apace, and at the Third Basel Congress, in 1899, a public exhibition was given by societies from Berlin, Cologne, Freiburg, Manheim, Mährisch-Ostrau, Prossnitz, Ungarisch-Hradisch, and Vienna, and a second Jewish "Turnertag" was held in Berlin April 23 and 24, 1905. The "Bar Kochba" of Berlin has printed a collection of songs ("Vereins Liederbuch"), and since 1902 it has published the monthly "Jüdische Turnzeitung."

In addition there are societies (the dates of whose foundation are not known) at Hanover, Frankfort-on-the-Main ("Jung-Juda"), Brünn, Bern, Samokoff, Bazardjik, Duhnitza, Cracow, and Lemberg.

In accord with the democratic basis of the Zionist organization, women have from the first been admitted to a voice and a vote in the congress. This has occasioned the formation of a large number of women's societies, which bear such names as "Benoth Zion" (Jassy, Sofia, New York), "Hadassa" (Vienna, Braila, New York), "Jehudith" (Brünn), "Moria" (Vienna), "Zion" (Lemberg), "Jüdisch Nationale Frauen Vereinigung" (Frankfort-on-the-Main). The work of these societies is of a literary, educational, and social character.

The inspiration that Zionism has given to the furtherance of modern Jewish Renaissance is seen in various directions. From its ranks have come most of those sturdy students, writers, poets, painters, and sculptors who have done so much to make the modern artistic development available for Jewish life (see Buber in the "Protocol of the Fifth Congress," pp. 151 *et seq.*). Not only has the cultivation of the Hebrew language been foremost in their program, but especially the furtherance of art with a distinctive Jewish bent.

**Influence on Literature and Art.** Ephraim Moses Lilien, Les-ser Ury, Judah Epstein, and Herman Struck have worked in line and color;

Frederic Beer, Henryk Glitzenstein, Alfred Nossig, and Boris Schatz in marble and bronze. In 1901 Alfred Nossig, Davis Trietsch, Buber, Feiwei, and Lilien started the Jüdische Verlag in Berlin, which has attempted to substitute artistic book-making for the inelegant presswork of former times. Besides publishing a "Jüdischer Almanach" and the "Jüdische Statistik," it has printed a number of highly artistic volumes dealing with modern Jewish literature and art. The Jüdischer Künstler Verlag Phoenix (1902) in Berlin owes its origin to the same circle, as does also the Jüdischer Künstler Aesthetik in Warsaw.

One of the most potent factors of Zionist propaganda has been its press. Only a few of the older Jewish papers were inclined toward the new movement, e.g., "Ha-Melitz" and "Ha-Zefirah" in Russia, the "Jewish World" in England, the "Corriere

Israelitico" in Italy, the "Jewish Exponent" in Philadelphia, and the "Jewish Comment" in Baltimore. The "Jewish Chronicle" of

**Zionistic Press.** London, though editorially unfavorable, has always given the widest publicity to Zionist news and to correspondence anent the movement.

On the other hand, the majority of Jewish weeklies have shown themselves more or less violently inimical, especially the "Voskhod" in St. Petersburg, the "Allgemeine Zeitung des Judenthums" in Berlin, "Bloch's Wochenschrift" in Vienna, and "The American Israelite" in Cincinnati. It therefore became necessary for the society to create a press of its own. In 1898 Theodor Herzl founded "Die Welt," which he carried on at his own expense until the Fifth Basel Congress officially accepted it as the organ of the party. Simultaneously there grew up a great number of Zionist periodicals in Hebrew, Yiddish, Judeo-Spanish, German, French, English, Italian, Russian, Rumanian, Bulgarian, Arabic, etc. Many of these are official publications of Zionist Territorial and other organizations, e.g., the "Macabean," of the Federation of American Zionists; "L'Echo Sioniste," of the French Federation; "Israelitische Rundschau" (Berlin), of the German Zionist Union; "Israel's Messenger," of the Shanghai Zionists. Of the others only a few can be mentioned: "Der Jüdische Arbeiter" (Vienna); "Jüdische Zukunft" (London); "Zionistische Monatshefte" (Geneva); "Jüdische Post" (Pittsburg); "Ha-Mizpah" (Cracow); "Ha-Shahar" (Sofia); "Ha-Shiloah" (Berlin); "Degel Mahaneh Yehudah" (Jassy); "Buduschnost" (St. Petersburg); "El Dia" (Philippopolis); "Idea Sionista" (Ferrara); "El-Misrayim" (Cairo). "Ost und West" (Jüdischer Verlag, Berlin) is the first attempt at an artistic Jewish journal; and in the "Schlemiel" the Jew—perhaps for the first time—refuses to take himself seriously. "Unsere Hoffnung" (Vienna) is a Zionist juvenile publication.

The extent to which the Zionist idea has spread among the Jewish people may be seen not only in the number of Jews affiliated with the Zionist organization and congress, but also in the fact that there is hardly a nook or corner of the Jewish world in which Zionist societies are not to be found. Even where no such organizations exist expressions of approval and adhesion have come from bodies of Jews who have lived practically cut off from all

connection with the course of Jewish life. Notable were communications, together with subscriptions for the fund, from a band of descendants of Portuguese Jews in Maucoré in Amazonas, Brazil (March 12, 1901), from Jews settled in Chile, and from the Jadid al-Islam in Khorasan (1901); while societies exist in Tshita (Siberia, on the Manchurian border), Tashkent, Bokhara, Rangoon (Burma), Nagasaki, Tokyo, Hongkong, Singapore, and among the American soldiers in the Philippines. The Shanghai Zionist Association was founded in 1903; the Dr. Herzl East Africa Zionist Association in Nairobi (East-African Protectorate) in 1904. In Australia there are four Zionist federations: New South Wales, Victoria, South Australia, and West Australia. Queensland has its own federation with its center in Brisbane, and New Zealand has several societies. Even among the Russian Jews settled by the Jewish Colonization Association in Argentina, there is a federation comprising four societies. A Zionist congress was held there May 16, 1904, comprising delegates of 1,150 shekel-paying members. In every country of Europe, in the United States, along the North-African coast, and in Palestine similar societies are to be found. At the St. Louis Exposition, 1904, the Zionist flag (blue

and white stripes, with a "Magen Dawid" in the center) floated from one of the buildings together with those of other nationalities.

This topographical diversity runs parallel with the variety of Jews to whom the Zionist movement has appealed; and it is therefore natural that a great divergence of opinion is manifest within its own ranks. This could not be otherwise, considering that the movement is a national one. Several parties and factions have accordingly grown up within the body, and have made themselves felt during some of the congresses. In fact, the discussions, very violent at times because they are based on radical differences of principle both in the congress and outside, are the natural concomitants of this as of all world-movements. Of the parties or groups within the Zionist body the following may be specifically enumerated:

The group composed of the immediate followers of Theodor Herzl and of those that stood by him during his seven years of work may be called the Government Party. Their program is that enunciated by the president of the congress at its various sittings. They desire a legally assured home for the Jewish people in Palestine and neighboring countries, and take their stand upon the Basel Platform pure and simple. They are politico-diplomatic Zionists, though not opposed to strengthening the position of the Jews in Palestine by bettering their condition and by conducting experiments in farming and industrial enterprises.

The second group is that of the Mizrahi, an alliance of the Orthodox Jews within the Zionist body. The Mizrahi was formed at the time of the Fifth Congress as an offset to the Radical Fraction. Its head is Rabbi Isaac Jacob Reines of Lida, Russia, where its first yearly meeting was held Feb. 23, 1903. It claimed then a membership of 11,000, but has largely gained since that time. In 1903 it had founded 125 societies, not only in Russia, but in Germany, England, Galicia, and Palestine. A world conference of Mizrahists was held in Presburg Aug. 21-24, 1904, and a special conference of the English societies in London July 19, 1904. The group has spread also to the United States, where it has held two meetings, Jan. 5-7, 1905, in New York, and June 17, 1905, in Philadelphia. The American branch maintains an organ, "The Sabbath Journal." The Mizrahists, forming the Jewish Center Party, were staunch adherents of Theodor Herzl, and since his death have remained true to his principles. To these they have added, as a special feature, the conservation of Orthodox Jewish practices. At the congress they usually vote with the Government Party. According to their program, they are "an organization of Orthodox Zionists who, on the basis of the Basel Program, believe a faithful adherence to the Torah and the tradition in all matters pertaining to Jewish life, and a longing for the land of the fathers, to constitute the task of the Jewish people and the conditions favorable to its preservation."

The Po'ale Zion, or the Democratic "Fraction," represents the Jewish Left. Its members claim to speak for the proletariat in eastern Europe, and have a number of pronounced Socialists in their ranks. Though

comparatively a small body, they made themselves felt at the Second Congress, when the motion of Professor Mandelstamm to exclude them was lost. They are organized in Austria and in Switzerland; and one faction calls itself openly "The Zionist Socialist Workingmen's Party, London-Paris." They organized in America in 1903, and held their first convention April 29, 1904, twelve societies being represented and maintaining an organ, "Die Neue Stimme." In the United States they are affiliated with the Federation of American Zionists. The Po'ale Zion holds that the Jewish proletariat will be driven into its ranks as the pressing, practical need for emigration from eastern Europe becomes greater. The members are therefore largely Territorialists, and claim to be forced in a measure to be opposed to Palestinian colonization on whatever scale, because of its apparent impossibility. On the other hand, they are believed in some quarters to have their Socialist propaganda more at heart than their Zionist work, and to threaten to compromise the movement with certain European governments. The Bund in Russia was at first opposed to Zionism, accusing the latter society of refusing to aid the Rumanian Jews in 1897. Since then it has made sensible approaches to Zionism, its members becoming Nationalist Jews and working for national Jewish autonomy.

A very large party within the general body consists of the so-called Ziyzone Zionists, a product of the discussions raised by the Sixth Congress. They are practically led by Usishkin of Yekaterinoslav. At

the time of the Sixth Congress he was presiding over a congress in Palestine, and declared himself not only against the East-African project, but also against the binding character of the vote taken at the congress. In a pamphlet, "Unser Programm" (Vienna, 1905), he has laid down the principles of the new group. Holding that the diplomatic actions of Herzl have proven a failure, it demands immediate work in Palestine, without waiting for the granting of a charter. Land there should be bought at once with a certain portion of the National Fund; and whatever diplomatic actions are to accompany Zionist work should be carried out by a collegium. For the purposes of colonization a special society, Geullab, has been formed; and the assistance of the ICA and other colonization societies is to be sought. A Palestine Zionist Association was founded in London in May, 1905, with Haham M. Gaster as its president, to work along similar lines. Since the Sixth Congress, Usishkin has been ceaselessly active in gathering his forces together. Before the Seventh Congress a preliminary conference was held in Freiburg, and at the congress itself the Ziyzone Zionists polled a vote of 360, practically controlling the voting power. There can be no doubt that the Ziyzone Zionists are made up largely of the old Chovevei Zion groups; and though they have protested strongly against the imputation, the Political Zionists see in their rise a danger of the movement falling back into the rut of the old beneficent colonization.

Diametrically opposed to the Ziyzone Zionists are the Territorialists. The new organization was

formed largely of those who wished the congress to accept the offer of the English government; but in a very short while it developed into a body seeking a territory upon an autonomous basis

**Terri-**  
**torialists;** territory might be available. The **Israel** Zionistische Territoriale Verbindung **Zangwill.** in Bern issued a call in "Die Welt"

(1905, No. 12), but the new group was really formed as the Jewish Territorial Organization during the Seventh Congress. Israel Zangwill has been its leader and is its president. Despite his protest that the minority at the congress must always bow to the majority (speech in London, 1900), he felt that the need of the wandering mass of Jews, and consequent emigration called for a more rapid solution than political Zionism was able to afford. According to Zangwill, the majority at the Sixth Congress was for Territorialism; but this is a misstatement, inasmuch as a large majority of those who voted in the affirmative on that occasion voted merely for the sending of the commission, and not upon the merits of the proposition as a whole. Ignoring completely the vote taken at the Seventh Congress, he put himself at the head of the Jewish Territorial Organization, and, joined by the radical element which cut itself off from the Zionist body, and by a number who, like himself, remained Zionists although they believed it inopportune to refuse the offer of the English government, he fashioned the new organization in Basel. In the "Jewish Chronicle," London, Aug. 25, 1905, he issued a manifesto in which he stated that the Jewish Territorial Organization

"makes as a body no opposition toward Zionism, its members being left free to determine their individual relations to that movement. Naturally no land whatever is excluded from our operations, provided it be reasonably good and obtainable."

The object of the organization was said to be:

"1. To procure a territory upon an autonomous basis for those Jews who cannot or will not remain in the lands in which they at present live. 2. To achieve this end the organization proposes: to unite all Jews who are in agreement with this object; to enter into relations with governments and public and private institutions; and to create financial institutions, labor bureaus, and other instruments that may be found necessary."

The large mass of Zionists saw in this new organization a breaking away from the larger body, and, practically, Zionism minus Zion.

Israel Zangwill has (Sept., 1905) joined hands with Lucien Wolf, who now seems more willing to accept the idea of a British colony with Jewish autonomous rights—the very proposition made to Theodor Herzl by the British government—though he still proclaims himself as far from the Zionist position as he ever was. In furtherance of these plans Zangwill in the name of the Jewish Territorial Organization memorialized the Hon. Alfred Littleton (Sept. 8, 1905), asking that the original concession in British East Africa remain open for a while longer. However, on Sept. 16 Littleton replied in the negative, stating that the territory in question had already been thrown open to colonization, but renewing the assurance contained in the letter of Clement Hill (see above) that his government follows with the same interest any attempt to ameliorate the condition of the Jewish people.

Several less clearly defined groupings have sprung

up of late years. The so-called Political Zionists held their own conference at Warsaw in June, 1905, Prof. M. Mandelstamm presiding. These are on some points opposed to the Territorialists, who are in a sense anti-Palestinian; but they are willing to make certain concessions in their desire to conserve the large mass of Jews emigrating out of eastern Europe from complete assimilation

and demoralization. They are willing to cooperate with other bodies in concentrating this emigration in an autonomous national territory other than Palestine. They desire, however, that the work in and for Palestine shall continue; and they agree that no Zionist moneys are to be employed for other than Palestinian purposes. They claim to have had forty-five delegates at the Fifth Congress, and at the Seventh they formed a special group, their spokesman being Prof. N. Slouschz of Paris. They are opponents of the Ziyyone Zionists and gravitate naturally toward the Territorialists.

A second minor group is that of the Practical Political Party ("Real Politische Partei"), led by Nossig and Trietsch, with some of whose views Professor Warburg, Dr. Franz Oppenheimer, and others of the Palestine Commission coincide. They are opposed to both the Ziyyone Zionists and the Territorialists. They hold that the importance of autonomy in a Jewish ingathering is exaggerated; and they demand that the Zionists further a legal colonization in Palestine and the neighboring countries, a systematic economic advance in the near East, the purchase of land in and around Palestine, the investigation of both its agricultural and commercial possibilities, the founding of experimental farming and other stations, and diplomatic measures only in so far as their ends are attainable. They also lay great stress upon the organization of the Jews and upon Jewish culture (see Nossig in "Die Stimme der Wahrheit," pp. 11 *et seq.*). The leaders of this small group have been severe critics of the diplomatic activity of Theodor Herzl. They favor colonization in Cyprus and have done successful work in furthering the intellectual side of the Jewish Renaissance.

Very different from those above mentioned are the followers of Aḥad ha-'Am (Asher Ginsberg). This leader of what is called "Moral Zionism," though now opposed both to Chovevei Zionism and to Political Zionism, was one of the moving forces in the early days of the former. In 1889

**Moral Zionism of Aḥad ha-'Am (Asher Ginsberg).** he formed in Odessa the Bene Mosheh, a secret organization, lodges of which are to be found in many Russian cities, and which has ramifications in Palestine, Great Britain, Paris, and Berlin. For three or four years this society supplied the material and the enthusiasm that established the colony Rehobot, the Carmel Wine Company, the Aḥiasaf Publication Society, the monthly "Ha-Shiloah," and the Bet ha-Sefer in Jaffa. According to Aḥad ha-'Am, Judaism is in greater need than are the Jews, and a national spiritual center is necessary in Palestine to act as a centrifugal force against the disintegrating tendencies within the Jewish ranks. A "Renaissance of the heart" must come, and gradually, through a process of development. Only when the spirit of the people has been centralized can the work of centralizing the people themselves be begun. Aḥad ha-'Am is the philosopher of the Jewish Renaissance; and as he has severely attacked Political Zionists, he has been as severely attacked by them in return. Many Zionist leaders and workers subscribe to Aḥad ha-'Am's principle as a theory, while furthering the practical works of the organization; and many theoretic Zionists look to him as their leader, as such adhesion leaves them uncompromised in their affiliations. Nor must it be forgotten that much of his program is that of all Zionists. At the opening of the Second Congress, Herzl proclaimed that Zionism meant "a return to Judaism as preparatory to a return to a Jewish land" (see Henrietta Szold in "Jewish Comment," May 12, 1905; Matthias Acher, "Aḥad ha-'Am," Berlin, 1903).

It can not be denied that these various currents have had an effect upon the general trend of Zionism as officially expressed in the discussions and resolutions of succeeding congresses. While any violation of the fundamental principles of the Basel Platform is sternly rejected, there has been manifest a greater readiness to undertake work in Palestine upon a practical basis without first waiting for the final results of diplomatic and political action, the while carefully pursuing these actions and preventing a recurrence of the older and worthless Chovevei Zionism.

**BIBLIOGRAPHY:** The bibliography on Zionism, which is extremely large, has been collected in a Russian publication, *Ukazatel Literaturno Zionizm*, St. Petersburg, 1903. Only a few works can be mentioned here. A history of Zionism has been attempted by Sapir, *Der Zionismus*, Brüner Jüdischer Verlag, 1903. The files of *Die Welt* and the stenographic *Protokoll* of the seven congresses furnish the most reliable material; an index to them has been drawn up by Hugo Schachtel, *Register zu den Protokollen der Zionistenkongresse*, i.-vi., Berlin, 1905. See also R. Gottbell, *The Aims of Zionism*, in *Publ. Am. Fed. of Zionists*, New York, 1899; C. Levias, *The Justification of Zionism*, in *Hebrew Union College Journal*, Cincinnati, April, 1899; R. Gottbell, *The Zionist Movement*, in *North American Review*, 1902; J. de Haas, *Zionism*, London, 1901; Max Nordau, in the *International Quarterly*, 1902, No. 1; Israel Zangwill, in *Lippincott's Magazine*, Oct., 1899; *Theodor Herzl's Zionistische Schriften*, ed. **ZIONIST, DER.** See PERIODICALS.

**ZIPPOR:** Father of Balak, King of Moab, who hired Balaam to curse Israel. All the passages which mention Zippor name him together with his son Balak (Num. xxii. 2, 4, 10, 16; xxiii. 18; Josh. xxiv. 9; Judges xi. 25). An allusion to him may be contained in "the former king of Moab" in Num. xxi. 26.

B. P.

**ZIPPORAH.**—**Biblical Data:** Daughter of Jethro and wife of Moses. According to the Bible,

Moses met the daughters of Jethro when they were being driven away from a well by shepherds; he assisted them, and was invited into the house of Jethro, who gave him Zipporah to be his wife (Ex. ii. 21). On his return to Egypt, Moses was accompanied by his wife, who saved him from great danger during their journey (*ib.* iv. 24-26). She appears to have returned with her children to her father's house; for after the exodus from Egypt, Jethro brought Zipporah and her children out to Moses in the wilderness (*ib.* xviii. 2-5). Zipporah is mentioned only once more in the Bible; namely, in Numbers xii. 1, where she is referred to as "the Ethiopian woman," for having married whom Moses is upbraided by Miriam and Aaron.

—**In Rabbinical Literature:** Zipporah is mentioned by the Rabbis alternately with praise and with blame. Her name (= "bird") is explained as having been given her because, when questioned by her father as to the man who had rescued her, she flew out of the house like a bird and returned with Moses (Yalk., Shim'oni, i. 169). R. Joshua was of the opinion that Zipporah and Moses were always estranged, and that the latter did not love his wife (*ib.* 268). The name "Cushite" was given to her, it is said, because she was distinguished from other women by her beauty, even as the Ethiopians differed from other people in their complexions. The circumstance that she is twice referred to in one verse as "the Ethiopian" (Num. xii. 1) is explained as indicating that her actions were as distinctive as her beauty, and that she conducted herself no less royally while in her father's house than when she became the wife of Moses (Yalk., Shim'oni, 1238; comp. also M. K. 16b; Yer. Sanh. x. 28d).

**ZIPSER, MAIER:** Hungarian rabbi; born at Balassa-Gyarmath Aug. 14, 1815; died at Rechnitz Dec. 10, 1869. He studied in various yeshivot, among his teachers being Wolf Boskowitz and Maier Eisenstadt; and he acquired a secular education partly through the assistance of Löw Schwab and partly through his own endeavors. In 1844 he was chosen rabbi at Stuhlweissenburg, where, however, he became involved in a controversy with the Orthodox members of the community on account of a divorce which he had granted without a precedent. In his defense he wrote a pamphlet entitled "Me ha-Shiloah: Rabbinisches Gutachten über Jüdische Ehescheidung" (Budapest, 1853). About 1850 he went to England, where he published a pamphlet entitled "The Sermon on the Mount," defending Judaism against the parliamentary speeches of Inglis (London, 1852). In 1858 Zipser was elected rabbi of Rechnitz, and he held this position until his death. In addition to the two pamphlets already mentioned, he published various sermons and made numerous contributions to the Jewish press, especially to the "Orient," the "Allgemeine Zeitung des Judenthums," and the "Neuzeit," winning the reputation of being one of the most scholarly Hungarian rabbis of his day.

**ZIRNDORF, HEINRICH:** German poet and

rabbinical scholar; born at Fürth, Bavaria, May 7, 1829; died at Cincinnati, Ohio, Dec. 17, 1893; educated privately. His parents intended him for a commercial career, and for a short time he was employed as a clerk by a firm in Fürth, but his early studies of German and English classics inspired him to continue studying, and at the age of nineteen he went to Munich, where he attended the gymnasium until 1855. He then moved to Vienna, and remained there until 1857. These two years were chiefly devoted to poetry, and some of his best verse was written during that time, his "Kassandra," a tragedy in five acts, being published at Vienna in 1856. In 1857 he obtained the position of rabbi of Lipto-Szent-Miklos, Hungary, but soon resigned and moved to Frankfort-on-the-Main; there he made the personal acquaintance of Isaac Marcus Jost (1859), whose reminiscences he published under the title "Isaak Markus Jost und Seine Freunde" (Cincinnati, 1886). In 1860 he published a selection of his poems at Leipsic, and in the fall of the same year he accepted an invitation to go to London as a private-tutor. There he lived for thirteen years, writing and teaching, and mingling with the best society of the capital. In 1873 he returned to Germany as rector of the Hebrew Teachers' Institute at Münster, and three years later accepted a call to the rabbinate of the Congregation Beth-El, Detroit, Mich. In 1884 he became professor of history in the Hebrew Union College at Cincinnati, being succeeded in Detroit by Louis Grossmann, now rabbi of the Plum Street Temple and professor in the Hebrew Union College. About this time Zirndorf began to contribute to the "Deborah," of which he subsequently became associate editor. In 1889 he was chosen rabbi and preacher of the Ahabath Achim congregation in Cincinnati, and held this position until his death. In 1892 a translation of a number of his sketches contributed to the "Deborah" appeared at Philadelphia under the title "Some Jewish Women."

**ZIZIT.** See FRINGES.

**ZNAIM:** City in the Austrian province of Moravia. Jews probably settled there during the twelfth century; for in a document of Ottocar I. dated 1225 a Jews' street in Znaim is mentioned. During the ARMLEDER PERSECUTIONS in 1338 and the Black Death in 1349 the Jews of this place were among the sufferers. Upon the complaint of the butchers in 1401, Margrave Prokop forbade the Jews to engage in the retailing of meat. King Sigismund, who was constantly in financial difficulties, borrowed from the city 905 florins, which the Jews in the royal cities of Moravia had to pay; of this sum the Jews of Znaim paid 400 florins, and those of Brünn only 300, proving that the former city had the larger Jewish population. The chief occupation of the Jews of Znaim in those early days was money-lending; in 1437 they were forbidden to charge a higher rate of interest than 3½ pfennings per shock groschen, and in 1453 the rate was reduced to ½ pfennig. In 1454 the fanatic Franciscan monk

John of CAPISTRANO aroused the population against the Jews, and on July 25 of the same year they were expelled. From that time until 1848 Jews were not permitted to reside in Znaim; and those who went thither on business had to pay a LEIBZOLL, which in 1708 was fixed at 18 or 7 krenzer, according to certain conditions. In 1785 Jacob FRANK spent some time in the city.

After the constitution of 1848 had declared freedom of residence, Jews began to settle in the city, but they did not hold religious services until 1858. A Jewish society for worship was formed in 1866, and two years later a cemetery was acquired, where were deposited the remains of those buried in the old cemetery (confiscated in 1454), and also three tombstones from the same ancient burial-ground. In 1870 the society received the rights of a corporation ("Cultusgemeinde"), and in 1888 a new synagogue was dedicated. The congregation numbers 160 families, of which 120 live in the city and the remainder in the outlying district. The community was originally under the spiritual direction of teachers only, and not until 1894 was it permitted to appoint a rabbi. The following ministers have officiated in Zoa'im: H. Barth, Joseph Paschkes (1869), Samuel Mühsam (1870-72), Jacob Wittenberg (1872-77), Samuel Grün (1878-82), Ignaz Holzer (1884-99), and the present (1905) incumbent, Isidor Kahan.

The community supports three charitable societies: a hebra'kaddisha, a women's benevolent society, and a Talmud Torah society which provides poor school-children with text-books. The Jews of Znaim are mostly commission-merchants, but there are among them also physicians, lawyers, civil engineers, and some industrial workers. The annual expenditure of the congregation is about \$2,800.

**ZOAN**: An important Egyptian city of great antiquity, almost as old as Hebron (Num. xiii. 22). The "princes of Zoan" are ranked in Isa. xix. 11, 13 with those of Noph (Memphis), and the city itself is mentioned in Ezek. xxx. 14 together with No (Thebes). The Israelitish embassies to it (Isa. xxx. 4) may imply that it was the residence of Pharaoh, and a similar allusion may possibly be traced in Ps. lxxviii. 12, 43, unless "the field of Zoan" is a poetic designation of Egypt in general.

Zoan (Hebr. זואן; the Egyptian "Za'ne" [older form, "Za'net"]; the Coptic "Ja[ane]," "Jani"; and the "Tanis" of the Greeks) was situated in the Delta on the Tanitic branch of the Nile, not far from the modern lake of Menzalah and the northeastern frontier of Egypt. The ruins, excavated by Mariette in 1860 and, more thoroughly, by Petrie in 1883, have yielded monuments ranging from the sixth dynasty to the Roman period, when the city, once a royal residence, especially of the twenty-first or "Tanitic" dynasty, began to degenerate into the fishing-village represented by the modern Şan al-Hajar.

W. M. M.

**ZODIAC**: An imaginary zone of the heavens containing the twelve signs within which lie the paths of the principal planets, and through which

the sun passes in its annual course. The signs, mostly representing symbols of animals, extend for thirty degrees each, and the entire zodiac is divided into twelve equal parts, six north and six south of the equator. When Hipparchus observed the constellations at Rhodes, those which bore the same names coincided approximately in position with the divisions of the sun's path which they designated and which agree with the signs according to the Talmudic tradition. The precession of the equinoxes, however, gradually shifted the series, and the discrepancy now amounts to an entire sign. The signs are used by astronomers, while the constellations are employed by astrologers. Menahem ibn Zerah (fourteenth century) says that the zodiac moves very slowly from east to west, one degree in 100 years, making 36,000 years for the cycle, and that some authorities believe the movement to be eccentric ("Zedah la-Derek," p. 21b, Ferrara, 1554).

The duodecimal division of the zodiac is first mentioned in the "Sefer Yeẓirah," which is of unknown antiquity, and in which the constellations ("mazza-lot") are named in the following order: Taleh, Shor, Te'omim, Sarṭan, Aryeh, Betulah, The Moznayim, 'Akrab, Qeshet, Gedi, Twelve Deli, and Dagim, corresponding to Signs. Aries, Taurus, etc., and to the twelve months beginning with Nisan. The constellations are also said to correspond to the twelve organs of the body: two hands, two feet, two kidneys, the gall, intestines, liver, throat, stomach, and pancreas ("Sefer Yeẓirah," v. 4). This order of the constellations harmonizes with the theory of the Assyrian astronomers, who supposed that at the moment of crossing the equator toward the north the sun was at the first point of Aries, and that about thirty days later it entered Taurus, and so on. They also designated the signs according to the organs of the body, which they arranged in the sequence of head, neck, arms, breast, heart, bowels, kidneys, loins, thighs, knees, legs, and feet.

The twelve constellations represent the twelve tribes, while each station of the zodiac has thirty paths, and each path has thirty legions (of stars) (Ber. 32b). The standards of the tribes corresponded to the zodiacal signs of the constellations, so that in the east was the standard of Judah, with Issachar and Zebulun beside it, these three being opposite Aries, Taurus, and Gemini; in the south was the standard of Reuben, with Simeon and Gad, opposite Cancer, Leo, and Virgo; in the west was the standard of Ephraim, with Manasseh and Benjamin, opposite Libra, Scorpio, and Sagittarius; and in the north was the standard of Dan, with Asher and Naphtali, opposite Capricornus, Aquarius, and Pisces (Yalk., Num. 418).

The motives underlying the choice of the symbolic signs are obvious in the case of some and only conjectural in the case of others. All may be traced to Assyrian mythology and influence. The Jews during the Babylonian exile adopted Hebraicized forms of the Assyrian names of the months and constellations. In some instances the Rabbis endeavored to explain the origin of these names. Thus they said that the Temple could not be destroyed in

first month (Nisan) since the sign Aries is a reminder of the 'Akedah, Isaac representing the sacrificial "talch" (= "lamb"). In the second month (Iyyar) the sign Taurus or Shor (= "ox") recalls the "calf tender and good" (Gen. xviii. 7) which Abraham provided for the angels; and in the third month (Siwan) the sign Gemini (= "twins") represents Esau and Jacob. In the fourth month (Tammuz) the sign Cancer (= "crab"), which lives in water, represents Moses, who was saved from water, while in the fifth month (Ab), which is designated by the sign of Leo, "the lion is come up from his thicket" (Jer. iv. 7), the Temple named "Ariel" (= "the lion of God") was destroyed (Isa. xxix. 1; Pesik. R. 27-28 [ed. Friedmann, p. 133h]). The constellations represent the Creation: Aries is light and Taurus is darkness; Gemini represents the two sexes; Cancer symbolizes

marriage would be a failure. A detailed description of the influence of the several planets and constellations is given in the "Zedah la-Derek" of Menahem ibn Zerah (i., §§ 28-29), as well as in the "'Abbi'ah Hidot" of Abraham Hamawi (pp. 49b-62a, ed. Leghorn, 1874), but all agree that the righteous Jew is above the "mazzal" (constellation or planet) and need not fear any evil fate. In support of this teaching the passage "be not dismayed at the signs of heaven; for the heathen are dismayed at them" (Jer. x. 2) is frequently quoted, and it is contrary to the Jewish religion to consult the predictions of astrologers or to depend on them (Deut. xviii. 11).

The dates at which the sun enters the signs of the zodiac in the course of a year are specified in the accompanying table.

J.

J. D. E.

Sun Enters	Hebrew Name.	Approximate Date.	First of Hebrew Month.	Approximate Hebrew Date.	Jewish Constellation.	Astronomical Signs.
Aries .....	Taleh	March 21	Nisan	March 27	♈	♈
Taurus .....	Shor	April 21	Iyyar	April 26	♉	♉
Gemini.....	Te'omim	May 22	Siwan	May 25	♊	♊
Cancer.....	Sarṭan	June 22	Tammuz	June 24	♋	♋
Leo.....	Aryeh	July 23	Ab	July 23	♌	♌
Virgo.....	Betulah	Aug. 24	Elul	Aug. 23	♍	♍
Libra.....	Moznayim	Sept. 24	Tishri	Sept. 22	♎	♎
Scorpio.....	'Aqrab	Oct. 24	Ḥeshwan	Oct. 22	♏	♏
Sagittarius.....	Ḳeshet	Nov. 23	Kislew	Nov. 19	♐	♐
Capricornus....	Gedi	Dec. 22	Ṭebet	Dec. 18	♑	♑
Aquarius.....	Deli	Jan. 20	Shebat	Jan. 16	♒	♒
Pisces.....	Dagim	Feb. 19	Adar	Feb. 15	♓	♓

man, who first retreats to nooks and corners like the crab, but eventually becomes as brave as a lion (= "Leo"); Virgo is a symbol of marriage; Libra weighs all the deeds of man, who, if found guilty, is punished by Scorpio, a symbol of Gehinnom; after purification in Mercy, however, he is cast forth as quickly as an arrow from a bow, represented by Sagittarius, and becomes as innocent as a kid and is purified as by water poured by Aquarius (Pesik. R. 20 [ed. Friedmann, p. 97b]).

Since each of the planets was supposed to rule a certain hour of the day, while every constellation governed a certain month of the year, the fate of an infant was predicted according to the heavenly bodies that presided over the hour and the month of its birth. The conjunction of the planets and constellations was accordingly manipulated to determine the fortunes of the person whose horoscope was thus drawn. A "good" planet might synchronize with a "bad" constellation to some extent.

Both planets and constellations indicated certain characteristics in the person born at that time, and care

#### Use.

had likewise to be taken to marry only such a mate as had been born under a harmonizing planet and constellation, since otherwise the

**ZOHAR** (called also in the earlier literature **Midrash ha-Zohar** and **Midrash de-Rabbi Shim'on ben Yoḥai**): A pseudepigraphic work which pretends to be a revelation from God communicated through R. Simeon ben Yoḥai to the latter's select disciples. Under the form of a commentary on the Pentateuch, written partly in Aramaic and partly in Hebrew, it contains a complete cabalistic theosophy, treating of the nature of God, the cosmogony and cosmology of the universe, the soul, sin, redemption, good, evil, etc. It first appeared in Spain in the thirteenth century, being made known through the agency of the cabalistic writer Moses ben Shem-Tob de Leon, who ascribed it to the miracle-working tanna Simeon ben Yoḥai. The fact that it was launched by such an

**Source.** unreliable sponsor as Moses de Leon, taken together with the circumstance that it refers to historical events of the post-Talmudical period, caused the authenticity of the work to be questioned from the outset. After the death of Moses de Leon, it is related, a rich man of Avila, named Joseph, offered the widow, who had been left without means, a large sum of money for the original from which her husband had made the copy; and she then confessed that her husband him-

self was the author of the work. She had asked him several times, she said, why he had chosen to credit his own teachings to another, and he had always answered that doctrines put into the mouth of the miracle-working Simeon ben Yoḥai would be a rich source of profit (see "Sefer ha-Yuḥasin," ed. Filipowski, p. 89). Incredible as this story seems—for it is inconceivable that a woman should own that her deceased husband had committed forgery for the sake of lucre—it at least proves that shortly after its appearance the work was believed by some to have been written entirely by Moses de Leon. This seems to have been the opinion of the cabalistic writer Joseph ibn Waḳar, and he cautioned the public against the work, which he asserted to be full of errors.

The general opinion, however, was in favor of its authenticity, this view being held not only by the cabalists, for whom the book opened new paths in the field of mysticism, but also by eminent Talmudists. It was quoted by Todros Abulafia, by Menahem Recanati, and even by Isaac of Acco, in whose name the story of the confession of Moses de Leon's widow is related. Isaac evidently ignored the woman's alleged confession in favor of the testimony of Joseph ben Todros and of Jacob, a pupil of Moses de Leon, both of whom assured him on oath that the work was not written by Moses ("Sefer ha-Yuḥasin," *l.c.*). The only objection worthy of consideration by the believers in the authenticity of the Zohar was the lack of references to the work in Jewish literature; and to this they answered that Simeon ben Yoḥai did not commit his teachings to writing, but transmitted them orally to his disciples, who in turn confided them to their disciples, and these to their successors, until finally the doctrines were embodied in the Zohar. As to the references in the book to historical events

#### Authenticity.

of the post-Talmudic period, it was not deemed surprising that Simeon ben Yoḥai should have foretold future happenings. The first attack upon the accepted authorship of the Zohar was made by Elijah Delmedigo. Without expressing any opinion as to the real author of the work, he endeavored to show, in his "Behinat ha-Dat," that it could not be attributed to Simeon ben Yoḥai. The objections advanced by him were as follows: (1) were the Zohar the work of Simeon ben Yoḥai, it would have been mentioned by the Talmud, as has been the case with the Sifre and other works of the Talmudic period; (2) the Zohar contains names of Talmudists who lived at a later period than that of Simeon; (3) were Simeon ben Yoḥai the father of the Cabala, knowing by divine revelation the hidden meaning of the precepts, his halakic decisions would have been adopted by the Talmud; but this has not been done; (4) were the Cabala a revealed doctrine, there would have been no divergence of opinion among the cabalists concerning the mystic interpretation of the precepts ("Behinat ha-Dat," ed. Vienna, 1833, p. 43).

These arguments and others of the same kind were used by Leon of Modena in his "Ari Nohem" (pp. 49 *et seq.*, Leipsic, 1840). A work exclusively devoted to the criticism of the Zohar was written, under the title "Miṭṭaḥat Sefarim," by Jacob Em-

den, who, waging war against the remaining adherents of the Shabbethai Zehi movement, endeavored to show that the book on which the pseudo-Messiah based his doctrines was a forgery. Emden demonstrates that the Zohar misquotes passages of Scripture; misunderstands the Talmud; contains some ritual observances which were ordained by later rabbinical authorities; mentions the crusades against the Mohammedans (ii. 32a); uses the expression "esnoga" (iii. 232b), which is a Portuguese corruption of "synagogue," and explains it in a cabalistic manner as a compound of the Hebrew words אֵשׁ and נֹגָה; gives a mystical explanation of the Hebrew vowel-points, which were introduced long after the Talmudic period (i. 24b, ii. 116a, iii. 65a).

These and other objections of Emden's, which were largely borrowed from the French ecclesiastic Jean Morin ("Exercitationes Biblicæ," pp. 359 *et seq.*, Paris, 1669), were refuted by Moses ben Menahem Kunitz, who, in a work entitled "Ben Yoḥai" (Budapest, 1815), endeavors to show the following characteristics: that the vowel-points were known in Talmudic times; that the rites which Emden claimed to have been ordained by later rabbinical authorities were already known to the Talmud; and that Simeon ben Yoḥai, who before taking refuge in the cave was designated only by the name of Simeon, is credited in the Talmud with many miracles and mystic sayings. Another work in favor of the antiquity of the Zohar was published by David Luria under the title "Kadmūt ha-Zohar" (Königsberg, 1855 [?]). It is divided into five chapters, in which the author gives proofs that Moses de Leon did not compile the Zohar; that the Geonim in Babylonia cite cabalistic doctrines from a certain "Midrash Yerushalmi," the language of which strongly resembles that of the Zohar; that the work was compiled before the completion of the Talmud; that a great part of it was written in the period of Simeon ben Yoḥai; and, finally, that the Aramaic language was used in Talmudic times as well as in the geonic period. Of these proofs only those showing the inadmissibility of the authorship of Moses de Leon deserve consideration, the

**Moses de Leon Not the Author.** others being mere quibbles; for even if it be conceded that the Talmud knew of the vowel-points and that the Aramaic was commonly used, there is no evidence whatever that Simeon ben Yoḥai or his immediate disciples were connected with the Zohar. As to the identification of the Zohar with the so-called "Midrash Yerushalmi," the single fact that most of the passages quoted are not found in the Zohar, as Luria himself admits, is a sufficient proof that the two works can not be identical. However, Luria has quite as much warrant for asserting, on the ground of his proofs, that a great part of the Zohar was written by Simeon ben Yoḥai as have Jelinek, Grätz, Ginsburg, and many others for maintaining that it was wholly composed by Moses de Leon on the ground that in the works of the last-named there are passages which are found verbatim in the Zohar. These scholars seem to shrink from the idea that Moses de Leon should have been guilty of plagiarism, but they are not

afraid to charge him with forgery, and that of so clumsy a nature as to arouse at once the suspicions of the reader. For Moses de Leon could not have supposed for a moment that the insertion in the middle of an Aramaic sentence of two verses from Ibn Gabirol's "Keter Malkut" (which, being recited in the synagogues, were known to every Jew) could have escaped detection; nor could he have thought that a quotation from the Cuzari, which was so much read and commented upon at that time, would pass unperceived by his contemporaries.

Had Moses de Leon, who was a talented writer and an able scholar, wished for mercenary purposes to forge a work in the name of Simeon ben Yoḥai, he would have been more careful in his statements and would certainly have employed the Hebrew language, first, because the tanna would have written in that language, and, second, because a work in Hebrew, being easier to understand, would have gained a far wider circle of readers, and consequently a larger number of purchasers, than would one written in a peculiar Aramaic dialect that was accessible to only a few. Were the pseudepigraphic "Sefer Yezirah," "Pirḳe de-Rabbi Eli'ezer," "Sefer Hekalot," "Sefer ha-Bahir," etc., any the less believed to be the works of those to whom they were attributed simply because they were written in plain Hebrew and not in Aramaic? But apart from all these considerations, the contents of the Zohar clearly indicate that the work is the production not of a single author or of a single period, but of many

**Not the Work of a Single Author or Period.** it combines the most puzzling incongruities with lofty ideas and conceptions which would do honor to a genius of modern times, and also mystic teachings of the Talmudic period with

those of the Geonim and later Cabala. To determine the country in which the work originated and the time at which its teachings began to develop, it is necessary to ascertain where and when the Jews became intimately acquainted with the Hindu philosophy, which more than any other exercised an influence on the Zohar. As an instance of Hindu teachings in the Zohar may be quoted the following passage:

"In the book of Hamnuna the Elder we learn through some extended explanations that the earth turns upon itself in the form of a circle; that some are on top, the others below; that all creatures change in aspect, following the manner of each place, but keeping in the same position. But there are some countries on the earth which are lighted while others are in darkness; and there are countries in which there is constantly day or in which at least the night continues only some instants. . . . These secrets were made known to the men of the secret science, but not to the geographers" (Zohar, iii. 9b).

The theory that the earth is a sphere revolving on its own axis, which immortalized Copernicus, was previously known only to the Hindus, who were instructed in the truth of it by Aryabhata in the first century before the common era. As far as is known, the Vedanta school of the Hindu philosophers found nowhere, outside of its place of origin, so many admirers as in Persia in the eighth century. Under its influence the Mohammedans of Persia founded many mystic sects, among them being that of the Sufis, who for many centuries were very nu-

merous. This mystic movement did not fail to exercise an influence upon the Persian Jews, and there arose among them various sects, such as the 'Isawites, the Yudghanites, etc., the tenets of which, so far as can be ascertained from the scanty information concerning them that is available, bore more or less the stamp of the Vedanta philosophy. Thus the Yudghanites abstained from meat, led ascetic lives, set aside the literal meaning of the Torah for a supposed mystic interpretation, and believed in metempsychosis, etc. All these sects had their sacred writings, which they kept secret; and these writings probably formed the

**The Germ Probably in Persia.** nucleus of the Zohar, which is a mystic commentary on the Pentateuch, as the upanishads are the mystic inter-

pretation of the Vedas and other Brahmanic scriptures. In its peregrinations from Persia to Spain the Zohar probably received many additions and interpolations, among which may have been the various names of the Tannaim and Amoraim, as well as the allusions to historical events.

The Zohar is not considered complete without the addition of certain appendixes, which are attributed either to the same author or to some of his immediate disciples. These supplementary portions are printed as part of the text with separate titles, or in separate columns. They are as follows: "Sifra di-Zeni'uta," consisting of five chapters, in which

**Appendixes.** are chiefly discussed the questions involved in the Creation, such as the transition from the infinite to the finite, that from absolute unity to

multifariousness, that from pure intelligence to matter, etc.; "Idra Rabbah," in which the teachings of the preceding portion are enlarged upon and developed; and "Idra Zuṭa," giving a résumé of the two preceding sections. The characteristic features of these portions are the absence of the doctrine of the EN SOF, and the use of the appellation "Zaddik" for the ninth Sefirah, which show that these writings are of an earlier period. To the larger appendixes are added the following fragments: "Raze de Razin," dealing with the physiognomy of the Cabala and the connection of the soul with the body; "Sefer HEKALOT," describing the seven heavenly halls, paradise, and hell; Ra'ya Mehemna," giving a conversation between Moses, the prophet Elijah, and Simeon ben Yoḥai on the allegorical import of the Mosaic commandments and prohibitions, as well as of the rabbinical injunctions; "Sitre Torah," on various cabalistic topics; "Midrash ha-Ne'elam," explaining passages of Scripture mystically by way of "remazim" and gematria; "Saba," containing a conversation between the prophet Elijah and Simeon ben Yoḥai about the doctrine of metempsychosis; "Yanuḳa," on the importance of washing the hands before meals and on similar subjects, written in the name of a child of Hamnuna Saba, whence the title "Yanuḳa" (child); "Tosefta" and "Matnitin," in which are sketched the doctrines of the Sefirot, the emanation of the primordial light, etc. Besides the Zohar proper, there are also a "Zohar Ḥadash," on Canticles, and "Tiḳḳunum," both new and old, which bear a close resemblance to the original work.

The Zohar repeatedly endeavors to impress upon the mind of the reader that the Biblical narratives and ordinances contain higher truths in addition to the literal meaning.

"Wo unto the man," says Simeon ben Yoḥai, "who asserts that this Torah intends to relate only commonplace things and secular narratives; for if this were so, then in the present times likewise a Torah might be written with more attractive narratives. In truth, however, the matter is thus: The upper world and the lower are established upon one and the same principle; in the lower world is Israel, in the upper world are the angels. When the angels wish to descend to the lower world, they have to don earthly garments. If this be true of the angels, how much more so of the Torah, for whose sake, indeed, the world and the angels were alike created and exist. The world could simply not have endured to look upon it. Now the narratives of the Torah are its garments. He who thinks that these garments are the Torah itself deserves to perish and have no share in the world to come. Wo unto the fools who look no further when they see an elegant robe! More valuable than the garment is the body which carries it, and more valuable even than that is the soul which animates the body. Fools see only the garment of the Torah, the more intelligent see the body, the wise see the soul, its proper being; and in the Messianic time the 'upper soul' of the Torah will stand revealed" (Zohar, iii. 152).

**Mysticism of the Zohar.**

"The man," it is said in the "Sifra di Zen'uta," "who is not acquainted with this book is like the savage barbarian who was a stranger to the usages of civilized life. He sowed wheat, but was accustomed to partake of it only in its natural condition. One day this barbarian came into a city, and good bread was placed before him. Finding it very palatable, he inquired of what material it was made, and was informed that it was made of wheat. Afterward one offered to him a fine cake kneaded in oil. He tasted it, and again asked: 'And this, of what is it made?' and he received the same answer, of wheat. Finally, one placed before him the royal pastry, kneaded with oil and honey. He again asked the same question, to which he obtained a like reply. Then he said: 'At my house I am in possession of all these things. I partake daily of them in root, and cultivate the wheat from which they are made.' In this crudeness he remained a stranger to the delights one draws from the wheat, and the pleasures were lost to him. It is the same with those who stop at the general principles of knowledge because they are ignorant of the delights which one may derive from the further investigation and application of these principles."

The Zohar assumes four kinds of Biblical exegesis: "Peshat" (literal meaning), "Remez" (allusion), "Derash" (anagogical), and "Sod" (mystic). The initial letters of the words "Peshat," "Remez," "Derash," and "Sod" form together the word "PaRDeS" (Paradise), which became the designation for the fourfold meaning of which the mystical sense is the highest part. The mystic allegorism is based by the Zohar on the principle

"**PaR-DeS.**" that all visible things, the phenomena of nature included, have besides their exoteric reality an esoteric reality also,

destined to instruct man in that which is invisible. This principle is the necessary corollary of the fundamental doctrine of the Zohar. The universe being, according to that doctrine, a gradation of emanations, it follows that the human mind may recognize in each effect the supreme mark, and thus ascend to the cause of all causes. This ascension, however, can only be made gradually, after the mind has attained four various stages of knowledge; namely: (1) the knowledge of the exterior aspect of things, or, as the Zohar calls it (ii. 36b), "the vision through the mirror that projects an indirect light"; (2) the knowledge of the essence of things, or "the vision through the mirror that projects a direct light"; (3) the knowledge through intuitive representation; and (4) the knowledge through love,

since the Law reveals its secrets to those only who love it (ii. 99b).

After the knowledge through love comes the ecstatic state which is applied to the most holy visions. To enter the state of ecstasy one had to remain motionless, with the hand between the knees, absorbed in contemplation and murmuring prayers and hymns. There were seven ecstatic stages, each of which was marked by a vision of a different color. At each new stage the contemplative entered a heavenly hall ("hekal") of a different hue, until he reached the seventh, which was colorless, and the appearance of which marked both the end of his contemplation and his lapse into unconsciousness. The Zohar gives the following illustration of an ecstatic state:

"Once," says R. Simeon ben Yoḥai, "I was plunged in a contemplative ecstasy, and I beheld a sublime ray of a brilliant light which illumined 325 circles, and amid which something dark was bathing. Then the dark point, becoming bright, began to float toward the deep and sublime sea, where all the splendors were gathering. I then asked the meaning of this vision, and I was answered that it represented the forgiveness of sins."

The Zohar spread among the Jews with remarkable celerity. Scarcely fifty years had passed since its appearance in Spain before it was quoted by many cabalists, among whom was the Italian mystical writer Menahem Recanati. Its

**Spread of the Zohar.** authority was so well established in Spain in the fifteenth century that Joseph ibn Shem-Tob drew from it arguments in his attacks against Maimonides. It exercised so great a charm upon the cabalists that they could not believe for an instant that such a book could have been written by any mortal unless he had been inspired from above; and this being the case, it was to be placed on the same level with the Bible. Even representatives of Talmudic Judaism began to regard it as a sacred book and to invoke its authority in the decision of some ritual questions. They were attracted by its glorification of man, its doctrine of immortality, and its ethical principles, which are more in keeping with the spirit of Talmudical Judaism than are those taught by the philosophers. While Maimonides and his followers regarded man as a fragment of the universe whose immortality is dependent upon the degree of development of his active intellect, the Zohar declared him to be the lord of the Creation, whose immortality is solely dependent upon his morality. Indeed, according to the Zohar, the moral perfection of man influences the ideal world of the Sefirot; for although the Sefirot expect everything from the En Sof, the En Sof itself is dependent upon man: he alone can bring about the divine effusion. The dew that vivifies the universe flows from the just. By the practise of virtue and by moral perfection man may increase the outpouring of heavenly grace. Even physical life is subservient to virtue. This, says the Zohar, is indicated in the words "for the Lord God had not caused it to rain" (Gen. ii. 5), which mean that there had not yet been beneficent action in heaven because man had not yet given the impulsion.

These and similar teachings appealed to the Talmudists and made them overlook the Zohar's dis-

parities and contrasts and its veiled hostility to the Talmud. The influences of the Zohar on Judaism were both beneficial and deleterious. On the one hand, the Zohar was praiseworthy because it opposed formalism, stimulated the imag-

**Ethical System.** ination and feelings, and restored prayer (which had gradually become a mere external religious exercise) to

the position it had occupied for centuries among the Jews as a means of transcending earthly affairs for a time and placing oneself in union with God; and on the other hand, it was to be censured because it propagated many superstitious beliefs, and produced a host of mystical dreamers, whose overheated imaginations peopled the world with spirits, demons, and all kinds of good and bad influences. Its mystic mode of explaining some commandments was applied by its commentators to all religious observances, and produced a strong tendency to substitute a mystic Judaism for the rabbinical cult. Thus the Sabbath, with all its ceremonies, began to be looked upon as the embodiment of the Divinity in temporal life, and every ceremony performed on that day was considered to have an influence upon the superior world. Zoharic elements even crept into the liturgy of the sixteenth and seventeenth centuries, and the religious poets not only used in their compositions the allegorism and symbolism of the Zohar, but even adopted its style, the characteristic features of which were the representation of the highest thoughts by human emblems and human passions, and the use of erotic terminology to illustrate the relations between man and God, religion being identical with love. Thus, in the language of many Jewish poets the beloved one's curls indicate the mysteries of the Deity; sensuous pleasures, and especially intoxication, typify the highest degree of divine love as ecstatic contemplation; while the wine-room represents merely the state through which the human qualities merge or are exalted into those of the Deity.

The enthusiasm felt for the Zohar was shared by many Christian scholars, such as Pico de Mirandola, Reuchlin, Ægidius of Viterbo, etc., all of whom believed that the book contained proofs of the truth of Christianity. They were led to this belief by the analogies existing between some of the teachings of the Zohar and certain of the Christian dogmas, as for instance the fall and redemption of man, and the dogma of the Trinity,

**Influence on Christian Mysticism.** which is expressed in the Zohar in the following terms: "The Ancient of Days has three heads. He reveals himself in three archetypes, all three forming but one. He is thus symbolized by the number Three. They are revealed in one another. [These are:] first, secret, hidden 'Wisdom'; above that the Holy Ancient One; and above Him the Unknowable One. None knows what He contains; He is above all conception. He is therefore called for man 'Non-Existing' ["'Ayin'"] (Zohar, iii. 238b). This and also the other doctrines of Christian tendency that are found in the Zohar are now known to be much older than Christianity; but the Christian scholars who were deluded by the similarity of these teachings to certain Christian dogmas deemed

it their duty to propagate the Zohar. Shortly after the publication of the work (Mantua and Cremona, 1558) Joseph de Voisin translated extracts from it which deal with the soul. He was followed by many others, among whom was Knorr, Baron von Rosenroth, who rendered into Latin the introduction, the "Sifra di-Zeni'uta," the "Idra Rabbah," and the "Idra Zuta" ("Kabbala Denudata," Sulzbach, 1677).

The disastrous effects of the Shabbethai Zebi movement, which was greatly fostered by the obnoxious influences of the Zohar, damped the enthusiasm that had been felt for the book, and the representatives of Talmudic Judaism began to look upon it with suspicion. Especially was this the case when the Shabbethaian movement had degenerated into religious mysticism and had produced the anti-Talmudic sectaries who styled themselves "Zoharites," and who, under the leadership of Jacob Frank, finished by embracing Christianity. However, the Zohar is still held in great reverence by many Orthodox Jews, especially the Hasidim, who, under its influence, assign the first place in religion not to dogma and ritual, but to the sentiment and the emotion of faith.

Among the numerous commentaries written on the Zohar the most important are: "Torat Emet," containing corrections and explanations of words for the section on Genesis, by David ben Abraham Shemariah (Salonica, 1604); "Yesh Sakar," on the religious prescriptions of the Zohar, by J. Bär ben Petahiah, who published also "Meqor Hokmah" and "Imre Binah," on the foreign words in the Zohar (Prague, 1610, 1611); "Yesha' Yah," explanation of the foreign words in the Zohar, by Solomon Isaiah ben Eliezer Hayyim Nizza (Venice, 1630); "Hibbur 'Ammude Sheba'," by Aaron Selig Zolkiev (Cracow, 1636); "Amarot Tehorot," explaining the difficult words of the Zohar, by Wolf Leitmeritz (Lublin, 1645); "Emek ha-Melek," commentaries on various sections of the Zohar, by Naphtali Herz ben Jacob Elhanan (Amsterdam, 1648); "Sha'ar ha-Shamayim," introduction to and rules of the cabalistic system of the Zohar, by Abraham Herrera (*ib.* 1655); "Hesed la-Abraham," novella on the Zohar, by Abraham Azulai (*ib.* 1685); "Wayakhel Mosheh," by Moses ben Menahem (Dessau, 1699); "Or Yisrael," by Israel Jaffe (Frankfort-on-the-Oder, 1711). For the cabalistic system of the Zohar see ADAM QADMON; AMULET; ASCENSION; AZILUT; CABALA; CREATION; EMANATION; SEFIROT; SOUL.

**ZOLA, EMILE**; French novelist; born in Paris April 2, 1840; died there Sept. 29, 1902. It was only in his last years, when anti-Semitism had reached an acute stage in France, that he took up the cause of the Jewish community against its assailants; but several Jewish characters, almost invariably connected with the French financial world, had appeared in some of his novels. Thus,

**His Novels.** with the French financial world, had appeared in some of his novels. Thus,

in his "Son Excellence Eugène Rougon," he delineated a certain *Kahn*, an unscrupulous deputy, railway-contractor, and ironmaster, son of a Jewish banker at Bordeaux; in "Nana" he portrayed a German Jew named *Steiner*, whom he represented as amassing millions by his acumen and as squandering them in gross dissipation until he was at last completely ruined by the woman whose name furnishes the title of the book; and in "L'Argent" (1890-91) he introduced various Jewish characters, such as bankers, stock-jobbers, and speculators. But it should be said that if Zola placed various bitter diatribes in the mouths of some of the Jew-haters figuring in the last-named novel, this was simply because his subject required it, the diatribes in question being in no sense representative of the author's personal sentiments.

It is curious to observe that his book "Paris," in which he presents in a not quite favorable light a great number of Jewish characters, and which was published in volume form in March, 1898 (that is, immediately after the author's trial in Paris in connection with the DREYFUS CASE),

**Attitude on Jewish Question.** gives no indication whatever of his intervention in that famous affair, or of the various attempts he had made, while writing the volume, to stem the progress of anti-Semitism in France. In the early part of 1896 he contributed to the pages of the Paris "Figaro" a very vigorous and much-noticed article entitled "Pour les Juifs," the key-note of which was sounded in the opening paragraph:

"For some years I have been following with increasing surprise and disgust the campaign which some people are trying to carry on in France against the Jews. This seems to me monstrous, by which I mean something foreign to all common sense, truth, and justice, something blind and foolish, which would carry us back several centuries, and which would end in the worst of abominations, religious persecution. . . ."

In this article Zola dealt with anti-Semitism from a general point of view, making no mention of Captain Dreyfus, the agitation for whose release had not yet begun. At a later date, when Zola had espoused the cause of the unfortunate prisoner, he frequently referred to the general question of anti-Semitism, which he denounced as odious and foolish, both in his articles "M. Scheurer-Kestner," "Le Syndicat," and "Procès Verbal," published in "Le Figaro" in the autumn of 1897, and in his subsequent pamphlets "Lettre aux Jeunes Hommes" and "Lettre à la France." His adversaries thereupon accused him of venality, asserting that he had been bought by the Jews.

When his active participation in the Dreyfus case had ceased, he chose the affair as the subject of what was destined to be his last novel, "Vérité," largely transferring the action, however, from mili-

tary spheres to the teaching world, in such wise that in his pages Captain Alfred Dreyfus became a French provincial schoolmaster called

**His Last Work.** *Simon*, with a brother named *David* (M. Mathieu Dreyfus), while the notorious Major Esterbazy was trans-

formed into a certain *Brother Gorgias*. Other Jewish characters figured in the volume; for instance, *Simon's* wife, *Rachel* (Mme. Alfred Dreyfus); their children *Joseph* and *Sarah*; the *Lehmans*, a family of penurious Jewish tailors; and *Baron Nathan* and his daughter *Lia*, who became a Catholic, like *Eve* in "Paris," and married a violent anti-Semite, the *Count de Sanglébeuf*. *Nathan* is not described as having formally renounced the Jewish faith, but Zola treats him as a renegade, one of those who, having risen to affluence and rank, not only cast off the ancestral traditions, but even join the persecutors of their race. From first to last "Vérité" is a vigorous denunciation of anti-Semitism in its various forms, its growth and diffusion in France being chiefly attributed by Zola to the action of the Roman Catholic priesthood. The writing of the book was only just finished when Zola died by accidental suffocation. Sincere regret for his death was expressed by Jewish communities all over the world, for they recognized that they had lost an able and perfectly disinterested friend in the deceased writer. A considerable part of the large sum of money subsequently raised for the erection of a monument to him in Paris was contributed by Jewish subscribers, several of whom had previously given liberally when a superb gold medal was struck in his honor.

**ZOMBER, BERNHARD (BĀR)**: Polish scholar; born at Lask in 1821; died at Berlin in 1884. Having acquired a fair knowledge of rabbinical literature in his native country, he went to Germany, where he studied successively under Joseph Shapiro and Jacob Ettlinger. Later he attended the universities of Würzburg and Berlin, and in 1871 he was appointed principal teacher of the Bet ha-Midrash of Berlin, a position which he held until his death. His works are as follows: "Hilkot Pesahim," on Passover laws compiled by Isaac ibn Ghayyat, supplemented by a commentary of his own entitled "Debar Halakah" (Berlin, 1864); "Ma'amar," a dissertation on Rashi's commentary on Nedarim and Mo'ed Kaṭan (*ib.* 1867); "Moreh Derek," the commentaries of Gershon Me'or ha-Golah and of Rashi on Mo'ed Kaṭan (*ib.* 1870); and "Shiṭṭah Meḳubbezet," Bezalel Ashkenazi's novellæ on Nedarim. In addition to these works, Zomber contributed several valuable articles to Jewish scientific periodicals, including a study on Judah ben Yaḳar, the commentator of the Yerushalmi, which was translated from German into Hebrew by Abraham Abele Ehrlich ("Ha-Karmel," iii. 294).

**ZOR.** See TYRE.

**ZOREF, SAMUEL HA-LEVI:** Rabbi at Posen; died between 1710 and 1716. He was the author of "Maẓref la-Kesef" (Frankfort-on-the-Oder, 1681), containing extracts from and an index to the "Shehe Luhot ha-Berit" ("SHeLaH") of Isaiah Horowitz, with two appendixes, one entitled "Kur la-Zahab" and giving extracts from Gabirol's "Mibhar ha-Peninim," and the other entitled "Teshubot Shib'im Zeḳenim" and containing maxims. A separate edition of the "Kur la-Zahab" was published at Offenbach in 1710, and in 1716 it was printed with the "Teshubot Shib'im Zeḳenim."

**BIBLIOGRAPHY:** Fürst, *Bibl. Jud.* iii. 555; Steinschneider, *Cat. Bodl.* col. 2499.

**ZOROASTRIANISM:** The religion of ancient Persia as founded by Zoroaster; one of the world's great faiths that bears the closest resemblance to Judaism and Christianity. According to the tradition in the Parsee books, Zoroaster was born in 660 B.C. and died in 583; but many scholars claim that he must have flourished at a much earlier time. All investigators, however, are agreed that his teachings were generally in force throughout Iran before the time of the Jewish Captivity. His name in its ancient form in the Avesta is "Zarathustra," and in later Persian, "Zardusht"; the form "Zoroaster," which is now common, has been adopted from the Greek and Latin "Zoroastres." The native country of the prophet is now believed to have been Media, in western Iran, and there are reasons for claiming that his birthplace was in the province of Atropatene, the modern Azerbaijan; but much of his ministry, or rather most of his prophetic career, was passed in eastern Iran, especially in the region of Bactria, where he won a powerful patron for his religion. This defender of the faith was a king named Vishtaspa, or Gushtasp, a name identical with that of Hystaspes, the father of Darius, although the two personages are not to be confounded, as has sometimes been done.

Zoroaster was originally a Magian priest, but he appears to have reformed or purified the creed of the Magi. His religious teachings are preserved in the AVESTA. The character of the Persian religion before Zoroaster's time

**Tenets of the Faith.** is not known, but a comparison with that of India shows that it must have had much in common with the early religion of the Hindus. It may be presumed that it was a modified nature-worship, with polytheistic features and some traces of demonistic beliefs. Herodotus ("Hist." i. 131 *et seq.*) states that the Persians from the earliest times worshiped the sun, moon, stars, and earth, and the waters and wind, and he intimates in precise words that they had borrowed certain religious elements from the Assyrians. One or two superstitious practises which he describes, such as the propitiation of the powers of evil (*ib.* iii. 35, vii. 114), show survivals of demoniacal rites, against which Zoroaster so strongly inveighed; and the account

which he gives of the Magian ceremonies is quite in accordance with Zoroastrianism.

One of the characteristic features of Zoroastrianism is the doctrine of dualism, recognizing the powers of good and evil as two personified principles at war with each other. Ahuramazda, or Ormuzd ("the Wise Lord"), leads the forces of good; Angra-

Mainyu, or Ahriman ("the Spiritual Enemy"), heads the hosts of evil.

**The Kingdoms of Good and Evil.** Bands of angels and archangels follow the divine leader, while troops of demons and archfiends hasten after the evil lord. The archangels are six

in number and are called by the general name Amesha Spentas ("Immortal Holy Ones"); they are personifications of virtues and abstract ideas, and are named Vohu Manah ("Good Mind"), Asha Valishta ("Perfect Righteousness"), Khshathra Vairya ("Wished-for Kingdom"), Spenta Armaiti (a feminine personification of harmony and the earth), Haṁrvatat ("Health," "Salvation"), and Ameretat ("Immortality"). The angels and lesser divine beings are termed Yazatas ("Worshipful Ones") and are very numerous, although twenty-one of them are more prominent than the rest; these include divine embodiments of the sun, moon, stars, fire, earth, water and air, the spirits of the righteous (called "fravashis"), and also several abstract concepts, like victory, religion, kingly glory, and the divinity known as Mithra, an incarnation of light and truth. The rabble of hell, led by Ahriman, is ill organized, and the chief archfiend, after Ahriman himself, is the demon Aeshma (Dæva), a name which is thought to be found in the Book of Tobit as Asmodeus, although this view is not accepted by some (see ASMODEUS). In addition to the six archfiends there is a legion of minor fiends and demons ("dæva," "druj").

The conflict between the opposing kingdoms of light and darkness forms the history of the world, which lasts for 12,000 years and is

**Millennial Doctrines.** divided into four great eons. The first 3,000 years is the period of spiritual existence. Ormuzd knows of

Ahriman's coexistence, and creates the world first in a spiritual state before giving it a material form, the "fravashis" being the models of the future types of things. Ahriman is ignorant of his great rival's existence, but on discovering this he counter-creates the hosts of demons and fiends. In the second 3,000 years, while Ahriman and his host have been confounded by Ormuzd, the latter creates the world in its material form, and the world is then invaded by Ahriman. The third 3,000 years is the period of conflict between the rival powers and the struggle for the soul of man, until Zoroaster comes into the world. His birth inaugurates a new era, and the fourth and last 3,000 years begins. These final millennial eras are presided over by Zoroaster himself and his three posthumous sons, who are to be born in future ages in an ideal manner, the last being the Messiah called Saoshyant ("Savior," "Benefactor"; lit. "he who will benefit and save the world"). In its general bearings this dualistic scheme of the universe is theologically monotheistic in so far as it postulates the final predominance of

Ormuzd; and it is optimistic in its philosophy, inasmuch as it looks for a complete regeneration of the world.

In all this struggle man is the important figure; for the ultimate triumph of right depends upon him. He is a free agent according to Zoroaster ("Yasna," xxx. 20, xxxi. 11), but he must ever be on his guard against the misguidance of evil. The purpose of Zoroaster's coming into the world and the aim of his teaching are to guide man to choose aright, to lead him in the path of righteousness, in order that the world may attain to ultimate perfection. This perfection will come with the establishment of the Good Kingdom (Avesta, "Vohu Khshathra"), the Wished-for Kingdom (Avesta, "Khshathra Vairya"), or the Kingdom of Desire (Avesta, "Khshathra Ish-tōish"). When this shall come to pass the world will become regenerate (Avesta, "Ahūm Frashem Kar"; or "Frashōkereti"); a final battle between the powers of good and evil will take place; Ahri-man and his hosts will be routed; and good shall reign supreme ("Yasht," xix. 89-93; Bundahis, xxx. 1-33). The advent of the Messiah (Saoshyant) will be accompanied by the resurrection of the dead and the general judgment of the world, which thenceforth will be free from evil and free from harm.

The motto of the Zoroastrian religion is "Good thoughts, good words, good deeds" (Avesta, "Humata, lūkhta, hvarshta"). Man in his daily life is enjoined to preserve purity of body and soul alike.

He is to exercise scrupulous care in keeping the elements earth, fire, and water free from defilement of any kind. Truth-speaking and honest dealing are made the basis of every action; kindness and generosity are virtues to be cultivated; and agricul-

ture and cattle-raising are prescribed as religious duties. Marriage within the community of the faithful, even to wedlock with blood relatives, is lauded; and according to the Avesta ("Vendidad," iv. 47), "he who has a wife is to be accounted far above him who has none; and he who has children is far above the childless man."

In disposing of the dead, it is unlawful to burn or bury the body or to throw it into water, as any of these modes of disposal would defile one of the sacred elements; the dead must therefore be exposed in high places to be devoured by birds and dogs, a custom which is still observed by the Parsees and Gabars in their "Towers of Silence."

In religious matters the priesthood was supreme in authority, and the sacerdotal order was hereditary.

The Mobeds and Herbeds were the Levites and Kohanim of Zoroastrianism. The name for priest, "atharvan," in the Avesta corresponds to "atharvan" in India; the Magi were a sacerdotal tribe of Median origin. In acts of worship (Avesta, "Yasna") animal sacrifices were sometimes offered, especially in more ancient times, but these immolations were subordinate and gave place more and more to offerings of praise and thanksgiving accompanied by oblations of consecrated milk, bread, and water. The performance of these

rites was attended by the recitation of long litanies, especially in connection with the preparation of the sacred drink "haoma," made from a plant resembling the Indian "sōma," from which an exhilarating juice was extracted. It has been thought that the twigs (Avesta, "baresman"; modern Persian, "barsom") employed by the Zoroastrian priests in their ritual are alluded to as the "branch" held to the nose by the sun-worshippers in the vision of Ezekiel (viii. 16-17); and the consecrated cake (Avesta, "draonah"; modern Persian, "darūn") has been compared with the Hebrew showbread.

The points of resemblance between Zoroastrianism and Judaism, and hence also between the former and Christianity, are many and striking. Ahuramazda, the supreme lord of Iran, omniscient, omnipresent, and eternal, endowed with creative power, which he exercises especially through the medium of his Spenta Mainyu ("Holy Spirit"), and governing the universe through the instrumentality of angels and archangels, presents the nearest

parallel to YHWH that is found in antiquity. But Ormuzd's power is hampered by his adversary, Ahri-man, whose dominion, however, like Satan's, shall be destroyed at the end of the world. Zoroastrianism and Judaism present a number of resemblances to each other in their general systems of angelology and demonology, points of similarity which have been especially emphasized by the Jewish rabbinical scholars Schorr and Kohut and the Christian theologian Stave. There are striking parallels between the two faiths and Christianity in their eschatological teachings—the doctrines of a regenerate world, a perfect kingdom, the coming of a Messiah, the resurrection of the dead, and the life everlasting. Both Zoroastrianism and Judaism are revealed religions: in the one Ahuramazda imparts his revelation and pronounces his commandments to Zarathustra on "the Mountain of the Two Holy Communing Ones"; in the other YHWH holds a similar communion with Moses on Sinai. The Magian laws of purification, moreover, more particularly those practised to remove pollution incurred through contact with dead or unclean matter, are given in the Avestan Vendidad quite as elaborately as in the Levitical code, with which the Zoroastrian book has been compared (see AVESTA). The two religions agree in certain respects with regard to their cosmological ideas. The six days of Creation in Genesis find a parallel in the six periods of Creation described in the Zoroastrian scriptures. Mankind, according to each religion, is descended from a single couple, and Mashya (man) and Mashyana are the Iranian Adam (man) and Eve. In the Bible a deluge destroys all people except a single righteous individual and his family; in the Avesta a winter depopulates the earth except in the Vara ("enclosure") of the blessed Yima. In each case the earth is peopled anew with the best two of every kind, and is afterward divided into three realms. The three sons of Yima's successor Thraetaona, named Erij (Avesta, "Airya"), Selm (Avesta, "Sairima"), and Tur (Avesta, "Tura"), are the inheritors in the Persian account; Shem, Ham and Japheth, in the Semitic

story. Likenesses in minor matters, in certain details of ceremony and ritual, ideas of uncleanness, and the like, are to be noted, as well as parallels between Zoroaster and Moses as sacred lawgivers; and many of these resemblances are treated in the works referred to at the end of this article.

It is difficult to account for these analogies. It is known, of course, as a historic fact that the Jews and the Persians came in contact with each other at an early period in antiquity and remained in more or less close relation throughout their history (see **AVESTA**;

**Uncertain.** **ANALOGIES** throughout their history (see **AVESTA**;

**Media**; **Persia**). Most scholars, Jewish as well as non-Jewish, are of the opinion that Judaism was strongly influenced by Zoroastrianism in views relating to angelology and demonology, and probably also in the doctrine of the resurrection, as well as in eschatological ideas in general, and also that the monotheistic conception of **YHWH** may have been quickened and strengthened by being opposed to the dualism or quasi-monotheism of the Persians. But, on the other hand, the late James Darmesteter advocated exactly the opposite view, maintaining that early Persian thought was strongly influenced by Jewish ideas. He insisted that the Avesta, as we have it, is of late origin and is much tinged by foreign elements, especially those derived from Judaism, and also those taken from Neoplatonism through the writings of Philo Judæus. These views, put forward shortly before the French scholar's death in 1894, have been violently combated by specialists since that time, and can not be said to have met with decided favor on any side. At the present time it is impossible to settle the question; the truth lies probably somewhere between the radical extremes, and it is possible that when knowledge of the Assyrian and Babylonian religion is more precise in certain details, additional light may be thrown on the problem of the source of these analogies, and may show the likelihood of a common influence at work upon both the Persian and Jewish cults.

A. V. W. J.

**ZOX, EPHRAIM LAMEN**: Communal worker of Melbourne, Australia; born in London 1837; died Oct. 23, 1899. He was thirteen years old when he arrived in Melbourne, and he engaged successively in gold-digging, auctioneering, and the clothing business, and also operated for many years as a financier. Zox was closely associated with almost every charitable movement in Melbourne, and the Jewish community there long regarded him as its leader. He was successively treasurer, president, and trustee of the Hebrew congregation; supported the Jewish Philanthropic Society; was president of the Melbourne branch of the Anglo-Jewish Association; and took a special interest in the Discharged Prisoners' Aid Society. He was, moreover, one of the most popular of Victorian politicians, and was a member of the legislature, entering the Assembly in May, 1877, as a representative of East Melbourne, and retaining his seat for that electorate for twenty-one years. He served also as chairman of the Charities Commission.

**ZSIDÓ HIRADÓ.** See **PERIODICALS**.

**ZUCKER, ALFRED**: Chemist and manufacturer of Dresden, Germany; born Aug. 17, 1871, in Uffenheim, Bavaria. He studied pharmacy and chemistry at the universities of Würzburg and Erlangen; and while he was still a student the Württemberg government, at the suggestion of the Würzburg professor of botany, Geheimrat Sachs, placed him on a commission for fighting a destructive vine-bug, the efforts of which body he directed to a successful conclusion. He was later appointed military apothecary of the Bavarian Home for Pensioned Soldiers ("Invalidenhaus"), and while holding that position he published several short pharmaceutical treatises which attracted the attention of specialists. His larger publications are "Beitrag zur Direkten Beeinflussung der Pflanzen Durch die Kupfervitriolkalkbrühe," Stuttgart, 1896, and "Repertorium der Photochemie," Vienna, Leipzig, and Budapest, 1901; and he contributed to "Hager's Pharmaceutisch-Technisches Manuale. Encyclopädische Vorschriftensammlung für Aerzte, Apotheker, etc.," 7th ed., Leipzig and Berlin, 1902.

S.

**ZUCKER, MARCUS**: German librarian and author; born May 1, 1841. He was for some time chief librarian at the University of Erlangen, and has made a specialty of the history of art. Among his writings are: "Dürers Stellung zur Reformation" (1886); "Michelangelo" (1888); "Die Holländische Malerei des 17ten Jahrhunderts" (1892); "Albrecht Dürer" (1900). With J. Merz he edits the "Christliches Kunstblatt."

N. D.

**ZUCKERKAN DL, EMIL**: Austrian anatomist; born at Raab, Hungary, in 1849; educated at the University of Vienna (M. D. 1874). In 1875 he became privat-docent of anatomy at the University

of Utrecht, and he was appointed assistant professor at the University of Vienna in 1879, being made professor at Graz in 1882. Since 1888 he has been professor of descriptive and topographical anatomy at the University of Vienna.

Zuckermandl has contributed many monographs to medical journals. Among his works the following may be mentioned: "Zur Morphologie des Gesichtschädels" (Stuttgart, 1877); "Ueber eine Bisher noch Nicht Beschriebene Drüse der Regio Suprahyoidea" (*ib.* 1879); "Ueber das Riechcentrum" (*ib.* 1887); and "Normale und Pathologische Anatomie der Nasenhöhle und Ihrer Pneumatischen Anhänge" (Vienna, 1892).

**ZUCKERMANDEL, MOSES SAMUEL:**

German rabbi and Talmudist; born at Ungarisch-Brod, Moravia, April 24, 1836. He became a rabbi in Pleschen, Prussia, and was appointed lecturer on the Mora-Leipziger foundation at Breslau April 1, 1898. He has published: "Die Erfurter Handschrift der Tosefta" (1876); "Die Tosefta nach den Erfurter und Wiener Handschriften" (1880-82); "Spruchbuch Enthaltend Biblische Sprüche aus dem Gebetbuche" (1889); and "Vokabularium und Grammatik zu den Hebräischen Versen des Spruchbuches I." (1890).

**ZUCKERMANN, BENEDICT:**

German scientist; born at Breslau Oct. 9, 1818; died there Dec. 17, 1891. He received a thorough Hebrew and secular education at the institutions of his native city, and devoted himself at the university to the study of mathematics and astronomy. In 1845 he joined Graetz in agitating for an address to Zacharias Frankel to congratulate him on the conservative stand which he had taken against the Frankfort Conference; and when Frankel assumed the management of the Breslau seminary he appointed Zuckermann on the teaching staff. He gave instruction in mathematics to those of the students who had not had a regular school training, and taught calendric science in the academic department, at the same time acting as librarian and administrator of the stipendiary fund. He wrote: "Ueber Sabbathjahrcycclus und Jubelperiode," Breslau, 1859 (translated into English by A. Loewy, London, 1866); "Ueber Talmudische Münzen und Gewichte," Breslau, 1862; "Katalog der Seminarbibliothek," part i., *ib.* 1870 (2d ed., *ib.* 1876); "Das Mathematische im Talmud," *ib.* 1878; "Tabelle zur Berechnung des Eintrittes der Nacht," *ib.* 1892; "Anleitung und Tabellen zur Vergleichung Jüdischer und Christlicher Zeitanlagen," *ib.* 1893. He also contributed occasionally to the "Monatsschrift für Geschichte und Wissenschaft des Judenthums."

Zuckermann's religious attitude was strictly Orthodox. Regularly twice a day he attended the synagogue maintained by him in the house which he had inherited from his father, although he lived in the seminary building, where daily services were held in the chapel. He never married; and while genial

and kindly in nature, he was strongly opposed to anything savoring of ostentation. On his seventieth birthday he fled from Breslau to escape all ovations, and in his will he forbade the delivering of a funeral address.

**ZUENZ, ARYEH LOEB HARIF B. MOSES:**

Polish rabbi; born at Pinczow about 1773; died at Warsaw 1833. He was a thorough Talmudic scholar, and was also well versed in the Cabala. Holding first the rabbinate of Plock and then that of Prague, he later settled at Warsaw, where he died. The author of "Shem ha-Gedolim he-Hadash" narrates that Aryeh Loeb promised on his deathbed to be a good advocate in heaven for those who should publish his writings, and that this promise was engraved upon his tombstone. The rabbi was the author of many works, most of which are still in manuscript, only the following two having been published: "Ya'alat Hen" (Prague, 1793), responsa; and "Tib Giṭṭin" (Warsaw, 1812), discussions on the "Geṭ Mekushshar" of R. M. Bala. The "Tib Giṭṭin" was written when the author was eighty years of age, and its decisions have been accepted in many places.

ZUG. See SWITZERLAND.

**ZUGOT** (lit. "pairs"): Name given to the leading teachers of the Law in the time preceding the Tannaim. The period of the Zugot begins with Jose b. Joezer and ends with Hillel. The name "Zugot" (comp. Latin "duumviri") was given to these teachers because, according to the tradition in *Ḥagigah*, two of them always stood at the same time at the head of the Sanhedrin, one as president ("nasi") and the other as vice-president or father of the court ("ab bet din"; see SANHEDRIN). There were five pairs of these teachers: (1) Jose b. Joezer and Jose b. Johanan, who flourished at the time of the Maccabean wars of independence; (2) Joshua b. Perahyah and Nittai of Arbela, at the time of John Hyrcanus; (3) Judah b. Ṭabbaï and Simeon b. Sheṭaḥ, at the time of Alexander Jannæus and Queen Salome; (4) Shemaiah and Abtalion, at the time of Hyrcanus II.; (5) Hillel and Shammai, at the time of King Herod.

**ZUKERTORT, JOHANNES HERMANN:**

Chess-player and physician; born at Lublin, Russian Poland, Sept. 7, 1842; died in London June 20, 1888; son of a Jewish convert to Christianity who was a clergyman at Lublin. He was educated at the gymnasium of Breslau and at the university of that city, whence he graduated in medicine in 1866. As a member of the medical corps of the German army he saw service in 1866, and again in the Franco-Prussian war of 1870-71.

Zukertort, who was destined to be one of the most

eminent exponents of the game, learned to play chess in Breslau when he was about nineteen. Entering a tournament in that city, and receiving the odds of the queen, he lost every game, whereupon he took up the study of Bilguer's "Handbuch," with the result that in 1862 he won games from Andersen at the odds of a knight. Within a very few years he became one of the strongest players in Germany; and in 1871 he defeated Anderssen in a set match.

In 1872 Zukertort went to London and won third prize in the tourney there, Steinitz and Blackburne gaining first and second respectively. His reception in England was so cordial that he decided to make that country his home; and he accordingly became naturalized, and thenceforth played as an English representative in international competitions. From this time forward his career was one of unprecedented success. In 1878 he gained the first prize at the Paris Exhibition tournament; in 1880 he beat Rosenthal in a match; in 1881 he took second prize at Berlin (Blackburne first); the same year he beat Blackburne in a match; in 1882 he was fifth at Vienna (Steinitz first); and in 1883 at the London international tournament he gained the first prize of £300 (\$1,500), Steinitz being second, and Blackburne third. In this last competition he won twenty-two games and lost only one. Of a highly nervous temperament, Zukertort unfortunately had recourse to drugs to brace himself for his contests, and their ill effects became manifest toward the close of the tournament. He never fully recovered; and he very unwisely persisted in challenging Steinitz to a match, of which seven games were to be played in New York, seven in St. Louis, and seven in New Orleans. Zukertort took four games out of five in the first set (March, 1886), but was altogether outplayed in the remaining ones; and he returned to England a mere wreck of his former self. On June 19, 1888, while taking part in a game at Simpson's Divan in London, he was seized with apoplexy. He was removed to the Charing Cross Hospital, where he died on the following day.

Perhaps Zukertort's greatest achievements were in blindfold play, in which he has been surpassed only by Pillsbury.

Zukertort, at first with Anderssen and afterward alone, edited the "Neue Berliner Schachzeitung" (1867-71); and he collaborated with Jean Dufresne on the "Grosses Schach-Handbuch" (2d. ed., Berlin, 1873). He was the author of "Leitfaden des Schachspiels" (Berlin, 1869; 5th ed. 1897) and "Sammlung der Auserlesensten Schachaufgaben, Studien und Partiestellungen" (*ib.* 1869). From 1873 to 1876 he was one of the principal contributors to the "Westminster Papers," the official organ of the St. George's Chess Club, London; and in 1879, together with L. Hoffer, he founded "The Chess Monthly," which for seventeen years was the leading chess magazine in England.

**ZUKUNFT, DIE.** See PERIODICALS.

**ZUNDER, MAIER.** See CONNECTICUT.

**ZUNSER, ELIAKIM:** Russian "badhan" and poet; born at Wilna in 1845. At the age of sixteen he had gained a local reputation as a poet, and after setting his rimcs to music of an Oriental character for voice, orchestra, and piano, he sang at weddings and other entertainments, where his talent was always liberally rewarded, his fee being at one time as high as 200 rubles. He thus introduced a new and more refined method of amusing wedding guests; and since the publication of his "Shirim Hadashim" (Wilna, 1861) he has composed over 600 songs, some of which he translated into a Hebrew which is not always rigid in its accuracy. In 1889 Zunser went to America, touring the country under the management of an impresario, and singing and reciting his repertoire. He finally settled in New York as a printer and publisher.

Most of Zunser's poems are national in tendency, while the remainder are nearly all panegyrics of civilization, this category including "Die Eisenbahn," "Licht," "Die Sokke," "Die Pyramiden," "Columbus und Washington," and "Das Goldene Land." He has likewise written for the Yiddish stage, for which he produced the best version of the "Sale of Joseph." Many of his poems have been published in the "Jewish Daily News" and the "Volksadvokat," while an edition of a large number of his songs with their music has also appeared (New York, 1891). His seventieth birthday was the occasion of a celebration in New York

**ZUNTZ, NATHAN:** German physiologist; born at Bonn Oct. 6, 1847; educated at the university of his native city (M.D. 1868). Becoming an assistant at the physiological institution of the university, he was appointed privat-docent in 1871, and three years later became prosector and assistant professor of anatomy. In 1881 he was appointed professor of animal physiology at the Landwirtschaftliche Hochschule at Berlin. Zuntz has made many contributions on physiology, nutrition, respiration, and similar topics, to the medical journals.

**ZUNZ, LEOPOLD** (Hebrew name, **Yom-Tob Lippmann**): Founder of the modern "science of Judaism" and pioneer in the history of Jewish literature, religious poetry, and the ritual of the synagogue; born at Detmold Aug. 10, 1794; died at Berlin March 18, 1886. The genealogy of his family can be traced continuously for three centuries (comp. Kaufmann in "Monatsschrift," 1894, p. 481), and members are known to have been prominent in the Jewish community of Frankfort-on-the-Main, the cognomen "Zunz" being a modification of "Zons," the name of a place on the Rhine.

Zunz's father, **Mendl Emanuel** (b. His 1761; d. July 3, 1802), was a "baḥur," **Family.** or Talmudic student, who earned a precarious livelihood as a teacher at the bet ha-midrash and by giving private lessons in Hebrew and Talmud until a pulmonary affection

compelled him to relinquish this occupation almost entirely and to conduct a small grocery. His mother, **Hendel Behrens** (b. 1773; d. Nov. 9, 1809), was also delicate, and died at the age of thirty-six in Hamburg, whither she and her husband had removed the year after Lippmann's birth. Although his constitution was extremely delicate in boyhood, Lippmann outlived not only his twin sister, who died in infancy, but also his other sisters and brothers. His early youth was spent under the clouds of physical discomfort and material poverty. His first teacher was his father, who began to instruct his son in Hebrew verbs, Rashi, and the Mishnah as early as 1799. The father's sudden death was a great blow to the struggling family, and obliged Lippmann to accept a free scholarship in the Samson school at Wolfenbüttel, which he entered just a year after his father died. At this school he attracted the notice of his instructors by his remarkable aptitude for mathematics, though at first he seems to have been little amenable to discipline. The appointment of S. M. Ehrenberg as the director of the school in 1807 marked an epoch in the mental and moral development of the lad. As early as 1805 Zunz had tried his hand at making a key to an elementary text-book on arithmetic, while in 1806 a Hebrew satire from his pen, in which he spared neither teachers nor fellow pupils, was consigned to the flames to atone for the wickedness of its author. Ehrenberg, however, took care that this gifted pupil should pursue his studies methodically, and such was his success that in July, 1810, fifteen months after Zunz had been admitted to the highest grade of the Wolfenbüttel gymnasium (which he was the first Jew to enter), Ehrenberg entrusted to him the temporary supervision of the Samson school. His mother had died in the previous year, and Zunz was thus left without a near relative. His free scholarship was about to expire, moreover, and in order to remain at Wolfenbüttel he began to act as an instructor at the Samson school in return for board and lodging. He was particularly interested in algebra and optics, and perfected his mastery of Hebrew by translating various historical essays from the German and other languages.

The summer of 1811 is noteworthy as the time when Zunz made his first acquaintance with Wolf's "Bibliotheca Hebraea," which, together with David Gans's "Zemah Dawid," gave him his first introduction to Jewish literature and the

first impulse to think of the "science of Judaism." In the same year (1811) he proceeded to write a book which he intended to be for Palestine what the "Anacharsis" of Klotz had been for Greece. Though he finished the curriculum of the gymnasium in 1811, his intention of taking up university studies could not be carried out until more than four years had elapsed. He remained at Wolfenbüttel until Sept. 25, 1815, when he set out for Berlin, arriving there Oct. 12, and accepting a tutorship in the Hertz family. At the university, where he matriculated while Schleiermacher was rector, he took up mathematical, philosophical, historical, and philological studies, among his professors being Boeckh, Fr. A. Wolf, Savigny, De Wette, and Wilken, the last two inducting him into Semitics and Biblical branches. In Aug., 1817, he wrote his first sermon. Of far greater importance, as showing the

bent of his mind, is the fact that during this period he copied the manuscript of Shem-Tob ibn Falquera's "Sefer ha-Ma'ilot" and occupied himself with the study of Hebrew manuscripts from Palestine and Turkey shown him by a Polish Jew named David ben Aaron. In Dec., 1817, he wrote an essay entitled "Etwas über die Rabbinische Litteratur; Nebst Nachrichten über ein Altes bis Jetzt Ungedrucktes Hebräisches Werk." It was published in 1818 ("Gesammelte Schriften," i. 1-31, Berlin, 1875). This little book marks an epoch in the history of modern Jewish scholarship. It is a plea for the recognition of Judaism and its literature in university research and teaching. It exposed the

Leopold Zunz.

ignorance which marked the books written by non-Jewish scholars on Judaism and the Jews, showing at the same time that Judaism

**The** had made valuable contributions to **Foundation** many sciences and therefore had a **of Jewish** place in their history. This booklet **Science.** may be said to have been the first to trace the outlines of Jewish science.

Shortly after writing the book, but before its publication, Zunz resigned his position with Hertz (March 28, 1818) and revisited his home. During this time he was invited to become a candidate for the position of preacher in the Hamburg Temple, and would have obtained it had he not withdrawn upon learning that Büschenthal was willing to accept the call. In June, Zunz returned to Berlin and resumed his university studies, which he completed in 1819, though it was not till Jan. 2, 1821, that he took his degree of Ph.D. at the University of Halle.

In the interval, while privately continuing his studies and eking out a livelihood by tutoring in German, Latin, and mathematics, he founded, together with Eduard Gaus and Moses Moser, the Verein für Cultur und Wissenschaft der Juden (Nov. 17, 1819), a society intended "through culture and education to bring the Jews into harmonious relations with the age and the nations in which they live." This association, of which Zunz was the leading spirit, from the very first attracted the best and brightest among the Jews of Germany, including Heinrich Heine, Ludwig Markus, David Friedländer, Israel Jacobson, and Lazarus Bendavid. In 1822 the "Zeitschrift für die Wissenschaft des Judenthums,"

edited by Zunz, appeared under the auspices of this society. According to the program written by Wohlwill, für Cultur der Juden. the new "science" comprised a study of the historical development and the philosophical essence of Judaism, although these two methods must be based on a critical understanding of Jewish literature. Zunz's contributions justified this program. In addition to his article on "Hispanische Ortsnamen," mention should be made of his biography of Rashi, which is a veritable classic, illustrating the method which should be pursued, and serving as a brilliant example of what the result must be when all the modern principles of historical and literary research are devoted to a critical study of the data buried in Jewish literature. Another remarkable essay which he published in the "Zeitschrift" was his "Grundlinien zu einer Künftigen Statistik der Juden." The ideas which he there enunciated are by no means antiquated even at this day. The hopes aroused by the Verein were doomed to disappointment, however, and the "Zeitschrift" ceased to appear after the first volume. "Young Palestine," as Heine called the members, lacked religious enthusiasm; Gans became a Christian, and the Verein died. But the "science of Judaism" which it had founded did not share the fate of its first foster-parents, for it lived, thanks to Zunz. "A man of word and deed, he had created and stimulated and brought to pass, while others dreamed and then sank down despondent." As characteristic of him Heine coined the phrase which Karpeles deems so pregnantly descriptive of Zunz's disposition that he repeats it: "he remained true to the great caprice of his soul," believing in the regenerative power of the "Wissenschaft," while the weaker associates of those enthusiastic days deserted, and found preferment by way of baptism.

Other grievous disappointments awaited him at this same period. He preached in the so-called "Beer's Temple" (the new synagogue) from May, 1820, to the spring of 1822, receiving toward the end of this epoch a small stipend from the Berlin congregation. He married Adelheid Beermann May 9, 1822, the union remaining childless. Soon

**Marriage and Journalistic Career.** after his marriage his position as preacher became distasteful to him, and, feeling that preaching in the face of official arrogance and communal apathy was incompatible with his honor, he resigned his office on Sept. 13, 1822. The masterly sermons he had preached, and which were published

in April, 1823, did not treat of specifically Jewish matters. In 1822 Zunz became a member of the editorial staff of the "Haude und Spener'sche Zeitung," giving besides private lessons in the afternoon hours. He was not freed from this irksome task until Jan. 3, 1826, when he entered upon his duties as director of the Jewish communal elementary school. He remained at the head of the school four years; but again feeling that he was not permitted to bring about needed changes, he relinquished his post, disregarding the sacrifices the step entailed for him and his wife, and receiving but slight recognition for his devotion in a nomination to membership on the board of trustees of the Talmud Torah Institute of the congregation. He was doomed to still greater drudgery on the "Spener'sche Zeitung," part of his work consisting in making excerpts and translations from foreign journals.

In 1831 a difference of political opinion with the management induced him to resign. Though fraught with grave economic difficulties for Zunz, this step may be said to have been providential for Jewish literature. In 1825 he had drafted a plan for a work in four divisions on the "Wissenschaft des Judenthums." On Aug. 25, 1828, he paid his first visit to the famous Oppenheim Library, then in Hamburg but now in Oxford. Through Heine he had even begun to correspond with prominent publishers concerning his intended work; but on Oct. 15,

1831, he began to write in earnest, and on July 21, 1832, the "Gottesdienstliche Vorträge der Juden" appeared, destined to be the most important Jewish work published in the nineteenth century. In the preface, which was no less remarkable than the contents, the German authorities were arraigned for their refusal to grant the Jews the justice due them by right and for their reluctance to accord them liberty instead of special rights and privileges. The Jews were entitled to be citizens of Germany. Jewish science too ought no longer to be excluded from governmental patronage, but should have institutions provided for its development. In the synagogues the living word was once more to resound, for the sermon had always been an institution of Judaism. The book afforded the proof, and its purpose was to trace the historic growth of this synagogal institution. This preface was suppressed by the government and cut out from most copies of the first edition. The work itself was a masterly exposition of the gradual growth and evolution of homiletic literature, traced through the Midrash, the Haggadah, and the prayer-book. It was the first book to assign dates and to disclose the relative interdependence of the various documents. Besides showing that the sermon was thoroughly Jewish, the book demonstrated that Judaism had a science which could justly claim equality with the studies admitted to university standing. It proved, furthermore, that Judaism was a growing force, not a crystallized law. Scientific throughout, the book had a powerful influence in shaping the principles of Reform Judaism, especially as applied to the prayer-books. For all time to come the "Gottesdienstliche Vorträge" fixed the method which the literary exploration of Jewish literature

must follow to a certain degree, even though the merely formal criterion of the mention of a literary document is urged too strongly as decisive in assigning to it its date and place. With this book Zunz rose at once to the pinnacle of recognized leadership. His discriminating insight, his power of combination, his sound scholarship, his classic reserve, and his dignity of presentation proclaimed him master. No second edition of the "Gottesdienstliche Vorträge" was prepared by the author, but it was reprinted after his death (Frankfort-on-the-Main, 1892; comp. E. G. Hirsch, "Die Jubiläen Zweier Werke," in "Der Zeitgeist," 1882).

While Zunz's reputation as a pioneer was readily spread abroad by the "Gottesdienstliche Vorträge," no material benefits accrued to him from its publication. In Sept., 1832, he went to Hamburg, where he met H. I. Michael, the owner of rare manuscripts. The old struggle for bread awaited him upon his return to Berlin. He did not receive the appointment as head master of the Veitel-Heine Ephraim foundation as some friends had hoped he would, and he was even unsuccessful in his efforts to obtain employment as a bookkeeper, although willing to accept such a position. He advertised for pupils in Hebrew, rabbinics, and mathematics through the medium of the University Bulletin Board, but again with slight results. His friends proposed him for the vacant post of rabbi at Darmstadt, Aaron Chorin having conferred on him the *hattarat hora'ah*: but though Gabriel Riesser had recommended him (Oct. 9, 1833) as the first scholar of the day in Jewish literature, he was not elected. In consequence of this he could not be induced to be a candidate for Cassel and other places, though suggestions to apply came to him from various quarters, among them, it is interesting to note, one from New York. He continued to meet his friends on Sabbaths at Gumpertz's, and in 1835 he delivered a course of lectures on the Psalms, attended by Gans, Bellermann (the latter eighty years of age), M. Sachs, Zedner, Moser, and Gumpertz. In the same year he was called to Prague as preacher to the Society for Improving the Mode of Worship, a call which at last promised to deliver him from the drudgery for mere bread. When he

**In Prague.** arrived at Prague, however (Sept. 16, 1835), it did not require many days to convince him that he had found no compensation for his sacrifice in leaving Berlin. In Prague he met scarcely one that understood him. He thought himself lost "in China." He missed "books, periodicals, men, liberty." He regretted his "Wissenschaft." Before fifty days had elapsed he resolved to leave this city of petrified irresponsiveness. The people misjudged him, and called his firmness stubbornness and his principles eccentricities. His discontent did not help to improve the situation, and on Jan. 1, 1836, he gave notice that he wished to resign. He rejoiced like one delivered from prison when on July 8 he again arrived in Berlin. Soon after his return he found another opportunity of utilizing his scholarship in behalf of his German coreligionists. A royal edict forbade the Jews to assume Christian names. In this predicament the administration of the congregation bethought itself of Zunz, and on Aug. 5

he was commissioned to write a scientific treatise on the names of the Jews based upon original investigations. On Dec. 7, 1836, his "Die Namen der Juden" ("G. S." ii. 1-82) was published. It demonstrated that the names which had been classed as non-Jewish were an ancient inheritance of Judaism, and this proof, which rested on indisputable evidence and which was presented with the calm dignity of the scholar, made a deep impression. Tributes of admiration and gratitude were offered the author from all sides, Alexander von Humboldt being among those who felt impelled to thank Zunz. The congregation itself informed him soon afterward (July, 1837) of its intention of founding a "Lehrerseminar" to be directed by him. This seminary was opened Nov. 16, 1840, after protracted negotiations with Zunz, who became its first director. Even while the preparations for the

foundings of the normal school were in progress, Zunz had organized a staff of scholars for the translation of the "Lehrerseminar." Bible which has since borne his name, he himself acting as editor-in-chief and translating the Book of Chronicles (comp. Jew. Encyc. iii. 193). With this entrance upon a secure position, Zunz at last found himself freed from the struggle for existence. Thenceforth he had the leisure to concentrate his energies; his pen was busy enriching periodicals and the works of others with his contributions. Noteworthy among these was a study on the geographical literature of the Jews from the remotest times to the year 1841, which appeared in an English translation in Asher's edition of Benjamin of Tudela (ii. 230 *et seq.*). He also gave expert opinions on problems arising from the agitation for Reform, such as "Gutachten über die Beschneidung" (Frankfort-on-the-Main, 1844).

Although his "Gottesdienstliche Vorträge" was the very rampart behind which Reform could securely and calmly beat back the attacks of its opponents, Zunz showed little sympathy with the movement, because he suspected its leaders of ecclesiastic ambitions, and feared that rabbinical antocracy would result from the Reform crusade.

**Attitude Toward Reform.** He regarded much of the professional life of the rabbis as a "waste of time," and in a very late letter (see "Jahrbuch für Jüdische Geschichte," 1902, p. 171) he classed rabbis with soothsayers and quacks. The point of his protest against Reform was directed against *HOLDURIM* and the position maintained by this leader as an autonomous rabbi, as is evident from Geiger's answer to Zunz's strictures (Geiger, "Nachgelassene Schriften," v. 184-185). The violent outcry raised against the Talmud by some of the principal spirits of the Reform party was repugnant to Zunz's historic sense, while he himself was temperamentally inclined to assign a determinative potency to sentiment, this explaining his tender reverence for ceremonial usages. His position was by no means Orthodox in the usual sense, however, even in regard to the ritual practises, which he called symbols (see among others his meditation on *tefillin*, reprinted in "Gesammelte Schriften," ii. 172-176), denying them the validity of divine ordinances which the

faithful are bound to observe without inquiry into their meaning. His position accordingly approached that of the symbolists among the reformers who insisted that symbols had their function, provided their suggestive significance was spontaneously comprehensible. He emphasized most strongly the need of a moral regeneration of the Jews.

Zunz's sympathies with the science of Judaism were too dominant to allow him to lay aside his reserve and take a part in the active endeavors to recast the framework of the Synagogue, but in his chosen field, during this very period of agitation and unrest, he garnered a new harvest. In 1845 he published in Berlin another volume, "Zur Geschichte und Literatur," which comprises studies in all the departments of Jewish literature and life. The introductory chapter is a philosophical presentation of the essence of Jewish literature and its right to existence, its connection with the culture of the peoples among which the Jews have lived, and its bearing upon the civilizations amid which it developed. Zunz makes an earnest protest against the neglect of this literature, and caustically exposes its underlying motives—indolence, arrogance, and prejudice. A rapid survey of the treatment accorded Hebrew books serves as a prelude to the unsparing castigation administered to the conceit of the Christian scholars of the nineteenth century, and as a protest against the outrage perpetrated by the exclusion of Jewish studies from the universities. The volume itself was a proof that Jewish science had a right to citizenship in the academic republic of letters. Apparently disjointed, the various subjects treated in this volume found their unity in the methodical grasp of the author, who made it clear that underlying all these diverse interests was a distinct unity of purpose, the pulse-beat of a life striving for expression and realization. Bibliography, ethics, and culture were among the departments into which the book

**"Zur  
Geschichte  
und Li-  
teratur."**

ushered the student, while long periods of time, of which little had been known or understood, were there set forth in all their bearings and ambitions. Zunz had, indeed, earned the title of the Jewish Boeckh. Under his touch every detached fact appeared as symptomatic of the life of a vitalized organism. Superficially examined, the book seemed to be a collection of incoherent names, dates, and details, but when rightly taken as a whole, it won distinction as the result of studies undertaken to reveal the unifying thought manifest in all the various fragments of information, whether old or new. Once more Zunz had proved his supreme mastership in the wide field of Jewish literature; and that he had also the rare art of popular presentation was shown by the lectures which he delivered in 1842.

The year 1848 brought Zunz an opportunity to utilize his rare gifts of mind, tongue, and heart in the political arena. His oration in honor of the victims of the March uprising in Berlin attracted universal attention to him; and he was chosen elector in the 110th precinct both for the deputy to the Prussian legislature and for the representative in the German Diet. He addressed many a meeting of his fellow citizens, his lucidity of diction, clarity of

thought, eloquence of speech, readiness of wit, and thorough familiarity with the subject of the discussion distinguishing him among the many men of parts and power who were his colleagues. He was called to act as vice-chairman (Aug. 9, 1849) and later as chairman (Oct. 4) of the eighth Berlin Volksverein. On Nov. 6 he delivered the memorial address on Robert Blum; and at the same time he strove to reorganize the Jewish community on a liberal basis. He was likewise busy in conferences and private interviews with influential men, endeavoring to carry into effect the emancipation of the Jews; for in 1847 high functionaries of the court and state had sought his opinion on the proposed legislation regulating the status of the Prussian Jews.

The office of director of the normal school now seemed to him to consume too much of his time, and he severed his connection with this institution on Feb. 25, 1850. A small pension was voted him by the congregation, and assured him the liberty he craved for the completion of the labors which had come to fruition only in part in his "Gottesdienstliche Vorträge." The prayers and prayer-books of Judaism still awaited his presentation, but the material for this purpose was widely scattered in inaccessible manuscripts and distant libraries. Zunz had already gone in Sept., 1846, to the British Museum, and his visit had confirmed him in his plan of writing the history of Jewish hymnology and synagogal poetry as incorporated in the various liturgies of the Synagogue. He soon realized, however, that such a work would fill several volumes, and he accordingly resolved to write first the story of the poetry and then that of the poets. The "Synagogale Poesie des Mittelalters" was published March 2, 1855, and discussed the various kinds of poetry incorporated in the Jewish services, their external forms, their inner motive, and the circumstances, hopes, experiences, and sufferings that had evoked them. To trace the development of the Hebrew language in these monuments of the Jewish spirit was another of the preoccupations of Zunz, who showed, especially in his introductory chapter, that he who woke to new life the Jewish hymnal handled the German tongue with a mastership equaled only by the greatest writers, while his German translations helped to illustrate and vitalize the story. This introductory chapter has, indeed, become a classic, George Eliot deeming its phrases worthy of incorporation in "Daniel Deronda." Under the necessity of abbreviating the services at public worship the piyyuṭim had been attacked for years by those who strove for a reform of the ritual. Zunz's work gave the proof that these hymns were the slow accretion of centuries and were unequal in value. Yet, on the other hand, his book showed what wealth of feeling and fervor of faith lay hidden in these outbursts of lament, penitence, and expectancy. He demonstrated that the jewel-casket of the medieval Synagogue contained many a priceless gem in addition to several of inferior value.

Zunz now realized that without personal inspection of the manuscripts he could go no further in his history of the poets and the liturgy. On April

Zunz now realized that without personal inspection of the manuscripts he could go no further in his history of the poets and the liturgy. On April

26, 1855, he set out on his journey of exploration, spending twelve days in the British Museum, twenty in the Bodleian at Oxford, and three in Paris, and inspecting 280 manuscripts and 100 rare books. After paying a visit to Heinrich Heine (June 26-28), he returned on July 4, 1855. In the following year he inspected and excerpted eighty manuscripts in the Hamburg Library (June 18-July 27, 1856), and after his return he resumed his lectures on Jewish literature. In 1856, moreover, he wrote his "Ueber die Eidesleistungen der Juden," a defense of the Jews against the charge of perjury and a protest against the OATH MORE JUDÆICO,

**Scientific Journeys.** which appeared in the same year as his "Die Ritus des Synagogalen Gottesdienstes Geschichtlich Entwickelt" (1859). In conciseness of presentation and wealth of content this volume has scarcely a peer. He brought order out of chaos by grouping the several components of the liturgy according to various countries, exhibiting the growth of a liturgical literature developing through two millennia from small beginnings to the final compilations of fixed eyelets ("mahzorim") and rites.

During his studies preparatory to the concluding volume of his monumental work, Zunz continued his activity in public affairs, being entrusted with the presidency of the electoral assembly of his district (April 25, 1862). His main energy, however, was devoted to his scholarly pursuits, and, becoming daily more deeply impressed with the necessity of inspecting the Hebrew collections in Italy, he went to Parma (May 20, 1863), where he examined about 120 codices in the De Rossi Library; but he was not allowed to visit the Vatican. One of the fruits of this Italian trip was his "Hebräische Haudschriften in Italien, ein Mahnruf des Rechts." He crowned the labors to which he had consecrated his life by his volume on the "Literaturgeschichte der Synagogalen Poesie," the preface of which is dated Sept. 26, 1865. This was his thanks to the friends who had remembered his seventieth birthday (Aug. 10, 1864) by the founding of the Zunzstiftung, the initiative having been taken by Salomon Neumann. This concluding volume was of the greatest importance not only for the history of Jewish poetry, but also for that of the Jews, revealing the intellectual life of the Jews in Italy, Spain, and Germany. Once more an enormous mass of material was made intelligible as to conditions of time and place, and amorphous detail again assumed shape and function within the circle of correlated circumstance, thus becoming part of a living and growing organism. In 1867 a supplement appeared, adding to the 1,500 poets and their numerous productions, 80 new versifiers and 500 new poems.

The Germany of 1870 found in Zunz as an elector a loyal cooperator in its destiny. In 1872 he raised his voice in his "Deutsche Briefe" in defense of the purity of the German language, menaced by the journalism and vulgarity then rampant. The same year he wrote his "Monatstage des Kalenderjahres," a memorial calendar recording the days on which Israel's great sons and martyrs had died, and giving characteristic details concerning their labors and lives.

A new field now began to attract his attention, that of Bible criticism; and in his studies on Deuteronomy, Ezekiel, Leviticus, and Esther ("Z. D. M. G." xxvii. 669-689) he reached conclusions diametrically opposed to those deduced by the traditionists and even by the conservatives, proving the untenability

of the dogma of the Mosaic authorship of the Pentateuch. In his "Gesammelte Schriften" these essays have been reproduced, and others on Exodus, Numbers, and Genesis have been added ("G. S." i. 217-270), proof sufficient that Zunz did not discredit his own studies in spite of the outcry raised against them.

In his letters addressed to David Kaufmann he took occasion to declare his indifference toward "babblers and hypocrites." "It is not my business to defend religion, but to defend human rights." "Opinions on books are not subject to the authority of religion." "Why do they not inquire whether it be true or false? Miserable men they who desire not to be disturbed." "My first critical studies go back to 1811, long before Hengstenberg's day and the splendor of other 'critic-astra.'"

The light of his life was now to fail him. On Aug. 18, 1874, his Adelheid, known to their friends as "Die Zunzin" (= "female Zunz"), passed away. From this blow Zunz never recovered. His entire literary activity was limited to superintending the publication of his "Gesammelte Schriften." Though the ninetieth anniversary of his birthday was celebrated throughout the world and brought to him messages of love from the four quarters of the globe, even being marked by the publication of a "Zunz Jubelschrift," he felt that few remembered his existence. David Kaufmann alone seems to have succeeded in arousing in him the old interest for Jewish studies; and Steinschneider was perhaps the only one with whom he maintained personal intercourse. His thoughts dwelt with her who had been his companion.

While all parties in Judaism have claimed Zunz for their own, his Bible-critical epilogue to his labors (in a letter to David Kaufmann) justifies the assumption that, if he is to be classified at all, he must be assigned a place with Geiger, with whom he was on terms of closest intimacy, and to whose "Zeitchrift" he was a regular contributor. The end, superinduced by a fall, came on March 18, 1886. To the last he was clear in mind and in the full possession of his faculties.

**ZUPNIK, AARON HIRSCH:** Galician Hebrew and Judeo-German writer; born at Drohobycz c. 1850. In addition to editing the "Drohobyczer Zeitung," a Judeo-German weekly begun in 1883, and the "Ziyyon," a periodical which was at first devoted to Hebrew literature (irregularly from 1885 to 1888) and later became a monthly scientific publication (1896-97), Zupnik published the following works: "Kedushshat ha-Shem" (Brody, 1867), a historical novel depicting Jewish life in Spain and adapted from Ludwig Philippson's "Jacob Tirado"; "Toledot Abraham" (Lemberg, 1869), biography of Abraham Cohn, a preacher of Lemberg; "Emet u-Mishpat" (Drohobycz, 1883), a Hebrew translation of Joseph von Wertheimer's "Jüdische Lehre und Jüdisches Leben" (also published in Polish under the title "Nauka Zydowska"); "Vom Heder zur Werkstätte" (ib. 1884), a Judeo-German novel dealing with Jewish life in Galicia; "Zur Lösung der Judenfrage Durch die Juden" (Berlin, 1885).

**ZURICH:** Capital of the Swiss canton of the same name. Jews first settled there in the early part of the fourteenth century, and soon acquired considerable wealth by lending money. They paid high taxes for toleration, but were allowed to buy and own houses, including the castle of Manegg on the Utlberg and an estate in the Beckenhof. On the whole, they were treated justly by the government, although they were subject to medieval restrictions, being obliged to wear the **JUDENHUT**, and probably also the **BADGE**. Of Talmudic authors only Moses of Zurich, the annotator of the "Semaḳ" of ISAAC BEN JOSEPH OF CORBEIL, is known (Neubauer, "Cat. Bodl. Hebr. MSS." pp. 183-184).

In 1348 the Black Death brought about a change in the condition of the Jews, who were accused of having poisoned the wells. At the same time they were charged with the murder of a boy, and in 1349 a number of Jews were burned in consequence of these two calumnies. Soon afterward, however, Jews again settled in Zurich, and in 1401, when those of Schaffhausen and Winterthur were burned on account of the murder of a Christian boy at Diessenhofen, their colleagues of Zurich were protected by the city council against the citizens and guilds, although, for their own security, they were kept in confinement until all danger was over. The hostility of the people and of the guilds made it impossible, however, for the council to keep the Jews in the town any longer, and in the years 1424, 1435, and 1436 decrees of expulsion were issued against them. Two centuries later a Frankfurt Jew named Samuel Eiron made a remark derogatory to the founder of Christianity, and was beheaded, whereupon it was solemnly proclaimed throughout the town that no Jew should again be allowed to settle within it unless he had first received special permission.

From that date, 1634, until the middle of the nineteenth century no Jews lived in Zurich; nor was it until the emancipation of their coreligionists of Aargau in 1863 that the gates of the city were

XII.—45

opened to them. Shortly before this, however, a few Jews, mostly Alsations, lived in the suburbs of Zurich, where they founded a cemetery. After the emancipation Jews from Endingen and Lengnau, the only two villages in Switzerland in which Jews had always been allowed to live, migrated to Zurich in greater numbers, being followed by their coreligionists from other countries, especially from the neighboring German states. Among the well-known German Jews who lived and died in Zurich was Solomon L. STEINHEIM. About 1870 the congregation had increased sufficiently to employ a rabbi, the first incumbent being Moritz Levin (now with the Reform Congregation of Berlin); the second, Alexander Kisch (now in Prague). In 1883 a synagogue was built in Löwenstrasse. At present (1905) the Jewish population of Zurich is about 2,000, and, like the whole town, it is of an international character. In Zurich, as in the rest of Switzerland, the Jews are absolutely free politically, but social life is not yet devoid of prejudices. The Cantonal University and the Swiss Polytechnic School are attended by many foreign Jews and Jewesses, especially from Russia, and there are several Jewish professors and privat-docents in the two faculties. The gymnasium likewise has a Jewish teacher, and two Jewish representatives sit in the Cantonal Council, although no Jew is yet a member of the municipal government.

#### Emancipation.

The Zurich Jews are chiefly merchants, while the Polish and Russian immigrants are mostly pedlers. The chief community is the Israelitische Kultusgemeinde, directed since 1893 by Dr. Littmann, and containing 330 households. In addition to this is the Orthodox Israelitische Religionsgesellschaft, which has a room for worship in a private house, and also owns a cemetery. A Jewish library of several thousand volumes (including incunabula and manuscripts) has been purchased by the Israelitische Kultusgemeinde from a bequest of the historian Heidenheim (who died in Zurich), and presented to the municipal library.

**ZURITA:** Fortified city of Castile on the River Tajo, one and one-half miles from Pastrana. It had a Jewish community as early as 1137, when King Alfonso VII. won it from the Moors; and during the Almohade persecutions many Jews sought refuge there. In the charter granted the city by Alfonso

VIII in 1180, no distinctions were drawn between Jews and Christians, and on Dec. 20, 1215, the aljama in Zurita was exempted from all taxation by Henry I. of Castile in view of the pecuniary sacrifices made by its members during the war, and in recognition of its faithful defense and improvement of the fort entrusted to it. In 1474 this same aljama, which was so wealthy that it gave the king a thousand doubloons ("mille aureos"), paid, together with the aljamas of Pastrana and Almequera, two thousand maravedis in taxes.

**ZUTRA, MAR, I.**: Exilarch from 401 to 409. He was the successor of Mar Kahana and a contemporary of R. Ashi, whose enactments he had to follow in spite of his exalted position. He was obliged to leave Nehardea and take up his residence in Sura, where he held an annual reception at the opening of the harvest season for the delegates of all Babylonian communities, the receptions being called "riḥ" (רִיחַא דְּרִישֵׁי גְלוּתָא). In addition Mar Zutra received various other delegations at Sura. Nothing further is known about his career.

S. O.

**ZUTRA, MAR, II.**: Exilarch; born about 496; died about 520; ruled from 512 to 520. He was the son of Huna, who was appointed exilarch under Firuz; and he was born at the time when Mazdak endeavored to introduce communism in all Persia. The opposition against Mar Zutra, his imprisonment, and his early death have given rise to a number of legends. The following anecdote is told about his birth and the events preceding it: Mar Zutra's father was engaged in constant strife with his father-in-law, the school principal Mar Ḥanina, because the latter refused to obey the orders issued by the exilarch. Ḥanina was accordingly punished for his disobedience; and, being embittered and humiliated, he went into the prayer-house at night, and there shed a dishful of tears, whereupon he fell asleep. He dreamed that he was in a cedar forest, engaged in felling the trees; and when he came to the last cedar-tree King David appeared and forbade him to fell it. On awakening, Ḥanina learned that the entire house of the exilarch had perished, except his daughter, who was pregnant and had been spared. Soon afterward she gave birth to a son, whom the grandfather named Mar Zutra, at the same time assuming personal charge of his training. During Mar Zutra's infancy the exilarchate was administered by his brother-in-law Mar Paḥra, or Paḥda. The latter bribed King Kobad in order that he might remain in office; but when Mar Zutra had reached the age of fifteen, his grandfather presented him to the king as the legitimate ruler, whereupon the monarch installed him as exilarch. Mar Paḥda opposed this, but was killed by a fly which entered his nostril; and after that event the exilarchs had a fly on their seal.

Mar Zutra took up arms against the Persians, and organized an uprising to oppose the introduction of

communism, although the king himself was in favor thereof. The immediate cause of the uprising, however, was the assassination of the school principal Isaac, regarding which no accurate information exists. From the fact that Mar Ḥanina took part in the struggle, it may be deduced that it was of a religious character. At the head of a company of 400 Jewish warriors Mar Zutra advanced against the opposing Persian forces; and the battles fought by him have furnished material for various legends. It is told that a pillar of fire always preceded his army; and it is further stated that Mar Zutra founded an independent Jewish state, with Maḥza as his residence. He ruled as an independent king, and imposed heavy taxes on all non-Jews. In spite of his able government, however, immorality spread among his people, whereupon the pillar of fire disappeared. In a subsequent battle between Mar Zutra and the Persians the former was defeated; and both he and his grandfather Ḥanina were taken prisoners and decapitated, their bodies being suspended from crosses on the bridge at Maḥza.

The account of Mar Zutra's life is based on a mixture of historic facts and legendary narratives. Thus, the description of the uprising of the Jews against Persian reforms, the statement regarding the prominent position held by Mar Zutra, and the account of his death are all based on historical data, whereas the stories of the extinction of the exilarchal house are legendary, as are also the dream of Ḥanina (which corresponds with that of Bostanni) and the account of the pillar of fire. All those legends, however, which tend to prove that the later rulers of Babylonia were usurpers have a basis of truth, inasmuch as Mar Zutra's only son emigrated to Jerusalem.

**ZUTRA, MAR, BAR MAR ZUTRA**: Palestinian scholar. On the day of his birth his father was crucified, and his mother fled with him to Palestine, where he was later appointed archipherecite (see ARCHIPHERICITES). According to Brüll, he was active in causing the scientific material collected in Palestine to be gathered together and examined; and the Palestinian Talmud is said to have been completed in his lifetime. During his term of office the order of Justinian in relation to reading from Holy Scripture was promulgated; and the first opposing utterance is said to have been made by Mar Zutra. His place of residence was probably Tiberias, and by virtue of his title he was the official leader of the Palestinian Jews.

S. O.

**ZUZIM**: Name of an ancient people mentioned in Gen. xiv. 5 as residing in Ham, the territory east of the Jordan, and as having been smitten by Chedorlaomer. The narrator must have supposed that the Zuzim were well known, for he prefixes the definite article to their name, though its use may also imply that even to him the nation was somewhat nebulous. This prefix induced the Septuagint and the

Peshitta (or the scribe of the copy underlying their version) to read the name as an appellative. They therefore translate it as "the strong" (= "ha-'izzuzim") or "the mighty" (= "ha-'ezuzim"), and thus identify the people with the Rephaim, the giants who occupied the district and who are said to have been called "Zamzummin" by the Ammouites (Deut. ii. 20). The rendering of Symmachus results from a combination of the two names Zuzim and Zamzummin (Σοαζομμεν), and thus anticipates those modern scholars who maintain that the names are identical, the variance being due to scribal errors. Sayce ("Higher Criticism and the Verdict of the Monuments," pp. 160 *et seq.*; "Expository Times," viii. 463), proceeding on the theory that Gen. xiv. is a translation of a Babylonian document, advances the hypothesis that the double spelling of the name arose from the identity of the characters "m" and "w" in Babylonian. It has also been proposed to connect the name with Ziza, a military post of the Roman period (Dillmann, "Genesis," *ad loc.*).

E. G. H.

**ZWEIFEL, LAZAR (ELIEZER ZEBI B. DAVID HA-KOHN)**: Russian apologist and critical compiler from rabbinical works; born at Moghilef April 15, 1815; died at Gluchof Feb. 18, 1888. He was a lecturer in the rabbinical seminary of Jitomir from 1853 until the institution was closed in 1874. Zweifel was a collector of excerpts and quotations from rabbinical literature, which he used in all his works to such an extent that they comprise about three-quarters of the text. One large "yalikut" of his compilation was burned, and only about a tenth of the original work was saved from the fire that once destroyed his house. Zweifel acted as a mediator and peace-maker between the various Jewish sects, and was especially prominent as a protector of the HASIDIM. He also defended the Karaites against the attack of Deinard, and even had a good word for Reform ("Sanegor," pp. 38-41, 43). He endeavored also to give a Jewish coloring to Spinoza's philosophy, and quoted fifty opinions, most of which, including that of Besht (BA'AL SHEM-TOB), were in harmony with the philosopher, while he himself contended that the only difference lay in the fact that Spinoza used words without careful discrimination to explain his system ("Shalom 'al-Yisrael," iii. 43, ed. Wilna, 1873).

Zweifel was a prolific writer and one of the first to use Talmudic and idiomatic Hebrew for the modern poetry which he frequently composed, stanzas being interspersed throughout his works. He was also a talented and epigrammatic Yiddish author, and some of his productions in that field were published in Spector's "Hausfreund."

Zweifel is best known through his apologetic "Shalom 'al-Yisrael," a work in four volumes, two of which are marked "part true." He based his defense on the ground that "Beshtism" (בעשטנות) is the development of the views expressed in the "Moreh Nebukim" of Maimonides, the "Hobot Lebabot" of Bahya, and the "Mesillat

**Defense of Hasidism.** Yesharim" of Moses Luzzatto. He showed also that similar ideas were found in Luria's cabalistic system, and demonstrated that the Hasidic minhagim were mere repetitions of

what had already been recognized in the Talmud and in early literature by Philo and other Alexandrian Jews ("Shalom 'al-Yisrael," i. 47a). He claimed, moreover, that the prejudice against the Hasidim and the persecutions which they were forced to endure at the hands of their opponents were as unjust as the oppression of Jews by Christians (*ib.* vi. 59). He admitted, however, that Hasidism had changed somewhat since the time of Besht, and that the rank and file of those who professed Hasidism no longer strictly followed the ancient path. He accordingly urged the leading rabbis or zaddikim, especially R. Mordecai of Czerubel, R. Israel of Razun, and R. Mendel of Lubawicz, to instruct their thousands of adherents to weed out the idlers among them, and to refrain from denunciations and appeals to the government in their petty quarrels, likewise imploring them to cease introducing innovations into minhagim (*ib.* iii., end, ed. Wilna).

Zweifel was bitterly criticized by the Maskilim for his apologetics and panegyrics of the Hasidim. Hayyim Selig Slonimski, his colleague in the rabbinical seminary, made a public protest, de-

**Replies to Zweifel.** claring that Zweifel's opinion was not shared by the faculty and that he

trusted it would make no impression on the students ("Ha-Meliz," viii., No. 37; comp. also Nos. 42-45, 47). Some remarked that his name Zweifel (= "doubt") was indicative of his wavering and unbalanced mind, and J. L. Gordon hesitated to take Zweifel seriously ("Iggeret Yeleg," ii. 277), while Isaac Hirsch Weiss regarded his efforts to harmonize the factions as unavailing, all refutation of false accusations against Jews in general being superfluous or useless, though he admitted Zweifel's good intentions and the value of his works taken as a whole ("Ha-Asif," iii. 152).

The works of Zweifel are as follows: (1) "Minnim we-'Ugab," containing a poetical introduction in which the numerical value of the let-

**Works.** ters of each line is 1,856 (the year of issue), notes on various passages of the

Bible and Talmud, poems, and a collection of sayings entitled "Pirke de R. Eliezer ha-Kaṭan" (Wilna, 1858); (2) "Musar Ab," containing the letter of admonition addressed by Maimonides to his son Abraham, the ethical will of Judah ibn Tibbon to his son Samuel, together with notes and explanations, and 150 proverbs (Jitomir, 1865); (3) "Pardes Rimmonim," explanations of legendary haggadot in the Talmud, by Shem-Ṭob Shaprut (first ed., Sabbionetta, 1554), edited with an introduction and remarks (Jitomir, 1866); (4) "Likkuṭe Zebi," a collection of remarks on the Bible and Midrash by Hirsch Zebi Segall of Kovno, edited with introduction and notes (*ib.* 1866); (5) "Tushiyah," stories and poems, chiefly translations from Russian and German (*ib.* 1867); (6) "Homer be-Yad ha-Yozer," an ethico-philosophical commentary on Pappenheim's liturgical hymn "Ki Hinne Ka-Homer" for the eve of Yom Kippur, with notes, a eulogy on Solomon Lōb Rapoport, and similar material (*ib.* 1868); (7) "Shalom 'al-Yisrael" (i.-iii., part 1, *ib.* 1868-70; iii., part 2, Wilna, 1873; iv., Jitomir, 1873; comp. J. S. Trachtmann in "Ha-Karnel," 1873, No. 11); (8) "Bet Middot," moral and ethical teachings by

Jacob Löb Margoloth, with notes (Jitomir, 1870); (9) "Heshbon shel 'Olam," on theodicy (Warsaw, 1878); (10) "Nezah Yisrael," the vitality of the Jewish nation explained by the teachings of Judaism (St. Petersburg, 1884; reprint from Zederbanm's "Meliz Ehad Miuni Elef"); (11) "Sanegor," a defense against the accusation of materialism and Talmudic Judaism, divided into five sections and giving historical explanations (Warsaw, 1885; 2d ed., Wilna, 1894; comp. J. L. Freidkin in "Keneset Yisrael," i. 242; Berdyczewski, in "Bet ha-Midrash," i. 87); and (12) "'Olam Kaṭan," or "Klein Weltel," a Yiddish poem reprinted from "Ha-Zofeh" (London, 1894). Zweifel wrote also numerous articles for the Hebrew weeklies and magazines.

Zweifel's granddaughter **Pauline Zweifel** is an opera-singer of international reputation. She graduated from the Warsaw Conservatorium, made her début at Milan, and sang at the opera house in Rio de Janeiro in 1905.

J. D. E.

**ZWEIFEL, PAUL:** German gynecologist; born at Höngg, near Zurich, Switzerland, June 30, 1848; educated at the University of Zurich (M.D. 1871). In 1871 he received the "venia legendi" at the University of Strasburg, where he had already become assistant in the gynecological institute. In 1876 he was appointed professor of gynecology at the University of Erlangen, and in 1887 he was transferred to Leipsic. He has the title "Geheimer Medizinal-Rat."

Zweifel has contributed over one hundred monographs to medical journals. Among his many works may be mentioned: "Ueber den Verdauungsapparat der Neugeborenen" (Strasburg, 1874); "Lehrbuch der Operativen Geburtshülfe" (Stuttgart, 1881; appeared as "Lehrbuch der Geburtshülfe," *ib.* 1887, 5th ed. 1901); "Der Einfluss der Aertzlichen Thätigkeit auf die Bevölkerungsbewegung" (*ib.* 1887); "Die Symphyseotomie" (*ib.* 1893); and "Aetiology, Prophylaxis und Therapie der Rachitis" (*ib.* 1900).

## LIST OF PATRONS

## LIST OF PATRONS.

---

With this the concluding volume of **THE JEWISH ENCYCLOPEDIA** the **FUNK & WAGNALLS COMPANY** fulfil the promise made to their subscribers nearly eight years ago to supply the world at large with a full account of the history, views, and sociology of the Jewish people from their appearance in history down to the present day. The publishers feel that they may claim to have carried out their promise unstintingly, and with sole regard to thoroughness of workmanship. A few figures, which may be interesting in themselves, will suffice to substantiate this claim. The promise was made to provide twelve volumes containing 8,000 pages supplied by 400 contributors, and embellished by 2,000 illustrations. The twelve volumes contain 8,572 pages, written by 605 contributors, and supplemented by 2,464 illustrations, a large number of them full-page, with a considerable number of photogravures, and 23 reproduced in facsimile by lithographic process in colors. Of the merits of the work it is scarcely the publishers' place to speak, but the universal verdict of the press of the world has been that it presents its subjects in fulness of detail and with perfect impartiality of treatment. It has been the aim of the editorial board to present all sides of Jewish life from every standpoint held by any important section of the Jewish community. Imperfections there must needs be in a work of this scope, which has absolutely no forerunners by which it can be checked; but care has been taken to reduce these to a minimum by every device that has been suggested by the ingenuity of the editorial board or the experience of the publishing-house. In cases of doubt resort was had to the advice of the boards of consulting editors in Europe and America, especially on matters of general policy. During the making of the Encyclopedia the American board was unfortunately decreased by the regretted deaths of Dr. M. Mielziner and Dr. M. Jastrow, the latter of whom to the end of the second volume was editor of the Talmudic Department, and who showed his interest in the work by remaining a consulting editor till his death. The foreign board lost Prof. Moritz Lazarus, Dr. Eude Lolli, and Dr. Kaysersling, the last of whom, besides acting as a consulting editor, contributed the largest number of articles to the Encyclopedia of all contributors other than the office staff.

The 8,168,957 words the presentation of which this volume completes have been selected for the reader from the 9,630,211 that were supplied by the contributors; or, in other words, one word out of every six has been eliminated in order to present the fullest amount of information within the space limits. By this use of the pruning-knife the alphabetical division of the volumes was made to coincide almost exactly with the schedule laid down before the first volume was issued. In this way alone it became possible to treat subjects in the later letters of the alphabet with just as much fulness as those in the earlier volumes.

As promised in the first volume, the Funk & Wagnalls Company repeat herewith the list of staunch friends of **THE JEWISH ENCYCLOPEDIA** who by their loyal trust have rendered the production of these volumes practicable. In an enterprise of this kind, addressed in the first place to a special public, the support of that public during the progress of the work is as necessary for its adequate completion as is the literary ability of the editorial board or the executive capacity of the publishing-house. The promises of the list of patrons contained in the first volume encouraged the Funk & Wagnalls Company to undertake the work; the fulfilment has enabled them to carry it through to what may be fairly termed a triumphant conclusion. They hereby render their thanks to those who throughout this arduous undertaking have stood by their side as silent but very efficacious helpers.

Unfortunately, great discrepancies exist between the former list and that now presented to the reader. Through misunderstanding, through ill health, or through failure of means, a number of the original subscribers found themselves unable to carry out their engagements, and at one time the Funk & Wagnalls Company had in view the suspension of the work owing to this lack of support. At this juncture a number of public-spirited gentlemen in America undertook to guarantee the sale of a certain number of copies of the Encyclopedia, and others in England, headed by Sir Isidore Spielmann, made an earnest and successful appeal for increased subscription. Thus encouraged, the Funk & Wagnalls Company determined to continue in a task which, if it promised no adequate profit, seemed to them a worthy contribution to the higher life of America and of the world. Sustained by the support of these gentlemen, the Funk & Wagnalls Company have spared no pains or expense to carry out the plans of the editorial board in their entirety, and

trust that the work now presented to the reader is a worthy outcome of American constructive scholarship and of American publishing enterprise.

The names of the American public-spirited gentlemen referred to above are as follows:

NATHAN BIJUR	LOUIS MARSHALL	LOUIS STERN
CHARLES S. HENRY	M. WARLEY PLATZKE	ISIDOR STRAUS
PHILIP S. HENRY	JACOB H. SCHIFF	C. L. SULZBERGER
